The retained dealers were initially told that they must order cars sufficient to meet sales quotas that were to be set unilaterally by Newco and that failure to do so would violate the agreement – in violation of laws of the States that prohibit dealers from being coerced to order unneeded inventory. (PL, Par. 2 and 3). The PL also provided (Par. 4) that the retained dealers must eliminate all non-GM brands from their premises by December 31, 2009 – again in violation of the laws of numerous States that bar dealers from being required to limit the brands that they must sell. The revised PL purports to soften the sales quota and inventory requirements as well as the exclusivity provisions, but stated that it reserved the right of Newco to demand exclusivity in at least some markets. (Other portions of the letter, though, stated that decisions on exclusivity would be made by mutual consent – but, in light of the coercive approach used here, it is debatable how consensual such a discussion may actually be.) Moreover, some States report that dealers who have signed the agreement have already complained to them that they have been pressured to take on unwanted inventory.

Under the WL (par. 3), dealers are offered a specified amount of assistance (varying by dealer) – with 25% to be paid immediately and the balance at the end of the dealer operations, although there are a variety of potential hold-back provisions. That amount is in lieu of any other rights the dealer would have under state law, which might provide a greater or lesser remedy. While the WL purports to allow the dealers to continue under their contracts until October 31, 2010, in reality, they can be terminated by as early as January 31, 2010. Further, dealers are no longer allowed to order any new vehicles after the agreement is signed and, after December 31, 2009, the contracts may be cancelled at any time on 30 days notice. (See WL, pars. 2(a) and 6(a)). As a result, these dealers, while operating under a purportedly "assumed" dealer agreement, are forced to accept a modification of the agreement that strangles their

operations early in the term of that agreement by denying them any new stock to sell (in violation of laws of the States that require manufacturers to supply inventory as needed). Moreover, the WL also requires those dealers to immediately turn over all of their customer information so that it can go to retained dealers, and they are barred from protesting any action by a retained dealer to move into their area and solicit their customers, even while their dealer agreements purportedly remain in place. (WL, pars. 2(b) and 7).

There are other problems with both letters (as set forth in the Appendices) but two provisions stand out. One requires dealers to keep all of its terms confidential, thereby attempting to impede the States from even learning of the existence of these efforts or the need to enforce their laws in respect thereto. (PL, par. 9(h) (as amended), WL, par. 9). The second purports to give the bankruptcy court *exclusive* jurisdiction to determine any issues related to these agreements, apparently in perpetuity (PL par. 9(g) (as amended), WL par. 13). During the case, that language potentially contradicts Section 362(b)(4) and 28 U.S.C. § 1452(a), which except police and regulatory actions of government agencies from the automatic stay and bar their removal from the state courts. Moreover, to the extent that the agreements regulate the relationship between the dealer and Newco – two non-debtor parties – in ways that will not affect the estate,[9] it is doubtful this court has any jurisdiction under 28 U.S.C. § 1334, much less exclusive jurisdiction over those issues. That is particularly true after the case is closed, yet this provision gives this Court that exclusive jurisdiction in perpetuity – in violation of the laws of

[9] Section 365(k) removes GM – the actual debtor – and its estate from any continuing liability for breaches of the agreement after they are assumed. The proposed Order provides those protections to GM (par. 24).

most States, which place jurisdiction for issues under their Dealer Law exclusively in their motor vehicle commissions or similar agencies.

The efforts to modify the agreements contractually (in ways that violate state law) are compounded by the terms of the proposed sale order, which, as noted above, purports to remove this transaction from the reach of *any* law whatsoever (see par. 39), thereby denying the dealers any rights under the Dealer Laws, whether or not they "voluntarily" signed these agreements. Moreover, the order purports, in paragraph 27(f) to bar any governmental entity from any "proceeding against the Purchaser, its successors and assigns, or the Purchased Assets, with respect to any (i) Claim other than Assumed Liabilities . . . including, without limitation, the following actions . . . (f) revoking, terminating, or failing or refusing to renew any license, permit, or authorization to operate any of the Purchased Assets or conduct any of the businesses operated with such assets." "Claim" is a defined term in the MPA that goes far beyond a Section 101(5) bankruptcy claim;[10] by barring governments from any proceedings relating to an MPA "Claim" against the Purchaser or the Purchased Assets, this provision would serve to essentially remove that party and those assets from the regulatory purview of the States – "*forever*." Such a prohibition greatly exceeds any limits that might be imposed by Section 525 – both as to the scope of the protection and its apparently infinite duration. By seeking entry of these provisions,

[10] The MPA defines "Claims" as meaning "all rights, claims (including any cross-claim or counterclaim), investigations, causes of action, choices in action, charges, suits, defenses, demands, damages, defaults, assessments, rights of recovery, rights of set-off, rights of recoupment, litigation, third party actions, arbitral proceedings or proceedings by or before any Governmental Authority or any other Person, of any kind or nature, whether known or unknown, accrued, fixed, absolute, contingent or matured, liquidated or unliquidated, due or to become due, and all rights and remedies with respect thereto." That includes numerous matters that are not "rights to payment," including most obviously "defenses" and "rights of recoupment," but also includes injunctive matters that do not fall under Section 101(5)(B) and matters that are too inchoate or unknown to constitute a present claim.

the Debtors seek to permanently insulate their efforts to force dealers to sign unlawful agreements from review or action by the States. Those terms, moreover, would give Newco rights vis-a-vis dealers into the future that are denied all other manufacturers. In short, dealers have been presented with a "take it or leave it" ultimatum – either waive your rights under state law so you can remain a dealer or at least receive some assistance on termination – or exercise your rights under that law and have the Debtors and Newco seek to deny you any rights and benefits altogether. While the dealers signed an agreement containing a (non-negotiable) statement that "its decisions and actions are entirely voluntary and free from any duress," the facts plainly indicate otherwise. Even with the changes made by GM to the PL, both that agreement and the WL still have provisions that violate the States' laws. As such, the Dealer Laws provide that such "agreements" are not enforceable against the Dealers on a going forward basis to the extent of such unlawful provisions.

III. Argument and Specific Objections

A. Section 363(f) Does Not Authorize the Relief Sought by the Motion

1. Section 363(f)(5) does not provide for sales "free and clear" of "claims"

The States discuss below various objections to specific provisions of the MPA and its treatment of particular types of claims, but, more broadly, they object to the reliance on Section 363(f) as purported authority to impose the wide-ranging restrictions contained in the proposed Order and to distinguish between assumed and rejected liabilities as set out in the MPA.

Section 363(f) provides the authority by which a debtor may seek to sell assets "free and clear" of "interests" of third parties in the debtor's property and have those rights attach to the proceeds of the sale. Everywhere else in the Code, the term "interest" is used to refer to some form of *in rem* lien or ownership interest in a particular asset. That usage is fully consistent with

the Section 363(f) reference to an entity's "interest in [the debtor's] property." By contrast, referring to a "claim in someone's property" is quite an odd usage of the English language. *In personam* claims, by definition, are free floating obligations that do not attach to any piece of property but can be satisfied from any unencumbered asset of the debtor party.

On the other hand, Section 1141(c) provides that, upon confirmation of the plan, the property dealt with thereunder is "free and clear of all *claims and interests* of creditors, equity security holders, and of general partners in the debtor." (Emphasis added). By contrasting that language with the more limited provision in Section 363(f), it is clear that, under a plain meaning reading of the Code, a sale under Section 363(f), unlike plan confirmation under Section 1141(c), cannot provide for a sale free and clear of "claims." *See, e.g., Russello v. United States,* 464 U.S. 16, 23 (1983) ("[W]here Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion."

The States are, to be sure, well aware of the fact that, as discussed in the Debtor's memorandum, many courts have concluded that, notwithstanding that patent difference in wording, Section 363(f) *does* authorize sales free and clear of claims. The reasoning in those cases, though, is tortured, i.e., a claim is really an "interest in property" simply because it somehow arises out of the fact that the debtor owned the property. *See, e.g., In re Trans World Airlines, Inc.*, 322 F.3d 283, 289-90 (3rd Cir. 2003) (holding that any claims that are "connected to, or arise from" the property in question are "interests." Under that reasoning, though, there would be few, if any, claims against a business that would not also be an interest[11] – in which

[11] Since businesses do not have an independent existence apart from their assets and operations, it is difficult to imagine a claim that is not in some sense "connected to" the business

case, it is very difficult to imagine why the Code goes to pains to distinguish interests and claims everywhere else in the Code but conflates them here. *See, e.g.,* Sections 1122, 1123, 1124, 1125, 1126, 1127, 1129, and 1141, all of which refer to holders of "claims" as distinguished from holders of "interests." Put another way, had the Code not included all of those other sections which distinguished claims and interests, one might perhaps more reasonably be able to argue that claims were a subset of the term "interests," and could be included therein. Where, however, Congress has taken such great care in the Code to make clear that claims are different from interests, it defies the canon of construction cited above to assume that, in Section 363(f) – and only in that subsection – it changed its mind and intended to make those two terms coterminous.[12]

The States submit that the assumption that allowing sales free of successorship liability will result in higher payment offers has resulted in a skewed analysis of these provisions. They further submit that such a view cannot be allowed to override the plain meaning of the statute. First, any issue regarding purchase offers is amenable to bargaining by parties that takes into account the possibility of successorship liability. That possibility does not necessarily change the amount paid; at most, it merely revises who may receive the payments. But, that does not

---

operations or arising therefrom. A person might engage in a tort separate from any property he or she owns (liability for a punch in the nose is not dependent on being a landowner), but how would a business create a claim not "connected to" the assets with which it operates?

[12] In *TWA*, *supra,* 322 F.3d at 290, the Third Circuit argued that claims are included in the term "interest," because an interest must be more than a "lien," noting that Section 363(f)(3) refers to "liens" as only one form of interest. That argument is a red herring, though – of course, liens are not the only form of "interest" – ownership rights are the most obvious other form, but there may be other forms of "interests," such as attachments, *lis pendens* notices, and the like that might or might not fall strictly under the definition of a "lien." Such other forms of interests are plain enough to fully explain the drafting of Section 363(f) without any need to ignore the well-established distinction in the Code between "claims" and "interests."

violate the Code anymore than it violates the Code if purchasers *voluntarily* choose which liabilities they prefer by means of their assumption agreements. According to the cases cited in the Debtor's memorandum of law, such decisions are merely a consequence of the purchase, not a violation of the Code's priority provisions. *See In re Trans World Airlines, Inc.*, 2001 WL 1820326, at *11 (Bankr. D. Del. 2001) ("the disparate treatment of creditors occurs as a consequence of the sale transaction itself [i.e., the buyer's decision as to what price to offer and what liabilities to assume] and is not an attempt by the debtor to circumvent the distribution scheme of the Code." They do not become any more improper if the preferences are imposed involuntarily under successorship liability rather than by the buyer's personal predilections. As those courts have indicated, a sale under Section 363 is not the same as a Chapter 7 distribution or a Chapter 11 plan; if so, there is no reason why such a sale should be allowed to ignore all applicable law that deals with the consequences of such transfers. The Seventh Circuit, in *Zerand-Bernal Group, Inc. v. Cox*, 23 F.3d 159, 164 (7th Cir. 1994) provides a succinct description of why it is improper to allow debtors and purchasers to seek to use Section 363 transfers to immunize the buyer from all of the consequences of the transfer.

Accordingly, the States object to the provisions of the Order that purport to find that "claims" (as defined by Section 101(5)) are covered by Section 363(f)(5) and that, for that reason, the assets may be sold free and clear of those rights.

2. If the Parties to the MPA seek a declaration as to whether the purchaser is a successor to the Debtor, they must actually litigate that issue before this Court

If Section 363(f)(5) does not, of its own weight, provide for sales "free and clear" of claims and the elimination of all successorship rights, that does not, conversely mean that the sale automatically *does* confer such rights on all parties and for all types of claims. As indicated

in the *Mickowski* case, in some areas, there is an overwhelming federal interest and a consequent federal common law analysis of whether a transfer creates a successor. Labor and other employment issues is the most common area where such law is applied – but, here, the debtors have already resolved those issues, at least with respect to their collective bargaining units.[13] Other areas, such as environmental and tax claims, or personal injury liabilities, may turn on different considerations. As to the dealer liability issues, in view of the special concern for such rights and obligations shown by both the federal and state laws, the States respectfully submit that the same federal common law, "substantial continuity" test should be used for these issues as for employment issues.

Under that test, it is patently clear that Newco qualifies as the successor to the Debtors since everything about this transaction is intended to ensure a "seamless" transition for the operating facilities where the only difference will be who owns Newco. Employees, supervisors, facilities, and products will be unchanged and working conditions largely so, subject only to changes negotiated by the employees' representative.[14] That result plainly qualifies under *Fall River* for GM's own operations.[15] And, where laws in many States require acquirers to take on dealerships and impose procedural requirements for how changes may be made to the contractual

---

[13] Even then, the analysis is not all or nothing; depending on the way a transaction and hiring decisions are structured, a successor purchaser may be required to recognize a union, but not necessarily to abide by the terms of its contract. *Fall River*, *supra*, 482 U.S. at 40-41.

[14] To be sure, as time goes on, Newco will develop new products, run different ad campaigns, negotiate for new working conditions and the like. Successorship is gauged at the time of transfer; it does not require that the buyer's operations remain frozen in amber forever.

[15] In *Fall River*, the Court noted that the issue was to be analyzed from the employees' perspective as to whether their jobs had changed and it was irrelevant that the new owner bought the assets on the open market after a seven-month hiatus in operations, unlike here where there will be no break in operations.

agreements with those parties, the Debtors and Newco can avoid a finding of substantial continuity as to the dealers, only by violating their obligations under those laws.[16] As discussed below, there is no basis under the Code to allow such violations of those dealer laws. In short, under the facts before the Court, there is much to indicate that Newco *is* a successor and little, other than its own desires, to indicate that it is not. Certainly, the evidence does not warrant the sweeping pronouncements on successorship status that are contained in the Order, without any support in the Motion.

The States believe that, in the normal course, there is no need for those issues to be decided now, in the context of a Section 363 sales motion that merely needs to authorize a transfer of property. If, though, the Court *chooses* to reach out at this time to determine those issues, it can only do so based on a full evidentiary record that allows it to actually analyze the factual and legal issues that go into a successorship determination. There is no basis for simply signing off an order that proposes that the Court should "find" that such rights do not exist without any appropriate analysis of the issues. If, upon analysis, it finds that successorship rights do *not* exist in some or all of the situations for which the Order seeks "free and clear" language as to claims, then it can find that the liabilities do not attach to Newco and include language to that effect in the Order. The numerous Order provisions, however, that broadly eliminate all rights based on "successor or transferee liability" should be stricken unless and until that determination is made. Moreover, any that do appear in the Order should be closely tailored to the applicable law on successorship.

---

[16] The result would be much the same as if a purchaser bought a unionized facility and avoided a successorship finding by deliberately refusing to hire the unionized employees in order to avoid having to recognize the union.

Further, as a procedural matter, the States object to the way in which the Order is drafted. At present, the language dealing with these issues is so lengthy, convoluted, repetitive, and redundant that it becomes almost impossible to sort out what is actually being barred and what remains. Those provisions can and should also be substantially shortened; it is surely possible to state the rights and immunities provided to Newco in a paragraph or two, not in 14 separate ones. When one does try to sort through the provisions, it is clear, as discussed next, that major aspects of the Order would be improper, even assuming that the Court could authorize a sale "free and clear of claims."

B. Provisions of the Order are Overly Broad, Even if a Sale Could be Made "Free and Clear" of Claims

1. The Order sweeps too broadly in determining as to which claims the Sale can transfer "free and clear"

Even assuming Section 363(f)(5) could be read so broadly as to include "claims" in the "free and clear" sales process, the proposed Order sweeps in far more than what the Code defines as a claim. Moreover, the Order is highly confusing on the subject because it frequently mixes the term "claim" – an undefined term, which may or may not be meant to be the same as the Code's definition of "claim" in Section 101(5) – with the defined term "Claim" as used in the Motion. As noted above, the Motion defines "Claims" in terms that are vastly broader than a 101(5) bankruptcy claim, including items such as "defenses," rights or recoupment and setoff, and *any* form of action against the debtor, including purely injunctive relief.

Bankruptcy claims, though, while broad, are limited to "rights to payment" and exclude at least some equitable relief. *In re Chateauguay Corp.*, 944 F.2d 997, 1008 (2nd Cir. 1991) *In the Matter of Udell*, 18 F.3d 403, 408 (7th Cir. 1994) (right to equitable enforcement of contractual no-compete clause was not a "claim"). Including such matters in the term "Claim,"

and using that term in the Order, when they are *not* bankruptcy claims, creates unwarranted confusion. Similarly, "defenses" are not rights to payment as they merely deny the debtor's rights. Accordingly, defenses are not claims, and neither are rights of recoupment, since recoupment is also a defense and *not* a claim under Section 101(5). *See, e.g.*, *Westinghouse Credit Corp. v. D'Urso*, 278 F.3d 138, 146 (2nd Cir. 2002); *In re Malinowski*, 156 F.3d 131, 133 (2nd Cir. 1998). Statutory obligations that look to future enforcement rights, rather than seeking prior payments, generally are not claims either, but could easily fall under the "Claim" definition used in the MPA and, arguably could no longer bind Newco after the closing. Finally, certain rights are too inchoate or unknown to rise to the level of a claim at the time of the bankruptcy case and courts have not allowed such claims to be discharged by debtors in a plan. *Chateauguay* 944 F.2d at 1003-1005 (discussing example of persons who might be injured post-confirmation if a bridge on which they were passing collapsed), *In the Matter of Crystal Oil Co.*, 158 F.3d 291, 296 (5th Cir. 1998) (environmental claim does not arise until agency can tie debtor to known release of hazardous substance)*; Fogel v. Zell*,221 F.3d 955, 960 (7th Cir. 2000) (discussing fact that tort claim generally deemed not to exist until injury occurs); *In re Kewanee Boiler Corp.*, 198 B.R. 519, 527-28 (Bankr. N.D. Ill, 1996) (tort victim did not have even contingent claim until after injury occurred one year after confirmation).

Thus, even where the Code allows debtors to discharge clams by means of a plan, post-confirmation injuries cannot be swept under its terms (absent, perhaps, some form of trust fund set aside for "future claimants" as in the case of asbestos victims). Here, though, where Section 363 says nothing about selling free and clear of "claims," the Debtors and the Purchaser seek to sweep all such matters into its own self-defined definition of a "Claim," and then use that definition interchangeably with an undefined form of "claim" throughout the Order. The

provisions of the order, in turn, go every bit as far, if not farther than the rights granted to a reorganizing debtor upon confirmation.

Parties may certainly choose to use a defined term in any way that they wish in their own agreements such as the MPA, but the Court should not use such confusing terms in its order, to avoid ambiguity. Within Paragraph T alone, for instance, the proposed order includes references to "claims" (undefined), "claims (as that term in defined in the Bankruptcy Code)", and "Claims" (as defined in the MPA) – and, for good measure, throws in references to "debts" as well as a plethora of other terms, (such as "obligations," "demands," "options," and "restriction"). Some of those terms are already included in the definition of "Claims," and some are not, which further leads to confusion as terms become circular and self-referential.

The problem in determining what liabilities Newco seeks to avoid assuming is compounded by the fact, as previously noted, that the Order deals with that topic in 14 separate paragraphs, which are substantially – but not absolutely – redundant of each other. Again, to avoid confusion and to allow parties to have reasonable certainty as to their obligations, the Court should require that the Order only use terms defined therein, use them in a consistent manner, not allow the use of terms that are already defined in the Code in ways that are inconsistent with those definitions, and describe the relief granted in a succinct, clear, and nonrepetitive fashion, that parties can readily analyze.

And, in deciding what relief to grant, the Court must avoid allowing expansion of the already questionable concept of selling free and clear of bankruptcy claims so as to encompass obligations and rights that most assuredly are not bankruptcy claims at all. While one can, at least, fit the right to payment of a bankruptcy claim into the Section 363(f)(5) paradigm – i.e., a right for which there can be a monetary satisfaction, that does not apply, by definition, to rights

that are not bankruptcy claims, i.e. "rights to payment." As the Second Circuit noted in *Chateauguay*, an environmental agency cannot be forced to accept money and allow a polluter to contaminate the environment anew. By definition, then, a governmental right to bar pollution cannot fall under Section 363(f)(5) because it does not involve a right to payment, is not a "claim," and, is not a matter as to which the party can be required (indeed, even allowed) to accept a monetary satisfaction.

Nor can a purchaser somehow magically insulate itself not only from the claims of other parties, but also from their right to *defend* themselves against actions by the purchasers, merely by including defenses, recoupment, and setoff in the definition of a Claim. Those items may not properly be eliminated through a Section 363 order. See *Folger Adam Security, Inc. v. DeMatteis/MacGregor JV*, 209 F.3d 252, 260-61 (3rd Cir. 2000) (setoff and recoupment are not interests, defenses are not claims, "Thus, we agree with the Bankruptcy Court in *In re Lawrence United Corp*. and hold that a right of recoupment is a defense and not an interest and therefore is not extinguished by a § 363(f) sale."). Setoff, in particular, is protected by Section 553, which provides for the continued recognition of setoff rights under the Code.[17]

In short, to avoid having the Order infringe even further on the rights of parties holding claims against the debtors whose assets are being transferred to a third party, the Order should, at most, only extend that protection to "claims" under Section 101(5) and should avoid usage of the MPA term "Claim." If Section 363(f)(5) does allow sales free and clear of bankruptcy "claims" as well as "interests," (a point with which the States disagree), then that is all that need be said –

[17] The reference to Section 363 in Section 553 refers to the need to protect the *creditor's* right to adequate protection of its setoff rights; it is not authorization for the debtor and the purchaser to destroy those very rights in the course of a sale. *See* 5 Collier on Bankruptcy (15th ed. rev.) ¶ 553.01; ¶ 553.06[5] and cases cited therein.

and all that the Code can possibly be read to allow. Disallowing every right that a party may have against a purchaser vastly exceeds the scope of what Section 363 or any other provision of the Code offers to purchasers.

2. The proposed order improperly attempts to limit governmental police and regulatory powers

In Paragraph 15, the Order provides that "to the extent provided by Section 525 of the Bankruptcy Code," governments may not deny, revoke, suspend or refuse to renew licenses, permits, grants, and the like relating to the assets sold to Newco on account of the filing of the cases or the consummation of the sale. In one sense, the paragraph is innocuous – if all it does is state that Section 525 applies if Section 525 applies, it adds nothing to the fact that, yes, Section 525 applies here as in any other case to the extent that the facts so warrant. On the other hand, to the extent that the section purports to dictate any conclusion about whether Section 525 does apply to this situation, it should be revised or eliminated. First, there is no evidence whatsoever, that any governmental entity has sought to take action against the Debtors (or Newco) based on the commencement of the cases. Second, it is unclear to whom the paragraph is meant to apply – the Debtors or Newco – and Section 525 applies to actions against the Debtors.[18] Third, if it purports to find that Section 525 applies automatically to the sale transaction, that goes beyond

[18] It also refers to actions against parties "associated with the debtor." That has not generally been taken to refer to parties buying assets from a debtor, as opposed to, for instance, the spouse of a debtor. *In re Draughon Training Institute, Inc.*, 119 B.R. 927, 933 (Bankr. W.D. La. 1990) ("protection more properly extends to one who has been a co-owner, co-obligor, co-debtor, joint venturer, partner, agent, representative, or spouse of the debtor, rather than a transferee of the debtor."). (Compare *In re Betty Owen Schools, Inc.*, 195 B.R. 23, 29 (Bankr. S.D. N.Y. 1996) (Section 525 implicated where government directly tied its decision on purchaser's application to predecessor's actions). There is no showing of such a linkage here by any governmental entity and Newco, of course, asserts that it has no connection with the predecessor. As such, it is contradictory for it then to claim that it should be protected as being "associated with" that entity.

the limited terms of Section 525(a). It only applies to actions based *solely* on the filing of a case or the nonpayment of a dischargeable debt – neither of which applies to a sale transaction in and of itself.

While that paragraph is ambiguous, Paragraph 28 is not. It provides:

> [A]ll persons and entities are *forever* prohibited and enjoined from commencing or continuing in any manner any action or other proceeding, whether in law or equity, in any judicial, administrative, arbitral, or other proceeding against the Purchaser, its successors and assigns, or the Purchased Assets with respect to any (i) Claim other than Assumed Liabilities, or (ii) successor or transferee liability of the Purchaser for any of the Debtors, including, without limitation, the following actions: . . . revoking, terminating, or failing or refusing to renew any license, permit, or authorization to operate any of the Purchased Assets or conduct any of the businesses operated with such assets. (Emphasis added).

That provision is plainly improper. On its face, this provision states that governmental entities are *forever* barred from taking any adverse action with respect to licenses relating to the Purchased Assets with respect to any Claim that is not an Assumed Liability. Recalling that a Claim includes "investigations," "demands," "proceedings" by governmental entities and much more, it is clear that this would easily include enforcement of any governmental obligation that is not an assumed liability. As such, the provision is nonsensical. Section 525 provides the scope of the limitation on governmental permitting actions; this provision goes far beyond its terms even if it were limited only to actions taken at the time of sale. A provision, though, that *forever* bars the government from denying licenses and permits with respect to certain assets for *any reason whatsoever* is not authorized by anything in the Code or the case law. That aspect of the Order must be stricken.

Similarly, as noted above, paragraph 37 purports to eliminate the effect of *any* law on the transaction (including, if read literally, the Bankruptcy Code, itself). Again, nothing in the Code or the case law authorizes such a prohibition, and the provision should be stricken.

3. Other Objectionable Provisions

Paragraph 21 should have the words "Except as provided in Section 365(c)" added at the beginning. As currently written, it eliminates the rights non-debtor parties have under that subsection, although the Code clearly makes Section 365(c) rights controlling over any rights given to the Debtors under Section 365(f).

Paragraph 22 appears to make the Debtor's database of purported cure amounts determinative of those issues, even if the other party does not agree. It should be made clear what the dispute process is for those amounts and that the disputed amounts may still be asserted. If that process is set out in another order, it should be cross-referenced here. Further, in paragraph 23, the reference to barring "any counterclaim, defense, or setoff or other Claim" is improper and should be limited to only providing that those parties may not seek to pursue claims for cure payments to the extent they have been resolved by the Court.

References throughout the order (such as in Paragraph 24) to parties being "estopped" from taking certain actions should be stricken. There is no basis under the proceedings herein to find that any party is "estopped" from taking any action. At most, a party may be barred from acting by the terms of the Order or the provisions of the Code, but "estoppel" has a meaning of its own and consequences; it should not be used where it does not apply.

Paragraph 28 should also be stricken – much of it is completely redundant of numerous prior paragraphs that purport to relieve Newco of any unwanted liabilities. Its sole new feature is a statement that, in view of the consideration provided by Newco, the holders of all liens, claims,

encumbrances, and other interests shall be *deemed* to have given their consent to a release of Newco. Consent, however, is something that a party must freely give, upon notice and with an option to withhold it. That is the sort of release that could be sought as part of a consensual plan process, but the Debtors have chosen to forego that approach. They cannot simply invent a consent that does not exist (and that likely would not be given by parties whose liabilities are not being assumed by Newco). This paragraph should be stricken.

Paragraph 32(a) should be stricken as an incorrect description of the effect of a sale "free and clear." Those rights are not discharged, released, or terminated, they are "transferred" to the purchase price. And, to the extent the purchase price is insufficient, the Debtors obviously remain liable for those obligations, except to the extent that they are purely *in rem* obligations. If the Debtors are allowed to sell "free and clear" of all claims, and receive certain funds therefrom, they certainly cannot limit claimants to only seeking to be paid from those purchase amounts (as opposed to the other funds in the estate). Plans discharge claims, not sales agreements.

Paragraph 37 is meant to relieve some of the concerns arising from the ambiguous language in the MPA with respect to the treatment of environmental claims. However, it is still not fully neutral on the subject; thus while it provides that it does not create any rights for the government, it should also provide that the Order and the MPA do not, by their terms, serve to eliminate "any rights against the Purchaser that would otherwise arise under applicable nonbankruptcy law."

Paragraph 42 should be stricken. This is a hugely important case with substantial new and untested issues. Denying parties any opportunity to appeal is plainly improper. The

appellate courts have shown that they are capable of reviewing these issues in short order and that right should not be limited. here.[19]

B. Section 363 and 365 Do Not Allow Dealer Laws to be Overridden

Unlike Chrysler, which used separate procedings, the Debtors here have chosen to combine their sale motion with their assumption motion for many contracts, including notably, the dealer contracts. In reviewing that request, it should be noted initially what was *not* being done in the Motion. The Debtors had not yet made any final decision on whether to reject or assume these contracts when it filed the Motion; rather, coincident with that filing, it began to use heavy-handed tactics to dictate to the dealers changes that they *must* accept in their agreements with GM. Only if they agreed to do so would the Debtors then make a final decision to assume the agreements. During that process, though, the Debtors' actions remain fully subject to the exercise of the States' police and regulatory powers under their Dealer Laws. Those laws, in turn, make it specifically unlawful to coerce dealers to revise their agreements or waive their rights under those laws of the States. Much of what was done in securing dealers' agreement to those revised agreements likely violates the law in many States and they reserve their right to utilize their police and regulatory powers to bring complaints dealing with those actions as they deem appropriate.

Second, the Debtors are not moving to reject these agreements and cannot rely on any purported rights that they may or may not gain from court approval to breach their agreement as was argued in Chrysler.[20] Rather, they are seeking to assume and assign agreements, a

---

[19] It is far from clear that GM will suffer any harm during such a process. Even while bankruptcy was looming, its sales in May increased 11% from the prior month.

[20] The final order, there, it should be recalled, did not decide those issues or find any

proposition with wholly different language and applicable rights.[21] In doing so, though, they do not seek to assume the existing agreements that they have with the dealers; rather, they forced the dealers to enter into new agreements (on a non-negotiated basis) which *new* agreements they then propose to assume.

That proposed course of action is itself at substantial odds with the well-settled principle under Section 365 that one must assume a contract *cum onere*; i.e., one cannot pick and choose the portions one likes and only assume those, while leaving the unwanted portions behind. *NLRB v. Bildisco & Bildisco*, 465 U.S. 513, 531-32 (1984) ("Should the debtor-in-possession elect to assume the executory contract, however, it assumes the contract *cum onere*, and the expenses and liabilities incurred may be treated as administrative expenses). "It is well-settled that a debtor cannot assume part of an unexpired lease while rejecting another part; the debtor must assume the lease *in toto* with both the benefits and burdens intact." *In re S.E. Nichols, Inc*., 120 B.R. 745 (Bankr. S.D.N.Y. 1990). A contract is assumed "in the same shape as it existed prior to bankruptcy, with all of its benefits and burdens. An executory contract cannot be rejected in part and assumed in part. That is, the debtor or trustee is not free to retain the favorable features of a contract and reject the unfavorable ones." *Matter of Village Rathskeller, Inc.*, 147 B.R. 665, 671 (Bankr. S.D.N.Y. 1992). Yet, that is exactly the net effect of what the Debtors propose here – demand major changes to the agreements and only then agree to assume

---

preemption. Rather, it merely stated the truism that *if* the Code and applicable case law gave rights to the Debtors, those rights could control over state law by virtue of the Supremacy Clause. The order reserved rights to the dealers, though, to test that issue, even after rejection. (See Order entered June 9, 2009, Docket No. 3802, Case No. 09-50002.)

[21] In that regard, as noted above, the proposed Order (see Par. 21) improperly seeks to deny parties their rights under Section 365(c)(1) to preclude assumption of their agreements based on certain types of anti-assignment provisions. That provision must be corrected.

the revised version. Such a process leaves little meaning to the proposition that contracts must be accepted *in toto*.

Even if one assumes that such a process is not necessarily unlawful as to contracts generally, the situation is markedly different where the Debtors seek to obtain substantively unlawful agreements by means that are procedurally unlawful.[22] The Debtors (and Newco) seek to use bankruptcy as a way to write themselves a permanent exemption from the regulatory scheme for the business in which they seek to operate and under which all other competing dealers must proceed. There is nothing in Section 363 or 365 that purports to preempt those laws or to allow them to be ignored by the Debtors.

1. Preemption is Not Generally Favored

There are three forms of preemption: express, field, and conflict preemption. Express preemption applies only by its explicit terms (i.e., where a section states that it applies, "notwithstanding applicable nonbankruptcy law"). In Section 363, only subsection (l), a provision not applicable here, has any express preemptive effect. *Integrated Solutions, Inc. v. Service Support Specialties, Inc.*, 124 F.3d 487, 493 (3rd Cir. 1987) ("neither § 363(b)(1) nor § 704(1) expressly authorizes the trustee to sell property in violation of state law transfer restrictions . . . 363(b)(1) and 704 are general enabling provisions that do not expand or change a debtor's interest in property merely because it files a bankruptcy petition").

In Section 365, while there are certain provisions that do apply "notwithstanding nonbankruptcy law," they apply only in certain situations not at issue here and there is no general statement that all nonbankruptcy laws are automatically swept aside with respect to the

[22] While the States do not enforce the ADDICA, the actions of the Debtors and Newco here might well violate the "good faith" obligations under that statute as well.

assumption process. Section 365(c), for instance, allows certain nonbankruptcy laws to apply to bar the assumption and assignment of contracts. Section 365(f), on the other hand allows *assignment* of contracts despite nonbankruptcy laws precluding such assignments, but only if the contract can be *assumed* – a right which remains subject to the nonbankruptcy law limits imposed by Section 365(c). Those limits on the extent of express preemption, thus, make clear that field preemption – the broadest form of preemption – is not applicable. That limitation is further underscored by the applicability of 28 U.S.C. § 959(b) to all aspects of a debtor's operations while in bankruptcy. That section *requires* debtor to obey the valid laws of the state in which it is operating during the case and has no exclusions that qualify its broad sweep. Thus, there plainly can be no argument that any portion of the Bankruptcy Code broadly preempts all applicable state law with respect to a given issue. Rather, at most, express preemption, supplemented perhaps by conflict preemption if actually proven as to a particular statute, is the appropriate standard; i.e., can the provisions of Sections 363 and 365, be applied while, at the same time, the debtor also complies with applicable state law. If there is an inherent conflict between the two, then, to be sure, the Supremacy Clause dictates that state law must yield, but that longstanding rules of construction emphasize that conflict preemption should not be assumed lightly. That is particularly true when one is applying those laws to operating non-debtor entities, such as Newco, not to debtors in liquidation.

The mere fact that both federal and state law may apply in a particular situation does not inherently create a conflict or lead to the automatic conclusion that the state law is preempted. *See Pacific Gas and Elec. Co. v. California ex rel. California Dept of Toxic Substances Control*, 350 F.3d 932, 943 (9th Cir. 2003), quoting *Medtronic, Inc. v. Lohr*, 518 U.S. 470, 485 (1996):

> First, we presume that Congress does not undertake lightly to preempt state law, particularly in areas of traditional state regulation.
>
> [B]ecause the States are independent sovereigns in our federal system, we have long presumed that Congress does not cavalierly pre-empt state-law causes of action. In all pre-emption cases, and particularly in those in which Congress has 'legislated ... in a field which the States have traditionally occupied," we 'start with the assumption that the historic police powers of the States were not to be superceded by the Federal Act unless that was the clear and manifest purpose of Congress.'(internal citation omitted).

See also Integrated Solutions, supra, 124 F.3d at 492 ("Because we are reluctant to assume federal preemption, we noted that any analysis should begin with 'the basic assumption that Congress did not intend to displace state law.'", quoting *In re Roach*, 824 F.2d 1370, 1373-74 (3rd Cir. 1987).). *See also Coyne & Delany Co. v. Selman*, 98 F.3d 1457, 1467 (4th Cir. 1996) where the Fourth Circuit stated that "courts never 'assume[] lightly that Congress has derogated state regulation.' *Travelers*, [514 U.S. 645, 653 (1995)]. Instead, courts 'address claims of preemption with the starting presumption that Congress does not intend to supplant state law.'". Thus, it noted, that while Congress imposed broad preemption provisions in relation to ERISA plans, it did not preempt malpractice claims since there was no demonstrated intent to preempt "traditional state laws of general applicability" that did not implicate the relationships between the traditional plan entities.

Indeed, while not directly applicable to the judiciary, it is worthy of note that President Obama issued a directive to all executive departments and agencies on May 20, 2009, reminding them of the value of state law activities and directing them to review regulations issued over the last several years to ensure that they do not unduly infringe on prerogatives of the States. (See attachment A). The directive states *inter alia*:

> The Federal Government's role in promoting the general welfare and guarding individual liberties is critical, but State law and national law often operate concurrently to provide independent safeguards for the public. Throughout our history, State and local governments have frequently protected health, safety, and the environment more aggressively than has the national Government. Executive departments and agencies should be mindful that in our Federal system, the citizens of the several States have distinctive circumstances and values, and that in many instances it is appropriate for them to apply to themselves rules and principles that reflect these circumstances and values.

Those principles are no less applicable in considering whether preemption should be applied in judicial settings.

2. Preemption of the States' Dealer Laws is Not Appropriate

GM has conditioned its assumption and assignment of the dealer agreements upon the dealers' waiver of various rights they enjoy under the States' laws. But, as noted, those laws continue to be applicable in bankruptcy, pursuant to 28 U.S.C. 959(b), absent some clear indication that they have been preempted. "[T]he mandate of section 959(b) ... prohibits the use of bankruptcy as a ruse to circumvent applicable state consumer protection laws by those who continue to operate in the marketplace." *In re White Crane Trading Co., Inc.*, 170 B.R. 694, 698 (Bankr. E.D. Cal. 1994). And, as the Third Circuit noted, "Implicit in Section 959(b) is the notion that the goals of the federal bankruptcy laws, including rehabilitation of the debtor, do not authorize transgression of state laws setting requirements for the operation of the business . . . ." *In re Quanta Resources Corp.*, 739 F.2d 912, 919 (3d Cir.1984), *aff'd sub nom., Midlantic Nat'l Bank v. New Jersey Dep't of Envtl. Prot.*, 474 U.S. 494 (1986).

In *Midlantic,* in affirming the Third Circuit, the Supreme Court found that state laws could apply even in the face of a section that provided that the trustee could "abandon *any* property of the estate that is burdensome to the estate or that is of inconsequential value."

Despite the absence of *any* explicit limitations on those powers, the Court found state law to be applicable, citing Section 959(b), and stating that "Congress did not intend for the Bankruptcy Code to pre-empt all state laws that otherwise constrain the exercise of a trustee's powers." *Midlantic Nat'l Bank*, 474 U.S. at 505. The Court also looked to the actions of Congress in enacting environmental laws generally as showing a concern that those regulatory concerns be preserved even in bankruptcy. By the same token, the presence of the ADDICA shows that Congress has a long-established concern with the treatment of these dealer-manufacturer issues.

The structure of the bankruptcy laws – with its exception from the automatic stay for police and regulatory actions, and the provisions in title 28 that require debtors to obey state laws and prohibit removal of police and regulatory actions – make clear that the default position is that debtors must obey nonbankruptcy laws and that bankruptcy is not a free pass to ignore those obligations. As the court in *White Crane* further noted:

> The purpose of bankruptcy is not to permit debtors or nondebtors to wrest competitive advantage by exempting themselves from the myriad of laws that regulate business. Bankruptcy does not grant the debtor a license to eliminate the marginal cost generated by compliance with valid state laws that constrain nonbankrupt competitors. The Congress has thus required that every debtor in possession and bankruptcy trustee manage and operate the debtor's property and business in compliance with state laws-good, bad, and indifferent-that apply outside of bankruptcy.

White Crane, 170 B.R. at 702. In sum, Section 959(b) simply stands "for the uncontroversial proposition that a trustee must carry out his duties in conformity with state law." *Hillis Motors, Inc. v. Hawaii Auto. Dealers' Ass'n*, 997 F.2d 581, 593 (9th Cir. 1993).

Indeed, that is true, even in situations equally as financially stressed (*albeit* on a smaller scale) as the case here. *See, e.g.,, Gillis v. California*, 293 U.S. 62 (1934) (receiver barred from operating without state-required bond, even if he was unable to obtain such a bond; " ultimate

inquiry is whether Congress can withhold from District Courts the power to authorize receivers in conservation proceedings to transact local business, contrary to state statutes obligatory upon all others. That Congress has such power we think is clear, and the language of section 65 leaves no doubt of its exercise;" Section 65 is predecessor to current Section 959(b) with virtually identical language"); *In re 1820-1838 Amsterdam Equities, Inc.*, 191 B.R. 18, 21-22 (S.D.N.Y. 1996) (bankruptcy judge did not have power to temporarily enjoin civil and criminal sanctions actions by city against debtor even though debtor was arranging to correct violations); *In re Vel Rey Properties, Inc.*, 174 B.R. 859, 863-64 (Bankr. D. D.C. 1994) (Section 959(b) means that court has no power to authorize trustee to operate debtor in violation of state law, despite financial hardships and potential loss of value to estate).[23] Similarly, in the context of plan confirmation, the courts have noted that bankruptcy is not meant to provide a guarantee of profitable operations to debtors. Rather as the Ninth Circuit noted in *In re Baker & Drake, Inc.* , 35 F.3d 1348, 1354 (9th Cir. 1994)

> Simply making a reorganization more difficult for a particular debtor,[] however, does not rise to the level of "stand[ing] as an obstacle to the accomplishment of the full purposes and objectives of Congress." . . . Congress's purpose in enacting the Bankruptcy Code was not to mandate that every company be reorganized at all costs, but rather to establish a preference for reorganizations, where they are legally feasible and economically practical. Thus, if compliance with NAC 706.371 were to render Baker financially unable to reorganize, neither Baker nor Nevada would thereby be violating any provision of the Bankruptcy Code. (Citations omitted).

---

[23] *Cf. Saravia v. 1736 18th St., N.W., LP*, 844 F.2d 823, 826 (D.C. Cir. 1988) (rejection of leases by bankruptcy court did not authorize trustee to ignore local laws requiring provision of utility services to tenants and correction of housing code violations).

That is particularly true when a debtor's proposed actions would allow it to receive favorable treatment under the law far into the future. The Debtors here seek a "head start," not merely the "fresh start" the Code allows.

The state law provisions at issue here are not in conflict with the Code and there is nothing in the Code that allows the Debtors or Newco to ignore them in proceeding with the sales transaction and the assumption motion. The Participation Letters (even as amended) seek to have going-forward dealers be forced to operate without the legal protections that apply to every other dealer in the United States, including potentially being forced to accept unneeded inventory, operating under unrealistic sales quotas, accepting competing dealers within protected limits set by state law (and upheld by the Supreme Court), and being required to negotiate over their right to keep selling other brands when the Dealer Laws plainly guarantee them the right to do so. Those exemptions to the law would apparently be expected to operate on a permanent basis, long after the Debtors have exited the bankruptcy courts, giving a permanent operating advantage to Newco. The Debtors and Newco point to nothing in the Code that purport to authorize such actions even by the debtor, much less *by a non-debtor party after the closing of the Debtor's case.*

They presumably will argue that they may implement these provisions because the dealers "voluntarily" signed these agreements and "voluntarily" agreed to waive rights and protections. Those rights and protections, though, are not subject to waiver under the States' laws – for exactly the reasons seen here, i.e., that the dealers could easily be coerced into giving them up. The very request for such waivers is unlawful under most States' laws and the Court should not countenance it here. If the Debtors and Newco believe these are the dealers they want to maintain, they should assume their agreements as is – or at least not seek changes that

substantively and procedurally violate the States' Dealer Laws. Moreover to the extent that the agreement requires that they also waive any rights they may have to file other claims in the Debtor's bankruptcy – a waiver for which they receive no consideration, that provision violates the Bankruptcy Code as well.

As to the dealers that are not being retained, the Debtors again purport to be assuming an agreement with them, but one which requires that they waive numerous protections under the States' Dealer Laws and accept relief that is far different from what they would be entitled to there. However, to the extent that those dealers have monetary rights under the Dealer Laws, a straightforward rejection of those contracts with the same sort of effective date provisions as offered in the Wind-Up Letters would make any such damages prepetition general unsecured claims that would share *pro rata* in whatever dollars are available. Thus, even if those rights had been greater in dollar terms than the amount being offered, they would not necessarily cost the Debtors more in real dollars. Further, to the extent that the Dealer Laws would give those dealers injunctive rights as against either the Debtors or Newco (and many would afford the dealers at least some rights against Newco), the Debtors have offered no basis on which they can ignore such laws.

Rather, as with the retained dealers, the Debtors and Newco merely seek to abrogate those laws by means of "voluntary" agreements by dealers to waive those rights. If it truly believed those wind-down provisions were attractive to dealers (and, for some, it is possible they might be), they could have offered dealers the option of rejection and application of the Dealer Laws (subject to the effect of Section 365 on the priority of monetary claims) or accepting revised dealer terms. Such an agreement might have been voluntary – the one proffered here plainly is not. Again, the States respectfully submit that, while the Court may approve

assumption of such agreements, the approval must not be conditioned on preemption of State Dealer Laws that would invalidate at least some of the provisions in those agreements, or on giving this Court exclusive jurisdiction in perpetuity to oversee their enforcement. Instead, it should simply carry out the process provided for in Section 365 and leave the continuing review of such agreements and their enforceability to the State law tribunals that exercise such authority for every other manufacturer-dealer arrangement in this country.

C. The MPA is Ambiguous in Many Areas; As a Result, It is Impossible to Determine Whether Its Provisions Are Objectionable; The States Object Preliminarily and Reserve Their Rights as to Those Provisions Upon Their Clarification

Finally, there are at least five areas in which the terms of the MPA are ambiguous, contradictory, or simply do not address relevant issues. As such, the States have been unable to determine whether, in the end, an objection is actually necessary. They have attempted to obtain clarification of these issues from the Debtors on several occasions, beginning on June 2 and continuing until the evening of June 18, and to have assurances that corrections will be made to the MPA to the extent that it is agreed that changes are needed. While some verbal clarifications and assurances have been received with respect to certain points, nothing has yet been provided in writing. Accordingly, the States have no alternative but to file this protective objection to ensure that such issues will be corrected before a final order enters. The issues will only be described briefly; the States reserve the right to supplement these objections should they not be fully resolved prior to the sales hearing.

1. Lemon Law Claims/Warranty Issues

Par. 2.3(a)(vii) of the MPA provides for Newco to assume all rights arising under written warranties relating to vehicles, parts and equipment manufactured or sold by the Debtors prior to

the closing, while Par. 2.3(b)(xvi) provides that Newco does not intend to assume liabilities arising under implied warranties or statements made by the Sellers. The States sought to clarify how those provisions applied in several respects. First, most or all have "lemon laws," which are generally viewed as an extension of the warranty obligations of the manufacturer, but they provide remedies that extend beyond merely making repair attempts, which is the usual warranty obligation. Debtors' counsel indicated on June 15 that such obligations were likely covered, but did not clearly commit to amending the MPA to make that clear.

In light of the relationship between the Debtors and Newco (see further discussion below), as well as the statements by the United States government promising that all warranty obligations would be honored, the States accordingly object to any sale order that does not require assumption of such obligations and the MPA should be clarified to directly address that issue. Finally, in view of the nature of the relationship with Newco, the public statements made promising to protect "warranties" generally, and the fact that, under most States' laws, implied warranties may not be disclaimed, the States object to any refusal to transfer liabilities arising under implied warranties (and explicit statement by the Debtors' personnel) as well. Lemon laws frequently define "warranty" rights in terms of not only written manufacturer warranties, but also such implied warranties and dealer statements. Other state laws may define the scope of a warranty as including these factors as well. Thus, it is neither possible nor appropriate to attempt to dissect out this limited group of warranty obligations and disclaim them in violation of statements by public officials that "warranty" obligations would be broadly protected.

2. Sale of Personally Identifiable Information

The Debtors propose to transfer, as part of the sale, all consumer personally identifiable information ("PII") that they maintain – without specifying in any way what the information may

entail. The Debtors also maintain at least one privacy policy under which at least some of that information was gathered. In view of the absence of any details on what is being transferred in the MPA, the States unsuccessfully attempted to obtain information from the Debtors on June 15 and the Consumer Privacy Ombudsman (CPO) thereafter. The Debtors' representatives did not have the information and the CPO refused to meet with or discuss any issues with the States prior to the filing deadline. Accordingly the States have no alternative but to file this precautionary objection.

They note the following: first, it appears that the Debtors' privacy policy generally contemplated that data could be transferred as part of the sale of the business, at least until immediately prior to the bankruptcy filing. If so, that tends to alleviate concerns as to whether the sale would violate the States' "unfair and deceptive acts and practices'" (UDAP) statutes. Under those statutes, the States take the position that a sale of PII, in the face of a policy that promises *not* to sell PII, is a UDAP violation. They have concluded, though, that, if (and only if) consumers are given option rights with respect to the data,[24] then the transfer will *not* be deceptive or unfair. In that regard, they take a more stringent position from that adopted by the Federal Trade Commission in the *Toysmart* case in 2000.[25]

In the *Toysmart* case, an Internet debtor sought to sell a wide variety of extremely sensitive information, including data provided by children using its website, all in violation of a

[24] The issue of whether the right should be "opt in" or "opt out" depends to some degree on the language of the policy and the sensitivity of the information.

[25] As discussed below, there was no published decision in that case resolving these issues, or allowing the sale, and there have been few if any written opinions in a contested proceeding since then. *Toysmart* is discussed in most of these matters simply because it was the first major dispute in this area and one in which there were substantial filings and argument. Moreover, it was the impetus for the inclusion of the privacy sections at issue here.

policy promising *not* to sell such data to any third party. The States and the FTC initially agreed that such conduct violated the law. The FTC, though, later tried to settle with the debtor by creating the concept of a "qualified buyer," (a respectable entity in the same business that promised that *it* would keep the data secure) and providing that a sale to such a buyer would not violate the consumers' privacy rights under its statute. The States, on the other hand, strenuously objected, holding that "no sale of data" means "no sale," not a sale to a party that the *FTC* found qualified. The States' position was vindicated when Toysmart withdrew the sales motion and the data was destroyed.

Notwithstanding that result, the CPO in Chrysler (the same person appointed here) issued a report that repeatedly described the FTC's position in *Toysmart* as "governing law." The States were not able to respond to that report since, again, the CPO refused to meet or discuss the issues with them, and his report was not filed until the day of the sales hearing. Presuming that the CPO will take a similar approach here, the States object, in advance, to any provision in this CPO report that takes the view that the FTC position in *Toysmart* represents any form of law, much less "governing" law.

While new privacy provisions were included in the 2005 amendments because of *Toysmart*, nothing in those amendments remotely suggests that they were adopting the FTC's contested position, as opposed to the States' position. Further, assuming the FTC still adheres to its *Toysmart* position, the States further object to any statement in the CPO's report that says their laws are satisfied if the FTC position is adopted. To the extent that the privacy policy here may not actually prohibit the transfer or that the CPO insists on an acceptable option provision (which was *not* part of the *Toysmart* settlement), the States' concerns may be obviated here, but,

in the absence of any information from the CPO, they file this objection now to ensure that their concerns are taken into account by the CPO and their laws correctly read.

The States further note that, if drivers' license numbers, social security numbers, financial information, or account passwords are transferred as PII, those pieces of data may trigger their "data breach" statutes. While those statutes are primarily intended to deal with "hackers" and "identity thieves," they are not necessarily so limited. At a minimum, they object unless and until the CPO has fully investigated and reported on 1) what is being transferred, and 2) how such transfers interact with the States' laws, as construed by the States. Absent such information, the States object to any finding being entered that a "violation of [applicable] law has not been shown."

In addition, the States note that a corollary concern that arose after *Toysmart* was whether upon receiving transferred PII, the new entity would qualify as one that could contact consumers who have placed their name on the "Do Not Call" registry. In general, at a minimum, a new entity would have to be considered a successor to the old entity in order to enjoy that prior entity's exemption from the registry for specified numbers. Where, as here, the proposed Order disclaims that status for Newco on some 14 occasions, Newco should be required to accept the consequences and the CPO should find that it is required to refrain from calling consumers who are on the registry.

3. Workers' Compensation Claims

On its face, the MPA (Section 2.3(a)(x) and Exhibit G) appears to include claims from all but four states in "Assumed Liabilities." The States understand there are no current employees in those four states and may not have been for some time. In light of typical bonding requirements, it may well be that there are no issues in those four states with respect to whether

there are adequate funds to cover any residual liabilities. All other states assumed, based on the language in Section 2.3(a)(x), that liabilities under their statutes were being assumed and thus they had no basis to object to the Motion with regards to this issue. On June 15, however, it became clear in the conversations with Debtors' counsel that the issue was *not* settled with respect to other states, *albeit* the Debtors did not want to talk to the States collectively on the issue. Upon further review, it was determined that Section 6.5(b) – 35 pages later in the document and under a heading that made no reference to workers' compensation – would allow the Debtors and Newco to make decisions on assuming workers' compensation claims up until two business days before the hearing, i.e., *nine days* after the deadline for objecting herein. Accordingly, the States file this precautionary objection to any refusal to treat workers' compensation claims (beyond those in the four states) as assumed liabilities, and reserve their right to file a supplementary objection after the deadline for the Debtors to amend the MPA, if Newco does seek to avoid assuming those obligations.

The States further object to the extent that any part of the determining factor on such assumption is based on whether the States will agree to treat Newco as a successor for purposes of determining its experience rating and/or its right to self insure. The States strongly believe that, if Newco seeks to disavow successor status where beneficial for its purposes, it should be bound by that claim for all purposes, including where it would impose added costs on Newco.[26] Allowing it to reject liability for those made sick, injured, or killed while in GM's service unless the States allow it to espouse contradictory legal positions about its status is plainly improper.

[26] Self-insured status is typically dramatically cheaper than any insurance option available to an employer and experience ratings (and premium rates) often are higher for new entities.

4. Tax Claims

The States adopt the issues raised by the State of Texas and join in its June 15 objection. (docket no. 1052). They note specifically that the terms of the MPA are confusing and contradictory and that, moreover, their terms may contradict those of the Order (such as the language in Paragraph T(ii)). After three conversations on the topic, the States believe that the Debtors and Newco now agree that any taxes that they were authorized to pay under the Debtors' first day motion and order (Docket Nos. 55 and 174), i.e., "Property Taxes, Sales Taxes, Use Taxes, Excise Taxes, Gross Receipts Taxes, Franchise Taxes, Business License Fees, Annual Report Taxes, and Other Governmental Assessments" are Assumed Liabilities. That position is acceptable to the States but needs to be more clearly documented in the MPA or the Order (including removing the contradictory language in Paragraph T(ii)).

Similarly, the MPA provides for "Permitted Encumbrances" that may remain in place on transferred assets for, *inter alia*, certain taxes, but only if "adequate reserves" had been established for those taxes. Debtors' counsel, however, could give no assurances that reserves were being established or in what amount. The States, therefore, have no way of knowing if their liens will be recognized as Permitted Encumbrances by Newco or not, even if the underlying obligations have been accepted as Assumed Liabilities. Accordingly, that issue still needs to be resolved. The States also continue to object on the other issues raised in the Texas tax objection, such as the attempt to eliminate setoff rights with respect to taxes and, as discussed above, more broadly as to creditors' rights in general.

5. Environmental Claims

Once again, the MPA is written so confusingly, it is impossible to tell what is intended to be transferred and what retained. In that regard, the MPA uses defined terms "Liabilities" and

"Claims" that go far beyond bankruptcy claims in terms of the types of obligations covered (i.e., including matters that do not involve "rights to payment"). Moreover, the definitions include unknown liabilities that would not be bankruptcy Section 101(5) "claims." *See, e.g., In re Chateauguay Corp.,* 944 F.2d at 1003-1005 (discussing example of persons who might be injured post-confirmation if a bridge on which they were passing collapsed), *In the Matter of Crystal Oil Co.,* 158 F.3d 291, 296 (5th Cir. 1998) (environmental claim does not arise until agency can tie debtor to known release of hazardous substance). Section 2.3(a)(viii) provides for the assumption of liabilities resulting from Newco's ownership or operation of the properties that it acquires, which, under *In re CMC Heartland Partners,* 966 F.2d 1143 (7th Cir. 1992), includes the obligation to clean up pre-existing contamination. Section 2.3(b)(iv)(A), on the other hand, *excludes* all Liabilities arising out of prepetition violations of environmental law by the Debtors, including remedial obligations arising therefrom. So, on the one hand, Newco is assuming the obligation to clean up prepetition contamination and, on the other hand, it is disclaiming the obligation to remedy prepetition violations that could cause exactly that same contamination. It is, accordingly, impossible to tell from this what Newco intends to do with respect to these obligations. The States attempted unsuccessfully on June 18th to obtain a determination from the Debtors and Newco as to what was intended here. The States, accordingly, object to any order being entered approving the MPA until these contradictions are resolved.

Further, there is a great deal of statutory and case law that deals with the extent of a buyer's obligation for environmental obligations of the seller. Those obligations turn, in large part, on whether the buyer is a successor within the meaning of those statutes and case law – a determination that turns on the facts of the transaction, not the desires of the purchaser as to whether or not it *wants* to be a successor. Accordingly, as discussed further above, this Court is

not in a position to determine any issues regarding the successor liability of Newco or allowing it to escape liability for the clean-up obligations of the Debtors, without first undertaking a full evidentiary determination of whether Newco is, indeed, a successor to GM. The States object to any provision of the MPA or the proposed Order that would simply dictate that result without completing a specific analysis of the facts and law applicable to successor status.[27]

CONCLUSION

Wherefore, for the reasons stated above, the States respectfully object to the approval of the Motion or entry of the Order in their current form and request that the Court grant relief only to the extent consistent with the positions taken herein.

Signed:

STATE OF NEBRASKA

JON BRUNING,
ATTORNEY GENERAL

[27] The States do not necessarily advocate that such an analysis is needed here. The court's power under Section 363(f), as discussed above, deals with selling assets free and clear of other interests in that asset and attaching those interests to the proceeds of the sale. Claims are not covered by Section 363(f) and, accordingly, determination of how to proceed on a particular claim can, appropriately be deferred to a later date when that claim is actually at issue.

CERTIFICATE OF SERVICE

I hereby certify that on the 19th day of June, 2009, a true and correct copy of the foregoing was served on all those parties receiving notice via the Court's Electronic Case Filing System (through ECF) and the parties below via U. S. Mail First Class, postage prepaid on the following parties:

APPENDIX A

Specific Violations of Law in Participation Letter ("PL") (as amended)

1. GM's Efforts to Amend These Agreements are Procedurally Flawed (Par. 6)

The laws of many States prohibit adverse modifications of dealer agreements without adequate notice and an opportunity to protest the modification. [Ark. Code Ann. § 23-112-101(a)(2)(P) (prohibiting vehicle manufacturers from failing "to continue in full force and operation a motor vehicle franchise agreement, notwithstanding a change, in whole or in part, of an established plan or system of distribution or ownership of the manufacturer of the motor vehicles…."); Md. Code Ann., Transp. II § 15-209(a); RCW 46.96.030 (notice requirement to terminate), RCW 46.96.040 (good cause required)] If such a change is shown, the manufacturer may seek to show that it had "good cause" for the proposed changes. Here, the PL plainly imposes such substantial adverse modifications – but, by their terms, they threaten the dealer with the loss of its business if it seeks to obtain the States' review of the terms of the PL or to protest the changes.

2. GM Violates the States Law on Inventory Purchases (Par. 2 and 3)

In light of the long history of manufacturers forcing dealers to purchase excess inventory, the laws of many States bar manufacturers from attempting to require a dealer to order anything unless the debtor "voluntarily" chooses to request the item. [NRS §60-1430.02, 60-1436; Ark. Code Ann. § 23-112-403(a)(1)(A); KRS 190.070(1)(a), KRS 190.040(1)(m); M.G.L. c 93B Section 4. (a) (b) It shall be a violation of subsection (a) of section 3 for a manufacturer, distributor or franchisor representative, to coerce, any motor vehicle dealer: (1) to accept or buy any motor vehicle, appliance, equipment, part or accessory, or any other commodity or service which has not been ordered or requested by the motor vehicle dealer; or to require a motor

vehicle dealer to accept, buy, order or purchase a motor vehicle, appliance, equipment, optional part or accessory, or any commodity or service or anything of value whether supplied or rendered by the manufacturer, distributor or franchisor representative in order to obtain any motor vehicle or any other commodity which has been ordered or requested by the motor vehicle dealer; Md. Code Ann., Transp. II § 15-207(c).

The original PL (par. 3) provided for Newco to unilaterally set sales quota and then demanded that the dealer must "order and accept from the 363 Acquirer additional new Motor Vehicles of the Existing Model Lines to meet or exceed the sales guidelines provided by the 363 Acquirer relating to Dealer's increased sales expectations . . . ." That mandatory requirement was scaled back in the amendments to a statement that GM expected its dealer would be able to sell more cars, that there would be a collaborative process to set sales goals in early 2010 and that the expectation was merely that dealers would order sufficient inventory to meet the sales goals. While such language is probably not violative, one State has already received calls indicating that the original, more rigid language is being enforced. The States reserve their rights to enforce their laws against either GM or Newco to the extent that they assert such pressure.

3. GM/Newco May Violate Dealers Right To Market Other Brands. (Par. 4)

Many states prohibit a manufacturer from unilaterally barring a dealer from carrying more than one manufacturer's product. [Ark. Code Ann. §§ 23-112-403(a)(2)(N), 23-112-403(a)(2)(O); KRS 190.070(1)(g)(j); Md. Code Ann., Transp. II § 15-207(d)(1); RCW 46.96.185(1) (j) and (i) (unfair practice under RCW 19.86 for a manufacturer to terminate or coerce a dealership into agreeing that it will not sell another make or line of new motor vehicles), RCW 49.96.185(4) (unfair practice related to franchise agreement violates Consumer Protection Act)]. The original paragraph 4 in the PL flatly required dealers to eliminate any other brand

names from their premises by December 31, 2009. After considerable discussion with objecting parties, the Debtor revised that language to insist only that dealers maintain an exclusive "showroom" for GM brands. That provision might have been appropriate, but it was coupled with a statement that "GM reserves the right to require in certain markets that dealer provide completely exclusive GM facilities on the dealership premises going forward." Thus, at most, a totally unlawful demand has been scaled back to an indeterminate status under which Newco still may demand that dealers forego their rights under state law to sell non-GM brands and limit themselves solely to the Debtors (and Newco's brands). Again, this agreement by its very nature is intended to apply after closure of the sale and well into the future – allowing Newco to demand concessions and rights that other manufacturers are barred from exercising.

4. Dealer Location Provisions (par. 5).

The PL amendment suggests that a 6-mile ratio for new dealership locations is already provided for by the dealer's contracts; the laws of various States require larger zones and the dealer's proposal would force existing dealers to accept additional locations within those zones for up to the next four years, thus again violating the laws. [KRS 190.047(6) (existing line dealers may protest competing new or relocated locations within ten (10) miles of their existing location); RCW 46.96.190 (prohibits a manufacturer from coercing or requiring a dealer to waive the dealer's right to protest the location of a new dealership within the current dealer's territory), RCW 46.96.150 (territory limits depending on population and other standards; allows the dealers to either arbitrate a dispute or file an administrative appeal with the state)].

5. L**imitations of Rights to File Claims (par. 6).**

Contrary to the Codes' provisions that require a full "cure" of all amounts owed in order

to assume a contract, the PL provides for certain limited categories of expenses to be paid (i.e., SFE Bonuses for the second quarter of 2009; warranty claims for work in the last 90 days, incentives and amounts owed under the dealers' "Open Account," and indemnity amounts). In order for the dealer to have its contract assumed, it must then agree to simply forfeit any other claims or causes of action – whether accrued, pending, current or future, known or unknown – with no compensation whatsoever and no cure. The dealer agrees that it will not file any protest of the terms of the PL and that it can be enjoined from doing so. Moreover, the dealer must pay GM's attorneys fees for any litigation arising out of *any* breach of the PL – including presumably failure to make adequate sales, remove other brands, and the like. These provisions violate not only the Code's provisions on "cure," which bar the contract from being assigned if outstanding damages thereunder are not paid, but also violate States' laws that require warranty claims to be promptly paid by the manufacturer. [Ark. Code Ann. § 23-112-313(b)(3); RCW 46.96.080 (requires compensation for inventory and equipment upon termination of a franchise); RCW 46.96.090 (requires compensation for facilities upon termination); RCW 46.96.105 (payment of warranty work required)].

The provision also violates the provisions in the laws of the States that provide that agreements to waive the protections of those laws (including their protest procedures) are void and unenforceable. [Ark. Code Ann. § 23-112-403(b)(1) (prohibiting vehicle manufacturers from requiring, as a condition of the grant or renewal of a franchise agreement, a waiver of any remedies or defenses conferred by the statute); KRS 190.070(1)(i) (as to future claims); Md. Code Ann., Transp. II § 15-207(f) (as to attorneys' fees only); M.G.L. c. 93B, section 4(2)(c) (It shall be deemed a violation of subsection (a) of section 3 for a manufacturer, distributor or franchisor representative; (11) to coerce a motor vehicle dealer to assent to a release, assignment,

novation, waiver or estoppel which would prospectively relieve any person from liability imposed by this chapter.)]

6. Modification of Other Agreements (par. 7).

This paragraph requires dealers to comply with the modifications made by the PA to their Dealer Agreements and to allow the Debtors and/or Newco to make changes to supplementary agreements with the Dealers ("Channel Agreements") which potentially violates provisions in States' laws that provide for how terms of a franchise may be modified. [Ark. Code Ann. § 23-112-403(a)(2)(P) requires manufacturers to "continue[] in full force and operation a motor vehicle dealer franchise agreement," notwithstanding a change in the distribution system or ownership of the manufacturer; KRS 190.070(1)(e) as "franchise" is broadly defined to cover all agreements concerning the purchase and sale of the product; Md. Code Ann., Transp. II § 15-207(e)(2)(i)] The statute, arguably, means that manufacturers must continue the EXISTING agreement, unaltered. That is particularly true in that there appear to be no limits to the modifications that can be imposed. The bar in subparagraph 7(b) on the dealer's right to sue with respect to the rejection of certain existing/outstanding agreements again may violate laws that deal with modifying agreements and protesting changes thereto. [Ark. Code Ann. § 23-112-403(b)(1) (prohibiting vehicle manufacturers from requiring, as a condition of the grant or renewal of a franchise agreement, a waiver of any remedies or defenses conferred by the statute)]. Finally, paragraph 7(c)'s requirements for increased floor plan capability and increased sales and inventory expectations again my violate bars on dealers being forced to order unneeded items or to meet unreasonable sales and service standards. [Ark. Code Ann. § 23-114-403(a)(1)(A); RCW 46.96.185 (e) makes it an unfair practice to require a dealer to remodel or renovate existing facilities as a prerequisite to receiving a model or series of vehicles].

7. Jurisdiction Provisions (Par. 9(g) as amended).

The PL provides for the bankruptcy court to have "exclusive" jurisdiction to "interpret, enforce, and adjudicate" issues arising under the PL. That likely violates 28 U.S.C. 1334(b) to the extent that the disputes arise between the dealer and Newco (both non-debtor parties) about issues that will not affect the debtor's estate. *See Concerto Software, Inc. v. Vitaquest Int'l, Inc.*, 290 B.R. 448, 454 (D. Me. 2003) (finding that the court lacked jurisdiction over dispute regarding contract assigned in bankruptcy because "case law provides that an assumption and assignment of an executory contract under section 365 substitutes the assignee for the debtor" and "[p]ursuant to section 365(k), the debtor is then 'relieved from any liability for any breach of contract occurring after such assignment.'") (citations omitted). Moreover, "it is a fundamental proposition that parties cannot confer subject matter jurisdiction by agreement." *H & L Developers, Inc. v. Arvida/JMB Partners (In re H & L Developers, Inc.),* 178 B.R. 71, 75 n.6 (Bankr. E.D. Pa. 1994). If the Debtors wish to obtain the benefits of assigning these agreements and relieving themselves of liability thereunder, they cannot simultaneously retain jurisdictional provisions that derive from their bankruptcy proceedings.

Most States provide that their Department of Motor Vehicles or similar agency has jurisdiction to regulate these matters. [NRS §60-1433; Ark. Code Ann. § 23-112-104(authorizes the Arkansas Motor Vehicle Commission to seek injunctive relief in the Circuit Court for Pulaski County.); RCW 46.96.030 *et. seq.* (administrative jurisdiction upon dealer request); Ark. Code Ann. § 23-112-105 (private causes of action in "any court of competent jurisdiction" are authorized); KRS 190.070(1)(i); KRS 190.020 (KMVC has supervision over the licensees . . . in respect to all the provisions of KRS 190.010 to 190.080); Md. Code Ann., Transp. II § 15-209(e)]. Thus, this is yet another attempt to override that state law and place these issues in the

bankruptcy court. While that court may have jurisdiction over disputes between the debtor and the dealer, that jurisdiction is not exclusive where the States may exercise police and regulatory power. And, by the same token, if there are actions involving the dealers that may be subject to the automatic stay, that stay will not apply if the action is solely between two non-debtor parties (Newco and the dealer).

APPENDIX B

Specific Violations of Law in Wind-Up Letter ("WL")

1. **Termination Date (par. 1)** – While the agreement purports to allow dealers to continue until October 31, 2010, Par. 2(a) actually allows termination by Newco on thirty days notice, starting after December 31, 2009. Thus, a dealer expecting to continue for several more months can be forced to cease operations with only 30 days notice. That period is less than the transition period allowed in most States' laws and the procedure is also not what is to be used. In particular, for instance, while this process is plainly being driven by the Debtors, the WL forces the *dealer* to purportedly act to terminate the dealership, apparently to make it appear that this is a voluntary act by the dealer. [NRS §60-1420, 60-1433; Ark. Code Ann. § 23-112-403(a)(2)(B) (requiring manufacturers to notify dealers at least 60 days prior to the effective date of a termination); KRS 190.045; Md. Code Ann., Transp. II § 15-209(a), (d); RCW 46.96.070(90 days notice before effective date of termination required)].

2. **Turnover of Data (par. 2(b))** – The Dealer must immediately give Purchaser access to all of its customer records to allow it and retained dealers to communicate with and solicit business from those customers. The States' laws would not require/permit this sort of appropriation of property rights or encroachment on the terminating dealers' business during the transition period. [Md. Code Ann., State Gov't 10-616(p)(4); RCW 46.96.185 makes it an unfair practice to use confidential information, including customer lists, to unfairly compete with the dealer. If the terminated dealer continues to operate as an unused dealership without a franchise, coercive turnover of the customer lists may be considered "unfair competition." A violation of RCW 46.96.185 is a violation of the Consumer Protection Act (RCW 46.96.185(4))].

3. **Assistance Offered (pars. 3 and 4)** – This provides that, in consideration of the

termination, the transfer of the right to use lists, and the releases, dealers will get a specified sum of money. 25% will be paid up front, and the remainder if Dealer has sold all inventory by termination effective date, provided assurances of payments to all taxing authorities, and satisfied numerous other conditions. Even so, Par. 3(c) allows payment to be withheld if there are any "competing claims" until those claims have all been resolved. These provisions are in lieu of all right allowed under the States' laws and dealers are given no option to insist upon their rights under those States' laws. Specifically, Par. 4 provides that this payment is in lieu of all other rights under those statues including obligations to repurchase cars, tools, parts, etc. or to provide other assistance. The attempt to coerce agreement to waive those rights is a further, separate violation.

[Ark. Code Ann. § 23-112-403(a)(2)(K) (requiring dealers to buy back vehicle inventories, special tools, and so forth); KRS 190.045 if less than the statutory amounts; Md. Code Ann., Transp. II § 15-207(b); RCW 46.96.080, 46.96.090].

4. **Waiver of Rights – (par. 5(a))** – The Dealer agrees that it waives *any* other rights against GM or acquirer arising out of dealer agreements, dealer operations, any payments or bonuses, except those owed for second quarter of 2009, warranty work within last 90 days, any amounts currently owed in Open Account, amounts owed under Par. 17.4 (indemnity provisions), all of which are subject to setoff by GM/acquirer. GM or the acquirer may charge back false, fraudulent, unsubstantiated warranty claims for up to 2 years. This violates provisions of the States' law requiring payment for warranty work [Ark. Code Ann. § 23-112-403(a)(2)(B) (requiring manufacturers to notify dealers at least 60 days prior to the effective date of a termination); M.G.L. c. 93B section 4(c) It shall be deemed a violation of subsection (a) of

section 3 for a manufacturer, distributor or franchisor representative: (11) to coerce a motor vehicle dealer to assent to a release, assignment, notation, waiver or estoppel which would prospectively relieve any person from liability imposed by this chapter; Md. Code Ann., Transp. II § 15-207(b)], as well as violating the rights of the dealers to file claims under the Code. This would also require dealers to waive their rights under various State laws to require an acquirer to accept their contract [Ark. Code Ann. § 23-112-403(a)(2)(P)] and use the normal State law procedures should it seek to terminate the agreement [Ark. Code Ann. § 23-112-403(a)(2)(C) (prohibiting terminations without good cause and establishing procedures for good-cause termination proceedings); KRS 190.045, KRS 190.070(1)(i).] . The attempt to coerce agreement to waive that provision is an additional violation. [Ark. Code Ann. § 23-112-403(b)(1)].

5. **Violation of Protest Rights - (par. 5(c))** – This requires dealers to agree not to protest, file anything in any court, claim any of these provisions are unenforceable or void before a state law tribunal and so forth. GM can enjoin dealers from taking any such actions, demand a right of specific performance of the waiver and, under Par. 5(d), the dealers must indemnify GM for its costs to enforce these provisions. Again, the forced waiver of statutory rights itself violates the statute. [NRS §60-1436; Ark. Code Ann. § 23-112-403(b)(1); KRS 190.045; Md. Code Ann., Transp. II § 15-206.1].

6. **No Right to Purchase Additional Vehicles – (par. 6)** – After signing, the dealer has no right to order any more cars. It can buy parts, but may not return any. This violates laws of the States that require manufacturers to supply the reasonable needs of the dealership while the agreement is in effect. [Ark. Code Ann. § 23-112-403(a)(2)(A); KRS 190.070(2)(a) and subsection 3; Md. Code Ann., Transp. II § 15-207(d); RCW 46.96.185(1)(e)(unfair practice

under consumer protection act to give preferential treatment to some dealers)].

This also means that dealers will effectively be squeezed out of business long before the purported October 31, 2010, end date of the agreements.

7. **Waiver of Rights to Protest Competing Dealers – (par. 7(a))** – This provides that GM and/or Newco can immediately move in a competing dealer and the dealer may not protest in any way. Not only must it waive any suit of its own, but under Par. 7(b), it also may not "assist in the prosecution of any action, arbitration, mediation, suit, etc." to "challenge, protest, prevent, impede or delay, directly or indirectly, any establishment of relocation whatsoever of motor vehicle dealerships. Par. 7(b)(c) releases any claim that the dealer may have under state law regarding such violative actions and Par. 7(d) allows GM or Newco to enjoin any violations of these provisions by the dealer. [Ark. Code Ann. § 23-112-311 (establishing dealers' rights to protest the addition or relocation of new motor vehicle dealers); Ark. Code Ann. § 23-112-403(b)(1) (prohibiting manufacturers from obtaining coerced waivers)]. These forced waivers of rights under the States' laws violate those laws [KRS 190.047(existing line dealers may protest competing new or relocated locations within ten (10) miles of their existing location); Md. Code Ann., Transp. II § 15-208(e); RCW 46.96.140; 46.96.150 (dealer right to protest new dealership in market area)] particularly when they would apparently extend so far as to even bar a dealer from cooperating in any action brought by the States to enforce their laws.

8. **Confidentiality – (par. 9)** – The dealer is not allowed to reveal the terms or conditions of the WL, thereby again interfering with the States ability to monitor these agreements and determine if they violate the States' laws. [Md. Code Ann., Transp. II § 15-203(b)].

9. **Forced Statement of Voluntary Action (par. 10)** – The dealer is required to agree that its actions are "entirely voluntary and free from any duress," despite the fact that a failure to sign

the agreement will result in a threatened immediate loss of its business (in violation of the laws of the States) and the fact that the dealer could not discuss or negotiate the terms of the WL in any way. [Md. Code Ann., Transp. II §15-207(b)].

10. **Jurisdiction (par. 9)** – As with the PL, the WL attempts to give the bankruptcy court full, complete, and exclusive jurisdiction to interpret, enforce, and adjudicate disputes concerning the terms of this agreement *and any other matter related thereto.* Thus, this provision not only suffers from the same infirmities under federal law and the laws of the States but it goes even further by attempting to extend exclusive jurisdiction to any "matter related to" the WL, whatever that may entail. [Ark. Code Ann. § 23-112-104 (authorizes the Arkansas Motor Vehicle Commission to seek injunctive relief in the Circuit Court for Pulaski County), Private causes of action in "any court of competent jurisdiction" are also authorized under Ark. Code Ann. § 23-112-105; KRS 190.070(1)(i), KRS 190.020 to the extent it seeks to deny the KMVC the ability to "have supervision over the licensees . . . in respect to all the provisions of KRS 190.010 to 190.080; Md. Code Ann., Transp. II § 15-209(e)].

11. **Additional Agreements (par. 14) –** Despite the termination of its primary agreement, the dealer must continue to abide by "Channel Agreements" which include obligations to "construct or renovate facilities," to meet sales standards as a condition of receiving payments (although the dealers are being denied any new inventory), and similar obligations. The dealer must also agree not to protest if GM rejects those agreements. As well as being wholly one-sided, this provision again violates the provisions of the laws of the States dealing with how agreements with dealers may be modified, as well as the bars on coercing dealers to modify such agreements. [Ark. Code Ann. § 403(b)(2)(P) (prohibiting manufacturers from not continuing "in full force and operation a motor vehicle franchise agreement, notwithstanding a change, in whole

or in part, of an established plan or system of distribution or ownership of the manufacturer of the motor vehicles offered for sale under the franchise agreement"); KRS 190.070(1)(e) as "franchise" is broadly defined to cover all agreements concerning the purchase and sale of the product; Md. Code Ann., Transp. II § 15-207(b)].

General Motors Corporation

June 1, 2009

On behalf of the entire GM team, as GM embarks on an exciting new future, I am extremely pleased that has been identified by GM as one of its key dealers for the Buick, GMC Truck brands. As a result, subject to the execution of the enclosed letter agreement, GM intends to seek bankruptcy court approval to assume your existing Dealer Agreements for the Buick, GMC Truck brands and assign such Dealer Agreements to the purchaser of certain of GM's assets in the bankruptcy (the "363 Acquirer"). While recent times in the industry have been challenging to all of us, we believe that this new structure presents an exciting new opportunity for all involved.

Part of GM's restructuring efforts include plans for a dealer network consisting of fewer, stronger and more properly located dealers which we hope will allow for higher through-put and enhanced business potential. Your selection as a dealer for the Buick, GMC Truck brands shows the confidence we have in your dealership being part of the new GM. As part of these efforts, it is critically important that key dealers, like you, are fully committed to, and fully supportive of, GM's restructuring efforts. In order for your Dealer Agreements to be assigned to the 363 Acquirer, you must execute the enclosed letter agreement.

The letter agreement addresses several key areas of dealership performance going forward. These key areas are addressed in detail in the enclosed letter agreement, which you should carefully read, but highlights include:

- Introduction of the new concept of essential brand elements
- Increased sales performance
- Increased inventory responsibilities
- Exclusive facilities for GM operations
- A release of claims against GM, the 363 Acquirer and their related parties
- Agreement to fulfill certain dealer networking actions

A critical part of our dealer network plan is proper channel alignment and dealer focus on the correct brands at the right location. As a result, some retained dealers may receive additional brands. Also, some retained dealers will continue with fewer brands than they currently operate. If your dealership is continuing with fewer brands, enclosed is a separate cover letter and a wind-down agreement, designed to assist you in the orderly winding down of that brand's operations. Please understand that, going forward, GM strongly believes it needs your dealership, as a top performer, in the Buick, GMC Truck dealer network.

Due to extremely short court deadlines in the bankruptcy process, the enclosed letter agreement must be signed by you and received by GM no later than June 12, 2009. We have enclosed a return Federal Express envelope, addressed to GM, for your convenience. If you have any questions, please direct them to our Dealer Call Center at 877.868.8071.

In closing, please know that GM has great respect for, and appreciation of, your past efforts as a GM dealer. We are enthusiastic about the prospects of our mutual success under this new structure.

Sincerely,

GENERAL MOTORS CORPORATION

Letter &
Letter Agreement

General Motors Corporation

June 1, 2009

Re: *GM Dealer Sales and Service Agreements/Participation Agreement*

("Dealer") and General Motors Corporation ("GM") are parties to Dealer Sales and Service Agreements (the "Dealer Agreements") for Buick, GMC Truck motor vehicles (the "Existing Model Lines"). Capitalized terms not otherwise defined in this letter agreement will have the definitions set forth for such terms in the Dealer Agreements.

GM is the debtor and debtor-in-possession in a bankruptcy case (the "Bankruptcy Case") pending in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court"), having filed a voluntary petition under Chapter 11 of Title 11 of the United States Code (the "Bankruptcy Code"). No trustee has been appointed and GM is operating its business as debtor-in-possession.

GM intends to sell, convey, assign and otherwise transfer certain of its assets (the "363 Assets"), to a purchaser (the "363 Acquirer") pursuant to Section 363 of the Bankruptcy Code (the "363 Sale"), subject to approval by and order of the Bankruptcy Court. GM's restructuring in the Bankruptcy Case involves, among other things, the restructuring of its current dealer network. Part of that restructuring includes focus on and retention of those dealers who, based on a number of factors, GM believes have an opportunity to be successful dealers selling and servicing GM's products.

Dealer recognizes that as part of GM's restructuring efforts, a significant number of dealers of the same line make as Dealer will be consolidated. Because this consolidation will result in fewer dealers representing the Existing Model Lines, the retained dealers, including Dealer, will have the opportunity to increase sales significantly. It is therefore vital to Dealer and GM that Dealer agree to implement additional sales and inventory requirements necessary for Dealer to be retained in the 363 Acquirer's dealer network and for Dealer's performance to be in line with such increased opportunity.

In consideration for Dealer's execution and delivery of, and performance under, this letter agreement and subject to Bankruptcy Court approval, GM (i) shall not move to reject the Dealer Agreements in the Bankruptcy Case, and (ii) shall assign the Dealer Agreements to the 363 Acquirer as part of the 363 Sale, provided such sale closes.

10 THIS DOCUMENT SHALL BE NULL AND VOID IF NOT EXECUTED BY DEALER AND RECEIVED BY GM ON OR

As a condition of its participation in the 363 Acquirer's dealer network and in consideration of GM's agreements set forth herein, Dealer shall execute and deliver this letter agreement to GM. This letter agreement contains terms that supplement the Dealer Agreements and incorporates requirements that GM believes will enhance Dealer's and the 363 Acquirer's opportunities for success. In addition, GM expects that GM or the 363 Acquirer will from time to time, subject to modification in its sole discretion, publish essential brand element guidelines for dealership operations, including Dealer's operations. The essential brand elements are GM's and the 363 Acquirer's minimum standards for dealership operations and include, among other things, facility image requirements and/or relocation requirements, dedicated sales and service requirements for the Existing Model Lines, and participation in customer information programs.

This letter agreement will become effective upon the date of Dealer's due execution and delivery of this letter agreement to GM (the "Effective Date"). If Dealer executes and delivers this letter agreement to GM on or before **June 12, 2009**, subject to Bankruptcy Court approval, the 363 Assets will include, without limitation, the Dealer Agreements, as supplemented by this letter agreement. If Dealer does not sign and deliver to GM this letter agreement on or before **June 12, 2009**, GM may, in its sole discretion, move to reject the Dealer Agreements in the Bankruptcy Case. If the 363 Sale does not occur on or before August 31, 2009 (or such later date as GM or the 363 Acquirer may select in their sole discretion), GM or the 363 Acquirer may, at their sole option and at any time thereafter, terminate this letter agreement by written notice to Dealer.

SUPPLEMENTAL TERMS

1. Defined Terms. All initially capitalized terms used and not otherwise expressly defined herein shall have the meanings set forth for such terms in the Dealer Agreements.

2. Sales Performance. Dealer recognizes that, as a result of the consolidation of GM dealers undertaken by GM to strengthen the dealer network and increase dealer through-put, Dealer has substantially more sales opportunities and Dealer must substantially increase its sales of new Motor Vehicles. The 363 Acquirer will provide to Dealer an annual number of new Motor Vehicles that Dealer must sell to meet the 363 Acquirer's increased sales expectations and will update such annual sales number on a periodic basis throughout each year. Dealer's requirements to meet the 363 Acquirer's sales targets are in addition to the sales effectiveness requirements of the current Dealer Agreements. Dealer acknowledges and agrees that compliance with the sales effectiveness requirements of the Dealer Agreements alone will not be sufficient to meet the requirements of this Section 2 and Dealer must meet the sales effectiveness requirements of the Dealer Agreements, as supplemented by this letter agreement.

3. New Vehicle Inventory. Dealer recognizes that, due to the consolidation of GM dealers representing the Existing Model Lines and the expected sales increases contemplated in Section 2 above, Dealer will need to stock additional Motor Vehicles. Dealer shall use its best efforts to stock sufficient additional new Motor Vehicles to meet the increased sales expectations. To facilitate its expected increased sales, Dealer shall, upon the written request from the 363 Acquirer, order and accept from the 363 Acquirer additional new Motor Vehicles of the Existing Model Lines to meet or exceed the sales guidelines provided by the 363 Acquirer relating to Dealer's increased sales expectations contemplated in Section 2 above. In addition, upon Dealer's written request, the 363 Acquirer shall coordinate with, and provide to, GMAC (or such other floor plan provider designated by Dealer), updated sales expectations and other information necessary for GMAC (or such other floor plan provider designated by Dealer) to act upon Dealer's request for additional floor plan funding.

4. Exclusivity. During the remaining term of the Dealer Agreements (the "Exclusivity Period"), Dealer shall actively and continuously conduct Dealership Operations only for the Existing Model Lines

at the premises authorized for the conduct of Dealership Operations under the Dealer Agreements (the "Dealership Premises"). During the Exclusivity Period, the Dealership Premises may not be used for any purpose other than Dealership Operations for the Existing Model Lines (including, but not limited to, the sale, display, storage and/or service of vehicles not approved by the Dealer Agreements, other than as specifically contemplated by the term "Dealership Operations") without the express prior written consent of GM or the 363 Acquirer, which consent may be granted or withheld in GM's or the 363 Acquirer's sole discretion. In the event that Dealer currently operates any non-GM dealership on the Dealership Premises, Dealer shall cease all non-GM Dealership Operations at the Dealership Premises on or before December 31, 2009. Notwithstanding anything to the contrary in the Dealer Agreements, state law or otherwise, if Dealer fails to cure any default under this Section 4 within thirty (30) days after written notice of default from GM or the 363 Acquirer, GM or the 363 Acquirer shall be entitled to all of their remedies as set forth in Section 8 below, including without limitation, the right to terminate the Dealer Agreements.

5. No Protest. In connection with GM's restructuring plan and consolidation of the dealer network, GM intends that GM and the 363 Acquirer have a dealer network consisting of fewer, stronger and more properly located dealers allowing for higher through-put and enhanced business potential.

(a) GM or the 363 Acquirer may desire to relocate or establish representation for the sale and service of motor vehicles for the Existing Model Lines at a site located in the vicinity of the Dealership Premises (the "Proposed Site"). In consideration of GM's and the 363 Acquirer's covenants and obligations herein, and provided that (i) GM or the 363 Acquirer notifies Dealer of any such relocation or establishment within two (2) years after the later of (x) the date of the 363 Sale or (y) the Effective Date (the "No Protest Commencement Date"), (ii) such relocation or establishment is substantially completed on or before the date which is four (4) years after the No Protest Commencement Date, and (iii) the Proposed Site is, measured by straight line distance, at least six (6) miles from the then current location of the Dealership Premises, Dealer covenants and agrees that it will not commence, maintain, or prosecute, or cause, encourage, or advise to be commenced, maintained, or prosecuted, or assist in the prosecution of any action, arbitration, mediation, suit, proceeding, or claim of any kind, before any court, administrative agency, or tribunal or in any dispute resolution process, whether federal, state, or otherwise, to challenge, protest, prevent, impede, or delay, directly or indirectly, establishment or relocation of a motor vehicle dealership for any of the Existing Model Lines at or in the vicinity of the Proposed Site.

(b) Dealer, for itself, its Affiliates (as defined below) and any of their respective members, partners, venturers, stockholders, officers, directors, employees, agents, spouses, legal representatives, successors, and assigns (collectively, the "Dealer Parties"), hereby releases and forever discharges GM, the 363 Acquirer, their Affiliates and their respective members, partners, venturers, stockholders, directors, officers, employees, agents, spouses, legal representatives, successors and assigns (collectively, the "GM Parties"), from any and all past, present, and future claims, demands, rights, causes of action, judgments, executions, damages, liabilities, costs, or expenses (including attorneys' fees) which they or any of them have or might have or acquire, whether known or unknown, actual or contingent, which arise from, are related to, or are associated in any way with, directly or indirectly, the establishment or relocation of any of the Existing Model Lines described in Section 5(a) above.

(c) Dealer recognizes that it may have some claim, demand, or cause of action of which it is unaware and unsuspecting which it is giving up pursuant to this Section 5. Dealer further recognizes that it may have some loss or damage now known that could have consequences or results not now known or suspected, which it is giving up pursuant to this Section 5. Dealer expressly intends that it shall be forever deprived of any such claim, demand,

cause of action, loss, or damage and understands that it shall be prevented and precluded from asserting any such claim, demand, cause of action, loss, or damage.

(d) Dealer acknowledges that, upon a breach of this Section 5 by Dealer, the determination of the exact amount of damages would be difficult or impossible and would not restore GM or the 363 Acquirer to the same position they would occupy in the absence of breach. As a result of the foregoing, any such breach shall absolutely entitle GM and the 363 Acquirer to an immediate and permanent injunction to be issued by any court of competent jurisdiction, precluding Dealer from contesting GM's or the 363 Acquirer's application for injunctive relief and prohibiting any further act by Dealer in violation of this Section 5. In addition, GM and the 363 Acquirer shall have all other equitable rights in connection with a breach of this Section 5 by Dealer, including, without limitation, the right to specific performance.

6. Release; Covenant Not to Sue; Indemnity. In consideration for GM's covenants and agreements set forth herein, including, without limitation, the assignment of the Dealer Agreements in the 363 Sale:

(a) Dealer, for itself, the other Dealer Parties, hereby releases, settles, cancels, discharges, and acknowledges to be fully satisfied any and all claims, demands, damages, debts, liabilities, obligations, costs, expenses, liens, actions, and causes of action of every kind and nature whatsoever (specifically including any claims which are pending in any court, administrative agency or board or under the mediation process of the Dealer Agreements), whether known or unknown, foreseen or unforeseen, suspected or unsuspected ("Claims"), which Dealer or anyone claiming through or under Dealer may have as of the date of the execution of this letter agreement against the GM Parties, arising out of or relating to (i) the Dealer Agreements or this letter agreement, (ii) any predecessor agreement(s), (iii) the operation of the dealership for the Existing Model Lines, (iv) any facilities agreements, including without limitation, any claims related to or arising out of dealership facilities, locations or requirements, Standards for Excellence ("SFE") related payments or bonuses (except that GM or the 363 Acquirer shall pay any SFE funds due the Dealer for the second (2nd) quarter of 2009), and any representations regarding motor vehicle sales or profits associated with Dealership Operations under the Dealer Agreements, or (v) any other events, transactions, claims, discussions or circumstances of any kind arising in whole or in part prior to the effective date of this letter agreement, provided, however, that the foregoing release shall not extend to (x) reimbursement to Dealer of unpaid warranty claims if the transactions giving rise to such claims occurred within ninety (90) days prior to the date of this letter agreement, (y) the payment to Dealer of any incentives currently owing to Dealer or any amounts currently owing to Dealer in its Open Account, or (z) any claims of Dealer pursuant to Article 17.4 of the Dealer Agreements, all of which amounts described in (x) - (z) above of this sentence shall be subject to setoff by GM or the 363 Acquirer of any amounts due or to become due to either or any of their Affiliates.

(b) As set forth above, GM reaffirms the indemnification provisions of Article 17.4 of the Dealer Agreements and specifically agrees that such provisions apply to all new Motor Vehicles sold by Dealer.

(c) Dealer, for itself, and the other Dealer Parties, hereby agrees not to, at any time, sue, protest, institute or assist in instituting any proceeding in any court or administrative proceeding, or otherwise assert (i) any Claim that is covered by the release provision in subparagraph (a) above, or (ii) any Claim that is based upon, related to, arising from, or otherwise connected with the assignment of the Dealer Agreements by GM to the 363 Acquirer in the 363 Sale or an allegation that such assignment is void, voidable, otherwise unenforceable, violates any

applicable law or contravenes any agreement. Any breach of the foregoing shall absolutely entitle GM and the 363 Acquirer to an immediate and permanent injunction to be issued by any court of competent jurisdiction, precluding Dealer from contesting GM's or the 363 Acquirer's application for injunctive relief and prohibiting any further act by Dealer in violation of this Section 6. In addition, GM and the 363 Acquirer shall have all other equitable rights in connection with a breach of this Section 6 by Dealer, including, without limitation, the right to specific performance.

(d) Dealer shall indemnify, defend and hold the GM Parties harmless, from and against any and all claims, demands, fines, penalties, suits, causes of action, liabilities, losses, damages, and expenses (including, without limitation, reasonable attorneys' fees and costs) which may be imposed upon or incurred by the GM Parties, or any of them, arising from, relating to, or caused by Dealer's (or any other Dealer Parties') breach of this letter agreement or Dealer's execution or delivery of or performance under this letter agreement. "Affiliate" means, with respect to any Person (as defined below), any Person that controls, is controlled by or is under common control with such Person, together with its and their respective partners, venturers, directors, officers, stockholders, agents, employees and spouses. "Person" means an individual, partnership, limited liability company, association, corporation or other entity. A Person shall be presumed to have control when it possesses the power, directly or indirectly, to direct, or cause the direction of, the management or policies of another Person, whether through ownership of voting securities, by contract, or otherwise.

(e) The terms of this Section 6 shall survive the termination of this letter agreement.

7. Compliance. In consideration for GM's covenants and agreements set forth herein, including, without limitation, the assignment of the Dealer Agreements in the 363 Sale, from and after the Effective Date:

(a) Dealer shall continue to comply with all of its obligations under the Dealer Agreements, as supplemented by the terms of this letter agreement. In the event of any conflict between the Dealer Agreements and this letter agreement, the terms and conditions of this letter agreement shall control, unless otherwise set forth herein.

(b) Dealer shall continue to comply with all of its obligations under Channel Agreements (as defined below) between GM and Dealer, provided that GM or the 363 Acquirer and Dealer shall enter into any amendment or modification to the Channel Agreements required as a result of GM's restructuring plan, in a form reasonably satisfactory to GM or the 363 Acquirer. In the event of any conflict between the terms of the Channel Agreements and this letter agreement, the terms and conditions of this letter agreement shall control. The term "Channel Agreements" shall mean agreements (other than the Dealer Agreements) between GM and Dealer imposing on Dealer obligations with respect to its Dealership Operations under the Dealer Agreements, including, without limitation, obligations to relocate Dealership Operations, to construct or renovate facilities, not to protest establishment or relocation of other GM dealerships, to conduct exclusive Dealership Operations under the Dealer Agreements, or to meet certain sales performance standards (as a condition of receiving or retaining payments from GM or otherwise). Channel Agreements may be entitled, without limitation, "Summary Agreements," "Agreements and Business Plan," "Exclusive Use Agreements," "Performance Agreements," "No-Protest Agreements," or "Declaration of Use Restriction, Right of First Refusal, and Option to Purchase." Notwithstanding the foregoing, the term "Channel Agreement" shall not mean or refer to (i) any termination agreement of any kind with respect to the Dealer Agreement between Dealer and GM (each a "Termination Agreement"), (ii) any performance agreement of any kind between Dealer

and GM (each a "Performance Agreement"), or (iii) any agreement between Dealer (or any Affiliate of Dealer) and Argonaut Holdings, Inc., a Delaware corporation and wholly-owned subsidiary of GM ("AHI"), including, without limitation, any agreement entitled "Master Lease Agreement," "Prime Lease," or "Dealership Sublease" (and Dealer shall comply with all of the terms of such agreements with AHI). Dealer acknowledges that GM shall be entitled, at its option, to move to reject any currently outstanding Termination Agreements or Performance Agreements in the Bankruptcy Case. By executing this letter agreement, Dealer agrees not to, at any time, sue, protest, institute or assist in instituting any proceeding in any court or administrative proceeding, or otherwise assert any objection or protest of any kind with respect to GM's rejection of such Termination Agreements or Performance Agreements.

(c) Dealer shall (i) comply with the essential brand elements set forth in any subsequently published guidelines from GM or the 363 Acquirer, and (ii) increase its floor plan capability to accommodate the increased sales and inventory expectations contemplated in Sections 2 and 3 above.

8. Breach and Remedies. In return for the consideration provided by GM herein, in the event of Dealer's breach of the Dealer Agreements, as supplemented by this letter agreement, GM and the 363 Acquirer shall have all of its rights and remedies under the Dealer Agreements, as supplemented by this letter agreement, and in addition, (i) GM or the 363 Acquirer may terminate the Dealer Agreements, as supplemented by this letter agreement, upon written notice to Dealer of not less than thirty (30) days, and/or (ii) the 363 Acquirer shall not be obligated to offer Dealer a replacement dealer sales and service agreement upon the termination by its terms of the Dealer Agreements, as supplemented by this letter agreement. In the event that either Dealer or the 363 Acquirer terminates the Dealer Agreements, as supplemented by this letter agreement, after the 363 Sale or the 363 Acquirer does not offer Dealer a replacement dealer sales and service agreement as set forth above, then (x) GM or the 363 Acquirer shall provide Dealer with termination assistance solely as set forth in Section 15.2 of the Dealer Agreements (excluding any facility assistance pursuant to Section 15.3 of the Dealer Agreements), and (y) Dealer waives all other rights under the Dealer Agreements, as supplemented by this letter agreement, and any applicable state laws, rules or regulations regarding termination notice, termination rights, termination assistance, facility assistance or other termination rights.

9. Miscellaneous.

(a) Dealer and the individual(s) executing this letter agreement on behalf of Dealer hereby jointly and severally represent and warrant to GM that this letter agreement has been duly authorized by Dealer and that all necessary corporate action has been taken and all necessary corporate approvals have been obtained in connection with the execution and delivery of and performance under this letter agreement.

(b) This letter agreement shall supplement the Dealer Agreements as of the Effective Date and shall be effective through the remainder of the term of the Dealer Agreements, which shall expire no later than October 31, 2010.

(c) Except as supplemented by this letter agreement (including all exhibits, schedules and addendums to this letter agreement), the Dealer Agreements shall remain in full force and effect as written. Additionally, the Dealer Agreements, as referenced in any other document that the parties have executed, shall mean the Dealer Agreements as supplemented by this letter agreement.

10 THIS DOCUMENT SHALL BE NULL AND VOID IF NOT EXECUTED BY DEALER AND RECEIVED BY GM ON OR

(d) This letter agreement may be executed in counterparts, each of which when signed by all of the parties hereto shall be deemed an original, but all of which when taken together shall constitute one agreement.

(e) The Dealer Agreements, as supplemented by this letter agreement, shall benefit and be binding upon (i) to the extent permitted by this letter agreement, any replacement or successor dealer as referred to in the Dealer Agreements, as supplemented by this letter agreement, and any successors or assigns, and (ii) any of GM's or the 363 Acquirer's successors or assigns. Without limiting the generality of the foregoing, after the 363 Sale occurs, this letter agreement shall benefit and bind the 363 Acquirer.

(f) The parties to this letter agreement have been represented, or have had the opportunity to be represented, by counsel and have been advised, or have had the opportunity to be advised, by counsel as to their rights, duties and relinquishments hereunder and under applicable law. In executing this letter agreement, Dealer acknowledges that its decisions and actions are entirely voluntary and free from any duress.

(g) The Dealer Agreement, as supplemented hereby, shall be governed by and construed in accordance with the laws of the state of Michigan.

(h) By executing this letter agreement, Dealer herby consents and agrees that the Bankruptcy Court shall retain full, complete and exclusive jurisdiction to interpret, enforce, and adjudicate disputes concerning the terms of this letter agreement and any other matter related thereto. The terms of this Section 9(h) shall survive the termination of this letter agreement.

(i) Dealer hereby agrees that, without the prior written consent of GM or the 363 Acquirer, it shall not, except as required by law, disclose to any person (other than its agents or employees having a need to know such information in the conduct of their duties for Dealer, which agents or employees shall be bound by a similar undertaking of confidentiality) the terms or conditions of this letter agreement or any facts relating hereto or to the underlying transactions.

(j) If any part, term or provision of this letter agreement is invalid, unenforceable, or illegal, such part, term or provision shall be considered severable from the rest of this letter agreement and the remaining portions of this letter agreement shall be enforceable as if the letter agreement did not contain such part, term or provision.

(k) This letter agreement shall constitute an agreement, executed by authorized representatives of the parties, supplementing the Dealer Agreements as contemplated by Section 17.11 thereof. This letter agreement shall be deemed withdrawn and shall be null and void and of no further force or effect unless this letter agreement is executed fully and properly by Dealer and is received by GM on or before June 12, 2009.

[Signature Page Follows]

10 THIS DOCUMENT SHALL BE NULL AND VOID IF NOT EXECUTED BY DEALER AND RETURNED

Please indicate your approval of, and agreement with respect to, the matters set forth in this letter agreement by signing where provided below and returning it to GM for execution in the enclosed, self-addressed Federal Express envelope.

Amendment

General Motors Corporation
June __, 2009

VIA Federal Express

[DEALER ENTITY CORPORATE NAME]
[DEALER ADDRESS]

To All GM Dealers in the US Who Received a Participation Agreement:

First and foremost, thank you for your continued support and efforts on GM's behalf in these unprecedented and challenging times. As we indicated when we sent you the June 1, 2009 letter agreement (the "Participation Agreement"), GM wants your dealership to be part of GM's future and our whole focus is to try to improve, together, the GM dealer network. We are gratified that, through Monday, June 8, we have already received over half or 2,200 signed Participation Agreements back from dealers, indicating broad dealer support of our objectives for the dealer network.

We have, however, received thoughtful and insightful questions and comments from individual dealers, the NADA and the National Dealer Council (the "NDC") regarding the Participation Agreement. In response, we have had discussions with the NADA and the NDC. As a result of those discussions, we are writing to provide clarity on several points addressed in the Participation Agreement, as well as to amend certain terms and conditions of the Participation Agreement. Again, our whole focus here is to work with GM dealers to insure that both GM and the dealer body are best positioned to compete in this challenging environment and more importantly in the future.

1. Before we address specific portions of the Participation Agreement affected by this letter, it is important that our dealer body fully understands our reasoning for the Participation Agreement. Given the overall consolidation of GM's dealer network, improved and award winning product offerings by GM, and an anticipated improving US vehicle market over the next few years, dealers will have significant opportunities to increase sales. These sales increases are necessary to GM and the dealer networks' viability over the long term. Our intent is to assist dealers as much as possible to sell high quality vehicles and provide the best customer service in the industry. Our expectation for GM dealers is that they will perform to GM's sales and customer satisfaction requirements and, over time, improve their sales performance in line with increased market opportunities. In order to meet and exceed GM's expectations with respect to sales and customer satisfaction, dealers must have up-to-date, competitive facilities that are properly imaged. Further, dealers must align their facilities by GM's channel strategy to the fullest extent possible and eliminate non-GM line makes from their showrooms to place the proper customer focus on the Chevy, BG or Cadillac channels.

2. Dealers, the NADA and the NDC have raised understandable questions about exactly how the sales expectations would be determined. We explained that we were unable to provide specific answers for individual dealerships now given that we don't yet know how many dealers will sign Participation Agreements and be part of our GM dealer network and footprint in the future. However, the process GM intends to use is to work with individual GM dealers to develop specific market plans, sales objectives and plans to meet or exceed those sales objectives over time. By working with our dealers on this critical issue, we expect that our dealers will not only maintain

current sales levels, but will increase sales beyond those levels necessary for the viability of GM's dealer network. In terms of our process, at some point in the first quarter of 2010, we will hold a GM Reinvention business plan meeting with each dealer executing a Participation Agreement. At this meeting GM's channel representatives and the dealer will agree upon appropriate sales targets given the new dealer footprint in the market and other factors, including, but not limited to, dealer's competitive position in the market, dealer's historical market share, and dealer's market opportunity. We anticipate that this process will be substantially the same as the methods used by GM and dealers to set sales targets in the past. It is expected that the increased sales expectations will be implemented for the second half of the 2010 or 2011 calendar year. In addition, if the overall US vehicle market is operating well below forecast at that time, such information will be factored into the calculations for the dealer's sales expectations.

3. In addition to the questions regarding sales expectations, GM received questions regarding inventory expectations. Simply put, GM needs dealers to order adequate inventory to meet or exceed expected sales performance requirements determined by GM and dealer at the GM Reinvention business plan meeting. If the dealer is meeting sales expectations, there will be no reason for GM to question the dealer's ordering practices or inventory levels. If the dealer is not meeting or exceeding sales expectations, and ordering practices or inventory levels are contributing to this problem, GM needs the dealer's commitment to work diligently to address the situation. This issue is addressed in the Participation Agreement. On the other hand, if product availability is an issue, GM will work with the dealer to try to address that issue as well.

4. On the issue of exclusivity, it is assumed that the dealer will remove non-GM brands from the GM showroom by December 31, 2009 as provided in the Participation Agreement and will operate a showroom exclusive to GM products going forward. GM reserves the right to require in certain markets that dealer provide completely exclusive GM facilities on the dealership premises going forward. Of course, you have our commitment to work with you reasonably (1) to determine whether your dealership premises will be exclusive GM and (2) if you cannot reasonably meet the agreed date or dates for exclusivity. It is not our intent to be unreasonable or onerous with respect to exclusivity requirements, but to clearly provide an excellent customer experience for our mutual customers and to help increase sales of GM brands. While most continuing GM dealers operate out of excellent, imaged facilities, there are those that continue to operate out of dated, non-competitive facilities that do not properly represent GM's brands. This is not good for the dealer, GM or the other dealers in the same market. If a dealer's facility is not compliant, GM's channel representative and the dealer will meet and agree on the appropriate action to be taken by GM and the dealer. GM is fully aware of the current difficult conditions in the market, and any request by GM for dealers to invest in their facilities will take into account the realities of the market. To address the foregoing, we are hereby amending Section 4 of the Participation Agreement to delete the existing third sentence and insert the following in its place:

> "In the event that Dealer currently operates any non-GM dealership on the Dealership Premises, Dealer shall cease all non-GM Dealership Operations in the GM showroom at the Dealership Premises, on or before December 31, 2009, and Dealer and GM will meet as soon as practical but in all events by the end of 2009, to reasonably determine and mutually agree whether or not and the extent to which non-GM Dealership Operations may continue on the Dealership Premises other than the GM showroom."

In addition we are hereby amending Section 4 of the Participation Agreement to delete the existing fourth sentence and insert the following in its place:

"If Dealer fails to comply with its commitments under this Section 4, GM or 363 requires shall be entitled to all of their remedies pursuant to Article 13.2 of the Dealer Agreement.

5. In terms of waiving the right to protest in certain limited circumstances, we have frankly received a good deal of comment on this provision. First, we are well aware of the provisions of state franchise laws and a dealer's right to protest certain network actions. Accordingly, we drafted this provision to only apply within a limited time frame and outside the six mile provision set forth in the Dealer Agreement. The intent was to provide GM and our dealers the flexibility to move quickly during this period given the dramatically different dealer footprint. It is essential for GM and the dealer body that this flexibility is built into the Participation Agreement in order to secure a strong, vibrant dealer network now and in the future without the need to resort to the time consuming and costly protest procedures within the state process. However, GM does not intend to use this provision to increase the number of same line make dealers in a particular market over the number that exist today. This was a major concern of dealers, the NADA, and the NDC. To address this issue, we are hereby amending Section 5 of the Participation Agreement by adding the following sentence at the end of Section 5(a) thereof:

"Notwithstanding the foregoing, Dealer is not waiving any protest rights whatsoever in the event that GM seeks to increase the number of dealerships for the Existing Model Line(s) in Dealer's contractual area of responsibility from the number that are located in that area as of the date of this letter agreement."

Again, while it is important that GM retain flexibility in this area, GM believes such activity will be limited.

6. A number of concerns have been raised regarding the breach provision of the Participation Agreement. While it is appropriate that GM have remedies in the event of a breach by dealers of the Dealer Agreement, GM is not looking to terminate any Dealer Agreements for those dealers executing a Participation Agreement. Quite the opposite. We have spent considerable time, energy and money trying to retain your dealership in the network. However, to address certain concerns of the dealers, the NADA, and the NDC that the breach provision of the Participation Agreement would override state law protections for dealers, GM has agreed to delete that provision from the Participation Agreement and rely on the terms of the Dealer Agreement and state law in connection with any breach of the Dealer Agreement, as supplemented by the Participation Agreement, by dealer. Accordingly, Section 8 of the Participation Agreement is hereby deleted in its entirety and all other terms of the Participation Agreement, as modified by this letter agreement, including the numbering of all sections, shall remain in full force and effect.

7. Finally, a number of concerns have been raised about the choice of law provisions in Paragraph 9(g) of the Participation Agreement. Accordingly, the choice of law provisions of Paragraph 9(g) are hereby deleted and such provisions are replaced by the choice of law provision contained in Article 17.12 of the Dealer Agreement, the terms of which are specifically incorporated by reference and agreement into the Participation Agreement. In addition, Paragraph 9(h) is hereby modified such that all terms of Paragraph 9(h) after the words "Letter Agreement" are stricken and removed from the Participation Agreement.

8. If you have already executed and returned to GM your Participation Agreement, please execute this letter and return it to GM on or before **June 15, 2009**, and the terms of this letter shall be incorporated into the Participation Agreement. If you have not executed and returned your Participation Agreement to GM, please note the deadline for doing so remains **June 12, 2009**. Please execute the Participation Agreement and return it to GM on or before **June 12, 2009,** and also sign and

return this letter by **June 15, 2009**. We have enclosed a return Federal Express envelope, addressed to GM, for your convenience.

I would like to personally congratulate you on being selected to move forward with the new GM. With our innovative and award winning product line for Chevrolet, Buick, Cadillac and GMC, and the strongest dealers in the GM network, we have an extraordinary opportunity to win in the market and create both great brand and franchise value, as well as a business that will make America proud. I am honored to be working with you in this mission.

Sincerely,

Mark LaNeve, GMNA Vice President of Vehicle, Sales, Service and Marketing

Wind-Up Letter

General Motors Corporation

June 1, 2009

VIA Federal Express

This letter is to advise you that the Pontiac, Cadillac Dealer Agreements between GM and your dealer company will not be continued by GM on a long-term basis. This is a difficult step, but one that is part of GM's court supervised restructuring efforts. Subject to bankruptcy court approval, we are willing to assist you in winding down your Pontiac, Cadillac dealership operations to allow for the sale of new vehicle and other inventories in an orderly fashion. In order for us to provide you with this assistance, you must execute, and GM must receive, the enclosed agreement on or before June 12, 2009.

In summary and subject to bankruptcy court approval, the enclosed agreement, which you should carefully read, provides:

- For the termination of the Dealer Agreements no earlier than January 1, 2010 and no later than October 31, 2010
- For the assignment and assumption of the Dealer Agreements, as supplemented by the enclosed agreement, by a purchaser of certain assets of GM in the bankruptcy (the "363 Acquirer")
- For the payment of financial assistance in installments in connection with the orderly winding down of your Pontiac, Cadillac operations
- For the waiver of any other termination assistance of any kind
- For a release of claims against GM, the 363 Acquirer and their related parties
- For dealership operations to continue pursuant to the Dealer Agreements, as supplemented by the enclosed agreement, through the effective date of termination of the Dealer Agreements, except that you shall not be entitled to order any new vehicles from GM or the 363 Acquirer

Given that the enclosed agreement provides your dealership with the ability to wind-down the Pontiac, Cadillac dealership operations on an orderly basis, we recommend you carefully consider executing the agreement. We have enclosed a return Federal Express envelope, addressed to GM, for your convenience. Due to extremely short court deadlines in the bankruptcy process, we must receive the enclosed agreement on or before June 12, 2009. If we receive the executed agreement by that date, we will not move to reject your Dealer Agreements in the bankruptcy and plan to assign your Dealer Agreements (as supplemented by the enclosed agreement) to the 363 Acquirer as part of the court supervised restructuring of our dealer network. If we do not receive the enclosed agreement executed by you on or before June 12, 2009, GM will apply to the bankruptcy court to reject your Dealer Agreements. If we reject the Dealer Agreements, we cannot offer any wind-down or termination assistance in connection with such Dealer Agreements.

While these are challenging and unprecedented economic circumstances in the industry, we are pleased that we are able to offer you the enclosed agreement to allow you to wind down your Pontiac, Cadillac dealership business and to sell your Pontiac, Cadillac new Motor Vehicle inventory in an orderly fashion.

If you have any questions, please direct them to the Dealer Call Center at 877.868.8071.

Sincerely,

GENERAL MOTORS CORPORATION

WIND-DOWN AGREEMENT

THIS WIND-DOWN AGREEMENT (this "Agreement") is made and entered into as of the 1st day of June, 2009, by and between ("Dealer"), and GENERAL MOTORS CORPORATION ("GM").

RECITALS

A. Dealer and GM are the parties to Dealer Sales and Service Agreements (the "Dealer Agreements") for Pontiac, Cadillac motor vehicles (the "Existing Model Lines"). Capitalized terms not otherwise defined in this Agreement shall have the definitions set forth for such terms in the Dealer Agreements.

B. GM is the debtor and debtor-in-possession in a bankruptcy case (the "Bankruptcy Case") pending in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court"), having filed a voluntary petition under Chapter 11 of Title 11 of the United States Code (the "Bankruptcy Code"). No trustee has been appointed and GM is operating its business as debtor-in-possession.

C. GM intends to sell, convey, assign and otherwise transfer certain of its assets (the "363 Assets") to a purchaser (the "363 Acquirer") pursuant to Section 363 of the Bankruptcy Code (the "363 Sale"), subject to approval by and order of the Bankruptcy Court.

D. GM has considered moving and may, at its option, move to reject the Dealer Agreements in the Bankruptcy Case, as permitted under the Bankruptcy Code, unless Dealer executes and delivers this Agreement to GM on or before June 12, 2009.

E. In return for the payments set forth herein and GM's willingness not to pursue the immediate rejection of the Dealer Agreement in the Bankruptcy Case, Dealer desires to enter into this Agreement (i) to allow Dealer, among other things, to wind down its Dealership Operations in an orderly fashion (specifically including the sale of all of Dealer's new Motor Vehicles), (ii) to provide for Dealer's voluntary termination of the Dealer Agreements, GM's payment of certain monetary consideration to Dealer, and Dealer's covenants regarding its continuing Dealership Operations under the Dealer Agreements, as supplemented by the terms of this Agreement (the "Subject Dealership Operations"), and (iii) to provide for Dealer's release of GM, the 363 Acquirer and their related parties from any and all liability arising out of or connected with the Dealer Agreements, any predecessor agreement(s) thereto, and the relationship between GM and Dealer relating to the Dealer Agreements, and any predecessor agreement(s) thereto, all on the terms and conditions set forth herein.

COVENANTS

NOW, THEREFORE, in consideration of the foregoing recitals and the premises and covenants contained herein, Dealer and GM hereby agree (subject to any required Bankruptcy Court approvals) as follows:

1. Assignment-363 Sale. Dealer acknowledges and agrees that GM has the right, but not the obligation, to seek to assign the Dealer Agreements and this Agreement in the Bankruptcy Case to the 363 Acquirer. As part of the 363 Sale, provided such sale closes, GM may, in its sole discretion, assign the Dealer Agreements and this Agreement to the 363 Acquirer. If GM elects to exercise its option to assign the Dealer Agreements and this Agreement, Dealer specifically agrees to such assignment and agrees not to object to or protest any such assignment.

 THIS DOCUMENT SHALL BE NULL AND VOID IF NOT EXECUTED BY DEALER AND RETURNED

2. Termination of Dealer Agreement. Subject to the terms of Section 1 above:

(a) Dealer hereby covenants and agrees to conduct the Subject Dealership Operations until the effective date of termination of the Dealer Agreements, which shall not occur earlier than January 1, 2010 or later than October 31, 2010, under and in accordance with the terms of the Dealer Agreements, as supplemented by the terms of this Agreement. Accordingly, Dealer hereby terminates the Dealer Agreements by written agreement in accordance with Section 14.2 thereof, such termination to be effective on October 31, 2010. Notwithstanding the foregoing, either party may, at its option, elect to cause the effective date of termination of the Dealer Agreements to occur (if not terminated earlier as provided herein) on any date after December 31, 2009, and prior to October 31, 2010, upon thirty (30) days written notice to the other party. In addition, and notwithstanding the foregoing, if Dealer has sold of all of its new Motor Vehicle inventory on or before December 31, 2009 and wishes to terminate the Dealer Agreements prior to January 1, 2010, Dealer may request that GM or the 363 Acquirer, as applicable, approve such termination and, absent other limiting circumstances, GM or the 363 Acquirer, as applicable, shall not unreasonably withhold its consent to such termination request, subject to the terms of this Agreement.

(b) Concurrently with its termination of the Dealer Agreements, Dealer hereby conveys to GM or the 363 Acquirer, as applicable, a non-exclusive right to use Dealer's customer lists and service records for the Subject Dealership Operations, and within ten (10) days following GM's or the 363 Acquirer's, as applicable, written request, Dealer shall deliver to GM or the 363 Acquirer, as applicable, digital computer files containing copies of such lists and records. Such right of use shall include without limitation the right to communicate with and solicit business and information from customers identified in such lists and records and to assign such non-exclusive right to third parties without thereby relinquishing its own right of use.

3. Payment to Dealer.

(a) Subject to Sections 1 and 2 above, in consideration of (i) Dealer's execution and delivery to GM of this Agreement, (ii) Dealer's agreement to sell its new Motor Vehicle inventory as set forth below, and (iii) the termination of the Dealer Agreements by written agreement in accordance with Section 14.2 thereof (as set forth in Section 2 of this Agreement), GM or the 363 Acquirer, as applicable, shall pay, or cause to be paid, to Dealer the sum of $70,000 (the "Wind-Down Payment Amount"), subject to the terms herein. This payment is consideration solely for Dealer's covenants, releases and waivers set forth herein, and Dealer's transfer to GM or the 363 Acquirer, as applicable, of a non-exclusive right to use the customer lists and service records.

(b) GM shall pay twenty-five percent (25%) of the Wind-Down Payment Amount (the "Initial Payment Amount") to Dealer by crediting Dealer's open account maintained by GM on the GM Dealer Payment System (the "Open Account"), in accordance with GM's standard practices, within ten (10) business days following the later of (i) GM's receipt of any required Bankruptcy Court approvals, or (ii) full execution and delivery of this Agreement. GM or the 363 Acquirer, as applicable, shall pay the balance of the Wind-Down Payment Amount (the "Final Payment Amount") to Dealer, subject to the terms of this Agreement, by crediting Dealer's Open Account in accordance with its standard practices, within ten (10) business days after all of the following have occurred: (i) Dealer has sold all of its new Motor Vehicle inventory for the Existing Model Lines prior to the termination of the Dealer Agreements, (ii) Dealer's compliance with all applicable bulk transfer, sales tax transfer or similar laws and the expiration of all time periods provided therein, (iii) Dealer's delivery to GM or the 363 Acquirer, as applicable, of

certificates of applicable taxing authorities that Dealer has paid all sales, use, and other taxes or evidence reasonably satisfactory to GM or the 363 Acquirer, as applicable, that GM or the 363 Acquirer, as applicable, will have no liability or obligation to pay any such taxes that may remain unpaid, (iv) the effective date of termination of the Dealer Agreements in accordance with Section 2(a) above, (v) Dealer's compliance with the terms of Section 4(c) below, (vi) GM's or the 363 Acquirer's, as applicable, receipt of the fully executed Supplemental Wind-Down Agreement in substantially the form attached hereto as Exhibit A (subject to inclusion of information specific to Dealer's Dealership Operations), and (vii) GM's or the 363 Acquirer's, as applicable, receipt of any required Bankruptcy Court approvals. GM or the 363 Acquirer, as applicable, may, in its sole discretion, waive in writing any of the conditions for payment set forth in the preceding sentence.

(c) In addition to any other setoff rights under the Dealer Agreements, payment of all or any part of the Wind-Down Payment Amount may, in GM's or the 363 Acquirer's, as applicable, reasonable discretion, be (i) reduced by any amount owed by Dealer to GM or the 363 Acquirer, as applicable, or their Affiliates (as defined below), and/or (ii) delayed in the event GM or the 363 Acquirer, as applicable, has a reasonable basis to believe that any party has or claims any interest in the assets or properties of Dealer relating to the Subject Dealership Operations including, but not limited to, all or any part of the Wind-Down Payment Amount (each, a "Competing Claim"), in which event GM or the 363 Acquirer, as applicable, may delay payment of all or any part of the Wind-Down Payment Amount until GM or the 363 Acquirer, as applicable, has received evidence in form and substance reasonably acceptable to it that all Competing Claims have been fully and finally resolved.

4. Complete Waiver of All Termination Assistance Rights. In consideration of the agreements by GM hereunder, upon the termination of the Dealer Agreements, as provided in this Agreement, and cessation of the Subject Dealership Operations, the following terms shall apply in lieu of Dealer's rights to receive termination assistance, whether under the Dealer Agreements or applicable laws, all of which rights Dealer hereby waives:

(a) Neither GM nor the 363 Acquirer, as applicable, shall have any obligation to repurchase from Dealer any Motor Vehicles whatsoever.

(b) Neither GM nor the 363 Acquirer, as applicable, shall have any obligation to repurchase from Dealer any Parts or Accessories or Special Tools whatsoever.

(c) Dealer shall eliminate or remove from the Dealership Premises all Dealer-owned signs (freestanding or not) for the Subject Dealership Operations within thirty (30) days following the effective date of termination at no cost to either GM or the 363 Acquirer, as applicable. Dealer understands and agrees that neither GM nor the 363 Acquirer, as applicable, will purchase any Dealer-owned signs used in connection with the Subject Dealership Operations. Dealer hereby waives any rights it may have to require either GM or the 363 Acquirer, as applicable, to purchase any signs used or useful in connection with the Subject Dealership Operations. Dealer shall provide, or shall cause the owner of the Dealership Premises to provide, GMDI access to the Dealership Premises in order for GMDI to remove all GM signs leased to Dealer by GMDI. Dealer understands and agrees that the Wind-Down Payment Amount was determined by GM in part based on Dealer's agreement that it will timely remove all signs for the Subject Dealership Operations and will not require or attempt to require GM or the 363 Acquirer, as applicable, to purchase any or all of such signs pursuant to the provisions of the Dealer Agreements or any applicable statutes, regulations, or other laws.

(d) Dealer expressly agrees that the provisions of Article 15 of the Dealer Agreements do not, by their terms, apply to this termination.

(e) Dealer expressly agrees that all termination rights of Dealer are set forth herein and expressly agrees that any termination assistance otherwise available to Dealer as set forth in the Dealer Agreements or any state statute or regulation shall not apply to Dealer's termination of the Dealer Agreements.

(f) The terms of this Section 4 shall survive the termination of this Agreement.

5. Release; Covenant Not to Sue; Indemnity.

(a) Dealer, for itself, its Affiliates and any of their respective members, partners, venturers, stockholders, officers, directors, employees, agents, spouses, legal representatives, successors, and assigns (collectively, the "Dealer Parties"), hereby releases, settles, cancels, discharges, and acknowledges to be fully satisfied any and all claims, demands, damages, debts, liabilities, obligations, costs, expenses, liens, actions, and causes of action of every kind and nature whatsoever (specifically including any claims which are pending in any court, administrative agency or board or under the mediation process of the Dealer Agreements), whether known or unknown, foreseen or unforeseen, suspected or unsuspected ("Claims"), which Dealer or anyone claiming through or under Dealer may have as of the date of the execution of this Agreement against GM, the 363 Acquirer, their Affiliates or any of their respective members, partners, venturers, stockholders, officers, directors, employees, agents, spouses, legal representatives, successors or assigns (collectively, the "GM Parties"), arising out of or relating to (i) the Dealer Agreements or this Agreement, (ii) any predecessor agreement(s), (iii) the operation of the dealership for the Existing Model Lines, (iv) any facilities agreements, including without limitation, any claims related to or arising out of dealership facilities, locations or requirements, Standards for Excellence ("SFE") related payments or bonuses (except that GM shall pay any SFE payments due Dealer for the second (2nd) quarter of 2009 and neither GM nor the 363 Acquirer, as applicable, shall collect any further SFE related payments from Dealer for the third (3rd) quarter of 2009 or thereafter), and any representations regarding motor vehicle sales or profits associated with Dealership Operations under the Dealer Agreements, or (v) any other events, transactions, claims, discussions or circumstances of any kind arising in whole or in part prior to the effective date of this Agreement, provided, however, that the foregoing release shall not extend to (x) reimbursement to Dealer of unpaid warranty claims if the transactions giving rise to such claims occurred within ninety (90) days prior the date of this Agreement, (y) the payment to Dealer of any incentives currently owing to Dealer or any amounts currently owing to Dealer in its Open Account, or (z) any claims of Dealer pursuant to Section 17.4 of the Dealer Agreements, all of which amounts described in (x) - (z) above of this sentence shall be subject to setoff by GM or the 363 Acquirer, as applicable, of any amounts due or to become due to either or any of its Affiliates. GM or the 363 Acquirer, as applicable, shall not charge back to Dealer any warranty claims approved and paid by GM or the 363 Acquirer, as applicable, prior to the effective date of termination, as described in Section 2 above, after the later to occur of (A) the date six (6) months following payment, or (B) the effective date of termination, except that GM or the 363 Acquirer, as applicable, may make charge-backs for false, fraudulent or unsubstantiated claims within two (2) years of payment.

(b) As set forth above, GM reaffirms the indemnification provisions of Section 17.4 of the Dealer Agreements and specifically agrees that such provisions apply to all new Motor Vehicles sold by Dealer.

(c) Dealer, for itself, and the other Dealer Parties, hereby agrees not to, at any time, sue, protest, institute or assist in instituting any proceeding in any court or administrative proceeding, or otherwise assert (i) any Claim that is covered by the release provision in subparagraph (a) above or (ii) any claim that is based upon, related to, arising from, or otherwise connected with the assignment of the Dealer Agreement or this Agreement by GM to the 363 Acquirer in the 363 Sale, if any, or an allegation that such assignment is void, voidable, otherwise unenforceable, violates any applicable law or contravenes any agreement. As a result of the foregoing, any such breach shall absolutely entitle GM or the 363 Acquirer, as applicable, to an immediate and permanent injunction to be issued by any court of competent jurisdiction, precluding Dealer from contesting GM's or the 363 Acquirer's, as applicable, application for injunctive relief and prohibiting any further act by Dealer in violation of this Section 7. In addition, GM or the 363 Acquirer, as applicable, shall have all other equitable rights in connection with a breach of this Section 7 by Dealer, including, without limitation, the right to specific performance.

(d) Dealer shall indemnify, defend and hold the GM Parties harmless, from and against any and all claims, demands, fines, penalties, suits, causes of action, liabilities, losses, damages, costs, and expenses (including, without limitation, reasonable attorneys' fees and costs) which may be imposed upon or incurred by the GM Parties, or any of them, arising from, relating to, or caused by Dealer's (or any other Dealer Party's) breach of this Agreement or Dealer's execution or delivery of or performance under this Agreement. "Affiliate" means, with respect to any Person (as defined below), any Person that controls, is controlled by or is under common control with such Person, together with its and their respective partners, venturers, directors, officers, stockholders, agents, employees and spouses. "Person" means an individual, partnership, limited liability company, association, corporation or other entity. A Person shall be presumed to have control when it possesses the power, directly or indirectly, to direct, or cause the direction of, the management or policies of another Person, whether through ownership of voting securities, by contract, or otherwise.

(e) The terms of this Section 5 shall survive the termination of this Agreement.

6. Subject Dealership Operations. From the effective date of this Agreement until the effective date of termination of the Dealer Agreements (which shall not occur prior to January 1, 2010, subject to Section 2(a) above):

(a) Dealer shall not, and shall have no right to, purchase Motor Vehicles from GM or the 363 Acquirer, as applicable, which rights Dealer hereby waives.

(b) Dealer shall have the right to purchase service parts from GM or the 363 Acquirer, as applicable, to perform warranty service and other normal service operations at the Dealership Premises during the term of this Agreement. Dealer shall have no obligation, however, to follow the recommendations of GM's service parts operations' retail inventory management ("RIM") process, which recommendations are provided for guidance purposes only. Dealer's future orders of service parts of any kind (as well as service parts currently on hand and those acquired in the future from a source other than GM or the 363 Acquirer, as applicable), including but not limited to RIM-recommended orders, shall not be eligible for return.

(c) Dealer shall not, and shall have no right to, propose to GM or the 363 Acquirer, as applicable (under Section 12.2 of the Dealer Agreements or otherwise) or consummate a change in Dealer Operator, a change in ownership, or, subject to GM's or the 363 Acquirer's, as applicable, option, a transfer of the dealership business or its principal assets to any Person; provided, however, that GM or the 363 Acquirer, as applicable, shall honor the terms of Section

12.1 of the Dealer Agreements upon the death or incapacity of the Dealer Operator, except that the term of any new Dealer Agreements under Subsection 12.1.5 shall expire on October 31, 2010, subject to the terms of this Agreement. Accordingly, neither GM nor the 363 Acquirer, as applicable, shall have any obligation (under Section 12.2 of the Dealer Agreements or otherwise) to review, process, respond to, or approve any application or proposal to accomplish any such change, except as expressly otherwise provided in the preceding sentence.

(d) In addition to all other matters set forth herein, the following portions of the Dealer Agreements shall not apply; Sections 6.1 and 6.3.1 (concerning ordering of new Motor Vehicles), Article 8 (Training), Article 9 (Review of Dealer's Performance), Sections 12.2 and 12.3 (Changes in Management and Ownership), Article 15 (Termination Assistance), and Article 16 (Dispute Resolution).

(e) Except as expressly otherwise set forth herein, the terms of the Dealer Agreements, shall remain unmodified and in full force and effect.

7. No Protest.

(a) GM or the 363 Acquirer, as applicable, may desire to relocate or establish representation for the sale and service of the Existing Model Lines in the vicinity of Dealer's Dealership Premises identified in the Dealer Agreements. In consideration of GM's and the 363 Acquirer's, as applicable, covenants and obligations herein, Dealer covenants and agrees that it will not commence, maintain, or prosecute, or cause, encourage, or advise to be commenced, maintained, or prosecuted, or assist in the prosecution of any action, arbitration, mediation, suit, proceeding, or claim of any kind, before any court, administrative agency, or other tribunal or dispute resolution process, whether federal, state, or otherwise, to challenge, protest, prevent, impede, or delay, directly or indirectly, any establishment or relocation whatsoever of motor vehicle dealerships for any of the Existing Model Lines.

(b) Dealer, for itself and for each and all of the other Dealer Parties, hereby releases and forever discharges the GM Parties, from any and all past, present, and future claims, demands, rights, causes of action, judgments, executions, damages, liabilities, costs, or expenses (including, without limitation, attorneys' fees) which they or any of them have or might have or acquire, whether known or unknown, actual or contingent, which arise from, are related to, or are associated in any way with, directly or indirectly, the establishment or relocation of any of such Existing Model Lines.

(c) Dealer recognizes that it may have some claim, demand, or cause of action of which it is unaware and unsuspecting which it is giving up pursuant to this Section 7. Dealer further recognizes that it may have some loss or damage now known that could have consequences or results not now known or suspected, which it is giving up pursuant to this Section 7. Dealer expressly intends that it shall be forever deprived of any such claim, demand, cause of action, loss, or damage and understands that it shall be prevented and precluded from asserting any such claim, demand, cause of action, loss, or damage.

(d) Dealer acknowledges that, upon a breach of this Section 7 by Dealer, the determination of the exact amount of damages would be difficult or impossible and would not restore GM or the 363 Acquirer, as applicable, to the same position it would occupy in the absence of breach. As a result of the foregoing, any such breach shall absolutely entitle GM or the 363 Acquirer, as applicable, to an immediate and permanent injunction to be issued by any court of competent jurisdiction, precluding Dealer from contesting GM's or the 363 Acquirer's, as applicable, application for injunctive relief and prohibiting any further act by Dealer in

violation of this Section 7. In addition, GM or the 363 Acquirer, as applicable, shall have all other equitable rights in connection with a breach of this Section 7 by Dealer, including, without limitation, the right to specific performance.

8. Due Authority. Dealer and the individual(s) executing this Agreement on behalf of Dealer hereby jointly and severally represent and warrant to GM that this Agreement has been duly authorized by Dealer and that all necessary corporate action has been taken and all necessary corporate approvals have been obtained in connection with the execution and delivery of and performance under this Agreement.

9. Confidentiality. Dealer hereby agrees that, without the prior written consent of GM or the 363 Acquirer, as applicable, it shall not, except as required by law, disclose to any person (other than its agents or employees having a need to know such information in the conduct of their duties for Dealer, which agents or employees shall be bound by a similar undertaking of confidentiality) the terms or conditions of this Agreement or any facts relating hereto or to the underlying transactions.

10. Informed and Voluntary Acts. Dealer has reviewed this Agreement with its legal, tax, or other advisors, and is fully aware of all of its rights and alternatives. In executing this Agreement, Dealer acknowledges that its decisions and actions are entirely voluntary and free from any duress.

11. Binding Effect. This Agreement shall benefit and be binding upon the parties hereto and their respective successors or assigns. Without limiting the generality of the foregoing, after the 363 Sale occurs and provided that GM assigns the Dealer Agreements and this Agreement to the 363 Acquirer, this Agreement shall benefit and bind the 363 Acquirer.

12. Effectiveness. This Agreement shall be deemed withdrawn and shall be null and void and of no further force or effect unless this Agreement is executed fully and properly by Dealer and is received by GM on or before **June 12, 2009**.

13. Continuing Jurisdiction. By executing this Agreement, Dealer hereby consents and agrees that the Bankruptcy Court shall retain full, complete and exclusive jurisdiction to interpret, enforce, and adjudicate disputes concerning the terms of this Agreement and any other matter related thereto. The terms of this Section 13 shall survive the termination of this Agreement.

14. Other Agreements.

(a) Dealer shall continue to comply with all of its obligations under Channel Agreements (as defined below) between GM and Dealer, provided that GM or the 363 Acquirer, as applicable, and Dealer shall enter into any amendment or modification to the Channel Agreements required as a result of GM's restructuring plan, in a form reasonably satisfactory to GM or the 363 Acquirer, as applicable. In the event of any conflict between the terms of the Channel Agreements and this Agreement, the terms and conditions of this Agreement shall control.

(b) The term "Channel Agreements" shall mean any agreement (other than the Dealer Agreements) between GM and Dealer imposing on Dealer obligations with respect to its Dealership Operations under the Dealer Agreements, including, without limitation, obligations to relocate Dealership Operations, to construct or renovate facilities, not to protest establishment or relocation of other dealerships, to conduct exclusive Dealership Operations under the Dealer Agreements, or to meet certain sales performance standards (as a condition of receiving or retaining payments from GM or the 363 Acquirer, as applicable, or otherwise). Channel Agreements may be entitled, without limitation, "Summary Agreement," "Agreement and Business Plan," "Exclusive Use Agreement," "Performance Agreement," "No-Protest Agreement," or "Declaration of Use Restriction, Right of First Refusal, and Option to Purchase."

Notwithstanding the foregoing, the term "Channel Agreement" shall not mean or refer to (i) any termination agreement of any kind with respect to the Dealer Agreement between Dealer and GM (each a "Termination Agreement"), (ii) any performance agreement of any kind between Dealer and GM (each a "Performance Agreement"), or (iii) any agreement between Dealer (or any Affiliate of Dealer) and Argonaut Holdings, Inc., a Delaware corporation and wholly-owned subsidiary of GM ("AHI"), including, without limitation, any agreement entitled "Master Lease Agreement," "Prime Lease," or "Dealership Sublease" (and Dealer shall comply with all of the terms of such agreements with AHI). Dealer acknowledges that GM shall be entitled, at its option, to move to reject any currently outstanding Termination Agreements or Performance Agreements in the Bankruptcy Case. By executing this letter agreement, Dealer agrees not to, at any time, sue, protest, institute or assist in instituting any proceeding in any court or administrative proceeding, or otherwise assert any objection or protest of any kind with respect to GM's rejection of such Termination Agreements or Performance Agreements.

(c) All of the Channel Agreements shall automatically terminate and be of no further force or effect on the effective date of termination of the Dealer Agreements, except that those provisions that, by their terms, expressly survive termination of the Channel Agreements shall survive the termination contemplated under this Agreement. Following the effective date of termination of the Dealer Agreements, Dealer and GM shall execute and deliver documents in recordable form reasonably satisfactory to GM or the 363 Acquirer, as applicable, confirming the termination of any Channel Agreements affecting title to real property owned or leased by Dealer or Dealer's Affiliates.

15. Governing Law. This Agreement shall be governed by, and construed in accordance with, the laws of the state of Michigan.

16. Counterparts. This Agreement may be executed in counterparts, each of which when signed by all of the parties hereto shall be deemed an original, but all of which when taken together shall constitute one agreement.

17. Breach. In the event of a breach of this Agreement by Dealer, GM and the 363 Acquirer shall each have all of its remedies at law and in equity, including, without limitation, the right to specific performance.

18. Complete Agreement of the Parties. This Agreement, the Dealer Agreements, and the schedules, exhibits, and attachments to such agreements (i) contain the entire understanding of the parties relating to the subject matter of this Agreement, and (ii) supersede all prior statements, representations and agreements relating to the subject matter of this Agreement. The parties represent and agree that, in entering into this Agreement, they have not relied upon any oral or written agreements, representations, statements, or promises, express or implied, not specifically set forth in this Agreement. No waiver, modification, amendment or addition to this Agreement is effective unless evidenced by a written instrument signed by an authorized representative of the parties, and each party acknowledges that no individual will be authorized to orally waive, modify, amend or expand this Agreement. The parties expressly waive application of any law, statute, or judicial decision allowing oral modifications, amendments, or additions to this Agreement notwithstanding this express provision requiring a writing signed by the parties.

SAMPLE SUPPLEMENTAL WIND-DOWN AGREEMENT

THIS SUPPLEMENTAL WIND-DOWN AGREEMENT (this "Agreement") is made and entered into as of the _____ day of _____, 20__, by _____, a _____ ("Dealer"), for the use and benefit of _____, a _____ ("GM") and _____, a _____ corporation ("363 Acquirer").

RECITALS

A. Dealer and GM are parties to Dealer Sales and Service Agreements for _____ motor vehicles (the "Dealer Agreements").

B. Dealer and GM are parties to that certain Wind-Down Agreement dated June __, 2009 (the "Original Wind-Down Agreement"). All initially capitalized terms not otherwise defined herein shall have the meanings ascribed to such terms in the Original Wind-Down Agreement.

C. **[IF DEALER AGREEMENTS ASSIGNED TO THE 363 ACQUIRER][GM assigned all of its right, title and interest in the Dealer Agreements and the Original Wind-Down Agreement to the 363 Acquirer.]**

D. Pursuant to the Original Wind-Down Agreement, Dealer agreed to terminate and cancel the Dealer Agreements and all rights and continuing interests therein by written agreement and to release GM and its related parties from any and all liability arising out of or connected with the Dealer Agreements, any predecessor agreement(s) thereto, and the relationship between **[GM or the 363 Acquirer]** and Dealer relating to the Dealer Agreements, and any predecessor agreement(s) thereto, on the terms and conditions set forth herein, intending to be bound by the terms and conditions of this Agreement.

E. Dealer executes this Agreement in accordance with Section 3 of the Original Wind-Down Agreement.

COVENANTS

NOW, THEREFORE, in consideration of the foregoing recitals and the premises and covenants contained herein, Dealer hereby agrees as follows:

1. Termination of Dealer Agreements.

(a) Dealer hereby terminates the Dealer Agreements by written agreement in accordance with Section 14.2 thereof. The effective date of such termination shall be _____, 20__.

(b) Dealer shall timely pay all sales taxes, other taxes and any other amounts due to creditors, arising out of the operations of Dealer.

(c) Dealer shall be entitled to receive the Final Payment Amount in accordance with the terms of the Original Wind-Down Agreement.

14 THIS DOCUMENT SHALL BE NULL AND VOID IF NOT EXECUTED BY DEALER AND RECEIVED BY GM ON OR BEFORE JUNE 12, 2009 OR IF DEALER CHANGES ANY TERM OR PROVISION HEREOF.

2. Release; Covenant Not to Sue; Indemnity.

(a) Dealer, for itself, its Affiliates and any of their respective members, partners, venturers, stockholders, officers, directors, employees, agents, spouses, legal representatives, successors, and assigns (collectively, the "Dealer Parties"), hereby releases, settles, cancels, discharges, and acknowledges to be fully satisfied any and all claims, demands, damages, debts, liabilities, obligations, costs, expenses, liens, actions, and causes of action of every kind and nature whatsoever (specifically including any claims which are pending in any court, administrative agency or board or under the mediation process of the Dealer Agreements), whether known or unknown, foreseen or unforeseen, suspected or unsuspected ("Claims"), which Dealer or anyone claiming through or under Dealer may have as of the date of the execution of this Agreement against GM, the 363 Acquirer, their Affiliates or any of their respective members, partners, venturers, stockholders, officers, directors, employees, agents, spouses, legal representatives, successors or assigns (collectively, the "GM Parties"), arising out of or relating to (i) the Dealer Agreements or this Agreement, (ii) any predecessor agreement(s), (iii) the operation of the dealership for the Existing Model Lines, (iv) any facilities agreements, including without limitation, any claims related to or arising out of dealership facilities, locations or requirements, Standards for Excellence ("SFE") related payments or bonuses (except that the 363 Acquirer shall pay any SFE payments due Dealer for the second (2nd) quarter of 2009 and the 363 Acquirer shall not collect any further SFE related payments from Dealer for the third (3rd) quarter of 2009 or thereafter), and any representations regarding motor vehicle sales or profits associated with Dealership Operations under the Dealer Agreements, or (v) any other events, transactions, claims, discussions or circumstances of any kind arising in whole or in part prior to the effective date of this Agreement, provided, however, that the foregoing release shall not extend to (x) reimbursement to Dealer of unpaid warranty claims if the transactions giving rise to such claims occurred within ninety (90) days prior the date of this Agreement, (y) the payment to Dealer of any incentives currently owing to Dealer or any amounts currently owing to Dealer in its Open Account, or (z) any claims of Dealer pursuant to Section 17.4 of the Dealer Agreements, all of which amounts described in (x) - (z) above of this sentence shall be subject to setoff by GM of any amounts due or to become due to GM or any of its Affiliates. GM shall not charge back to Dealer any warranty claims approved and paid by GM prior to the effective date of termination, as described in Section 1 above, after the later to occur of (A) the date six (6) months following payment, or (B) the effective date of termination, except that GM may make charge-backs for false, fraudulent or unsubstantiated claims within two (2) years of payment.

(b) Dealer, for itself, and the other Dealer Parties, hereby agrees not to, at any time, sue, protest, institute or assist in instituting any proceeding in any court or administrative proceeding, or otherwise assert [(i)] any Claim that is covered by the release provision in subparagraph (a) above **[IF DEALER AGREEMENTS ASSIGNED TO THE 363 ACQUIRER]| [or (ii) any claim that is based upon, related to, arising from, or otherwise connected with the assignment of the Dealer Agreements or the Original Wind-Down Agreement by GM to the 363 Acquirer in the 363 Sale, if any, or an allegation that such assignment is void, voidable, otherwise unenforceable, violates any applicable law or contravenes any agreement.]** Notwithstanding anything to the contrary, Dealer acknowledges and agrees that GM will suffer irreparable harm from the breach by any Dealer Party of this covenant not to sue and therefore agrees that GM shall be entitled to any equitable remedies available to them, including, without limitation, injunctive relief, upon the breach of such covenant not to sue by any Dealer Party.

(c) Dealer shall indemnify, defend and hold the GM Parties harmless, from and against any and all claims, demands, fines, penalties, suits, causes of action, liabilities, losses, damages, costs of settlement, and expenses (including, without limitation, reasonable attorneys' fees and

costs) which may be imposed upon or incurred by the GM Parties, or any of them, arising from, relating to, or caused by Dealer's (or any other Dealer Parties') breach of this Agreement or Dealer's execution or delivery of or performance under this Agreement. "Affiliate" means, with respect to any Person (as defined below), any Person that controls, is controlled by or is under common control with such Person, together with its and their respective partners, venturers, directors, officers, stockholders, agents, employees and spouses. "Person" means an individual, partnership, limited liability company, association, corporation or other entity. A Person shall be presumed to have control when it possesses the power, directly or indirectly, to direct, or cause the direction of, the management or policies of another Person, whether through ownership of voting securities, by contract, or otherwise.

3. Due Authority. Dealer and the individual(s) executing this Agreement on behalf of Dealer hereby jointly and severally represent and warrant to GM that this Agreement has been duly authorized by Dealer and that all necessary corporate action has been taken and all necessary corporate approvals have been obtained in connection with the execution and delivery of and performance under this Agreement.

4. Confidentiality. Dealer hereby agrees that, without the prior written consent of GM, it shall not, except as required by law, disclose to any person (other than its agents or employees having a need to know such information in the conduct of their duties for Dealer, which agents or employees shall be bound by a similar undertaking of confidentiality) the terms or conditions of this Agreement or any facts relating hereto or to the underlying transactions.

5. Informed and Voluntary Acts. Dealer has reviewed this Agreement with its legal, tax, or other advisors, and is fully aware of all of its rights and alternatives. In executing this Agreement, Dealer acknowledges that its decisions and actions are entirely voluntary and free from any duress.

6. Binding Effect. This Agreement shall be binding upon any replacement or successor dealer as referred to in the Dealer Agreements and any successors or assigns. This Agreement shall be binding upon any replacement or successor dealer as referred to in the Dealer Agreements and any successors or assigns, and shall benefit any of GM's successors or assigns.

7. Continuing Jurisdiction. By executing this Agreement, Dealer hereby consents and agrees that the Bankruptcy Court shall retain full, complete and exclusive jurisdiction to interpret, enforce, and adjudicate disputes concerning the terms of this Agreement and any other matter related thereto. The terms of this Section 7 shall survive the termination of this Agreement.

8. Governing Law. This Agreement shall be governed by, and construed in accordance with, the laws of the state of Michigan.

9. No Reliance. The parties represent and agree that, in entering into this Agreement, they have not relied upon any oral or written agreements, representations, statements, or promises, express or implied, not specifically set forth in this Agreement. No waiver, modification, amendment or addition to this Agreement is effective unless evidenced by a written instrument signed by an authorized representative of the parties, and each party acknowledges that no individual will be authorized to orally waive, modify, amend or expand this Agreement. The parties hereto expressly waive application of any law, statute, or judicial decision allowing oral modifications, amendments, or additions to this Agreement notwithstanding this express provision requiring a writing signed by the parties.

[Signature Page Follows]

IN WITNESS WHEREOF, Dealer has executed this Agreement through its duly authorized officer as of the day and year first above written.

Proposed Counsel for the Official Committee of Unsecured Creditors

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re:	:	Chapter 11
GENERAL MOTORS CORP., et al.,	:	Case No. 09-50026 (REG)
Debtors.	:	Jointly Administered

LIMITED OBJECTION OF THE OFFICIAL COMMITTEE OF UNSECURED CREDITORS TO DEBTORS' MOTION PURSUANT TO 11 U.S.C. §§ 105, 363(b), (f), (k), AND (m), AND 365 AND FED. R. BANKR. P. 2002, 6004, AND 6006, TO (I) APPROVE (A) THE SALE PURSUANT TO THE MASTER SALE AND PURCHASE AGREEMENT WITH VEHICLE ACQUISITION HOLDINGS LLC, A U.S. TREASURY-SPONSORED PURCHASER, FREE AND CLEAR OF LIENS, CLAIMS, ENCUMBRANCES, AND OTHER INTERESTS; (B) THE ASSUMPTION AND ASSIGNMENT OF CERTAIN EXECUTORY CONTRACTS AND UNEXPIRED LEASES; AND (C) OTHER RELIEF; AND (II) SCHEDULE SALE APPROVAL HEARING

The Official Committee of Unsecured Creditors (the "**Committee**") of the above-captioned debtors and debtors-in-possession (the "**Debtors**"), by and through its undersigned counsel, hereby submits this limited objection (the "**Objection**") to the Debtors' motion seeking, among other forms of relief, authority to sell substantially all of their assets free and clear of liens, claims, encumbrances, and other interests. In support of the Objection, the Committee represents as follows:

PRELIMINARY STATEMENT

1. The Committee, in its capacity as a fiduciary for a broad cross-section of General Motors Corp. ("**GM**") creditors, including workers, suppliers, dealers, tort creditors, and other unsecured creditors of the Debtors' estates, generally supports the proposed asset sale and objects only on limited, but important, grounds as described below. The Committee believes that the proposed sale order can and should be amended to address its concerns and permit the sale to go forward on the schedule currently contemplated by the Debtors.

2. The Committee recognizes that the proposed sale transaction is not perfect. Indeed, it will leave impaired numerous parties within the Committee's constituency. However, the Committee is satisfied that no viable alternative exists to prevent the far worse harm that would flow from the liquidation of GM.

3. The simple fact is that there are no other viable bids – indeed no serious expressions of interest – to purchase GM's assets and no other feasible way for GM to restructure its business to remain viable. The current transaction is the only option on the table. The Court is thus faced with a clear choice: to approve the proposed sale transaction, preserve the going-concern value of the Debtors' businesses, and maximize substantial value for stakeholders (despite the pain that this course will inflict on numerous innocent parties), or reject the transaction and precipitate the dismantling and liquidation of GM to the detriment of all involved. Preventing this harm serves the core purposes of the Bankruptcy Code and constitutes a strong business justification under Section 363 of the Code to sell the debtors' assets outside of a plan process.

4. Nevertheless, the Committee is compelled to object to the proposed sale in its current form on two specific grounds:

5. First, the Committee objects because the proposed order approving the sale purports to cut off all state law successor liability for the new entity purchasing GM's assets. Current and future claimants alleging claims based on injuries caused by product defects, breach of implied warranties, asbestos exposure, and, in certain cases, denial of post employment benefits would thus be limited to recourse against the limited assets being left behind in the old company.

6. The Committee believes that the attempt to cut off liability represents, at minimum, a poor business and policy judgment, because it undercuts the otherwise clear message that the new company is assuming the mantel of the old GM for purposes of customer service and will otherwise stand behind GM products. But the purported liability cut-off is also *illegal* for two reasons: (1) Section 363(f) of the Bankruptcy Code authorizes the sale of assets free and clear of *interests* in a debtor's property, not *claims* arising out of existing or potential causes of action that remain unliquidated and not reduced to liens; and (2) in any event, the attempt to cut off liability for *future* claims is ineffective and a violation of due process that would likely not even be honored by state courts. The terms of the sale should therefore be revised to leave creditors holding successor liability claims to their state law rights against the new company, and such liabilities should be expressly assumed by the new company.

7. Second, the sale transaction cannot be approved unless the Debtors make an adequate showing at the upcoming sale hearing that the assets left behind in the old company will be sufficient to pay all administrative expenses of and priority claims against the estates. The proposed transaction provides for the distribution of stock in the new company to the Debtors' unsecured creditors. Such a distribution can take place only under a confirmed chapter 11 plan, which, in turn, requires that all priority and administrative claims be paid in full. The

Debtors' unsecured creditors should not bear the costs associated with the wind down of the Debtors' bankruptcy cases. The purchaser of GM's assets is receiving substantial benefits under the Bankruptcy Code to effectuate the sale and support the viability of the continuing enterprise. It may not reap those benefits without assuring this Court and constituents of the old company that sufficient assets have been left behind to cover the costs of that bankruptcy process. Thus, it is incumbent upon the Debtors and the government to ensure that the "wind down budget" is sufficient to allow a plan to be confirmed and implemented without impairing the limited recovery promised to unsecured creditors.[1]

BACKGROUND

A. General Background

8. On June 1, 2009 (the "**Petition Date**"), the Debtors filed voluntary petitions for relief under chapter 11 of title 11 of the United States Code (the "**Bankruptcy Code**"). The Debtors continue to operate their businesses and manage their properties as debtors-in-possession pursuant to sections 1107(a) and 1108 of the Bankruptcy Code.

9. On June 3, 2009, the U.S. Trustee appointed an official committee of unsecured creditors pursuant to section 1102 of the Bankruptcy Code. The Committee is comprised of 15 members who represent the interests of all unsecured creditors. The Committee members include: two indenture trustees – Wilmington Trust Company and Law Debenture

[1] In addition to these objections, the Committee objects to any attempt by the Debtors to transfer collateral of secured lenders to the new company without the new company either assuming the liability associated with such collateral or paying the claims of such lenders.

The Committee understands that prior to the filing of this Objection, certain modifications were agreed upon or made to the sale transaction documents that resolve a number of the Committee's concerns and will be incorporated into the final sale transaction documents. Accordingly, Exhibit A to this Objection outlines the issues and objections for which no modifications have yet been made, or for which no agreements have been reached at this time. Notwithstanding the foregoing, the Committee reserves the right to raise additional issues and objections should the final sale documents or sale order fail to incorporate such agreements or modifications.

Trust Company of New York; two suppliers – Denso International America, Inc. and Inteva Products, LLC; one trade service creditor – Interpublic Group; three automotive dealers – Serra Chevrolet of Birmingham, Inc., Paddock Chevrolet and Saturn of Hempstead, Inc.; three collective bargaining representatives – the Industrial Division of Communications Workers of America, AFL-CIO, the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America ("**UAW**"), and the United Steelworkers; three tort claimants – Kevin Schoenl, Genoveva Bermudez, and Mark Buttita; and the Pension Benefit Guaranty Corporation.

B. The Proposed Sale

10. On the Petition Date, the Debtors filed a motion (the "**Sale Motion**") to approve the sale (the "**Sale**") of substantially all of their assets to Vehicle Acquisition Holdings LLC ("**New GM**" or "**Purchaser**"), an entity established for the purpose of acquiring such assets. The terms of the Sale are set forth in the Master Sale and Purchase Agreement (the "**MPA**"), dated as of June 1, 2009, by and among GM Corporation ("**Old GM**"), Saturn LLC, Saturn Distribution Corporation and Chevrolet-Saturn of Harlem, Inc., as sellers, and New GM, as purchaser.[2]

1. Purchased and Retained Assets

11. Pursuant to the Sale, New GM is to acquire all properties, assets, and rights of Old GM, with the exception of certain excluded assets (respectively, the "**Purchased Assets**" and the "**Excluded Assets**").

12. The Purchased Assets include, without limitation: (i) all of Old GM's cash, receivables, intercompany obligations, real property, machinery, equipment, inventory,

[2] A copy of the MPA is attached as Exhibit A to the Sale Motion. [Dkt. No. 92, Ex. A.]

intellectual property, permits, rights to tax refunds, claims, books and records, goodwill and intangible property other than the Excluded Assets, *see generally* MPA § 2.2(a); (ii) the equity and corporate documents of all entities in which Old GM has an equity interest, with the exception of certain excluded entities, *id.* § 2.2(a)(v); and (iii) benefit plans, including certain plans relating to non-union employees and all employee benefit plans covered by the collective bargaining agreement with the UAW, *id.* §§ 2.2(a)(xvi), 6.17(e).[3]

13. The Excluded Assets chiefly consist of: (i) $950 million in cash or cash equivalents, (ii) equity interests in certain Saturn and other entities, (iii) certain real and personal property, (iv) bankruptcy avoidance actions, (v) certain employee benefit plans, and (vi) restricted cash and receivables that exclusively relate to an Excluded Asset or Retained Liability. *See generally* MPA § 2.2(b).

2. Assumed and Retained Liabilities

14. Old GM will retain all liabilities except those defined in the MPA as "**Assumed Liabilities**." *See generally* MPA § 2.3(b); *see also id.* § 2.3(b)(xi).

15. The Assumed Liabilities include: (i) product liability claims arising out of products delivered at or after the Sale transaction closes (the "**Closing**"), MPA § 2.3(a)(ix); (ii) the warranty and recall obligations of both Old GM and New GM, *id.* §§ 2.3(a)(vii), 6.15(a), (b); and (iii) all employment-related obligations and liabilities under any assumed employee benefit plan relating to employees that are or were covered by the UAW collective bargaining agreement, *id.* § 2.3(a)(xiii).

16. The liabilities being retained by Old GM include: (i) product liability claims arising out of products delivered prior to the Closing, MPA § 2.3(b)(ix); (ii) all liabilities

[3] While the MPA itemizes these various types of assets being sold, the Purchased Assets broadly include *any* asset that is not an Excluded Asset. MPA § 2.2(a).

for claims arising out of exposure to asbestos, *id.* § 2.3(b)(x); (iii) all liabilities to third parties for claims based upon "[c]ontract, tort or any other basis," *id.* § 2.3(b)(xi); (iv) all liabilities related to any implied warranty or other implied obligation arising under statutory or common law, *id.* § 2.3(b)(xvi); and (v) all employment-related obligations not otherwise assumed, including, among other obligations, those arising out of the employment, potential employment, or termination of any individual (other than an employee covered by the UAW collective bargaining agreement) prior to or at the Closing, *id.* § 2.3(b)(vii).

3. Consideration

17. Old GM is to receive consideration estimated to be worth approximately $45 billion, plus the value of certain equity interests in New GM.

18. The bulk of the consideration will come in the form of a credit bid by the United States Treasury ("**Treasury**") and Export Development Canada ("**EDC**"). Treasury and EDC will credit bid the majority of the indebtedness outstanding under certain prepetition credit facilities and the DIP facilities.

19. In addition to the consideration provided in the credit bid, New GM is also assuming approximately $6.7 billion of indebtedness under the DIP facilities, plus an additional $950 million to be loaned by Treasury under a new DIP facility (the "**Wind Down Facility**").

20. The consideration will also consist of: (i) the surrender of a warrant issued by Old GM to Treasury in connection with the prepetition credit facilities; (ii) 10% of the post-closing outstanding shares of New GM, plus an additional 2% if the estimated amount of allowed prepetition general unsecured claims against Old GM exceeds $35 billion; (iii) two warrants, each to purchase 7.5% of the post-closing outstanding shares of New GM, with an exercise price based on a $15 billion equity valuation and a $30 billion equity valuation, respectively; and (iv) the assumption of certain liabilities.

4. Ownership of New GM

21. Under the terms of the Sale, New GM will be owned by four entities.

22. Treasury will own 60.8% of New GM's common stock on an undiluted basis. It also will own $2.1 billion of New GM Series A preferred stock.

23. EDC will own 11.7% of New GM's common stock on an undiluted basis. It also will own $400 million of New GM Series A Preferred Stock.

24. The New Employees' Beneficiary Association Trust ("**New VEBA**") will own 17.5% of New GM's common stock on an undiluted basis. It also will own $6.5 billion of New GM's Series A Preferred Stock, and a 6-year warrant to acquire 2.5% of New GM's common stock, with an exercise price based on $75 billion total equity value.

25. Finally, if a chapter 11 plan is implemented as contemplated under the structure of the Sale transaction, Old GM will own 10.0% of New GM's common stock on an undiluted basis. In addition, as stated above, if the allowed prepetition general unsecured claims against Old GM exceed $35 billion, Old GM will be issued an additional 10 million shares amounting to approximately 2.0% of New GM's common stock. Old GM will also own the two warrants mentioned above.

C. The Proposed Sale Order

26. In their memorandum of law in support of the Sale Motion (the "**Memorandum in Support**")[4], the Debtors request that the Court authorize the Sale free and clear of all "liens, claims, encumbrances and other interests," including, specifically, "all successor liability claims." Memorandum in Support at 21-22.

[4] Dkt. No. 105.

27. To effectuate this result, the Debtors have submitted a proposed order to the Court (the "**Proposed Sale Order**")[5] that contains several provisions directed at cutting off successor liability.

28. First, the Proposed Sale Order contains an explicit finding – and an order to similar effect – that the Debtors "may sell the Purchased Assets free and clear of all liens, claims, encumbrances, and other interests of any kind or nature whatsoever, including rights or claims based on any successor or transferee liability because, in each case, one or more of the standards set forth in section 363(f)(1)-(5) of the Bankruptcy Code has been satisfied." Proposed Sale Order ¶¶ V, 7.

29. In addition the Proposed Sale Order would enjoin all persons (including "litigation claimants") holding "liens, claims, encumbrances, and other interests of any kind or nature whatsoever, including rights or claims based on any successor or transferee liability" from asserting such liens, claims, encumbrances and other interests against New GM or the Purchased Assets. Proposed Sale Order ¶ 8.

30. Finally, the Proposed Sale Order provides that New GM:

> shall not be deemed . . . to: (i) be a legal successor, or otherwise be deemed a successor to the Debtors (other than with respect to any obligations arising under the Purchase Agreements from and after the Closing); (ii) have, de facto or otherwise, merged with or into the Debtors; or (iii) be a mere continuation or substantial continuation of the Debtors or the enterprise of the Debtors.

Proposed Sale Order ¶ 27

D. Old GM's Tort Liability

31. In the absence of discovery, the Committee is not in a position to make representations concerning the nature and scope of Old GM's historical and future tort liability.

[5] Dkt. No. 92, Ex. B.

32. Old GM's most recent quarterly report notes present valued contingent liabilities of $934 million for product liability, $627 million for asbestos liability, $307 million for other litigation liability, and $294 million for environmental liability. *See* Form 10-Q for Period Ended March 31, 2009, at 30-32.

ARGUMENT

33. The Committee believes that the Sale Order should be approved within the time frame proposed by the Debtors, but only after being amended to address the issues discussed below, as well as other concerns described in Exhibit A to the Objection.[6]

I.

Section 363(f) Does Not Authorize the Sale of Assets Free and Clear of Successor Liability Claims

34. Pursuant to section 363(f) of the Bankruptcy Code, a debtor is authorized to sell property "free and clear of any *interest* in such property of an entity other than the estate" if any one of five conditions is met. 11 U.S.C. § 363(f) (emphasis added).[7]

---

[6] Among the concerns detailed in Exhibit A is the creditworthiness of the proposed tenant under the Master Lease Agreement that covers 10 facilities being leased by Old GM. As contemplated, the proposed tenant under the lease will be a newly formed special purpose entity with assets consisting only of its leasehold interest under the Master Lease and certain personal property and fixtures located at the properties covered by the lease. Even with these nominal assets, the tenant is not required to post any security deposit or otherwise satisfy any financial criteria. Not only is Old GM relying on the tenant to pay rent and carrying costs with respect to these 10 facilities, the tenant has the right to self-insure casualty and other risks in lieu of obtaining an insurance policy as is customarily required under real estate leases.

[7] Specifically, a "free and clear" sale is authorized if:

(1) applicable nonbankruptcy law permits sale of such property free and clear of such interest;

(2) such entity consents;

(3) such interest is a lien and the price at which such property is to be sold is greater than the aggregate value of all liens on such property;

(4) such interest is in bona fide dispute; or

35. The term "interest" is not defined in the Bankruptcy Code. Courts are divided as to whether the term, as used in section 363(f), encompasses unliquidated claims subject to successor liability. However, the better view – which is supported by both the text and policies of the Bankruptcy Code – is that unsecured claims arising out of existing or potential causes of action are not "interests" for purposes of section 363(f). Numerous courts have so held. *See, e.g., R.C.M. Executive Gallery Corp. v. Rols Capital Co.*, 901 F. Supp. 630, 637 (S.D.N.Y. 1995); *Volvo White Truck Corp. v. Chambersburg Beverage, Inc. (In re The White Motor Credit Corp.)*, 75 B.R. 944, 948 (Bankr. N.D. Oh. 1987); *see also, e.g., Yadkin Valley Bank & Trust Co. v. McGee (In re Hutchinson)*, 5 F.3d 750, 756 n.4 (4th Cir. 1993); *Michigan Employment Sec. Comm. v. Wolverine Radio Co. (In re Wolverine Radio Co.)*, 930 F.2d 1132, 1147 n.23 (6th Cir. 1991); *Kattula v. Republic Bank (In re LWD, Inc.)*, No. 5:08-cv-121, 2009 US Dist. LEXIS 17852, at *12 (W.D. Ky. Feb. 12, 2009); *Schwinn Cycling & Fitness Inc. v. Benonis (In re Schwinn Bicycle Co.)*, 210 B.R. 747, 761 (Bankr. N.D. Ill. 1997), *aff'd*, 217 B.R. 790 (N.D Ill. 1997); *Fairchild Aircraft Corp. v. Cambell (In re Fairchild Aircraft Corp.)*, 184 B.R. 910, 917-18 (Bankr. W.D. Tex. 1995), *vacated on other grounds*, 220 B.R. 909 (Bankr. W.D. Tex. 1998).

36. As an initial matter, section 363(f) does not refer to just any "interest." Rather, it refers to an "interest *in . . . property*." It could perhaps be said that a litigation claimant holds an "interest" in property of the estate in the colloquial sense of the term. But, having not yet reduced its claim to judgment and obtained a lien, it cannot be said to have an interest *in property*.

---

(5) such entity could be compelled, in a legal or equitable proceeding, to accept a money satisfaction of such interest.

11 U.S.C. § 363(f).

37. Thus, while section 363(f) may be used to extinguish *in rem* liabilities, there is no basis in the text of the statute for extinguishing *in personam* liabilities:

> Section 363(f) does not authorize sales free and clear of *any interest*, but rather of *any interest in such property*. These three additional words define the real breadth of *any interests*. The sorts of interests impacted by a sale "free and clear" are *in rem* interests which have attached to the property. Section 363(f) is not intended to extinguish *in personam* liabilities. Were we to allow "any interests" to sweep up *in personam* claims as well, we would render the words "in such property" a nullity. No one can seriously argue that *in personam* claims have, of themselves, an *interest in such property*.

Fairchild Aircraft, 184 B.R. at 917-18.

38. The use of the term "interest" in other sections of the Bankruptcy Code also supports a narrow reading of the term.

39. For example, Section 1141(c) provides that property "dealt with" by a plan of reorganization – *e.g.*, property sold pursuant to a plan – "is free and clear of all *claims and interests* of creditors, equity security holders, and of general partners in the debtor." 11 U.S.C. § 1141(c) (emphasis added). The presence of the word "claims" in section 1141(c) indicates that "claims" and "interests" are not synonymous. Thus, under recognized canons of statutory construction, the absence of the word "claims" from section 363(f) suggests that Congress did not intend for that section to be used to extinguish unliquidated claims.[8] Instead, such claims are to be dealt with only through the more rigorous (and protective) processes governing plans of

[8] *See, e.g., Russello v. United States*, 464 U.S. 16, 23 (1983) ("Where Congress includes particular language in one section of a statute, but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion.").

reorganization. *See* George W. Kuney, *Misinterpreting Bankruptcy Code Section 363(f) and Undermining the Chapter 11 Process*, 76 Am. Bankr. L.J. 235, 238-42 (2002).[9]

40. The use of the phrase "interest in property" in section 363(e) of the Bankruptcy Code also strongly suggests that "interest in . . . property" as used in section 363(f) cannot be so broad as to encompass general unsecured claims arising out of existing or potential causes of action.

41. Under section 363(e), the bankruptcy court may condition the use, sale, or lease of property in which an entity has an "interest" on the provision of adequate protection of such interest. But surely this does not mean that holders of unliquidated claims are entitled to adequate protection. Such a reading would "render[] the distinctions drawn in the Code [between secured and unsecured creditors] a nullity." *Fairchild Aircraft*, 184 B.R. at 918. It is well recognized that "identical words and phrases within the same statute should normally be given the same meaning." *Powerex Corp. v. Reliant Energy Servs., Inc.*, 127 S. Ct. 2411, 2417 (2007). Thus, if the "interest in property" referred to in section 363(e) cannot be read to include unliquidated claims, the same must then be true of the "interest in . . . property" referred to in section 363(f).

42. Notwithstanding the language of the statute, some courts have held that section 363(f) does permit the sale of assets free and clear of unliquidated claims. *See, e.g., In re Trans World Airlines, Inc.*, 322 F.3d 283, 288-89 (3d Cir. 2003); *In re Chrysler LLC*, 405 B.R. 84, 111 (Bankr. S.D.N.Y. May 31, 2009); *Myers v. United States*, 297 B.R. 774, 781-82 (S.D.

[9] It has been argued that the term "claims" in section 1141(c) corresponds to that section's reference to "creditors" and "interests" corresponds to the section's reference to "equity security holders" and "general partners." This, it is said, explains the use of two terms in section 1141(c), where one sufficed in section 363(f). But this argument works equally well in reverse. If the point is to show that "interests" in section 363(f) is broad and all-encompassing, then it follows that it was unnecessary to use the term "claims" in section 1141(c).

Cal. 2003); *P.K.R. Convalescent Ctrs., Inc. v. Virginia Dept. of Med. Assistance Serv. (In re P.K.R. Convalescent Ctrs., Inc.),* 189 B.R. 90, 94 (Bankr. E.D. Va. 1995); *In re All-American of Ashburn, Inc.,* 56 B.R. 186, 190 (Bankr. N.D. Ga.), *aff'd,* 805 F.2d 1515 (11th Cir. 1986). These courts tend to rely on one or more of three rationales, none of which is persuasive.

43. First, some courts hold that to the extent "it was the assets of the debtor which gave rise to the claims," the claims are interests in property. *Trans World Airlines,* 322 F.3d at 289-90. However, as discussed above, such a broad reading of interests in property is not supported by the text of the Bankruptcy Code. Section 363(e), in particular, requires that the interest truly be anchored in the property.

44. Second, these courts reason that "interest" must mean something more than "lien" because section 363(f) contains a specific subsection – section 363(f)(3) – dealing with liens. *See, e.g., Trans World Airlines,* 322 F.3d at 290.

45. This argument, too, is flawed. That "interest" is something more than "lien" does not mean that it is something as much as "unliquidated claim." The Fourth Circuit has recognized this very point. In *UMWA 1992 Benefit Plan v. Leckie Smokeless Coal Co. (In re Leckie Smokeless Coal Co.),* 99 F.3d 573 (4th Cir. 1996), the court rejected the argument that Congress intended to limit the scope of section 363(f) to *in rem* interests only. *Id.* at 582. Nonetheless, the court endorsed its earlier observation that "courts have recognized that general, unsecured claims do not constitute 'interests' within the meaning of § 363(f)." *Id.* at 581-82 (citing *Yadkin Valley Bank & Trust,* 5 F.3d at 756 n.4). The Fourth Circuit further held that the lower court had "applied an unduly broad interpretation of [section 363(f)] when it stated that one has an interest in a debtor's property simply when one has a right to demand money from the debtor." *Id.* at 581.

46. Finally, some courts have held that a broad reading of "interest" is necessary to further the policies of the Bankruptcy Code. The pre-Bankruptcy Code case of *Forde v. Kee-Lox Manufacturing Co.*, 437 F. Supp. 631, 633-34 (W.D.N.Y. 1977), *aff'd on different grounds*, 584 F.2d 4 (2d Cir. 1978), is typically cited for this proposition. There, the court argued that: (i) it would frustrate the priority scheme of the Bankruptcy Code to permit successor liability claimants "to assert their claims against purchasers of the bankrupt's assets, while relegating lienholders to the proceeds of the sale"; and (ii) to hold that sales could not be free and clear of successor liability claims would chill sales and impair a debtor's ability to realize value for its assets. *Id.* at 633-34.

47. These policy arguments are tenuous and have been rejected by several courts. Collateral litigation in a non-bankruptcy forum against non-debtors (where such non-debtors have no third-party rights against the debtor) has no impact on the bankruptcy estate or priorities of distribution. *See, e.g., Chicago Truck Drivers, Helpers & Warehouse Workers Union (Independent) Pension Fund v. Tasemkin, Inc.*, 59 F.3d 48, 51 (7th Cir. 1995) ("[O]nce a bankruptcy proceeding is completed and its books closed, the bankrupt has ceased to exist and the priorities by which its creditors have been ordered lose their force."); *accord R.C.M. Executive Gallery*, 901 F. Supp. at 637-38 ; *Ninth Ave Remedial Group v. Allis-Chalmers Corp.*, 195 B.R. 716, 731 (N.D. Ind. 1996).

48. Moreover, the prospect of successor liability would not "chill" a bankruptcy sale or impair a debtor's ability to realize value for its assets. Under a rule of "no sales free and clear of successor liability," section 363 sales would still go forward. (And, indeed, they do.) Such sales could be expected to realize the true value of the sold assets: that is, their value in light of the risk of successor liability. *Cf. Zerand-Bernal Group, Inc. v. Cox*, 23

F.3d 159, 163 (7th Cir. 1994) (rejecting argument that bankruptcy court can enjoin successor liability claims to maximize sale price).

49. Finally, to the extent that purchasers of a bankrupt's assets are the intended beneficiaries of "free and clear" orders, "there is no reason to accord the purchasers of formally bankrupt entities some special measure of insulation from liability that is unavailable to ailing but not yet defunct entities." *Chicago Truck,* 59 F.3d at 50; *accord R.C.M. Executive,* 901 F. Supp. at 637; *Ninth Ave. Remedial,* 195 B.R. at 731.

II.

Section 105(a) Does Not Authorize the Sale of Assets Free and Clear of Successor Liability Claims

50. Section 105(a) cannot be used to "bridge the gap" between section 363(f) and 1141(c) and authorize the sale of assets free and clear of successor liability claims outside of a plan of reorganization. One older case held that section 105(a) provided authority for such a sale. *See White Motor Credit*, 75 B.R. at 948-49. However, more recent authority regarding the scope of bankruptcy court jurisdiction suggests that *White Motor Credit* was wrongly decided.

51. A debtor that has sold its assets at a section 363 sale is indifferent to the outcome of a subsequent successor liability suit brought against the purchaser. The debtor's estate stands neither to be augmented nor diminished. As a result, the bankruptcy court lacks jurisdiction to enjoin such a suit. *See Johns-Manville Corp. v. Chubb Indemnity Insurance Co. (In re Johns-Manville Corp.),* 517 F.3d 52, 66 (2d Cir. 2008) (holding that "a bankruptcy court only has jurisdiction to enjoin third-party non-debtor claims that directly affect the *res* of the bankruptcy estate"), *reversed on other grounds*, —S.Ct.—, 2009 WL 1685625 (June 18, 2009); *Feld v. Zale Corp. (In re Zale Corp.),* 62 F.3d 746, 753 (5th Cir. 1995) (observing that "courts

have held that a third-party action does not create 'related to' jurisdiction when the asset in question is not property of the estate and the dispute has no effect on the estate").

52. The Seventh Circuit's opinion in *Zerand-Bernal* is on point. In *Zerand-Bernal*, the plaintiff had purchased the assets of a chapter 11 debtor in bankruptcy. The sale order approved the sale "free and clear of any liens, claims or encumbrances" and reserved in the bankruptcy court the jurisdiction "to enjoin . . . any products liabilities claims arising prior to the Closing or relating to sales made by Debtor prior to the Closing." 23 F.3d at 161. Several years after the sale, the defendant commenced a product liability suit against the purchaser on a successor liability theory, alleging injury from a product manufactured by the debtor. The purchaser then brought an adversary proceeding in the bankruptcy court seeking to reopen the bankruptcy case and enjoin the product liability suit. The bankruptcy court dismissed the adversary proceeding for lack of jurisdiction. *Id.* at 161.

53. On appeal, the Seventh Circuit affirmed the dismissal. The Seventh Circuit held that the bankruptcy court lacked "related to" jurisdiction under 28 U.S.C. § 1334(b) because "the suit cannot possibly affect the amount of property available for distribution to [the debtor's] creditors; all of [the debtor's] property has already been distributed to them." *Id.* at 162. Similarly, the court held that there was no "arising under" jurisdiction because the bankruptcy was "over and done with" and "[t]he main dispute is one between a purchaser at the bankruptcy sale and a person who had nothing to do with the bankruptcy over a point of state law." *Id.*

54. Of significance, the Seventh Circuit was not swayed by the policy argument that its decision might ultimately lead to depressed sale prices in bankruptcy. The court acknowledged the validity of the assertion, but rejected it as a justification for enjoining

successor liability claims. *See id.* at 163 ("All this is true, but proves too much. It implies, what no one believes, that by virtue of the arising-under jurisdiction a bankruptcy court enjoys a blanket power to enjoin all future lawsuits against a buyer at a bankruptcy sale in order to maximize the sale price."); *see also Johns-Manville*, 517 F.3d at 66 ("It was inappropriate for the bankruptcy court to enjoin claims brought against a third-party non-debtor solely on the basis of that third-party's financial contribution to a debtor's estate.").

55. Even if a bankruptcy court had jurisdiction to enjoin successor liability claims, it would be improper to do so. The Bankruptcy Code contemplates that certain ends can be achieved only through a plan of reorganization, not through a section 363 sale. Supreme Court precedent counsels that the distinctions between the two should not be ignored. In *Florida Department of Revenue v. Piccadilly Cafeterias, Inc.*, 128 S. Ct. 2326 (2008), the Supreme Court held that sales pursuant to section 363 were subject to state stamp taxes notwithstanding that identical sales pursuant to a plan of reorganization were exempt under section 1146(a) of the Bankruptcy Code. *Id.* at 2339.

56. The debtor in *Piccadilly* argued that Congress could not have "intended the anomaly that a transfer essential to a plan that occurs two minutes before confirmation may be taxed, but the same transfer occurring two seconds after may not." *Id.* at 2338. Additionally, the debtor argued that "interpreting § 1146(a) to apply solely to postconfirmation transfers would undermine Chapter 11's twin objectives of 'preserving going concerns and maximizing property available to satisfy creditors.'" *Id.* (citation omitted). The Court was unimpressed by these arguments, noting that "it is not for us to substitute our view of . . . policy for the legislation which has been passed by Congress." *Id.* at 2339 (citation omitted).

57. The same is true in the case of section 363(f). Congress could have drafted that section to permit sales free and clear of "claims and interests." But instead, Congress drafted the section more narrowly, and reserved the broader language for section 1141(c). The court should not use its equitable powers under section 105(a) to override this distinction.

III.

Even if Assets Could be Sold Free and Clear of *Existing* Claims They Cannot be Sold Free and Clear of *Future* Claims

58. As relevant to this Objection, successor liability claims falls into two broad categories. The first are claims for which a right to payment, contingent or otherwise, already exists ("existing claims"). The second are "claims" for which a right to payment has yet to arise because no liability-generating conduct or incident has yet occurred ("future claims").

59. As discussed above (at ¶ 42), several courts have concluded – mistakenly, in the Committee's view – that bankruptcy courts can authorize sales free and clear of existing successor liability claims.[10] The same cannot be said of future claims. Courts have overwhelmingly rejected the idea that assets can be sold free and clear of future claims. *See, e.g. Zerand-Bernal,* 23 F.3d at 163; *Mooney Aircraft Corp. v. Foster (In re Mooney Aircraft, Inc.),* 730 F.2d 367, 375 (5th Cir. 1984); *Car-Tec, Inc. v. Venture Indus., Inc. (In re Autostyle Plastics, Inc.),* 227 B.R. 797, 800 (Bankr. W.D. Mich. 1998); *Schwinn Bicycle,* 210 B.R. at 760-61; *Ninth*

[10] *See, e.g., Trans World Airlines,* 322 F.3d at 286 (addressing sale order that extinguished existing claims based on Travel Voucher Program and discrimination charges already pending before EEOC); *Myers,* 297 B.R. at 777 (addressing lawsuit arising out of pre-petition exposure); *P.K.R. Convalescent Centers,* 189 B.R. at 92 (addressing existing contingent claim); *All American of Ashburn,* 56 B.R. at 189 (distinguishing between existing claims and claims arising after sale, and addressing product liability claim that arose prior to sale).

Avenue Remedial, 195 B.R. at 731-32; *Fairchild Aircraft*, 184 B.R. at 921; *White Motor Credit*, 75 B.R. at 948-49. [11]

60. The reasoning of these cases is compelling. First, to the extent that a bankruptcy court must rely on its equitable power to cleanse assets of successor liability claims, this power does not extend to claims arising post-bankruptcy, because such claims are not "claims" for purposes of bankruptcy. *See, e.g., White Motor Credit*, 75 B.R. at 948-49 (bankruptcy court's "equitable power to sell free and clear must be interpreted consistent with its power to discharge claims under a plan of reorganization"); *Ninth Avenue Remedial*, 195 B.R. at 731-32 (noting that if claim could have been a claim in bankruptcy, "the bankruptcy court had the equitable power to discharge the claim against the assets purchaser," but "[i]f the claim arose after the consummation of the bankruptcy proceedings, the bankruptcy court did not have the

[11] This trend extends to state courts. State courts generally accord no deference to bankruptcy court free and clear orders where the successor liability claim at issue in the collateral state court proceeding arises out of an accident occurring subsequent to the bankruptcy sale. *See, e.g., Simmons v. Mark Lift Indus., Inc.*, 622 S.E. 2d 213, 215 (S.C. 2005) (where accident occurred years after sale, court held that "a plaintiff may maintain a state law-based product liability claim under a successor liability theory against a successor corporation which purchased the predecessor's assets in a voluntary sale approved by the federal bankruptcy court provided one of the [usual exceptions to the rule against successor liability] applies"); *Renkiewicz v. Allied Prods. Corp.*, 492 N.W. 2d 820, 821 (Mich. Ct. App. 1992) (free and clear sale did not extinguish product liability claim against purchaser that arose out of accident that occurred subsequent to sale); *Wilkerson v. C.O. Porter Machinery Co.*, 567 A.2d 598, 599-601 (N.J. Super. Ct. 1989) (where injury occurred subsequent to sale, court held that "[t]he mere fact that the bankruptcy order approves a sale purporting to transfer assets free and clear of various claims, even including contingent products liability claims, should not be determinative."); *cf. Gross v. Trustees of Columbia University*, 816 N.Y.S.2d 695, 2006 WL 825040, at *4-5 (Sup. Ct. Kings Co. Mar. 30, 2006) (although accident occurred prior to sale, product liability claim was not bankruptcy "claim" because it had not yet been filed; accordingly, it was "future claim" that was not barred by free and clear sale); *Lefever v. K.P. Hovnanian Enters. Inc.*, 734 A.2d 290, 298 (N.J. Sup. Ct. 1999) (although accident occurred prior to sale, successor liability claim was not barred because the bankruptcy proceedings had not "dealt with" the claim, that is, the plaintiff "was not a creditor of the bankrupt" and had filed no claim in the bankruptcy proceedings); *see also Ross v. DESA Holdings Corp.*, No. 05C-05-013, 2008 WL 4899226 (Del. Super. Ct. Sept. 30, 2008) (rejecting imposition of successor liability for post-sale accident, but doing so not because of the bankruptcy court "free and clear" order but rather because none of the recognized exceptions to the rule against successor liability applied); *DiGuilio v. Goss Int'l Corp.*, No. 1-07-1584, 2009 WL 1175089, at *6-8 (Ill. App. Ct. Apr. 30, 2009) (same); *Rivera v. Anderson United Co.*, 727 N.Y.S. 2d 447, 448-49 (N.Y. App. Div. 2001) (same).

power to discharge that claim"); *Fairchild Aircraft*, 184 B.R. at 921 ("[I]t is only if the claims . . . can properly be said to have been the subject of the bankruptcy process that we can maintain that the bankruptcy court had any authority to issue orders affecting their rights."); *Mooney Aircraft*, 730 F.2d at 375 ("no claim to be divested" because the claims "did not arise until more than five years after the sale and more than a year after the bankruptcy estate was closed").

61. Second, due process prevents the sale of assets free and clear of future claims. As the District Court for the Southern District of New York noted in *R.C.M. Executive Gallery*, "the case for successor liability is . . . strong[]" where plaintiffs "allege that they had no notice of the prior bankruptcy proceedings and therefore never pursued a claim in bankruptcy." 901 F. Supp. at 638; *accord Schwinn Bicycle*, 210 B.R. at 760-61 ("Allowing provisions of the Sale Order to bind these [future claimants], even if that Order was intended to do so, would violate the Fifth Amendment because of fairness and due process concerns and would also violate bankruptcy notice requirements."); *Zerand-Bernal*, 23 F.3d at 163 (rejecting notion that bankruptcy court "could allow the parties to bankruptcy sales to extinguish the rights of third parties, here future tort claimants, without notice to them or (as notice might well be infeasible) any consideration of their interests"); *see also, e.g.*, *Mooney Aircraft*, 730 F.2d at 375 ("We recognize that a sale free and clear is ineffective to divest the claim of a creditor who did not receive notice, and that, were it necessary to reach this question, this lack of notice might well require us to find that the bankruptcy court's prior judgment was ineffective as to the [future claims at issue]") (internal citations omitted); *Western Auto Supply Co. v. Savage Arms, Inc. (In re Savage Industries, Inc.)*, 43 F.3d 714, 722 (1st Cir. 1994) ("[I]t cannot seriously be questioned that the central 'notice and hearing' requirement prescribed by the Bankruptcy Code would be eviscerated were we to presume, as [defendant] belatedly suggests, that an entire class of future

products liability claimants was beyond the purview of 'such notice . . . and such opportunity for a hearing as [was] appropriate in the particular circumstances.'") (citing 11 U.S.C. § 102(1)(A)).

62. There are additional considerations that make it particularly inappropriate to attempt to use a Section 363 sale to cut off liability for future asbestos claims. Asbestos claims are unique in that the Bankruptcy Code contains a provision governing the terms under which such future claims – or "demands," as they are referred to in the Bankruptcy Code – may be discharged. *See* 11 U.S.C. § 524(g). The existence of the provision implies that it should be the exclusive means of discharging future asbestos claims, and courts have so held. *See, e.g., In re Combustion Engineering, Inc.*, 391 F.3d 190, 237 n.50 (3d Cir. 2004) ("§ 105(a) cannot be used to achieve a result not contemplated by the more specific provisions of § 524(g), which is the means Congress prescribed for channeling the asbestos liability of a non-debtor").

63. A free and clear sale such as that contemplated in these cases does not constitute a "discharge." Yet, in purporting to bar future asbestos claims against New GM, the sale would achieve a similar result. Thus, to the extent that bankruptcy courts have the equitable power to authorize sales free and clear of future claims – and the Committee believes that they do not – this power is impliedly circumscribed by the existence of section 524(g).

IV.

The Debtors Must Demonstrate That the Proposed Sale Makes Adequate Provision for the Payment of Costs of Administering the Estate

64. The proposed transaction is termed a "sale," but it more closely resembles a foreclosure. By virtue of the Credit Bid, the Government Entities, as secured creditors, are taking title to property in lieu of being repaid. A similar result could have been achieved by the initiation of foreclosure proceedings under state law – with one critical distinction. Under state

law, the Government Entities would have been unable to avail themselves of the numerous benefits of the Bankruptcy Code.

65. Chief among the benefits of bankruptcy are the ability to assume and reject executory contracts and to purchase assets free and clear of certain interests. The Government Entities propose to take full advantage of both of these benefits, and more. Having chosen to use the bankruptcy forum to obtain title to Old GM's assets, the Government Entities should be required to "pay the freight," that is, make provision for the payment of the costs of administering the bankruptcy cases.

66. A recent case, *In re Gulf Coast Oil Corp.*, 404 B.R. 407 (Bankr. S.D. Tex. 2009), illustrates the principle. In *Gulf Coast*, the debtor proposed to sell substantially all of its assets to its secured lender in partial satisfaction of its claim (i.e., a credit bid). The debtors' financial advisors objected to the sale on the ground that the proposed transaction would not pay all administrative expenses of the estate. *Id.* at 414.

67. The bankruptcy court sustained the objection. The court emphasized that "bankruptcy is, at its essence, a collective remedy intended to benefit all creditors, not just the secured lender." *Id.* at 426. In the court's view, the essence of the transaction was "a foreclosure supplemented materially by a release, by assignment of executory contracts (but only the contracts chosen by the secured lender), by a federal court order eliminating any successor liability, and by preservation of the going concern." *Id.* at 428. In short, "[t]he only effect of the bankruptcy process would be to transfer the debtors' assets to its secured creditor with benefits that the creditor could not achieve through foreclosure." *Id.* The court was unwilling to countenance this result, particularly where the expenses of the bankruptcy proceeding would not be paid. *See id.* at 427 (noting that "it would be especially difficult to understand why the

purchaser should get the benefit of extraordinary bankruptcy powers and remedies for which it did not pay").

68. The principle that a secured creditor must pay for the benefits it realizes in bankruptcy is not a novel one. Indeed, section 506(c) of the Bankruptcy Code expressly contemplates this result. That section provides that "[t]he trustee may recover from property securing an allowed secured claim the reasonable, necessary costs and expenses of preserving, or disposing of, such property to the extent of any benefit to the holder of such claim." 11 U.S.C. § 506(c). Thus, for example, in *In re Pudgie's Dev. of N.Y.*, 223 B.R. 421 (Bankr. S.D.N.Y. 1998), the court awarded fees to the debtors' counsel notwithstanding that the payment of such fees would reduce the amount of the sale proceeds available to pay the claims of the secured DIP lenders. *Id.* at 424-25. The court found that the fees were justified under section 506(c) on the grounds that without the efforts of counsel, "it appears likely that the sale would not have occurred, the Debtors' business operations would have ceased, the case would have been converted to Chapter 7 and the paltry physical assets would have been sold for nominal values undoubtedly equating to a small fraction of the [sale proceeds]." *Id.* at 424.

69. Unlike in *Gulf Coast,* the Committee does not suggest that the court should disallow the Sale. However, prior to approving the Sale, the court should require the Debtors to present evidence that the Sale will not leave the Debtors' estates administratively insolvent. The distribution of stock to unsecured creditors of Old GM that is contemplated by the Sale transaction is to be accomplished under a future chapter 11 plan. A plan cannot be confirmed absent the payment of priority and administrative claims. *See* 11 U.S.C. § 1129(a)(9)(A). Accordingly, in order to ensure that unsecured creditors will receive the limited recovery promised to them under the terms of the Sale, the Debtors should be required to

demonstrate (1) that Treasury will forego enforcement of Old GM's liability for the $950 million in DIP proceeds constituting the Wind Down Facility to the extent necessary to fund the expenses of the Estates, and (2) that the Wind Down Facility will, in turn, be sufficient to pay all anticipated administrative and priority claims, such that other assets left with Old GM, including stock of New GM, will be available for distribution to other unsecured creditors.

CONCLUSION

70. For the foregoing reasons, the Committee respectfully requests that the Court approve the Sale Order only if it is amended to eliminate the purported cut-off of successor liability and provide for the assumption of such claims by New GM, and only upon an adequate demonstration that the proposed sale makes provision for the payment of all administrative and priority claims.

Proposed Counsel for the Official Committee of Unsecured Creditors

Exhibit A

Exhibit A

ISSUE	OBJECTION
Master Sale and Purchase Agreement ("MPA") Issues:	
Assumption of Dealer Agreements by New GM should be absolute	Section 6.6(a) permits New GM to request that Old GM consent to the removal of the Deferred Termination Agreement and Participation Agreement from the list of Assumable Executory Contracts. Under the terms of the MPA, Old GM cannot unreasonably withhold its consent to any such request. The language permitting New GM to make these requests should be removed and the requirement that New GM assume all Deferred Termination Agreements and Participation Agreements should be absolute. Old GM's counsel has agreed to remove any language that creates ambiguity with respect to the assignment to New GM of Dealer Agreements. This agreement needs to be reflected in a revised MPA.
The Sale Order should not provide for preemption of state law	Paragraph 39 of the proposed Sale Order provides that no law of any state or other jurisdiction shall apply in any way to the transactions contemplated by the 363 Transaction, the MPA, the Motion, and the Sale Order. The Sale Order should not provide that state laws are preempted generally and any such statements must be limited to "legal truisms" (e.g., section 365 controls the assignment of Assumable Executory Contracts) but not otherwise seek to characterize the effects of any such assignment under non-bankruptcy law.
There should be greater transparency with respect to the assumption and rejection of Assumable Executory Contracts	Section 6.6 provides New GM with the right to add or remove any Executory Contract from the definition of Purchased Contracts until 30 days after the Closing Date. Consequently, it will not be possible to determine the universe of rejected Executory Contracts until at least 30 days after the Closing Date. New GM has agreed to publicly disclose, as soon as is practicable, those Executory Contracts with respect to which it has made the pre-Closing determination to assume or not to assume. This covenant should be reflected in the MPA.
It should be clear that Old GM does not bear any liability for tax liabilities of Subsidiaries that are sold to New GM	There is language in a number of sections in the MPA that creates ambiguity as to whether Old GM would have liability for tax liabilities of Subsidiaries that are sold to New GM. It has been indicated that it was not intended that Old GM should bear such liability (though this intent needs to be confirmed). The MPA needs to be revised to reflect this position.
Old GM should have greater rights with respect to tax matters relating to taxes for which Old GM is liable	Section 6.16 provides New GM with significant control over tax issues affecting Old GM. Old GM should have greater rights with respect to tax matters (including tax returns and audits or other proceedings) that could materially affect taxes payable by Old GM, including control over any election under IRC Section 108(b)(5) (which relates to order of attribute reduction resulting from cancellation of indebtedness).
New GM should assume Product Liabilities with respect to claims arising post-Closing	Section 2.3(a)(ix) provides that New GM will assume Product Liabilities arising out of products delivered after the Closing.

ISSUE	OBJECTION
	New GM has agreed to assume all Product Liabilities for claims arising after the Closing, regardless of whether the products were delivered prior to or after the Closing. This agreement should be reflected in the MPA. The MPA needs to clarify the treatment of product liability claims arising post-petition and pre-Closing.
New GM should assume implied warranties	Section 2.3(a)(vii) provides that New GM will assume express warranties with respect to vehicles and parts. New GM has additionally agreed to assume all implied warranties with respect to vehicles and parts. This agreement should be reflected in the MPA.
Old GM should retain Product Liability insurance policies	Pursuant to Section 2.2(a)(xvii), New GM will acquire insurance policies of Old GM which relate to product liability claims, while Old GM will retain certain product liabilities under Section 2.3(b)(ix). Old GM should retain the insurance policies which provide coverage for these claims.
No Representations or Warranties should survive Closing	Section 9.1(b) provides that a number of the representations and warranties survive until the third anniversary of the Closing. New GM has agreed that no representations or warranties should survive the Closing. This agreement needs to be reflected in a revised MPA.
Adjustment Shares should be excluded from collateral securing the Wind Down Facility	Section 6.9(b) does not exclude the Adjustment Shares from the assets of Old GM which will secure the Wind Down Facility. New GM has agreed that the Adjustment Shares will be so excluded. This agreement needs to be reflected in a revised MPA.
Definition of "UST Credit Facilities" should be clarified	The definition of "UST Credit Facilities" should capture any amendments thereto. This is an important issue since New GM is credit bidding the debt under the UST Credit Facilities as defined in the MPA. Old GM's counsel has agreed to make this clarification. This clarification needs to be reflected in a revised MPA.
It should be clarified that New GM is assuming all liabilities with respect to Assumed Plans that constitute Purchased Assets	Section 2.2(a)(xvi) provides for the acquisition by New GM of all Assumed Plans to the extent described in Section 6.17(e). Section 2.3(a)(xiii), however, provides only for the assumption of Liabilities under the Assumed Plans to the extent that such Liabilities relate to an Employee covered by the UAW Collective Bargaining Agreement. The assumption of liabilities under Assumed Plans should be consistent with the acquisition of the Assumed Plans and with Section 6.17(e).
Form of Registration Rights Agreement ("RRA") Issues:	
Share and Warrant Consideration should be registered under the Securities Exchange Act of 1934 (the "1934 Act"), and be listed on a national exchange, prior to specific dates	The RRA does not require that New GM become a reporting company under the 1934 Act or that New GM's shares of common stock and warrants be listed for trading on the NYSE or Nasdaq prior to specific dates. New GM is considering dates by which such commitments may be made. Once the date is determined it should be reflected in a revised RRA.

ISSUE	OBJECTION
Old GM should be granted "most favored nation" status, along with the other stockholders of New GM	Section 2.12(b) provides that if New GM grants to any party registration rights which are more favorable than those provided in the RRA, New GM will grant those same rights to UST Holdco, Canada and the VEBA. Old GM should also receive the benefits of this provision. New GM agreed that this provision would be changed to be uniform for UST Holdco, Canada, the VEBA and Old GM. This agreement needs to be reflected in a revised RRA.
Old GM should not be required to indemnify New GM to a greater degree than New GM's other stockholders	Section 2.9.2 requires Old GM to indemnify New GM for Losses arising out of material misstatements or omissions made in a registration statement or prospectus in reliance on information provided by Old GM. No other stockholder which is a party to the RRA is required to provide such indemnification. New GM has agreed to exempt Old GM from the indemnification obligation on the same basis as the other holders of Registrable Securities. This agreement needs to be reflected in a revised RRA.
Form of Transition Services Agreement ("TSA") Issues:	
The $15MM cap on liability and limited remedies unduly restrict Old GM's recourse if New GM breaches [§§ 5.3, 5.4 & 6.1]	The amount of the cap should be increased, and its application limited by carving out gross negligence and intentional breach. Otherwise, the cap may enable New GM to shed all of its obligations under the TSA (thereby depriving Old GM of services essential to the liquidation) by paying $15MM. In addition, each party should have the express remedy of specific performance.
New GM's ability to terminate the TSA in its entirety needs to be very limited [§ 4.3]	Continued provision of New GM's services are critical to Old GM's ability to move forward towards liquidation. Accordingly, and given the adequacy of other remedies, New GM's ability to call a default and terminate the TSA in its entirety should be extremely narrow -- limited only to an Old GM payment default that continues for 30 days after notice. New GM should pursue specific performance and damages for other breaches.
Old GM needs to assure the sufficiency and quality of services received [§§ 2.5, 2.8, 2.10, & Sch. A, A-2 & B]	If Old GM reasonably requires, within a year of Closing, additional services which New GM has historically provided or is reasonably able to provide, New GM should be obligated to provide them, on a commercially reasonable ("fully loaded" cost plus 5%) basis, regardless of whether the parties are able to agree on price and specifications. New GM should also provide (i) legal services of the type previously provided in house (subject to conflict of interest or ethical bars) and (ii) all facility idling services. In addition, New GM should, consistent with its own business, expressly seek to afford Old GM with the benefits of qualified personnel and institutional knowledge.
A traditional overall objective performance standard should apply to all services [§ 2.1]	All services, including those performed by New GM for its own account, should be subject to a performance standard specifying reasonable and ordinary care, skill and diligence, in a manner consistent with historic practice, including with respect to nature, quality and timeliness.
Old GM should not be required to perform additional services [§ 2.5]	Old GM will have no post-Closing employees. New GM should not have any ability to require Old GM to perform services not specified in the TSA.

ISSUE	OBJECTION
New GM needs to be responsible for the performance of its third party providers [§ 2.4]	If consent from a third party provider cannot be obtained, New GM should provide a substantially equivalent service. In addition, New GM should be responsible for its third party providers' adherence to the performance standard and any other breaches, and obtain Old GM's reasonable approval of new providers.
New GM needs to be responsible for environmental conditions it causes [Sch. B]	New GM should be liable for the cost of remediating any contamination caused by it, and any resulting consequences. In addition, Old GM should not be obligated to provide or guarantee financial assurance required under any environmental laws.
New GM needs to be responsible for the absence of landlord consents [Sch. C]	No landlord consents have been obtained for New GM's use and occupancy of the leased properties covered by the TSA. New GM should be responsible for any resulting liability.
Old GM needs traditional arms-length real estate protections [Sch. C]	The TSA should provide Old GM with traditional real estate protections including (i) the right to recover possession following a New GM default; (ii) at least six months' prior notice before vacating; (iii) the ability to directly enforce overleases; and (iv) the acknowledgement by New GM that it is taking facilities "as is" (with no implied obligation of Old GM to make repairs or provide services) and is liable for all related taxes and the repair of damages caused by it.
Old GM must be assured access to appropriate New GM personnel and information [§ 7.18]	The parties should expressly agree to reasonably cooperate with each other, including by providing the other access to books and records, and employees.
Coordination/dispute resolution should be enhanced [§ 2.14]	Each party should appoint a liaison to coordinate activities and facilitate prompt dispute resolution.
The terms of the TSA applicable to SPO Jacksonville and SPO Boston must be clarified [Schedule C]	The TSA is unclear regarding New GM's use and occupancy of certain properties (including SPO Jacksonville and SPO Boston), including whether the leases will be assumed or rejected.
Form of Master Lease Agreement ("MLA") Issues:	
Old GM is entitled to a creditworthy Tenant under the MLA [cover page]	The Tenant under the MLA is a new shell entity, with no obligation to post any security deposit or maintain third party insurance. Instead, New GM should itself be the Tenant, or provide a full guaranty.
Old GM is entitled to traditional arms-length real estate provisions [§§ 6, 8, 9 & 13.2]	Tenant should be obligated for all customary "triple net lease" responsibilities, including all taxes imposed on the real estate, fixtures and personal property, and repairs other than major structural repairs, as well as obtaining waivers of subrogation, and observing customary subletting and assignment restrictions.
Short notice periods unduly disadvantage Old GM [§§ 3 & 23]	Tenant may at any time, on 45 days' notice (30 in certain cases), remove one or more facilities from the MLA. Such short notice periods will disadvantage Old GM in selling or re-letting the facilities. Six months' notice should be

ISSUE	OBJECTION
	required.
Old GM is entitled to true holdover rent [§ 16]	Tenant should be required to pay holdover rent at a customary premium to market rent, and operating costs during any holdover period.
Tenant needs to be responsible for environmental conditions it causes [§ 18]	While Old GM generally retains environmental liabilities, Tenant should be responsible for (and not released from) the cost of remediating any contamination caused by it, and any resulting consequences.
Michigan law should not govern out-of-state properties [§ 21.8]	Michigan law governs the MLA, even where facilities are in other states. This unusual provision may operate to limit Old GM's rights and remedies. Governing law should be the law of the state in which a property is located.

P R O C E E D I N G S

THE COURT: Good morning. Have seats, everybody. All right. We're here on GM, the motion of Manufactures and Traders for relief from the stay. I have no objection to it from the debtors. Folks, why are we here? I have never seen such a slam dunk entitlement to relief from the stay in a commercial case and I have no objection from the debtors. Mr. Smolinsky, are you appearing for the debtors on this?

MR. SMOLINSKY: Yes, Your Honor. I think the reason why we're here is simply because we received a draft stipulation a day or so before the hearing. And it just took time to allow the unsecured creditors' committee to review it and for us to review it. So we apologize for the Court's inconvenience. We had tried to move it to a time that was consistent with our other hearings in the case. But we're prepared to stipulate we reviewed the stipulation. We had a call last night and finalized the verbiage of the stipulation.

THE COURT: Well, I'm here anyway. But this situation required a lawyer to come up from Philly for such a plain entitlement? Let me tell you what else is bothering me, Mr. Smolinsky. After some bad experiences in the Lyondell Chemical case, I built into my case management order a provision that before people move for emergency relief from the stay, they'd have to contact the debtor to see if the debtor would consensually agree to give them whatever relief from the

stay or adequate protection they were asking for. And even to require a certification that they had tried to work it out with the debtor to avoid the expense of dealing with the matter of this character.

So I looked very hard for the certification because I couldn't believe that a creditor had to make a motion of this character if they had picked up the phone and discussed it with the debtor. And the certification that I have here says that on June 16th, counsel for the movant called your firm's office where they were directed to the number of the debtors' noticing and claims agent. And that they subsequently spoke to a representative of the claims agent and left a detailed message that presumably wasn't responded to. And then on that same day, they made additional efforts to reach debtors' counsel telephonically and left a message with the attorney purportedly assigned to the debtors' case. And according to the certification, in three days they never got a response? That exactly frustrates the purpose of the certification mechanism and required counsel to appear on a motion which if there were an eight second phone call with a second year associate, one who'd have been admitted to the bar for a week, we could have avoided this.

MR. SMOLINSKY: Your Honor, let me -- if I can explain? First of all, in terms of counsel being here, we accommodated them to the utmost. We told them that they didn't

need to appear. If the committee needed more time to review the stipulation -- as I said, we had the stipulation for less than a day while all the sale hearing activities were going forward. We told counsel that they didn't need to appear, that we would simply tell the Court that there was a resolution and that we would submit a stipulation.

In terms of the calls, I can only say, and I'm not saying this for any excuse, but we've been receiving, as you can imagine, tens of thousand of calls. We put a process in place, as well as General Motors put a process in place, where an attorney would return every phone call. And if it was a creditors' call, it would be referred to the supplier hotline call center that you've heard about. There was no physical way for myself to return all of the calls --

THE COURT: Well, I wouldn't expect a partner to respond to a call of this character but you've got to have a first year associate -- or, if you think that it requires practicing law, a second year associate -- return a call from another lawyer.

MR. SMOLINSKY: Your Honor, we did have an attorney return all the calls. Why it wasn't taken as a call that could be -- that could result in an immediate settlement, I don't know. It was referred to the call center. I think the call center has been getting back to people but they may not have been -- they may not understand how to deal with a motion to

lift stay. We're been working with counsel. They sent us the perfection documents. We looked at them quickly and there's been no impediment to getting a stipulation done other than the short period of time that we had to review it.

THE COURT: All right. I can understand why you can't make a deal without consulting the creditors' committee. But what I do expect is that when a lawyer for a creditor in the case calls, at least one who's saying that he needs emergency relief and wants relief from the stay, that some lawyer at your firm, at debtors' counsel or your co-counsel, will answer the guy's call, will return the guy's call. And if you can't make a deal, say I've got to call the creditors' committee, I'll get back to you as soon as you can. I'll pay or I'll authorize payment from the estate but you need to put an extra general associate on the matter to return calls of this character. But I won't pay or authorize payment for the need to respond to motions of this character.

The motion's granted and we're adjourned until 9:00.

MR. SMOLINSKY: Thank you, Your Honor.

(Recess from 8:05 a.m. until 9:21 a.m.)

THE COURT: I want to apologize to any of you who may have been waiting for us to begin. We had some business we had to take care of before now. Mr. Miller?

MR. MILLER: Good morning, Your Honor. Harvey Miller on behalf of the debtors. Your Honor, just one housekeeping

detail.

THE COURT: Yes?

MR. MILLER: We referred yesterday to the amended MSPA and I neglected to move it into evidence, Your Honor. So I would ask that it be marked in evidence as Debtors' Exhibit 6A so that it will come right after the original that was filed on June 1st.

THE COURT: Okay. That's the amended one?

MR. MILLER: Yes.

THE COURT: Any objection? Hearing none, it's admitted.

MR. MILLER: Thank you, Your Honor.

(Debtors' Exhibit 6A, amended MSPA, was hereby received into evidence as of this date.)

THE COURT: Are we up to the cross-examination of Mr. Wilson?

MR. MILLER: I think Mr. Repko was first, Your Honor.

THE COURT: I'm sorry?

MR. MILLER: Mr. Repko.

THE COURT: Oh, Mr. Repko first. Okay. You want to remain standing to be sworn? Karen?

(Witness duly sworn)

THE COURT: Have a seat, Mr. Repko.

CROSS-EXAMINATION

BY MR. RICHMAN:

Q. Good morning, Mr. Repko.

A. Good morning, sir.

Q. I'm Michael Richman from Patton Boggs representing dissident bondholders' committee. I think between you and Mr. Koch and Mr. Miller, we have a veritable hall of fame of bankruptcy professionals. Would you talk to us generally about your background in the industry, not just with Evercore but prior to that in your experience with bankruptcy cases?

A. Yes. I was with JPMorgan predecessor institutions for thirty-two years; various responsibilities from the pure workout function acting for the bank's own interests to an advisory business internationally; and then for the last fifteen or so years, as head of the restructuring group which was designed to deliver capital to troubled companies both in court and out of court.

Q. Could you comment on your experience generally in creating and/or valuing bankruptcy spinoffs under Chapter 11 plans? Creation of new companies from the best assets of the old debtors?

A. Well, as part of the capital delivery problem, the credit decision, at least the way I practice it, not only involved the process of financing the company that was in trouble but also identifying the process by which the company would get out of trouble and reorganize because in order to satisfy yourself as a DIP lender, you need to understand how the company will exit

and how it will finance itself.

Q. So you have extensive experience with valuing reorganized debtors?

A. I think so, yes.

Q. Now, in connection with your assignment for the debtors in this case, were you the main spokesperson for Evercore with the board of directors of GM?

A. I was -- I was one of them. There were four senior people involved for Evercore, the first and foremost being our chairman and then chief executive officer, Roger Altman; another senior managing director, William Hiltz; myself and Stephen Worth. And there were others.

Q. Were you present during board meetings when the fairness opinion that Evercore prepared was presented to the board?

A. Yes.

Q. Were you also part of the chain of communications in GM's board giving the assignment to do the fairness opinion?

A. I'm sorry?

Q. Who asked you to prepare the fairness opinion?

MR. MILLER: Excuse me. As Mr. Repko or Evercore?

Q. Who asked Evercore to prepare the fairness opinion?

A. General Motors did.

Q. And what were the parameters in those -- were you privy to that discussion?

A. I don't believe I was present for that discussion.

Q. Who was the discussion with?

A. I believe that discussion was with Mr. Worth, primarily, and Mr. Hiltz.

Q. At any time, to your knowledge, did GM's board ask Evercore to value New GM if New GM were created under a Chapter 11 plan rather than a 363 sale?

A. I don't believe so.

Q. Were you instructed not to do that?

A. We had specific instructions on how to perform the valuation which are contained in Mr. Worth's declaration, I believe.

Q. So there was no -- to your knowledge, no valuation whatsoever was performed with respect to the creation of a new GM under a plan as distinct from a 363 sale?

A. Not to my recollection.

Q. If you assume with me that financing would be available for New GM in comparable numbers to what is now being proposed or promised, could a new GM be created under a Chapter 11 plan with the same or comparable values to the new GM which is being created under the 363 sale?

MR. MILLER: Your Honor, I think there has to be a foundation laid as to the assumptions.

THE COURT: Well, I think that it's debatable whether the assumption is there. And if he's an expert, if you create the assumptions and you want to get his assumption on some

alternate theory, you can, although, Mr. Richman, you're going to have to address whether that opinion would have any relevance if that financing weren't available. Objection overruled.

MR. RICHMAN: Thank you, Your Honor. And I'm just --

THE COURT: And that's on the premise that he's an expert. I'm assuming that you concede that he's an expert, Mr. Richman.

MR. RICHMAN: Absolutely, Your Honor. I do and I'm asking to assume that the financing is available for New GM under a plan.

A. Would you repeat the question?

Q. So assuming financing is available for New GM but created through a plan of reorganization rather than a 363 sale, would you expect the value of New GM to be comparable to the value in the fairness opinion?

A. I haven't done that analysis and that's, I think, the -- given the assumption, without the analysis, they would go behind -- beyond that opinion.

Q. Well, what analysis would you do differently than what is already in the fairness opinion?

A. Well, in the first instance would be the amount of time taken to achieve a plan of reorganization versus the transactions that's before the Court. And I don't -- I have -- I don't have a particular view on how long that might take but

I suspect it would be longer. And that has certain aspects of the business' performance, in my view, probably negative. And then there's a real question about whether the financing would be available and that -- that is assumption is a large one.

Q. Well, assume with me that the financing is available. And assume with me that a Chapter 11 plan is filed on the petition date on an accelerated schedule so that you're still within the same sixty to ninety days that GM told the public it hoped to emerge from bankruptcy. With those assumptions, would you expect New GM to have the same or comparable value that it has under the fairness opinion?

MR. MILLER: Your Honor, please, same objection. What is meant by "accelerated"?

MR. RICHMAN: I said within sixty to ninety days emergence.

THE COURT: Overruled. Mr. Repko, answer the question but as you see fit.

THE WITNESS: Yes, Your Honor.

A. Given the assumptions that you've made, it could be.

Q. Are you familiar with how the fairness opinion valued the collective bargaining agreement, UAW settlement?

A. Broadly.

Q. Does the fairness opinion include the value of the consideration being paid to the VEBA?

MR. MILLER: Your Honor, please, is this in the

nature of cross or is Mr. Richman calling Mr. Repko as his witness because this is way beyond Mr. Repko's declaration.

MR. RICHMAN: It is both adverse direct and cross, Your Honor. It's related directly to the fairness opinion and the valuations.

MR. MILLER: Mr. Repko was not proffered, Your Honor, as a valuation witness. He was proffered in connection with getting debtor-in-possession financing.

MR. RICHMAN: Actually, the exhibit list indicates that his -- I believe, if I read it correctly, that he was being proffered both for the 363 sale as well as the DIP financing.

MR. MILLER: In respect of financing and not as the valuation.

MR. RICHMAN: Well, so --

THE COURT: All right. I've had enough. If that's deemed to be an objection, it is overruled. The fact that this fellow wasn't on the point on the valuation is obviously irrelevant to whether I should consider it as undercutting the persuasiveness of any evidence or testimony that might be inconsistent with the valuation. But I can understand the difference. And I can understand how many of the questions are inconsistent -- use assumptions that are inconsistent with the record. The objection is overruled. Mr. Repko can answer the questions as he sees fit. And both sides can point out to me

why they think the testimony should be regarded as relevant more or less in light of the entirety of the record. Go ahead, Mr. Richman.

BY MR. RICHMAN:

Q. Mr. Repko, do you remember the question? No? Do you know whether the consideration being paid by New GM into the VEBA was part of the fairness opinion?

A. Without looking at it again and thinking about it, I don't really recall.

Q. Okay.

MR. RICHMAN: One second, Your Honor.

THE COURT: Sure.

MR. RICHMAN: Nothing further at this time.

THE COURT: Very well. Other objectors who wish to question Mr. Repko? All right. None? Any redirect, Mr. Miller?

MR. MILLER: No, Your Honor.

THE COURT: All right. Mr. Repko, you're excused --

THE WITNESS: Thank you, Your Honor.

THE COURT: -- from the court. Okay. Can we go right to the material on material on Wilson?

MR. SALZBERG: Yes, Your Honor.

THE COURT: Mr. Salzberg, come on up.

MR. SALZBERG: Your Honor, in connection with Mr. Wilson's testimony, it might be useful at this point to

introduce the four exhibits proffered by the government. That's Mr. Wilson's declaration and three what I'll refer to as the intercreditor agreements.

THE COURT: Okay. Is there any objection? Hearing none, the exhibits are in evidence.

(Government Exhibits 1-4, Declaration of Mr. Wilson and three intercreditor agreements, were hereby received into evidence as of this date.)

THE COURT: And --

MR. SALZBERG: If you'd like, I have a --

THE COURT: Yeah. That would be handy. Thank you. Mr. Wilson?

THE WITNESS: Yes.

THE COURT: Come up, please. Mr. Wilson, I've got to impose the same rules on you as I've imposed on everybody else in the courtroom. Leave the soda there and give him some water. Remain standing here. Karen?

(Witness duly sworn)

THE COURT: Have a seat, please, Mr. Wilson.

CROSS-EXAMINATION

BY MR. SALZBERG:

Q. Good morning, sir.

A. Good morning.

Q. For the record, Mark Salzberg, Patton Boggs, on behalf of the unofficial committee of family and dissident bondholders.

Since your declaration has now been entered into evidence, I'm going to dispense with the preliminary background information. But suffice it to say that you are a member of the auto task force?

A. Yes.

Q. And when did you join the auto task force?

A. In the first week of March 2009.

Q. And as a member of the auto task force, you have primary responsibility with regards to the U.S. Treasury's interactions with GM, is that correct?

A. Among other things, yes.

Q. Okay. And even though you joined the auto task force in mid-2009, or the first quarter of 2009, you're familiar with the activities of the auto task force prior to that time with regards to GM, is that right?

A. Some of them.

Q. Now, the Treasury entered into a loan and security agreement on December 31, 2008, is that correct?

A. Yes.

Q. And in your declaration -- and I'm referring to page 4, paragraph 10 -- you state in a parenthetical that many of the terms and covenants of that agreement were more lenient or favorable than "market terms".

MR. SCHWARTZ: Does Mr. Salzberg have a copy for the witness?

MR. SALZBERG: I'm sorry. I thought that you had presented that.

THE COURT: All right. Just give him a second to follow along in his declaration. One or another, provide him with a copy.

MR. SALZBERG: I apologize, Your Honor.

(Pause)

MR. KENNEDY: A copy is in the IUE exhibit book as Wilson 1. That's the large volume of --

MR. SALZBERG: Thank you. Yeah. Your Honor, if I may approach the witness?

THE COURT: Sure.

THE WITNESS: Thank you.

Q. And again, I'm referring to page 4, paragraph 10. Do you see the paragraph I referred to?

A. Yes.

Q. And what were the terms and covenants which were more lenient or favorable than market terms?

A. Well, as a general matter, I think the interest rate associated with the loan was probably below what a purely commercial lender would charge at that point in time given the financial distress evident at General Motors.

Q. Any other terms and conditions which were more favorable to market terms?

A. It's not clear to me that a lender wouldn't -- another

purely commercial lender would not have imposed restrictions on cash flows beyond what we imposed.

Q. Okay. How far below market rate was the interest rate under the LSA? And by LSA, that's the term that you use in your declaration to refer to loan and security agreement.

A. I've never performed any analysis on that front.

Q. Okay. Were there any other sources for financing for GM at that time? And by "that time", I'm referring to December 31, '08.

A. As you know --

MR. MILLER: Excuse me, Your Honor. Mr. Wilson was not at the Treasury in December of 2008.

THE COURT: I'm going to sustain but you can lay a foundation as to his knowledge. And then if a satisfactory foundation is laid, we can take it from there, Mr. Salzberg.

MR. SALZBERG: Thank you, Your Honor.

Q. You joined the auto task force in March of 2009, is that correct?

A. Yes.

Q. Okay. And even though you joined in March 2009, you became familiar with the activities of the auto task force that were done prior to that time, is that correct?

A. I believe, as I testified earlier, some of them.

Q. And in your -- did you review the activities of the auto task force that occurred prior to the time that you joined?

A. Some of them.

Q. Okay. And is one of the things that --

MR. MILLER: Objection Your Honor. Objection Your Honor. There was no auto task force in December 2008.

THE COURT: Wait. I couldn't hear you, Mr. Miller.

MR. MILLER: There was no automobile task force in 2008 or in the first three months of 2009.

MR. SALZBERG: Your Honor, I can clarify.

THE COURT: Okay. By the way, does anybody know what's causing that noise?

MR. SALZBERG: Is it me?

THE COURT: It's obviously something near some mic.

MR. SALZBERG: It might me. Sorry.

MR. MILLER: It could be two, Your Honor.

UNIDENTIFIED SPEAKER: It sounds like somebody on the phone --

MR. SALZBERG: Okay.

THE COURT: Go ahead, Mr. Salzberg.

MR. SALZBERG: I'll try not to breathe as much. Just every minute or two. Okay.

Q. In paragraph 1 of your declaration, you refer to the auto team, is that right?

A. Yes.

Q. Okay. And so I misspoke when I say auto task force. I'm referring to the auto team as you defined that in your

declaration, okay?

A. Okay.

Q. Okay. As part of your efforts to become familiar with the activities of the auto team that occurred prior to your joining, did you review the loan and security agreement?

A. Yes.

Q. Did you review the other sources of financing, if any, that were available to GM in December of 2008?

A. No, I did not.

Q. Okay. The total amount -- what was the total amount extended or loaned to GM pre-petition by the U.S. Treasury?

A. 19.4 billion dollars.

Q. And how much was extended -- of that loan, how much was extended in December of 2008?

A. I believe on December 31st, the first day of the LSA, it was 4.0 billion dollars.

Q. Now when this 4.0 billion dollars was lent to GM, do you know if GM had any other sources of financing?

A. I don't know.

Q. Was GM at that time solvent?

A. As I testified in my deposition, Mr. Salzberg, under the same question from you, I indicated at that point that we did not perform that analysis.

Q. Okay. Subsequent amounts were lent by the government to GM prior to the petition date, correct?

A. That's correct.
Q. And those amounts were lent in January, February, March, April and in May, is that correct?
A. January, February, April and May, I believe.
Q. Okay. So not in March. And do you know at any of those times when those monies were lent by the Treasury to GM, was GM solvent?
A. We did not perform a solvency analysis at that point in time. Our focus was primarily upon do we believe that the loan had a reasonable likelihood of being repaid 'cause I think most lenders would use that test.
Q. How did the government anticipate that this loan would be repaid?
A. Well, as you'll recall, the company was operating under a Viability Plan 2 at that point in time that was prior -- for much of that time not all of that time. And under the auspices of Viability Plan 2, we believed that the transaction that was proposed, which was the financing that we advanced combined with the equitization of two-thirds of the bonds and half the obligation of VEBA allowed for a reasonable probability of repayment.
Q. Just so I understand, was the repayment to the Treasury dependent upon a reorganization of GM's business?
A. No. It was dependent upon a restructuring of certain obligations as evidenced in the LSA.

Q. And the government's anticipated repayment was based upon a viability plan? I think you said Viability Plan 2, is that correct?

A. It was around a certain set of assumptions, at that point, best embodied in Viability Plan 2.

Q. Okay. And Viability 2 was not accepted by the government -- by the auto team, was it?

A. We believe that Viability Plan 2 did not provide a substantial enough restructuring of the operation of General Motors and rejected it as a result of that.

Q. Okay. Just to be clear, it was rejected by the government.

A. That's what I said. It was rejected because of that, yes.

Q. Okay. Would you say that as --

MR. SALZBERG: Well, strike that.

Q. Was the Treasury the lender of last resort for GM after December of 2008?

A. Most likely, that's yes. I mean, we encouraged General Motors on a number of occasions to try and identify private alternatives. We said a number of times we would prefer a private alternative to our involvement. And as a result of the fact, there did not seem to be any private alternatives either at that point or at this point, for that matter. I think it's reasonable to conclude we were effectively the lender of last resort.

Q. Would you say that as the lender of last resort, the United States government had leverage over General Motors?

A. I think that's fair to say.

Q. Would it be fair to say -- or to call that leverage extraordinary leverage?

A. I think that was a comment that was introduced in the question at my deposition but I don't think it's a word that I used. I think it would certainly be significant.

MR. SALZBERG: May I have a moment, Your Honor?

THE COURT: Of course.

MR. SALZBERG: Your Honor, may I approach the witness? I have a copy of the deposition transcript that was taken of Mr. Wilson.

THE COURT: Yes, you may.

MR. SALZBERG: Okay. And, Your Honor, I have a copy for you.

THE COURT: Thank you.

Q. Sir, if you could turn to page 155 and 156.

A. Who is the question in this case, Mr. Salzberg? Is it you?

Q. These were questions that I posed to you, Mr. Wilson.

A. Okay.

Q. And just for the record, this is a transcript of the deposition that was taken of you on Monday of this week. Do you recall that deposition?

A. Yes.

Q. And I would point you to page 155, line 13.

MR. SALZBERG: And, Your Honor, if I may read the question and answer.

Q. My question was: "You had said in response to prior questioning that the Treasury had leverage. I think you used the term 'extraordinary leverage' with regard to GM in the negotiations. Do you recall that testimony?" Your answer was: "Yes. I think that was in the context of my saying. There were no other lenders. We were the lenders of last resort in this instance."

"Q. You used the term 'extraordinary leverage', is that right?

"A. I think in a situation where a company needs cash and doesn't have any other access to cash, I think that's a reasonable way to characterize it."

MR. SCHWARTZ: Objection. If he wants --

THE COURT: Before you -- okay, wait. Before you answer, Mr. Wilson, wait for this to play out. Mr. Salzberg, you haven't asked a question yet. Mr. Schwartz has risen to object. Let's get the full question out and then I'll rule on it before there's an answer.

Q. I asked you before, sir, if the government's leverage was extraordinary and my recollection of your answer was not -- was no, you did not characterize it as extraordinary although in your deposition earlier this week, you did call it

extraordinary.

THE COURT: All right. Now I'll hear Mr. Schwartz. The implication is that he's given an inconsistent statement?

MR. SALZBERG: Yes, Your Honor.

THE COURT: All right. Mr. Schwartz?

MR. SCHWARTZ: If Mr. Salzberg is trying to impeach Mr. Wilson on the word "extraordinary", he should go to the part of the deposition where Mr. Wilson actually uses the word "extraordinary" if there is such a word. The passage that he just quoted began with his question: I think you used the word "extraordinary". And I heard Mr. Wilson testify in his answers today earlier that it was a word all along that Mr. Salzberg had introduced in his question.

THE COURT: All right.

THE WITNESS: I'd like to answer, Your Honor.

THE COURT: Beg your pardon?

THE WITNESS: Can I answer, Your Honor?

THE COURT: You certainly can if you and your counsel, which, I guess, is Mr. Schwartz here, want to waive his rights under Rule 32 and have Mr. Salzberg read more. Mr. Schwartz, are you happy with the witness just answering?

MR. SCHWARTZ: I'm always happy with the witness answering. But I do think I made my point here and he doesn't have to answer.

THE COURT: Okay. Look, folks, the reason that Rule

32 allows and requires more to be said is to protect the witnesses. It sounds to me like the witness is capable of answering himself. And under those circumstances, Mr. Schwartz, are you okay with withdrawing your objection or your requirement that there be a Rule 32 designation?

MR. SCHWARTZ: That's fine.

THE COURT: Okay. Go ahead, Mr. Wilson.

THE WITNESS: Thank you, Your Honor.

A. Mr. Salzberg, as you can see in the passage you read, I did not use the word extraordinary. You used the word extraordinary. I went back later to my deposition once it was filed to determine if I had used the word extraordinary and did not. You used the word extraordinary. I was agreeing to a general concept not to every single word you spoke. And I think it's a mischaracterization of my statement throughout the deposition as well as today to contend otherwise.

Q. Just so I'm clear, has your counsel filed an errata sheet to your deposition yet?

A. I don't know.

Q. Okay. All right.

THE COURT: Mr. Salzberg, as I took down the testimony and the notes, Mr. Wilson said in words or in substance it's fair to say that the government had leverage. You want to make an issue of the word "extraordinary" that you would put into that question?

MR. SALZBERG: No, Your Honor. I think we'll move on.

THE COURT: Okay.

MR. SALZBERG: Okay.

Q. Did the government have the ability to call the loans, to make the loans due and payable if a viability plan submitted by GM was deemed by the auto team to be insufficient?

A. I believe that's correct.

Q. And those loans would be due and payable within sixty days after that determination was made, is that correct?

A. Yes.

Q. At the time that the loans were extended by the government starting December 2008, was GM able to pay its debts as they became due as a result of the loans?

A. Yes.

Q. But not before the loans had been extended, is that correct?

A. That is what necessitated the loans.

Q. Now, with the leverage that the Treasury had, the Treasury was able to exert influence over GM, is that correct?

A. Well, we certainly engaged in an active dialogue with the company around the terms of their operating restructuring. But we never once said to the company we intend to call the loans.

Q. All right.

THE COURT: Mr. Salzberg, before you go on --

MR. SALZBERG: I'm sorry.

THE COURT: -- and I know I'm going to sound inconsistent here, and, Mr. Wilson, you're allowed to breathe and we may hear your breathing. But I am going to ask that you keep the microphone closer to you.

THE WITNESS: Closer to me?

THE COURT: Yes, please.

THE WITNESS: Okay.

THE COURT: Go ahead, Mr. Salzberg.

MR. SALZBERG: Okay. Thank you, Your Honor.

Q. The CEO presently of GM is Mr. Henderson, correct?

A. Yes.

Q. And his predecessor was Mr. Wagoner, is that correct?

A. Yes.

Q. And the auto team informed Mr. Wagoner in March of 2009 that the auto team did not have confidence in his leadership, is that correct?

A. Yes.

Q. And shortly thereafter --

MR. SALZBERG: Well, strike that.

Q. That was conveyed to Mr. Wagoner by, I believe, Mr. Rattner --

A. That's correct.

Q. -- who was the head of the auto team, is that right?

A. That's correct.

Q. Okay. And shortly after Mr. Rattner informed Mr. Wagoner of the lack of confidence, Mr. Wagoner resigned as CEO, is that right?

A. That's correct.

Q. The Treasury required that the assets that are the subject of the sale motion today require that those assets be sold through a 363 process as opposed to being disposed of through a plan of reorganization, is that correct?

A. Yes.

MR. SALZBERG: Your Honor, if I may, yesterday we introduced for limited purposes Bondholder Exhibit number 2. And I'd like to show the witness Bondholder Exhibit number 2 but I don't have the original.

THE COURT: You can certainly show it to the witness.

MR. SALZBERG: Do you have the original?

THE COURT: Do I have the original?

MR. SALZBERG: No, no. I was talking to the clerk. I'm sorry.

THE COURT: I don't know if the clerk does. I think that as people were marking exhibits, they kind of gave me working copies. And I don't know if they were official copies or not.

MR. SALZBERG: Your Honor, may I approach the witness?

THE COURT: Yes, you may. Give me a second to get my

copies. Mr. Salzberg, it says on the front "Use of Section 363 to Expedite Restructuring of Distressed OEMs"?

MR. SALZBERG: Yes, Your Honor.

THE COURT: Okay. I'm with you. Go ahead.

MR. SALZBERG: Okay. And for the record, this is Bondholder Exhibit number 2 which bears Bates stamps GMPR92336 through 92360.

Q. You see the first page of Bondholder Exhibit 2 referenced to Cadwalader Wickersham & Taft?

A. Yes.

Q. And they were the government's outside counsel in this transaction, is that correct?

A. They were the counsel to the U.S. Treasury, yes.

Q. Okay. Do you recognize Bondholder Exhibit number 2?

A. I know we went through this several times in the course of my deposition on Monday.

Q. I'm asking you if you recognize this document.

A. Yes.

Q. Okay. Did you see this document as part of your responsibilities as a member of the auto team?

A. I, at this time, no longer recall what I saw prior to Monday on this document. I'm sure at my deposition I explained to you whether I had seen it prior to Monday or not. I just can't recall at this point after having gone through it several times.

Q. Do you have any reason to doubt -- well, do you remember if this document was provided to you by the Treasury's outside counsel?

A. I'm not sure what you're asking, sir. And I'm answering the same way. I believe that I saw this several times on Monday. At the beginning of my deposition on Monday, I testified as to whether or not I had seen it before. At this point, I can no longer recall 'cause I went through it so many times on Monday.

Q. Okay. All right. If I can ask you to turn to page 3 of this document? Before I point you to specific parts of page 3, did Cadwalader provide advice to the U.S. Treasury regarding potential processes for accomplishing the disposition of the assets being sold under the sale motion?

A. Yes.

Q. Okay. So, in other words -- that was kind of a convoluted question. Your counsel told you of the different ways in which the assets can be disposed of.

A. That's correct.

Q. Okay. And one of the ways that was highlighted by your counsel was under Section 363 of the Bankruptcy Code.

A. That's correct.

Q. And the other way was through a plan of reorganization, is that right?

A. There were other alternatives. The plan was one of them.

Q. Okay. So two of the alternatives that were discussed are referenced on this page 3. Do you see that?

Q. And would it be fair to say that your counsel identified strategic benefits of a 363 sale as compared to a plan?

A. I think this page, sir, describes the tradeoff associated with either of the 363 sale or the plan.

Q. Without reference to page 3 of the document, I'm just asking did your attorneys advise you of the strategic benefits available under Section 363 as opposed to under a plan confirmation process.

MR. SCHWARTZ: Objection. I think we're getting dangerously close to privileged information.

THE COURT: All right. Well, the substance of privileged advice is privileged. The subject matter of privileged advice -- or of legal advice is not privileged. You can ask subject matter, Mr. Salzberg, but not substance. Or, of course, if you lay a foundation that somebody was present in a nonprivileged communication or in a communication that might have otherwise been privileged. And if the privilege was broken, you can do that.

MR. SALZBERG: Your Honor, I'll restrict my questions right now to the actual document that's in front of the witness which, I believe, would take care of the privilege issues.

THE COURT: Thank you.

Q. If you look at page 3 under the Section 363 column, there

are a number of bullet points. Do you see that?

A. Yes.

Q. And is it fair to say that your attorneys, in this document, advised you that one of the benefits, strategic benefits, of a 363 sale is that the consent of creditors and shareholders were not required?

A. That is what this bullet point says, yes.

Q. Okay. Fair to say that your counsel advised you that one of the strategic benefits available under Section 363 is that the standards are lower than under a plan confirmation process.

MR. SCHWARTZ: Objection. Same objection. What his counsel advised him is not appropriate.

THE COURT: If you're going beyond what the document says, as I sense you are, Mr. Salzberg, the objection is sustained.

MR. SCHWARTZ: We also don't have on this record that Mr. Wilson has seen this document and been through this document with anyone.

MR. SALZBERG: I believe, Your Honor, what the --

THE COURT: Well, what we have on the record is that he saw it on Monday and he doesn't remember whether or not he saw it before.

MR. SCHWARTZ: Right.

THE COURT: I will not permit him to construe the document upon the state of the record. If you think something

useful is to be served by reading him a section of the document as a predicate for a further question, I'll permit that, namely, to get whatever you ask him in the question.

MR. SALZBERG: Okay.

Q. Do you recall --

MR. SALZBERG: Well, strike that.

Q. I'll point you to the fourth bullet point on page 3 under the left-hand column. Would it be fair to say that you -- a strategic benefit under Section 363 was that dissenting parties had significantly less ability to hold up a sale than under a plan.

MR. MILLER: Objection, Your Honor. Is he asking for Mr. Wilson's conclusion or is that this exhibit says that? Mr. Wilson is not an attorney and that is calling for a legal conclusion.

THE COURT: I'm going to sustain that objection and I'll hear the next question. What you've got to do, Mr. Salzberg, is find out whether he formed either an independent view that that statement was true or that he got that advice in some means out of a privileged communication. I don't know whether that's so or not but those are the areas where you can appropriately inquire. But I won't ask him to construe a document that he was neither the author of nor if he remembers whether he saw it before his deposition was taken. And those are the general parameters. I'll rule on specific objections

if and when they're made.

Q. Prior to the petition date, did you, as a member of the auto team, form an opinion as to whether Section 363 provided a strategic benefit as opposed to a plan confirmation process?

A. Yes.

Q. What was the strategic benefit that you determined was available?

A. I believe there were a number of benefits to the 363 process three of which we discussed on Monday which were speed, certainty and ability to be behind liabilities, did not have a commercial necessity for the new enterprise.

Q. Was one of the benefits that you determined to exist --

MR. SALZBERG: Strike that.

Q. What about bargain -- the need to bargain with debt holders? Was that a benefit that you determined would be gained by the 363 process?

A. I think it depends on the context of your question, sir. As evidenced by the process, we did bargain with parties in interest. We bargained actively with the representatives of the bondholders who consented to this transaction as structured. So I don't think either the evidence or the history suggest that we would not have to talk to individuals.

Q. You're breathing into that microphone again.

A. Sorry. I can't do both. I can't speak louder and not breathe. Sorry.

THE COURT: On balance, I'd rather hear your testimony than do without your breathing. If you think it's possible for you to come up with the answer and then back off.

THE WITNESS: I'll do my best, sir.

THE COURT: I think maybe the best way will be something upon which everybody in the room would have a consensus. But do the best you can and everybody's going to understand.

THE WITNESS: Yes, sir.

Q. Was document Bondholder Exhibit number 2 -- was this produced to you by your attorneys in the ordinary course of the auto team's business?

MR. SCHWARTZ: Objection. Foundation.

THE COURT: I'm going to overrule that. If they gave it to you and you can remember it, you can answer. If you don't remember, you can say so or if your answer is no, you can say so. That doesn't go to either foundation or legal inference. Did you get it or not? That's what I understand the question as.

MR. SALZBERG: That's fair.

A. I think I testified earlier today that I don't recall whether I saw this prior to Monday.

MR. SALZBERG: Excuse me one second, Your Honor.

Q. When was the decision made by the U.S. Treasury that a 363 sale process would be employed?

A. There was a constant dialogue in thinking through our options. As you know, the bond exchange was pending up until the last week of May. And we began to narrow our options over the course of April and May as we approached the June 1 bond maturity.

Q. Okay. So when was the ultimate decision made to employ 363 as opposed to a plan?

A. I think sometime in the month of May we included that if the bond exchange was unsuccessful. And GM was not able to restructure in an out of court basis as had been their preference. The 363 was the only viable path forward for the company.

Q. And who made that decision on behalf of the U.S. Treasury?

A. That was a product of discussions amongst a group of us.

Q. By "us", you're including yourself, Mr. Rattner and outside counsel among others?

A. Among others, that's correct.

Q. Okay. And as you sit here today, can you tell me specifically why, in your mind, 363 provided a strategic benefit as opposed to the plan process?

A. Well, I think the answer, sir, is much broader than the question. Just what provided a strategic benefit? There are a whole host of considerations that went into our calculus.

Q. Okay. What were the whole host of considerations?

A. The fundamental question, sir, was can General Motors

survive anything approaching a traditional Chapter 11 process. We talked to dozens of experts, industry consultants, people who had observed General Motors for decades, obviously the management team and a number of folks who are well-versed in the bankruptcy process. And we could not find any reasonable measure of -- in fact, I can't recall anyone off the top of my head who felt that General Motors could survive a traditional Chapter 11 process. One of the leading commentators on GM who wrote the most recent book on General Motors, wrote it as recently as May 26th, that we were making a tragic mistake in pursuing the filing of General Motors. And so, it became clear to us that a traditional Chapter 11 process would be so injurious to this company as to not allow for its viability going forward.

Q. What do you mean by a traditional bankruptcy process?

A. The Chapter 11 process.

Q. You talking about actually filing a bankruptcy case and then proposing a plan and providing a disclosure statement?

A. That would be -- those would be the elements of it, yes.

Q. Okay. The time frame, in your opinion -- the auto team's mind --

MR. SALZBERG: Well, strike that. Let me rephrase that.

Q. When the auto team was considering the traditional bankruptcy process, what was the time frame that the auto team

was thinking of in terms of how long the bankruptcy would take?
A. We thought that the earliest it could be when you run through the various notice periods, it could be three months, an extraordinarily quick process and that if any roadblocks developed in the process or if the process spun out of control, as many bankruptcies have, it could take many years.
Q. Okay. So you were thinking that the best case scenario was ninety days, is that right?
A. I think that was a reasonable best estimate of what the plan process would take.
Q. Okay. The government is providing DIP financing in this case?
A. That's correct.
Q. Approximately, combined with the Canadian contribution, of thirty-three billion dollars, is that right?
A. 33.3 billion, yes.
Q. 33.3. And the DIP fund --
A. Yeah. Back up.
Q. The DIP funding period goes through when?
A. I know that the sale order expires on July 10 -- or, sorry, our funding expires and comes due on July 10th if the sale order is not approved.
Q. Well, under the DIP budget that's been approved by the Court last week, is it not true that it's a nine-week DIP funding budget?

A. I think that's correct. I think that the last draw is scheduled to be sometime in July.

Q. I have a copy of the DIP order with me and it provides an Annex 1 to the budget, DIP financing, week ending August 2nd. Does that -- I would ask the Court to take judicial notice of the DIP order. But does that sound reasonable to you?

A. That sounds approximately right.

Q. Okay. All right. So ninety days out from a June 1 filing would bring you to August 31, is that right?

A. I think it's technically August 29th or something, but yes.

Q. Okay. All right. So it's a few weeks beyond the end of the DIP funding period as approved by this final DIP order, is that right?

A. Yes. If everything went perfectly smoothly and ninety days was achieved, that is twenty-eight days beyond August 2nd.

Q. All right. Now you mentioned the July 10th deadline. What is that deadline?

A. That is, I believe, the deadline for the approval of the sale motion.

Q. And what happens if that deadline is not met?

A. Then our DIP would terminate.

Q. Is it your testimony that if the sale order is not entered by July 10th that on July 11th the DIP funding will terminate?

A. As I testified several times when you asked me that

question, sir, we have no intention to further fund this company if the sale motion is entered by July 10th.

Q. Okay. I understand that we had a deposition a few days ago but we need to talk about the testimony today. Is it the government's position that if the sale order is not entered on July 10th that on July 11th the government will terminate the DIP funding.

A. That's been our position, yes.

Q. Has that position been conveyed to General Motors?

A. I believe General Motors is well aware of our timeline and our expectations that this process needs to be expeditious.

Q. So if there were public pronouncements by General Motors representatives that it is unlikely that the government would cease funding if the sale order was not entered on July 10th, those public pronouncements would be incorrect?

MR. SCHWARTZ: Objection. If there are such public pronouncements, we should see them.

THE COURT: I'll overrule that. You can answer it as you see fit.

A. Sir, I'm not aware of any announcements that say that the government is expected to fund for sixty to ninety days. I'm aware of announcements that I believe that Mr. Henderson made in one instance that I'm aware of that he expected the process to extend sixty to ninety days but that was to accommodate perceived antitrust filings.

Q. No. I understand, sir. But my question is that if public pronouncements were made by General Motors that it is unlikely that the government would cease funding on July 11th if the sale order is not entered on July 10th, would those public pronouncements be incorrect.

MR. MILLER: Is that a hypothetical question, Your Honor? I object. Is there such a statement?

THE COURT: I'm going to sustain that objection. If there is a particular statement that you want to point him to, you can premise it on that. This fellow, unlike Repko, for whom I authorized the hypothetical, is not an expert. That's a distinction that is meaningful and that as a matter of evidentiary law, I believe he's not here to testify as an expert unless I'm missing something.

MR. SALZBERG: Your Honor, just by way of explanation, on the way over, there were reports that I read on my BlackBerry, news reports, where those public pronouncements were made. If I may reserve my right, we're getting copies of those articles as we speak.

THE COURT: Well, certainly, if you want to withdraw the pending question and let me rule on that later, that's, of course, acceptable.

MR. SALZBERG: Yes, Your Honor. If we would have the right to recall Mr. Wilson for that --

THE COURT: Oh. You're talking about bringing him

back again?

MR. SALZBERG: Well, I would that --

THE COURT: Let's see where we are when this examination is completed.

MR. SALZBERG: Okay. We're waiting for those articles, Your Honor.

BY MR. SALZBERG:

Q. I would ask you to turn to page -- I'm sorry -- page 6 of your declaration, paragraph 13. I'm going to ask you about the end of that paragraph but please read the entire paragraph or as much before and after as you need to. Okay. Do you see that?

A. Yes.

Q. Okay. You state in your declaration that it's the Treasury's belief that only a rapid and certain emergence from bankruptcy can provide consumers with confidence, if necessary, to make a major purchase like an automobile. What was the Treasury's definition of the word "rapid"?

A. We were trying to do it in thirty, forty days, sir.

Q. Sorry?

A. We were trying to do it in thirty to forty days.

Q. You heard testimony -- were you in court yesterday?

A. Yes.

Q. Okay. And you heard testimony from Mr. Henderson regarding pronouncements that GM would exit bankruptcy within

sixty to ninety days?
A. That is what he said publicly, yes.
Q. Okay. So is the sixty to ninety day emergence from bankruptcy at odds with the Treasury's belief as to what is needed for a rapid emergence?
A. You asked me the question of what we thought would be a rapid emergence and what we expected. And I testified that it was thirty to forty days.
Q. And I'm asking you the follow-up question whether or not that differs from GM's pronouncement that it would likely exit bankruptcy between sixty to ninety days.
A. I can't speak to Mr. Henderson's thinking, sir. I can only suspect that he was trying to build some cushion in the minds of the consumer which, obviously, is of paramount concern.
Q. Okay. In the next sentence, you use the word "languish", that "The Treasury cannot make an open-ended commitment to GM. The Treasury will continue to fund GM's operations if GM's critical assets languish in the bankruptcy process." What did you mean by that?
A. I think "languish" means if they are residing in the bankruptcy process for longer than is absolutely necessary.
Q. Okay. Was there a time period that the government had in mind as to what would constitute languishing in the bankruptcy process?

A. Beyond thirty to forty days.
Q. Okay. All right. Would it be fair to say that the Treasury made a strategic decision that 363 allowed the sale of good assets with providing a minimal opportunity for objections?
A. No. I think I testified earlier that certainty and speed were two primary considerations. But it wasn't without taking note of considerations of the process. Obviously, if we believed that there wasn't any impediment to a quick process, we wouldn't have provided any consideration for OldCo, as an example, which, as you know, the consideration is substantially in excess of that which -- that would be taking OldCo through a liquidation process.
Q. Okay. If you can turn back to Bondholder Exhibit 2 -- I apologize for moving you back and forth between exhibits but again, page 3 on Bondholder Exhibit 2. And under the Section 363 column, the fourth bullet point, did you come to a conclusion prior to the filing of the bankruptcy that 363 would provide significantly less ability of dissenting parties to hold up the approval process?
A. I think that it's clear that in a 363, you don't have the traditional voting requirements of a plan which is what allows for the speed of a 363 process. So that was -- at least as I understood that bullet and as we applied it to our own thinking, how we thought about it.

Q. But it was the Treasury's thought that 363 -- the 363 process would provide less of an opportunity for objections to the actual sale of the assets, is that right?

A. Sir, I think we've had -- you know, we spoke with every party in interest who approached us before June 1st. We took dozens of meetings of various constituencies ranging from dealers to splinter unions to a whole host of different inter parties in interest. We heard all their concerns and we spoke with them throughout the process. And as part of this process, I think all those parties in interest had the opportunity to object which is obviously part of the process we're engaged in right now.

Q. Right. But, respectfully, sir, I don't think you answered my question. My question is was it the Treasury's position that this 363 process that we're involved in right now would provide less of an opportunity to object than a standard plan confirmation process.

A. We believe the ability -- the time associated with it is less. But on the core issues of valuation, for example, it is my understanding, although I'm not an attorney, that the ability to pursue questions of valuation are as meaningful in the context of a 363 sale for the assets involved as they would be in a plan of reorganization.

Q. And would I be correct in stating that the U.S. Treasury saw a strategic benefit in using the 363 process because the

standards for the sale are lower than as in the plan confirmation process?

MR. SCHWARTZ: Objection. Asked and answered.

THE COURT: Sustained.

MR. SALZBERG: Respectfully -- sorry.

Q. We talked about ceasing funding of the DIP on July 11th if the sale order is not entered. Do you recall that?

A. Yes.

Q. Okay. On July 11th, what will the total amount of pre and post-petition lending be by the government?

A. I'm not certain what it will be on July 11th. I know as of roughly today, it's approximately ten or eleven billion dollars post-petition. And 19.4 billion pre-petition.

Q. I'm sorry. You said --

THE COURT: Could you repeat those numbers, please, Mr. Wilson?

THE WITNESS: Yes, sir. That as of, I believe, today, or plus or minus twenty-four hours, that the amount of post-petition financing is in the range of ten to eleven billion dollars. Not all of that is from the U.S. Treasury. Some of that is from our various Canadian partners. And that the U.S. pre-petition financing was 19.4 billion dollars.

Q. Out of the ten to eleven billion dollars post-petition financing, how much is that from the Canadian government?

A. I'm not sure off the top of my head, sir.

Q. Is it more than twenty-five percent of that amount?
A. If I had to guess, which is what you're asking me to do, I would say it's between fifteen to twenty percent.
Q. Okay. So assuming twenty percent, we're talking about post-petition financing from the U.S. Treasury of approximately eight billion dollars, is that a fair estimate?
A. I think in that zip code, yes.
Q. Okay. So that would render the entire financing or the entire loan amount both pre and post as of now around twenty-seven billion dollars from the U.S. government, correct?
A. Assuming eight billion of post-petition, yes.
Q. Okay. If the DIP terminated on July 11th and assuming, again, that we're talking about the same amount outstanding that we just discussed, around twenty-seven billion dollars, what is the U.S. Treasury's anticip -- what is the result that the Treasury anticipates? What would happen?
A. What would happen in what regard, sir?
Q. Let me rephrase that. That was a horrible question. The U.S. Treasury ceases its DIP funding on July 11th. What does the Treasury anticipate would happen in this case?
A. In this bankruptcy case or in the case of General Motors or in what?
Q. In this bankruptcy case.
A. I think it would be up to Judge Gerber to decide what would happen in this bankruptcy case.

Q. Okay. If the case liquidates, if the company liquidates on July 11th, what is the U.S. Treasury's expected recovery on its approximate twenty-seven billion dollars of lending?

A. We have not performed a separate liquidation analysis. But I don't have any reason to doubt the analysis performed by Mr. Koch described yesterday.

Q. Okay. And based upon Mr. Koch's liquidation analysis, what do you believe would be the U.S. Treasury's recovery on it twenty-seven billion dollars of lending?

MR. SCHWARTZ: Objection. I just want to clarify that Mr. Wilson testified that he doesn't know what the amount of lending will be as of July 10th or 11th. The twenty-six billion dollars was as of today.

THE COURT: I'm going to sustain that. When it gets to be argument time, Mr. Salzberg, you can pull out that liquidation analysis that Mr. Koch prepared and remind me of the figure and to remind me that Mr. Wilson said that he had no reason to doubt what Koch said. But I don't think this should be a memory test of whether Mr. Wilson remembers what Mr. Koch said.

MR. SALZBERG: Okay. Thank you, Your Honor.

Q. The unsecured claim in this case, do you know the total approximate amount, what's projected at this time?

A. I do not know the projected amount.

Q. Is it true that the unsecured claim class is primarily

consisting of the bondholders' claims?

A. Under the terms of this transaction, that's correct.

Q. Okay. And what will the bondholders' recovery be from this bankruptcy as a percent of the dollar amount of their claim?

A. I think it depends, sir, on the equity performance of NewCo since the primary asset of OldCo will be the equity and warrants of NewCo.

Q. Okay. Now, there is a UAW retiree settlement that is part of the sale motion, correct?

A. That's correct.

Q. And the debtor has scheduled the UAW retiree claim and one of the largest unsecured claims in this case, is that correct?

A. I believe so.

Q. Okay. So the bondholders' claims are of the same priority level as the retirees' claims, is that correct?

MR. SCHWARTZ: Objection. It calls for a legal conclusion.

MR. SALZBERG: I'll withdraw, Your Honor.

Q. What will the retirees' recovery be from this bankruptcy?

A. Can you be specific? Which retiree, sir?

Q. UAW retirees.

A. As I believe we've discussed, we do not think about it in the terms of a recovery in the sense that we negotiated a commercial transaction to acquire the assets that will

constitute NewCo. As part of that commercial transaction, we needed a skilled workforce to build cars since that would be the primary business of NewCo. And as part of that negotiation with the UAW as the only representative of that skilled workforce, we structured a transaction as evidenced in the sale motion filed on June 1st.

Q. Okay. There is reference in the sale motion that the --

MR. SALZBERG: Well, let me rephrase that.

Q. The collective bargaining agreement between Old GM and the UAW was amended just recently, is that correct?

A. Yes.

Q. And the amended CBA was ratified by the union members sometime in late May of 2009, is that correct?

A. Yes.

Q. And that amended CBA is now in force and effect, is that right?

A. I do not know. I do not know if it's conditioned upon the sale motion or not.

Q. Okay. Do you know of any provision in the amended collective bargaining agreement with the UAW that makes its enforcement or enforceability contingent upon the approval of the UAW retiree settlement agreement?

A. I don't know.

Q. Okay.

MR. SALZBERG: Your Honor, if I may approach and show

the witness what is marked as Bondholders' Exhibit 3. And for the record, this is my copy but there are no notations on the relevant page.

THE COURT: Okay.

MR. MILLER: Can I have a copy?

MR. SALZBERG: It was introduced yesterday, Bondholder Exhibit 3. It's the May 18th UAW -- page 12.

MR. MILLER: What page?

MR. SALZBERG: 12.

Q. First of all, do you recognize this document?

A. Yes, I do.

Q. Okay. And what is this document?

A. This is a document we also discussed on Monday that has -- I believe it was produced by GM in the context of the negotiations with the UAW.

Q. Was it produced to the Treasury during the run-up to the bankruptcy?

A. I don't know if this whole document was. I certainly recall this page.

Q. I'm sorry.

A. I don't know if this whole document was. I certainly recall this page.

Q. You saw that page prior to the bankruptcy?

A. I believe so.

Q. Okay. And that's page 12.

A. That's correct.
Q. Okay. And we were talking a minute ago regarding recovery of the retirees from the bankruptcy process. Do you recall that?
A. Yes.
Q. Okay. And that document, page 12, shows line item recoveries of certain interest holders in the debtor, is that correct?
A. It appears to, yes.
Q. Okay. And one of the line items, I believe the second line item, refers to the retirees, is that correct?
A. Refers to the new VEBA.
Q. The new VEBA which is a trust fund to pay the medical benefits of the UAW retirees, correct?
A. That's correct.
Q. Okay. And the last column, if you go to the right side, has a recovery. It's entitled "Recovery", correct?
A. It's entitled "Percent Recovery", yes.
Q. Okay. And that actual percentage recovery was calculated based upon an earlier proposal to the new VEBA, is that correct?
A. I believe so, yes.
Q. And I believe, at that point, it was approximately a fifteen percent share in the common stock of New GM, correct?
A. Among other things, yes.

Q. Yes. And I'm talking simply about the common stock. And that later, the deal that was agreed to by the new VEBA that's included within the UAW retirees' settlement agreement is actually more advantageous to the new VEBA than the agreement that's reflected on page 12, correct?

A. As is the bondholder deal. We were unsuccessful in achieving the transaction we hoped to achieve.

Q. I'm asking specifically, sir, for the new VEBA line item. The deal that's in the settlement agreement that's at issue now is more advantageous to the new VEBA than the deal that's reflected on page 12, correct?

A. They succeeded in having a higher percentage of the equity, yes.

Q. I'm just looking for a yes or no.

A. I don't know what you mean by more advantageous, sir. Higher --

Q. Better?

A. It's a higher percentage, sir.

THE COURT: There are lots of questions he asks which are incapable of being answered yes or no. But I think the last one is capable of being answered yes or no.

A. Yes.

Q. Okay. And that document that was in front of you was prepared by whom?

A. I believe it was prepared by GM.

Q. Okay. And so GM, at least, was calculating recovery to the new VEBA, correct?

A. In this page, yes.

MR. SALZBERG: May I have a moment, Your Honor?

THE COURT: Yes.

MR. SALZBERG: Your Honor, simply subject to my request to ask Mr. Wilson some additional questions once we get the news report in, I have no further questions.

THE COURT: All right. Who's next?

MR. BRESSLER: Your Honor, by agreement with the committee and the unions, we'll examine next and Mr. Barkasy would conduct it.

THE COURT: Sure. Come on up, please.

MR. BARKASY: Thank you, Your Honor.

THE COURT: Mr. Bressler, I didn't get your colleague's name so that when he comes up to the microphone, I'm going to ask him to repeat it.

MR. BARKASY: Your Honor, Richard Barkasy from Schnader Harrison Segal & Lewis representing the ad hoc committee of consumer victims of General Motors.

THE COURT: Okay. Go ahead, Mr. Barkasy.

CROSS-EXAMINATION

BY MR. BARKASY:

Q. Mr. Wilson, GM made significant efforts to restructure out of court, is that correct?

A. Yes.
Q. And it was Treasury's preference that GM restructure out of court, correct?
A. If it could be done so under the proper terms and establish a viable GM, yes.
Q. In an effort to restructure out of court, GM extended a bond exchange offer on or about April 27, 2009, correct?
A. Yes.
Q. The bond exchange offer was conditioned on, among other things, the conversion to equity of at least fifty percent of GM's U.S. Treasury debt as of June 1, 2009, correct?
A. The way it was structured, sir, was that that was what General Motors had indicated in the exchange offer but it also indicated that the Treasury not commit to that at this point.
Q. But that was what was included in the exchange officer (sic) of the conversion of at least fifty percent of GM's U.S. Treasury debt to equity?
A. Yes, I believe so.
Q. All right. And it was contemplated by Treasury that there would be an exchange of Treasury debt to equity in some amount, in some form, under the bond exchange offer, correct?
A. There had been discussions of it but at that point we had not concluded that we were willing to do that --
Q. All right.
A. -- which is why it was structured the way it was.

Q. If GM's efforts to restructure out of court had been successful, it would not have avoided liability for any products liability claims, correct?

MR. SCHWARTZ: Objection. Calls for a legal conclusion.

THE COURT: Sustained but if you want to get his businessman's understanding, which trumps by any conclusions that a lawyer might draw or that I might make, if you want to amend your question that way, I'll permit it.

Q. Mr. Wilson, it is your understanding that if GM's efforts to restructure out of court had been successful, it would not have avoided liability for any products liability claims, correct?

A. I believe that's correct, sir.

Q. Leading up to the bankruptcy filing, Treasury had discussion with a number of stakeholders, including unsecured bondholders, is that correct?

A. Yes.

Q. And as we saw from Exhibit Bondholder 3 that you testified about a few minutes ago, those discussions had an impact on the structure of the sale transaction that was ultimately proposed, correct?

A. Yes.

Q. Products liability claims were identified by GM to Treasury as being potentially politically sensitive, is that

correct?
A. If I could provide some context, sir. We had a planning meeting on May 1st with the June 1 bond maturity staring at us and developed a host of work streams. In the context of that I asked the General Motors team to develop a list of viabilities that we considered politically sensitive that we would consider in the context of a 363 sale. And I explicitly asked them to use an expansive use of that term.
Q. Products liability claims, given an expansive use of the term, were identified by GM to the treasury as being potentially politically sensitive, correct?
A. Yes.
Q. Treasury did not have any discussions before the bankruptcy with any tort claimants or groups representing products liability claimants, did it?
A. To the best of my knowledge, sir, we were never approached by any groups representing them. We took, literally, dozens if not over 100 meetings from various parties-in-interest. And our general approach we said publicly and talked amongst ourselves was to take basically any meeting. So I don't recall and I'm not aware of any approaches that were received, nor of any meetings that took place.
Q. Did you follow the Chrysler bankruptcy?
A. Yes, I did.
Q. And did you -- were you aware that there were groups

representing tort claimants who objected to the sale transaction in Chrysler?

A. I was not aware of that.

Q. Did you review any of the Supreme Court filings made by groups representing tort claimants?

A. I did not.

Q. Are you aware of any groups representing tort claimants contacted GM and requested to have discussions regarding a restructuring before the bankruptcy was filed?

A. I am not aware of any such contacts.

Q. Did Treasury do anything to determine who tort claimants might be?

A. No, we did not.

Q. Did Treasury review any pleadings, or other documents reflecting the larger tort claims that were pending against GM while the negotiation of the sale transaction were ongoing?

A. Not that I'm aware of.

Q. The principal negotiators for GM -- let me ask one more question. Did Treasury ask GM to identify for it any groups that might represent tort claimants so that it could engage in discussions with tort claimants?

A. No.

(Pause)

MR. BARKASY: May I approach, Your Honor, with a binder of documents?

THE COURT: Yes, you may.

MR. BARKASY: Thank you.

Q. Mr. Wilson, this is a binder of ad hoc committee of consumer victims of General Motors exhibits. Some of them have already been utilized in the hearing. If you could turn to Exhibit number 1, marked Exhibit AHCCV-01 on the bottom right-hand corner, under tab 1. Did GM --

MR. BARKASY: And this is a letter from my partner, Barry Bressler, to Mr. Miller dated April 7, 2009.

Q. Did GM make Treasury aware of Mr. Bressler's letter?

A. Not that I'm aware of.

Q. Did GM make Treasury aware of the existence of the Committee of Consumer Victims of General Motors?

A. Not that I'm aware of.

Q. Please turn to Exhibit 2 in the binder, tab 2, marked AHCCV-02 in the bottom right-hand corner.

MR. BARKASY: This is an April 9, 2009 letter from Mr. Miller to Mr. Bressler.

Q. Did GM make Treasury aware of Mr. Miller's response to Mr. Bressler's letter regarding the Committee of Consumer Victims of General Motors?

A. Not that I'm aware of.

Q. Mr. Wilson, the principal negotiators for GM -- let me start again. Who were the principal negotiators for Old GM?

A. In our conversation of Old as part of the transaction, the

principal negotiators was Mr. Henderson; Ray Young, the chief financial officer; Walter Borst, the corporate treasurer; and Mr. Bob Osborne, general counsel; as well as their advisors.

Q. And who were the principal negotiators for New GM?

A. As the purchaser it was representatives of the Treasury Department and their advisors, including myself.

Q. At the time of the negotiations you anticipated that Mr. Henderson, Mr. Young, and Mr. Borst would in all likelihood be joining New GM, correct?

A. That is correct.

Q. Mr. Henderson would be the CEO of New GM if the sale transaction is approved, correct?

A. That is correct.

Q. Mr. Wilson, do you still have in front of you Exhibit Bondholder 3, which is the last document Mr. Salzberg -- I think you have your hand on it right there.

A. Is this it?

Q. Yes, the May 18 --

(Pause)

Q. Please turn to page 12, this is what Mr. Salzberg was questioning you about. Did Treasury perform a recovery analysis similar to the recovery analysis contained on page 12 of this GM document?

MR. SCHWARTZ: Objection, asked and answered.

THE COURT: If that was asked and answered, I don't

recall it.

MR. SCHWARTZ: Mr. Wilson testified that Treasury had never conceived of anything in terms of recoveries to stakeholders and had to prepare its own -- hadn't thought of things that way. In addition, if we get into the sort of materials that Treasury prepared for its own internal deliberations we run up against a governmental privilege regarding internal government deliberative processes.

THE COURT: Well, that would be for the next question that was asked by Mr. Schwartz.

MR. SCHWARTZ: Correct.

THE COURT: I'm going to overrule the objection. I'm trying pretty hard to pay attention, and my inability to remember that question and answer is going to be the basis for my ruling.

A. Could you repeat the question?

Q. Sure. Did Treasury perform a recovery analysis similar to the recovery analysis contained on page 12 of Exhibit Bondholder 3?

A. Not similar to this. As we testified earlier, in the context of the VEBA, it was really a discussion around what they needed to do in order to ratify the agreement and become a workforce of New GM. Is your question around the new VEBA or is it around the bondholders/unsecured claims?

Q. I'm just asking did Treasury perform a recovery analysis

regarding U.S. Treasury, new VEBA, bondholders, existing shareholders similar to the one that's contained on page 12 of Exhibit Bondholder 3?

A. Not similar to this, sir, but we did think about the recoveries to the OldCo creditors as part of the transaction.

Q. And the VEBA was a creditor of -- let me start that again. The VEBA is a creditor of Old GM, correct?

A. Well, I believe the existing VEBA would be a creditor of Old GM under the terms of our sale motion, but the new VEBA would be, obviously, a new entity.

Q. The current UAW-VEBA is a creditor of Old GM, is that what I take it?

A. Yes.

Q. It is not the United Autoworkers Union that is a creditor of Old GM, correct?

A. I'm not certain of the exact legal relationship between the VEBA and the UAW. I know as part of our discussions they were intertwined throughout our discussions.

Q. You understand the claim held by the UAW VEBA against Old GM to be a contractual claim, is that correct?

A. Yes, I believe so.

Q. And you understand the claim held by the UAW-VEBA against Old GM to be an unsecured claim, correct?

A. I believe so, yes.

Q. Under the proposed sale transaction, if approved, it is

the VEBA trust that is going to be issued the common stock in New GM, not the UAW, correct?

A. Yes.

Q. The UAW-VEBA is administered by a board of trustees, correct?

A. I believe so.

Q. It is your understanding that the trustees of the UAW-VEBA will ultimately decide what will happen to the stock to be issued to the UAW-VEBA pursuant to the sale transaction, not the union, correct?

MR. SCHWARTZ: Your Honor, please, I object to this line of questioning on the grounds of relevance.

THE COURT: I'm going to overrule on relevance, but sustain on lack of foundation. You have to establish whether or not he has an understanding.

Q. Do you have an understanding as to who will decide what will happen to the stock to be issued to the UAW-VEBA pursuant to the sale transaction, if approved?

A. Not very much.

Q. Mr. Wilson, do you have a copy of your deposition transcript still in front of you? If not, I'll give you another copy.

A. Yes, I do.

Q. Please turn to page 108.

A. Sir, I must have different pagination.

Q. I will cure that to make sure --
A. Thank you.
(Pause)
A. Oh, I'm sorry, I was looking at my declaration, it was my mistake.
(Pause)
Q. Mr. Wilson, if you could turn to page 108 at line 18, where you're asked this question and did you give this answer? "Q. Is it your understanding that the trustees of the UAW-VEBA will ultimately decide what will happen to the stock issued to the UAW-VEBA, not the United Autoworkers Union?
"A. Yes, that is my understanding."
Were you asked that question and did you give that answer?
A. Yes.
Q. You understand that the UAW-VEBA's pre-petition unsecured claim against GM is about approximately twenty billion dollars, correct?
A. I understood it to be slightly higher than that, but in that zip code.
Q. In excess of twenty billion dollars?
A. Yes.
Q. If the sale is approved the UAW-VEBA will no longer have a twenty billion dollar claim against GM, correct?
A. I believe they agreed to release their claim as part of the sale.

Q. And if the sale is approved the UAW-VEBA will receive 17.5 percent of the common equity in New GM plus other consideration, correct?

A. Yes.

Q. You understand that the unsecured claims, including those of bondholders against GM exceed thirty billion dollars, correct?

A. I'm not sure what the ultimate resolution will be, but I recognize that the bonds are twenty-seven to twenty-eight billions and there are other claims.

Q. How much of the common equity do unsecured creditors receive under the sale transaction?

A. The creditors of OldCo as part of the sale transaction will receive ten percent of NewCo plus warrants in two tranches. The first tranche is for seven and a half percent of NewCo at a strike price of fifteen billion dollars, and with a seven year maturity. And a second tranche, another seven and a half percent of NewCo ten-year maturity at a thirty billion dollar strike price.

Q. Is it your understanding that the retirees cover under the UAW-VEBA will be the same retirees covered under the new VEBA that will be established pursuant to the sale transaction, if approved?

A. Other than new retirees and unfortunate deaths, I believe so, yes.

Q. The purchase agreement has been modified such that New GM will now be assuming responsibility for future products liability claims, correct?

MR. SCHWARTZ: Objection. Could we get a definition for what Mr. Barkasy means by future products liability?

THE COURT: Yes, especially in light of all the areas where I asked a slice and dice distinction.

MR. BARKASY: Just trying to speed things up a bid.

THE COURT: No, I understand that. Different kinds of combinations are not insignificant in this case.

MR. BARKASY: I understand, Your Honor.

Q. Mr. Wilson, the purchase agreement has been modified in regards to the products liability claims to be assumed by New GM, correct?

A. Yes.

Q. What is your understanding of the modification?

A. My understanding is that as of the documents filed on June 1st, NewCo would not assume responsibility for the product liability lawsuits as a result of cars sold prior to the closing, but with accidents incurred post-closing. And that the modification we made was that NewCo would, in the revised documentation, would assume responsibility for those lawsuits.

Q. Did New GM agree to the modification because of concerns that it had regarding consumer confidence?

A. That was part of it. As a general matter, sir, we

approached all the liabilities we agreed to assume what was commercially necessary for the success of NewCo. And as we considered the various options prior to June 1st, we actually had an active debate with our team about the product liability associated with cars purchased before June 1st, but with accidents and claims occurring post-closing. And, obviously, for each one conclusion in the days leading up to June 1st and then upon further consideration, I've reached a different conclusion.

Q. Would consumer confidence be enhanced if New GM also assumed responsibility for products liability claims arising from accidents that occurred pre-bankruptcy filing?

MR. MILLER: Objection, Your Honor. Mr. Wilson is not an expert on consumer --

THE COURT: Sustained.

Q. Did the Treasury conduct any market research to determine whether consumer confidence would be enhanced if New GM also assumed responsibility for products liability claims arising out of accidents that occurred before the bankruptcy?

A. No, we make a decision based on our business judgment.

Q. Did Treasury seek out the advice of any experts to determine whether consumer confidence would be enhanced if New GM would also assume responsibility for products liability claims arising pre-bankruptcy?

A. We had sensitive discussions with the management team who

were the closest things to experts that we had in that regard.

Q. And that's the management team that's going to be moved over to New GM if the sale's approved, correct?

A. Most of them, yes.

Q. You would agree that New GM would remain viable if it assumed responsibility for tort claims arising before the bankruptcy was filed, wouldn't you?

A. As we discussed the other day, we did not see it as our obligation to take on claims to the point at which New GM was no longer viable. It wasn't a determination, or frankly, a consideration in our thinking. Our thinking is a commercial buyer of the assets that will constitute NewCo was to assess what viabilities were commercially necessary for the success of NewCo. And any other liabilities from our perspective were -- should not be part of the transaction.

Q. You would not quarrel with Mr. Henderson's business judgment as to whether New GM would be viable if it assume responsibility for products liability claims arising before the bankruptcy was filed, would you?

A. Well, I'd quarrel with the approach, because the test cannot be any one liability, if it were assumed would be the difference between viability and lack of viability. Of course, on that basis, there are a number of things that could easily fall within the bucket of not tipping the balance between viability and not viable. Our job is to create the most

attractive NewCo we possibly can. And any one liability, whether it's one of dollar -- 100 million dollars, even a billion dollars, may of may not tip the balance, but that's not the exercise we ever engaged in.

Q. So you never sought to determine -- well, let me ask this question. If New GM assumed an additional 950 million dollars in obligations, would it still be viable?

MR. MILLER: Objection again, Your Honor. Mr. Wilson is not an expert as to viability.

THE COURT: I'm going to sustain it.

Q. As part of its consideration of the sale transaction did the Treasury seek to determine how much debt New GM could carry and still remain viable?

A. We had some discussion around the proper capital structure for New GM.

Q. And you were part of that, correct?

A. Yes.

Q. And you, yourself, performed analyses of the appropriate capital structure and how much debt New GM could carry and remain viable, correct?

A. I supervised and discussed analyses, but did not perform them myself.

Q. Did during the course of -- in supervising and discussing analyses did the Treasury consider whether New GM would have remained viable if it assumed responsibility of tort claims

arising before the bankruptcy was filed?

MR. SCHWARTZ: Objection, Your Honor. This really does now begin to invade the government's deliberative process privilege. He's asking how the Treasury came about reaching its decision.

THE COURT: Unless you show me some more to the contrary, we'll deal with it the same way we deal with attorney-client privilege area. I would rule that he can't be required to discuss the substance of those communications, but he can answer whether the subject matter was discussed.

A. Can you repeat the question?

Q. I'll try. In the course of your supervision of and discussion of analyses of the capital structure of New GM, did you seek to determine whether New GM would be viable if it assumed responsibility for products liability claims arising before the bankruptcy was filed?

A. No, we never tried to apply that standard.

(Pause)

Q. Is it fair to say that from Treasury's perspective, as the purchaser of assets of Old GM Treasury was not concerned with the relative priority of liabilities under the Bankruptcy Code?

A. I think that's fair to say, we're focused on which assets and which liabilities we needed for the success of New GM.

Q. And you did not believe under a 363 sale the relative priority of liabilities was relevant, correct?

A. That was my understanding, yes.

Q. What is the standard that Treasury applied in determining which liabilities to assume and which liabilities that it would not assume?

MR. MILLER: Your Honor, please, Mr. Wilson has answered that question in four different versions.

MR. BARKASY: I have one more question, it's a predicate for the next question. I don't want to face a foundation argument.

THE COURT: I'm going to sustain the objection with the corollary that is I won't give you too much heat on the predicate -- or on the foundation assuming the next question's otherwise fair.

Q. Treasury is not a run of the mill commercial asset purchaser, is it?

A. I'm not sure that run of the mill commercial asset purchaser would like that comparison. But I think, no, it's probably not the right way to describe us.

Q. And it's not an average commercial lender, is it?

A. I don't think so.

Q. And there were considerations in Treasury's decision to invest in GM beyond those that would normally apply to a commercial asset purchaser or commercial lender, is that correct?

A. Sir, I think that the way we approach this entire

transaction, particularly once our team was developed, which was not, as you know, at the very beginning of Treasury's involvement at General Motors. Because our team was developed to approach the entire transaction on a commercial basis.

Q. Mr. Wilson, I don't have any further questions, thank you.

MR. BARKASY: Your Honor, absent objection, I would move Exhibits 1 and 2, the letters from Mr. Bressler to Mr. Miller and Mr. Miller's response, into evidence.

THE COURT: Any objection.

MR. MILLER: No objection.

THE COURT: They're admitted.

(AHCCV's Exhibit 1, letter from Mr. Bressler to Mr. Miller, was hereby received into evidence as of this date.)

(AHCCV's Exhibit 2, response of Mr. Miller to Mr. Bressler was hereby received into evidence as of this date.)

THE COURT: All right. Let's try to keep moving forward. We've been going almost two hours.

How long do you think you're going to be, Mr. Jakubowski?

MR. JAKUBOWSKI: Very short, no more than ten minutes, I would think.

THE COURT: All right. Then let's continue and then we'll take a short break.

MR. JAKUBOWSKI: Thank you, Your Honor.

CROSS-EXAMINATION

BY MR. JAKUBOWSKI:

Q. Good morning, Mr. Wilson.

A. Good morning.

Q. I'd like to mark as PLCA Exhibit 2 a document that is an e-mail and attachment from Mr. Worth to you, Mr. Wilson, that attaches a -- that was the subject matter warrant strike price calculation.

MR. JAKUBOWSKI: May I approach the witness, Your Honor?

THE COURT: You may.

THE WITNESS: Thank you.

Q. Do you recall seeing this document before at your deposition, Mr. Wilson?

A. Yes.

Q. And Mr. Worth is with Evercore, correct?

A. Yes.

Q. And he's the same gentleman who testified yesterday, correct?

A. Yes.

Q. And page 2 of this is a spreadsheet that identifies the shares that are expected to be issued under the proposed transaction, correct?

A. Yes.

Q. Along with the warrants, correct?

A. Yes.

Q. And would you say this is a fair representation to the best of your knowledge of the shares and warrants that are going to be issued under the proposed transaction as it exists today?

A. Yes, I believe so.

Q. And the bottom line is that the U.S. Government on a fully diluted basis will always remain in control of the purchaser, correct?

A. Well, on this basis, yes. But there is the opportunity for share sales by the company or share sales by us.

Q. Understood. But certainly with respect to the closing date, on a fully diluted basis, Treasury is in control of the purchaser?

A. Yes.

Q. And as a result of that, it would have the opportunity, I take it, to select members to the board of directors?

A. That's correct.

Q. Okay. And to ultimately determine who management is, correct?

A. The board will not have the exact mechanics -- but certainly the board will ultimately be able to determine that and we would expect them to have that authority.

Q. Okay. Thank you. Now, I take it that it is Treasury's believe that the value of GM as it exists today whether on a liquidation or going concerns basis is less than the value of

Treasury's debt?

A. Yes.

Q. And as a result of that it believes that in a 363 sale it really is entitled to everything of GM, correct?

A. Yes.

Q. Except for the senior secured debt?

A. That's correct.

Q. And so I take it that from Treasury's perspective, everything that it gives away in cash with a proposed transaction is virtually in the nature of a gift?

A. I wouldn't use exactly those terms because, from our perspective, there was a transaction that we needed to get done and we did what we thought was commercially necessary to facilitate that transaction, including, as you know, our negotiations with the UAW.

Q. So it's fair to say then that you basically gave away the least amount that you needed to give away in order to get a deal done, correct?

A. That was our intention, yes.

Q. And to that extent the relative priorities of the various creditor classes in Old GM were irrelevant to the purchaser, correct?

A. That's correct. We focused on which assets we wanted to buy and which liabilities were necessary for the commercial success of New GM.

Q. So I would like to direct your attention to yesterday's binder, which has Mr. Henderson's transcript in there.

Let me try to help you.

A. Thank you.

(Pause)

MR. JAKUBOWSKI: Your Honor, I believe it's in a binder that says "Exhibits 9 through 12, Deposition Transcripts".

THE COURT: Yes.

MR. JAKUBOWSKI: And in there is Exhibit 10.

THE COURT: Right.

MR. JAKUBOWSKI: And from there if you go to Tab 6, which is the contingency planning of the 363 analysis.

THE COURT: Okay.

Q. And what I'd like to do, Mr. Wilson, is please direct your attention to PowerPoint pages 10 and 11.

(Pause)

Q. Now, this exhibit contains -- these pages contain an identification of the liabilities on the balance sheet of General Motors at 12/31/08, do you see that?

A. Yes, I do.

Q. And you see that there is also in the far-right column a description of what's going to happen to those liabilities in a 363 scenario, correct?

A. I think these were scenarios that General Motors had run

to illustrate that at the early stages of planning, yes.
Q. But it's at least a good reference to the kind of categories that Treasury and GM were considering while they were negotiating over the kinds of the relative priorities of treatment of various creditor classes, correct?
A. I think this is a -- I'm not sure I heard your entire question. I think this is a full catalogue of all the liabilities in the company's balance sheet.
Q. And the question that was posed to Treasury and GM was which liabilities is Treasury going to assume and which liabilities is Treasury not going to assume?
A. If we were to pursue a 363 sale, yes.
Q. Which is where we are, correct?
A. Yes.
Q. So if you look down the column that says 363 scenario you see that there is a sub column for OldCo right?
A. Yes.
Q. And sub column for NewCo?
A. Yes.
Q. And the OldCo column represents, effectively, the liabilities that will be left behind in the sale, correct?
A. I believe so.
Q. And the NewCo column would represent the liabilities that will be assumed, correct?
A. Yes.

Q. Now, if you look at, for example, line 2 for accounts payable, don't those reflect the unsecured trade payables of GM?

A. As of the December 31 balance sheet, I believe that is correct, yes.

Q. And it's the intention of the purchaser to assume all of those liabilities at closing, correct?

A. I do not believe that's correct, sir. I believe that's what this document suggests, but I don't believe that's actually what we intend to do.

Q. Aren't most of the pre-petition unsecured liabilities of trade vendors going to be assumed as part of the sale?

A. Most practically, you said all in you question.

Q. I apologize. And you're absolutely right. Most of them are, though?

A. Yes. And the reason, of course, is because those suppliers are critical to the operations of General Motors.

Q. Okay. And with respect to the pension obligations, OPEB, same thing, you have a lot of unsecured debt that is going to be assumed by NewCo, correct? Under the current deal?

A. A lot of it. But I believe we made a number of changes to a number of these categories over the course of May.

Q. But there still is a significant amount of pension debt that is going to be assumed by NewCo, correct?

A. Yes.

Q. And that is all unsecured?

A. Yes.

Q. Okay, that's fine. Thank you.

(Pause)

Q. You talked earlier about the fact that Treasury had come to a decision that it would assume certain claims related to accidents that occur after the closing date, correct, for product liability claims?

A. Yes.

Q. And have you at any time, until sitting hear today, ever advised anyone at the debtor that there would be any change in the purchase price as a result of that decision?

A. At this point we have not.

MR. JAKUBOWSKI: No further questions, Your Honor.

THE COURT: Okay. Let's take ten minutes and continue with anyone else who wants to do a cross. Before I finish speaking, I would appreciate it if you not get up. Mr. Wilson, while we're in recess, keep to yourself. And we'll continue --

MR. MILLER: Your Honor, can we ask how many more interrogators there are?

THE COURT: All right, I think that might be helpful for all of us.

MR. JAKUBOWSKI: Your Honor, I move to admit PLCA 2 into evidence.

THE COURT: Is there any objection.

MR. MILLER: Okay, that's admitted.

(PLCA's Exhibit 2, e-mail from Mr. Worth to Mr. Wilson, was hereby received into evidence as of this date.)

THE COURT: How many other people are going to want to question Mr. Wilson on cross? All right. Five. We'll continue in ten minutes.

MR. MILLER: Thank you, Your Honor.

(Recess from 11:09 a.m. until 11:23 a.m.)

MS. DAVIS: Good afternoon, Your Honor. Tracy Hope Davis for the United States trustee. I'm here to introduce Alan Shapel who is the ombudsmen who has delivered a report to us with respect to the sale. We wanted to introduce him with a consent of the debtor and the committee. We just wanted to give you a moment to say hello.

THE COURT: Certainly. You said Shapel.

MR. SHAPEL: Yes, sir.

THE COURT: Good morning, Mr. Shapel.

MR. SHAPEL: My firm is called Shapel & Associates, and I was appointed by the U.S. trustee's office as the privacy ombudsmen. And my role here is to, among other things, is assist the Court that the transfer of personally identifiable information is contemplated by debtor, is done so in accordance with applicable law. And to that end I've compiled a report which to my understanding either has been filed or will shortly

be filed, so that Your Honor is free to review the entire report.

I'm happy to go into as much detail as Your Honor would like, but I thought I would begin with a very high level overview of my recommendations and that should take approximately five to seven minutes, if that's okay with you, Your Honor.

THE COURT: People okay with interrupting here with that overview?

MR. MILLER: Yes, Your Honor.

THE COURT: Okay; go ahead.

MR. SHAPEL: I do have additional copy right now if Your Honor would like to --

THE COURT: Okay.

MR. SHAPEL: May I approach?

THE COURT: Yes.

MR. SHAPEL: So, essentially, my role is to evaluate what, if any, representations were made by debtor to consumers at the point that the consumers were making their consent decisions. So in other words, did debtor adequately inform consumers regarding how the debtor would use their information. And as the transfer of consumer information is contemplated here in accordance with debtors' representations.

So I've reviewed under other documents GM's privacy policy, the privacy policy of the Chevrolet Saturn dealership

in Harlem, and the privacy policies of several thousand of GM's independent dealership.

I also had multiple conference calls and e-mail exchanges with debtor and debtors' counsel to help me understand debtors' privacy practices.

So most of the information at issue here was collected under GM's privacy policy. This includes the information contained within GM's master customer relationship management database. So GM's privacy policy did not specifically address the transfer of information per a bankruptcy proceeding, therefore, I'm recommending to the Court that the Court require GM to notify those consumers who had provided their information under GM's privacy statement that such information will be transferred into New GM and that New GM provides those consumers with the opportunity to opt-out of such transfer.

THE COURT: You mean to tell Old GM that it doesn't want New GM to know about?

MR. SHAPEL: To provide them with the opportunity so that Old GM is not allowed to transfer their information into New GM. Now, in my experience as a privacy professional, Your Honor, the percentage of consumers that will exercise that type of opt-out choice is very low. And, specifically, here we're talking about the GM CRM database, which is essentially used for marketing purposes. So to be clear, we're not talking

about information that's used for warranty purposes or for recall purposes or for a host of reasons which would be a public policy.

THE COURT: To continue to get that information. So if there's something they need to know about their cars, they would get it.

MR. SHAPEL: Correct. So regarding the information collected by the Harlem Dealership my recommendation is the same. Provide those consumers with some notification and offer them opt-out choice.

There were also several thousand dealerships that have been already offered deferred termination pursuant to an agreement between those dealerships and GM. While typically in bankruptcy proceedings, privacy ombudsmen will only look at the privacy representations made specifically by debtor, and here these representations were made by debtors' independent dealerships.

However, here the agreement between GM and what I'm calling the deferred termination dealerships stipulates the transfer of consumer information that was collected by those dealerships to New GM. And potentially, the transfer of information to other of GM's independent -- or New GM's independent dealerships.

So in light of this I thought it was appropriate to review the representations made by the deferred termination

dealerships and include that analysis in my report.

So to that end, I obtained a confidential list of the deferred termination dealerships from GM. Most of those deferred termination dealerships posted privacy policies that were substantially similar to GM's privacy policy and the privacy policy of the Harlem dealerships. So my recommendation there is the same. That for those consumers that they be offered notice and opt-out choice.

However, there were about fifty of the deferred termination dealerships that had privacy policies that in my opinion prohibited the transfer of information as contemplated today. For those dealerships my recommendation to the Court is slightly different. Require GM and New GM to provide notice to those consumers. However, require GM to obtain what is known as their affirmative consent of those consumers, opt-in consents or their permission, before one of two things happening. Before the transfer of those consumers' information from GM to New GM, again for marketing purposes. Or number 2, before the transfer of information from a deferred termination dealership to the new dealership.

Did I state that clearly enough, Your Honor? I know there's a lot there.

THE COURT: I understand what you're saying.

MR. SHAPEL: All right. Good. Okay. So that, in summary, is what my recommendation is to the Court. I'm happy

to go into some of the specific laws that we addressed both at a federal and state level. But, again, that's covered in pretty good detail in the report.

THE COURT: Subject to people who want to be heard, I'm confident that you -- Mr. Miller, do you or any of your folks or any parties-in-interest, want to come on what he said?

MR. MILLER: No, Your Honor. We really didn't have an opportunity to review the report, but I don't have any comments at the present time.

THE COURT: Okay. All right. Thank you very much, Mr. Shapel.

MR. SHAPEL: Thank you, Your Honor.

THE COURT: I think that you always have to have the opportunity to be here and then we'll figure out what, if anything to do, or if anybody has any type of different perspective to your report.

MR. SHAPEL: Okay. Thank you, Your Honor. May I be excused?

THE COURT: Yes, you may.

MR. SHAPEL: Thank you.

THE COURT: Okay. Back to cross-examination. Is it Mr. Esserman?

MR. ESSERMAN: Thank you, Your Honor. I just have a few minutes of cross-examination.

CROSS-EXAMINATION

BY MR. ESSERMAN:

Q. Mr. Wilson, my name is Sandy Esserman, and I represent the ad hoc committee of asbestos claimants. And have a few questions for you. First, I'd like to discuss the wind down expenses in this estate. I believe you address that in your declaration, is that correct?

A. I believe so.

Q. And the wind down expenses for the estate is estimated by you -- at least the government has agreed to so far, is 950 million dollars, is that correct?

A. As of the date of my declaration, yes.

Q. Okay. Has that changed?

A. Well, there's been -- I think you may be aware from yesterday's testimony, there is an ongoing dialogue between ourselves and the AlixPartners team as the fiduciaries and representatives for OldCo as to what the appropriate amount would be.

Q. And is that -- has that amount been determined, or is that -- are those negotiations continued?

A. They're continuing.

Q. Do you know when they'll be concluded?

A. We believe they'll be concluded very soon. Frankly, they've been a little bit delayed because my participation is integral to that conclusion, and I was obviously been committing time here. My expectoration is that as soon as I'm

done here, I would be able to reengage in those discussions. And our expectation would be that we would likely conclude them as soon as Friday morning.

Q. Would you anticipate then that those discussions would be concluded prior to the time that the sale, to the extent this Court determines to approve it, would be approved?

A. I can only speculate on the latter, because that's obviously Judge Gerber's decision. But on the former we would work as expeditiously as possible and would commit to not creating any delays as a result of that.

Q. Okay, thank you. Let's talk a little bit about claims of people who have received asbestos disease as a result of exposure to General Motors' products, I'd like to discuss that subject with you.

Are you aware that there's been a report that General Motors, in fact, put in their 10K and I believe 10Q from HR&A that provides for a 650 million dollar approximate estimate of future claims over the next ten years?

A. I'm familiar with that estimate, I'm not familiar with the underlying work to a significant extent, but I'm familiar with the number.

Q. Okay. Are you generally familiar with the asbestos claim against GM, what they're based on?

A. Not in any great level of detail, no.

Q. But generally, as a result of exposure to asbestos in

brakes, are you generally familiar with that?

A. Yes, I'm familiar with that part of the issue.

Q. And one of the things you're asking this Court to do is to sell this Old GM to New GM free and clear of any asbestos claims, is that your intention?

A. Yes.

Q. And you're aware that there are claims that are going to occur at various points in the future, that is the people that have been exposed to GM asbestos?

MR. MILLER: Objection. I just want to be clear when Mr. Esserman uses the word claim, he's not using that necessarily in the Bankruptcy Code context, but --

MR. ESSERMAN: That's correct.

MR. MILLER: -- current to the annual?

MR. ESSERMAN: Yes.

THE COURT: All right. It's clarified by Mr. Esserman. Do you remember the question?

A. Can you please repeat it?

Q. Let me start over and break it down a little bit, Your Honor, in a couple of different sections. You're aware that there's currently lawsuits on file against General Motors based on claims of exposure to asbestos from GM products, is that correct?

A. Yes.

Q. And you're aware, in fact, based on the HR&A report that

there will be such claims post-sale in the future that will arise?

A. Again, I'm not --

MR. MILLER: Please. The 650 million dollars, first of all, Your Honor, are not claims. The include the cost of defense. And there is no concession that these are valid claims, in any sense of the rule.

MR. ESSERMAN: I'm not seeking a determination of the validity.

THE COURT: I understand that. And on the one hand I'm going to sustain the objection. But on the other hand, it would be helpful if everybody understands that I'm generally aware of the issues. Mr. Esserman, either be more precise in your questions. Don't try to monetize them, we have to monetize them. (Inaudible)

MR. ESSERMAN: That's fine. Let me attack it simpler and briefly, Your Honor.

BY MR. ESSERMAN:

Q. To the extent there are any claims that arise post-sale, would it be the intention of you, as the purchaser, or the government as the purchaser that anyone that has a claim or demand based on asbestos exposure be asserted against OldCo rather than NewCo?

A. Well, if I could answer your question this way, NewCo is not acquiring any of the liabilities associated with any of the

asbestos claims.

Q. And that's a decision that has been made by the Auto Task Force?

A. As we've reviewed all the liabilities that we can pick and choose from in the context of the General Motors' balance sheet, we applied that same commercially necessary determination to each of them. And may of these cases, and some cases obviously quite tragic, we did not feel that any of them had a commercial bearing on the future success of New GM.

Q. Okay. So just so I'm clear and I'm almost done with my questions here, to the extent that there's a claim that arises in the future based on asbestos exposure to a GM product, it is -- you're requesting that this Court not pass that claim to NewCo, but that it remain with OldCo, is that correct?

A. That's correct.

MR. ESSERMAN: Thank you, Your Honor.

THE COURT: Mr. Eckstein.

(Pause)

CROSS-EXAMINATION

BY MR. ECKSTEIN:

Q. Mr. Wilson, good morning. My name is Kenneth Eckstein, I'm representing the official creditors' committee in this case.

Let me just start by returning to the question that you were asked a moment ago with respect to the wind-down budget.

You were in Court yesterday and you heard Mr. Koch's testimony with respect to the status of that budget, am I correct?

A. Yes, I did.

Q. And is it my understanding that you're working principally with Mr. Koch and his team in order to, I guess, refine the estimate of the wind down expenses?

A. The status so far has been that members of my team and members of Mr. Koch's team have been working together on exactly that. And I have not, because I hadn't gotten to the point where it was ready for me, frankly, had not yet gotten involved in any level of detail.

Q. And is it fair for me to assume that the goal of this exercise is to try to refine the estimate of the wind down expenses so that ultimately the wind down expenses can be satisfied in full with the amount of revised DIP loan that's provided to this estate?

A. That's correct. As we indicated in our discussions with representatives of the bondholders on a pre-petition basis, we indicated we would fund reasonable expenses associated with the wind-down of OldCo.

Q. Thank you, sir. Mr. Wilson, do I understand correctly, that you were one of the principal negotiators of the summary term sheet that provided the basis for the master purchase and the sale agreement?

A. Which summary term sheet, sir?

Q. Were you one of the principal negotiators on behalf of the treasury of the transaction that is being presented to the Court for approval today?

A. Yes.

Q. And as part of those -- as part of this transaction did you have the occasion to negotiate with representatives of the ad hoc bondholders committee prior to the commencement of the case?

A. Yes.

Q. And who were the individuals that you principally negotiated with on behalf of the ad hoc bondholders?

A. The lead members were Mr. Eric Siegert from Houlihan Lokey and Mr. Andrew Rosenberg from Paul Weiss.

Q. And approximately when did those negotiations take place?

A. Well, they had approached the Treasury Department earlier in the case. We indicated to them that we needed to work through the operating restructuring plan with the company in order to determine what obligations the company could bear on a restructured or in the ultimate revolution of the case on a NewCo basis and then engaged with them in earnest in late May.

Q. And am I correct that as a result of those negotiations an understanding was reached that provided for ten percent of the NewCo equity to be left in the OldCo estate for the benefit of unsecured creditors?

A. That was a portion of consideration, yes.

Q. And in addition to the ten percent of the equity, there were also warrants, is that correct?
A. Yes.
Q. And was there also a provision, Mr. Wilson, that provided for the possibility of additional direct equity to be provided to the OldCo estate?
A. Yes. In the event that claims exceeded thirty-five billion dollars, which we considered unlikely at the time, that there would be a sliding scale from thirty-five to forty-two billion dollars, where up to two percent of additional equity would be awarded to -- two percent of the equity of NewCo would go to the creditors of OldCo.
Q. So that was, essentially, an equity cushion in the even claims exceeded what was expected to be the likely amount of allowed general unsecured claims, is that correct?
A. Yes.
Q. And at the time that you conducted these negotiations, did you have an understanding as to the amount of general unsecured claims other than the bondholder claims that you thought would be allowed against OldCo in this case?
A. No, we did not. We were focused at that point as NewCo as the purchaser of certain assets and the assumption of certain liabilities. And had not really worked through what the unsecured claims against OldCo could be.
Q. Am I correct that you understood that the bondholder

claims were approximately twenty-seven to twenty-eight billion dollars, is that correct?

A. Yes.

Q. And the level at which the two percent equity cushion kicked in you said was thirty-five billion dollars, is that correct?

A. That's when it started to kick in, yes.

Q. So if I understood your testimony that you didn't think the thirty-five billion dollars was going to be exceeded, is it fair to assume that you didn't think the other unsecured claims against OldCo was going to exceed eight billion dollars?

A. I think seven to eight, between the bonds being twenty-seven to twenty-eight.

Q. Did you have any general sense of what you think the number was likely to be?

A. We thought it would be less than that.

Q. Do you have any recollection as to whether that number was intended to be approximately three to four billion dollars?

A. I don't recall that specific point in time, I know we had some discussions around it. But it was certainly expected to be less than the seven billion, but I can't recall exactly what we thought at that point in time.

Q. And did you have any sense as to what categories of claims made up the claims other than the bondholder claims that were going to be allowed claims against OldCo?

A. Sure. Much of the claims have been the subject of today's discussions. It was the claims from the so-called splinter unions, the asbestos claimants, the product liability claims we've discussed, and any other unsecured claim that may come forth.

Q. And at that point in time you had also taken into account workers' compensation claims?

A. I believe so, that was part of the company's balance sheet.

Q. Mr. Wilson, in connection with this transaction, my understanding is that the U.S. Treasury is intending to receive approximately 72.5 percent of the NewCo equity, is that correct?

A. No, it's not correct.

Q. What is the percentage of equity that the U.S. Treasury expects to receive?

A. It will be approximately 60.8 percent.

Q. 60.8 percent, thank you. And the U.S. Treasury is receiving this equity in connection with a credit bid, in connection with its outstanding indebtedness, is that correct?

A. As well as additional funding, yes.

Q. And am I correct that the credit bid is in respect of, both pre-petition debt and debtor-in-possession financing?

A. Yes.

Q. And there's also going to be some additional financing

over and above the pre-petition plus the debtor-in-possession financing?

A. Well, I think it depends on the point in time. The debtor-in-possession financing as contemplated under the DIP order, plus the pre-petition financing I believe is the subtotal of our credit bid.

Q. And am I correct that the pre-petition financing that is the subject of the credit bid is approximately 21.4 billion dollars?

A. I believe the pre-petition financing is 19.4 billion dollars.

Q. 19.4 billion dollars. And what do you expect would be the amount of the --

MR. ECKSTEIN: Well, let me withdraw that.

Q. What is the amount of the debtor-in-possession financing that's outstanding as of today?

A. As of today, the -- well, I'm sorry. AS of the last I knew, which is roughly yesterday or today, was approximately ten to eleven billion dollars.

Q. And have you made any estimates as to the amount of debtor-in-possession financing that you expect to be outstanding at the time of the closing?

A. Yes. It is our understanding and expectation that the entire DIP budget will be used.

Q. And that will be how much, sir?

A. 33.3 billion dollars.

Q. Thank you. And has U.S. Treasury made any allocation of the NewCo equity that it expects to receive as between the pre-petition debt and the debtor-in-possession financing?

A. No.

Q. Does it expect to do so prior to the closing, sir?

A. We don't see any reason why we would.

Q. Thank you very much, sir, I have no further questions.

MR. HOFFMAN: Good morning, Your Honor. John Hoffman on behalf of the IUE and the other objecting unions.

CROSS-EXAMINATION

BY MR. HOFFMAN:

Q. Good morning, Mr. Wilson.

A. Good morning.

Q. I think I'll be very brief. Do you recall when I took your deposition this Monday?

A. Yes, sir.

Q. And do you recall this morning when you told Mr. Salzberg that you did not recall whether or not you had seen Exhibit 2 -- Bondholder Exhibit 2 prior to that deposition?

A. Yes.

Q. Do you have Bondholder Exhibit 2 up there, at this point, Mr. Wilson?

A. Is this it?

Q. Yes, sir.

A. Yes, I have it.

Q. And do you have your deposition transcript up there, at this point?

A. Yes.

Q. And do you recall at that deposition when I asked you these two questions?

MR. MILLER: Can you give a page, please?

MR. HOFFMAN: Yes, at page 22, line 20, through 23, line 6.

Q. And what we had in front of you I believe at that point was Exhibit 3 to your deposition, which is now Bondholder Exhibit 2. Do you recall when I asked you these questions and you gave these answers?

"Q. And did you attend the meeting at which Cadwalader had presented this? I think it's actually a deck of slides?

"A. Actually, I don't recall meeting. I don't know if I did or not.

"Q. So you don't know whether you attended the meeting at which this was presented, but you saw it in some respect during your work at the task force?

"A. That's correct."

And did you give those answers to me on Monday?

A. That's correct and that's a helpful reminder.

Q. Pardon?

A. I said that's correct and it's a helpful reminder.

Q. Pleased to be of service, Mr. Wilson. And I'm going to ask you to turn to page 12 of Bondholder Exhibit 2. And let me just set a predicate here. Before you joined the task force in March of this year, you did have some experience with Section 363 of the Bankruptcy Code, is that correct?

A. Yes.

Q. And it was your understanding that one of the considerations that made a Section 363(b) sale attractive was the ability of the purchase to cherry pick the liabilities it assumed?

A. Yes.

Q. And that was one of the considerations that you used and the Task Force used in deciding on the form of this sale, is that correct?

A. Yes.

Q. And in deciding what liabilities New GM was going to assume your task was solely that the assets assumed should be commercially necessary for the viability or help for the New GM, is that correct?

A. That was the focus of our assessments, yes.

Q. That was the test you used?

A. The primary test, yes.

Q. And you didn't give any consideration to Section 1114 of the Bankruptcy Act or the priorities of those liabilities under the Bankruptcy Code, is that correct?

A. Well, to the extent that Section 1114 was relevant, we consider that a consideration for the creditors of OldCo.

Q. And you didn't consider it in terms of what assets you were going to purchase in NewCo?

A. Well, we did not believe that any of the assets we were purchasing required any of the liabilities associated that would fall under the question you're asking.

Q. In deciding what liabilities NewCo was going to assume you did not consider any of the effects of Section 1114 of the Bankruptcy Code, is that correct?

A. I think that's fair to say.

Q. I'm sorry; what was that?

A. I think that's fair to say.

Q. Okay. Could you turn, in the large book of exhibits, to your deposition and following that Exhibit 12, and these are in evidence at this point. Exhibit 12 to your deposition. If you need help, I can come up and, I think, help you.

A. Is this it?

Q. No.

MR. HOFFMAN: May I approach the witness, Your Honor?

THE COURT: Yes.

(Pause)

Q. And I really want to refer you to the third to the last page of this exhibit, Mr. Wilson. It has the heading salaried and splinter union benefit obligations guideline objectives.

MR. HOFFMAN: May I approach?

THE COURT: Yes.

(Pause)

MR. HOFFMAN: Exhibit 12, the third to the last page.

Q. And did there come a time when the task force set, for GM management, a target of two-thirds reduction in certain retiree benefits?

A. Yes.

Q. And did GM come back and --

THE COURT: Are people in the back of the room able to hear me and Mr. Hoffman? All right. ECRO -- do we have electronic record? So we don't know if it's going to any of the other room and we need to make sure. I think we have no choice but to take a recess and see if we can resolve this. Let's go to a recess. We'll try to be beck within five minutes after it gets fixed but I don't know how long it will take to have it fixed.

(Recess from 11:55 a.m. until 11:59 a.m.)

THE COURT: I'll give folks a chance to be seated and then we can continue.

(Pause)

MR. HOFFMAN: May I proceed, Your Honor?

THE COURT: Yes, sir.

MR. HOFFMAN: Thank you.

Q. Focusing, again, on the third to the last page of Exhibit

12, Mr. Wilson, does this reflect the proposal that GM management made to the task force concerning its request for a two-thirds reduction in the 7.9 billion dollars in retiree benefits?

A. Yes, this was the first response from the General Motors management team.

Q. Right. And in it they had reflected a reduction in the retiree basic life insurance and the 10,000 dollars flat, is that correct?

A. Yes.

Q. And they had not further cut salaried retiree healthcare recognizing that it had been cut at the beginning of the year, is that correct?

A. Yes.

Q. They cut executive non-qualified pensions by thirty-two percent, is that correct?

A. Yes.

Q. And that's what we call a SERP, right?

A. Yes, I believe that line item is the SERP.

Q. And what they did was for retired executives earning less than one hundred thousand dollars on their retirement SERP benefit, they got a ten percent reduction -- excuse me, a combined retiree pension and SERP benefit of less than one hundred thousand dollars, they got a ten percent reduction.

A. Yes. But just to clarify one thing I said earlier, I

think, as it says here, there's -- this is part SERP and part just ERP. So I think there are elements of this program that are not just the SERP.

Q. Okay. So let's take it as a benefit as a whole.

A. Yes.

Q. They got a ten percent reduction if they had under a hundred thousand dollars total retirement payments, right?

A. Yes.

Q. Per year. And if they had a two-thirds reduction of any amount over a hundred thousand dollars, is that correct?

A. Yes.

Q. And the executives lost their life insurance but they still had the retiree basic life insurance, is that correct?

A. I believe so. Yes.

Q. And the splinter unions, as they're called, they were proposing we're going to lose eighty-four percent of the value of their health insurance, correct?

A. That was the end result of a policy to provide the same level of benefits for the splinter union retirees as for the salaried retirees. The math of that became eighty-four percent

Q. And -- excuse me, I didn't mean to interrupt but to you and the task force, symmetry between the retiree healthcare benefits and the splinter union healthcare benefits was an important factor, wasn't it?

A. Well, we struggled with this issue for some time, Mr.

Hoffman. And the -- one of the things we wrestled with was no assumption of retiree benefits. And we felt that that was, at least initially, a reasonable position as a buyer of the assets for New GM. And the response we received from the management team was that that would have a significant deleterious effect on the moral of management, most of whom are coming over to NewCo as we've discussed, and we should modify that. And in the course of -- as a result of many, many discussions around this topic concluded that we settled on the two-thirds reduction overall and felt that we really left it to the management team to decide how to do that. And this was, of course their, as I discussed earlier, their first proposal on that.

Q. Thank you. And the task force's response to this proposal was what?

A. We said two-thirds and we meant two-thirds.

Q. Yeah. So come back again and tell us how you're going to do the two-thirds, in words or substance, correct?

A. I missed the second half of what you said, sir.

Q. So GM management, come back again and tell us how you're going to achieve two-thirds, in words or substance that's what you told them, right?

A. Yes.

Q. Yeah. Could you turn to Exhibit 13, the second page, please?

(Pause)

Q. And do you believe the second page reflects where GM management came back and told you how they were going to reach the two-thirds?

A. Yes, absent the black lining, but yes.

Q. And what they did was move the cost share on retiree health to forty-five percent cost share, and that resulted in salaried healthcare losing twenty-five percent of their benefit and the unions losing eighty-seven percent of their benefit, is that correct?

A. Yes, sir.

MR. HOFFMAN: Other than that, Your Honor, we'll rely on the deposition of Mr. Wilson.

THE COURT: Okay.

MR. HOFFMAN: Thank you, Mr. Wilson.

THE WITNESS: You're welcome. Thank you.

THE COURT: Anyone else? Ms. Cordry?

MS. CORDRY: Thank you, Your Honor. Karen Cordry on behalf of the Attorneys General. I'd like to ask the witness some questions about the proposed sale order that's part of the sales motion. It's obviously something the Court can take judicial notice of. I can put it in as an exhibit separately if you'd prefer.

THE COURT: It might be easier, Ms. Cordry, if you'd consider it an exhibit as well.

MS. CORDRY: Attorneys General Exhibit 1, I guess.
(Attorney General's 1, proposed sale order, was hereby marked for identification as of this date.)
MS. CORDRY: And I have a copy for the witness if I may approach.
THE COURT: Yes. Thank you. Do you have an extra for me?
THE WITNESS: Thank you.
CROSS-EXAMINATION
BY MS. CORDRY:

Q. Okay. First, have you seen what's been labeled Attorney General's Exhibit 1 that I've handed to you?
A. I have skimmed this before, yes.
Q. Okay. Have you -- you said you skimmed, does that mean you have read it all the way through?
A. I skimmed it all the way through.
Q. Okay. Who on Treasury's side is responsible, in depth, for the actual terms of that order, the specific language going into that order?
A. Well, the general business principles I would be primarily responsible for. But the actual language would be my colleague, Matthew Feldman.
Q. Okay.
A. Who's an attorney.
Q. But as the business principals you would be familiar with

the terms that are in here and what -- to the extent the order encompasses the decision by Treasury to assume liabilities, to refuse to assume liabilities, those kind of trade offs you're familiar with that, is that correct?

A. Certainly the high level.

Q. Okay. To your knowledge, is this order still the only one that's been filed with the court?

A. To the best of my knowledge, yes.

Q. There are ongoing discussions, are there not, with respect to the terms of this order, various negotiations with various objecting parties to you knowledge?

A. There had been, I don't know that they're continuing.

Q. Do you know -- have you been party to any of those discussions?

A. Not on a day-to-day basis, no.

Q. Okay. To your knowledge, have all those discussions been resolved and placed into an order?

A. To the best of my knowledge we have heard all the issues that are outstanding. We've formulated a view on what we're willing to do and I think we've resolved that view.

What's been communicated to the various parties or what's been set forth in the documents, I'm not familiar with.

Q. Okay. And who is communicating those views to -- is your position being communicated to the debtors, to the other parties, how is that communication being made?

A. I'm not certain. I believe that there's been direct dialogue between at least our outside counsel at Cadwalader with the various parties. But since I'm not part of those conversations I'm not exactly sure who's in those conversations.

Q. Okay. Could you look at paragraph 27 in that order; it's on page 23.

(Pause)

Q. The second sentence there -- it says, "The purchaser shall not be deemed as a result of any action taken in connection with the MPA or any of the transactions or documents ancillary thereto or contemplated thereby or in connection with the acquisition to purchase assets to (i)be it legal successor or otherwise be deemed a successor to the debtors other than with respect to any obligations arising under the purchase agreements from and after the closing; (ii)have de facto or otherwise merged with or into the debtors; or (iii)be a mere continuation or substantial continuation of the debtors or the enterprise of the debtors." That's a correct reading of what's there?

A. Yes.

Q. Okay. With that statement there, do you know if a legal analysis was made as to whether under the facts of these transactions the debtor is in fact the new debtor, the New GM, the purchaser and this new enterprise would be considered to be

a successor of Old GM?

MR. SCHWARTZ: To be clear, the question is whether an analysis was performed?

MS. CORDRY: Yes, that's the question.

THE COURT: That's exactly the way to do it without blowing a privilege.

MS. CORDRY: Right.

THE COURT: And with the clarification, especially, I think it's clear that the question can and should be answered.

MR. SCHWARTZ: Could we make clear that it's a yes or no question?

MS. CORDRY: Well that question, I think, probably is a yes or no question, yes.

THE COURT: I think it is a yes or no question.

A. Could you please repeat it?

Q. Okay. Do you know whether any legal analysis was made as to whether under the actual facts of this transaction would the purchaser, the new GM enterprise, be a successor to Old GM?

A. I believe so.

Q. And who would have made that analysis?

A. I believe it would have been Mr. Feldman in conjunction with outside counsel.

Q. And do you know whether they analyzed that under federal law or state law?

A. I don't know.

Q. And did they come to a conclusion on that?

THE COURT: Answer yes or no.

A. Yes.

Q. Okay. And I'll ask this --

MS. CORDRY: You can object if you want.

Q. -- was the conclusion that under all circumstances and for all types of claims that they were not a legal successor?

MR. SCHWARTZ: Objection.

THE COURT: Sustained. That question can't be answered without getting into substance.

MS. CORDRY: Okay.

Q. The order also states that --

MR. SCHWARTZ: With respect, I'm going to object to the relevance of the entire line of questioning. I understand that the attorneys general have a legal objection that is set forth in their objections about some of the terms of the sale order. I also understand that there is a work through of many of the issues that objectors have raised and that the document is in flux. I'm not sure that it makes sense to question this witness about that document. It's a legal issue.

THE COURT: Mr. Schwartz, I'll be the judge of that.

MR. SCHWARTZ: Of course.

THE COURT: Ultimately, the decision is a legal one for the Court. Within the bounds of reason, I'm going to let the parties develop factual records. I have no doubt that I'm

going to hear in summation argument on the legal issues, and frankly I'll tell you, Ms. Cordry, what kind of homework people do before that is relevant to my legal decision but I'm going to cut you a little slack in this regard, as long as you don't abuse it.

MS. CORDRY: Right. Because I think the question I'm asking, although I'd be happy to know what their answer was, the question I'm asking is in this order it appears to say, and I think your various testimony appears to be that the purchaser will not proceed unless it's really a successorship liability in a broad sense. And I'm trying to parse through that a little bit and try to find out what the intentions actually are, depending on the legal analysis of the Court and whether that analysis will have any affect on what the government is prepared to do.

THE COURT: Well, we can limit some but I'll let you question.

MS. CORDRY: Thank you.

Q. So my question is, going to that point that the order is asking for a determination that under all circumstances this purchaser is not a successor of the old debtor, if the Court finds to the contrary, so I'm not asking you to make a legal determination -- if the Court finds to the contrary as to one or more aspects of the claims that in fact this purchaser would be a legal successor, is the purchaser -- is Treasury prepared

to walk away at that point.

A. It is, of course, hard to answer a hypothetical without knowing the terms of that -- of the outcome of that. But certainly our strong view is that we are not going to be seen as successor and cannot take on successor liability.

Q. Okay. And that's what I'd like you to distinguish now, the difference between being seen as a successor and then the second aspect as successor liability which is, this order is also asking the Court to determine that the sale can be made free and clear of successor liability. Is that your understanding?

A. Yes.

Q. So that even if you were a successor it is asking that the sale be made, that the Court find that legally the sale can be made without regard to any liabilities that you might have, is that your understanding?

A. Yes.

Q. Okay. With that distinction between those two aspects of successor liability, if the Court found the latter, that it could be sold free and clear of successor liability, but either found that you were a successor perhaps more properly said I don't need to find if you are a successor or not because I'm allowing you to sell free and clear that liability, is Treasury prepared to walk away if they don't get that legal finding that you are not a successor?

A. I'm not sure my legal knowledge, is extent to one constitutional law class would give me enough basis to kind of assess exactly what your question is. But I can tell you that the sale motion was put together very deliberately and it was certainly based on the predicate that we will not have any successor liability and that the sale motion would find that we were not a successor.

Q. I understand. But I am asking you and I think the Court needs an answer before we go to this and I don't know whether you're prepared to give the answer at this point or not. But if the Court found that you were not going to be held liable for successor claims but found that you were still a successor, because those are two very different issues and have two very different consequences, I'm asking you as a business judgment whether the Treasury has even considered the distinction between those two aspects of successor liability?

MR. SCHWARTZ: Objection. Mr. Wilson has already answered that if the sale order is not entered by July 10th it is Treasury's intention not to fund. What Ms. Cordry is really trying to do is negotiate the language of the sale order with Mr. Wilson on the stand.

THE COURT: I don't think so, Mr. Schwartz. Ms. Cordry, I'm not going to let you question as to their deliberations but if Treasury or the task force now has formed a view on what it will do if I rule adversely on any element of

successor liability, you've got to tell me.

THE WITNESS: We do not have any intention to move forward if the sale order, with regards to successor liability, is not entered as described in here.

Q. Okay. Now, on the other hand you are continually drafting the order so in fact you are prepared to make some changes in this order and I believe that some of those go to successor liability.

A. Well, I think that's where we started the conversation. And what I indicated was we're taking all kinds of perspectives and views and input, all which we had received prior to June 1 because it was clear what was happening in General Motors and there are no surprises. But even despite that, we still were, we believe, extraordinarily accommodating in taking all sorts of input from all sorts of people post June 1. And at this point in time we've taken all the input we intend to take and have formulated our final views on that.

Q. Okay. But that really was not my question. My question was, in fact, the draft orders that are going around have changes in provisions that relate to successor liability, do they not?

A. Yes.

Q. Okay. So this order is not the one you're going to necessarily ask the Court to enter, correct?

A. That is correct.

Q. Thank you. And again, just to be absolutely clear, your position now is that you want the Court to say that even if the Court finds that legally you would be a successor but that the Court would relieve you of free and clear -- would allow you to sell free and clear of that liability, that your position would be you would walk away from that unless the Court allows you to sell -- I'm sorry. You would walk away unless the Court finds that you are not a successor regardless of what the law might say?

A. That's our position.

Q. Okay. So the order would have to find you're not a successor regardless of what the Court finds the law to be in order for the sale to go forward.

A. Ma'am, I think honestly you're stretching well beyond the boundaries of my legal knowledge. I explained to you the business principles underlying our position.

Q. That is the business principles I'm asking you for --

THE COURT: Time out, Ms. Cordry. If you don't like his answer you can move to strike but you can't interrupt him in the middle.

MS. CORDRY: I'm sorry. I'm sorry, Your Honor.

Q. And I'm sorry, Witness. Please complete your answer.

A. No problem. And as I testified at the very beginning, I'm more than happy to answer any questions on the business principles outlined herein and that's been the basis of my

answers throughout my testimony. But to the extent you're asking for legal distinctions that are beyond my knowledge, I can't answer it thoughtfully or accurately.

Q. I think I was looking at the business judgment that that was where they would take the order but let me move on to one other set of questions.

In terms of, you said, this order was very carefully drafted, I believe you said, correct?

A. I don't recall if I said that or not but I certainly hope it was.

Q. Okay. One of the things that has come up here, certainly in our discussion and I think with other peoples and so forth, is the question of just how broadly this free and clear sale might extend and so forth and what might be covered by this. Someone made copies of this but apparently, I'm sorry, they only made copies of -- it was a double-sided page and it was only made with single-sided pages.

MS. CORDRY: Could I possibly borrow back your originally order and we'll substitute corrected one.

THE COURT: You're talking about the proposed order?

MS. CORDRY: Yes.

THE COURT: Yes, you can borrow it.

MS. CORDRY: I'm sorry.

(Pause)

Q. If you look at paragraph T there, which talks about

selling free and clears of liens and claims and encumbrances and so forth, can you just briefly read down that paragraph and then I'll ask you a question about it.

THE COURT: Ms. Cordry, pause please.

MS. CORDRY: Yes.

THE COURT: I'll see if I have another copy.

(Pause)

THE COURT: Mr. Miller, can one of your folks provide me with one? You may approach.

MR. MILLER: Just give us a moment, Your Honor.

THE COURT: Sure.

(Pause)

THE COURT: You want to make a reference to T, if I recall?

MS. CORDRY: T, right. It would be page 8.

(Pause)

Q. Have you had a chance to finish reading that?

A. Yes.

Q. Okay. If you go through that paragraph, if you'll notice at the top it refers to claims with a small (c). If you look halfway down it refers to claims, with a small (c) (as defined in the Bankruptcy Code). And I believe towards the ends it talks about large (C) claims in the next to last line.

A. I see the -- I see the large (C) claims in the second to last line, I don't see your other two references.

Q. Okay. It would be seven lines from the bottom is the claims (as that term is defined in the Bankruptcy Code), do you see that?

A. Yes.

Q. And I believe up at the beginning of it, when it starts talking about what's being sold free and clear of liens, claims, encumbrances and so forth, do you see that?

A. Yes.

Q. Okay. Without the parenthetical?

A. Yes.

Q. Is it your understanding that those three terms are meant to be something different in the same paragraph?

MR. SCHWARTZ: Objection. Mr. Wilson testified he had only skimmed the document and he wasn't a draftsman of the document.

THE COURT: All right. I'm going to sustain that but you are entitled to question, Ms. Cordry, as to whether he, as a businessman or as a government official, has a businessman's understanding as to whether he was intending to make any distinctions between the two.

Q. As the judge stated, as a businessman is it your understanding that this document was intending, in that paragraph, to make a distinction between those three sets of uses of the term claim?

A. I haven't spent any time on the details of the document.

I know there was some discussion yesterday around the distinction between lower case C and upper case C, but I didn't spend any time on that issue.

Q. And are you aware of what the defined definition of -- the upper case C defined definition of a claim is, according to the master purchase and sale agreement?

A. Not off the top of my head, no.

Q. Are you aware that it goes beyond a bankruptcy claim that includes things like defenses and investigations and right to recoupment?

A. I'm not aware of that.

Q. Okay. But if I state to you that that's what it says, would you doubt that your purchase and sale agreement goes beyond a simple bankruptcy claim?

MR. SCHWARTZ: Objection. Calls for a legal conclusion.

THE COURT: Sustained.

Q. I'm simply asking, do you disagree with me that the master purchase and sale agreement says that if I make a representation to you that it says that, do you disagree with that?

MR. SCHWARTZ: Objection. The document speaks for itself.

THE COURT: Well, Mr. Schwartz, documents often speaks for themselves but when a document is drafted in this

fashion that's debatable.

MR. SCHWARTZ: At least the document should be in front of the witness.

THE COURT: No. Forgive me, Mr. Schwartz. I'm not going to get into a debate with you. That objection is overruled. I'm going to reiterate, Ms. Cordry --

MS. CORDRY: Yes.

THE COURT: -- that you're free to ask him his understanding, as a non-lawyer, what he's trying to accomplish.

MS. CORDRY: Yes, Your Honor.

THE COURT: I am not going to have him construe this document.

MS. CORDRY: No, Your Honor.

THE COURT: It may be tough enough for me to construe the document.

MS. CORDRY: Yes, sir.

THE COURT: And even if he had read it more extensively, which the record indicates he hasn't done, the question would, in my view, be inappropriate.

MS. CORDRY: Okay.

THE COURT: So while I don't go as far as Mr. Schwartz' objections or to sustain them, the ground rules for this examination are that you're allowed to find out his businessman's understanding and to the extent he has intentions what they are.

MS. CORDRY: Yes, sir.

THE COURT: Go ahead.

MS. CORDRY: Okay.

Q. For purposes of this question, I'll simply make the representation that as a factual matter the defined term claim says it includes small C claims and those other matters that I mentioned, things like defenses, right to recoupment, investigations. So for the moment I'm simply saying that's what the words say, are you prepared to accept that as my representation that that's in fact what your document says?

A. I don't have any reason to doubt your integrity, no.

Q. Okay. Thank you. Are you aware if there's been any analysis of whether any rights under the Bankruptcy Code to sell free and clear of bankruptcy claims extends beyond that to the extent of the matters covered by your defined term claim?

A. I haven't spent any time on that issue.

Q. I'm not asking you that. I'm asking you has there been any legal analysis done as to whether there's a distinction in terms of the ability to sell free and clear between the bankruptcy term claim and your defined term claim?

A. Not that I'm aware of.

Q. Okay. Has there been any determination, then, as to whether if the Court limited the sale free and clear of claims to the bankruptcy definition claim, rather than your defined term claim, whether the Treasury would pull out of this

agreement?
A. Since we haven't discussed it I can't -- of course we don't have a position on it because we haven't discussed it.
Q. If -- all right. So if the Court found that it was illegal to go beyond a bankruptcy claim and could not extend the free and clear to your defined term claim, you at this point have no position as to whether or not the Treasury would need to terminate the sale or not, is that what I hear you saying?
A. Yes.
Q. Okay. Conversely, the purchaser has not yet taken the position -- has not determined that it will only complete the sale if the Court finds that it can -- if the Court includes a provision in the order that says regardless of what the law is you can have your defined term claim as what can be sold free and clear?
A. For the same reasons, that we haven't discussed this issue, yes.
Q. Okay. Thank you.

MS. CORDRY: That's all, Your Honor

THE COURT: Okay. Mr. Bernstein?

CROSS-EXAMINATION

BY MR. BERNSTEIN:

Q. Good afternoon, Mr. Wilson. My name is Norman Bernstein. Just a few quick questions. During the run up to the

bankruptcy, after December and before May 30th, were there any conversations that you're aware of regarding GM's bidding for this then ongoing environmental obligations?

A. Could you repeat the question?

Q. Sure. During the period, December through May 30, December 19, 2008 through May 30th of 2009, were there any conversations, that you are aware of, regarding GM's continuing to pay for its ongoing environmental obligations?

A. I guess the reason I asked you to repeat the question is I wanted to make sure I understood it. Are you talking about GM in the context of that period of time?

Q. Yes.

A. And its obligation during that period of time?

Q. Yes.

A. We assume that they're doing what they should be doing under law.

Q. What would be the basis for that assumption?

A. Perhaps it was ill founded but certainly our expectation was that in all aspects of the business they were complying with the law.

Q. Apart from expectations, if those expectations turned out to be incorrect, was there any conversation that you know of relating to that subject?

A. Not that I'm aware of.

Q. If this Court were to conclude that a, what I'll call de

minimis exception to the successor liability in the amount of 62,700 dollars was appropriate because of conduct by general motors in or about May of 2009, would that prevent, the 62,700 change, prevent the Treasury from going forward?

A. I'd have to, obviously, review the facts and circumstances of this year to ultimately opine. But it's hard to see, even though as I've said many times that we've only what is absolutely commercially necessary and it's hard to draw a fine line on viability. It is hard to say that the 62,000 dollars would swing the difference.

MR. BERNSTEIN: Thank you very much, Your Honor.

THE COURT: Before you leave, Mr. Bernstein.

MR. BERNSTEIN: Yes.

THE COURT: When we eventually get to summations, I want both sides to address a question that I'm likely to ask at the beginning of argument which is that when you have a consent decree that requires the payment of money, is that regarded as an obligation of law on the one hand or an ordinary contractual obligation on the other?

MR. BERNSTEIN: I believe --

THE COURT: I don't want you to answer it now.

MR. BERNSTEIN: Yes.

THE COURT: I want both parties to address that when it's time.

MR. BERNSTEIN: Thank you, Your Honor.

THE COURT: Okay.

MR. BERNSTEIN: And also, Your Honor, I have attached to my affirmation about four documents, Judge Nolan's order, the consent decree, the trust agreement and the assessment. Could those be deemed marked in evidence?

THE COURT: Well, certainly marked. I assume that you mean is admitted into evidence. Any objection?

MR. MILLER: No, Your Honor.

THE COURT: No objection; they're all admitted.

(Judge Nolan's order was hereby received into evidence as of this date.)

(Consent decree was hereby received into evidence as of this date.)

(Trust agreement was hereby received into evidence as of this date.)

(Assessment was hereby received into evidence as of this date.)

MR. BERNSTEIN: Thank you, Your Honor.

THE COURT: Okay. Ms. Cordry?

MS. CORDRY: Could Attorney General's Exhibit 1 also be admitted into evidence? I'm sorry. I forgot to ask earlier.

THE COURT: Any objection?

MR. MILLER: No objection.

THE COURT: All right. It's admitted for what I understood it to be, which was to be a proposed order that was

tendered at the time. Okay.

(Attorney General Exhibit 1, proposed sale order, was hereby received into evidence as of this date.)

THE COURT: All right. Who else? Anyone? Mr. Parker?

CROSS-EXAMINATION

BY MR. PARKER:

Q. Good morning, Mr. Wilson. I'm Oliver Parker.

A. Good afternoon.

Q. Give me one second.

(Pause)

Q. I know you weren't with the government in December of 2008 when the LSA was executed, the loan and security agreement between general motors and the U.S. Treasury. But as part of your job with the Treasury since March of 2008 have you had cause to review the LSA?

A. Yes.

Q. Okay. The loan that the U.S. Treasury gave to General Motors, was that loan for the purpose of purchasing new property?

A. No.

Q. Okay. The property that was liened under the terms of that loan or mortgaged under the terms of that loan, was that property that was already owned by General Motors?

MR. MILLER: Your Honor, objection. This testimony -

- the answers to these questions are already in the record. We can stipulate to them and save a lot of time.

THE COURT: All right. You may offer a stipulation, Mr. Miller.

MR. MILLER: I would stipulate, Your Honor, that the funds were not used for the purpose of buying property to attach liens. What was the next one?

MR. PARKER: The liens --

THE COURT: Come next to him on the microphone so that whatever you said will be gotten down.

MR. PARKER: The properties that were liened were properties that were already owned by General Motors.

MR. MILLER: Correct.

MR. PARKER: And that the liens were not given to secure partial progress advance or other payments pursuant to any contract or --

MR. MILLER: So stipulate.

THE COURT: Okay. Fair enough. We can move onward.

MR. PARKER: One final question on this, maybe he wishes to stipulate that as well, that stockholder equity was -- the stockholder equity -- sorry -- the loans were greater than twenty percent of the existing stockholder equity.

MR. MILLER: No.

MR. PARKER: No. Okay.

BY MR. PARKER:

Q. In your course of work with the Treasury, have you come to review the financial statements of general motors in December of 2008?

A. In some level of detail, yes.

Q. Okay. Is it your understanding that General Motors' liabilities were in the neighborhood of 190 billion dollars?

A. That sounds about right.

Q. And their assets were in the neighborhood of eighty to ninety billion dollars?

THE COURT: You mean book value of assets or measured by some different standard?

MR. PARKER: Book value, sir.

A. Yes, on a book value basis I think both the liability number you quote and the asset number is about correct.

Q. Okay. Are you aware of any other valuation number for those assets?

A. At that point in time I'm not aware of any valuation work that General Motors had undertaken, no.

Q. Okay. Is there any reason for thinking that those assets had a greater value than book value?

A. Well, sir, as I'm sure you're aware, the book value of the assets is never a predictor of market value of the assets. So if anything the market value would almost certainly be different then the book value.

Q. Okay. Is it safe to say that at least under book value

the stockholder equity was negative in December of 2008?
A. Yes.
Q. Okay. Also, were the share prices of General Motors stock roughly between four dollars and five dollars a share in December of 2008?
A. I believe so.
Q. And since there are 600 to 650 million shares, the total market value of the shares would have been somewhere between two and a half and three and a half billion dollars, is that correct?
A. That's roughly correct.
Q. And the initial loan on December 31st was four billion, the initial advance?
A. Yes.
Q. And that would be greater than twenty percent of two and a half to three and a half billion?
A. I believe your math is correct, yes.
Q. Okay. Thank you. I believe that you stated that the United States Treasury and General Motors negotiated with regard to the master sale and purchase agreement, is that true?
A. Yes.
Q. And that they've been in negotiations since, what, March, somewhere in that area?
A. Well, not on the specifics of the MSPA, no.
Q. But of how General Motors ought to reorganize itself?

A. Well, yes there's been an ongoing dialogue between Treasury and General Motors around a range of restructuring or sale options.

Q. Okay. Is it true the General Motors management --

MR. PARKER: Strike that one second. I'm going to come back to that.

Q. There was one other thing I needed to ask you; was the United States Treasury aware, when they issued the or when they entered into the security agreement with the LSA with General Motors that there was a limitation on the liens provision in the bonds?

A. Sir, I can't speak to the Treasury's knowledge at that point in time.

Q. Okay. Did General Motors management forcefully negotiate with regard to executive retirement benefits?

A. Yes.

Q. Okay. Did they forcefully negotiate for items that they felt were important to the continuation of the business going forward?

A. Yes.

Q. Did they forcefully negotiate for what sort of payment should be given to the bondholders?

A. Yes.

Q. Who determined the ten percent figure?

A. Which ten percent, sir?

Q. The ten percent offer to the bondholders of share equity?
A. But sir, as part of the exchange offer or as part of the sale?
Q. Well, let's start with the exchange offer, as part of the exchange offer?
A. Well, the circumstances around that time, is the management team wanted to pursue an exchange offer and they felt the more equity they could offer to the bonds the greater the likelihood of success to that exchange offer. They knew that we would have to approve the terms of any exchange offer, in particular because part of the exchange offer expected or was requesting some equitization of Treasury loans. And in the context of those discussions, we told them under no circumstances are we willing to allow more than ten percent of the equity to the bonds and that we weren't sure that we would actually allow ten percent of the equity of the bonds.
Q. So the ten percent upper limit on equity in exchange for bonds was set by the Treasury?
A. Well, I think that General Motors management did not want to launch an exchange offer with no chance of success. And so they approached us and said obviously one of the conditions of the exchange offer was the commercial terms under which Treasury would agree to. And that was the basis for the discussion that is described.
Q. But General Motors wanted to give more than ten percent,

is that correct?

A. They -- yes, as I stated.

Q. And it was Treasury that decided that ten percent was the highest number that should be offered?

A. We communicated that the most we'd be willing to entertain would be ten percent.

Q. Okay. Did -- with regard to the present offer of ten percent equity in the master sale and purchase agreement, who made that determination?

A. That was a Treasury decision.

Q. Okay. Did the United States Treasury ever negotiate with the Main Street Bondholder Association?

A. I don't believe they ever approached us, sir.

Q. Okay. Is it true that in April of 2008, I believe it was the ad hoc bondholder group, made a counterproposal to General Motors of a bond exchange?

A. I don't know if they made a formal proposal, I know there was some press discussion about their desire for more equity.

Q. And they wanted to do a sixty percent exchange, is that correct?

A. I think that was roughly right. I don't remember the exact terms.

MR. MILLER: It's '09.

MR. PARKER: You're right. It's '09, I stand corrected. It was '09.

Q. Did General Motors negotiate with the ad hoc committee?
A. I don't know how much interaction they had with the ad hoc committee at that point in time.
Q. Okay. Just to be clear on something, do I understand correctly it is the intention of the United States Treasury to fully fund the administrative and priority claims of the remainder of the General Motors estate after the sale?
A. Do you mean in connection with the wind down budget we discussed earlier?
Q. Yes.
A. It is, as we said in our term sheet with the representatives of the bondholders back in May, and as I stated earlier today, it is our intention to fund reasonable expenses.
Q. Okay. So you're in negotiations to raise the figure above the 950?
A. We're in negotiations around what would be reasonable expenses, yes.
Q. Okay. Do you have -- does Treasury have any idea of how long they would expect before the stock and warrants are distributed to the unsecured creditors?
A. That is part of the discussions we're having. We understand that the creditors of OldCo would like to see that as soon as possible. We're certainly supportive of that. The question, of course, becomes how quickly could the AlixPartners folks do the work they need to do at OldCo. And we have an

incentive for them to do it in an orderly basis. The creditors of OldCo have an incentive for them to do it in an orderly basis. And we're trying to think through how that mechanic would actually work.

Q. Well if I recall correctly, Mr. Koch testified yesterday that he believed the heavy lifting could take two to three years and that further wind up could take another two to three years. What I'm curious about is it is anticipated that the unsecured creditors will have to wait until the estate is fully administered before they get their distribution?

MR. MILLER: Objection, Your Honor. Mr. Wilson's not an expert on administration of cases under Chapter 11.

THE COURT: Sustained. If you've formed a view on that, Mr. Wilson, you can tell him. But if you haven't formed a view on that, tell him that also.

THE WITNESS: I don't have a view.

Q. Okay. Mr. Wilson, is it -- am I correct in understanding that the funding for the purchase of the assets from General Motors are coming from TARP?

A. I believe --

Q. Is that a yes, sir?

A. I believe so.

Q. Okay. Is the government a commercial lender?

A. How would you define commercial lender?

Q. Are they in the business of lending money?

A. Not under normal circumstances but we're not living under normal circumstances, sir.

Q. Okay.

A. I think we'd both know if we hadn't this company would have liquidated a long time ago.

Q. I understand. I just want to know if that's -- I think you've answered your question.

THE COURT: Move on to another question please, Mr. Parker.

MR. PARKER: Yeah, I will.

Q. Did you testify earlier that no commercial lender is large enough to fund a GM restructuring?

A. I think at this point in the economic cycle that is correct.

Q. Okay.

A. As evidenced by the events of the last few months.

Q. I'd like to talk about the credit bid for a minute and the factors that would influence an allocation of shares that the Treasury's going to keep in NewCo relative to the DIP financing and relative to the pre-bankruptcy loan of 19.4 billion.

If I understand correctly, NewCo is going to have approximately -- NewCo is going to owe the U.S. Treasury a little over seven billion dollars, is that correct?

A. In the form of debt, yes.

Q. And that will be -- that seven billion dollars is from the

DIP facility, is that correct?
A. I believe so.
Q. Okay. Also, of the 33.3 billion in DIP financing, is part of that being contributed by the Canadian government?
A. A portion is being contributed by Canadian governments, the federal government and the government of Ontario.
Q. Right. Okay. By Canadian governments, a portion of it is?
A. Yes.
Q. And do you know how large of a portion?
A. I believe it's 3.2 billion dollars.
Q. Okay. So the amount of DIP financing that is being replaced by equity by the governments is roughly twenty billion, is that correct?
A. I'm not sure how you developed that math, Mr. Parker.
Q. I subtracted seven billion debt and 3.2 billion that Canada's contributed, because they're also getting equity. And when you subtract it from 33.3 billion that leaves twenty billion.
A. I would have thought closer to twenty-three.
Q. You're right, twenty-three. But isn't General Motors also getting -- I'm sorry, not General Motors. Isn't the United States Treasury also getting two billion in preferred stock?
A. It's just over two billion, yes.
Q. Okay. So when you subtract that out, that would leave

twenty-one, is that correct?

A. Roughly.

Q. So the split between DIP financing that's being converted to equity and old loans that's being converted to equity is something like a fifty-five/forty-five split. The fifty-five being for DIP, the forty-five being for old debt.

A. We haven't thought about it that way, sir.

Q. Okay. But it would be one way to think about it?

A. No, not necessarily. I guess it would be a conceivable way to think about it but we also could have structured it in a range of different ways. We thought about it as was the sum total of our investment/loan into the company.

Q. Okay. So you really haven't done an analysis one way or the other?

A. I think I testified to that earlier.

Q. Right. Okay.

MR. PARKER: I believe that's all I have. Thank you.

THE COURT: Has everybody now had a chance to --

MR. SALZBERG: Your Honor.

THE COURT: Mr. Salzberg?

MR. SALZBERG: Yes, we had reserved a right on one specific issue, if I may?

THE COURT: You May.

MR. SALZBERG: Your Honor, I'd like to mark for the record Bondholders' Exhibit 4. And if I may approach?

(Bondholders' Exhibit 4, printout of an article released by The Detroit News on their website, was hereby marked for identification as of this date.)

THE COURT: Yes.

(Pause)

CROSS-EXAMINATION

BY MR. SALZBERG:

Q. Sir, have you had a chance to read this? What is Bondholders' Exhibit 4?

A. Yes.

Q. And you see that it is a printout of an article released today by the Detroit News on their website?

A. That's what it appears to be.

Q. Okay. And you would agree with me, would you not, that what the article addresses is the July 10th deadline which we discussed earlier today in your testimony, that being the deadline set by the U.S. Treasury for entry of the sale order?

MR. MILLER: Objection, Your Honor. The article is a report on the proceedings that happened before the Court yesterday and a description of those proceedings.

THE COURT: Well, if your point is what happened before me as the best evidence and that the article is hearsay, I agree. So, Mr. Salzberg, I've got to figure out where you're going to see whether you're relying on some hearsay exception or something for which this is probative evidence of something

I should be assuming as prohibited.

MR. MILLER: I would also add, Your Honor, that this morning counsel said -- I believe the question that was propounded was would Mr. Wilson agree with Mr. Henderson saying that the government would not walk. The article doesn't refer to Mr. Henderson saying anything in that respect, Your Honor.

THE COURT: I'll need help from you on this respect, Mr. Salzberg.

MR. SALZBERG: I'm sorry?

THE COURT: I need help from you --

MR. SALZBERG: Yes.

THE COURT: -- from you to address the points Mr. Miller raised on how to rule on this.

MR. SALZBERG: The first issue is, Your Honor, I asked the witness whether or not the U.S. Treasury's position on the July 10th deadline was at odds with public pronouncements made by General Motors. And I specifically referenced some news articles. And then I said that we did not have the articles since they just were released this morning. So that's what we were talking about this morning and that's what we reserved our right to come back and ask the witness about this afternoon.

On the second issue regarding the hearsay, if I may, we're not introducing this exhibit into evidence at this point. I've just asked him to identify it and if I can point him to

one section of the article and ask if that section of the article is consistent or inconsistent with the U.S. Treasury's position as testified to by Mr. Wilson earlier today.

MR. MILLER: It's still -- it's double hearsay, Your Honor.

THE COURT: Sustained.

MR. SALZBERG: May I attempt to ask a question and get around the hearsay issue because we're not introducing this exhibit to prove the truth of the matter asserted.

THE COURT: I only ruled on the last objection. You can ask another question and I'll rule on it if there's a further objection.

BY MR. SALZBERG:

Q. Mr. Wilson, would you take a look at the top of page 2 of the article and the first paragraph that reads, "While the government could stop funding GM" --

MR. MILLER: He's introducing it into the record, Your Honor, that's not the way you do it.

THE COURT: You're right, Mr. Miller. The way you've got to do this, if I remember from the twenty years I did this before I became a judge, permit the witness to read it to himself without putting it before the judge. Obviously, there's a little bit of a fiction because I have the exhibit before me. The distinction would be more meaningful if this were a jury trial, obviously.

MR. SALZBERG: Right.

THE COURT: In this case, the witness can read it and you can ask him a question premised on what he read without taking his statement as being established or as refreshing his recollection. But this is not evidence as to either what the GM's spokeswoman said, intentionally being a little bit vague or whether what she said was true. If there is a memory that the witness has, you can ask him that. If there is a non-repetitive understanding that he has that hasn't been previously asked, you can ask that.

But Mr. Miller is right that depending on the portion of it, this article is hearsay, double hearsay or perhaps hearsay and speculation. And it doesn't have any value in establishing that you asked a question in good faith.

MR. SALZBERG: Okay. Well, with that in mind I would ask Mr. Wilson to read the first paragraph on page 2. And my question to Mr. Wilson is --

Q. Is that section that you just read inconsistent with your prior testimony today as to the Treasury's position on the July 10th deadline?

A. I'll answer it this way, Mr. Salzberg. I've spent hundreds of hours inside this company. I've met probably upwards of a hundred executives. I know, you know, the vast -- I know probably well north of a hundred executives on a first-name basis. I have never once met, nor even heard the name,

Renee Rashid Marren (ph.) before. I have no idea who she is and under whose authority she speaks. She clearly has absolutely no insight into the position of the United States auto task force.

Q. Again, my question, sir, is the statement that you read consistent or inconsistent with the U.S. Treasury's position to which you testified earlier today?

A. Her statement is inconsistent with what I testified to earlier. But as you can tell, it's not even a complete sentence. And what I don't know is what she may have said in the either lead up to this quote that was quoted, if the quote is accurate or if she said a bunch of other things that aren't incorporated into this article.

Q. So would the U.S. Treasury be motivated to continue funding if the July 10th deadline is not met, given the amount funded to them at that point?

MR. MILLER: On the basis of this newspaper article?

MR. SALZBERG: No.

THE COURT: Is that a free-standing question?

MR. SALZBERG: Free-standing question, Your Honor.

MR. MILLER: Objection, Your Honor.

THE COURT: All right. The objection is then moot. Let me hear that -- that objection is moot but I need to hear the question again, Mr. Salzberg.

Q. Would the U.S. Treasury be motivated to continue funding

General Motors if the July 10th deadline for entry of the sale order is not met?

MR. MILLER: Objection, Your Honor. He's answered that question four or five times today.

THE COURT: Sustained.

MR. SALZBERG: I have no further questions, Your Honor.

THE COURT: Have I now given all objectors a chance to cross? All right. Mr. Miller or anyone else want to redirect? Mr. Schwartz or Mr. Jones?

MR. SCHWARTZ: Could we confer for one moment?

THE COURT: Sure. Try to do it in place, though. I don't want to take a recess.

(Pause)

REDIRECT EXAMINATION

BY MR. SCHWARTZ:

Q. Mr. Wilson, when Treasury extended its first loans to GM under the LSA in December of 2008, did it have an expectation of being repaid?

A. I wasn't at Treasury at that time.

Q. Have you subsequently come to have an understanding about whether Treasury had an expectation that it would be repaid?

A. Yes.

Q. And what is that understanding?

A. That based on both the collateral package for the loans as

well as the seniority of the loans and the prospects for General Motors' business, yes that the loan would be repaid.

Q. You referred to the collateral package; did Treasury have a view as to whether it was adequately secured under the loans extended pursuant to the LSA?

A. I don't know if there was a specific analysis done around the value of the security package at that point in time.

Q. Okay. Do you have a view as to whether Treasury was oversecured, undersecured?

A. The only view I have now is the liquidation analysis that was done by Mr. Koch who suggests we were, in retrospect, undersecured.

Q. In response to Mr. Salzberg's first line of questioning, you talked about the decision to pursue a 363 transaction as opposed to a plan, do you recall that?

A. Yes.

Q. What was GM's involvement in that decision?

A. Well, we pursued -- we considered a variety of different options. We had extensive discussions with the management team to try to understand the implications for the business. The ways in which it could be effectuated; obviously in the course of a 363 sale there would significant operational issues regarding the separation of assets from Old General Motors. And so we had extensive discussions along those lines.

Q. And was the ultimate decision to pursue a 363 transaction

a decision that was made jointly with General Motors?
A. No, it was really a decision by the Treasury.
Q. Okay. Subsequently to making that decision, did General Motors and Treasury enter into negotiations on what became the MSPA?
A. It was parallel tracked but yes.
Q. And could you describe the tenor of those negotiations?
A. Contentious, often difficult, sometimes exasperating.
Q. Could you elaborate on what particular subjects were the negotiations contentious?
A. Well, there are a number of issues where we, as the purchaser, as I mentioned many times earlier, were only willing to acquire -- we wanted to acquire the best assets and we want to only acquire the liabilities that we thought were commercially necessary for the success of NewCo. And there's, kind of, much discussion around both the assets as well as the liabilities.
Q. After General Motors filed for bankruptcy, the United States extended further credit pursuant to a DIP facility, is that correct?
A. Yes.
Q. And the funds for both the LSA and the DIP were TARP funds, is that right?
A. I believe so.
Q. The transaction that's before the Court today, the 363

transaction, does that involve any additional funding from Treasury?

A. I don't believe so. No.

Q. It's a pure credit bid, is that correct?

A. Yes.

Q. So in response to Mr. Parker's questioning, when he asked whether the assets for the purchase of GM came from TARP, you were referring to the loans that were extended under the DIP and the LSA, is that right?

A. Yes.

Q. Okay. You testified, on a few occasions, that Treasury had no intention to fund General Motors after July 10th if the sale order is not entered, is that right?

A. Yes.

Q. Why not?

A. Well, it goes to the core principle or concern about any Chapter 11 proceeding, which is that this business cannot withstand the uncertainty of an open-ended process or a process of uncertain duration. We did an extraordinary amount of work, sir, on this issue in the months leading up to June 1. We talked to, as I mentioned earlier, dozens of experts, advisors, consultants, industry experts, who collectively had thousands of years of experience in the automotive industry, as well as, obviously, the management team at great length. And throughout that period of time, I -- as I mentioned earlier, I can't

recall a knowledgeable consultant or expert who thought that General Motors could survive a bankruptcy. There were tons of critical articles written about us as the cowboys in Washington who don't understand the business, who felt that this was a recipe for a disaster and that, even after the successful resolution of the Chrysler case in early May, there are articles to that effect that General Motors is far too large, far too complex and far too complicated to be able to survive a Chapter 11 process.

So when -- that was what animated much of our thinking around a 363 sale, as we discussed, and that is what our concerns are about any kind of change to the process. General Motors' market share today is dramatically lower than it was a year ago before the financial distress entered in. Market share this time last year was about twenty-two percent. It's a little bit over eighteen percent now. That's a massive erosion. And that was based on the fears of distress and despite the intervention of the U.S. Treasury. I imagine if there was concern about how that would play out over time, it would only be dramatically larger, in our estimation.

So that's why we cannot take an open-ended commitment. We have a fiduciary duty to the U.S. taxpayers. We've made a judgment that the funding associated with this process was appropriate but that any incremental funding we are not willing to provide.

Q. Now, I notice in your response you did refer to the liquidation analysis that was performed by AlixPartners. You're familiar with that?

A. Yes.

Q. And that shows that the government's recovery on its secured claims in a liquidation scenario would be not good, is that right?

A. I think "not good" is a fair characterization.

Q. Does that affect Treasury's ability to fund -- Treasury's inclination to fund further if a sale order is not entered by July 10?

A. Well, the way we look at this, and the reason we look at it the way we do, is it's better to cut one's losses and that, while we would certainly have substantial losses if GM entered into a liquidation in July, for sure we'd have extremely significant losses. We believe that that is an economically more rational decision than funding into an open-ended process whereby the losses could be much, much more dramatic.

Obviously, entering into that process, sir, there are no certain outcomes. It could be that we fund even more money and have no more of a recovery and therefore lose more. It could be that we fund more money and have an outcome that's not commercially satisfactory to the U.S. Treasury. There are a whole range, in fact arguably an infinite number, of outcomes that many of which could lead to much more substantial losses.

Q. Now, in response to questioning by the representative of the state's attorney general, you remember about big (C) Claim versus little (c) claim?

A. Yes.

Q. You said that Treasury hadn't made a determination about whether it would fund if the sale order released little C claims but not big C Claims; remember that?

A. Yes.

Q. And then another questioner asked you about the 62,000 dollars, what Treasury would do if that were a de minimis payment. Do you recall that?

A. Yes.

Q. I believe you testified earlier that Treasury was in the process of considering or maybe had already considered all of the objections that had been filed to the sale, is that correct?

A. Yes.

Q. And that you and your designates and your counsel were negotiating a final version of the sale order, is that correct?

A. Yes.

Q. And is it your expectation that that final sale order, when it is submitted to Judge Gerber, will reflect the Treasury's final position on all of the objections that have been filed?

A. That's correct.

Q. And if that final order, as it reflects Treasury's resolution of all of the objections that have been filed, is not entered on or before July 10th, does Treasury have an intention to fund?

A. No.

MR. SCHWARTZ: Thank you.

THE COURT: Okay. Anybody else on redirect? Mr. Miller?

REDIRECT EXAMINATION

BY MR. MILLER:

Q. Mr. Wilson, prior to your joining the Treasury, what was your occupation?

A. I was an investor, sir.

Q. And what does that encompass?

A. Well, I spent virtually all of my career post-college investing in companies, many of which, in most cases, that were troubled.

Q. Distressed companies?

A. Oftentimes, yes.

Q. And often on the side representing a secured investor?

A. Typically, yes.

Q. And in your --

A. More often, yes, excuse me.

Q. I'm sorry.

A. I'm sorry, I meant to say "often". I didn't -- I

shouldn't say "typically".

Q. And in your experience over the course of years as a secured creditor representing a secured creditor, have you found it unusual for a secured creditor to lose confidence in a CEO?

A. Unfortunately, no. It happens all the time.

Q. And what does a secured creditor do in those kind -- in that circumstance?

A. It depends on the situation. If there are no -- there's no breach of covenants or no need for incremental capital, a secured creditor could complain. But in the events where, as I faced a number of times in my past, where the company requires additional funding or is in violation of a covenant or some other term of the loan agreement, it would be typical for that lender to indicate their dissatisfaction with management and indicate they're not willing to fund unless certain things take place.

Q. And in connection with this situation, Mr. Wilson, the -- after February 7, the viability plan that General Motors had submitted was deemed to be inadequate by the Treasury?

THE COURT: Pause, Mr. Wilson. Mr. Richman's --

MR. RICHMAN: I apologize.

THE COURT: Come to a microphone, please.

MR. RICHMAN: I listened to a few of the questions to try to understand where this is going. I don't really think

there's any foundation in the record for this witness to be qualified as an expert in connection with his prior experiences. There isn't anything of record that really explained -- he said he was an investor and, from that, Mr. Miller extrapolated that he had some knowledge of how secured creditors act. I don't believe there's any foundation for that and I would ask that the background and foundations be laid before we continue with this line of questioning.

THE COURT: All right, well, there's a Second Circuit case on point and which I relied on; I think it was the Perry Koplik case. You're right that he can't give lay-opinion testimony. There is some room under Second Circuit authority, and I'd have to take a recess to get the name of the case that I cited in Perry Koplik for observations that were made. But on balance, Mr. Miller, if he's trying to talk about what's common in the industry, you have to lay a foundation for what he knows about the industry.

MR. MILLER: No, Your Honor, I asked him what his -- in his experience as an investor and a secured creditor, in the course of his career, his experience, not common in the industry.

THE COURT: The problem, Mr. Richman, is you put into issue whether the government was acting unusually when it expressed its concerns about Mr. Henderson's predecessor.

MR. RICHMAN: Your Honor, I agree with that. I just

don't understand, from the record so far, what this particular witness's experience actually is. I don't know who he worked for, how many years, how many transactions like this he was involved in. Are we talking about --

MR. MILLER: He could take him, Your Honor.

MR. RICHMAN: -- two cases? Are we talking about ten cases? That's the kind of foundation I would need.

THE COURT: I'm going to sustain the objection on this record, but I'm going to let you inquire more, Mr. Miller, as to his ability to observe. And you're not to ask him a question of opinion. You're only to ask him a question as to what he observed.

MR. MILLER: Yes, sir.

BY MR. MILLER:

Q. Mr. Wilson, would you briefly describe to us your business experience since graduating from college?

A. Sure. I graduated from Harvard College in 1993. I went to work in the investment banking division of Goldman Sachs, which involves a number of advisory transactions, and assessed a number of principal transactions. At that point I transitioned to a full-time investment role for the balance of my career, first at a firm called Clayton Dubilier & Rice, with a break to attend Harvard and graduate from Harvard Business School. I then joined The Blackstone Group in the private equity division and then left there to help build a firm called

Silver Point Capital, which is extraordinarily active in distressed and troubled situations.

Q. And during -- how many years were you at Silver Point Capital?

A. I was at Silver Point for about five -- a little bit over five years.

Q. And during that period of time, you were involved in situations involving distressed entities?

A. Many situations, yes.

Q. In which Silver Point had an investment?

A. Yes. And during that period of time, Silver Point, through its principal finance business where I sat on the investment committee for that business, and it was the investment committee that approved all the loans of that business, probably made between fifty and a hundred secured loans, typically to distressed companies.

Q. And in connection with circumstances involving distressed companies, what did you observe in terms of workouts and restructurings as to the eventual disposition of the CEO?

A. It would depend on the circumstances. But in situations where the lender no longer had confidence in the management team, and particularly the CEO, and that company was either -- needed capital from us, additional capital beyond what had already been lent, or was in violation of a covenant or some other breach under the agreement, we would be not shy about

communicating our position.

Q. Thank you. Now, in connection with Mr. Henderson, Mr. Wilson, has the Treasury offered Mr. Henderson any contract of employment?

A. I believe Mr. Henderson realizes and knows that we intend for him to be the CEO, but I don't believe we've offered a contract.

Q. Do you know if Mr. Henderson has an employment contract now?

A. I do not think he does.

Q. Has the Treasury offered employment contracts to any of the executives at GM who may be going to New GM?

A. Not at this point in time, no.

Q. Who is Mr. Ron Bloom?

A. He is a colleague of mine on the auto task force.

Q. And did Mr. Bloom participate in all of the negotiations concerning General Motors?

A. A very small number.

Q. In the negotiations with the UAW, who participated in those negotiations?

MR. RICHMAN: Your --

THE COURT: All right, pause.

MR. RICHMAN: Your Honor, I think we're beyond anything that was covered in cross, so I really don't know where this is going. But I --

THE COURT: Sustained, unless you can come back closer to what we --

MR. MILLER: Okay.

THE COURT: -- covered in cross, Mr. Miller.

Q. Mr. Wilson -- I'm sorry, Mr. Wilson, you were cross-examined in connection with the agreement made with the UAW VEBA?

A. Yes.

Q. Do you remember that?

A. Yes.

Q. And the shares of stock in NewCo which will be given to the VEBA?

A. Yes.

Q. Who's giving those shares of stock to the VEBA?

A. NewCo.

Q. And NewCo is the Treasury-sponsored entity?

A. Yes.

Q. And that's coming out of the shares that are being acquired by the Treasury in NewCo?

A. That's correct.

Q. Does the Treasury have any plans as to the disposition of its equity position?

A. Well, certainly over time we anticipate selling our shares.

Q. Is there any contemplation of an IPO?

A. We're anticipating an IPO sometime in 2010.
Q. 2010, thank you. Mr. Parker examined you about the credit bid. Do you remember if -- were you here during the testimony of Mr. Worth?
A. Yes, I was.
Q. And did you hear Mr. Worth testify as to the estimated purchase price?
A. I believe so. I wasn't, frankly, paying complete attention to it, but I do remember him talking about it briefly.
Q. Do you recall Mr. Worth using a figure of ninety-one-plus billion dollars as the net purchase price?
A. No, actually I don't recall that.
Q. In connection with the purchases, the Treasury -- excuse me, has New GM assumed liabilities?
A. Yes.
Q. So that the purchase price includes a series of elements: the credit bid, the assumption of liabilities, the stock which is going to OldCo?
A. Yes.
Q. And has the Treasury done a calculation as to what that total purchase price would be?
A. We have not.
Q. Are you familiar with the Chapter 11 case of Delphi Corporation?

A. Yes.

Q. Is the Treasury involved in that Chapter 11 case?

A. We're involved and to the respect of we -- in working with General Motors to provide the funding that will be associated with that case.

Q. And do you know how long that Chapter 11 case has been pending?

MR. RICHMAN: Your Honor, I have to object --

A. I believe a file --

THE COURT: Wait.

MR. RICHMAN: -- to this line. Again, I don't see what relevance this has to anything that we've had on record or the motion.

THE COURT: Mr. Miller?

MR. MILLER: Your Honor, the Treasury is intimately involved in the Delphi case. The Delphi case is a Chapter 11 case which was supposed to be confirmed two years ago.

THE COURT: All right, I don't want you to testifying, but you've satisfied me that it's relevant and it's within the scope of cross. So the objection's overruled, but I don't want you testifying --

MR. MILLER: Yes.

THE COURT: -- Mr. Miller. It's got to come out of Mr. Wilson, a witness.

BY MR. MILLER:

Q. Mr. Wilson, do you know how long the Delphi case has been pending?

A. I believe they filed in the fall of 200 -- well, it's three and a half -- little bit over three and a half years ago, so the fall of 2005.

Q. October of 2005?

A. That sounds correct.

Q. And is the Delphi case administratively solvent?

A. Delphi's been on the verge of liquidation for, in my opinion, months.

MR. MILLER: Thank you, Your Honor. That's all.

THE COURT: Anybody else for redirect?

Any recross?

MR. RICHMAN: One second, Your Honor.

THE COURT: Mr. Richman, sure.

MR. RICHMAN: No, Your Honor.

THE COURT: Any other --

MR. JAKUBOWSKI: I have one --

THE COURT: Mr. Jakubowski, come up, please.

RECROSS-EXAMINATION

BY MR. JAKUBOWSKI:

Q. Mr. Wilson, on redirect you were -- you said that the auto task force decided to pursue the sale and made decisions about the separation of assets and liabilities, right?

A. Yes.

Q. And you had said that what, quote, "we wanted to do was to acquire only the commercially necessarily liabilities for the success of the business," correct?

A. Yes.

Q. So I'd like to understand a little bit of just who "we" is, or "we" are. So the auto task force is comprised primarily of four individuals, right, in terms of the decision-makers?

A. Well, I'm not sure which four you're --

Q. Well, let me ask this. The auto task force is a division of Treasury?

A. I don't -- to be honest with you, I have no idea --

Q. It's --

A. -- how the bureaucracy works.

Q. But it is part of the executive branch, correct?

A. Yes.

Q. And the head of the executive branch is President Obama, correct?

A. Yes.

Q. Now, has anyone --

MR. SCHWARTZ: Objection. This is really quite beyond the scope of redirect.

MR. JAKUBOWSKI: I have one final question, Your Honor, with respect to the question of "we", and that's it.

THE COURT: Why don't you go back to that question, then?

MR. JAKUBOWSKI: Okay.

Q. Was the head of the executive branch, President Obama, ever advised about the treatment of preexisting product liability --

MR. SCHWARTZ: Objection.

Q. -- claims in the sale?

MR. SCHWARTZ: Objection. That's privileged.

MR. JAKUBOWSKI: I just asked whether he was advised. I didn't ask --

MR. SCHWARTZ: Objection. There's a presidential privilege.

THE COURT: Sustained.

MR. JAKUBOWSKI: I have no further questions, Your Honor.

THE COURT: Okay. All right, any re-redirect? All right, Mr. Wilson, you're excused.

THE WITNESS: Thank you.

THE COURT: It's now about 1:20. Mr. Kennedy, you're rising to cross whom?

MR. KENNEDY: No, Your Honor. I'm not rising to cross anyone. I'm rising on a sort of a housekeeping matter because I had a sense that we might be moving into a break. And I have a number of witnesses that have been here, prepared to be available for cross-examination, which I don't think will occur, in connection with declarations.

THE COURT: Well, you're reading my mind, Mr. Kennedy, because I wanted to get my arms around who we have left to cross. And if there are people who are not going to be crossed, subject to your rights to be heard, I'm of the view that I should excuse them from having to be in the courtroom. That's kind of your point, Mr. Kennedy?

MR. KENNEDY: Exactly, Your Honor.

THE COURT: Okay. Mr. Miller or the folks on the movant's side, you made a motion to strike the testimony -- or to exclude the testimony of what I think were Mr. Kennedy's folks. My tentative (sic) on that, subject to your right to be heard, and I won't make Mr. Kennedy respond unless you want to push it --

MR. KENNEDY: Your Honor --

MR. MILLER: It wasn't Mr. Kennedy, Your Honor.

MR. KENNEDY: -- there is no such motion.

THE COURT: I'm sorry? I thought I got an indication of a desire to exclude those affidavits --

MR. MILLER: No, Your Honor.

THE COURT: -- a written document to that effect. I'll try to find it.

MR. MILLER: Hold on just a moment, Your Honor, if you may.

THE COURT: Sure.

UNIDENTIFIED SPEAKER: Well, it's a big firm, but at

least Mr. Miller has said he's not prepared to --

MR. MILLER: Your Honor, if there was such a motion it's withdrawn.

THE COURT: Fine. Is there a desire to cross-examine Mr. Kennedy's folks?

MR. MILLER: Not by the debtors, Your Honor.

THE COURT: Is there a desire by anybody to cross-examine Mr. Kennedy's folks?

UNIDENTIFIED SPEAKER: No.

THE COURT: All right. With no response, Mr. Kennedy, your guys' declarations or affidavits or whatever they are, are deemed to be part of the record and cross has been deemed to be waived. You can tell them, if you choose to, that they needn't stay, but if they want to stay they may.

MR. KENNEDY: Thank you, Your Honor. Just for the record, that constitutes the declarations of James Clark, Debra Turner, Dennis Bingham, David Hill, Earl Williams, Joe Patrick, Betty Humphrey and John Humphrey, all of which have previously been put onto the docket of the case. And I'll just note that we are also of course moving for the admission of Exhibits 9 through 12, which is the large book that had previously been tendered to the Court and, in fact, a number of parties have used during this proceeding.

THE COURT: All right. Is there any objection to or disagreement with what Mr. Kennedy said?

MR. MILLER: No, Your Honor.

THE COURT: All right, hearing none, your stuff is admitted, Mr. Kennedy. And my ruling on what your folks get into, if they choose to, remains.

(IUE-CWA's Exhibit 9, transcript of deposition of Michael Raleigh dated 6/28/09 and supporting documents, were hereby received into evidence as of this date.)

(IUE-CWA's Exhibit 10, transcript of deposition of Fritz Henderson dated 6/28/09 and supporting documents, were hereby received into evidence as of this date.)

(IUE-CWA's Exhibit 11, transcript of deposition of Harry Wilson dated 6/25/09 and supporting documents, were hereby received into evidence as of this date.)

(IUE-CWA's Exhibit 12, IUOE documents, were hereby received into evidence as of this date.)

THE COURT: Okay, to what extent, folks, do we have further cross at this point?

MR. BROMLEY: Your Honor, James Bromley of Cleary Gottlieb on behalf of the UAW. We also have a declaration of David Curson to be offered into evidence, and he's available for cross. We just wanted to --

THE COURT: Right.

MR. BROMLEY: -- clarify that.

THE COURT: Is there any objection to the Curson declaration being taken as his direct testimony?

MR. MILLER: Not by the debtors, Your Honor.

THE COURT: And not by anybody. Okay, the Curson declaration is in as direct testimony. Is there a desire to cross Mr. Curson?

MR. RICHMAN: Yes, Your Honor.

THE COURT: Okay. Mr. Richman, what's your extent as to how long you want to take to do that, you or your partner?

MR. SALZBERG: Your Honor, ten, fifteen minutes at most.

THE COURT: What I think I would like -- and thank you, Mr. Salzberg. Is there anybody who is going to see a need to cross-examine anybody besides Mr. Curson? I think we've covered all of the declarants, if I'm not mistaken. No response. What we're going to do, Mr. Bromley, Mr. Salzberg, we're going to take -- I'm going to take Mr. Curson on cross now. That should complete all of the testimonial evidence unless the debtors have rebuttal beyond what they did by redirect. Mr. Miller, do you have a sense as to whether you will?

MR. MILLER: I doubt it, Your Honor.

THE COURT: Okay. Then what I would be of a mind to do is to take -- let people have a lunch break, about an hour, and to get into argument after the lunch break. Mr. Parker?

MR. PARKER: Your Honor, I had attached to my original declaration two determinations by the Treasury

Department, and I'd like them to be admitted.

THE COURT: What exactly are we talking about?

MR. PARKER: It's in regard to the TARP issue, Your Honor. I simply wish the record to show that Treasury had -- well, what the position of the Treasury had been on TARP on two particular occasions.

THE COURT: What I think I would like you to do -- if you're talking about documents out of government files, it's possible that it's an evidentiary matter, putting aside your standing issues. You and Mr. Schwartz can agree on whether or not I should take judicial notice of them. If there are particular exhibits that are of a different character, I need to have a dialogue on what they are so I can make the necessary evidentiary rulings.

MR. PARKER: All right, I'll --

THE COURT: But frankly, folks, I have Mr. Curson waiting to be crossed here.

MR. PARKER: Right. Okay.

THE COURT: And I think, out of courtesy to him and to all the other lawyers in the room, the other two or three rooms, the overflow rooms, I would like to complete the opportunities for cross and redirect of Mr. Curson. And then it might make sense for you and Mr. Schwartz to talk over the lunch break to see whether he has any problems with your exhibits. And when I said "Mr. Schwartz", I didn't mean to

exclude anybody else, but I assume he's the guy who's principally going to care about that.

MR. PARKER: Right. Thank you, Your Honor. I just thought I should bring it up now.

THE COURT: Sure. I understand. Okay, is --

MR. MILLER: Your Honor, one housekeeping detail.

THE COURT: Yes.

MR. MILLER: I'd like to move into evidence, Your Honor, the affidavit of service of the Garden City Group Inc.

THE COURT: Could you come closer to a mic --

MR. MILLER: Yes.

THE COURT: -- because I didn't hear you.

MR. MILLER: I would move to admit into evidence, Your Honor, the second amended certificate of service of Jeffrey Stein, the vice president of business reorganization with the Garden City Group Inc.

THE COURT: Okay. Any objection? No objection. It's admitted.

(Debtors' Exhibit 17, second amended certificate of service of Jeffrey Stein of the Garden City Group, was hereby received into evidence as of this date.)

MR. MILLER: That would be, I think, Your Honor -- that is Exhibit 17.

UNIDENTIFIED SPEAKER: Yes.

MR. MILLER: Thank you, Your Honor.

THE COURT: Okay.

MR. SCHWARTZ: And just so the record is clear on the other issue, the two determinations that Mr. Parker were referring to were attached as exhibit to the government statement on the opening day and can be incorporated into the record here without objection, or, as you did at the DIP hearing, you can take judicial notice of the two determinations.

THE COURT: Either way, then, it's in. And that's no longer a matter of dispute between you and Mr. Parker?

MR. SCHWARTZ: Exactly, subject to, as Your Honor said, the arguments about standing and relevance.

MR. PARKER: So they're a part of the record now?

THE COURT: The two documents Mr. Schwartz was talking about are, yeah, but I got the impression that you had another two, Mr. Parker.

(Two Treasury Department determinations were hereby received into evidence as of this date.)

MR. PARKER: No, no, just those two.

THE COURT: All right, then that discussion --

MR. PARKER: I mean, plus the one I'd already introduced, Parker's Exhibit 1.

THE COURT: Fair enough.

MR. PARKER: Would these bear exhibit -- his exhibit numbers or what?

THE COURT: I don't think it makes a whole lot of difference, folks, what numbers are given to exhibits. Okay. Is Mr. Curson here -- oh, Mr. Eckstein?

MR. ECKSTEIN: Your Honor, I'm sorry, I understand that you'd like to hear Mr. Curson, and I have no objection to that. Once he concludes, I'd like to just address the Court with respect to some issues regarding the closing arguments but I thought I would do it after the testimony.

THE COURT: Absolutely. Mr. Curson, come up, please. Come on over here, please, Mr. Curson, and remain standing for a minute. Karen?

THE CLERK: Please raise your right hand.

(Witness duly sworn)

THE COURT: Have a seat, please, Mr. Curson. Mr. Salzberg, whenever you're ready.

MR. SALZBERG: Thank you, Your Honor.

CROSS-EXAMINATION

BY MR. SALZBERG:

Q. Good afternoon, Mr. Curson.

A. Good afternoon.

Q. Just a few questions. You are -- your declaration's proffered on behalf of the UAW, is that correct?

A. That is correct.

Q. Okay. And the UAW had a collective bargaining agreement with General Motors pre-petition, is that correct?

A. We did.
Q. And that CBA, we'll call it, was amended on, I believe, in May of 2009, is that correct?
A. That is correct.
Q. So, prior to the petition date, the CBA was amended?
A. Yes.
Q. Okay. How is the CBA -- procedurally, how was the CBA amended?
A. How was the CBA amended? In December of 2008, Chrysler and General Motors came to us; they had requested a bridge loan from the government in order to survive. The bridge loan -- the terms of the bridge loan set a number of targets that General Motors and Chrysler had to meet in order to receive bridge loans. Some of those targets included being competitive, having labor agreements that were competitive with transplants; that's foreign-owned auto manufacturers that are located in the United States. They approached us and required to bargain amendments to the 2007 labor agreement in order to meet those targets, in order to get the bridge loans, in order to survive. So we agreed and we entered into the negotiations.
Q. Okay. And once the parties -- the parties being the UAW and General Motors -- reached agreement, was the proposed amended CBA submitted to the union members for ratification?
A. Well, it's a little more complicated than that. We reached an initial tentative agreement in February, February

17th, which we thought met the targets of the terms of the loan agreement. And shortly thereafter, President Obama said that -- that labor agreement was folded into a plan, an overall plan by both General Motors and Chrysler, and submitted to the government for their proposal to be a company that could survive after the loans.

President Obama came out and announced on March 30th, I believe was the date, that the companies didn't go far enough and the labor agreements didn't go far enough, and we were charged with the responsibility to go back in and renegotiate what we had already negotiated as an amendment to the 2007 agreement, which then -- we began -- in ultimately about May 23rd we reached a tentative agreement, the second tentative agreement that we presented to our members for ratification.

Q. Okay. And so, just so I'm clear, the amended CBA was submitted to your membership for ratification sometime after May 23, 2009?

A. That is correct.

Q. And when was the amended CBA actually ratified?

A. It was ratified -- the vote was consolidated and announced on May 29th.

Q. And when did the --

MR. SALZBERG: Well, strike that.

Q. Is the amended CBA now in place?

A. The amended CBA is effective now, yes.

Q. When did it become effective, sir?
A. The Monday following ratification.
Q. Do you know the date?
A. I don't know the date --
Q. Okay.
A. -- but I --
Q. Was the effectiveness of the amended CBA contingent upon anything happening apart from ratification?
A. Certainly. All of the amendments are considered ratified based on the terms of ratification. That means all of the components of the amendments were voted on in ratification by our members. That meant our members couldn't -- and as an example, the collective bargaining agreement versus the VEBA, the agreement for our retirees' health care, they were two major components of the agreement, but they were voted on in one vote. Our members had to vote it up or vote it down. And if either one -- if there wasn't compliance with either one, we would consider the amendments not ratified and not in play.
Q. So is it -- I'm sorry, sir, is it your testimony that there is a provision within the amended CBA that says if the new VEBA agreement is not approved by the Court, the amended CBA is not effective?
A. We would consider it -- yes, if it -- if the new VEBA -- if the terms of the agreement -- if the health care for our retired members was not going to be provided for any reason, if

the Court denied the VEBA, if the company couldn't fund the VEBA or couldn't fund at any point, that they couldn't deliver what they agreed to deliver to our retired members, we, at that point, would have a right to withdraw all of the amendments to that agreement.

Q. Okay. And are those terms regarding the UAW's right to withdraw from the CBA, are they contained in a memorandum of understanding?

A. They're in the settlement agreement.

Q. In the UAW retiree settlement agreement?

A. It's in the settlement agreement for the amendments for the collective bargaining agreement that we signed on the 29th.

Q. I'm sorry, sir, is that attached -- is that agreement attached to your declaration?

A. Yeah, I believe it is, yes. It's in with the white book.

Q. Yeah.

(Pause)

Q. Well, there are multiple attachments to your declaration. Do you know --

A. It's entitled "The White Book". I don't have it with me. I don't have it in front of me.

MR. SALZBERG: It's in the declaration? Okay.

(Pause)

A. Okay, I have it here.

Q. Does it bear a page number on the bottom?

A. It's -- it looks like an "i".

MR. SALZBERG: If I may approach, Your Honor.

A. Roman numeral i.

THE COURT: Yes, you may approach.

Q. All right. And so, sir, you pointed to the 2009 modifications to the 2007 UAW/GM agreement, contract settlement agreement, dated May 17th, 2009, is that correct?

A. That is correct.

MR. SALZBERG: May I approach, Your Honor?

THE COURT: Yes.

Q. And just so the record's clear, it is the UAW's position that if the -- that that agreement provides that if the new VEBA is not approved by the bankruptcy court in the UAW retiree settlement agreement, the amendments to the collective bargaining agreement can be nullified?

A. That is correct.

Q. Okay. All right.

MR. SALZBERG: No further questions, Your Honor.

THE COURT: Okay. Anybody else want to question Mr. Curson? Mr. Bromley, any redirect?

MR. BROMLEY: No redirect, Your Honor. Just to move admission of the declaration and exhibits into evidence as UAW-1.

THE COURT: Okay. Any objection?

MR. MILLER: No objection.

THE COURT: No objection. Hearing no objection, it's admitted.

(UAW-1, declaration of David Curson and accompanying exhibits, was hereby received into evidence as of this date.)

MR. MILLER: Beyond Mr. Bromley, does anybody have redirect? All right, folks, am I correct that everybody who wanted to have a chance to ask questions of Mr. Curson has had that opportunity? No response. Mr. Curson, thank you. You're excused.

THE WITNESS: Thank you.

THE COURT: Okay. Before we break for lunch, folks, to what extend does anybody have a desire to put anything further into the evidentiary record at this point? I took an extra long pause this time. Mr. Bressler?

MR. BRESSLER: Your Honor, I just wanted to confirm, we did submit our deposition designations and it's subject to counter-submissions. I would move their admission.

THE COURT: Okay. Once those counterdesignations are made, my tentative, subject to your rights to be heard, is they're a part -- they also become part of the record. Anybody have a different view? No. Okay. They're in, Mr. Bressler --

MR. BRESSLER: Thank you, Your Honor.

THE COURT: -- or will be in when counterdesignations arrive. Is there --

MR. ROY: Excuse me, Your Honor.

THE COURT: Excuse me, I don't know your name.

MR. ROY: It's Casey Roy with the Texas AG's office. May I have just a moment with counsel?

THE COURT: Sure. Sure.

MR. ROY: Thank you.

(Pause)

MR. ROY: Your Honor, this is the exhibit list that was filed by the state of Texas.

(Pause)

MR. ROY: Your Honor, for the Court's information, these are the participation agreement documents that relate to the dealer modifications. And for the record, Your Honor, all of this was timely filed.

(Pause)

MR. ROY: Your Honor, we move to offer into evidence Exhibits 1 through 9 for the state of Texas.

THE COURT: Okay. Any objections?

MR. MILLER: No objection.

THE COURT: No objections. They're admitted.

(Texas AG-1, General Motors Corp. cover letter dated 6/1/09 regarding proposed Participation Agreements relating to GM's dealer agreements and restructuring plans, was hereby received into evidence as of this date.)

(Texas AG-2, General Motors Corp. proposed Participation Agreement dated 6/1/09 regarding GM dealer sales and service

agreements, was hereby received into evidence as of this date.)
(Texas AG-3, General Motors Corp. proposed letter agreement dated 6/1/0/ modifying the Participation Agreement, was hereby received into evidence as of this date.)
(Texas AG-4, informal request for production to Weil Gotshal and Manges, LLP dated 6/23/09 from J. Casey Roy, was hereby received into evidence as of this date.)
(Texas AG-5, e-mail dated 6/23/09 from J. Casey Roy to Weil Gotshal and Manges, was hereby received into evidence as of this date.)
(Texas AG-6, General Motors Corp. cover letter dated 6/1/09 accompanying the final version Participation Agreements, was hereby received into evidence as of this date.)
(Texas AG-7, General Motors Corp. final version of Participation Agreement dated 6/1/09, was hereby received into evidence as of this date.)
(Texas AG-8, General Motor Corp. final version of proposed letter agreement dated 6/9/09 modifying Participation Agreement, was hereby received into evidence as of this date.)
(Texas AG-9, e-mail dated 6/26/09 from Evert Christensen forwarding Exhibits 7 & 8 to J. Casey Roy was hereby received into evidence as of this date.)

MR. ROY: Thank you, Your Honor.

THE COURT: All right. Just hand it up personally to me, please, Mr. Roy.

MR. ROY: Thank you.

THE COURT: Thank you. Okay, now that we took care of Mr. Roy's needs and concerns, anybody else? Mr. Parker, I thought your issues were addressed.

MR. PARKER: Yeah, I only have one other, Your Honor, which is how can I get a list of all the exhibits?

THE COURT: By checking the docket like every other party in the case.

MR. PARKER: Oh, because, I mean, like, I have a witness and exhibit list, but I don't have -- I don't know whether they put them in that order or not.

THE COURT: Mr. Parker, I'm not in a position to give you any more help than any of the other lawyers in the case that are subject to --

MR. PARKER: Thank you.

THE COURT: Okay. All right, the evidentiary record is now closed, ladies and gentlemen. Mr. Eckstein, you had some matters you wanted to bring to my attention.

MR. ECKSTEIN: Your Honor, thank you. I was simply going to rise in response to the suggestion that Your Honor had made about the timing for the closing arguments. And I gather Your Honor's initial inclination is to move forward today with closing arguments, and I assume Your Honor would like to try to wrap this up as promptly as possible. The only point I wanted to bring out was, putting aside -- I'm sure there are certain

parties who would always like a little more time to prepare, but with that one issue to one side, there are several significant issues that we've heard about both yesterday and today, in a conference with Your Honor and in testimony, that appear to be very close to favorable resolution. And at least from the committee's perspective and, I believe, listening to the objections from various other parties, it would seem to me that the resolution of those issues would dramatically narrow the issues that are the subject of debate and that will have to be considered by Your Honor. And I simply wanted to raise with Your Honor whether or not there was an opportunity to see if we could actually bring closure to some of the issues that seem to be on the verge of resolution and --

THE COURT: That would no doubt narrow matters --

MR. ECKSTEIN: Dramatically, Your Honor, I believe.

THE COURT: I hear you, but I don't know how to get my arms around it, Mr. Eckstein. Let me throw out a thought not in the nature of a ruling, which is, do you think it would be productive for you to have a caucus with other parties-in-interest over the lunch break to see if people are in a position to make joint recommendations to me as to how we should handle argument?

MR. ECKSTEIN: Sure, I'd be happy to, Your Honor. And we can certainly consult.

THE COURT: Consulting is always easier than

agreeing, I will understand that, but the practical problem I have that I would ask everybody in the room to consider is that, given the company's liquidity and the July 10th date that we have, certainly everybody understands my desire to use my time as efficiently as possible and to allow as much time as I can allow myself to give you guys a decision of the quality that you all deserve. So what I need to do, and to ask you all to do, is to figure out a way to balance the need to keep things moving forward to avoid a lot of argument on matters that could be resolved in the manner that you articulated, Mr. Eckstein.

So my thought would be that when argument begins it will be from the debtor with the chance for people with different perspectives to respond and for the debtor to reply. But so long as the debtor understands that if we go forward it's going to be up at bat first, it seems to me that it's no harm, no foul and maybe very sensible to have the kind of dialogue we're talking about over the lunch break for you and Mr. Miller to agree, and other folks like Mr. Richman and tort litigants and AGs and the like, as to how we should do it.

A propos that, full stop, you, Mr. Eckstein, and the two indentured trustees on your committee are in kind of a hybrid capacity because you support the motion in some respects and you have concerns about it in others.

MR. ECKSTEIN: That's correct, Your Honor.

THE COURT: I would like to get your views -- probably not fair to ask for them now, but probably after lunch -- as to when and how you and the two indentured trustees should be heard and whether you want to bifurcate your argument or what. And when I said I would be hearing from the debtors, I did not mean to exclude from argument opportunity folks who generally agreed with the debtors, like the government, the UAW, the larger bondholder group and anybody -- both the Canadian government and anybody else who I might have overlooked.

So what I'm of a mind -- I don't know if you're going to be successful or not, Mr. Eckstein, but I think it couldn't hurt to have that dialogue and that we propose that you have it over the lunch hour.

MR. ECKSTEIN: We'll do that, Your Honor, and obviously we'll include Treasury in that discussion because they're a critical participant in these discussions. And it may be that certain of the arguments will naturally carry over to tomorrow morning in any event, and that may actually provide the window to resolve some of the issues that are open and hopefully can get closed. But I don't know whether that will or will not get accomplished.

THE COURT: All right, well, given our track record, I think it would take extraordinarily favorable circumstances to finish all oral argument this afternoon or even this

evening. Mr. Miller?

MR. MILLER: Your Honor, a propos of that statement, which I don't think is a subject for the luncheon conference, is Your Honor going to set any time limits on oral argument?

THE COURT: That's a good point. Probably, I think, I need to. And while I would not do it the way this circuit does, or even the Supreme Court, we can limit a party to twenty minutes or whatever it is before the yellow and red lights go on. I think I would like recommendations, when we resume after the lunch break, as to what would be fair for the various objectors and what would be consistent with due process on the one hand and not turning this into a circus on the other.

MR. MILLER: Yes, sir.

THE COURT: Okay. But I'm not going to decide it this minute. I got to think about that one myself.

MR. MILLER: Thank you, Your Honor.

THE COURT: All right, thank you. Ms. Cordry, do you want to rise before we break?

MR. CORDRY: I would just like to second Mr. Eckstein's position because the Attorneys General, as you know, had filed an omnibus objection and had quite a few issues on the table. I think we're extremely close on virtually all of them, except successor liability we have some real determinations there. But it's been very difficult to close the sale, if we can use an auto term there, on most of these,

at least in part, because everyone who needs to deal with those issues has been very tied up in being in this hearing and so forth. And we've been at a stage of almost-done for several days now. So I think, in fact, if there was a clear period of a few hours where both on their side and our side, everyone, could sit down there, work through the pieces and make sure that both Treasury and the GM side are okay with that, I think we and, I think, some of the other folks would be able to dramatically reduce the amount of our argument. So --

THE COURT: Well, fair enough. I can't obligate anybody to agree with anything.

MR. CORDRY: Clearly not.

THE COURT: But it would help me do my job, just like it would help Mr. Eckstein and you do yours, if I get my arms around what has been resolved and what's still outstanding. In fact, that was why I asked --

MR. CORDRY: Right.

THE COURT: -- you guys to give me those supplemental sheets so I knew which issues you had which you perceived as not being satisfactorily or fully addressed and those that are now behind us. Am I right that you're allied with the brief I got from the Nebraska AG --

MR. CORDRY: Yes, yes. I'm arguing that brief, yes.

THE COURT: -- that seventy-one page brief?

MR. CORDRY: Yes, and -- I'm sorry, and we did file

table of contents last night --

THE COURT: Well, you weren't -- you didn't sign the brief, but I suspect you were a co-conspirator --

MR. CORDRY: Yes. Yes --

THE COURT: -- as part of that submission?

MR. CORDRY: I actually looked at the Local Rules and I did not see the table of contents; we were very late on time. It turns out it's in the case management order, which I had not seen, and I deeply apologize, Your Honor.

THE COURT: All right, well, you understand why I want to get your perception on TWA and compare it with theirs and --

MR. CORDRY: Exactly.

THE COURT: -- all the others.

MR. MILLER: Exactly.

THE COURT: And, with agreement, those issues are going to be narrowed. And what I need to -- I think they've already been narrowed, but I need everybody's help on the extent to which they remain.

MR. CORDRY: Right. I would note that the narrowing is actually in some of the areas such as the dealer agreements, the warranty provisions and those sort of things, some of which are starting to come into being filed with the master purchase agreement, some of which are in draft orders which have not been filed yet, some environmental --

THE COURT: So you're talking about a narrowing of two different types --

MR. CORDRY: Right.

THE COURT: -- their being narrow on some of your dealer provisions where there may or may not have been comparable progress on successor liability issues?

MR. CORDRY: Right. All of the issues, I say, apart from successor liability, are very close to being done. But we don't have everything done; we don't have it in filed orders. We kind of -- until we see the actual written piece of paper, we'll need those.

On the successor liability, we certainly -- I think there's room -- if we actually sat down and talked some more to Treasury, I think there's room that we could narrow that some more. I've seen the draft order; it has some language there that comes part of the way. We have not had any chance to discuss that language with them to see where their thoughts are on that.

THE COURT: All right, here's what I'd like to do, not ordering, suggesting. If Mr. Miller and U.S. Attorney's folks and Mr. Eckstein think that your attendance at their lunchtime chat will be productive, maybe that would be a good idea.

But I understand, Mr. Eckstein, you can't have the kind of caucus you're talking about if it has thirty-five

objectors in the room. You're going to have to figure out what's most appropriate in terms of how you think you can get the dialogue that you think is constructive. I mean, I can see that one extra person for dinner is no big deal. If you have forty people coming into your living room, it can be a bigger production.

MR. ECKSTEIN: Without getting too far into the weeds, my sense is that we probably can break the issues out into essentially what I would give the umbrella of the successor liability-type issues, and then there are financial issues. I believe the financial issues are the ones that, at least based upon what we've heard so far, should be susceptible, at least in the ideal world, to a resolution and clarity. And I believe that it would be very constructive if we can, if we can, to try to get those issues as resolved as possible before launching into closing arguments.

I believe that the successor liability issues warrant discussion, but the sense that I have at least is that we all have -- we know what the positions are, and those will probably have to be argued. Obviously, if there can be more movement and clarity, I think that'd be great. But I think that, for purposes of the closing arguments, at least my assumption is that we're working off of the record that we have. And I think that Your Honor is going to want to hear the legal arguments associated with --

THE COURT: Right, and I would be surprised if anything that was being done is going to alleviate Mr. Richman's concerns, and probably Mr. Parker's as well.

MR. ECKSTEIN: I believe that's probably right, Your Honor.

THE COURT: Nevertheless, the debtor will have the first argument.

Mr. Richman, I don't know if you are rising or not or merely to point out what I just recognized.

MR. RICHMAN: Just wanted to add my own two cents, Your Honor, to try to be constructive. I don't mind admitting that the influx of information that has come in over the last two days has been rapid, and in some sense it's overwhelming. We haven't yet been able to get transcripts from yesterday or today. I did my best to take notes, particularly during Mr. Wilson's deposition -- I mean, his testimony. He spoke very fast; I wasn't able to get it all down. And when Your Honor talks about limiting argument, I would submit, not just for myself but, I think, generally for everybody, that with some more time to organize notes and prepare to be able to refer to particular testimony in support of particular legal arguments, all of the arguments will be more streamlined and better organized and shorter in length.

So my view, and particularly taking into account the need of parties to confer to narrow issues, and in particular

our need to organize the arguments as in a streamlined and effective a fashion as we can, is that we should commence argument in the morning, take a break this afternoon, let people have the discussions they want to have, let people organize the way they need to and coordinate other issues and presentations.

THE COURT: Mr. Miller, unless you're sure you know what you want to do now, I was going to suggest you think about that over the lunch break and let me know if you prefer to start this, your argument, since you're the number one batter, this afternoon, or whether or prefer to start tomorrow.

MR. MILLER: Your Honor, certainly will think about it, but I would note, Your Honor, there is an urgency to the situation. You have an enormous record before you. You have a lot to do, as you said, to render a decision. Time is really of the essence. Now, in terms of transcripts, there were depositions all weekend. A lot of the testimony, Your Honor, and, Your Honor, it was redundant, it was over and over. I think the issues are very clearly drawn. If there can be a resolution on -- some of these are narrow -- some of these issues, that's fine. But I really believe, Your Honor, it's important to move forward. There are a lot of things waiting that have to happen in connection with this transaction, if it is approved. And lots of physical, mechanical things have to be done that will take time. And if this transaction's

approved, the faster this transaction is consummated, the better the chances that that ten percent of stock that's going to OldCo is going to have some real value. So time is of the essence, Your Honor.

THE COURT: All right, well, let me know if that remains your thinking after the lunch break.

MR. MILLER: Yes, sir.

THE COURT: Okay. Now, by my watch, a minute or two before 2:00. We'll resume in an hour. We're in recess.

(Recess from 1:58 p.m. until 3:05 p.m.)

THE COURT: All right, everybody, have a seat, please. Mr. Miller, Mr. Eckstein, is there any consensus on approach? I'm going to ask Mr. Richman the same question.

MR. ECKSTEIN: Your Honor, I think I was reasonably effective at herding as many cats as I could over the last hour, and I think the consensus that we have is as follows. I think people are prepared to go forward now.

THE COURT: Again?

MR. ECKSTEIN: People are prepared to go forward this afternoon with the closing arguments. My understanding is that the company is going to begin and parties in support are going to argue. And I gather that -- it sounded to me like it was probably under an hour and a half for the arguments on that side. And to the extent I've been able to speak to the various objectors, and I haven't spoken directly with each of them, by

my count, Mr. Richman is going to be speaking and I'm told that they would like to reserve somewhere between thirty and forty-five minutes. Mr. Bressler is going to be speaking and he thinks he needs approximately fifteen minutes. I haven't had a chance to speak directly to Mr. Jakubowski, but I'm assuming that he will speak in addition to Mr. Bressler, and I assume approximately ten minutes because that was going to be covered together. Mr. Kennedy is going to speak, and he told me that he needs approximately twenty minutes. Mr. Esserman and Mr. Reinsel are going to speak, and they have told me they need approximately twenty minutes; that's for the --

THE COURT: For the --

MR. ECKSTEIN: Those are the asbestos --

THE COURT: Oh. Okay. Oh, Esserman you said.

MR. ECKSTEIN: Yes.

THE COURT: Okay.

MR. ECKSTEIN: Mr. Esserman and Mr. Reinsel are both going to both speak in support of the asbestos objections. The Attorneys General, there are three objectors and they've told me that they need between thirty and forty-five minutes collectively. And I haven't had the opportunity to speak directly to Mr. Parker; I'm assuming he's going to want to speak as well, and I assumed approximately twenty minutes for that as well. That looks to me like it's somewhere between two and a half and three hours if you assume everybody takes the

allotted time that I mentioned. And I'd be prepared, Your Honor, to describe where the committee is right now and where things stand with respect to our discussions with U.S. Treasury, which I think are productive. And I can do that either now or I can do that when Your Honor is prepared to shift to the merits.

THE COURT: Okay. Mr. Eckstein, were you contemplating talking about the successor liability issues, or are you going to leave that to the tort litigants and the AGs?

MR. ECKSTEIN: Your Honor, at present I think I'm going to probably leave that to the individual objectors and the AGs. We do have a call with our committee for this afternoon at 4:30 which we'd like to have to update them generally upon where a variety of issues are. And if there's anything further that I need to say, I would ask Your Honor to give us the opportunity after that call to do so, but I don't think it will require Your Honor to interrupt the proceedings for us to have some representatives of our firm out participating in the call.

THE COURT: All right.

MR. ECKSTEIN: But I would like to speak on the other aspect of our objection and how we believe that is being dealt with based upon discussions we've had with the government.

THE COURT: Would you prefer to wait a little longer before you speak to that, or were you looking for an early

opportunity to do that?

MR. ECKSTEIN: I'd probably do that early, Your Honor, because I think we have a direction that is -- at least as far as I can tell, works for the government, works for the committee and I think is satisfactory at least to the individual committee members who have an interest in the issue and have heard where we are on that.

THE COURT: Would it be your preference to address it before or after Mr. Miller and other movants speak?

MR. ECKSTEIN: Probably before, Your Honor.

THE COURT: Okay with you, Mr. Miller?

MR. MILLER: Okay with me.

MR. ECKSTEIN: I can --

THE COURT: Oh, wait, Mr. Bernstein, you rose your hand -- raised your hand.

MR. BERNSTEIN: Mr. Eckstein omitted --

MR. ECKSTEIN: I'm sorry.

THE COURT: I'm sorry, Mr. Bernstein?

MR. BERNSTEIN: Mr. Eckstein omitted me from the list. And, in addition, Your Honor specifically asked us to address a particular legal issue in oral argument. I'm having that researched right now and would very much prefer, if it's possible, and oral arguments getting over till tomorrow, to maybe have -- to address that issue in the morning rather than this afternoon.

THE COURT: Well, I won't make you argue it today. You can either do it tomorrow, or if we're somehow done with everything today I'll take a -- you can just give me a letter or a short memo.

MR. BERNSTEIN: That'd be fine, thank you, Your Honor.

THE COURT: Okay. All right, go ahead, Mr. -- Mr. Esserman?

MR. ESSERMAN: Very quickly, Your Honor.

THE COURT: Come to a microphone, please.

MR. ESSERMAN: Yes. Your Honor, I definitely -- Sandy Esserman, for the record. I definitely don't want to slow the train down, but I do think it is a little unfair to have to go into argument without understanding what kind of order the debtor is seeking. And, as I understood it, that is moving around and it could have issues on claims, capital C or small C claims, that could have an effect on what we argue and how we argue it. I wanted to raise that because it certainly would be nice to know what they are seeking.

THE COURT: You know what the debtor's asking for now, and you can only do better than that, right?

MR. ESSERMAN: I don't know. I hope so.

THE COURT: I would assume that the debtor's not going to -- I have difficulty seeing how they could make it any worse, from your perspective.

MR. ESSERMAN: I agree. But it would be nice to know --

THE COURT: It seems to comport with your due process needs and concerns. And if the debtor -- or the government, more likely, makes a decision that some of the stuff that bothered you you're not going to ask for, I assume that you will either not complain and you will say I'm not complaining about that portion but I'm complaining about the portion you didn't take care of.

MR. ESSERMAN: Correct.

THE COURT: It sounds like it skins the cat, to me, Mr. Esserman.

MR. ESSERMAN: Okay, thank you.

THE COURT: Okay. Mr. Richman.

MR. RICHMAN: Your Honor, my concern is a little different. And, first, you've run a superb trial under difficult conditions, incredibly speedy in the circumstances. As I indicated before lunch, I feel that I have not had an adequate opportunity, given the importance of the issues that I want to be able to address as articulately as possible to this Court, to effectively marshal all of the evidence that came in at rapid speed and be in a position to respond to the arguments for a large number of people who I think are relying on us to articulate a position for them.

I don't believe that the difference between having

all of the closings today or tomorrow morning can credibly be considered material, even if one accepts that July 10 is an important date for the debtors. I don't think anybody could have predicted that the testimony would have been over today and the hearings might have gone over until tomorrow in any event.

And so all I ask, with all due respect and no criticism of the Court intended, is that I be given an opportunity for additional preparation time so that I can present a more effective argument with reference to the evidence in the morning. I have no objection to other parties wanting to start today if they feel ready and prepared to go forward. I'm not trying to put anybody at disadvantage. I'm also fine if the debtors would rather have it all done -- and it sounds like it's about three hours in total. So three hours in the morning to take care of argument and maybe have other things cleaned up in the meantime still seems to me to be fair to everybody, give due process to everybody. And so I would respectfully ask that Your Honor consider that and consider a recess until the morning.

THE COURT: I'm going to do a variant of that, Mr. Richman, because I do believe in due process. And it's now a quarter after 3. I'm going to make you second to last, and I'm going to take all of the object -- or take the movants and all of the other objectors today, except for Parker, Mr. Parker.

Mr. Parker's arguments are so duplicative of yours that I want to hear them from you first. And then any that he wants to make that you haven't satisfactorily addressed he can make. So I'll hear everybody else, and you can have first thing in the morning.

MR. RICHMAN: Thank you, Your Honor.

THE COURT: All right.

MR. PARKER: Your Honor, thank you.

THE COURT: Okay. Mr. Miller, I guess we're ready for your closing at this point. Just pause for a second.

MR. KAROTKIN: Not Eckstein?

THE COURT: Oh, yes. Forgive me, Mr. Eckstein. Yeah, thank you, Mr. Karotkin. Let me just hear from Mr. Eckstein.

MR. ECKSTEIN: Thank you, Your Honor. Just to tie a, I guess, a ribbon around the issue that I've been referring to, what I had suggested before the break, and I feel that it was worth the effort, one of the significant issues that has influenced the committee from the outset and remains an important part of our view of this transaction is that the business support for this transaction at the committee level, and similarly before the case was commenced from the ad hoc bondholders committee level, was the understanding that the stock and the warrants that were being left with OldCo were going to be available for distribution to unsecured creditors

and that U.S. Treasury was going to be providing DIP financing on a limited recourse basis in an amount sufficient to fund the wind-down and transition and administrative expenses of the estate. And that originally had been estimated at being 950 million dollars. And as Your Honor has heard, there were negotiations that were ongoing and discussions to ultimately increase that amount based upon further estimates.

What I've been told based on discussions with representatives of the U.S. Treasury is that they are highly confident that those discussions will conclude now that Mr. Wilson is off the stand and is able to refocus on the issue, that those will conclude so that the parties are in a position to come back to court, I'm told, by tomorrow morning and represent to the Court and the parties what the increased amount is going to be. And what we understand is that it's going to be an amount that JayAlix (sic) is satisfied, in its view, will be adequate to fund what they believe are reasonable wind-down transition and administrative expenses.

UNIDENTIFIED SPEAKER: Not Jay.

MR. ECKSTEIN: AlixPartners? Thank you.

And I've been told that we should assume, for purposes of how we proceed, that that is going to in fact take place and that if for some reason it doesn't play out that way, that the Treasury understands that all bets are off and parties would have the right to continue to advance the arguments that

we had intended to advance in the first instance.

We would obviously prefer that matter to be resolved. Similarly, there was an issue that was discussed earlier this morning with respect to workers' compensation claims and where those are going to reside. And we've been told that those -- that issue also has been resolved favorably for OldCo. Those will continue to be obligations at NewCo, and we are told that that issue has been resolved with the state so that we no longer have to be concerned about a material modification in the amount of unsecured liabilities moving from NewCo to OldCo. And, similarly, I've been told by the Treasury that that issue, if for some it does not get confirmed by tomorrow morning, then parties will have an opportunity to come back and reopen that issue.

So, based upon those representations, Your Honor, we feel that that is quite productive. And we're prepared not to argue further on that issue today and to give the Treasury and AlixPartners the opportunity to finish that process and hopefully come back and confirm tomorrow morning the business resolution.

THE COURT: All right. Fair enough. I think we're ready for you then, Mr. Miller.

MR. MILLER: Thank you, Your Honor. I was beginning to feel I'd never get here. Good afternoon, Your Honor, on behalf of the debtors. Your Honor, since the publication of the

notice of the hearing to consider the 363 transaction, and starting with the middle of June 2009 and up through June 19, 2009, the bar date for filing of objections to the transaction, and thereafter, more than 850 written objections to the sale have been filed. Many of these objections relate primarily to the portion of the motion dealing with Section 365 of the Bankruptcy Code and the assumption and assignment of executory contracts and unexpired leases of real property. Those objections, Your Honor, are directed primarily to the cure amounts that have been stated by General Motors. It's the intention of the debtors to deal with those objections in accordance with procedures that will enable the resolution of the cure amount objections in an orderly process.

THE COURT: Pause, please. Is there anybody who thinks that the mechanisms you proposed aren't fair? I mean I understand why they want their needs and concerns taken care of, but there aren't any real procedural objections, am I correct?

MR. MILLER: Not that I'm aware of, Your Honor.

THE COURT: Okay.

MR. MILLER: Okay. There remain several hundred other objections to the 363 transaction. In reviewing those objections, Your Honor, certain salient facts resonate from all of the objections.

One, no party suggests or indeed opposes the

consummation of a sale of the General Motors' assets.

Two, no party suggests or proposes an alternative viable -- alternative viable to a sale of the General Motors' assets.

Three, no party suggests or proposes a source of alternative financing that would be sufficient to satisfy the secured indebtedness of approximately fifty billion dollars that would owed to the Treasury and the governments of Canada.

No person has come forward with or an expressed interest to propose a higher or better offer for the assets that are to be sold pursuant to the Section 363 transaction.

No person has come forward to contest the liquidation analysis that has become part of the record made by Alix Partners and Mr. Koch.

In addition, notwithstanding the huge media or congressional attention to the claim plight of dealers, virtually no GM dealers have objected to the 363 transaction. And, in fact, approximately 99.6 percent of the dealers who have been offered the opportunity to continue as GM dealers have agreed to new ongoing participation agreements. And over 98 percent of the dealers who will be discontinued have accepted wind down agreements.

THE COURT: What's the percentage again, please?

MR. MILLER: Ninety-eight percent of the discontinued, Your Honor.

All of such agreements are to be assumed by the purchaser. Various attorneys general and regulators, despite the agreement of the dealers, do object to the application of Section 363(f) to state franchise laws but not to the sale, per se. The limited objection in deposed by the general unsecured creditors' committee, which represents a constituency composed of bondholders, unionized employees, dealers, suppliers, cloth and asbestos claimants, there's a reflection of the common theme of the objections.

The official committees' objection states that it is, and I'm quoting, "Satisfied there is that no viable alternative" and I'm inserting this, to the 363 transaction, "exists to prevent the far worse harm that would flow from the liquidation of GM." And, the "current transaction is the only option on the table."

The official committee further states that the Section -- that the 363 transaction, "serves the core purpose of the bankruptcy code and constitutes a strong business justification under Section 363 of the code to sell the debtors' assets outside of the plan process."

Despite this universal appreciation of the fact that the sale of the GM assets is in the best interest of all economic stakeholders, we do have these hundreds of objections. The essence of the objections soon becomes apparent.

First, the recurring demand of the objectors, "I want

more" or "Cut someone else out."

Second, "I don't like the process and with more time I might be able to have more leverage and thus extract more consideration."

The objectors fail to recognize that what we are dealing with is an asset sale of fragile assets. To an independent purchaser, that is their sole source of financing and investment. They ignore the central characteristics of a purchase and sale transaction. The purchaser makes the decisions as to what it is willing to purchase and on what terms it will purchase those assets and what it will pay and what it will assume.

The desire for more is characteristic of creditors in the world of bankruptcy. Such desire doesn't equate to a legally cognizable objection. It doesn't mean that a transaction is fatally or otherwise flawed or, indeed, that the purchase price is unfair. While everybody empathizes with everybody who is suffering because of what is happened to General Motors both in the monetary, emotional or physical sense, bankruptcy, in all its permutations, Your Honor, whether Chapter 11 or Chapter 7 is a zero-sum game.

A 363 sale enables the establishment of the value of the assets and leads to a determination of what the pie will be and ultimately, in subsequent proceedings, who will share in that pie. There can be no doubt that Section 363 empowers the

Court to consider and approve the sale proposed by the debtors. As the Court has noted many times, one must start with the words of the statute.

Section 363(b) is unambiguous. "The debtors after notice and a hearing may sell property other than in the ordinary course of business with the approval of the Court." There is no prohibition contained in Section 363 or any other provisions of the bankruptcy code that prohibits a Section 363 transaction. The Section 363 interpretive cases fortify the plain meaning of the statute and establish the determinative criteria that a Court should look to to exercise its decisional power.

The Lionel case in this circuit and its progeny, including the TWA case in the Third Circuit and the scores of cases that this Court and other courts have ruled on in connection with the application of Section 363(b) sales, particularly in the last two years, likewise establish beyond any doubt the power of the Court to authorize a sale of substantially all of the assets of a debtor pursuant to Section 363. The Lionel line of cases stand for the principle that if there is an articulated business justification for the sale of the assets by the debtor, the sale should be approved. The reasonable exercise of business judgment on the part of the sale proponent, the debtor, and the good faith of the purchaser establish the basis for the approval of a Section 363 sale.

In the case of GM, Your Honor, the record that has been made over the last day and a half is replete with articulated business reasons which justify the approval of a 363 transaction. The case in favor of GM's decision is even more precedent as the assets that are being sold are so prone to substantial deterioration and loss of value. And there is no alternative to the sale without substantial prejudice and detriment to all economic stakeholders.

No party in interest disputes the need to preserve the going concern value over GM assets. The only way to save that value is through the approval of a 363 transaction. The alternative, as clearly set forth by Mr. Henderson, a chief executive officer of GM, and confirmed by Mr. Wilson, on behalf of the Treasury, is liquidation.

Implementation of the Section 3 -- of the 363 transaction is the only way to begin the process of stopping recurring losses that have been incurred by the debtors and to reshape and reinvigorate the transfer of assets to form the new GM. There is no other option that is available to the debtors and their economic stakeholders.

The F&B bond holder's assert, Your Honor, that this is not the right process to follow but rather a Chapter 11 plan process should be affected and in some magical way there will be an accelerated Chapter 11 plan that possibly could be confirmed in ninety days. Yet there is nothing in the record,

Your Honor, to substantiate that contention. And the major premise upon which the F&B bondholders are relying upon, as it developed in today's testimony, was that the UAW employees would be bound under the amended collective bargaining agreement that was ratified in May of 2009 and, therefore, would have to perform services even if the sale is not approved. The testimony of David Curson, just before the luncheon break, established unequivocally that if UAW retirees settlement is not approved, all the modifications of the amended collective bargaining agreement are withdrawn and GM is put back into the same position that it was before those amendments with labor rates, work conditions, etcetera, which were unsatisfactory in the operation of a business, unsatisfactory to the Treasury. So saying that the 363 process is not the right process without more is just a conclusion. And doesn't take into account what would happen in a Chapter 11 case. We have seen in these proceedings, Your Honor, how many objections have come forward. I wouldn't call it a Tower of Babel but we were pretty close, I think.

Your Honor has enough experience in Chapter 11 cases to know that things go awry. And this morning when I was examining Mr. Wilson I referred to the Delphi case. And in the Delphi case, Your Honor, there was a sale. There was a proponent for a sale. And because of what occurred in the Delphi case, the proponent backed out of the sale. And in a

case that was filed in October in 2005 in which it was represented at the first day hearings that that case would be over in sixteen months, we are now approaching the fourth anniversary of that case. And what has happened to that case, Your Honor? At one point in time, the plan of reorganization was contemplating close to a hundred percent distribution to creditors -- general unsecured creditors. The current state of that case is that the debtor-in-possession financing is undersecured. And that the --

THE COURT: The DIP is undersecured?

MR. MILLER: -- undersecured, Your Honor -- that there aren't sufficient funds to pay the debtor-in-possession financing in full.

In effect, Your Honor, the estate is administratively insolvent. And GM is very actively involved in that estate, Your Honor, because Delphi is a major supplier of parts. If you transpose that, Your Honor, to a Chapter 11 case for General Motors, Delphi did not have the problem of worrying about consumers. All Delphi had to worry about was suppliers -- I mean raw material suppliers.

THE COURT: Pause here. To what extent, if any, was any of the stuff you said about the Delphi case not ascertainable for me reading the documents?

MR. MILLER: It's all ascertainable from reading the documents in the case Your Honor.

THE COURT: All right. And anywhere in putting any embellishment on it, all of those facts are set forth by me just looking at pleadings?

MR. MILLER: Yes, sir.

THE COURT: All right. Continue.

MR. MILLER: I was about say, Your Honor, Delphi was dealing with an industry providing raw materials, etcetera. GM is dependant upon consumers; hundreds of thousands of consumers. A GM in bankruptcy will always give rise to the issue of is it going to be a successful bankruptcy? Will these vehicles that are being produced have resale value? Will they be serviced? The President can talk about warranties, but somebody has to service those warranties. And if GM is not there to service those warranties, how do they get serviced?

This is a different situation, Your Honor, than the situation which Delphi faced in just convincing its suppliers to keep going along with it. Here you have a consumer community, which as we pointed out previously, Your Honor, the purchase of an automobile is a major expenditure for a consumer. The consumer is looking for reliability, a good product, resale value and a future that in reliance upon the reliability of the manufacturer. That will disappear, Your Honor. Any kind of an extended Chapter 11 case.

Beyond that, Your Honor, I think it was Mr. Richman who was examining Mr. Repko this morning for substantially less

than forty-five minutes in which he made an assumption about financing during this accelerated somehow Chapter 11 case. The record is absolutely clear; there is not other source of financing for this company. As the record also demonstrates, this company is losing money every month.

As Mr. Parker so eloquently pointed out, Your Honor, there's a negative stockholders' equity that is almost fifty percent -- I'm sorry, the liabilities exceed the assets on book values by over a hundred percent. And the market value today, obviously, has gone down substantially.

In this economy, with a credit crunch that has been pervasive since September of 2008, who is going to finance a continuing Chapter 11 debtor called General Motors? In a malage, Your Honor, that would have to take out the treasury. The treasury would have to be primed or taken out. And as Mr. Repko said in his direct -- in his declaration, which is his direct testimony, there was no debtor-in-possession financing available in anything close to the amount that would be necessary to continue the operations of GM.

So the alternative of suddenly converting this into an ordinary Chapter 11 or an accelerated Chapter 11, whatever you wish to call it, is not an alternative. And we have the testimony of Mr. Wilson that if the sale approval, or whatever, is not entered on June 10th the treasury is not going to go ahead and continue financing and will call the loan.

What does that mean? That means, Your Honor, we then have to revert to Mr. Koch's liquidation analysis. And when Your Honor looks at that exhibit that Mr. Koch testified to, the recoveries, the general unsecured creditors, is zero. And as Mr. Wilson testified, even the U.S. Treasury claims will be impaired. So in the context of what we're talking about where the only alternative is liquidation, these are exactly the circumstances in which Section 363 comes into play. That's why it's in the statute, that's why it's been recognized by bankruptcy courts, over and over again starting from pre-code law when the issue was are the assets in some danger; are they burdensome? When the code was adopted in 1978, it brought forward those principles but on the basis of business judgment. You no longer had to establish that the assets were deteriorating. It was an exercise of business judgment.

And again, Your Honor, what this record demonstrates beyond any doubt whatsoever, is that General Motors considered its alternatives. It considered various alternatives and it came to the conclusion the exercise of reasonable business judgment, after a lot of study and a lot of paper produced, that the best alternative to preserve the going concern value of these assets was the consummation of a Section 363 transaction provided that the United States Treasury, which was its largest secured creditor, was willing to go along with it and would finance the new GM. And that's what happened, Your

Honor.

And as Mr. Wilson testified, those negotiations were frustrating, difficult and strenuous. And they occurred over a period of time. Mr. Wilson is an extremely adroit negotiator. And fortunately, for the creditors, Your Honor, when you look at the purchase price for these assets and you look at, if Your Honor recalls, the testimony of Mr. Worth yesterday and the exhibits to which he referred to, the net purchase price, assuming the value of the equity, which is going to be issued is as Mr. Worth testified, is approximately ninety-plus billion dollars. I venture to say, Your Honor, there is no one else in the world who would pay ninety billion dollars for these assets. And maybe it's a great compliment for the bargaining acumen of the GM team that they were able to get that bargaining -- that purchase price. So the concept that there's some sort of a Chapter 11 process that's going to work here, just isn't true, Your Honor. It's not going to happen.

363 sales are consistent with the concept of allowing the market to establish the value of assets as directed by the Supreme Court in 203 North LaSalle Street, a case in 1999 at 526 U.S. 434. In these cases despite, as I said the extreme notoriety of GM's distress and the thirty-day period that was provided for under the sales procedure order, no party, not one party desired to conduct due diligence for the purpose of proposing a different or other offer for the assets of General

Motors.

The purchaser in this case is the treasury sponsored vehicle, now New GM Co. or NGMCO, Inc. The treasury is a holder of the prepetition secured obligation of the debtors in the amount of 19.4 billion dollars. Since the onset of these Chapter 11 cases, pursuant to the June 25 order, another 33.3 billion dollars in the IP financing has been provided. And as Mr. Wilson testified, that amount will be drawn before the consummation of this transaction.

Under the terms of the 363 transaction, I could read into the record but I'm not going to do it, Your Honor, in the interest of time, a description of the purchase price. Maybe I should do that, sir. In the --

THE COURT: I mean I have read the purchase --

MR. MILLER: And I will not do it, Your Honor.

THE COURT: Is there a particular part that you wanted to bring to my attention?

MR. MILLER: No, Your Honor. I was just taking it out of the MSPA -- the MPA --

THE COURT: All right. Go ahead, explain it.

MR. MILLER: Okay.

"The consideration for the purchase -- of the purchase assets will be:

A) A bankruptcy code Section 363 credit bid in the amount equal to; 1) The amount of indebtedness owed by the

parent and its subsidiaries as of the closing as defined below.

Pursuant to the existing sponsor credit facilities and 2) The amount of indebtedness of parent and its subsidiaries as of the closing under the debtor-in-possession credit facility, the DIP facility, less 8,022,488,605 dollars which is going to be assumed by New GM as part of the exit financing. Plus,

B) The return of the warrant issued by parent, that's GM, to sponsor in consideration of the secured indebtedness owed by parent to sponsor under the existing sponsor credit facilities. Plus,

C) The issuance by purchaser to parent of 50,000 -- I'm sorry, 50 million shares of common stock of purchaser (the parent shares) and warrants to acquire 90,909,090 shares of common stock of purchaser ("parent warrants"), plus

D) The assumption by purchaser of the assumed liabilities."

All of that, according to Mr. Worth's testimony, adds up to a net purchase price of in excess of 90 billion dollars. There is no comparable offer. Nothing even close to it, Your Honor, for the assets that are to be sold and transferred.

The purchaser has added an increment, obviously, to the purchase price in the interest of serving national interest. "No other entity can compete with the purchase price that has been offered by the purchaser."

In considering the 363 sale and referring to the Lionel case, Your Honor, the factors that are cited in that case, the Second Circuit noted that one of the more important factors, or maybe the most important factors is whether the assets are deteriorating. And in this case, Your Honor, that is a fact.

There has been testimony about the June sales and the June sales were better than the downside projection. But yesterday, Mr. Henderson testified, taking into account everything the month was a terrible month. It was thirty percent less than the same period in 2008. And also, as Mr. Henderson testified, fleet sales, which are a very important component on the sales of General Motors, had substantially decreased because of the uncertainty in the minds of fleet owners. That uncertainty, Your Honor, could only appreciate and grow in the event that this sale is not consummated and there is some effort to continue this Chapter 11 process. But that's not even in the cards because the treasury has said, there will be no financing. And that, I am sure, Your Honor, will be in newspapers and blogs tomorrow. And when dealers -- I'm sorry, excuse me, Your Honor, not dealers -- fleet owners and even consumers read what has transpired here, the level of uncertainty will go even higher. And then the potential for revenue perishability, loss of market share will be right in the front of this company and will severely damage its value.

Now, in breaking down the objections, Your Honor, the way I look at them, there are essentially four categories.

The first is that the 363 transaction constitutes a sub rosa plan.

The second, the sale results in unfair treatment of hourly retiree employees and perhaps others.

Three, the conditions of the sale violates state franchise law as relating to dealers.

Four, the scope of Section 363(f) as it relates to successor liability issues.

The objections, Your Honor, from our perspective, as you might anticipate, are without merit and should be overruled.

The 363 transaction in no way constitutes a sub rosa plan. There is no provision in the 363 transaction or relating to the 363 transaction that prescribes the treatment of creditor claims in the liquidating Chapter 11 cases. The portion of the purchase price consisting of shares of common stock in the warrants of a purchaser will constitute the debtors' estate for eventual disposition in a plan of liquidation to be negotiated with the debtors' allowed claim holders. How that portion of the purchase price will be allocated to holders of allowed claims in the Chapter 11 cases is in no way dictated by the Section 363 transaction.

The Section 363 transaction does not contravene the

holding of the Braniff case. It is consistent with the Lionel line of cases and the recent decision in the Chrysler case. The precise arguments made by the objectors here were made in Chrysler. That Fiat -- the Fiat sale was a sub rosa plan. Judge Gonzalez, in his decision of May 31, soundly rejected that argument. It must be assumed that the United States Court of Appeals for the Second Circuit, in affirming Judge Gonzalez's decision, likewise, found the sub rosa argument without merit.

The 363 transaction is no more and no less than a sale of assets for the best possible price available and with no other conditions imposed on the debtors as to the disposition of the consideration received by the debtors. Some objectors assert that the UAW, the collective bargaining agent and the UAW VEBA, will represent over sixty thousand employees of the debtors are receiving a high recovery on its Chapter 11 plan than others and therefore not only is the Section 363 transaction unfair, but it rises to a sub rosa plan.

As the testimony demonstrates, Your Honor, without any contravention, the recovery by the UAW retirees' claim is coming directly from the purchaser and not from the debtors. It is a transaction that was negotiated by the US Treasury directly with the UAW. And why was it negotiated? It was negotiated because the purchaser, like any purchaser in a 363 transaction who is buying the assets that conduct the business,

needs to have the wherewithal to conduct that business.

There are sixty thousand UAW employees who operate these plants. Without those employees, there is no business. And if there is no business there is no going concern value. So in order to protect its investment, the purchaser had to reach an arrangement, an agreement with the UAW and that is an arrangement between the U.S. Treasury and the UAW. And part of that arrangement, Your Honor, is that the UAW is releasing its claim against the debtors' assets. That claim, Your Honor, is in excess of twenty million dollars. Not quite as big as the bondholders, but pretty damn close; which would certainly dilute any recovery that bondholders might make as long as that claim was there in the Chapter 11 cases. So there is a benefit from what the U.S. Treasury has negotiated with the UAW.

THE COURT: Mr. Miller, am I right or off base if I looked at the UAW's willingness to proceed with New GM under more pro management terms as consideration for New GM?

MR. MILLER: Yes, Your Honor; intangible but more consideration.

THE COURT: Okay.

MR. MILLER: My view, Your Honor, the concessions that were made -- if I can go back a minute, if Your Honor may recall in Mr. Wilson's testimony -- I'm sorry, Mr. Curson's testimony, Mr. Curson said, "The union was advised that as far as the treasury was concerned in connection with the bridge

loans that were made commencing on December 31, 2008 and into 2009, the treasury had made it perfectly clear that the cost of operations of GM had to be reduced and that included the cost of unionized hourly employees. And those concessions were made in the context of allowing GM to survive to get to the point where there can now be a New GM which has these modified terms -- and this is not unusual, Your Honor, 363 buyers come in in companies that have been unionized and are able to negotiate new concessions in appropriate cases. This case is extremely complicated because of the size of the case the size of the financing needed. But in my view, Your Honor, it certainly is a concession.

THE COURT: So strictly speaking, the new collective bargaining agreement was entered into with the existing GM and wouldn't last for as long as Old GM and the principal beneficiary of accommodations being made with the New GM?

MR. MILLER: The structure of the transaction, Your Honor, if the new agreement was negotiated with the debtor on the premise that it would be assumed and assigned to New GM.

THE COURT: Assumed and assigned in its modified form?

MR. MILLER: That's correct, Your Honor. Subject to the consummation of this transaction. As Mr. Curson said, "If the transaction is not approved, all of those concessions are withdrawn." The ratification of that new agreement is no

longer effective.

It's a well established rule, Your Honor, that in connection with 363 sales, the purchaser may elect, in its discretion, what liabilities should be assumed and what arrangements the purchaser may make with the employees of the debtor. This was clearly evidenced, Your Honor, in a case in this district in the Maxwell Publications Chapter 11 cases in connection with the sale of the Daily News to Mortimer Zuckerman, in which Mr. Zuckerman made direct agreements with the various unions involved in the Daily News case. The unhappiness, Your Honor, of retired hourly employees, who are both distressed and envious of the status of the UAW represented employees, is unfortunate.

However, Your Honor, as your testimony and the record indicates, essentially, there are no active employees who are represented by the IUE. And from the perspective of the purchaser, as Mr. Wilson testified, the purchaser, the U.S. Treasury and the government was looking to the creation of a viable entity on the other end of this transaction. And viability of a business entity very much depends on its capital structure and its cost base. So the determination was made by the U.S. Treasury that essentially the principle that it was operating on was what expenses should be assumed that are necessary to make NewCo, or New GM, a viable company?

If everybody here could do it, Your Honor, on this

side, they would move all liabilities to New GM. And we have another company that maybe overleveraged. And in particular, Your Honor, the IUE, as testimony demonstrates, continuation of the hourly retiree health and medical benefits is not an insignificant fund. It's over 300 million dollars a year. And unfortunately, Your Honor, the way the world is, those employees, or retirees, I should say, are not contributing any benefits to the New GM. And the increase of that liability may affect the ongoing business of New GM. Right now, Your Honor, the seasonally adjusted annual rate of sales of vehicles in the North American market is approximately 9.95 million to 10 million vehicles a year. At that rate, Your Honor, no OEM is making any money. And so when, Your Honor, when you read the reports, its not only GM and Chrysler and Ford that are losing money, but the giants like Toyota, Honda, etcetera.

At 9.5 million units, over 10 million units, GM is not at a breakeven point. So this entity that's going forth, this New GM, has a challenge before it. It has to materially increase sales. It has to lower its cost of operation. It cannot afford to take on unnecessary expenses. And that's the underlying guiding principle that resulted in the IUE hourly retirees being left behind. But being left behind, Your Honor, did not leave them with nothing.

There was a process to try and deal with the issue. And that process, as the record demonstrates, was to give them

the same benefits, and it's for all the splinter unions Your Honor, as GM was offering to its retired salaried employees. Now, granted they are reduced benefits, but they are benefits just the same, Your Honor. Mr. Kennedy pointed out that in connection with the salaried retirees there was also an increase in the pension at the same time that reductions were made in the past year by increasing the pensions by 300 dollars per month. Well, that did not come out of a hide of GM, Your Honor. That came out of the pension fund. An overfunded pension fund that hadn't increased benefits for a long period of time, according to Mr. Henderson's testimony. The --

THE COURT: Pause, please. Let me make sure I'm keeping up with you.

MR. MILLER: Yes.

THE COURT: The 300 bucks a month that were given to the salaried --

MR. MILLER: Retirees.

THE COURT: -- retirees, which I gather they could use either for paying for supplemental health coverage or for putting in their pockets, came out of the qualified pension trust as contrasted to GM?

MR. MILLER: That's correct, Your Honor.

THE COURT: All right.

MR. MILLER: And so, it did not affect the cash flow of the operating company.

So it's unfortunate, as I said, Your Honor, that there is harm and frustration and damages as a result of what's happened to GM. The fact that the retired hourly employees believe that the UAW has been favored, is not a substantive legal objection to the 363 transaction. There sole complaint is a claim with insufficient benefits to them.

In the most recent filing by the IUE, which I think was made the day -- Monday, perhaps, it's asserted that the 363 transaction was structured as part of a conscious and deliberate conspiracy to deprive IUE hourly retirees of their health and medical benefits. The IUE claims that the 363 transaction was structured to circumvent the provisions of Section 1114 of the bankruptcy code.

The surreply, if I can refer to it as that, fails to take cognizance of the fact that from the purchaser's perspective, there are no benefits to the New GM as the IUE represents no active employees. In total disregard of the economics and the intention to have a viable, successful, economically viable New GM that will enhance the value of the shares of stock that will be held by Old GM, the IUE casually asserts that the purchaser must assume the IUE health and medical benefits obligations. I believe, Your Honor, the cases are legend. That the bankruptcy court cannot direct a purchaser as to what obligations it will assume or pay. These are obligations that run into the millions of dollars per

month.

The IUE also asserts that the 360 transactions are simply unfair because more could have been taken from other entities, such as executives. It doesn't note that executives previously took sharp and significant reductions over the years while reductions could not be taken in respect of the splinter unions because those benefits were subject to collective bargaining agreements.

The fact that the purchaser has voluntarily contracted to provide benefits to UAW employees is self-evident, they are a necessity to operate the business and enhance the assets. That doesn't give IUE and the other splinter objectors a legally sufficient objection to the 363 transaction. And I would point out to Your Honor that certain other small splinter unions have agreed to the proposal that GM has made to equate hourly's with salaried retirees and have NewCo assume that obligation.

It is an unfortunate economic circumstance but not the result of any conspiracy. The 363 transaction offers the IUE retirees and other splinter union retirees an opportunity to receive benefits and recoveries that will be lost if the 363 transaction is not approved.

The liquidation analysis demonstrates, and it is unchallenged, Your Honor, that there will be no recoveries to IUE retirees and all unsecured creditors. A result that should

not be allowed simply to seek the envy of IUE retirees, vis a vis UAW represented employees and retirees.

IUE also points out that salaried employees in connection with a reduction in their health and medical benefits -- I've spoken to that already, given the cost, Your Honor, of the IUE health and medical benefits plan, its axiomatic that during the course of the pending Chapter 11 cases and probably sooner than later the debtors will move to reject the IUE retirees' health and medical plans as Mr. Koch testified.

Just one minute, Your Honor.

Hourly employees will stand pari passu with salaried retirees as to health and medical benefits. The number of IUE retirees is the largest and most significant group of hourly employees who have not accepted the proposal. That, in and of itself, Your Honor, is unfortunate, but as I said does not create an impediment to the approval of a 363 transaction.

The record is now clear, Your Honor, that the U.S. Treasury will not go forward with continued financing absent approval of the -- of a sale and the collective bargaining agreement with the UAW will fall apart, as Mr. Salzberg established this morning through Mr. Curson.

In connection, Your Honor, with Section 363 sales and successor liabilities in this circuit, it has been consistent that Section 363 sales have been approved as free and clear of

all claims, encumbrances, interests, etcetera, and successor liabilities pursuant to Sections 363(f) and 105 of the bankruptcy code. Various parties have objected to the scope of the requested relief. The same issues came up in the Chrysler case and in Judge Gonzalez's decision in relation to the rejection of dealer contracts that was decided on June 19, 2009 and Judge Gonzalez again denied the same objections that have been raised in connection with this 363 transaction.

Protection against successor liabilities is a standard provision and appropriate in respect of Section 363 sales. Moreover, since the filing of the objections and a connection with product liability claims, the MPA has been revised so the purchaser, as established by the record, will assume all express warranty claims and all product liability claims that arise subsequent to the closing of the 363 transaction, irrespective of when the vehicle purchased. And as Your Honor questioned yesterday in connection with the indemnification agreements, mostly the GM dealers are indemnified in connection with product liability claims. So eventually, they leach up to General Motors. And I --

THE COURT: The guys that you're terminating, the dealers who are underneath the termination agreements with the "soft landing" so to speak, if one of those terminated dealers gets sued by somebody injured, do you still have massive indemnification?

MR. MILLER: I don't know the answer to that question, Your Honor.

UNIDENTIFIED SPEAKER: Yes.

MR. MILLER: Yes, Your Honor.

THE COURT: Okay.

MR. MILLER: And, Your Honor, I would just -- one minute -- the situation we have before the Court today, Your Honor, is a situation in which the choices are between approving a sale and from the debtors' perspective liquidating this company. And I think in that context, facts and circumstances, Your Honor, I believe that the decision in the Third Circuit, in the TWA case, is right on point. And the Third Circuit said, "Given the strong likelihood of a liquidation, absent the asset sale to American", that's American Airlines, "a fact which appellants do not dispute, we agree with the bankruptcy court that a sale of the assets of TWA at the expense of preserving successor liability claims was necessary in order to preserve 20,000 jobs including those of certain named individuals and to provide funding for employee-related liabilities including certain retiree benefits."

Now, in the case before Your Honor, it's not 20,000 employees, there are over 90,000 employees in the North American operations and globally for GM, it's over 200,000 employees. The consequence of liquidation to those employees will be horrific.

In respect of the asbestos claims, Your Honor, that's an issue for OldCo. This is not an asbestos driven case as Your Honor's previously noted. And 1114 is not applicable to the purchaser.

THE COURT: I think you mean 524(g).

MR. MILLER: Oh, I'm sorry; 524(g).

THE COURT: But I have a question on that. The proposed order in the last form I saw it, and I understand it's being looked over again and may be amended, but I think it has an injunction in it. It actually has the words "are enjoined from proceeding with asbestos claims". Does that walk and quack a little bit like a 524(g) --

MR. MILLER: No, Your Honor.

THE COURT: -- or the entity that's being protected is the purchaser of NewCo rather than the insurance company?

MR. MILLER: I don't believe so, Your Honor, because it's not only a question of the assertion of the claim. When claims are asserted you have to defend against them. That costs money. That takes time and effort. Here, what we're trying to do is effectuate a sale where a purchaser will acquire these assets, work these assets and not be subjected to lawsuits. And it's different in the other cases, Your Honor, because OldCo will still be there. And OldCo will have to decide how to deal with these asbestos claims, including perhaps, Your Honor, the future claims. In connection with the

motion that was made to appoint a committee -- an additional committee of asbestos claimants, Your Honor denied that motion without prejudice pending further developments that may occur in connection with the administration of that estate. And there are various alternatives that can be adopted in the administration of the liquidating Chapter 11 case that it's going to be a negotiated plan of liquidation. There could be a fund created to deal with the future claims so that's set aside and as future claims arise, they will have a resource to go to. But that's an issue for the old company. What we have is a purchaser who's laid down some conditions that are certainly within the power and jurisdiction of this Court consistent with the TWA decision, consistent with Lite Motor; this is within the power of the Court. And I believe, Your Honor, that the injunction is necessary because without in any way being disrespectful, asbestos claimants know how to pursue litigation whether it's with merit or without merit. And that's expensive litigation.

THE COURT: Talk about the similarities and differences between what you're asking for and -- in the way of asbestos protection and what was given by Judge Gonzalez and affirmed by the Circuit in Chrysler?

MR. MILLER: As I understood the Chrysler decision, Your Honor, I will defer to anybody else who -- it is the equivalent of -- first, it's free and clear of all claims and

encumbrances and I believe there's an injunction in that order.

THE COURT: I guess the best evidence of that is whatever Judge Gonzalez entered?

MR. MILLER: Yes, Your Honor.

And so, Your Honor, we would submit that the successor liability issues are simply not issues that should deter this Court from exercising its approval of this 363 transaction because it complies with Section 363 for all the reasons stated in Lionel and it's the progeny of Lionel.

The dealer issues, Your Honor, which came to the forefront soon after the commencement of the Chapter 11 cases and relate to the reconfiguration and the dealer relationships certainly created a tempest in a teapot. GM, in contrast to what occurred in Chrysler, carefully and meticulously undertook to work with its dealers to efficiently downsize the dealer network. Rather than rejecting the dealer contracts under Section 365, GM undertook to agree on mutually satisfactory arrangements that would alleviate the costs and effects of termination and changes. As the dealers who GM has proposed to continue receive participation agreements with proposed amendments to the dealer agreements that were explained to such dealers, as I said before, the overwhelming acceptance, 99.6, that is a tremendous statement of the position of the dealers that they want to continue, they want to support a new GM.

As I said with respect to the proposed discontinuing

with dealers, over ninety-eight percent accepted the wind down agreements. And those wind down agreements, Your Honor, provide for some financial support for these discontinued dealers. It's giving them an opportunity of twelve or more months to liquidate their inventories with support from New GM. These agreements are being assumed by New GM.

The ultimate objective of the dealer program is to reduce the total number of GM dealers from approximately 5900 dealers to approximately 3500 to 3600. Over 900 discontinued dealers filed appeals for review. What GM did, Your Honor, is it set up a process that even after giving a notice of discontinuance, if that's the appropriate term, the dealer had an opportunity to object to the discontinuance and enter into an appeal process. Nine hundred discontinued dealers did file appeals and currently over sixty decisions have been reversed.

As a general proposition, the dealer community is relatively satisfied with the approach taken by GM. Unfortunately, various state's attorney general and regulators contend that the participation agreements are violative of state franchise laws and therefore impermissible. Again, the Chrysler case is instructive. The same arguments were presented to Judge Gonzalez. In his decision of June 9, 2009, in connection with the rejection of dealer contracts, which is cited at 2009 LEXIS 1382, Judge Gonzalez ruled that "Under the supremacy clause of the United States constitution, state

franchise laws, which do not concern public safety or health and welfare but are rather economic in orientation, were subject to the overarching jurisdiction of the bankruptcy court to the extent necessary to implement the objectives and policies of the bankruptcy code." And these state statutes, Your Honor, are clearly economic in orientation.

THE COURT: The distinction you are making was between regulatory provisions that are regulating their health and safety or the public health and welfare? Did I hear you right?

MR. MILLER: Yes, Your Honor.

THE COURT: And the contrast fee and those that are essentially economic in nature?

MR. MILLER: That's correct, Your Honor.

THE COURT: All right. Continue.

MR. MILLER: The arguments which I presented Your Honor, apply with equal force to the arguments which have been made by the consumer victims committee. The arguments to which have been made on behalf of the five product liability claimants represented with my -- Mr. Jakubowski. And then, Your Honor, it likewise applies to the other objections, I think Mr. Parker was making an objection along those lines also. But Mr. Parker's primary objective, Your Honor, as I understand it anyway, is that GM in some mystical way violated its obligations under certain indentures and granted liens

and --

THE COURT: Under the equitable and ratable clause that it contends exists?

MR. MILLER: Yes, Your Honor. The fact of the matter, Your Honor, no lien or security interest was granted to the United States Treasury in violation of any of those indentures. And --

THE COURT: They're equal in ratable salary?

MR. MILLER: Equal in ratables, sir.

Section 406 of the indenture that Mr. Parker referred to states, and I'm going to paraphrase, Your Honor, GM is not going to put any liens on any principle domestic manufacturing property of GM or any manufacturing subsidiary or upon any shares of stock or indebtedness --

THE COURT: Except excluded assets?

MR. MILLER: I'm sorry, Judge?

THE COURT: Except excluded assets?

MR. MILLER: These are the excluded assets, Your Honor.

THE COURT: Okay. So the issue is do we have a definition of excluded assets?

MR. MILLER: It's put in the record, Your Honor. And it is the principle domestic manufacturing properties and manufacturing subsidiaries -- the shares of manufacturing subsidiaries. Those are excluded Your Honor.

THE COURT: Okay.

MR. MILLER: And in January 7, 2009, GM issued an 8-K, and it said on the 8-K that the "The seller is secured by substantially all of GM's and the guarantors U.S. assets that were not previously encumbered including their equity interest in most of the domestic subsidiaries and their intellectual property that real estate, other than their manufacturing plants or facilities". And in Section 401 of the loan and security interests, it states, Your Honor, it is -- that's where the definition of excluded assets come from and it states, "Excludes a lien on any property that gives rise to an obligation to grant a lien to another party, such as the bondholders". And it states --

THE COURT: All right. So you're saying that if it would have triggered the equal and ratable clause it was listed amongst the excluded assets and, therefore, when the deal was structured it was an intentional effort to avoid triggering the equal and ratable clause?

MR. MILLER: Absolutely, Your Honor.

THE COURT: Go ahead, Mr. Miller.

MR. MILLER: And beyond that, Your Honor, Mr. Henderson testified that there was no violation of the indentures. There was nothing in the record. Mr. Parker has not produced any notification or record of the filing of any liens against the excluded properties. So this record is clean

that are no such liens.

Mr. Parker --

THE COURT: So you --

MR. MILLER: Sorry.

THE COURT: So you're saying the debtors didn't purport to subject the critical property to a security interest. In fact, evidenced the intention to avoid it. And apart from that, didn't throw a mortgage or a UCC lien on the affected property.

MR. MILLER: That's correct, Your Honor. I might even point out there's actually a provision that if by accident a lien had been granted it would be invalidated because it violated the indenture.

Mr. Parker also makes an argument, Your Honor, for recharacterization over equitable subordination of the treasury's claim, including I think what he's saying some concept of deepening insolvency, there is nothing in the record, Your Honor, that in any way would establish the grounds for equitable subordination or recharacterization and should not be --

THE COURT: Forgive me, Mr. Miller, before you get too far, can you give me the cites to the definition of excluded assets and of the section of the financing agreement. I think we're talking about the December LFA, December 2008, on that granted a lien but also was a carve out previously --

MR. MILLER: Yes, Your Honor.

THE COURT: -- well, could one of your guys do that?

MR. MILLER: Could I furnish that to Your Honor by this afternoon?

THE COURT: Yes, I just need to be able to read it for myself.

MR. MILLER: Yes, sir.

THE COURT: To second-guess you in that regard.

MR. MILLER: Your Honor, the --

THE COURT: With you and Mr. Parker.

MR. MILLER: Yes, sir. And, Your Honor, in connection with the infamous 62,700 dollars, an unfortunate incident. Your Honor asked the question as to what would be the status of claiming of that 62,700 dollars? I would refer Your Honor to the case of Doe v. Pataki, 481 F.3d --

THE COURT: George Patki?

MR. MILLER: Pataki, a former governor.

THE COURT: My classmate?

MR. MILLER: I didn't know that, Your Honor. You're a fortunate man indeed.

THE COURT: Go on. Doe versus Pataki.

MR. MILLER: 481 F.3d 69 and 75-76, a Second Circuit decision in 2007.

THE COURT: What was the jump cite?

MR. MILLER: I'm sorry, sir?

THE COURT: The page cite.

MR. MILLER: 75-76.

THE COURT: Okay.

MR. MILLER: And I'm quoting, Your Honor, "The basic principles governing interpretation of consent decrees and their underlying stipulations are well-known. Such decrees reflect a contract between the parties (as well as a judicial pronouncement) and ordinary rules of contract are generally applicable", citing United States v. ITT Continental Baking Co., at 420 U.S. 223, 236-37 (1975), see Crumpton v. Bridgeport Education Associates, 993 F.2d, 1023,1028 (2d Cir. 1993). In the face of the holding in that case, Your Honor, we would conclude that, unfortunately, that the 62,700 dollars is a contract claim.

THE COURT: A contract claim and, therefore, it's just like all the other contract claims that you can only take for the remaining unsecured community?

MR. MILLER: Exactly, Your Honor.

Your Honor, the arguments that have been made, and which are not supported by the record, that disapproving the 363 transaction would be a benefit for bondholders, in particular, and maybe the consumer victims make the same argument. But, Your Honor, the economics that are before the Court don't change if this transaction is not approved. They just get worse.

GM is in a losing position now. Continuation of this case in Chapter 11 will lead inevitably to a liquidation. A liquidation which will have systemic results, Your Honor. There is a whole community of suppliers that rely upon GM that have been acknowledged by the federal government to be in the danger zone if this company should be liquidated. There are hundreds of thousands of jobs in the supplier industry that would be affected and would deepen whatever the economic crisis -- whether you want to call our economic crisis a recession or a depression, but it would deepen that crisis to the detriment not only of the economic stakeholders in this case but to the nation as a whole. And in all of the circumstances that have been presented, again, I have to say Your Honor, there is no alternative. It is liquidation or this sale and liquidation is draconian.

So we submit, Your Honor, that the 363 transaction complies with the applicable principles of law. The debtors have amply justified the exercise of their reasonable business judgment and have articulated the rationale for their judgment. There is no realistic alternative to preserve the going concern value of the business and the assets to be sold. In support of the motion the debtors have filed all of the declarations and exhibits that support this transaction. The testimony of Mr. Worth is not challenged as to the values here by any other financial expert. The testimony of Mr. Repko is not challenged

in any way as to the lack of financing. The testimony of Mr. Henderson, including his declaration, sets forth at length and in detail the considerations that went into the commencement of this 363 transaction. The considerations that the company went through in the negotiations with the U.S. Treasury --

THE COURT: Pause, Mr. Miller.

MR. MILLER: I'm pausing.

THE COURT: Back to fairness opinion, if there aren't any competing bidders or any alternatives to liquidation, how important is it that anybody trying if the consideration is as much as Worth thought, I would think that if the secured lenders pushes the credit bid and as long as it's more than the liquidation analysis and if that bid is the only game in town, does it matter if the liqui -- if the fairness opinion was right or not?

MR. MILLER: I'm going to give you my view, Your Honor before everybody jumps up in the back from the investment banking community and jumps on me.

THE COURT: You going to tell me that they give a lot of money for something they didn't need?

MR. MILLER: No, Your Honor. We're dealing with one of America's largest corporations. We're dealing with a company which has a public board of directors. Almost all the directors, with the exception of Mr. Henderson, are independent directors.

THE COURT: And he'd like to be protected against claims of breach of fiduciary duty and due care and the like?

MR. MILLER: Exactly, Your Honor.

THE COURT: I assume they had -- do they have their own counsel?

MR. MILLER: Yes, Your Honor. The board of direct -- the independent members of the board of directors are represented by Cravath, Swain & Moore.

THE COURT: All right. And to the extent that you are relying beyond a good business reason that the ordinary stuff we look at on any ordinary business judgment test getting a fairness opinion goes a long way to helping and business judgment?

MR. MILLER: Exactly, Your Honor.

THE COURT: All right. Continue.

MR. MILLER: So, Your Honor, we conclude that this transaction is in the best interest of these debtors. Is in the best interest of every economic stakeholder and benefits the general unsecured creditor body. Because without this transaction, there is no recovery for general unsecured creditors and it may be a very valuable recovery. I mean a large recovery, Your Honor. As Mr. Wilson testified this morning, it's the intention of the treasury to try and facilitate an initial public offering as early as 2010, which will provide liquidity to these shares of stock. And there is

downside protection that was granted in the context of the warrants that are part of the deal that was made between the treasury and the bondholders. A deal that was negotiated directly with the treasury and a voluntary contribution by the U.S. Treasury to provide more consideration.

So, Your Honor, this is a classic 363. I don't think I can recall a case that demanded the necessity for consummation to avoid what would be horrific consequences for all of the parties involved and all of the communities in which this company does business and all of the communities in which its suppliers do business. So we ask Your Honor to approve the transaction. Thank you very much.

THE COURT: Does the government, Mr. Jones or Mr. Schwartz want to be --

MR. JONES: Yes, Your Honor.

THE COURT: Before you get up, Mr. Jones, how long do you think you're going to be? If you're going to be more than ten minutes, I wouldn't mind taking a break.

MR. JONES: Your Honor, I expect to be less than that.

THE COURT: Okay. Let's do it.

MR. JONES: May it please the Court, David Jones, Assistant U.S. Attorney for the Southern District of New York.

The United States joins and strongly supports the 363 motion before the Court. As we've stated throughout the case,

the United States has committed enormous public resources to achieve the swift certain creation of a commercially sound new General Motors. The evidence is overwhelming and uncontradicted. The only feasible way to achieve that goal is through the 363 motion before the Court today and the transaction confers enormous value on the estate that will remain to be administered through the bankruptcy process.

This transaction more than meets with the requirements of Section 363. The evidence is abundantly clear that it was negotiated intensively and at arm's length. It is far and away the highest and best offer achieved through sales approval -- sales procedures that this Court has previously approved and, indeed, no other offer has come in. The transaction far exceeds the estate's liquidation value and the record is also undisputed that liquidation, which would be calamitous and a freefall situation, is the only alternative to this sale.

As the evidence also has made clear, time is absolutely of the essence as New GM's commercial viability requires rapid completion of the sale. We have unambiguous testimony during the hearing that the government conditions its funding on a prompt sale order. That has been a condition of the government's lending throughout. And we heard during the hearing that it remains a condition of the government's willingness to participate.

The government acted based on its sound and independent business judgment that it cannot and will not risk public dollars on the slower and less certain process and that the 363 transaction contemplated is both legally appropriate and necessary.

Your Honor, there's been -- has been or may be some question or allegation the government has not acted in good faith. But to the contrary, the government has exhibited paramount good faith at every aspect in its -- in every aspect of its dealings with General Motors. There's no evidence of collusion or improper conduct to undermine the bonafides of this sale. Indeed the government was motivated first by acting as a prudent lender and then in connection with the 363 transaction as a purchaser, as Mr. Wilson repeatedly testified, motivated simply by the goals of serving it's commercial necessity as it moved into a phase where it would be operating the new GM.

Your Honor, I won't dwell on the objections. My remarks would be just duplicative of Mr. Miller's in which I join. But no one has seriously called any of what I've just said as to the fundamental merits of the transaction into doubt. And there is no basis to call those assertions into doubt. We do join in Weil's analysis of why each and every objection lacks merit. And for these reasons, we join General Motors and urge the prompt approval of the 363 motion. Thank

you, Your Honor.

Oh, I'm sorry, Your Honor, I have one more narrow comment to say which is in response or in elaboration to some questions directed to Mr. Miller regarding the Chrysler sale order, in case it may be helpful.

THE COURT: Yes, thank you.

MR. JONES: The 363 order in Chrysler, which was entered on June 1st, and I apologize I don't have extra copies, but I think --

THE COURT: I think I can find it on ECA.

MR. JONES: -- yes, it's obviously available -- defines the claims that are being -- that the property of the debtor was delivered free and clear of on pages 2 and 3 of the document, that's where the defined term is located. In turn, that paragraph 9 on page 26 of the order, the order provides that the assets are transferred free and clear of claims as defined earlier in the document at pages 2 and 3. And Mr. Miller finally was correct that the order includes injunction language. That's located in paragraph 12 of the order at pages 28 and 29.

So, Your Honor, the broad principles I've just enunciated and we strongly support the motion, and I do note that the remarks I just made and the particulars of the Chrysler sale order make clear that what's being done today is perhaps unprecedented in economic scope in some respects, but

precedented and fully supportable as a matter of bankruptcy law. Thank you.

THE COURT: All right, thank you. Who else is -- Canadian government?

MR. SCHEIN: Yes --

THE COURT: All right. Canada and Ontario. Mr. Schein, come on up, please.

MR. SCHEIN: Good afternoon, Your Honor. Michael Schein for Export Development Canada on behalf of the governments of Canada and Ontario and as the DIP lender and a contemplated equity owner of New GM. Your Honor, Canada has and continues to support the prompt emergence of GM and the sale transaction before this Court. Canada believes the arguments made by the debtors and supported by U.S. Treasury, in respect of the consummation of this sale, both is supported by the record before this court as well as applicable law. Moreover, Your Honor, timely closing of this transaction is important to Canada and marks a historic restructuring and the alternative, Your Honor, liquidation, is in no one's interest including Canada.

According, Your Honor, we respectfully request that the Court approve the sale transaction and overrule all of the objections for the reasons set forth by debtor's counsel. Thank you, Your Honor.

THE COURT: Thank you, Mr. Schein. UAW want to be

heard? It'll be you, Mr. Bromley, or Ms. Ceccotti?

MR. BROMLEY: Actually, Your Honor, if I could ask your indulgence, it would be both of us for a reason I'll explain.

THE COURT: Sure. Sure.

MR. BROMLEY: Just to start, the UAW is obviously very supportive of this transaction representing over 500,000 Americans who are concerned about the rapid emergence of General Motor. The UAW has spent a lot of time, several years indeed, working with all of the major automobile companies in the United States to guarantee their continued viability.

THE COURT: The 500,000 you're talking about talking is more than the number who work for GM in North America but includes the suppliers who would be adversely affected by --

MR. BROMLEY: Well there are 61,000 -- I'm sorry, Your Honor.

THE COURT: No. Go ahead.

MR. BROMLEY: There are 61,000 active UAW members, as well as 475,000 retirees.

THE COURT: I see, okay. Continue, please.

MR. BROMLEY: And in connection with all the work that has been done over the past several years, the UAW entered into the VEBA arrangements several years ago. And in the fall of 2008, stood by, side by side, in the person of President Ron Gettelfinger with the chairman and CEO of each of Ford,

Chrysler, and GM, when they appeared before congress looking for assistance. And as Mr. Curson testified, the UAW negotiated two complete collective bargaining agreements, one prior to the February deadline, and another prior to the May deadline, in order to help facilitate the rehabilitation, not only of General Motors but of Chrysler as well.

And we stood before Judge Gonzales less than a month ago, urging his indulgence and the approval of the deal relating to Chrysler and we stand here again today asking the same from you, Your Honor. Mr. Curson's declaration in his testimony made clear that the collective bargaining agreement amendments were needed and required by the U.S. Treasury, and that those amendments are part and parcel of the deal with the VEBA. Indeed, without one there would not be the other. And were the deal not to go forward on the consolidated basis, that the modifications to the collective bargaining agreement would not be honored and be in effect.

So, Your Honor, we believe that the arguments that have been made with respect to the UAW being advantaged here, did not take into account the issues that Mr. Miller raised, and indeed, the issues that Mr. Wilson raised, which are that there are certain commercially necessary liabilities that the new company needs, and those liabilities relate to a workforce that can come in and bring this company back up onto its feet very quickly. And without the VEBA, and without the amendments

to the collective bargaining agreement, it would be impossible to do so. Indeed it's a condition to the DIP, and it's part and parcel of the master sale and purchase agreement.

So for these reasons, Your Honor, we certainly urge that the deal be approved. We also reserve any rights to respond to any comments that are made by the objectors in connection with the UAW. With respect to Ms. Ceccotti, there's also a list of objections that have been raised by individual retirees, because part of the motion is the approval of the UAW retiree settlement agreement. And so it's with respect to those specific retiree objections that Ms. Ceccotti would approach the Court.

THE COURT: Sure. Ms. Ceccotti come on up, please.

MS. COCCOTTI: Good afternoon, Your Honor, Babette Ceccotti, Cohen, Weiss & Simon, LLP, co-counsel to the UAW, and as Mr. Bromley indicated, we submitted two filings in support of the sale transaction. The first response dealing with the matters that Mr. Bromley referred to, and in addition, we submitted a supplemental statement in support of the transaction specifically directed to approval of the UAW, the document that is known in the various documents in this proceeding as the UAW retiree settlement. Here we have specifically addressed responses in individual letters that have been submitted by UAW retirees expressing their objection to approval of the retiree settlement agreement.

In case it hasn't been mentioned before, I should point out that the UAW retiree settlement agreement is an exhibit, it's Exhibit D to the MSPA, which I believe is in evidence as Exhibit 6A. The supplemental response is at docket number 2631 and Mr. Curson's declaration is also submitted in support of our supplemental statement, I should note. Out of approximately half a million retirees and others -- and here I'll just pause to explain a little bit more about the numbers, since your Honor raised the question a moment ago.

The number of roughly 475,000, we think it's probably closer to half a million at this point, that refers to retirees, surviving spouses and dependents. So -- all of whom we consider "UAW represented retirees" when we talk about retiree health benefits and the group for whom UAW serves as the 1114 representative in the bankruptcy context. So we have -- in discussing the settlement we basically, roughly use the figure a half a million. I'm going to reference in a moment a joinder to our statement in support of approval that was filed by class representatives in the Henry 1 and Henry 2 litigations that you'll note that they are using a number of --

THE COURT: Pause, please.

MS. COCCOTTI: Yes, they're --

THE COURT: The number between 475,000 and 500,000 that's all folks who either they or their spouses had once worked for GM?

MS. COCCOTTI: Correct. Yes. And they, for example --

THE COURT: Compare and contrast it to other big three manufacturers or supplier companies.

MS. COCCOTTI: This is strictly GM only. I should say GM only, in addition there are some Delphi retirees; Delphi was once part of GM and now going to be returning to default, so with those two groups, Your Honor. So out of this, let's call it half a million, retirees and others, the UAW was able to indentify fifty-six individuals whose letters indicated or could be read to indicate or state an objection to the approval of the retiree settlement agreement. We compiled those letters -- we did two things actually, Judge. We submitted to your chambers copies of the letters in this format. If you don't have that I'm happy to hand you up another one, just for convenience, we pulled them straight off the docket so that you could read them.

THE COURT: I think your gathering them up is helpful so if you can hand it up at some point, that would be useful.

MS. COCCOTTI: I will do that, Judge. We also have a chart at the back of our supplemental statement that, again, lists these individuals and just attempts to characterize the nature of their objection as best as can be determined. Perhaps, not surprisingly, most of those who have written letters have focused on changes in the plan of benefits that

will go into effect almost immediately upon approval of the retiree settlement agreement, if it's approved by this court. Individuals understandably concerned and unhappy about the loss of dental benefits, vision, and the like.

There were some other objections as well, we had several retirees who objected based on the fact that under the UAW's governing constitution, they do not vote in the ratification process that Mr. Curson described to us this afternoon. There were some scattered other objections, some concerned about pension benefits, some which were just sort of blanket "I object," "I object to the GM bankruptcy," "I object to sort of everything about the process." And as we stated in our papers, the courts have generally found that where we have such generalized objections, they don't help the court in determining how to deal with them, and in general they're not considered beyond that.

With respect to the others, we have said in our papers that, in essence, the types of objection having to do with changes in benefits and reductions in benefits are objections that the courts, in dealing not only with the Henry 1 and Henry 2 settlements have addressed, but also courts in similar -- in addressing similar settlements involving retiree health, particularly where retiree health obligations shift, as they did in GM, from the employer to an independent VEBA. And what these courts have said and which we think is right on

target here as well, is that while the benefit reductions are regrettable, the alternative to this transaction and the alternative to approval of the retiree health settlement is as Mr. Miller described and therefore placing the benefits that those retirees enjoy today at great risk. So that while the reductions may be regrettable, over all the settlements -- settlement, we believe, should be considered fair, reasonable, and adequate, vis a vis the retiree class and vis a vis these retirees on that basis and should be approved, notwithstanding their objections.

I did note, and I would like to note again, the joinder of the class representatives in the class actions, Henry 1 and Henry 2, their joinder is at docket 2636 and they are supportive, as well, of approval of the retiree settlement agreement, in essence having joined our supplemental statement. With that, your Honor, I would be prepared to rest on our papers unless the court has other questions.

THE COURT: No, I don't.

MS. COCCOTTI: Okay. In that case, your Honor, I will hand you up the individual objections.

THE COURT: Thank you. Is there anyone -- any other folks who want to speak for the motion? I see no response. We'll take ten minutes and then we'll take the first objector. I said Mr. Richman would be able to start tomorrow so who will be the first person to speak under those circumstances.

MR. BRESSLER: We'll be happy to start, Your Honor.

THE COURT: Okay, Mr. Bressler. See you after the break. Thank you. We're in recess.

(Recess)

THE COURT: All right, Mr. Bressler.

MR. BRESSLER: Thank you, Your Honor. Barry Bressler from Schnader, Harrison, Segal & Lewis, for the Ad Hoc Committee of Consumer Victims of General Motors. As Mr. Richmond noted, I hope Your Honor will give me some indulgence. We'd be a little better prepared if it was tomorrow having heard half the evidence today but we appreciate the opportunity. I represent a fragile financial and physical constituency. I know Your Honor appreciated it yesterday; there were some of our clients in the courtroom, coming from all over the country. These are folks who have suffered accidents, and if deprived of the opportunity for full redress, will lose the chance to recover from medical benefits, will lose the chance to replace their lost wages and will lose their chance to recover for pain and suffering and will be thrown into the unsecured creditors' pool.

I heard Mr. Henderson say that he's concerned about the humane treatments of the GM employees and I would hope that someone, either the Treasury or GM would also be equally concerned about the humane treatment of GM customers and product tort liability claimants. I will try and address

myself, Your Honor, to our first two objections and I will leave the argument over the 363 sale to the Attorney's General and to other counsel who have addressed it in their papers.

Mr. Miller has told us that this is a routine 363 sale case but I think I just heard the Attorney General say that this is an extraordinary case and I believe it's an extraordinary case. I think it's an extraordinary case because the purchaser, the debtor in possession financier, and the prepetition lender are all, in this case, the federal government. I'm not sure that that's ever happened before and I'm not sure in a regular commercial case that Your Honor might not have a different reaction if the prepetition lender, the DIP lender and the largest shareholder of the purchaser was all the same entity.

We do commend the Treasury for agreeing to assume future product liability tort claimants. And we do agree that that will help the reputation and the ability of New GM to sell cars. We have not heard anything that convinces us that not assuming current product liability claimants will not hurt the ability of New GM cars. And whether the assumption was because of the commercial reasons that were articulated or because this was a politically sensitive issue or because of comments made by the Second Circuit in Chrysler doesn't matter. It is commendable that the future tort claimants are being assumed. But here, the standards are not necessarily being met for a 363

sale. And unfortunately I am in the position of saying to Your Honor under those circumstances, I would hope that you would turn down the sale motion with some indication that if the successor liability issues were addressed in a different way that the sale might go through.

Let me briefly address some of the reasons. First of all, this in not the Chrysler case. There is no independent buyer. We were beaten to death in Chrysler with Fiat as an independent buyer, putting in a new technology that's going to teach Chrysler to build smaller, more fuel efficient vehicles. That's what the government said. That's what the purchaser said. Here, we have GM, which as I understand the testimony will sell the same vehicles; Cadillac, Chevrolets, Buick and GMC brand vehicles. They will have largely the same executives, will have largely the same workforce which they made an arrangement with the union for -- we'll talk about that later -- which will use most of the same plants, which will have the same dealer network. That doesn't sound to me like a totally independent buyer. I also do believe that Mr. Wilson is a very --

THE COURT: Mr. Bressler's, to what extent would be Fiat era Chrysler stop selling Jeep Cherokees and all of the other types of vehicles for which we now think of Chrysler.

MR. BRESSLER: And I would say that I made the argument in Chrysler that it was not an independent buyer and

was rebuffed and I understand Judge Gonzales' decision. But I think that Fiat made it clear that over the course of two years, they were going to switch around the technology and that they couldn't immediately stop selling the other vehicles and wouldn't stop selling the other vehicles but that they were going to introduce a smaller Fiat model as soon as possible and that the consideration that they were putting in the transaction was no cash but technology valued, depending on which point you looked at it, at between ten and thirty billion dollars for small car platforms, small car engines, small car power trains that they though Chrysler lacked and they would turn it over a period of time. They also had new management that they thought could run the company better and they brought in independent management that came over. And the new president was going to be a gentleman who was with Fiat and was coming in to run the company. That is not the same here.

THE COURT: Before you get too far, because I didn't want to interrupt you for a side but I'm afraid you're going to lose the train of thought. You made reference in your earlier remarks about comments made by the Second Circuit. The only -- I mean I have obtained and read the transcript of the argument of the Second Circuit, and insofar as I'm aware, the only thing that's formally issued for the Second Circuit yet, is something that says in substance, we affirm for substantially the reasons of -- stated by the Bankruptcy Court.

MR. BRESSLER: That is correct, Your Honor.

THE COURT: Okay. What was it in the comments made by the Second --

MR. BRESSLER: There was a comment --

THE COURT: -- that you were referring to?

MR. BRESSLER: I apologize. There was comment made by one of the judges. I think it largely went to the futures, that would a State Court really enforce the order of a Bankruptcy Court as to an accident that didn't happen for which there was no notice, that was going to happen several years after the sale transaction was confirmed.

THE COURT: I hear you. But at least seemingly, that would apply only to an unmanifested asbestos claim or a tort claim of the type for which your folks have now gotten the debtors consensual movement.

MR. BRESSLER: That is correct, Your Honor. And that was my point. That whatever the reason for moving over there, I commend that movement. I'm not sure which of the three reasons it was.

THE COURT: All right. Continue, please.

MR. BRESSLER: Thank you, Your Honor. The proposed transaction, while called an asset sale transaction, looks very much like a debt-for-equity exchange and the US Treasury currently owns one hundred percent of the New GM entity. Not withstanding Mr. Wilson's negotiating skills, I think it's

probably easier for him to negotiate with a company where the executive officers are all going to be working for him, within a very short period of time, if the transaction is approved.

Mr. Henderson testified, and Mr. Wilson for the Treasury, that it was the UAW VEBA receiving a percentage recovery substantially greater than that of other unsecured creditors. I understand the argument that essentially the VEBA and the UAW are the same party but I'm not sure that the legal differentiation here between them should not carry weight with the Court. There is an independent board for the VEBA, as we established. The VEBA is a separate trust fund administered by an independent board of trustees and the VEBA trustees have a fiduciary duty to the retired workers, specifically, and not to the UAW. And it is the VEBA trustees who decide what will happen to the stock in New GM that the VEBA receives.

That sounds to me like it satisfies some of the criteria for sub rosa plan argument, which is the one that we were making. The code says that under those sorts of circumstances, if you do a Chapter 11 proceeding, it is intended that there will be some delay. It is intended that there will be time for objection. It is intended that there will be some collaboration and negotiation and that those procedural and substantive safeguards are set up under the plan process. It did not sound like the difference between a sixty-day period and a ninety-day period was so substantial that the

planned process could not have been gone through.

I understand Mr. Miller's argument. I understand his argument about all the terrible things that could happen if the planned process dragged on. But I also have seen, Your Honor conduct a streamlined procedure and I am sure that you also could have conducted as streamlined a procedure for an expedited plan if that's the way that the debtor and the Treasury had decided to proceed. Good faith of the purchaser under Abbots insures that a 363(b)1 will not be employed to circumvent the creditor protections of Chapter 11 that I've just talked about.

THE COURT: Well Abbots is a Third Circuit case, if I'm not mistaken. Would I be more appropriately looking at Gucci in the Second Circuit for that proposition --

MR. BRESSLER: I understand --

THE COURT: -- on that issue?

MR. BRESSLER: I understand Your Honor's distinction and I understand where you're going with it.

THE COURT: All right. Continue, please.

MR. BRESSLER: And I understand also the DWA is a Third Circuit case but that we now have Chrysler in the Second Circuit, so that's where we are. The testimony has shown that assuming the existing tort claims will not affect the viability of the new company, that discriminating against the existing tort claimants will not help the consumer confidence and

reputation of New GM. Does anyone really believe that the US Treasury, for its enunciated reasons of supporting the 363 sale, for the jobs, for the position in the American economy, etcetera, would allow the sale to go down for covering what is probably five hundred million dollars but at most nine hundred million dollars worth of tort claims?

I want to cover one more area before I sit down, Your Honor, because I think that the Court has a misapprehension. It is correct -- and it sounds like most of the dealers are indeed indemnified by New Co however the Court should know, and we will submit supplemental papers if given the opportunity, that there are states where one cannot sue the dealer for product liability claims. It's a minority of states but there are such states. And the nature of the suits is also different in many other states where the standards for proving a case against the dealer are more stringent and higher than proving a case against the manufacturer and, of course, there are the economic and social realities of, in some rural states, the General Motors dealer being a person in town who is known to --

THE COURT: Or he's little league and stuff like that?

MR. BRESSLER: Exactly. Your Honor took the words out of my mouth. And the type of recoveries that could be had by a person who's severely injured are certainly different, as I think Your Honor could take judicial notice, against a large

national manufacturer deep pocket or against a local dealer. I think I have covered my arguments as to good faith. I think I have covered my arguments as to sub rosa plan and I will let others cover the 363 arguments as to why claims and not just interests should not be release under these circumstances.

THE COURT: Okay. Thank you very much.

MR. BRESSLER: Thank you, Your Honor.

THE COURT: Jakubowski, are you up next?

MR. JAKUBOWSKI: Yes, thank you, Your Honor. Your Honor, Steve Jakubowski for five product liability claimants, Callan Campbell, Mr. Junso, Mr. Chadwick, Mr. Agosto and, I'm sorry, Mr. Berlingieri. First, Your Honor, I would like to say that it has been a great pleasure to be here. I teach mock trial at a local high school in Chicago and I'm going to use this transcript as a way of teaching them some of the evidentiary rules, some of the mistakes that can be made and some of the proper ways to address the Court in terms of evidence and I appreciate that.

I also would like to thank the lawyers from Weil Gotshal, the -- from the U.S. attorney's office. We have been acting under extreme time pressures. I personally got involved in the case because of my shock at the Chrysler decision. I'm from the Southern Circuit and we look at things differently out there.

THE COURT: Especially certain of your circuit

judges.

MR. JAKUBOWSKI: Exactly. And in fact Your Honor, so within that short time frame I can say that while Gotshal has been fantastic in terms of responding to document requests promptly, providing thirty-five gig data -- document production that had a full concordance index that was fully OCR-ed that enabled us to quickly get to the heart of the issues and I think that's why the trial was as speedy as it was and again the same for the U.S. attorney's office.

So, I went to school with Judge Posner and he was my professor and now he's my Circuit Court judge. And again, we look at things differently out there. To us, successor liability is a matter of statutory interpretation and it is not a constitution that we are expounding but a statutory scheme that we are interpreting. And while TWA represents one circuit view, and it's unclear, based on your discussion and what we know from what's happened in the Second Circuit, it's unclear what exactly the Second Circuit holds as to successor liability claims.

And so, we also have the Sixth Circuit. And the Sixth Circuit says in the Michigan Wolverine case which is cited in the long footnote in my brief, that case says that 363(f) does not allow for in personam claims to be treated as interest in property; they're just not. So, I recall at one of the national conference of bankruptcy judges that -- yes, Your

Honor?

THE COURT: You think that Michigan Wolverine therefore should be regarded as overruling the White Motor which agrees with you on one of your points but disagrees with you on the bottom line?

MR. JAKUBOWSKI: Well, what I think that what White Motor does is -- it agrees with White Motor on the 363(f) point that White Motor says which is that 363(f) does not provide for in personam claims to be treated as interest in property. It says that very clearly and it's --

THE COURT: And then issues a free and clear order anyhow.

MR. JAKUBOWSKI: And why? And I don't mean to ask you questions but that's rhetorical.

THE COURT: I think that we agree there's an implication of 105(a).

MR. JAKUBOWSKI: Exactly. And that was in 1986, well before a number of Supreme Court decisions came out which significantly constrained the ability of Bankruptcy Courts to use Section 105 as a roving manner of equity and that's the Raleigh case.

THE COURT: We're rolling on the textual analysis and I agree with you that that's where an analysis would start. Let's -- the dance with the textual analysis --

MR. JAKUBOWSKI: Okay.

THE COURT: -- dance for as long as you can.

MR. JAKUBOWSKI: Okay. I dance for a while.

THE COURT: But I -- I beg your pardon?

MR. JAKUBOWSKI: I can dance for a while on that issue.

THE COURT: All right. We still have to stay within the --

MR. JAKUBOWSKI: I will. Well, I'm not sure I will.

THE COURT: Claims is defined in 101 of the code but interest is not --

MR. JAKUBOWSKI: Sure. Right.

THE COURT: -- nor is the expression interest in property

MR. JAKUBOWSKI: Right.

THE COURT: And we're going to come back to stare decisis because of -- I might come to the view that 363(f) when combined with an undefined interest in property under 101 is ambiguous. That stare decisis might be the way that one needs to go.

MR. JAKUBOWSKI: I'm sorry, Your Honor. Stare --

THE COURT: Forgive me.

MR. JAKUBOWSKI: Okay. I'm sorry.

THE COURT: But I guess my question to you is when the reason by which a tort litigant can go after a New Co, a purchaser, is solely by reason of the transfer of the property

or the acquisition of the property, isn't that something as to which the code is silent and leaves us with a hole that requires judicial interpretation?

MR. JAKUBOWSKI: I think the answer to that is no, obviously. That's why I'm here. And the reason I think it's no is for several reasons. First we start with Butner, in terms of what is an interest in property. And Butner says interest in property defined --

THE COURT: Well, Butner speaks as property rights.

MR. JAKUBOWSKI: Property interests and that's -- and that's no different than interest in property.

THE COURT: Doesn't Butner deal with what is property?

MR. JAKUBOWSKI: No. It deals with who has the authority -- that where -- how are those rights determined. Under what law are those rights determined. And those rights are state law rights; they're founded in state law. And the problem with Chrysler in determining that all tort liabi -- all product liability claims of all fifty states are interest in property that can be rejected as -- they can be sold free and clear is that it doesn't recognize that that determination is a state law determination and unless Chrysler has gone out and examined every single one of the fifty states to determine whether or not it is an interest in property in that state, I think it erred. And worse than that, I don't think it even had

the jurisdiction to be able to do that because at the end of the day, Your Honor, this is a question -- this is a case of boundaries. And the questions are from a statutory perspective or from a jurisdictional perspective, how far can we go here? And I think we're limited by the jurisdiction of 157.

THE COURT: Well, the problem I have with 157 is that distinguishes between a lowly bankruptcy judge, like me, can decide and the higher level Article 3. But wouldn't the same issue exist at district judge who are asked to make the same decision that I'm asked to make?

MR. JAKUBOWSKI: Yes.

THE COURT: All right.

MR. JAKUBOWSKI: Yes, it would. But they still could at least apply the law of the state. And determine whether or not it's an interest in property under the law of the particular state. In some states it may be and some states it may not be. The general tendency among the states that are surveyed in my brief in the long footnote, is that from a statutory perspective, these are not interest in properties. So, in a way, we just have to get beyond that and see -- well and so -- and deal with the policy issue of whether or not from a policy perspective it makes sense to sell the assets free and clear. In most of the cases it doesn't really matter. But when you're dealing with a case where there's sixty-nine million vehicles on the road and we know there's nine

hundred -- well let's take out the future claims -- there's five hundred, six hundred, something like that, million dollars worth of reserves out there for future claims, I think we -- I think we have to step back and see whether or not the policy -- you know, how to deal with the policy issues that are applicable here. And one of the -- one of the things that was raised in the reply brief from Weil Gotshal is it cites all these string cites that of cases that successful liability orders were entered.

Now, I have two problems with that. One is a procedural problem and that is that your case management order said very specifically, that when they string cite orders that have not -- that are not in books that we can find on LexLaw, that they have to go forward and lay out the procedural background and the context and why that's relevant. They didn't with respect to any of those. And I don't think the burden should be on the parties to figure out what the relevance of each one of these is or whether it's even distinguishable. So, I would ask, and I think that the case management order says that you will not consider those cases and I ask that you not consider them.

THE COURT: Well, I hear you on that.

MR. JAKUBOWSKI: That's --

THE COURT: But since I know the cases of that character that was --

MR. JAKUBOWSKI: Um-hum.

THE COURT: -- decided on my watch --

MR. JAKUBOWSKI: Okay. True. Which ones were those, Your Honor?

THE COURT: I'd have to go back in your brief but I suspect it was Bearing Point --

MR. JAKUBOWSKI: Okay.

THE COURT: -- perhaps Adelphia.

MR. JAKUBOWSKI: Okay.

THE COURT: And perhaps one or two others. I do know that for the most part 363(f) has not been disputed and ruled upon by the judge but at least in one exception, when using corporation of America, I think Mr. Smolinsky's in the courtroom, I ruled against your opponent, the United States government on that when their local U.S. attorney's office was representing the EPA and was asking for successor liability when I felt the environmental disaster was being sold from one -- from the debtor to the purchaser.

MR. JAKUBOWSKI: Um-hum.

THE COURT: And I ruled in that case after a 363 analysis that from day one the purchaser would be liable for the mess and for continuing duties from then on to keep it clean and/or to clean it up --

MR. JAKUBOWSKI: Um-hum.

THE COURT: -- but that it wasn't liable for the

original debtor's liabilities to the U.S. government for penalties and for prepetition duties to comply with orders to clean it up. That U.S. attorney wasn't very happy with me then but they did not appeal.

MR. JAKUBOWSKI: Um-hum.

THE COURT: Now, I guess they're very happy they didn't appeal. But you're quite right that the practice in this district and in Delaware, and maybe in other parts of the country, are just throwing out a bunch of orders with -- where something was done without the judge ruling on it ain't the most persuasive precedent.

THE COURT: Right. So --

THE COURT: -- but what they're doing has been ruled upon by a Bankruptcy Court affirmed by the Second Circuit, which is where I really need your help --

MR. JAKUBOWSKI: Okay, and I will be --

THE COURT: -- because --

MR. JAKUBOWSKI: Um-hum.

THE COURT: -- I don't like to cross the circuit.

MR. JAKUBOWSKI: I understand that.

THE COURT: And --

MR. JAKUBOWSKI: And I can't blame you.

THE COURT: Earlier this evening. I politely suggested to the circuit that it reconsider something because I thought it was really very wrong but until the circuit told me

I could, I did what the circuit tells me to do.

MR. JAKUBOWSKI: Okay. So, here's -- obviously, I've thought of that issue and I don't necessarily have the greatest answers in the world, but I think I have good answers. First, the circuit has not come out with his opinion yet and so we don't really know what they've held with respect to this issue. They've said substantially the reasons but these have different facts and we'll go through some of the facts that are different, that particularly make this different from a ruling on a policy grounds as in TWA and Chrysler. Because at the end of the day, TWA and Chrysler were decided on policy grounds. If you throw away the statutory, they were decided in the alternative. And you throw away the statutory ground and you say, okay, well, we got it wrong on the statutory ground but it doesn't matter because it's affirmed on the policy ground. Here I think that the policy grounds are different, and I'll get into that in a little bit. So, that's the first thing.

The second is -- and that -- the fact is there is a split in the circuits. I mean, my circuit comes down very strongly in this issue and Judge Posner is very articulate on this and he's no patsy to the plaintiff's bar by any stretch of the imagination. And when he comes down and says there are boundaries to 363(f), this decision came down two weeks after TWA. And he specifically cites to that and says, it's -- this is not a lien we're talking about, this is possessory interest.

It's not anything but it is an interest. It is -- it has something tangible and it has a right to that property.

So, I think that -- so let me get to the pot -- let me get to the facts here and why I think this is distinguishable from Chrysler. And so, I don't know if you have the Chrysler opinion in front of you, if you don't, Your Honor, I'd be happy to certainly read through what I think are the key aspects of it.

THE COURT: Give me a second. I'm not sure if I brought it out with me or not.

UNIDENTIFIED SPEAKER: If Your Honor would like a copy.

THE COURT: Yes, thank you. Just hold on a second. I found my White Motors so maybe there's something funny --

MR. JAKUBOWSKI: Okay.

THE COURT: I have a TWA. I have the Chrysler opinion.

MR. JAKUBOWSKI: Okay.

THE COURT: Go ahead.

MR. JAKUBOWSKI: All right. So, I start at -- I don't know if you have the West version of it --

THE COURT: I have the West one.

MR. JAKUBOWSKI: I start at headnote 14, which starts with Category 3 consists of tort and consumer objections. It says, the leading case on this issue --

THE COURT: Time out.

MR. JAKUBOWSKI: I'm sorry. The page number?

THE COURT: You have a jump cite --

MR. JAKUBOWSKI: Yeah. I do --

THE COURT: Mine actually has page references already.

MR. JAKUBOWSKI: Okay. It's -- I think it's 110 -- 111. And it starts Headnote 14.

THE COURT: Okay.

MR. JAKUBOWSKI: Okay. So, I'd like to start with first, however, the leading case on this issue, In re: TWA. So, I guess as long as we'll do a little exegesis here. First, I don't think that's a leading case on this issue. It may be the leading -- it may have -- it may be -- Collier says it's kind of a trend, but if you look at even the quote in the omnibus reply from the debtor and you actually read what Collier says, it doesn't say that everybody follows TWA now. And in fact, when you look at the case law, when it comes to 363(f), nobody follows TWA. Policy is another story. We'll talk about policy. But in terms -- I don't think it's a leading case. That's number one. Number two -- and you've got Fairchild -- I mean there are a whole bunch of cases that I cited in my brief that go against what TWA says with respect to the statutory 363(f). And then the next sentence, the code court overrules TWA, overrules the objections. Even so --

THE COURT: No, it says the court follows TWA --

MR. JAKUBOWSKI: -- follows --

THE COURT: -- and overrules the objections.

MR. JAKUBOWSKI: I'm sorry. I apologize, Your Honor, that's correct. And then it goes on, and I would like to criticize this next line. Even so, in personam clients, including any potential successor, state successor or transferring liability claims against New Chrysler, as well as in rem interest are encompassed by 363(f) and are therefore extinguished by the sale transaction, okay, citing White Motor which we've already talked about, does not hold that at all. And Ashburn was decided on policy grounds. It doesn't even mention 363(f) from a statutory perspective. So you can't say don't --

THE COURT: By that you mean, it was a 363(f) decision but it didn't engage in textual analysis --

MR. JAKUBOWSKI: None.

THE COURT: -- of the type that you think should be engaged in.

MR. JAKUBOWSKI: Has to be. The court says that -- the Supreme Court says Ron Pair, BFP -- I mean one after the other, just start with the text. And you branch out and I wanted to get to Judge Waldron. I mean, he at the NCBJ, right after BAPCPA rule came down -- everybody's pulling their hair out -- how do you determine this stupid statute? And so they

say, you have a toolbox. And the toolbox, you start with plain meaning. And after -- and you look. Is it plain? Is it clear? And you -- okay. Well maybe it is. Maybe it's not. But then you look at Piccadilly and you look at some of these other cases and they say, well look at how else it's being used in the code. So that's why I attached to the brief the forty times that the words "interest in property" are used in the code. And there's not a single time that you can replace the word interest with claim and have it make any sense at all.

And then you look at -- and then you say, okay, well are there any Supreme Court cases that have looked at interest in property. Look at Barnhill head. Barnhill's a great case. You know -- it's known for when -- when is the date of transfer. It's not when is the date of transfer. It's when did the interest in property -- when was the interest in property transferred? And the interest in property was transferred when there was an interest in the property. And the claim against the debtor for a dishonored check, for a bounced check, is not an interest -- or for a check, for the right under a check, is not an interest in the property in the debtor's account. That is a critical case.

Now, the other case that's a great case is BFP, which Judge Scalia is looking at the tortured definition of reasonable equivalent value and says you just -- you can't torture the language of the bankruptcy code to cut -- you know,

this left-handed, around your back, you know, to scratch your nose. You just can't do that. Because you'll give no meaning to what the code is. And that's what TWA did. Because by saying that they had to elevate -- that basically, if the debtor had never used the assets in the way the way they used it, the claim never -- would have never come up in the first place. Well that's -- then anything is a property in interest. It has -- that's why Judge Scalia said in -- it needs to be the majority, not the dissent but the majority in BFP, he said, you know, that would be infinitesimal -- to put reasonable and equivalent value the way that you wanted to -- you may as well have reasonable infinite value. You may as well mean anything. And it's the same here. If you're going to say that an interest in property is any -- arises with respect to any claim as to which there's -- from simple deployment of the debtor's assets, then you're basically saying there's nothing that's not an interest in property. So, anyway, that's kind of my response to that issue.

The second -- the next point kind of leaves the statute and goes to policy. Now before leaving the statute and going to policy, there are other tools in the toolbox that I think are important, that I raised in my brief and I'm not going to explain them here, but that are important to look at. And the first tool after you go through the language, and you look at interest in property, you then go to Congressional

intent. And so how do you determine it here? And there's three basic rules. First, you look at the other use in the code. And 1141(c) is a perfect example of how Congress could have structured 363(f) to read exactly the way everybody who's a proponent for the sale wants to read it, because it includes interest in property whereas 363 -- claims and interest in property and not just interest. And so I've cited to this footnote of the National Bankruptcy Review Commission. It was chaired by Marcia Goldstein, where they specifically -- this was the precursor to BAPCPA. This was the 1997 --

THE COURT: Yeah, but -- time out here, because she pointed out that Congress could have said it a lot clearer. But the fact that Congress has not said things as clearly as it could, and I don't want to be disrespectful of Congress, but they're a bucketful and --

MR. JAKUBOWSKI: I --

THE COURT: -- especially messy. But across the code, where Congress could have said stuff a lot better to express itself.

MR. JAKUBOWSKI: And --

THE COURT: I mean, the Catapult rule. Do you think for half a second that Congress intended that a reorganized debtor couldn't use his own intellectual property?

MR. JAKUBOWSKI: No. But again, we're not talking about Supreme Court case law. There are Supreme Court cases

that say, that Congress meant what it says and it says what it means. And that is -- I mean if anything's binding on you, Your Honor, it's the Supreme Court. And that is the rule that it follows through the Second Circuit. And we saw the Groom versus United States case, where you -- you mention something, it's you know, it assumes that it's not there. And it's not like this is -- it's not like this is BAPCPA but it's not BAPCPA. It was identified in '97. And it would -- nothing could have been a more pro-business change to the code than 2005. And it's not there.

So, I think you can't presume that Congress, you know, was lazy or didn't know what it was doing. I think in this instance, I don't think that's a fair presumption and I think in that respect, you're better off sticking with the Supreme Court guidelines that say, as in Decone v. Dela Cruz (ph.) case, cited Gratzluf (ph.) and all the ones that I've cited, that you're better off -- you're safer assuming that Congress says what it meant and meant -- and knows how to do that.

The next -- and then, of course, you look at pre code law. Pre code law was actually cited in the Second Circuit case in Manville. And so you ask, what is the Second Circuit's view on this? And until -- until Chrysler, I assumed the Second Circuit's view on all of this was the Johns-Manville case that just reversed by the Supreme Court, the Traveler's

case. But it got reversed by the Supreme Court on such a narrow ground that it didn't reverse it at all on any of the other issues which were, you know -- which were, I think, controlling in this case. You can't condition financial -- you can't condition releases on financial participation. That's an abuse. And it cites the Carta case. And it cites the Combustion Engineering. I mean, you -- the idea that you can -- that you can condition a major transaction in a bankruptcy, whether it's a sale or whether it's a plan on the financial participation, the do or die conditioning of the purchaser, is an abuse. That's what the Second Circuit calls it. An abuse.

And you look at the transcript in Travelers. There's -- you don't find a justice on the Supreme Court that disagrees with what Justice Stevens and Justice Ginsberg said in their dissent that when it comes to jurisdiction and releases of non-debtor parties that -- that you can't do that in a bankruptcy case without extreme, extreme protections. The Court just doesn't have that power. Doesn't --it's beyond the boundaries. Out of bounds. So, I think, Your Honor, that maybe this is the time, before the Second Circuit rules, to get it right. You have the opportunity, as nobody else will after you, to tell -- to give the Second Circuit some guidance as it comes down with that opinion.

THE COURT: Usually it goes the other way around.

MR. JAKUBOWSKI: Usually it does but here's -- but here you do have that opportunity because they haven't ruled yet. And my guess is that they're pulling their hair over this issue. And as I read the news reports about what happened in the transcript was -- should we just let the Supreme Court hear it? Okay, let's take it over there. Everybody said, yeah, let's go there. But the Supreme Court does --

THE COURT: I lost you.

MR. JAKUBOWSKI: I thought that -- I thought that the expedited nature of that process was so fast, that I'm not sure that the Second Circuit had the opportunity to give it the kind of serious consideration, with respect to this issue, the other issue I don't have any quarrels with. But this issue, I don't think that that was the focus.

THE COURT: Is that the kind of judgment that I, as a Court, two levels below the Circuit, am I allowed to make?

MR. JAKUBOWSKI: Yes. I think that --

THE COURT: Yes?

MR. JAKUBOWSKI: I think so.

THE COURT: Meaning --

MR. JAKUBOWSKI: Here today.

THE COURT: -- assuming arguendo that I agree with you on textual analysis, I mean, I don't think I'm going to lose my job if they disagree with me but I -- I really think I've got to follow my Circuit.

MR. JAKUBOWSKI: I don't -- I don't know what they said on that issue. I don't know what they said. And I don't how they applied it to this case.

THE COURT: If anything, Judge Gonzales, where I'm on record in four, five, six decisions as saying that -- in believing in stare decisis and that the interest of consistency and predictability for the financial community, certainly in this district but nationwide since so many people look to law out of our district, is that we should follow each other's decision. I'm not talking about district judges; I'm talking bankruptcy judges who know bankruptcy.

MR. JAKUBOWSKI: Okay. And you know what?

THE COURT: Forgive me.

MR. JAKUBOWSKI: I'm sorry.

THE COURT: And we follow each other's decisions in the absence of manifest error. And assuming without now deciding that I agreed with you on textual analysis, and/or believing that Fairchild is a better reading than somebody else's reading of 363(f) and its related provisions, I sure don't think Judge Gonzales' decision is fine here.

MR. JAKUBOWSKI: Well, I'll tell you why I think it's distinguishable. Because let's assume that it's error on part A but who cares because you can decide in the alternative. And so let me explain why I think this case differs from Chrysler on policy grounds and therefore is -- will fit within the

Second Circuit's ruling on policy -- on policy grounds. And for that, let's turn to the next Headnote 15, 16 and 17. The first -- there're two basic policy grounds in Chrysler. One is -- well, excuse me. The two basic policy grounds in TWA. The one of them is picked up in Chrysler. But let me talk to TWA's -- both of their policy arguments because I think they're both important in terms of being able to ground your decision here.

And let me deal with the easy one. The easy one is TWA decided the way it did in large measure because of the fact that they were unwilling to accept the idea that some creditors would do better than others. They were unwilling to upset the relative priorities among the creditors by giving one a leg up and a second bite at the apple as Judge Posner said is fine, TWA said is not fine. They weren't -- they just weren't comfortable with that idea. Well, that, as we know, does not apply here. The relative priorities were irrelevant to the purchaser and there's -- the relative priorities are being undermined at every single level of debt.

So some creditors are getting paid in full, some aren't and everything depends on one issue. One issue only. And that is, as Mr. Wilson well stated, is the -- any liability was assumed that was necessary to advance the commercial interests of the successor. That was it. That was the sole basis for the decision. Not relative priorities, that actually

didn't matter and the reason that it didn't matter because nobody was getting anything in this case anyway so they could do whatever they wanted. That was the whole point of why it wasn't sub rosa and all that stuff.

So, the question then is okay, let's put issue A from TWA aside and now let's look at the other issue. And this is the key issue and Judge Gonzalez touches on it in the first sentence of Headnote 15. And he says other objections are premised on the category that a free and clear sale would be fundamentally unfair, inequitable or in bad faith. The policy -- that I really highlight that word; the policy, not the law -- the policy underlying 363(f) is to allow a purchaser to assume only the liabilities that promote its commercial interests. See Fish -- New England Fish And White Motor. That is true. That's what those cases hold. It's policy.

But the question is can you decide -- can you hold here that the policy applies. In Chrysler, there was a real issue on whether or not the buyer would really actually continue would the successor liab -- if the successor liabilities were in place. Here, I don't think the evidence shows that. And I think you need to make a factual finding on this. And the reason I don't think -- and that's what I think will distinguish this case from the ones before you or the ones to the side of you or above you and the factual finding is this. The debtor and the treasury sat down and they split up

the liabilities and they had this -- there were pensions that were being assumed, and credit bids of secured debt and other secured debt would be assumed and they went through the whole laundry list.

And there was -- if you look at Exhibit 6 to the Henderson deposition, there were 176 billion dollars of liabilities on the balance sheet of GM at 12/31/08. And they took six billion and put them in a bucket on the side and said these are our politically sensitive assets and liabilities. We've got environmental product liability, asbestos, splinter unions and some other miscellaneous. Add total, six billion dollars. So, those were politically sensitive in the sense that nobody really knew, as of May 7th, how they wanted to deal with those yet because of the ramifications of them from a business perspective and from a political perspective; that's the testimony. And so they had continuing discussions about it and continuing phone calls and letters from senators as to all this stuff. And as time went on, decisions were made as to whether to assume them or reject them or visa versa.

And as of -- and when Mr. Henderson went to the board on May 29th, they reached a decision as to what that segregation would be. And you look at the PowerPoint that's attached to his deposition as Exhibit 31 which I know it's been designated. You will see that at page, I believe, 8, it's the section that's entitled liabilities to be assumed at closing.

So, at the bottom there's a bullet; No purchase price adjustment regardless. And what that meant was that there would be no segrega -- that once that decision was made as to the liabilities that would be segregated in that politically sensitive bucket, there would be no further adjustment to the purchase price either a higher purchase price for the purchaser or a diminution in the estate -- to the estate in terms of proceeds, if subsequent decisions were made that changed that allocation as to that bucket.

And how do we know that that's true? Because there were two changes that were made with respect to product liability claims and neither of them resulted in a change of the consideration. There's not a single case out there that holds that if there's no change in consideration that TWA analysis doesn't apply. Because in all those cases, there's -- in TWA, there's a possibility of a discounted bid. Every case where there's an issue with respect to the effect of the estate because of the diminution in consideration, then you had a TWA issue and that's why they were able to approve the sale and that's what Chrysler was about. But that's not the case here with respect to this bucket.

THE COURT: I understand. Continue.

MR. JAKUBOWSKI: Okay. So, I guess --

THE COURT: And forgive me Mr. Jakubowski. I've been hearing a lot --

MR. JAKUBOWSKI: I know and I --

THE COURT: -- that you've got the most important issue on the motion today.

MR. JAKUBOWSKI: Thank you, Your Honor.

THE COURT: But try to --

MR. JAKUBOWSKI: Believe me, I think I've said just about everything -- I've danced just about as far as I can here. Obviously, I have other things that I say in my brief but I would like --

THE COURT: Which I've read and I'll read again.

MR. JAKUBOWSKI: Thank you. I would like to raise a couple of issues with respect to the argument of counsel. First, maybe other parties want more. This is really not a question, in my view, of giving some -- of simply giving somebody more. This is a question of what can you do? What does the law -- what are your boundaries? What does the law allow you to do? And that's different. That's why we're here. You know, bankruptcy is what it is and you roll the dice with the way they are but there are issues -- this isn't just a question of wanting more. This is a question of what you can do.

Now, one of the things that I haven't heard yet that I think is critical here and that surprises me is that the idea that if you change this bucket and say look with respect to this bucket that's politically sensitive, that there was no

change in consideration, I'm not going to allow -- I don't think I have the authority under TWA or any other case to allow those not to be assumed, I'm sorry. You know, you challenge lenders -- they want to be a commercial lender, come into court -- how many times have you told a commercial lender you can't do it, I'm sorry. Go back, come back with something else. That's what they want to be, I think that's what you have to do here. And there's a number -- there's a lot in Second Circuit authority about telling lenders to go home and come back with a new proposal.

But more importantly, let's say they were --

THE COURT: DIP lenders overreach all the time.

MR. JAKUBOWSKI: Well, exactly. Okay, but --

THE COURT: But I don't know if there's the same basis for conclusion that the United States government is trying to avoid a systemic risk that's going to affect not just a couple of hundred thousand North American employees or maybe the couple of hundred thousand is beyond North America, I'm not sure but many, many employees. And as importantly, the supplier community that needs GM to survive so they could survive and the communities that look to GM for their economic health. You really think that's analogous to the way that commercial lenders behave?

MR. JAKUBOWSKI: Well, in this instance with respect to this issue, yes. And the reason is for -- twofold. First,

Mr. Wilson, if he didn't say anything, he said I am a commercial lender. That's one thing -- in this case I'm a commercial lender, it's a commercially reasonable, I'm going to do what a lender's going to do.

THE COURT: Wasn't the context of that where people were trying to say that forty-nine million bucks of taxpayer money should be converted to --

MR. JAKUBOWSKI: No. No, it wasn't. It was in response to my questions. It was a response to the question of does the lender -- why are you rejec -- why are you not assuming these? Because I'm a purchaser. I'm basically -- I'm a credit bid lender. I'm not interested in this stuff. I have no -- what obligation do I have to pick these up? That's what every lender in the world that comes in with a credit bid says. So, with respect to this issue, they're acting like a commercial lender and I think they should be treated as such and that's the way they want to be treated and that's why they're being so hardnosed here.

Now, the other thing is that if they were -- let's say they were to come in and say, Your Honor, congratulations, you just killed GM. I would turn to the Creditors Committee and say, when are you filing the complaint for breach of contract? They have a contract here. They have a contract that they are required to act commercially reasonable under. They can't walk because of -- because there's a few -- for

62,000 bucks in some bucket. They can't do that. And I'm sure the Creditor's Committee would jump on that.

So, I think it's different. I don't think they can come in here and just walk away. They signed a contract. They put us all through a significant amount of work and toil with respect to this. And they can't just walk away from that contract without exercising commercial reasonableness. And walking away from a bucket that is inappropriate as a matter of law to walk away from, that there's no effect on the estate if they're required to take it, is commercially unreasonable breach of contract were they to take that position. And they would be, in my view, responsible for all the damage to the estate for that, whether it's a -- whether it's a subordination that they're in, so you subordinate their debt. You know the good thing is? You make that decision.

THE COURT: I would think the Court of Claims would

MR. JAKUBOWSKI: Well, I don't know. In Court of Claims of Chicago it's about a two hundred and fifty dollar limit. That's why I'm laughing.

THE COURT: A court -- a Federal Court?

MR. JAKUBOWSKI: Ok. That's -- I guess that's right.

THE COURT: That's suffering from any --

MR. JAKUBOWSKI: Well that's right.

THE COURT: -- issue that's subordinated --

MR. JAKUBOWSKI: Well, no I think it is.

THE COURT: -- and --

MR. JAKUBOWSKI: I don't think it is here because they came in. They're acting like a commercial lender. They signed a contract they're subject to. They're subject to the normal laws of contract. If you're a defense contract, the U.S. breaches the contract, they come before a Court of Claims and get sued and pay up if they have to.

THE COURT: Go on.

MR. JAKUBOWSKI: Now the other thing is that there is no -- there is no factual basis in the record to say that they will -- they will walk. In fact, I think, because I don't have the transcript, but I think when we see the transcript of Mr. Wilson's testimony, he will say that there were an infinite number of possibilities of what could happen. And he did go through all the scenarios of what they might do and how they might respond. So, I don't think it's -- this is -- they are a commercial lender and they're not a commercial lender. Right. They're a commercial lender in the way they're acting but they're not a commercial lender in the sense that they're in -- it's a national priority -- and Mr. Wilson himself said that we will respond. We don't know how they're going to respond. They don't know how they're going to respond. But that's why it's in your hands.

Now, what's interesting is that just the way the world is set up here, they negotiated with everybody but they

can't come to the Court and say, Your Honor, what's acceptable to you? We'll make this part of the deal. They said -- Mr. Wilson said, we paid the least amount we could possibly pay for this. It turned out to be ninety billion dollars. Okay, so they paid ninety billion dollars for the company. But that was the least amount they had to pay to get the deal done, because it was so important to them to get the deal done, that's what they paid. Now what is this -- so -- but they couldn't come to you and say, Your Honor we think -- we talked to counsel, we think we know what the law is and there's been a lot of precedent in the Circuit, there's Chrysler, there's all these other decisions. But they can't come to you -- they didn't even know you -- who -- whether you were going to be the judge, and negotiate out what would be an appropriate resolution in advance.

So, we had to go through all of this and come here and they say to you, okay negotiations are over, this is what -- take it or leave it. How fair is that? I mean, it's only because of the way it's set up that they didn't come to you in advance. But they went to everybody else in advance, they got everybody else's agreement so why don't make them come back to you with the right response and get the right answer and follow the law and respect the boundaries and do the right thing?

I have nothing else, Your Honor.

THE COURT: Thank you. Okay. I'll hear other people

on the tort side. But, obviously -- I think we've pretty much covered things. Mr. Esserman, I'll hear from you next. Mr. Esserman, I think at this point I'd prefer if you limit yourself to things that relate to asbestos.

MR. ESSERMAN: That's what -- I'm sorry.

THE COURT: Okay, go ahead.

MR. ESSERMAN: Sandy Esserman for the ad hoc committee. That's what I was intending to do, Your Honor, I was not going to cover any other of the topics that were either covered by other parties or covered in my brief. And to a certain extent Mr. Jakubowski covered certain things that I was going to cover. In fact, his presentation sounded like the presentation of "This is My Life", he cited so many cases that I either argued and won or lost or have been in.

But anyway I want to focus strictly on the future clients' issues which I think is to me one of the more troubling aspects of this -- of this sale. And a week or so ago I asked that there be a future clients tort czar appointed in this case. Well, why did I ask that? Because what I felt GM was doing, in fact they are doing, is trying to bind the futures in some way without having the futures present or having the futures represented. And the way I left the hearing was, it's -- it was and is the choice of GM on that issue.

There was a way to do this; they chose not to. With asbestos claims in particular it's very specific about how you

bind future claims and that's through a Manville type 524(g) type solution. We think that's clear from the statute and why is it clear from the statute? It's a matter of -- it's not just the statute is a matter of constitutional due process. The futures are here, I don't represent the futures, I don't -- I may have a future claim, I don't know it. I sure hope not.

But we're -- we're talking about a claimant that is going to develop a disease two, three, four, five, six, seven years down the road. We have testimony that there's an estimate of ten-year present value that there's going to be asbestos claims. Ten years. Up to at least ten years from now, probably more. There's a long incubation period. This is very well known and those people are not present. They cannot speak and it's hard to see under the constitutional due process binding them in any way.

There's no notice that can be given or should be given. And I think we need to look not just to the statue of 524(g) but also the practical implications of the whole thing. Let me just give You Honor an example. This is how the case could well come down. Your Honor could approve the sale. This could be a wrap-up in say two years, perhaps, maybe less. Maybe within a year Your Honor's going to institute a bar date, there's going to be a claims bar date. Probably a year or two or so there's going to be distributions, year three or day two plus one someone is going to get sick of cancer and die.

Someone who was a mechanic that been working on a GM -- on GM cars. It has a twenty, thirty, forty, ten-year -- who knows how long incubation period.

Where is that person going to go? Well, you heard some testimony, they can't, according to the -- the purchaser, the purchaser says no, not me, I'm not taking any of that liability. So if -- if Your Honor would uphold that, that claimant has -- cannot go to New GM, notwithstanding the successor claims issues that have been discussed so far, and he can't go to OldCo, because there's been a distribution made and a bar date has been instituted.

And that's the problem and that's why 524(g) has been instituted. In addition we've had a decision that came down that won in the Second Circuit and lost in the Supreme Court but I don't think it's really a loss, and that's the Manville case, also known as Travelers v. Bailey, which came down and I think this Court is going to need to reconcile anything that it does in this decision with regard to future tort claims -- future asbestos claims with the June 18th, 2009 decision of the Supreme Court.

These -- I think that court very clearly held that -- and it was an unusual decision, Second Circuit decision had a lot to it also that wasn't necessarily reversed. But in essence it held that when you're before the court, for instance, my tort committee, they're all current claimants,

they're before -- they're before your Court. They're going to be bound whatever you do and say, whether it's extra-jurisdictional or not.

But what the Supreme Court said a couple weeks ago were those people that were not there cannot be bound by anything that happens in the bankruptcy court. And in that decision, the slip opinion at page 17, they specifically cite how they could be bound and what kind of channeling injunction has to -- can be issued specifically citing 524(g). And they say on direct review today "A channeling injunction of the cert issued by the bankruptcy court in 1986 would have to be measured against the requirements of Section 524(g) (to begin with at least)" and that's a direct quote.

And in that decision of a couple weeks ago we're going back to the Second Circuit, unfortunately Judge Sotomayor, who was on my panel is -- will no longer be there probably, but the other judges will be. And we're going to have to determine whether my clients in that case in fact were bound by the 1986 decision, because the Supreme Court left open the issue and said we are not necessarily bound by the 1986 decision or injunction, channeling injunction of the court, if they somehow were not present or represented or did not exist or whatever and they said the same thing for the Chubb Insurance Company.

So I think to a certain extent the issues that Your

Honor has to wrestle with are constitutional and jurisdictional as well -- as well as sale. And in my view, dollar-wise I don't want to say it's a pimple on the elephant but this is not an asbestos driven case; we know that. But these are constitutional and due process issues that we consider to be very, very important and have to be dealt with, with appropriate consideration.

So I would urge Your Honor to reconcile whatever he does with that opinion of the Supreme Court. In addition, Mr. Bressler referred to some colloquy of the Second Circuit in the Chrysler decision, and there's been some discussion of that. I'm sure I'm misremembering this and the record will reflect what actually happened but I actually think that was colloquy that I had with Judge Sack and Judge Sack was saying to me during that oral argument, because I was involved in that one too, while future claims clearly, you know, they may not be -- well, you just go ahead -- you just go ahead and institute suit. And my response to that was that's sending the wrong message to ignore a court order or to try and get around a court order or hope a state court will ignore a successful liability or the court that says you cannot do something.

THE COURT: One of the problems I have, Mr. Esserman, is how I should work with things the judge is saying as a part of the back and forth with counsel in oral argument I remember an instance in Adelphia where somebody cited me a transcript

from a certain district judge and I couldn't believe some of the things she said, but then I realized that judges say all sorts of things in oral argument, at least sometimes they do want to be devils' advocates; sometimes they mean them and sometimes they're just probing and other times they haven't thought about it as much they would after the argument was over and they sit down and they read the cases. And how do I slice and dice comments in oral argument to know which of those multiple categories something can be in?

MR. ESSERMAN: I agree with Your Honor, I just wanted to comment on it, you've got to wait for the opinion or at least look at the opinion when it comes down -- when and if it comes down before you can really do anything because as Your Honor knows, Your Honor may ask the question that indicates one thing and completely rule the opposite. And I understand that. It was just a very telling comment to me by Judge Sack and it would have been consistent with everything he's ever written that I've ever read that he would hold that future claimants would not be bound. But that assumes that he's going to be consistent with his other opinions, which I think you have to look at.

THE COURT: Then there is room for me to try to make a judgment as to whether the appellate judge is really telegraphing the way he's thinking as compared to being the devil's advocate?

MR. ESSERMAN: Your Honor, I would not urge that on this Court, I think that that's a -- that would be -- I think it is -- it should be of interest perhaps to the Court but I don't Your Honor ought to base any ruling on that. I think Your Honor has to base his ruling on current decisions and as Mr. Jakubowski quoted, and as I'm quoting to you Supreme Court decisions, I think that those and -- and due process decisions, I think that that's the safer -- that's the safer play.

Of course we don't have an opinion from the Second Circuit. We don't what they're doing, we don't know what their hold -- what they're really going to hold, we don't know whether they're going to make some broad policy arrangement or decision because Chrysler was in fact a shut down company in which nobody was working, everyone had been thrown out of work, the plants had been shuttered, every one of them. They stopped production; it wasn't like a GM which is an operating business. Chrysler was not an operating business; Chrysler was shut down and if Fiat didn't come to the rescue, it was going to stay shut down.

So we don't know exactly what is going through the Court's mind there other than saving 30, 40,000 jobs it may have been more for the Chrysler Company, which is frankly -- I would say GM has some similarities there because there's a reason the Treasury is here. It's not just because they are a commercial lender; this is highly unusual. We all recognize

that, we all know that the stakes are just not a loan to a corporation that this is -- this had been one of the more important companies in American history and to the American economy and that cannot be ignored. The Treasury wouldn't be doing what they are doing. Reminded of a phrase made by a guy named Charlie Wilson, who a few people off to my right I'm sure know but probably nobody else, and this isn't the Charlie Wilson of Charlie Wilson's war, he's a former --

THE COURT: I saw the movie if that's the one.

MR. ESSERMAN: I did too; different Charlie Wilson.

UNKNOWN SPEAKER: He was secretary of defense, Your Honor.

MR. ESSERMAN: He was secretary of defense --

THE COURT: Probably a different war too.

MR. ESSERMAN: Yes, Secretary of Defense under Eisenhower and he says "For years I thought what was good for our country was good for General Motors and vice versa". And of course President Obama said the same, paraphrased it, he actually thought he was quoting it but I actually quoted it.

THE COURT: Not without knowing the name of the guy who saw that I'm old enough to remember that.

MR. ESSERMAN: Well, unfortunately -- I am, too, although I look much younger. Strike that from the record, please.

Anyway, Your Honor, this has been a long two days;

it's been a hot two days too. We recognize the issues and truly the weighty issues that Your Honor has to wrestle with. Nobody would like to be in your seat right now. I understand the pressures, both political, national/international to approve this -- approve this sale.

I'm officially telling you that I'm resting on my papers, but I certainly can understand a decision whereby you try and reconcile some of these issues and approve a sale. But carve out certain things: carve out the issues of future claims in which we have testimony that that's not material to the company and that the company couldn't handle these claims without a problem -- without a problem financially. We had testimony from the CEO of GM on that. Thank you very much.

THE COURT: Thank You. Ms. Cordry, I think you're up on deck but I think some of the things you were going to say we're pretty ably handled by the two guys there.

MS. CORDRY: All right.

THE COURT: Come to a mic if you would, please.

(Pause)

MS. CORDRY: As I suggested earlier today that we are still trying to talk to Treasury and the debtors to resolve these issues and we've had some more discussions -- true, everyone's been popping in and out of the door every few minutes.

THE COURT: But the truth that has preoccupied us.

MS. CORDRY: Yes.

MS. CORDRY: Good. Better than watching me go in and out. I have talked to Treasury, we are -- have another set of proposals on the table. I indicated that because there are forty-five odd attorneys general on these papers and staff and in order -- the discussion's at a point where that I wanted to talk to them some more before I could make a commitment --

THE COURT: Would it be helpful if I put you behind Mr. Richman tomorrow?

MS. CORDRY: Exactly. So that's what we discussed is that I'd prefer go in the morning. Thank you.

THE COURT: Sure. Thank you. Who's next?

MR. KENNEDY: I believe we are, Your Honor.

THE COURT: Okay, Mr. Kennedy, come on up, please.

(Pause)

MR. KENNEDY: Good evening, Your Honor, Tom Kennedy, the IUE-CWA, the steelworkers and the operating engineers. I want to join my colleagues in expressing appreciation to the Court for the time and attention you've paid to these matters, for your obvious preparation and for the concern that you've expressed for the participants.

The numbers that are involved in our programs I want to share with you just to again frame the magnitude of the problems that we think the Court needs to deal with. There are 26,500 IUE represented retirees. There are 4,000 USW

represented retirees. Counting the dependants of those individuals who are involved in the health programs that General Motors is seeking to terminate, we have 47,000 Americans.

We've presented a number of their statements today; I think they speak eloquently to the human cost that would be involved in the benefit terminations and modifications that have been urged by General Motors. But we think there are critical issues in this case, legal issues. Not just the human cost that we think is so hot.

May a creditor with substantial post retirement health benefit obligation choose to sell its assets through a 363 process when one of the express purposes of that process is to deprive the participants of the otherwise applicable protections of Section 1114? Can a creditor who opts for a Section 363 sale proceeding in order to defeat the rights of some, but not all, of its unionized retirees sell those assets free and clear under Section 363(f) of the Section 7 rights of those retirees? And finally of the retirees represented by the objecting unions --

THE COURT: Stop, Mr. Kennedy. Section 7, what did you mean by that?

MR. KENNEDY: What I mean by that is that there's been quite a bit of discussion this afternoon about the meaning of the kinds of interests that are dischargeable in effect

under -- 363 that -- 363(f). And in our view, it's important for the Court to reconcile the rights under 1114 with 363. And in our view the rights under 1114 would survive a 363(f) transaction and that the participants whom we represent should be entitled to exercise their 1114 rights against both Old GM and New GM.

THE COURT: I understand that argument, but I thought you said Section 7 rights, and I don't know what you mean by that.

MR. KENNEDY: No, I did not. I use that phrase so often as a labor lawyer I may have fallen into it, but I didn't mean to. I meant to say --

THE COURT: Is that an important labor law context?

MR. KENNEDY: Yes, that would be --

THE COURT: Are we -- is it just like -- one of the provisions of the Taft-Hartley Act?

MR. KENNEDY: Yes, it is, the heart of the Taft-Hartley Act from the point of view of union members is Section 7; it protects the right to form, join and assist labor organizations.

THE COURT: Oh, Okay.

MR. KENNEDY: I don't believe it has anything to do with this proceeding.

(Laughter)

THE COURT: Okay.

MR. KENNEDY: Certainly not the way the employers have been acting.

THE COURT: I had something so long ago that I don't claim any remaining expertise with it, assuming that my professor thought I once did.

MR. KENNEDY: I'm sure he did, Your Honor, I 'm sure you did well and any questions I'd be happy to answer but --

(Laughter)

MR. KENNEDY: -- from the point of view of the Bankruptcy Code, which is what we really focus on today, we do think that Section 363(f), the interests that are dischargeable under it, do not include rights under Section 1114. And then I think you have to ask whether the retirees represented by our unions have been treated fairly and equitably in this process, and since they manifestly have not what are the consequences of that to this proposed sale?

Now a number of people had mentioned to you, and I think it's the right thing to do, that we start any statutory analysis with the words of the statute itself. And 1114 could not be clearer that it was intended to protect in ways unlike almost any other interest under the code the rights of retirees to continue their medical benefits unless there are certain procedures that are followed. In fact, what we think is very significant in terms of harmonizing 363 and 1114 is Subsection (e)(1), the very first operative section of the statute, which

begins "Notwithstanding any other provision of this title" there is an effort by Congress to elevate 1114 other -- over other aspects of the code and in our view specifically over other general sections of the code like 363.

The second part of the statutory analysis under 1114 is to observe -- and you cannot read the statute without observing that it is based on the notion of fair treatment, full disclosure, equal treatment to the retirees that are involved. The only proposal that a trustee is permitted to make, the debtor-in-possession is permitted to make, is one that "under Section (f)(1)(A) that assures all creditors, the debtor, and all of the affected parties are treated fairly and equitably". That's extraordinary language; not just the participants, but the creditors, the debtor and all of the affected parties. Clearly the IUE-CWA, USW and IUOE retirees have not been treated fairly and equitably, there are others who have been preferred over them; could not pass the merits of 1114 the treatment to which they have been subject.

Section (f)(2) states that the trustee, before he can impose -- before he can come to court and ask that there be a termination of retiree benefits he has to demonstrate, having conferred in good faith that attempting to reach mutually satisfactory modifications of retiree benefits. There's been no good faith negotiations between these parties. And what you find if you look further into the statute that in order to

achieve a termination of benefits the -- the company has to show that the union involved, in a unionized situation, has refused to accept any proposal they had made without good cause. And in our view the discrimination against the splinter unions, as opposed to the IUE -- the UAW members would inevitably establish good cause to reject any proposal the company made which had the effect that we're sitting here today and observing.

And I would notice, Your Honor, that it's not only our observation that the unions would have good cause to reject this proposal, but in evidence there's an e-mail from the labor relations representatives of General Motors in which they inform the upper leadership, including Mr. Henderson, that the unions would not accept an offer which provided only twenty percent return to them from what their book value had been on the OPEB obligations. This offer was thirteen percent, there is no chance that the unions would accept that offer, they had good cause to reject it; this approach could never withstand 1114.

Then I wanted to make an observation is that under (f) -- excuse me, (g)(3), Your Honor, any modification that would be approved has to "assure that all creditors, the debtor, and all of the affected parties are treated fairly and equitably", which is -- harks back to something earlier in the statute, but this section ads "and is clearly favored by the

balance of the equities". So equities would have to balance, as well, in favor.

Now if you look at that statutory history it's interesting because it is precisely condemns what General Motors is attempting to do. Senator Heinz, when 1114 was enacted, stated that Congress was also concerned over the treatment of retirees after a company filed for bankruptcy. There's one sentence I want to use here, "Once the retirees lost their benefits they were forced by the bankruptcy law to go to the end of the line of creditors and patiently wait for years to get a small cash settlement." That notion of translating retirement benefits into a claim in bankruptcy court as an unsecured creditor is precisely what Congress was attempting to preclude through 1114. Senator -- excuse Representative Edwards, at the same time this bill was being passed, said it is important we pass this bill to give retirees peace of mind by removing the possibility of any sudden and unilateral termination of retiree health benefits. They are suddenly and unilaterally terminating health benefits for 25,000 of the 30,000 individuals that are covered under the IUE-CWA and other unions.

There is simply no suggestion in the statue, 1114, or its legislative history that these retiree protections can be avoided in a Chapter 11 proceeding by the simple expediency of disposing of the assets of the debtor through Section 363

instead of having the debtor accomplish it on its own. And what we know here, and it's important to remember this, is that this is not suspicion on our part, that the IUE-CWA OPEB in particular was a motivating reason for this 363 transaction. If you look at Exhibit Raleigh 13, Raleigh 14, both of them are internal reports by General Motors to its labor relations and top management people in which they specifically say we are seeking to leave IUE in OldCo. They mean by that they want to turn the IUE OPEB obligation from a enforceable benefit into a claim that retirees can wait years to enjoy.

Under item 16, under Raleigh Exhibit 16 that's a May 1st review with the U.S. trustee at page 4 under the listing GM Liabilities to New GM, "leave behind splinter group health/life obligations". That was one of the reasons they selected 363 as the forum under which this bankruptcy proceeding would be conducted. That was repeated on April 15th. April 15th, very important document, it's number 3 under Mr. Henderson's exhibits. It's a specific analysis, it's a long document, 107 pages, exhaustively analyzing should we go 363, should we try a pre-packaged planned bankruptcy. Under the 363 advantages, it states "IUE and other splinter group obligation may be more addressable in 363." You could not be clearer that 363 was chosen specifically to defease our clients of their rights to their health benefits and to do it in a manner which did not have to comply with 1114.

THE COURT: Are you saying that was the purpose or an effect?

MR. KENNEDY: I'm saying it was a purpose. I think there's one other document which is very --

THE COURT: Dominant purpose or an incidental purpose?

MR. KENNEDY: More than incidental, I think dominant, and I will tell you exactly what I mean by that. If you look at Mr. Worth's affidavit, Exhibit F, is the board of directors' report by his firm to the board of directors of General Motors on May 31st, 2009, the meeting at which they approved the filing of the bankruptcy, he identifies the capital structure of the new company once they approve the 363 application. In that description of the new company they call out specifically, and the only obligation that they're being able to dump through the 363 that they call out specifically, is the gain from the elimination in non-UAW OPEB. If this were not a dominant, if this were not a motivating factor in their deciding to use 363, it would not have been the only discharged obligation mentioned in that report to the board of directors at the critical meeting by individuals who had opportunity to know and that decided what the important elements were going to be. And I asked Mr. Worth, I said did you include this particular item on this sheet of paper it's a bullet point sheet of paper, it's not a string cite, there's about probably a hundred words on

it, and eight of them are "gain from the elimination in non-UAW OPEB". It's clear that this was an important and a motivating influence.

THE COURT: Please, Mr. Kennedy, what's the citation of source for what you were just talking about?

MR. KENNEDY: Exhibit F, the Worth affidavit, it's a board of directors report 5/31/09. I will get you a page citation before we leave today; it's not one of my exhibits and I don't have it with me, Your Honor.

It's important to note in evaluating the relationship between 1114 and 363 that despite the worried tales of ugly negotiations these people were talking to themselves. Who is kidding who? Mr. Henderson is the CEO of Old GM, he's the CEO of New GM; that's true for every single executive. It's true for most of the workers, it's true for most of the assets. They carefully selected the people they were throwing overboard, fine. But that doesn't make it tough negotiations between completely independent and arm's-length parties. To -- even if you could imagine a circumstance in which the commercial reality was such that a 363 transaction had to occur and there were unionized OPEB individuals who were affected by that, if it were truly arm's length, truly independent relationship, that would be one level of analysis.

Here where we do not have an arms-length independent relationship, we have as seamless a transition as the -- all of

the participants in this party could make it, it's particularly inappropriate to suggest that they had a right under 363 to ignore their otherwise applicable obligations under 1114. The deliberative process in this case, in the months of April, May and June, were specifically and repeatedly intended to accomplish the elimination of splinter union OPEB and the only explanation that's been given for that is Mr. Wilson's candid acknowledgement -- yeah, I think Mr. Henderson, to be candid, said more or less the same thing, but he was -- I thought Mr. Wilson was clearer that they used a doctrine of commercial necessity. If they didn't have to keep a liability, they wouldn't do so.

Well, you know, that's a great doctrine from the point of view of the individuals who are going to end up running this company. But the doctrine of commercial necessity and the obligations under 1114 with its repeated and specific obligations of good faith are simply incompatible. That commercial necessity can't be an eraser which eliminates all of the rights under 1114. The value of the offer made to IUE-CWA retirees, also USW and IUOE, is shockingly low. It's thirteen percent of the value that GM admits for their OPEB as of December 31st, 2008.

And that itself is exaggerated. The actual recovery by these participants could be much lower. Mr. Miller said an interesting thing in his presentation. I wrote it down, "We

did not leave them with nothing". Well, that's not true; they did leave them with nothing. And although I don't want to get too deeply into the weeds about the details in a particular health plan I think a few details will illustrate just how much nothing in fact this plan constitutes. First it's the position of the unions, and always has been, that their rights to retiree health coverage are vested, uncancellable by the company.

In fact the evidence shows in the Raleigh exhibits that in October of 2008, only eight months ago, General Motors agreed to fund 2.455 billion for an IUE VEBA. Essentially the same deal that had been set aside for the UAW. We had that agreement in place, in fact, as our brief reports; they advised Congress in December of 2008 that they had reached an agreement with the IUE on the creation of a VEBA. They repudiated that agreement in January, and they did because UST, U.S. Treasury, had imposed obligations on them that were inconsistent with the funding that had been agreed to during 2008.

My point beyond that is to observe that if they really had a claim that these rights to OPEB benefits were cancellable or voidable by them, they would not have agreed to fund two and a half billion dollars into an IUE-CWA OPEB VEBA. So let's look at what in fact they're giving to our retirees. Well, of the 26,500 IUE retirees, approximately 20,000 are just eliminated. Benefit over, see you later. The other 6,000 are

being, because they're pre sixty-five, are being given the so-called salary plan. But the salary plan has the following provision: NewCo." reserves the right to amend, modify or terminate the plan at any time.

They want and have insisted that the IUE-CWA concede that even this crummy plan is terminable at will by General Motors at any point. They could do it January 1, 2010. The value, the thirteen percent value they've ascribed to their offer, that 470 bill -- million, rather, 470 million, assumes that the benefit stays in place throughout the period of time that any pre sixty-fives remain short of that age and second, assumes full participation by IUE-CWA members.

In fact, neither is true. The company has a right to cancel it at any time and the second is that the benefits are such that it is a programmed failure plan. Let's remember how this works. There are caps on company expenditure, low caps. Caps, in fact, from 2006 of 4,000 dollars an individual. Now, that 4,000 dollar cap is multiplied by the number of participants. Let's say we start with 6,000 participants. You can do the arithmetic, 6,000 times 4,000 comes up with a number. If they can drive the number of participants down to 3,000, their cap for a year is only 3,000 times 4,000.

Normal medical inflation will make this plan more expensive for participants. In fact, as it is now, the first 8,000 dollars for retirees comes out of the member's pocket.

They then go into a zone of coverage. But the first 8,000 comes out of their pocket. Our members can't afford 8,000 dollars up front as medical expenses when right now their out-of-pocket medical expense is probably around the order of 800 dollars a year under the current plan. To go to 8,000 a year, though, our people won't take the plan and as we indicated in the declarations that we submitted, that will be a significant number of people.

Once people start dropping out of the plan it's the healthy ones that don't take the insurance. The people who say "well, gee, 8,000 is a lot of money, but it's better than the 50,000 I'm going to incur in medical expenses this year", will drive the cost of that plan sky high. And it is specific in this offer in a way I've never seen before. I must have evaluated 500 company proposals over the years; I've never seen one say, as this one does, that you must agree in advance that every dollar over 4,000 in any given year will be recaptured by the company by making the plan terms worse the following year. So if you track this out, seven or eight years from now you would have to pay 50,000 dollars in premiums to get 4,000 dollars in coverage. This plan is a sop, it only reflects the reality that there are political considerations, as the company acknowledged, they wanted to make it look like they were doing something, in fact they're doing nothing. There is no protection for IUE-CWA steelworker or operating engineer

retirees under this proposal and there's no way you can take this 4,000 dollar cap and make it seem a real health plan because it's not.

The treatment afforded to IUE-CWA steelworker and operating engineer retirees is dramatically worse than other similarly situated unsecured creditors of General Motors. Let's look at the interplay between Treasury and General Motors about how the IUE-CWA and other union people ended up where they were. The story is, I suppose it's correct, is that at some point Treasury said well, we're not going to get too far into this, we're going to take a group of obligations that are all unfunded, that collectively are 7.9 billion dollars, and we're going to say to General Motors we want you to reduce those by two-thirds, okay? General Motors looks at that; one of the components is executive SERP, another component is salaried life. Most of the components, four or five of them, are for salaried executive individuals. Now we know, because of the Sprague case, that all of them are cancellable by the company at will. General Motors had the right to terminate each one of those programs. The same is not true, in our view, with respect to the splinter union health and life. But because none of them are funded, Treasury apparently concluded that they would take that 7.9 billions dollars and they would determine that the two-thirds would be applied as against that. What Mr. Wilson told them, I quoted his testimony, "We told GM

to cut two-thirds; we told them to figure out how to do it." That's Mr. Wilson's testimony.

The mechanics on it are reflected by Mr. Henderson's Exhibit 12 -- excuse me, I believe it's -- it's the -- yeah, excuse me, it's Henderson 14 where the -- and you've seen this chart before, Your Honor, where they charted out the total of 7.9 billion and the percentage deductions that would be applicable to each, and I'm referring to page 2, as I said, of Exhibit 14 of the Henderson deposition. Retiree life was cut sixty-six percent. Salaried retiree health care, in the first iteration to Treasury by General Motors, was cut zero, no cut at all. Executive nonqualified pension, that's the SERP, was cut thirty-two percent. Executive life, Treasury told them they had to dump that, wasn't vested, no claim to continuation, that they eliminated. The splinter unions on the other hand, their health care was cut eighty-four percent. Eighty-four percent. Now the package of cuts came to sixty-two percent, and this -- this is pretty late day, this is June 4th, by the way. On June 4th the e-mail was sent, correct -- I should say responding to the fact that the sixty-two percent was rejected by Treasury. Treasury said no, we said two-thirds and we meant it, you need to go back and get that extra -- that extra five percent, from sixty-two to sixty-seven. Now that five percent represents million dollars of value in the benefit program. The executives of General Motors --

THE COURT: The incremental five percent is --

MR. KENNEDY: It's four hundred million, sir.

THE COURT: Four hundred million additional?

MR. KENNEDY: Yes, it moves the cuts, if you want the exact numbers, from 4.8 billion to 5.2 billion. Started with 7.9, they had proposed 4.8, Treasury said it's got to be 5.2. That four hundred million, the executives of General Motors took every penny of it out the salaried health care, but more importantly they took it out of the splinter union health care. Because by lumping them into the same program, that program I told you about a moment ago, the -- what they did is they took that 4,000 dollar cap and reduced it for the year 2010 and going forward so that now medical inflation will bump up against the lower cap and that allowed them the present value of the number at a smaller rate and allowed them to put an even worse plan out on the table. A worse plan that as time goes on will get worse and worse and worse till the point rapidly where there is no health coverage at all for the 47,000 people that I mentioned we represent. That's wrong. And there was not a union member, not a union leader, not a union person involved in those negotiations or decisions.

One of the points of 1114 is to be able to say to the unions and the representatives and the participants here's what the company wants to do, be part of the process. If you have a problem with it, if you think it's unfair the bankruptcy court

will hear you and will give you relief, will give you the opportunity to demonstrate that it's unjust. We don't have that. We heard the head of Ajax, what was -- that outfit is, saying that within a week from now they were going to start an 1114 proceeding. Now when they do that we'll be dealing with Old GM that has 1.25 billion dollars in cleanup money that's well spoken for and shares and warrants that won't be subject to cashing out for some time -- for some years.

There's no room to continue the IUE-CWA health benefits under Old GM; they know it. They know the 1114 will be a sham, but they intend the sham 1114 traction because -- transaction because they drained the assets out of New GM -- excuse me, out of Old GM and put them into new -- into New GM.

Now the other thing that I want to call to your attention, Your Honor, is that -- the alleged equity of including union retirees with salaried retirees for purposes of a health ban -- plan is all set by one critically important fact. On January 1, 2009, just six months ago, the salaried retirees who had -- had their insurance taken away were provided a 300 dollar a month pension increase from the salary pension fund.

THE COURT: Yes, I understand that, but your opponents say that that didn't come from GM; that came from a qualified pension trust.

MR. KENNEDY: That's true.

THE COURT: It was overfunded.

MR. KENNEDY: I believe it came from something called the salaried retirement plan, the SRP, I think that's correct. I don't think it's overfunded by the way, Your Honor, it's well funded, but I don't think it's overfunded. The hourly help -- the hourly pension plan, in our view, could similarly sustain a pension increase to our members, the -- there are carrying costs involved with any pension increase, there's an amortization period and the amortization period would have some impact, but from the point of view of the members, from the point of view of the individuals that no longer have insurance, were given money with which they could purchase insurance, the fact that we can say well, don't worry about that, it didn't come from GM, you're not being treated unequally because that came from the salaried pension plan, I don't think that's a very convincing response. They've made no effort to demonstrate that that same 300 dollars couldn't be paid from the hourly pension plan.

And the reason I bring it up is to demonstrate that their suggestion that there is a parity between these groups, salaried and non-UAW unionized, is false, untrue and a lie. It was not a parity; it was dramatically different because they provided alternative funds with which to purchase insurance.

I want to look at two other pieces of the General Motors conduct in this. They've made the -- they and as I

said, Mr. Wilson, contend that there is no commercial necessity for bringing on the IUE-CWA and other non-UAW union OPEB. Well let's look at that principle applied in other situations. If we look at the SERP obligation, the SERP obligation that they agreed to assume by New GM is 730 million dollars. They didn't have to assume that. More than three-quarters of that is for retired executives. Not for people currently working for General Motors. There's no distinction between covering our retirees who are no longer currently working for General Motors and retired executives who are no longer working for General Motors. There's no reason why one would be preferred over the other, except there was an act in this little drama that probably led to it.

Mr. Henderson, legitimately concerned over his group, sent an e-mail to Mr. Rattner lobbying, advocating for two types of insurances to be maintained. The first was the SERP plan and the second was the salaried health plan. There were no similar e-mails lobbying for continuation of unionized benefits. We weren't at the table; we didn't have the opportunity to make that claim. Had they been forced to go through an 1114 proceeding before any of these benefits were changed that wouldn't be true, we'd have had notice, opportunity to be heard, standards applied and the demonstration that what was going on was fundamentally unfair.

Now the Court has mentioned on several occasions the

Chrysler case, and I just want to address that for a minute. The Chrysler case, in our view, has little to teach us about this particular transaction from our perspective. I'm sure there are things that are overlap well between Chrysler and GM, but from our perspective, which is to say what happens to non-UAW members that don't have opportunity to participate in a VEBA. There were no similar union objections in Chrysler.

Chrysler did not, was not asked to, and the Chrysler Corp was not asked to and did not rule on the relationship between 1114 and 363. What Judge Gonzalez did say is that even after a court determines that the criteria of Section 363 had been met, that has not happened here and we hope it does not, but if it were to be true, the Court must then determine whether the elements of Section 363(f) are satisfied. And in our view the free and clear of any interest in such property cannot apply to interest that the unions that represent members have under 1114; they are contractual, statutory under the Bankruptcy Code, statutory under ERISA, they are an important web of deeply, deeply significant interests that these individuals have and to have them washed out is fundamentally inconsistent with the language of 1114 that says that notwithstanding any other portion of the code these protections will apply.

Now I just want to touch on two things that were said by Mr. Miller. Mr. Miller used the word "jealousy". And

that's not true, Your Honor. It's a misreading of everything we stand for. Everything the unions I represent have brought to you today. We care not that the UAW members have gotten something in exchange for their OPEB. We're delighted that as retired Americans they're going to have the opportunity for some health care protection. Our concern is that we were not given that same opportunity. It's not jealousy; this isn't a party, this isn't high school. These are people being deprived of fundamental rights. Rights that in the absence of the insurance will affect not only them but their families and for decades.

There was also a notion of conspiracy, now I think that was chosen as a word, because I believe Mr. Miller choses (sic) his words carefully because he wanted to minimize the extent of the unions' complaint, the notion that we saw some vast conspiracy in which we were somehow deprived of benefits and we're suggesting that nameless, shapeless forces were somehow behind it. We don't need to do that, we've got their documents. Their documents prove that through -- that the ability to eliminate our OPEB was a substantial motivating force behind selecting the 363. If he wants to call it a conspiracy, be my guest, but it's not nameless and it's not faceless, we know who it was, we know when it happened and we who did it. And who were the victims, we were. It's unfair and we ask the Court if you would -- to not approve this sale

as it's currently constructed. If it is approved, we ask that you approve it conditionally upon their satisfying the rights under 1114 -- or their obligations, I should say, under 1114 with respect to our members.

And finally that if a sale does go through, in our view any 1114 process would extend to both Old GM and New GM, we should have the opportunity to demonstrate a week from now, when they start the 1114 proceeding -- procedure that they promised that we have a right to all of those assets as an opportunity to demonstrate that the only fair result is one in which we maintain our benefits. Thank you, Your Honor. Otherwise I rely on my papers.

THE COURT: Okay. Fair enough. Who do we still have for tonight?

MR. MCRORY: Russell McRory for the Greater New York Auto Dealers' Association.

THE COURT: Fine, Mr. McRory.

MR. MCRORY: Good afternoon, Your Honor, I'll be short. My name is Russell McRory from Robinson Brog Leinwand Greene Genovese and Gluck on behalf of the Greater New York Automobile Dealers' Association. Your Honor, the association does not oppose the sale. The association indeed supports and looks forward to GM's revitalization. The association recognizes and appreciates that GM has treated its wind-down dealers much better than Chrysler treated its rejected dealers.

And the association also applauds the appeals process instituted by GM in contrast to what Chrysler has done with a lack of an appeals process for its rejected dealers.

There is however one issue of concern to the association. That concern is that the approval of the 363 sale involves the ratification of conduct by the debtors that is deemed unlawful by New York's Franchise Motor Vehicle Dealer Act and impermissible under the Federal Automobile Dealers' Day in Court Act. That conduct is this, that the debtor has coerced its dealers to sign away their state law protections and federal law protections through the execution of participation in wind-down agreements. This was done at the proverbial point of the gun. Dealers were told to sign these agreements or else they would be rejected and end up exactly like the Chrysler's rejected dealers.

This conduct violated the Federal Automobile Dealers' Day in Court Act, which proscribes the manufacturer from using intimidation and coercion in its dealings with its franchisees. Virtually all fifty states, including New York, have similar proscribe -- laws proscribing such conduct. I realize of course, Your Honor, that in the usual bankruptcy case the debtors will use their powers to assign or to assume or reject contracts, to extract concessions from its contract counterparties and then assume those contracts as amended. However this is not the usual case.

In this case, Your Honor, as I mentioned above, the Automobile Dealers' Day in Court Act, as well as state laws, have a say in the matter. The usual contract counterparty is not protected by such laws. And it is not without irony, Your Honor, that the -- that Chrysler did not try to do this in its bankruptcy. Chrysler did not attempt to extract concessions from its continuing dealers as a -- in exchange for being assumed and not rejected.

THE COURT: Pause please, Mr. McRory, you said half a second ago that GM is trying to do better for its folks than was done by Chrysler Corporation; it's kind of sounding like no good deed goes unpunished. I mean, I can understand how you'd be pretty upset if Chrysler had just -- excuse me, if GM had just rejected all of these folks. And it's giving them a soft landing and you're saying that because it did, but because it's saying that we're giving you a soft landing under certain terms, it should be penalized for that.

MR. MCRORY: Your Honor, these are two different groups of dealers. The -- it was the rejected dealers in Chrysler that were just rejected. Here in -- and GM is giving a soft landing to its wind-down dealers, the dealers that otherwise would have been rejected.

THE COURT: So you're not complaining about the terminated group --

MR. MCRORY: No.

THE COURT: -- dealers, you're complaining about those who have an even better deal which is that they're continuing.

MR. MCRORY: They are continuing, Your Honor, however as I've to draw the distinction that in the Chrysler case the continuing dealers had their franchise agreements assumed without -- without amendment and without being put through the course of process of having their agreements amended.

THE COURT: But of course if they hadn't been amended then we have a bloated dealership structure that addressing which was an important element of restructuring GM.

MR. MCRORY: No, it doesn't change the fact, Your Honor, that the wind-down dealers are eventually leaving GM, it doesn't change the fact --

THE COURT: No, but for those who are going forward there was a decision, as I understand the evidence, that you had to amend those agreements or you wouldn't be in a position where you could assume them.

MR. MCRORY: Your Honor, that is not -- that is not the case. As I understand it, GM could simply have assumed the continuing dealers franchise agreements exactly as Chrysler did for its continuing dealers. There was no require -- there was no requirement that they be amended first through a participation agreement.

THE COURT: Go on, I'll check the record on that.

MR. MCRORY: Sure. And, Your Honor, as evidence of that I just cited exactly what happened to Chrysler. That is what happened to Chrysler. The Chrysler dealers who were continuing had their franchise agreements assumed as-is. The specific incit --

THE COURT: Okay. The problem I'm having, Mr. McRory, is it seems to me that GM's program both for the continuing dealers and for the terminated ones was more fine-tuned to both sides' needs and concerns than Chrysler was. And it sounds to me like GM, if I were to accept your arguments, would be penalized for that

MR. MCRORY: No, Your Honor, I don't think it's a matter of being penalized, I think it's a matter of -- that we're dealing with -- we're not dealing with the same situation where GM is either accepting or -- either assuming or rejecting the continuing dealers -- dealer agreements. They're doing an extra step. And that is that extra step of causing an amendment to those agreements to be signed first before assuming those agreements. That is the sole focus of what I'm talking about now.

And the reason why I'm focusing on that -- those amendments to the continuing dealers' franchise agreements is because it was brought about through a coercive process. And those were in violation of state law, in violation of federal law. And 28 U.S.C. 959(b) says that a debtor-in-possession

must manage and operate its business in accordance and with valid state laws.

And -- so the -- essentially, Your Honor, what the association is arguing is that it was a bridge too far, in effect, for GM to not simply assume the -- assume the continuing dealers' franchise agreements, but the bridge too far, and which violated the state dealer laws which are made applicable through 959(b) was to coerce the execution of the participation agreements which took away otherwise their state law rights.

And let me emphasize, this is not a challenge to the debtor's right to sell its assets in a 363 sale.. We're not challenging the debtor's rights, generally, to reject contracts or assume contracts in its sound business judgment. What we're challenging is the debtor's post-petition conduct, its post-petition conduct in coercing its dealers in violation of the state dealer laws and the Automobile Dealers' Day in Court Act to rewrite their franchise agreements.

Now clearly there's a tension between 959(b) and the Bankruptcy Code. The question is when does a state law have to yield to the debtor's rights under the Bankruptcy Code or when is a debtor obligated to follow those state laws under 959(b)? And the case law cited in our brief includes -- holds that that tension is resolved by looking at whether the debtor's ability to circumvent state law gives that debtor an unfair advantage

in the marketplace. And in addition to the cases cited we also list Stable Mews here in the Southern District which cited Butner v. United States for that basic concept.

And that is precisely what is occurring here. Ford cannot simply rewrite its dealer agreements in this way. Toyota, Honda, Mercedes and the other import brands cannot do so and indeed, Your Honor, as I pointed out earlier, Chrysler did not do so in its bankruptcy proceeding. In other words the debtors violating of state dealer laws during the pendency of this proceeding has given GM a substantial competitive advantage against every other manufacturer in the marketplace.

THE COURT: But the complaint's not coming from Ford or Chrysler or even Toyota; it's coming from people who by not having their dealerships rejected are benefitting from the opportunity to continue to be GM dealers

MR. MCRORY: They are benefitting from the opportunity to continue to be a -- be GM dealers, Your Honor, but again it was done at the proverbial point of the gun to sign this agreement or else. And that is the coercive --

THE COURT: Mr. Miller, I'm going to give you a chance to reply but --

MR. MILLER: Your Honor, I just want to make one statement if I might, Your Honor. Counsel keeps talking about coercion, I would just like to point out, Your Honor, an oral argument, closing argument should relate to the record. There

is absolutely no evidence --

THE COURT: Okay, yes, but we haven't up to this point and I would like to continue, Mr. Miller, not interrupting each other making the argument. You can certainly point out when it's you turn to reply, which I guess you will be able to do tomorrow, that Mr. McRory has distorted the record or spoken to hoarse the record or whatever.

MR. MCRORY: You Honor, I think it's clear just by the very words of the wind-down agreements and the cover letters from GM that they were told in bold print in those letters that if they did not sign, their agreements would be rejected. So however one wants to look at that, it is the positi -- it is -- you can look at it as coercion or something else, but if you're told sign or your dealer -- or your agreements will be rejected that, in my understanding of the word, is coercion. And those are GM letters and documents that they submitted to every single dealer.

THE COURT: Okay.

MR. MCRORY: So, Your Honor, to wind up, so to speak, the debtor has gone far beyond simply jettisoning unwanted contracts and assuming the contracts that it wants to assume. In -- what it is doing is rewriting the rules applicable to dealer and factory relationships, rules that every other manufacturer has to adhere to. And that is precisely the situation with 959(b) applies and demands that debtors comply

with the same laws that all other manufacturers have to comply with. Thank you, Your Honor.

THE COURT: All right, thank you. All right, we covered everybody for tonight? I think so. All right. Tomorrow we have Mr. Richman and then Mr. Parker -- oh, I have duplicates. Mr. Mayer, you would care to be heard as well? Well, you or Mr. Eckstein? I guess you've relieved him at this point.

MR. MAYER: Your Honor, if I may, this is a placeholder. Mr. Eckstein said on his piece on some particular issues -- said the committee's piece on some particular issues at the beginning. We are holding a committee call at 8 p.m. tonight. It is possible we will have a short statement tomorrow, and I would like to reserve some time to do that.

THE COURT: Why don't we put you in right after Mr. Richman and Mr. Parker. By then you should have a better handle, I would hope, on what you want to tell me.

MR. MAYER: Thank you, Your Honor, that would be appropriate.

THE COURT: Okay, we'll put it down. And then tomorrow, Mr. Miller, I'll hear rebuttal from you, your reply on all of the folks who spoke after you did today along with comparable opportunities for -- oh, I have indentured trustees. Okay, just --

MR. FELDMAN: Your Honor, I don't intend to speak

tonight, I'm happy to -- David Feldman, Gibson Dunn & Crutcher, on behalf of Wilmington Trust, the indentured trustee for more than twenty-two billion dollars of bonds in this case. It's our intention to make a brief statement tomorrow in connection with our joinder to the committee's response. I think it would make more sense for us to go tomorrow when as Mr. Eckstein described we'll have a better clarity on where we are in particular with regard to the wind-down budget issue, which is a very central issue to our joinder papers. And as a result I would ask that we be able to follow the committee tomorrow -- tomorrow morning.

THE COURT: Sure, Mr. Feldman. And I suspect I'm going to get the same request from the other indentured trustee.

MR. FELDMAN: I expect you might.

THE COURT: I know you're -- I note you're from Kelley Drye but forgive me, I forgot your name.

MS. CHRISTIAN: That's correct, Jennifer Christian.

THE COURT: Go ahead, Ms. Christian.

MS. CHRISTIAN: From Kelley Drye & Warren, we represent Law Debenture Trust Company of New York and we would just make the same request that we be allowed to follow the committee counsel.

THE COURT: Sure.

MS. CHRISTIAN: Thank you.

THE COURT: Sure. Okay. Yes, sir?

MR. BACON: Excuse me, Your Honor, my name's Doug Bacon, I'm with Latham and Watkins and I represent GE Capital. We have filed an objection, and we've been -- I've been in the courtroom next door for two days. We have a solution and a stipulation and I just want to make sure I get a place in line at the right point and that I'm not estopped from speaking. We had a settlement with the debtor and I don't know how procedurally you want that layered in.

THE COURT: If you think you can state it now and that the debtor thinks it's a good time, I would say let's do it right now or if they prefer tomorrow morning I wouldn't deprive you of the opportunity to do it if you had something.

MR. BACON: Thank you, Your Honor, I'll do whatever they prefer.

MR. WEISS: Your Honor, Robert Weiss, Honigman Miller Schwartz and Cohn.

THE COURT: Sorry, but -- do you have a cell phone in your pocket, Mr. Bacon?

MR. BACON: I have a BlackBerry, but --

THE COURT: You have -- no, BlackBerries destroy our sound system. Mr. Bacon, your product liability case in --

(Laughter)

THE COURT: All right, okay. Can I ask you, now that you're not being drowned out, to repeat who are?

MR. WEISS: My name is Robert Weiss, I'm with Honigman Miller Schwartz and Cohn, special counsel to General Motors Corporation.

THE COURT: Okay, Mr. Weiss.

MR. WEISS: You Honor, we have been in negotiations and discussions with Mr. Bacon as well as the creditors' committee. There have been a number of revisions to the stipulations made continuously throughout the day and into this afternoon. I have not had an opportunity to discuss the latest revisions with my client and I'd like the opportunity to do so before we can present a stipulation.

THE COURT: Can I ask you then, Mr. Weiss, and -- forgive me, did I see you on the aircraft rejection list?

MR. WEISS: Yes, you did, Your Honor.

THE COURT: Yes, I acknowledge that. Why don't you caucus with whomever you need to caucus with tonight and then put it on the record in the morning, if that's not a problem.

MR. WEISS: That'd be fine. Thank you, Your Honor.

THE COURT: Mr. Bacon, you cool with that too?

MR. BACON: That'd be fine, Your Honor, thank you.

THE COURT: Okay. All right, then. What else do we have for tonight? Sir, are you waiting to come up to see me, speak to me?

MR. QUIGLEY: Yes, sir. Sorry to delay, Judge, Sean Quigley from Lowenstein Sandler on behalf of a bunch of

dealerships. I don't know if you want me to put a statement on the record tomorrow or --

THE COURT: I think at this point I want all statements tomorrow, including those who haven't spoken yet.

MR. QUIGLEY: All right.

THE COURT: And at this point we're going to adjourn for the evening. Mr. Richman, would you be in a position where you could start at 9 tomorrow instead of 9:45?

MR. RICHMAN: Yes, Your Honor.

THE COURT: Okay.

MR. MILLER: Are we in this courtroom?

THE COURT: Yes, we will be. And you folks can leave your stuff here under the same understandings that you did yesterday.

MR. MILLER: Could we have someone stand, Your Honor, on time for Mr. Richman and Mr. Parker?

THE COURT: Well, Mr. Richman, I think you told me something once but I don't remember what it was.

MR. RICHMAN: Well, I think Mr. Miller argued for a little over an hour by my reckoning. I don't expect to be that long.

THE COURT: Yes, but he was taking care of seven different groups of objections.

MR. RICHMAN: I guessed earlier thirty to forty-five and I think I'll still be in that range.

THE COURT: Okay.

MR. RICHMAN: Thank you, Your Honor.

THE COURT: All right, see you folks tomorrow, we're adjourned. Good night.

(Whereupon these proceedings were concluded at 7:02 p.m.)

P R O C E E D I N G S

THE COURT: Good morning, folks.

MR. MILLER: Good morning.

THE COURT: Have seats, everybody. Come on up, please.

MR. WEISS: Good morning, Your Honor. Robert Weiss of Honigman Miller Schwartz & Cohen, special counsel for General Motors Corporation.

THE COURT: Right, Mr. Weiss.

MR. WEISS: When we ended last evening, I indicated that we had arrived upon a stipulation order resolving objection to sale motion with regard to GECC and some equipment leases that are critical to the sale of the company should it proceed based upon this Court's order.

I'm pleased to advise the Court that we have come to a final resolution in the form of a stipulation and order resolving objection to sale motion. We have consulted with counsel for the creditors' committee whose input is incorporated within the final terms of the stipulation.

Your Honor, just very briefly, if I may, the subject of the leases are very substantial equipment for both manufacturing and assembly that's included in a number of different General Motors facilities. The stipulation is only effective if the Court approves the sale and the sale closes. In that period of time, the debtor has not yet elected whether

it will assume or reject these leases. This stipulation permits the use of this equipment post closing in the period before a decision is made as to whether to assume and assign or reject these leases. All rights and interests of the parties are protected and we believe that this is a stipulation that is very much in the interest of both constituents. I would ask that the Court approve it.

THE COURT: Okay, Mr. Weiss. Anybody else want to comment? Mr. Schmidt, creditors' committee?

MR. SCHMIDT: Good morning, Your Honor. Robert Schmidt, Kramer Levin, on behalf of the committee. Your Honor, Mr. Weiss presented the stip to me a little while ago. He's represented that one of my colleagues has signed off on it. I have no reason to not believe that but I just want to take a quick look at it and we'll advise the Court at a break.

THE COURT: I'm going to be tied up for the next hour or two --

MR. SCHMIDT: I suspect we'll have plenty of time to read it.

THE COURT: Fair enough. Mr. Weiss, would it be helpful more than just that? Would it be necessary -- would you like an order entered on that today assuming the creditors' committee is so (indiscernible)?

MR. WEISS: Yes, we would, Your Honor. And I can represent to the Court that, as Mr. Bacon can attest to, we had

a number of different conversations with Adam Rogoff. And he has, in fact, signed off on the stipulation in the form in which we're going to present it.

MR. BACON: And by email as well.

THE COURT: Sure. The practical problem that a lot of parties are having in this case is that this is a complicated case. You can't do it with one lawyer. And people have to kind of have enough time to talk to each other when they're so busy on other things.

MR. WEISS: Sure.

THE COURT: So that's fine. Mr. Schmidt, could I simply ask you if either you or Mr. Rogoff or somebody communicate with my chambers perhaps by lunchtime just to give me comfort that you guys are okay with it?

MR. SCHMIDT: Absolutely, Your Honor.

THE COURT: Thank you. Thank you.

MR. WEISS: Your Honor, shall I --

THE COURT: Yes, Mr. Weiss?

MR. WEISS: Would you like me to present to the Court a copy of the stip and order at this time?

THE COURT: Well, actually, giving it to me is not going to be that helpful right now. So, yeah, you can give it to me but I won't really be able to look at it until next recess at the earliest or maybe after we're done today.

MR. WEISS: May I approach the bench?

THE COURT: Oh, sure. Sure. Thank you.

MR. WEISS: So just so I understand, assuming that the creditors' committee confirms that the form of the order is satisfactory to them, we need to appear before the Court again on this matter?

THE COURT: I wouldn't think you need to.

MR. WEISS: Okay. Thank you, Your Honor.

MR. SCHMIDT: Thank you, Your Honor.

THE COURT: Thank you. Do we have other housekeeping matters before -- yes?

MR. WARREN: Good morning, Your Honor. Irwin Warren, Weil Gotshal & Manges, for the debtors. Two housekeeping matters. On the record yesterday, I believe it was, there was discussion about provisions of the loan security agreement between the Treasury and the debtors, in particular with respect to the question of what collateral did or did not have liens. Going to Mr. Parker's question, we advised the Court we would provide a letter with the relevant sections. And if I may hand that up to Your Honor, we have done that. We've provided it to Mr. Parker and to all other counsel for the objectors. The particularly important provision is the exclusion of collateral which is in here and the definition of excluded collateral basically says it's any property to the extent that the grant of a lien on it would give rise to a lien under any other document. So it's sort of elegant in its

simplicity of addressing the question of whether a lien has been granted. If it would grant a lien and it would have done what Mr. Parker says, the government doesn't have it.

If I may hand up that letter?

THE COURT: Yes, Mr. Warren. Thank you.

MR. WARREN: The second housekeeping matter, Your Honor, is Mr. Bressler had indicated that rather than putting a witness on for certain of the questioning, he would designate certain testimony from the depositions and Your Honor had said we should counter designate by this morning. The IUE also chose to designate not just with respect to Mr. Henderson but with respect to Mr. Raleigh. We have put together our counter designations. Those will be filed but Your Honor had asked that marked copies of the transcripts be provided color-coded to indicate who are the objectors.

THE COURT: I say color coded. I simply meant so that I could tell whose is what.

MR. WARREN: We figured the easiest --

THE COURT: Black and white, that's equally satisfactory.

MR. WARREN: We thought color might work. We have taken the liberty of taking all of the objectors designations and put them in yellow. Ours are in pink. And if I may hand those up to Your Honor, these are the Henderson and Raleigh transcripts. Hopefully, this will be of assistance.

THE COURT: Okay. And I assume all of your opponents also have.

MR. WARREN: Yes. They all have been provided copies and they'll have the designations which are filed. Thank you, Your Honor.

THE COURT: Thank you, Mr. Warren.

MR. JONES: Sorry, Your Honor. Very quickly. David Jones.

THE COURT: Mr. Jones?

MR. JONES: Let me note that on the Wilson designations, we're in the process of doing the same thing. We don't have it in hand yet. The designations are filed and we'll provide it as soon as possible.

THE COURT: Okay.

MR. LEHANE: Good morning, Your Honor. Robert LeHane, Kelly Drye & Warren, on behalf of the debtors' landlord and its Roanoke, Texas distribution facility.

THE COURT: Good morning, Mr. LeHane.

MR. LEHANE: Your Honor, we filed a limited objection that raised three issues: cure, adequate assurance and the debtors' ability to remain in the premises prior to a designation of the lease. The parties have, we believe, arrived at a business decision, a business settlement. There's a lease amendment that has yet to be executed. But the settlement involves the debtor confirming for the record, one

of the issues raised in the adequate assurance objection. Your Honor, the debtors agreed to assume the lease and assume the lease at closing and that in connection with the assumption of the lease, the debtor agrees that it will assume all of the obligations to indemnify the landlord whether or not those relate to incidents that may have occurred pre-closing or pre-petition. The debtors also agreed to pay all tax obligations under the lease. Specifically, in Texas, the real estate taxes are billed at the end of the year and they may relate to periods pre-petition and pre-closing and the debtors agreed that it would confirm for the record that it has agreed to assume all of those obligations. If debtors' counsel would simply confirm that for the record, we can --

THE COURT: Okay. Anybody have any problems with what Mr. LeHane said. Mr. Smolinsky?

MR. SMOLINSKY: Good morning, Your Honor. Joe Smolinsky, Weil Gotshal & Manges for the debtors. Your Honor, we have a number of contract resolutions, of cure disputes, that are on the calendar today. We were hoping to do it in a streamline fashion, so as not to cause a stampede, one at a time. We are in the process of working out with LBA the terms of a modified lease amendment. I think the statements that were made are accurate to the extent that there's an unknown indemnity event that occurs prior to closing that that -- to the extent it's covered any indemnity agreement under the

lease, the purchaser is assuming that liability.

I didn't want to upset the flow of this hearing today. And to the extent that we want to deal with these issues now or deal with them later, we can.

THE COURT: You know, you're reading my mind, Mr. Smolinsky. And, frankly, I didn't know what Mr. LeHane was coming up to say. That's fine, Mr. LeHane. I think you've got it done, though. But, folks, what we have here now, which is what appears to be a line of people who want to get up on relatively minor matters, important to you all, of course, but smaller in the scheme of things, it raises the risk of really spiraling out of control and undercutting, if not undoing, everything I've been trying to accomplish in the last couple of days in terms of triaging these matters and dealing with the most important issues first.

Unless there are any other things of major importance, such as modifying any of the arguments that I've already heard, I'm going to ask all of the people who are on line to speak to sit down until I can hear from Mr. Richman and Mr. Parker and reply by the movants. And then rest assured that before I leave today, we will have dealt with everybody. Okay, folks.

MR. SMOLINSKY: And, Your Honor, I think I could later present a streamlined approach to the cure objections so that we can make sure we cover everybody's concerns in the

fastest possible way.

THE COURT: Sure. Thank you, Mr. Smolinsky.

MR. SMOLINSKY: Thank you.

THE COURT: All right. Mr. Richman, I think you're up.

MR. RICHMAN: Good morning, Your Honor. Your Honor, Michael Richman, Patton Boggs, for the unofficial committee of family and dissident GM bondholders. Your Honor, our principal argument, which I'm going to focus on this morning, is that the debtors have not satisfied their burdens to demonstrate the right to use Section 363 to effectuate a sale of substantially all their assets in the first month of the case.

After the briefing and the evidence, a related and central question that seems to be unique to this case is where the government seeks to rescue a failing company through a corporate restructuring under Chapter 11 of the Bankruptcy Code may have circumvent the Code's various creditors' rights and protections by labeling its restructuring a sale and then conditioning its rescue on a quick sale to itself.

We understand the argument that but for the government's rescue effort, we and many other stakeholders would have nothing. And so, we should be grateful for receiving anything. But that is not the way that bondholders and other creditors and stakeholders look at what is being proposed. Instead they ask why is a financial rescue under

Chapter 11 not according equal and ratable treatment to different groups of claimants whose claims are legally similar. They do not understand how our legal system can permit the government to resort to Chapter 11 and yet choose to favor some constituencies over others.

The government's answer is that it is purchasing the best assets under Section 363. So it has the right to take what it wants, leave what it doesn't want and make special deals by allocating its equity in order to take care of the constituencies that it needs to operate the new company. The new company doesn't need the old company's bondholders. It doesn't need or want a lot of other things. Provisions of Chapter 11 that might require a restructuring to recognize that the value of New GM belongs to all of Old GM and its estates to be allocated in a more equal and ratable way are simply inconvenient.

The debtors argue that this Court has the power to authorize this transaction if it finds that there is an articulated business justification. The business judgment must be reasonable and the purchaser must have good faith. This derives from Lionel and its progeny.

But, Your Honor, I submit that assumes a genuine sale. That assumes independence between a purchaser and a seller. That assumes that a debtor has a real choice other than to bend to the will of its lender and its purchaser

whereas here, the record shows an utter dominance of the debtors including the fact that the principal negotiators for the debtors are also to be the principal managers of the new GM negotiating with the owner of New GM, the protestations of arm's length negotiations and good faith are simply irrelevant. The absence of real choice and the dominance of the government creates an environment unique in this case in which those factors that are required for a 363 sale cannot credibly exist.

Indeed, the testimony was that the sale price was not so much negotiated as derived on the basis of asset values, but was rather derived on the basis of the minimum amounts needed to settle the claims of the favored constituencies. That this later turned out to be supported by a fairness opinion is irrelevant to the fact that it wasn't negotiated as any real sale of assets would be. Your Honor asked yesterday why there was a fairness opinion at all if there were no other bidders. It's clear from the response that the fairness opinion and the liquidation analysis was window dressing for the board, and maybe for the Court.

In this case, no one came to the company offering to buy any assets. The government came to GM with financial rescue, not to buy assets. The government then came up with a restructuring plan with union and bondholder settlements. But it concluded that implementing it through a Chapter 11 plan would give rise to potential rights and uncertainties and the

possibility of longer time than if it could be implemented as a sale. So they made a conscious strategic decision to label their restructuring a sale and a conscious strategic decision to bypass and circumvent the Chapter 11 plan process.

The evidence shows that Treasury's lawyers presented to Treasury alternative means of restructuring the company including through a Chapter 11 plan and that 363 was chosen for strategic purposes.

THE COURT: Pause, please, Mr. Richman. You've been around the block a few times. To what extent either in this court or Delaware or anywhere else in the country have you ever seen a Chapter 11 case? Put aside a large one like this, even medium size one, even cases in the fifty million dollar, hundred million dollar range -- that has ever gone from filing to confirmation within a period of ninety days.

MR. RICHMAN: Well, Your Honor, what we mention in the briefs is pre-packs and pre-negotiated plans certainly have been confirmed very rapidly. And this restructuring plan was fundamentally a pre-negotiated plan. There were agreements in place with the union, important agreements in place with some of the senior bondholders. This could have been filed as a pre-negotiated plan and put on an accelerated time frame.

Not only that, Your Honor, if the business objective here, both on the --

THE COURT: Pause. Forgive me. Can you give me any

more specificity than that? Ninety days is a very short time. A pre-negotiated plan, by definition, is, aside from the fact that you haven't solicited your votes from the disclosure yet, I get so-called pre-negotiated plans all the time where there have been pre-negotiated secured debt or with major elements of the unsecured creditor community. But when they've been filed that way, I can't count the number of times, even in my pre-packs, where one issue or another comes up and -- I'm trying to think of any specific example to any you know which have been able to meet that time frame. We have testimony, as I understand it, from Mr. Wilson that he had gone to -- and I'll have to look at the record for the number -- any number of people experienced in Chapter 11. And the view was unanimous, subject to me checking the record, that it would be suicidal to expect it to be completed in that period of time.

MR. RICHMAN: There were two alternatives. Well, first, let me respond to that, Your Honor. I have complete confidence that, with the resources available here, that (a)a pre-negotiated plan with the agreements that are in place and sought to be approved with the sale could have been filed on June 1st; and that Your Honor, upon cause shown, would have accelerated the timetable and all of the objections and issues and creditors' rights issues and many of the things that we're hearing today in a truncated way could still be determined by Your Honor, could still be determined on a fast track. Just

consider the extraordinary manner in which these hearings have been held in the last couple of days, discovery over the weekend, shortened times for everything. The same thing could be done in an accelerated plan if the same arguments were being made but creditors' rights would be accorded to that.

I can't tell you standing here right now of a specific case where I know that that was done. Honestly, I haven't had time to look for that. We did cite cases where the record showed confirmation within so many days of filing all of which were within thirty, sixty, ninety days, some of which were a couple of days. Most of those were pre-packs; some were pre-nego -- I believe some were pre-negotiated plans. I'd have to check and we could submit something afterwards, if Your Honor wishes.

But the other thing that I think is a useful response to Your Honor, if the goal here that everybody says they want is to create spinoff New GM, and it has to be done quickly because that'll get it out of the bankruptcy environment and allow public to understand that there's a new GM in place, that could have been done without allocating the equity. The company could have spun off the assets into a New GM. It could do so today. It could do so under 363. But it could retain the equity so that all the equity -- all the interest holders in this case would still have a stake in it and that equity allocation could then be done later pursuant to a plan so that

full creditors' rights are protected. And that would achieve all of the objectives that the government and the debtors claim that they have to achieve. It would be outside the bankruptcy environment but instead of the government holding the equity and determining how it gets allocated, the debtors would hold the equity until a plan could determine how it should be allocated.

Your Honor, the evidence shows that Treasury's lawyers presented various alternative means of effectuating the restructuring including through a plan and that 363 was a deliberate strategic choice. It was only at that time, after they decided to effectuate the restructuring through 363, that the format of a sale was devised with a shell company and the sale format was plugged in to fit the strategy. Once Treasury mandated a restructuring using a 363 sale strategy, the script was written in order to make that work. The company and its advisors analyzed only two options: the sale or a liquidation. They conspicuously failed to analyze or to present to the board the possibility of spinning off GM's best assets to a new GM, as I just indicated, or in an accelerated plan process.

The evidence shows that the government decided to use 363 not for any goal that a real purchaser would have but as a restructuring tool. The government doesn't want to buy, own or operate a car company. That's been said many, many times on the public record. But if the Court allows this restructuring

under 363 then the government can take control more easily, quickly and without providing value or distributions of a type or amount that conceivably otherwise would be required in a Chapter 11 plan.

It's a good strategy. We understand why they did it. They have nothing to lose. They told the public, as did the White House, that they hope to emerge from Chapter 11 in sixty to ninety days. So if this Court decides that in the unusual circumstances of this case including very distinguishing factor from Chrysler, the absence of any independent third party purchaser whose commercial needs are driving the deadlines, if this Court decides that there is insufficient support under Lionel and Chrysler to restructure under 363, the government and the debtors can easily spin this as a temporary setback but still well within their initial time frames. This case tests the very meaning of Lionel and its limits.

These were the very concerns that the Second Circuit had in articulating the Lionel guidelines, a balancing of tensions between the need to preserve a business and the need to protect creditors' rights. Lionel gave us six nonexclusive factors for evaluating the propriety of 363 sales to dispose of substantially all of the debtors' assets. But just before reciting those factors, the Second Circuit cited to the Supreme Court opinion in Committee for Independent Stockholders of TMT Trailer against Anderson for the proposition that, and I quote,

"The need for expedition is not a justification for abandoning proper standards." The president of the United States made a similar statement in his inaugural address which we quoted in our brief. In essence, we should not compromise our principles for the sake of expediency.

Then the Second Circuit had to say, in words that apply fully to the situation we face today, and I quote, "A bankruptcy judge must not blindly follow the hue and cry of the most vocal special interest groups; rather, he should consider all salient factors pertaining to the proceeding and, accordingly, act to further the diverse interests of the debtor, creditors and equity holders alike."

As the case law has subsequently developed and as reflected in these hearings and the arguments, the criteria considered most important are a sound business judgment and the question whether the assets in question are declining in value. The need to preserve value, particularly where there is evidence of deterioration, is often argued and cited to support unusual speed, particularly when the sale is sought so early in the case as it is here.

The only evidence before the Court demonstrates that since filing Chapter 11, GM's assets are not wasting. They are not deteriorating; they are not melting. Chapter 11 has apparently, so far, stabilized the company and sales have increased over the pre-bankruptcy period. Therefore, the

asserted need to effectuate a new GM very quickly or at least by July 10, is not supported by evidence of declining value. Indeed, it's clear from the testimony of both Mr. Henderson and Mr. Wilson that the debtors' and the government's first day fears about the negative effects that Chapter 11 would have on GM were greatly exaggerated and unsupported at least over the first thirty days. And we presume over the first sixty to ninety days that they predicted that the case would last and inform the public that the case would last. What we see in the evidence is that because the parties attempted at all cost to justify the need for a fast track sale, there were a number of conclusory statements and predictions of dire consequences that turned out not to be true.

Mr. Henderson's first day affidavit in evidence as Debtors' Exhibit 15 states at paragraph 82 that "The value of and consumer confidence in the GM brand and its products and support systems are fragile and will be subject to significant value erosion unless they are expeditiously transferred to New GM and its operations start fee from the stigma of bankruptcy. Any delay will result in irretrievable revenue perishability and loss of market share to the detriment of all economic interest. It will exacerbate and entrench consumer resistance to General Motors products." Mr. Wilson said that his concerns about timing were informed by articles from commentators who predicted GM could not survive Chapter 11.

But as we have seen from the evidence, these first day predictions turned out not to be true. It is evidence and not prophecy on which this Court should rely.

Though GM's overall financial performance was in decline over a long period of time and clearly it is today on a year-over-year basis below what it was a year ago, it enjoyed improved performance in the first month of bankruptcy over the month of May. Some of this may be attributable, as Mr. Henderson testified, to the government backstopping of warranties which occurred earlier and independently of any bankruptcy filing. Some of it may also be attributable to business strategies that Mr. Henderson and his team pursued more recently. So the assets are not wasting or spoiling or deteriorating.

Now, echoing his first day fears when he testified, Mr. Henderson said that he thought one reason why the business was doing better than expected in June was customer expectation that the bankruptcy process would go quickly but he later conceded that that was pure conjecture. Indeed, it became clear from Mr. Henderson's testimony, as well as Mr. Wilson's, that the fears of business decline that they said motivated their desire for a fast track 363 as distinct from any alternative were based on worries over a prolonged case -- "prolonged" was a word in the testimony -- one where the company "languished" in Chapter 11. Mr. Wilson said Treasury

was concerned about a "traditional" Chapter 11 process.

Mr. Miller spent argument time warning of dire consequences as well, not in the record of evidence but in Mr. Miller's opinion, and concluded with the point that a Delphi-like case would be bad for the business. That's not really debatable but it's not the point.

The debtors argue that this transaction is the only alternative to a liquidation but is it fair to say that there is no viable alternative to a sale where you deliberately limit your alternatives? I understand an aversion to a traditional plan process. But here, where there was already the equivalent of a pre-negotiated plan, an accelerated plan process could have been and could yet be attempted. But no advisors were asked to consider that or value it or present it as an option to the board. Mr. Repko agreed that the value of a new GM under a plan could be comparable to the value under the 363 transaction.

Now, Mr. Miller said that our suggestion of a Chapter 11 process that could be concluded within ninety days was magical. Yet, as I indicated before, and I'd be prepared to supplement the record with some further research, we know that many cases with pre-packs and pre-negotiated plans have been completed in that time frame without magic. And there is no doubt that the debtors and the government have the resources to do that here, to at least try that here. Perhaps the magic

that he was referring was making creditor objections disappear. And if that's what he meant, then I agree that you couldn't do that in a plan process. But this Court could have easily dealt with as easily such issues in an accelerated plan time frame as the Court demonstrated it could do with these hearings especially in an extraordinary case like this. If there was any magic here, it was the debtors and the government taking a magic wand to a restructuring and saying poof, now you're a sale. And with that, creditors' rights and plan protections disappeared.

Since the evidence does not establish that the business is deteriorating, the debtors' business judgment, if it actually has any judgment of that sort in a case like this, is narrowed to its asserted belief that the business opportunity, if what the government is offering could even be characterized as a business opportunity, is limited and perishable. The government's offer of financing will expire on July 10. If the debtors do not comply with the government's dictates, liquidation will inevitably follow. The important question is whether this Court has any power to disbelieve that. From the debtors' perspective, we completely understand the argument that they have to try this. They have to advocate it and believe it. It's not business judgment, though, because there's no real choice involved. It's inconceivable that any company would choose to liquidate in the face of such a

government offer. Simply inconceivable. And we're not criticizing the fact that the debtors have chosen this course. And we're not criticizing the fact that they sensibly decided not to liquidate. We're objecting to the form of the transaction.

Even though the debtor had no choice, this Court does. This Court can look through the form to the substance, through the evidence to the truth and through the magic in order to stand for the Chapter 11 process.

Now yesterday, Your Honor commented about our familiar experiences with overbearing lenders. I believe the comment was that lenders frequently overreach. In many such situations the debtor, in dire need of financing, is in no position to negotiate effectively. As here, the debtor is given no real choice. Where the debtors' will is overborne, the Court can and does step in. We see that all the time with DIP financing and purchase -- 363 purchase provisions. Desperate debtors agree to things demanded of them because they have to. But the Courts will not hesitate to push back and tell the lenders, sorry, I'm not approving those provisions.

THE COURT: I've done this a few times, Mr. Richman. When you say we don't hesitate, I think that understates it a little. Every time a judge rules on a DIP, he's rolling the dice that he's going to crater the whole case if he messes around with economic terms. If you give them extra time to do

investigations so they can bring their avoidance actions, we make individualized adjustments as to whether 506(c) labors are appropriate or handing over the proceeds of avoidance actions are appropriate. But I cannot think of a single time in the nine years I've been on the bench or the nearly four years I've been doing this where I've ever told -- seen a judge tell a lender that he has to agree to different deal terms.

MR. RICHMAN: I wasn't suggesting that, Your -- I actually agree with Your Honor up to that point in the sense I wasn't suggesting that you tell what the deal should be. But Courts do and Your Honor has pushed back on provisions that Your Honor was being told we're absolutely required by the purchaser with the DIP lender. And Your Honor has said and other judges have said, I want to prove those even though there was the threat, difficult threat to deal with that the party would walk away because the Court stands for the law and the parties understand that they have to follow those dictates if they want to do a transaction under Chapter 11. My only point, which I think Your Honor was agreeing with, is that it's not uncommon. When the debtor doesn't have the ability or leverage or the independence of will to be able to fight back over onerous provisions or even a mandated sale, the Court still has the power and authority to do so.

Bankruptcy courts call the bluffs of billing lenders and purchasers all the time. And that brings me to footnote 15

of Judge Gonzales' opinion in Chrysler In Chrysler, as here, the main argument was that the debtor had no viable options but a sale or a liquidation. Now, in that footnote, the Court commented on a third option raised by dissenting creditors. And I quote: "Based upon the U.S. government's substantial interest in preserving the automobile industry, jobs and retiree benefits, the intimation is that the government was bluffing when it indicated that it would walk away from exploring other options if the Fiat did not close quickly." The proposed third option is that the debtors could have refused to accede to the government's terms in the hope that the government would capitulate and agree to consider other alternatives. The Court concludes that gambling on the possibility that the government was bluffing and listing the potential for a lesser recovery in a resulting liquidation would have been a breach of the debtor's fiduciary duty.

Judge Gonzales did not, however, say that he or any other judge would be without power to call such a bluff. We are not challenging the debtors' choice which was a non-choice to proceed with the strategy. But we do say that in the circumstances of this case, the Court has the power and authority to push back. Many people say that Chrysler is the blueprint for GM and that the cases are the same. They are not. And they are completely distinguishable in the most fundamental of ways. The deadline pressures in Chrysler were

in the main driven by the commercial needs of an independent purchaser. The business opportunity was legitimate, commercial and limited. By contrast, there is no real purchaser in this case. The government is not setting any deadlines with reference to commercial exigencies of the automotive marketplace; it has no experience running a car company. The deadlines were set to support the strategy of a 363 restructuring.

If you go to a Broadway musical, you expect an orchestra. For a 363 fast track sale, you need a drop dead date. It's part of the scenery; part of the show.

As distinct from the dissenters in Chrysler, we are not suggesting that the debtor should have refused to attempt the 363 transaction. We don't see how they could have. They had no choice. As the evidence has showed, and as other parties have argued, the principal decision makers and senior management were not acting with any independence. They were across the table from their new employer. They were arguing with their new owner.

But this Court can push back. This Court can call the bluff in the overriding interest of upholding the Chapter 11 process. Consider: the government has repeatedly said it will not allow GM to fail. It has said it is committed to creating New GM. It has already invested 19.4 billion dollars pre-petition and perhaps as much as thirty three billion

dollars including DIP lending. It told the public it was on a sixty to ninety day track. Like any powerful lender or purchaser, it says, my way or the highway.

Mr. Wilson said that if the sale order was not approved, Treasury would cut its losses. Now, I submit that Mr. Wilson's credibility was open to question on some points. His demeanor was markedly different from the other witnesses. He's smart enough to know what findings the Court needs to make to approve the transaction and I believe and I submit that he answered some questions in ways designed to serve the end. For example, he said that his understanding of the term "languishing" meant anything more than thirty to forty days. Most of his testimony was carefully couched in terms of present intentions and beliefs.

But while the drop dead threat is out there, there is nothing that binds the government to abandoning GM and the government can and will react to a decision here, a decision of law by this court, in a manner that is both politically and economically sensible. Their agreement on funding administrative expenses was limited to 950 million dollars. But we heard Mr. Koch testify that he had a feeling or a belief that they would step up and do something more. It wasn't in writing but there may be a number of unwritten understandings here as part of the strategy of how the parties are going forward. And the clear impression from the sixty to ninety day

pronouncements from both GM and the White House is that while Treasury may not be obligated to fund beyond July 10, they will step up and do so if they have to. They have to threaten to cut off financing.

THE COURT: Pause, please. Can you repeat that? And say a little slower. And if you had a particular reference to something, I ask you to repeat that as well.

MR. RICHMAN: Yes, Your Honor. I said the clear impression from the sixty to ninety day pronouncements, which we quoted in our brief from the outset of the case, is that while Treasury may not be obligated to fund beyond July 10, they will step up if they have to. And to expand on that, it's inconceivable to me that the White House press secretary or GM's CEO would be telling the public sixty to ninety days if they didn't have some assurance of financing beyond July 10th.

THE COURT: Okay. You preceded the words about clear impression. It's an inference you want me to draw --

MR. RICHMAN: Yes.

THE COURT: -- or, in fact, is it something somebody said?

MR. RICHMAN: That's correct, Your Honor.

THE COURT: Okay. Continue.

MR. RICHMAN: The government has to threaten to cut off the financing in order to limit the debtors' options and perhaps those of this Court as well. But I don't think and I

don't believe this Court should believe that the government is now going to abandon GM if this Court merely says that the use of 363 is not legally supportable in this case. Do it another way. It's not credible to think that the White House will say tomorrow, we've now decided to let GM fail because we don't want to follow the law. We didn't get our way in court on an attempted fast track sale so we're going to give up -- sacrifice three-quarters of our investment and flush GM away and the thousands of jobs with it and the dealer network and the dependent suppliers and so on and so on. All the same considerations that the debtors have argued are important reasons to approve the transaction are at least equally important reasons why the government will obey the law if Your Honor determines that the law is that 363 can't be used on a fast track under these circumstances.

Now, there was a related power or leverage threat that seemed to come through in the hearings, something like an additional drop dead threat that might be added, pressure for approval of the transaction. And that was the suggestion that the UAW agreements to modify their collective bargaining agreement were in some way conditioned upon and could be rescinded or undone by a failure to approve the sale order by July 10. And I thought that's what Mr. Curson said in his testimony.

Your Honor, we checked the documents that were

submitted in evidence in the records and we could not find anything in writing in the evidentiary record which conditions the collective bargaining agreements in any way. And both Mr. Henderson and Wilson testified that those amendments were already in effect and that the amended bargaining agreement is now governing.

In particular, we looked at the amendments that the UAW filed. We just didn't see anything which provided that if the sale order wasn't approved by July 10 that those amendments would be rescinded.

Now, the agreement to fund the VEBA, which we ask questions --

THE COURT: Pause, please. Can you slice and dice that piece of information? If I heard you right just a second ago, you said by July 10. Would you mean to include or exclude by that whether you had a view as to whether the union would continue to perform this day to day stuff if it didn't get its VEBA funding, new VEBA funding, one way or another or if you're back to square one?

MR. RICHMAN: I do have a view of that, Your Honor. My view on that is that the collective bargaining agreement is a binding contract. And it's in effect and it's operative now regardless of what happens to the VEBA at least as I read the record and the evidence. The VEBA deal, I think, is a separate deal. And I understand if it is, at least again as I

understand the record, it makes sense to me because one could argue that the overall settlement in terms of the amendments to the collective bargaining agreement are an asset of the estate and that the VEBA deal is part of a consideration that should actually go to the estate. But if you keep them legally separate such that the VEBA is not inextricably intertwined then maybe you create a better argument that the VEBA is like the equivalent of giving stock to somebody by the purchaser and isn't really consideration for the modification and then the assumption and assignment of the collective bargaining agreement.

THE COURT: Help me on that a little more, because I thought the duty to the UAW's VEBA was in the ballpark of twenty billion bucks and it was a liability rather than an asset.

MR. RICHMAN: Your Honor, all I can say is we didn't find any linkage that would cause that to fail in any way. And in any event --

THE COURT: Your basic point is that, if you read the documents, you're questioning whether Mr. Curson's right in his view that he's got a package deal here.

MR. RICHMAN: Exactly. It goes to the question of whether there's some further dire consequence that Your Honor should consider would result if Your Honor did not approve this transaction by July 10. And I submit that it's not a dire

consequence because of the lack of linkage. And if there's a separate agreement on the VEBA, that separate agreement, I don't know that it's conditioned on a July 10 approval, but presumably that would still be in play for a plan process.

THE COURT: Go on, please.

MR. RICHMAN: As we've seen from the hearings, there are many other questions and issues that a plan process could better address: Why is the government getting full credit for prepetition loans that could be challenged as equity? Doesn't that call for more cash to be put into any deal, whether under 363 or a plan? Other counsel have raised serious questions about the bypassing of rights under Section 1114 of the Code and of attempts to shed successor liability. And we've also raised other arguments in our brief, to which we continue to adhere, including that the transaction should also be rejected as a sub rosa plan.

THE COURT: Okay. Pause, please. On the recharacterization point, are you contending that not only the pre-petition secured debt ballpark or nineteen billion bucks -- I'd have to check, or maybe it's thirteen billion, I'd have to check the exact figure on that -- should be recharacterized? Are you also contending that the thirty-three billion bucks of U.S. and Canadian DIP financing also has to be recharacterized?

MR. RICHMAN: Only the pre-petition debt, Your Honor. I think that in a case that wasn't moving at quite this

lightning speed where parties had a real opportunity to negotiate allocations and distributions, that there would be greater focus on the priority of that pre-petition loan as compared to other creditors. I partic --

THE COURT: But stick with me for a second. Suppose the U.S. government had only bid thirty-three -- credit bid thirty-three billion instead of fifty-nine billion. I'm not aware of there being any bids in the wings that could have trumped a credit bid if it was low as thirty-three billion -- as low as.

MR. RICHMAN: And we know, we know, as a fact that --

THE COURT: -- as thirty-three billion as well.

MR. RICHMAN: We know as a fact that there weren't. I think that the way I would answer that is if the debtors have produced a fairness opinion that indicates that the fair value for the company is 90 billion dollars or 70 billion dollars, and then you back out 19.4 billion dollars, it suggests that the consideration is short by 19.4 billion dollars and that there either has to be a reallocation of the equity or the infusion of additional funds in order to meet the fair price.

But I agree with Your Honor that had this gone differently as a real transaction might have gone -- remember, this wasn't negotiated as a sale of assets. This was a determination of how much money it would take to reach settlement agreements with the favored constituencies, and

everything else was backed into that. And then, so, a price was derived on the back end.

We also argued, Your Honor, that the transaction should be rejected as a sub rosa plan. I'm not going to spend a lot of time on that. The debtors' answer to that is that it doesn't predetermine a plan because, the way this transaction is designed, the 10 percent of stock and the warrants to acquire another 15 percent and, I guess, the 950 million dollars for administrative expenses is being left behind to be distributed in the normal course.

But, Your Honor, if you engage in a transaction which removes from the plan matrix an important class of creditors and give them favored treatment outside of the plan process, that's as much predetermining the plan as leaving them in the plan process. You are still predetermining and creating the construct of a plan but you're doing it through extra plan provisions. So I don't think -- just because this doesn't dictate distributions to every class doesn't mean that somehow it's not a sub rosa plan.

I want to be clear about an important point, and it's another distinction from the Chrysler case, particularly in respect of parties who stand in the position of bondholders, as our clients do. We've never argued, and we don't contend, that GM should liquidate. We support the creation of a New GM. We think it's a fine idea and we defer to the collective judgment

of the professional advisors on that issue.

And we appreciate that GM would already be liquidated if the government had not come in late last year to provide financing that no one else could provide. We wouldn't be here discussing this today if the government wasn't committed to saving GM. But that does not earn the government an exemption from the law. Our gratitude to the government rescue does not include sacrificing our legal principles. Perhaps the government could nationalize GM, and we would all be left with nothing, but they chose Chapter 11. And once you choose Chapter 11, you should comply with all of Chapter 11. The government should not be permitted to cherry-pick which provisions of Chapter 11 it will use and which it will not use.

Right now, the value of New GM rightfully belongs to the estates and all of its creditors. New companies are spun off through Chapter 11 reorganizations all the time. In that normal process, all of the major constituencies participate in negotiations concerning overall value and allocations of that value. The final results are accompanied by full disclosure. Parties-in-interest have protection against oppressive results through Section 1129. These negotiations would determine how much equity in New GM the Old GM should award to the government or the union or to other parties. That's the essence of the Congressionally-mandated corporate reorganization process of Chapter 11.

By taking what would otherwise be a deliberative reorganization involving all major parties on an accelerated basis and calling it a sale that must be completed by June 10 to avoid dire consequences, the debtors and the other favored parties in the allocation of values are engaged in a fiction, in a pretext, in a subterfuge to avoid a plan process in which the allocations of value might be determined differently.

We get their arguments. If you accept that this transaction is a legitimate sale, then of course the purchaser can choose to divide up the ownership any way it likes. And therefore, of course, its arrangement with the UAW and the Canadian and Ontario governments, parties who are providing unique present and future value to the new business, is its prerogative. But if it's not a legitimate sale, or if the other tests of 363 are not met, then these important allocation decisions would not be the purchaser's to make.

If this Court does not have the freedom to push back, if any distressed company can be diverted into Section 363 in order to avoid plan confirmation requirements by overbearing lenders or purchasers setting arbitrary deadlines or, more importantly for the facts of this case, by an overbearing government, then the Court does not truly have discretion.

We have seen before in our history how in times of stress and extraordinary circumstances government asserts itself on more grand and powerful scales than before. In

substance, this appears to be an historic first attempt at a Chapter 11 nationalization. GM has no ability to resist that power. In our system of government, it is the judicial system which is the primary check on that power. This Court can and should draw the line and hold that this transaction goes too far. Doing so is consistent with Lionel and with Chrysler. Such a holding which recognizes the important distinctions between this and every case that has gone before sends a powerful message that even in the bankruptcy courts of the nation's commercial capitol there are limits and that due process and creditors' rights are important values not to be sacrificed in the interest of expediency. Thank you, Your Honor.

THE COURT: Thank you. Thank you, Mr. Richman.

All right, Mr. Parker, I'll hear from you. Mr. Parker, on anything that Mr. Richman addressed, I'll ask you to limit yourself to anything where you think Mr. Richman failed to do an adequate job.

MR. PARKER: Okay, Your Honor. If I may, may I begin by asking the Court to -- for time reasons, and because I think certain things have been adequately argued already, I'm not going to argue some points that I've raised in my objections, but I'd like to preserve those points.

THE COURT: Of course. Anything anybody said in a brief or in a pleading is deemed to have been asserted. I

mean, the purpose of oral argument, in my court, is not to repeat or to have to say again what you said in your papers. It's to give me orally anything which helps me better understand the papers or answer things where you're plugging the holes.

MR. PARKER: Okay. So I'm not waiving anything, any points --

THE COURT: Right.

MR. PARKER: -- by not mentioning it.

THE COURT: That's what I said.

MR. PARKER: I know, I'm just clarifying for myself. I'd also like to also incorporate by reference the arguments of Mr. Kennedy and of --

THE COURT: To the extent you need to, it's done.

MR. PARKER: Okay, and also my immediate predecessor up here.

THE COURT: Same.

UNIDENTIFIED SPEAKER: Mr. Richman.

MR. PARKER: Mr. Richman, right.

Thank you, Your Honor. Your Honor, basically I want to address four points, if I may, four points that I don't think have been addressed. One I wish to address very, very briefly, and I'll begin it with apologizing to the Court for my less-than-stellar performance on Tuesday. But I think that less-than-stellar performance is at least partly the result

of -- I object to the process, and I've objected in my objections, to the process chosen by the debtor. This is not a criticism of the Court or of yourself; this is a criticism of the process they chose.

I don't believe that there has been adequate time to prepare a response to their motion. For example, and after making the example I'll move onto another point, for example, they criticize, or in their oral argument to the Court they have emphasized, that they're the only ones who've provided any valuation scenarios for General Motors. Well, of course, they had several months to prepare those valuation scenarios. We've had less than thirty days. The time frame -- I mean, I filed my objection on June 19th, so I've basically had eleven days. In eleven days you can't find an expert, have an expert get access to the records and create a valuation report. I don't think it can be done. So I'm objecting on those grounds.

But I'll move on. One of the things I'm objecting to, and I believe I'm the only one who's objecting on this, is the limitation-on-liens argument. The -- I rest upon two documents -- well, three documents: first, the 1995 indenture, which I believe is Debtors' Exhibit 10 in evidence, if my notes are correct. Section 1408 provides that it's governed by New York and is to be interpreted by New York law. Section 406 contains a limitation-on-liens provision, which I think the Court can read; I don't think the Court needs me to repeat it.

In addition, there's Parker's Exhibit 1 in evidence, which I believe is my only exhibit, which is a prospectus supplement dated June 26, 2003 for six and a quarter Series C convertible debentures due in 2033, with an attached prospectus dated June 19th, 2003. If you look at page 23 of the June 19th prospectus, the one that's attached to the supplement, you'll find that the identical limitation-on-liens provision is found in that prospectus and that it applies to my bonds. The prospectus also states that my bonds are issued under the 1995 indenture.

Now, the third document that I'm relying upon is -- I believe it's Debtors' Exhibit 6. Again, back there it's difficult to keep track of which exhibit is which, but it's the loan and security agreement dated December 31st, 2008. And if you'll give me one second to get the agreement. Here we go. If you go to page 35 of Exhibit 6, which -- and I'm using the numbers on the top right-hand corner --

THE COURT: Go on.

MR. PARKER: Do yours have the same pagination? Otherwise, I'll use the pagination from the original document.

THE COURT: Why don't you speak to it, because it'll take me a little bit of time to find it. But --

MR. PARKER: Sure, if I may.

THE COURT: -- I'll assume, unless somebody disagrees, that you're accurately reading to me. And I'm

familiar with the issue. What I want you to focus on is excluded assets within the meaning of the December 31st, 2008 agreement.

MR. PARKER: Yes, sir, I know, I'm getting there. Paragraph -- or I should say section 4.01(a) creates a lien on all real and personal property wherever located, except where excluded. Okay, section -- subsection - sub-subsection (a)(6) provides a lien on all personalty; it gives a nonexclusive definition of personalty, including equipment and instruments.

Section 4.02 provides that General Motors is to provide UCC filings in order to perfect the government's liens on all equipment. And there's a schedule of all the properties where equipment is located that UCC liens are to be filed for; that's section .402 (sic) on page 36. And, again, I'm using the pagination 36 of 111 in the top right-hand corner.

Section 6.09 has excluded collateral, and it refers one to schedule 6.29. It states that section 6.29 is a complete and accurate list -- by the way, that's 6.29, I'm sorry, not 6.09. Section 6.29, which is on page 51 of 111, states that, on excluded collateral, "See, set forth on Schedule 6.29, is a complete and accurate list of all excluded collateral of each property." When you go to schedule 6.29, you get a blank page. It says "Schedule 6.29, Blank". So apparently there is no excluded property.

It then goes on --

THE COURT: Mr. Parker, are you going to eventually get to subsection v --

MR. PARKER: Yes, yes.

THE COURT: -- romanette v, one of the definitions of excluded collateral?

MR. PARKER: Yes, sir, but -- okay. I am eventually. My point about what I -- to summarize, I was going through the documents to show you -- I realize that there is a subsection v on -- bear with me a second -- section 4.01, subsection v, defines excluded -- has a definition of excluded property but says "any property, including any debt or equity interest, any manufacturing plant or facility which is located within the continental United States, to the extent that the grant of a security interest therein to secure the obligations will result in a lien or an obligation to grant a lien in such property to secure other obligation". I understand that that's there. What I'm trying to show the Court is that even though that's there they still went and filed liens on property. And I don't think you can file liens on property and get an excuse for it by saying oh, well, I filed someplace else a statement that if I did it I didn't mean it.

The documents show that -- I might add, if you go to section 6.30, Mortgaged Real Estate, that's actually the only section that I've been able to find where they have language that says we do not have a lien on mortgaged real estate if the

lien would give rise to a lien in favor of a person as set forth in schedule 30 hereto. By the way, schedule 30 hereto is also blank.

It seems to me that they have, whether they were allowed to or not, and whether they've excused themselves from doing it or not, filed liens on two classes of property that I would like to bring to the Court's attention. The first class of property is listed in schedule 6.25, which is the UCC filings. They have filed the UCC filing -- lien on the following -- on the manufacturing and equipment of the following localities: the Doraville Assembly Center, the Janesville Assembly Center, the Moraine Assembly Center, the Massena Castings, Pittsburg Metal Stamping, Grand Rapids Metal Stamping, Spring Hill Manufacturing Campus, Wilson Run (ph.) PDC, Latsina (ph.) PDC, Pontiac North Pitt 17, Pontiac North PC, Yps -- I can't even pronounce it -- Ypsilanti Vehicle Center, Beavertown PDC, Grand Blanc Metal Center, Former Cherry Town Assembly, Former Validation Center, Former Lansing Plants 1, 2, 3, and 6.

Finally, Your Honor, under schedules 1.1 and 1.2, they've made it clear that among the assets that have been liened are Saturn. Saturn is -- at least according to the testimony of Mr. Fritz Henderson, Saturn is the only manufacturing -- American manufacturing subsidiary of General Motors. They've liened that. And indeed, because they liened

that, I believe that Saturn is a -- has an accompanying bankruptcy proceeding that's consolidated with this one.

Now, I realize they say they gave themselves an escape clause and if we lien something and we shouldn't have it as liened. But in point of fact, they did lien it. And the escape clause shows that they knew that they had obligations not to lien it. And when they liened it, when they liened these facilities and when they liened Saturn, under the terms of the bond indenture, the 1995 bond indenture, the bondholders acquired liens equal and ratable to that of the government.

THE COURT: Mr. Parker, do you think that if Mr. Schwartz had come in to me and said I got a lien on that stuff and any other party-in-interest in the case showed me romanette v he wouldn't have been left out of court?

MR. PARKER: I don't know, Your Honor. I do know that they attempted to perfect a lien on these assets even though they were prohibited from doing so. And, Your Honor, if nothing else, I believe that that goes toward the issue of bad faith. I believe -- which, by the way, gets us to the next issue that I wish to discuss.

THE COURT: Good time to do it.

MR. PARKER: Pardon?

THE COURT: Go ahead, please.

MR. PARKER: Give me a second to get there.

In order to approve a 363 sale, the government must

allege and prove good faith. In looking at good faith, the Court, I believe, needs to take a look at the totality of the circumstances concerning not only the sale but of the events leading up to the sale under the arrangement between the lender and the debtor. Even if they did not succeed in acquiring liens on the properties -- on that long list of manufacturing equipment that I listed -- and on Saturn, the only -- to the best of my knowledge, and according to Mr. Henderson's testimony, the only manufacturing subsidiary of GM, they attempted to acquire liens. They made UCC filing statements. Schedule 6.25 shows the places where they scheduled and what they -- the places where they liened the equipment and what they liened. Doing so, attempting to do so, Your Honor, is an attempt to violate the covenants of our indentures.

In addition, the further evidence of bad faith is found in the fact that their 363 sale procedure is tantamount to a distribution plan which discriminates in favor of certain favored creditors against others, as has been previously argued by others. Also, their 363 plan, as argued by Mr. Kennedy, is designed to avoid a Section 114 hearing and the effects of the 114 hearing.

THE COURT: 114?

MR. PARKER: 1114, I'm sorry. 1114. Further, Your Honor, as ably argued by --

UNIDENTIFIED SPEAKER: Mr. Richman.

MR. PARKER: Mr. Richman, sorry. You can obviously tell there's not been much coordination between us. As ably argued by Mr. Richman, there is no real purchaser. There is no real -- there's been -- there's no real purchaser, there's been no real negotiation. This is basically the government selling GM to itself.

Furthermore, Your Honor, and I guess this gets me to my next point, I've argued in my objection that the government is not authorized to purchase General Motors under EESA, that is, the Emergency Economic Stabilization Act, or under TARP, the Trouble Assets Recovery Program. The -- as Mr. Wilson testified, the loans that were given to General Motors were given from TARP funds. I have argued -- and I'm not going to repeat the arguments here, I'm going to rest upon the argument in the objection -- I have argued that the government is not authorized, was not authorized to make those loans under TARP. Making loans that it is not authorized to make is also evidence of bad faith.

I realize that there is some question of whether I have standing to raise this issue, and I'd like to address that very briefly. I do not believe that I have standing to challenge the use of TARP money for the DIP lending, for the DIP loans. I believe you entered an order authorizing DIP financing back on June 25th. I had no standing to object because I was not harmed by that action. Because I did not

have standing to object, I didn't object. However, I am harmed by the government's proposed sale procedure, and because I am harmed -- if they are going to use a credit bid of roughly forty-nine billion dollars of TARP money to purchase GM. So they are using TARP money to make a purchase.

If my argument, as set out in the objection, is correct, they are not authorized to use TARP money. They may use TARP money to buy a bank; they may use it to buy all sorts of financial institutions. But whatever else General Motors may be, it is not a financial institution. The use of money to do something that they are not authorized to do is evidence of bad faith.

Finally, Your Honor -- further, Your Honor, on bad faith, I have argued in my brief that there are Constitutional probl -- that there are Fifth Amendment taking problems with the proposed proceeding. I'm not going to repeat those arguments here. But, again, those concerns are evidence of bad faith.

Which gets me to my final point. I'm trying to go as quickly as possible; I'm trying not to use too much time. My final point, Your Honor, if I can find it -- oh, yes. I need to refer to one more exhibit, if I may. Here we go. My final complaint, Your Honor -- and by the way, I -- my final complaint refers to the scheme of distribution, the distribution of the sale proceeds of this 363 proceeding. Now,

I want to make clear, I'm not objecting to the sale price. As I understand it -- and I'm referring now to the declaration of Stephen Worth, Debtors' Exhibit 3, Exhibit F, page 15. I don't know what exhibit number Stephen Worth -- I don't know what exhibit number it is, but his declaration is in evidence -- he testified -- Exhibit F, page 15. It is an analysis of the proposed transaction. It shows that the United States Treasury is paying 104.5 billion dollars. By the way, I'm using the lower numbers in these calculations. There's a difference; he gives a range of -- it's usually only two to three billion dollars different; I'm using the lower number. You can redo the calculations with the larger number if you prefer.

He gives a bid of 104.5 billion dollars. That's what, according to him, the Treasury is paying for General Motors. I think that's a fair price for General Motors; I'm not quibbling over that. According to him, the way that the government is paying it is they're making a credit bid of 48.7 billion dollars of secured lending. Now, I don't think he quite explained to you how that number comes about, so I'd like to explain it to the Court, if I may. The total secured indebtedness, excluding my argument about bonds, the total secured indebtedness is approximately fifty-six billion dollars. The way you get that number is you take the 19.4, you take the 33.3 and you add on the 6 billions that are owed to previously secured lenders. You add all those numbers up; you

come into approximately fifty-six billion dollars.

The government is taking back a loan, a secured loan, from General Motors, the New General Motors, of approximately seven billion dollars. They're also taking back two billion dollars in preferred stock. If you take those two numbers out, you come up with the 48.7 billion dollars that is listed here on page 15 of Exhibit F of Stephen Worth's declaration.

Now, I fully recognize that secured lenders should be paid first. So out of the 104 billion dollars they should get their 48 billion. The problem is that when you look at the sheet you realize that he -- that the other way, the other consideration given, is that -- and if you look at the second column -- the government is assuming and paying in full, or agreeing to pay in full, 48.4 million (sic) dollars of unsecured debt, which, by the way, according to the testimony of everybody who's been up here, does not include the debt of the UAW VEBA.

Now, personally, I find that testimony to be -- I question the testimony. It seems to me that if the UAW VEBA is getting 20.5 million dollars and is releasing its claim of 20. -- did I say million? I meant billion -- 20.5 billion dollars and releasing its claim of 20.5 billion dollars in the estate, that seems to me to be a payment.

For the purpose of this argument at the moment though, I'm not going there. I've argued that in my objection;

I will -- obviously have argued that here. I agree with that argument. But I'm arguing something slightly different. If you take -- since the 20.5 billion is gone, according to this sheet the total indebtedness for General Motors, that is, I guess, real indebtedness, not just pro forma indebtedness, is roughly 104.5 billion dollars, excluding the -- no, that's not right, it's 48 and 48 makes 96; 97 plus 35 makes -- roughly 132 billion; I may be off by a billion or two because I did a fast calculation in my head. The real debt in General Motors is 132 billion, excluding the 20.5 billion that's owed to the VEBA. The government's getting 48.7 billion to pay off secured lenders. That leaves 83.4 billion dollars in unsecured debt that needs to be taken care of. 48.4 billion is being paid 100 percent on the dollar; 35 billion, including the 28 billion in bonds -- and by the way, they keep saying it's 27, but when you do the math with interest to June 1st or May 31st, take your pick, 2009, it actually comes to 28 billion. The 28 billion dollar debt is getting 7.4 billion dollars; roughly 20 cents on the dollar.

So under the sale procedure, some unsecured creditors, favored unsecured creditors, and we're not talking about the VEBA now, are getting a hundred cents on the dollar while others are getting twenty cents on the dollar. My objection is let's take the purchase price but let's treat all the unsecured creditors equally and ratably. And if you do

that, they would all get sixty-six cents on the dollar.

Furthermore, Your Honor -- so, Your Honor, that, I believe, is my final point. The government is not only showing favoritism with regard to the VEBA; they're showing favoritism with regard to other unsecured claims. In a Chapter 1129 proceeding, those unsecured claims would be treated like all other unsecured claims. And this, by the way, gets back to good faith. In order for the government to be showing good faith, they must be treating all unsecured creditors fairly.

Now, allegedly they have a good business reason for treating the VEBA differently. I don't buy it; you may. I'm not arguing that for this second. I don't agree with it. I've argued otherwise in my objection. But putting that to one side, they still have an obligation to treat all the remaining creditors fairly, and they're not doing so. They're picking winners and losers. And they've given no business justification for these other winners that they've picked.

And for these reasons, Your Honor, I would urge you to reject the sale. And I will make clear, I want General Motors to reorganize. It is not in my interest or any bondholder's interest to see General Motors liquidated, although we have not had time to make a liquidation analysis. All we want is an opportunity to negotiate in good faith with the government to come up with a plan that is fair, fair to all unsecured creditors.

With that, thank you very much, Your Honor, and I want to thank you for your indulgence over the past three days.

THE COURT: Very well. Thank you.

All right, Mr. Bernstein?

MR. BERNSTEIN: I'll try to be brief, Your Honor.

THE COURT: Yes, I understand the issues. The main thing I want to hear from you on is whether there's recall authority supporting the idea that the consent decree obligation is something other than a monetary obligation.

MR. BERNSTEIN: Yes, Your Honor. First thing that supports it is that -- may I approach the bench, Your Honor?

THE COURT: Yes, sir.

MR. BERNSTEIN: Nolan entered a joint stipulation, modified the consent decree and then entered the pack of them as a final judgment of the United States District Court for the Southern District of Indiana.

PENINA 1:24:32

THE COURT: Is this new evidence, or is this --

MR. BERNSTEIN: I believe you can take judicial notice of this. We found this last night in response to Your Honor's question, and you'll see the second as the final judgment, Your Honor. It was entered by Judge Nolan under 54(b).

THE COURT: All right. Pause, please, Mr. Bernstein. Mr. Miller, do you object to me considering this?

MR. MILLER: No, Your Honor.

THE COURT: Okay.

UNIDENTIFIED ATTORNEY: I'm sorry, Your Honor, we don't have a copy of the judgment --

MR. BERNSTEIN: I can give you -- I have extra copies for you, I'd be glad to provide them. Here's the stipulation and order, and let's see if I have copies -- and here's an extra copy of the final judgment.

The second point, Your Honor, the legal context is set by the Supreme Court of the United States. One of the leading cases is Rufo v. Inmates of Suffolk County Jail. The citation is 502 U.S. 367. And the relevant citation is at page 378: "There's no suggestion in these cases that a consent decree is not subject to Rule 60(b)." I have Rule 60(b) as a rule for modifying judgments.

THE COURT: Right. And --

MR. BERNSTEIN: Right. "A consent decree, no doubt embodies an agreement of the parties, and thus in some respects is contractual in nature. But it is an agreement the parties desire and expect will be reflected in and be enforceable as a judicial decree that is subject to the rules generally applicable to other judgments and decrees."

The case counsel cited was one of these cases involving an interpretation of the language of a consent order or a consent decree, and yes, to that narrow context, the

courts look to contractual reasons, because the judgment reflects an agreement of the parties. But in terms of enforcement, a leading case in the Second Circuit is Badgley v. Santa Croce -- I'll spell out the name, because I'm making a hash of pronouncing it, I think. It's B-A-D-G-L-E-Y v. S-A-N-T-A C-R-O-C-E. And in that case, the Second Circuit reversed a decision of the district court denying the enforcement of contempt proceedings in a civil consent decree context.

"The respect due to the federal judgment is not lessened because the judgment was entered by consent. The plaintiff's suit alleged denial of their Constitutional rights. When the defendants chose to consent to a judgment rather than have a district court adjudicate the merits of the plaintiff's claims, the result was a fully enforceable, federal judgment, that overrides any conflicting state laws or state order. The --"

THE COURT: I hear you, Mr. Bernstein. But where I need help from both sides --

MR. BERNSTEIN: Yes, sir.

THE COURT: -- is whether when a federal court proceeding gives rise to a judgment, consent or otherwise, that creates a monetary obligation --

MR. BERNSTEIN: Yes, sir.

THE COURT: -- where the monetary obligation is a

discharge of a debt?

MR. BERNSTEIN: I misunderstood the question that you raised yesterday. I thought you were raising the question whether this was a mere contract or whether it was --

THE COURT: That was, for better or for worse, another way of saying the same thing. And if I didn't say it as well as I should have, I owe everybody in the room an apology. But as I understand the issue, a consent decree issued by a federal court required the debtor to pay money.

MR. BERNSTEIN: That is correct, Your Honor.

THE COURT: And the question that I need help in is, is this like a lot of the other -- the debtors' other contractual debts which, at least, seemingly fall within the unsecured creditor community, or whether there's something special about a monetary obligation that's been created by a federal court decree that makes me analyze it in a different way?

MR. BERNSTEIN: I would answer it this way, Your Honor. This is a judgment, and the deliberate refusal by General Motors to honor that judgment was inequitable conduct, indeed conduct potentially punishable by civil contempt. And therefore the Court has good grounds to modify on an equitable basis, the sale agreement to provide for the small adjustment we requested. And of course, Mr. Wilson yesterday testified it was unlikely that the transaction -- the financing would be

affected by that.

THE COURT: Okay.

MR. BERNSTEIN: Thank you.

THE COURT: Thank you very much. All right. Yes?

MS. WICKOUSKI: Your Honor, I'm Stephanie Wickouski --

THE COURT: Well, I need you to come to a microphone, please. I take it you're coming up because you wanted to argue on any of the issues we have before us.

MS. WICKOUSKI: Um --

THE COURT: And that your predecessors haven't done it adequately.

MS. WICKOUSKI: -- yes, Your Honor. And my name is Stephanie Wickouski. I'm here on behalf of two of the indenture trustees on certain leverage lease transactions, manufactures and Traders' Trust Company and Wells Fargo Bank Northwest. We filed objections to the sale, but through, I think, innocent inadvertence on the part of debtors' counsel, they were not addressed in the omnibus objection by oversight.

This came to our attention on the eve of the hearing, and we've had subsequent discussions that I think have partially resolved and expect to resolve over the next week, our objections. So I wanted to indicate what has been discussed. I'm also here with counsel --

THE COURT: Tell me, Ms. Wickouski, I'm wondering how

much this is consistent with what I said before. If you have a deal, and you're telling me that you're working it out, this isn't the time that I wanted to deal with matters of that character. And I don't want to be a jerk or a martinet, but I am trying very hard in a case with 850 objections, to deal with them in a way so that I can triage the matters before m.

MS. WICKOUSKI: I understand, Your Honor. And I apologize. It was my misunderstanding that the indenture trustees were not being heard at this time.

THE COURT: Well, if you're saying you've got a lien and that your lien has to be addressed, and you've either got to get satisfaction of the lien or a carry-through on the lien, or something like that, that doesn't strike me as rising to the level of controversy as a lot of the other matters that I have.

Now, if I'm understating your legal concerns, and you want to argue a legal point, I'm not going to but a sock in your mouth. But if you're telling me that you and the debtor are having a dialogue that lenders and debtors have all the time to address issues of this character, I applaud that, and I simply say, if you want to confirm your understanding at the end, when I deal with other similar confirmations, I'd be happy to hear that.

MS. WICKOUSKI: Yes, Your Honor. And my apologies. I misunderstood in terms of the course for proceedings, and I --

THE COURT: I understand that I don't always speak with perfect clarity. And no offense intended. But certainly I want to deal with it, Ms. Wickouski.

MS. WICKOUSKI: Understood, Your Honor. Thank you.

THE COURT: Thank you. Okay. Do I have any other substantive objections that are actually being argued that I haven't heard yet? Mr. Schulman? Mr. Mayer?

MR. MAYER: Yes, Your Honor. If I may. Well, this --

THE COURT: Oh, another asbestos objection.

MR. REINSEL: Your Honor, Ron Reinsel on behalf of Mark Buttita. I will try not to rehash anything Mr. Esserman said or anything the very eloquent Mr. Jakubowski said. I want to make just a couple of points and a clarification.

We have objected on a number of grounds, including sub rosa plan, and the extent to which the requested sale extends pat the bounds of 363, specifically to claims, and most importantly to future claims; that they are not interests in property, and a certainly that future claim that has not come into existence, has not arisen, goes so far beyond the pale of an "interest in property" even if that is permitted. But I want to concentrate on just a couple of points that distinguish this case both from Chrysler and TWA, and also the White Motor case that the debtors have relied on.

Contrary to Chrysler, Judge, and contrary to TWA,

this isn't a sale of assets that will meld assets into an existing business. It is, instead, a standalone, complete continuation of the exact same business enterprise. It is the same products; it is the same employees; it's the same management; it's the same marketing; it's the same logos. And to accomplish what the debtor and Treasury has indicated they want is "a seamless transition in the eyes of consumers." In other words, New GM is just the same Old GM.

Yet, they want to escape the strictures of potential continuation of liability as a successor of existing GM. They look -- in the order that they're going to present to you, while we haven't seen any final order yet, but we've seen what they're looking for. And that is complete, but not just an approval of a sale, but protection from specific factual findings that may lead subsequent state courts to find that there is continuation of liability under relevant state law; despite the fact that many of those findings fly specifically in the face of the evidence that we heard here, that could well lead a state court to find such continuing liability.

Secondly, Judge, as you noted yesterday also in that order, they're looking for an injunction. And you asked if that injunction didn't kind of sound like a duck -- like the injunction under 524(g). Well, Your Honor, it not only sounds like a duck, it quacks like a duck, it walks like a duck, it flies like a duck, and leaves feathers behind it like a duck.

It is completely the injunction as to future asbestos liability that was provided for in Section 524(g).

Now, aside from the discriminatory treatment that's provided here, they're trying to get protections under the code without complying with the code's requirements. Now, Mr. Miller pointed out that this is not an asbestos case. This is not an asbestos-driven case, and that they're not seeking relief under -- they're not including Section 524 treatment here. All of that is absolutely true. The point is, however, they're trying to get equivalent relief without complying with the statutory requirements. And that goes both to the ability to even give the relief, as well as the effective notice and due process requirements that are required in order to get that relief.

Let's distinguish some of those cases -- the other cases. White Motors, it acknowledges, found that 363 did not provide a basis to sell assets free and clear of claims. And it went on to find that in order to do that, however -- this is certainly beyond the express statutory language -- the statue says "free and clear of interest in that property."

Now, whether or not claims become interest in property, cited in other cases. But it found that 363 didn't provide that basis. We had to look to Section 105 of the code, the Court's general equitable powers to make things happen --

THE COURT: Yes, I know. We went through that with

Mr. Jakubowski.

MR. REINSEL: All right. But here's where I wanted to get with that, Judge. White Motors was decided in 1987. In 1994 Congress enacted Section 524(g). Section 524(g) provides a comprehensive design by Congress for dealing with asbestos claims specifically, both present, and more importantly, future claims; looking at the unique situation that that kind of injury entails, particularly that it's an insidious product, it went into commerce, and it has a very long latency period, such that from exposure to actually manifesting a disease, finding out that you have a claim, is a matter of decades. Ten, twenty, thirty, forty years. Such that those folks who will develop disease, who will become claimants, are not presently claimants. In fact, the nature of their potential future illness is specifically excluded from the definition of a claim under the Bankruptcy Code. And in fact, under 524(g) it's referred to a demand.

The problem of recognizing of how to give adequate due process to those future potential claimants, those demand holders, and how to give adequate notice, because you can't give them notice -- in fact, we asked Mr. Henderson -- one of the few questions I asked here, was, you gave broad notice of these proceedings in order to give everyone notice of their rights were at issue and could be affected. But he recognized that GM has 650 million dollars-worth of projected asbestos

liability going out over a period of at least ten years, and that many of those claimants, many of those potential claimants, don't presently have a disease, don't know they have a claim, and that whatever publication notice was given to them, wouldn't have reached them and would have done them no good whatsoever.

In Chrysler, they kind of gave that notice issue fairly short shrift. There's one -- they deal with it in about two sentences on page 111 of that decision, simply holding that "With respect to potential future tort claimants, their objections are overruled, as those issues have been discussed. Notice of the proposed sale was published in newspapers in very wide circulation, and the Supreme Court has held that publication of notice in such newspapers provide sufficient notice to claimants 'whose interests or whereabouts could not be with due diligence, ascertained'", citing to the Supreme Court's decision in Mullane v. Central Hanover Bank.

Mullane was a trust fund case. You either held funds in a trust or you didn't. This --- we're not presented here with a question of we can't ascertain the location of folks; we can't, with reasonable due diligence send them a specific notice, such that the publication even becomes sufficient. We're dealing with individual whose claim doesn't yet exist, who don't know that they have rights that may be affected, and won't know that for years. That's why Congress, in Section

524(g), provided mechanisms to provide due process to those folks, by the creation of a specific representative in the court.

Last week you were asked to appoint someone -- a futures representative to look out after the interests of those future folks. You declined. You said we may look at that later. But the point is, there is no one here looking out for their interests today. They didn't get notice of this proceeding. You can't give effective notice of this proceeding. And no one is representing them here. I want to be clear, I am representing a single current asbestos claimant. Mr. Esserman was representing single current asbestos claimants. We're not advocating -- other than saying they're not here, Judge, we're not here in a position where we can reasonably represent their interests in this case.

But let me be clear about the impact of 524(g) here. As we said, this is not an asbestos-driven case. There is no requirement that the debtor use 524(g) here. However, the point is, if they don't -- if they don't employ the processes that Congress designed in that section of the code to provide adequate notice, adequate due process to claimants, then you don't get the protections that that section provides. You don't get the injunction that they're looking for, at least as to asbestos claimants. You don't get the removal of future successor liability as to those asbestos claimants. It's a

question -- it's up to the debtor, and in this case, and the buyer, to decide if they want to include those sorts of relevant protections. If they don't -- protections for the claimants and future claimants. However, if they don't the point is, they take their chances, and you, Judge, can't give them the same protections as that specific statute would under the Court's general 105 equitable powers. That's all, Your Honor. Thank you very much.

THE COURT: Thank you. Mr. Mayer?

MR. MAYER: Thank you, Your Honor.

(Pause)

MR. MAYER: Excuse me, Your Honor. I need thirty seconds to decide -- to figure how much of what we talked about last night can be put on the public record at this moment. Is it possible to take a five --

THE COURT: How much time to you need?

MR. MAYER: -- take a short recess, perhaps?

THE COURT: Actually, since we've been going so long, let's take a ten-minute recess.

MR. MAYER: Okay. Thank you, Your Honor.

THE COURT: See you back in ten minutes, folks.

(Recess from 10:47 a.m. until 11:10 a.m.)

MR. MAYER: Thank you, Your Honor. And good morning. Again, Thomas Moers Mayer for Kramer Levin Naftalis & Frankel, counsel to the official committee of unsecured creditors.

First, a housekeeping item. I'm pleased to report that we can't confirm that we are fine on the GE matter; I think that may be a typo. My partner at Waldorf was actually with his wife at a medical facility and was able to get to us and tell us he had this --

THE COURT: That's fine.

MR. MAYER: The committee is prepared to withdraw its limited objection to the sale motion subject to the following:

First, individual committee members have forcefully advocated certain of the arguments advanced in the committee's limited objection, and the committee's withdrawal of its limited objection is without prejudice to any position taken by those individual committee members on their own behalf.

Second, the committee's withdrawal of its limited objection is subject to the completion of the wind-down budget and the sale order to the committee's satisfaction. And in that connection, Your Honor, I'm pleased to report that in literally the last sixteen hours, in a meeting that went until I think 2 in the morning and resumed at 7, and it was handled primarily for the committee by FTI's Conner and Anna Phillips and two partners from my firm who are not here today, Amy Caton and Bob Schmidt. Actually, Bob is here, I apologize.

We were able to close the substantive gap on the wind-down budget. My understanding, which I would ask the government to confirm is that the total amount of the facility

being provided to cover wind-down expenses has been upsized such that the government is going to make available financing in the amount of 1.175 billion dollars, Your Honor.

In addition, there is an agreement that asset proceeds which have previously been dedicated to the repayment of the government's facility will be available to fund additional expenses if needed.

The government has agreed that asset sale proceeds that were previously dedicated to the repayment of the government's wind-down facility will now be available for the payment of wind down expenses if needed.

MR. JONES: Also correct, Your Honor. And I should make clear that the funding facility is on a non-recourse basis, as has been the case throughout these discussions.

MR. MAYER: The details are still being fine tuned, but those are the highlights. We also had useful discussions with AlixPartners on its administration of the wind-down, again, details will be forthcoming. But we believe we have an agreement in principal on certain elements on that that are important to us and will be disclosed at a later time when Alix is prepared to come forward with its application.

With respect to corporate governance, there are two time periods. There's a period between now and confirmation and -- strike that. Consummation. And there's a period between consummation and final distribution. And to be precise

we talked in this proceeding, Your Honor, about a sale consummation, that's not what I mean here. I mean, there's a period between the sale and the consummation of a Chapter 11 plan. And then there's a period after consummation of a Chapter 11 plan. And we have agreements in principle for the most part on both periods. One is ready for publication.

During the period from the sale until consummation of a plan of reorganization, it is our understanding that the board of directors of this debtor will be composed of one designee from Alix, one designee from the creditors' committee. And there's a third individual who the parties have agreed on, but I'm not entirely sure he has agreed on it, so perhaps I should keep his name confidential for the moment. But we have an agreement on a person that would be acceptable to both of us. And actually is quite a good pick.

And, again, the permanent board -- the board for the post-consummation, GM -- Old GM will be in a plan of reorganization and disclosure statement, itself, but we have the outlines of an agreement on that as well.

Based on those agreements and one or two other things, there was an issue that came up yesterday, about workers' compensation claims in connection with the State of Michigan. Our understanding is that the order or relevant documents will be changed so as to have New GM bear responsibility for Michigan Workers' Comp claims. Old GM will

not bear responsibility for Michigan workers' comp claims. Does that need to be amplified.

MR. JONES: No amplification needed, Your Honor. That description is correct so far.

THE COURT: Am I right in assuming Michigan has the most workers and potentially the most workers' comp?

MR. MAYER: Mr. Henderson is nodding yes.

Finally, the committee reserves its rights with respect to the master sale and purchase agreement and related documents. As indicated by the narrative as to how late we went last night, these things are still being machine, as is not uncommon. And we intend to continue to work with Treasury and the debtors. They fully involved us last night, we appreciate that. We look forward to working with them to reach a consensual resolution on these documents and we expect that we will reach some if for some unforeseen reason there's an issue of such moment that compels us to come back to the Court we will let Your Honor know. But this is in the nature of negotiating documents that we expect to reach an agreement on and one that does not affect what I have said previously.

And if the Court has any questions, I'm happy to answer them.

THE COURT: Just a couple. If I heard you right the creditors' committee is withdrawing it's limited objection and it is no longer taking the position one way or the other on the

tort and asbestos issues that at one time the creditors' committee as a whole were taking. As of now you're just leaving that to the individual advocates on both sides.

MR. MAYER: That's correct, Your Honor.

THE COURT: I sense that you folks are working very hard to further narrow issues. But this is an ongoing process. Is it possible for you, in consultation with other parties, to figure out a mechanism to keep me informed over the next several days, even though it's a holiday weekend, so that I can keep my arms around where you are in that. Obviously, I don't want to be ex parte. You have to figure out a mechanic to notify me. Not on what's going on but when issues are buttoned up, just like you reported to me now.

MR. MAYER: Yes, Your Honor. I think together with the debtors and Treasury we can definitely do that.

THE COURT: Okay. Anything else at this point, Mr. Mayer?

MR. MAYER: Well, we are withdrawing our objection so we are no longer opposed to this transaction going forward.

THE COURT: Okay.

MR. MAYER: Thank you.

THE COURT: Thank you very much.

MR. MAYER: I don't want to leave any confusions. The committee's papers were originally not in opposition to the transaction going forward. The committee remains in support of

the transaction going forward. The particular objections that we had to features of the order, those are withdrawn, and so you can view the papers that we have filed the withdrawal of those objections as being in support of the transaction.

THE COURT: Okay.

MR. MAYER: Have I neglected to -- about members in the audience, people we negotiated with, if I misstated or omitted anything. Thank you, Your Honor.

THE COURT: Thank you. Forgive me, which indentured trustee do you represent, Mr. Feldman.

MR. FELDMAN: I represent Wilmington Trust Company, the indentured trustee under the 1995 indenture and 1990 indentures, with bondholdings in the aggregate of more than twenty-three billion. So we are the principal indentured trustee in the case, with it's clear to say the largest unsecured creditor constituency that will remain with Old GM in this case.

Wilmington Trust Company also serves as the chairman of the creditors committee. I will note there's been much said about the equities of this case and the various parties involved in the case, and about the importance of employees, the importance of customers, the importance of dealers, the importance of tort victims.

GM is an interesting case. Typically, when I stand up here on behalf of bondholders, I'm standing up on behalf of

major financial institutions. GM bondholding are widely distributed among thousands of mainstream Americans as well as those financial institutions. So it was with -- in consideration of our entire constituency. Some subset of our constituency is represented by separate counsel. Paul Weiss represents as stated in their 2019, approximate twenty percent of the bondholding class. Mr. Richman according to his 2019 represents three bondholders -- I think three bondholders aggregating, about two million of the twenty-eight billion bondholders. And Mr. Parker has indicated that he is in his individual capacity a bondholder.

We stand up here and we filed our papers on behalf of those without a voice in the case. Wilmington Trust as an indentured trustee believes it's his job to preserve and protect the claims of the bondholder community that it represents. And it is with that fiduciary duty in mind that we carefully considered the transaction that was presented. Wilmington Trust was not part of the team negotiating the transaction. We came to this party and we got a chair at the table, frankly, after the deal had been cut. And we were presented with a binary choice, which is to support the sale or to seek to object to the sale. And effectively as has been dictated earlier, to potentially role the dice and hope upon an objection to the sale that a debtor recovery for bondholders was forthcoming. We took that obligation and that concern very

seriously. We had extensive discussions with the debtors' advisors, with the committee's advisors, with the committee members themselves, and with the ad hoc bondholder advisors. And when I say the ad hoc bondholders I'm talking about Paul Weiss and Houlihan. We reviewed the papers of substantially all the parties in this case, with particular attention to the papers filed on behalf of bondholders which are within our constituency. And based on all of that information available to us, we were of the view, and as our joinder indicates, that based on all the facts available we felt that under the current facts and circumstances that the sale appeared to be in the best interest of the bondholders.

We did, however, have some particular concerns with the transaction, not seeking to, frankly, to derail the sale from going forward. But to ensure as Mr. Miller indicated in his comments, that the sale creates a pie and it creates a universe of people who are going to fight over that pie. We understood that was the game when this case filed. What's going to happen post-closing was there was going to be a numerator and that is stock and warrants that the bondholders and the other unsecured creditors are going to have discussion and potential litigations over, how big the denominator was. What we were fundamentally concerned with at the outset, was that the size of the pie was set. We have heard today that the wind-down budget issue, we had heard on the eve of this

hearing, that the wind-down budget was insufficient. And we were concerned if the wind-down budget was insufficient that it would eat into the stock and the warrants that had been set aside as testified by various witnesses, was designed to be set aside for unsecured creditors. We were concerned that that wind-down budget would gain access to that stock and warrants. And we've been told based on the representations today in Court that that wind-down budget has been increased by 225 million dollars. Plus the proceeds of any asset sales. And we are comforted by that fact.

We reserve our rights to review the definitive documentation in connection with that issue, and we will work alongside the committee, as we have throughout this process to streamline the process.

But with that in mind, Your Honor, and in closing -- and I think that Mr. Richman on behalf of his three individual creditors and Mr. Parker on behalf of himself, they have the ability to make informed decisions by themselves as to whether or not they would like to roll the dice and potentially seek alternative outcome. Unfortunately, we as -- fortunately unfortunately, as a fiduciary for all these bondholders, our job is to preserve and protect the value that is available to bondholders under the deal. What we don't see and notwithstanding Mr. Richman's very eloquent presentation, what I haven't seen yet is a clear articulation of what happens if

this sale doesn't go forward, and, in fact, we got to planned process. I think on behalf of Wilmington Trust I would say it's not at all clear to me that on behalf of all the bondholders that we represent that a plan process and the delay attended to that plan process, would be designed to enhance the recovery. Or would, in fact, enhance the recovery to bondholders under this case. Frankly, it made the delay. And the other issues that may be attended to a plan process could very well diminish the recovery to bondholders. It's a risk on behalf of our twenty-three plus billion dollars worth of constituents we're not willing to take. And with that, Your Honor, we withdraw our joinder subject to the reservations I've indicated.

THE COURT: Thank you. Ms. Christian, you're the other indentured trustee?

MS. CHRISTIAN: Yes, Your Honor.

THE COURT: Come on up, please. Is Law Debenture Trust your client?

MS. CHRISTIAN: That's correct, Your Honor. Jennifer Christian of Kelley Drye & Warren for Law Debenture Trust Company of New York as proposed successor indentured trustee for the holders of eight series of GM's bonds.

Your Honor, Law Debenture fully confers with the committee and with Wilmington Trust, and is prepared to withdraw its joinder to the committee's limited objection

subject to the conditions that have been outlined and with eh full reservation of our rights. Thank you.

THE COURT: Okay. We up to --

MR. FRANKEL: Good morning, Your Honor. It's Roger Frankel from Orrick Hamilton. I represent the GM National Dealer Counsel and the committee that is formed. We also represent Paddock Chevrolet that's a member of the official committee.

I wanted just to state for the record we had filed a limited objection, reservation of rights. We had been working with the debtors and have been satisfied since we filed that and even before we filed that that certain concerns that we had have now been resolved.

This committee is comprised of dealers that were elected by the entire dealer body as well as three members of the National Automobile Dealers Association. The National Automobile Dealers Association is also an ex officio member of the committee. And we think it's important for the dealer voice to be heard here and we are supportive that his transaction move forward and move forward as quickly as possible.

The one thing that I would add, Your Honor, I just heard yesterday for the first time, the recommendation of the privacy ombudsman, briefly looked at the report this morning, and I would hope that GM would incorporate and Treasury would

incorporate the recommendations of the privacy ombudsman in the sale order. Thank you, Your Honor.

THE COURT: Okay, thank you.

MS. TAYLOR: Good morning, Judge. I'm Susan Taylor, I'm an assistant attorney general for the State of New York and I represent the interest of the Department of Environmental Conservation here today.

We filed an objection separate and apart from that as to which Ms. Cordry has been speaking. And I am here to tell the Court that we are not in the same category as many of the objectors. Mr. Miller very nicely articulated the difference between the State of New York and many of the objectors here. We are not here about money. We are here because we are concerned that there appears to be an attempt in the proposed order to impair the police and regulatory powers of the State of New York. And we are here to ask you not to let that happen.

The department has an interest in being able to enforce the state's environmental laws in order to protect the public health and safety. That interest is not an interest in property within the meaning of Section 363. And it cannot be extinguished or impaired through the means of a 363 sale. The whole statutory scheme and many cases make clear that regulatory and police powers do not give way to the important interest protected by bankruptcy law. To the extent that there

are provisions in the order that are still overly broad, and one of those is still, in for instance, paragraph T, although I confess that I have not this morning seen what may be an order that has changed. But to the extent that there is still language in there that appears to extinguish or impair the right of the state, to enforce its regulatory and police order, we ask the Court not to let that happen.

In the State of New York two sites are not being transferred, are not going with New GM. One of them is Messina GM, which is a national priorities list superfund cite in the northern part of the state. It is adjacent to tribal land. It has serious contamination and has in place consent and administrative orders of the Department of Environmental Conservation. It came to our attention only on Friday that there appears to be another site that has contamination that may also be excluded. It's a little unclear from the schedule, we've been unable to get clarification as to whether that site is, in fact, not being transferred. And we are very concerned about the department's abilities to continue to protect the health and safety of the people of New York through consent orders, administrative orders, and the ability to impose injunctive relief, with respect to those and other sites.

If you would like to argue that the state's interests are not interest in them I would be happy to do that. I think that is clear. But to the extent that the Court?

THE COURT: You have a brief on file, don't you?

MS. TAYLOR: We do have a brief on file and I would refer to the cases cited in the brief on that. If you disagree, however, we would ask you to condition a sale pursuant to 363(e) in order to protect the state's ability to enforce its police and regulatory powers. And we have language that we have circulated to GM and its counsel over the past few days that we would like to see added to the order. I would be happy to submit that to the Court anytime today if you would like that.

Essentially, it would provide "that nothing in the order would release, nullify, enjoin, or otherwise affect the police and regulatory authority of any governmental unit or its ability to enforce." And, of course, being lawyers it goes on, but that is its essence.

THE COURT: If it's consensual by all means. If I have differing proposal on that, I need to get yours in writing and the debtors' perspective and argument. The debtors' perspective as to the language they think makes the most sense in writing if it's different than what I have now. And if you're not in consensus obviously you need to get argument on both.

MS. TAYLOR: Happy to do that, Judge. At this point I cannot represent that it is consensual. If you don't have any questions, I will rest on our papers.

THE COURT: Thank you.

MS. TAYLOR: Thank you.

THE COURT: Okay. Mr. Roy, you're coming up.

MR. ROY: I'm coming up in thirty seconds, Your Honor.

THE COURT: Okay.

(Pause)

MR. ROY: Your Honor, for the record, Casey Roy from the Texas Attorney General's Office on behalf of the State of Texas.

We filed a limited standalone objection. We've reached an agreement with the debtors, subject to entry of that agreement on the record, we will be prepared to withdraw.

THE COURT: Okay.

MR. ROY: Thank you, Your Honor.

THE COURT: Thank you.

MR. MOTIF: I'm not an attorney. I'm coming to you --

THE COURT: Just a minute. Is there -- I announced earlier in the hearing that I wasn't going to hear oral argument on all the objections. Come up, tell me your status so I can make a judgment as to whether you should be resting on your papers.

MR. MOTIF: My name is Normaji, last name is Motif.

We bought GM's bonds, 400,000 paying the same amount.

And I --

THE COURT: Sir, you're a bondholder?

MR. MOTIF: Yes, sir. Unsecured.

THE COURT: Unsecured bondholder. Do you have any points that weren't made by either Mr. Richman, Mr. Parker or the two indentured trustee?

MR. MOTIF: That's correct.

THE COURT: And you filed a written objection.

MR. MOTIF: I did, but I want to make this.

In the master purchase and sales agreement they never really splintered the phrase going concern. As a grave concern this needs to be sorted fast enough so that the value doesn't go down. I'm not sure whether they're talking about the legal term of grave concern or the accounting term of grave concern. No matter whether we go on the legal term or the accounting term, that phrase cannot be used. GM operations like the (indiscernible) cooperation which I read the (indiscernible) very frequently they use of the word grave concern. They took operations and cooperated in Delaware. And Delaware's (indiscernible) law with regard to the cooperation applies. Even if this case is filed in New York State I would like the Court to take analyze that usage of the going concern as a property of (indiscernible). I can understand that it's an operating concern, they will be borrowing money and running the business. But definitely it is not a grave concern whether it

is a legal usage or accounting usage.

The (indiscernible) cooperation -- I mean, the GM cooperation whether you want to use the title GAAP. GAAP means the general acts of accounting principals, or you want to use the fair market values of some of the methodology that you use. The corporation became insolvent three year ago. And since then especially with the loan agreement signed by the Treasury it seems that even though they have created documents stating that this is the loan agreement, actually nobody, if especially, if the government is going to be approving commercial businessman would never lend money. So the expectation was a situation created and not a reality. And you have seen what Mr. Henderson and Mr. Wilson and others saying that if the loan never came through then GM could not have functioned, like what happened in the case of Chrysler.

Now, there are rules in the corporation's law of Delaware saying that at a particular stage if the money was lent not as a businessman but for other reasons, and especially if control of the corporation has been taken over indefinitely, then that entity should be treated as insiders. And so, therefore, the loans must be subordinated to the equity and to the unsecured bondholders. Because it would not be treated as a loan as a creditor, but would be treated as insider, and so therefore it is a capital contribution.

The important reason for that is if that is the

capital contribution and not a law then --

THE COURT: The recharacterization subordination points were made in many briefs, I understood them.

MR. MOTIF: I'm ready to come to the other important point.

If the Court determines that it is a capital contribution and not a loan per se, then the participation fails because in the proposals out of 19.4 billion dollars that was the pre-petition advances made, two million dollars worth of (indiscernible) being taken by the New GM with approximately about eight billion dollars of (indiscernible) and so that leaves about nine million dollars as the big money so there will be a shortage in the bid amount, even if you include the DIP money less the other things. I believe that this money was given here, that the total purchase price of the total value was between fifty and sixty billion dollars. If that is the case then it is my submission that the Treasury bring down that nine million dollars and give it to the Old GM as part of the purchase price. Plus also the eight billion dollars for eight million dollars of the note, plus two billion dollars that also must come for a total of 19.4 billion dollars, must come to the Old GM.

Now, the other argument is that --

THE COURT: Are you getting near the end, sir?

MR. MOTIF: Yes, give me five minutes.

THE COURT: Five more minutes.

MR. MOTIF: Yes. Because this is a very crucial case and I need to explain that clearly. May I proceed?

THE COURT: Yes.

MR. MOTIF: Now, I raised an issue that as an unsecured bondholder there is a breach of contract by GM when they --

THE COURT: GM has breached its contract to everyone of its twenty-eight --

MR. MOTIF: I know, I know. But I'm coming to the final points, Your Honor. There were secured bondholders and there were unsecured bondholders, you've got two categories before September 31 of 2008. I do not know that the secured bondholders are fully secured or partially secured. And I have no idea as to what properties are fully secured, or partially secured by the secured bondholders. Now, when they borrowed 13.4 billion dollars from the Treasury they put a first lien on the property, which is not covered by the secured bondholders. And with regard to the secured bondholders property they put a second lien. The document indenture of 1995 is clear that the moment a lien is put then the unsecured bondholders must be repeated on par with the --

THE COURT: Is that the exact point Mr. Parker made?

MR. MOTIF: No, I'm going to go further, Your Honor. He made one point, but he did not elaborate more.

Accurately, he admitted in his brief that they realized this lien problem. So if you read the brief he acknowledges my brief --

THE COURT: I did read his brief.

MR. MOTIF: Pardon?

THE COURT: I did read his brief.

MR. MOTIF: Yeah. And he acknowledges that he got the idea from me.

THE COURT: Okay.

MR. MOTIF: Here is the question. I read the Chrysler opinion by Judge Gonzalez. He said with regard to the unsecured creditors the takings clause -- and I think he said might apply because they don't have a lien. But if this Court were to decide that the fact that a lien was put on that and that automatically triggered the other problem which is that the unsecured bondholders also has liens on par with the treasury, both with regard to the first lien that decided with regard to the other property, and the second lien that decided on the secured bondholders' property. Then we have a right to argue that the takings clause under the Fifth Amendment do apply.

So with that, Your Honor, thank you very much.

THE COURT: Thank you. Now, putting aside deals on the record and so forth, which we can deal with later, is there any other substantive argument of a non-duplicative nature to

be heard? Sir?

MR. CHEEMA: Your Honor, good afternoon. Bik Cheema, Baker Hostetler on behalf of the Bureau of Ohio Workers' Compensation.

THE COURT: Ohio Workers' Comp.

MR. CHEEMA: Yes. It's OBWC. We filed a limited motion, we don't oppose the sale. The limited motion was the OBWC reads the sale motion as indicating that New GM intends to assume all the debtors' Ohio workers' compensation obligations.

In the last few hours we've reached an agreement on some clarifying language with the U.S. Treasury, and we wish to just offer that clarifying language for the record. It will literally take thirty seconds.

THE COURT: Thirty seconds, it will take longer for me to tell you to sit down and comply with what I said before. So go ahead.

MR. CHEEMA: "Pursuant to the master sale and purchase agreement, New GM is assuming all of Old GM's liabilities and obligations, under the workers' compensation laws, rules and regulations of the State of Ohio. OBWC reads the provision to include the assumption by New GM of Old GM's obligation to provide and to continue to provide security for the payment and performance of all obligations under the workers' compensation laws, rules and regulations of the State of Ohio owed by Old GM. New GM will be required to apply for

status as a self-insuring employer in the State of Ohio. If it seeks such status and nothing in the Court's order approving a sale shall exclude New GM from satisfying all requirements and conditions, including any requirement to provide security of the OBWC to grant self-insuring employer status under applicable Ohio law, rules and regulations."

THE COURT: Okay.

MR. CHEEMA: Thank you, Your Honor.

THE COURT: All right. Mr. Miller, are you ready for -- sir, is this an objection, further argument, non-repetitive argument?

MR. KANSA: This is a non-repetitive very brief argument, Your Honor.

THE COURT: All right, come on up.

MR. KANSA: Good morning, Your Honor. Kenneth Kansa, Sidley Austin on behalf of the TPC Lender Group.

The TPC Lender Group is a consortium of nine commercial lenders with first priority liens on two of the debtors' facilities, one in White Marsh, Maryland and the second in Memphis, Tennessee.

Your Honor, we filed a limited objection to the sale transaction. We are in the process of working on language that we hope will resolve that objection, but we haven't dotted the I's and crossed the T's yet. The only point I would raise in addition to our papers, Your Honor, is in rebuttal to some of

the points that the debtors have made in their reply about our limited objection, which really seeks to characterize this as a garden variety secured creditor 363(f)(3) issue; where on the one hand you have is it the value of the collateral, on the other hand, is it the face amount of the lien. We think in this context, Your Honor, that misses the point. There is only one value on the table here today. That is the amount of the lender's allowed secured proof of claim on file at 90.7 million dollars. The debtors have stated that they will settle for a purchase price in excess of the value of all liens on the property, that's their obligation under 363(f)(3), and that's the subsection they rely on to sell the facilities. Our point is simply in response, no purchase price has been specified, no value has been allocated. The only value that is out there is the value of the claim in our secured proof of claim. And the only value out there is --

THE COURT: You're saying that if you say that your collateral is worth a certain amount it's binding on the world?

MR. KANSA: I'm not saying it's binding on the world, Your Honor. I'm saying if they are going to rely here today on 363(f)(3), saying that they are selling in excess -- for our purchase price, in excess of the value of our liens, that is what the value of the liens is. Today there is no other competing value out there. There's nothing in the record.

THE COURT: You'll agree that sometimes there is a

difference between the amount that people claim in their proofs of claim as secured claims, and the value of their collateral. And that the actual value of the secured claim is measured by the value of the collateral and the remainder is unsecured, I assume.

MR. KANSA: No disagreement, Your Honor.

THE COURT: Okay. So basically the issue to the extent there is an issue, is that you're claiming an amount which the debtor and other parties in the case, probably every single other party in the case, might have a difference in perception from you and might say that your secured claim is measured by the value of your collateral. But the remainder of your claim is unsecured.

MR. KANSA: That's true, Your Honor. But the point is there is no -- no one has articulated their belief as to the other value here today.

THE COURT: I understand your argument.

MR. KANSA: Thank you, Your Honor.

THE COURT: All right. Are we now ready for Mr. Miller? No, one more.

MR. WISLER: Good morning, Your Honor. Jeffrey Wisler on behalf of Connecticut General Life Insurance Company.

Your Honor, I have a non-resolved, non-cure executory contract objection. Would you like to hear that now, Your Honor.

THE COURT: If it's an objection I think I would.

MR. WISLER: Understood. Your Honor, Connecticut General Life Insurance, also known as CIGNA provides a range of healthcare administrative services to GM and administers GM's self-insured employee healthcare benefits plan for thousands of its employees.

CIGNA's objection isn't just critical to CIGNA, it's critical to GM, New GM and it's employees because we want to make sure that the debtors attempt to assume and assign the arrangement it has with CIGNA gets the job done and assures that the employees of New GM will have the benefits that they currently have now with Old GM. So while we do have a cure objection I understand that will be deferred.

Today's objection is more fundamental. And that is that the debtor has not given CIGNA or this Court what is necessary for this Court to approve the assumption and assignment of agreement. And there's three fundamental problems, Your Honor. First is, the debtor in its contract notices identified what appeared to be eight separate contracts relating to CIGNA, but with no detail that we can comprehend. It simply has vendor numbers, contract numbers, row numbers, I don't know what those are. CIGNA has looked at these, they're sophisticated business people, they don't know what these are. And we haven't received any clarification on what they are. Except that GM intends to assume and assign all of the CIGNA

contracts. Well that's meaningless also because we need to know what they are, we need to make sure what we think is all and what they think is all, is the same thing. Because, in fact, CIGNA's position is that there is one overriding contract, it's an administrative services contract. And under that are addendums, and riders, and amendments that encompass all of what CIGNA does for GM and its employee benefit plan.

So to warrant this Court's approval of the assumption and assignment of that agreement, the debtor needs to formally and unequivocally identify that contract and say to the Court and to CIGNA, this is the contract we intend to assume and assign.

THE COURT: Pause please, Mr. Wisler. What extent did you or any of your guys pick up the phone and have a dialogue with the debtor to kind of exchange information and get answers to each of those concerns?

MR. WISLER: Both sides have done that, Your Honor, it is not yet resolved.

THE COURT: And help me understand the problem, because this stuff is done all the time. I didn't hear you accusing the debtor of cherry picking or trying to split apart the master agreement, am I right that that's not your concern?

MR. WISLER: Given the debtors' statement that it wasn't to assume all of our contracts, I will assume that is not the case.

THE COURT: All right. Forgive me, but I know a little bit about this area, and I still can't understand the problem.

MR. WISLER: Well, Your Honor, if a debtor comes to the Court and does not identify the contract it wishes to assume and assign, I don't think the Court can permit that assumption and assignment.

THE COURT: Assuming arguendo that you're right, I mean after you had the dialogue with them you're saying they didn't tell you what contracts they wanted to assume and assign?

MR. WISLER: Not to any specificity that anyone could use to identify these agreements.

The fundamental problem, being number one, that we think there's one agreement and they think there's more than one.

THE COURT: But if the agreement with all of them what difference does that make?

MR. WISLER: If two parties don't agree what all means or, more specifically, if one party believes there's one and one party believes there's multiple agreements, I don't think there's a meeting of the minds, Your Honor. And I'm certainly not standing up here saying this is not a resolvable problem. Today's the day for the sale hearing, today's the day we have to present our objection. We've attempted to come to a

resolution, we may actually be close to a resolution. But because we're not at a resolution I need to present this objection to the Court.

THE COURT: Okay. Make your remaining points.

MR. WISLER: Understood, Your Honor.

THE COURT: And then I'll hear your adversary.

MR. WISLER: Secondly, Your Honor, there are two bank accounts that make this plan work for GM and its employees. And these bank accounts have authorization approvals between GM and CIGNA. And there has been no confirmation and no reference to it in the APA or the form of order and the motion that those authorizations will continue. If they do not continue the self-insured plan that CIGNA administers will not work because there will be no money passing from one account to another to pay employee benefit claims, employee healthcare claims.

So, again, until that is unequivocally and formally confirmed we don't think any contracts, any of this particular contract that CIGNA has with GM can be assumed and assigned.

And, third, Your Honor, and very importantly, nowhere in the APA or the proposed form of order, or the motion, is there confirmation that New GM will be responsible for claims -- healthcare claims -- employee healthcare claims that were incurred prior to closing but will not be processed and paid until after closing. That's very important because as claims come through a system they come through at different

times. If someone goes to the doctor last week, the doctor may take some time to submit the claim to the insurance company, the insurance company has to process it. If it's approve it's then paid. That takes time. There is no way to draw a bright line on a closing date and say hey, these claims are not going to be paid, these claims aren't. It's not a cure issue, it's a question of is New GM going to take responsibility for paying those claims that were incurred prior to closing.

My understanding with the discussions with the debtor is yes, they are. But, again, that ahs not been --

THE COURT: I've encountered this issue over the years. Whether you have to slice and dice whether a claim is a pre-petition claim or post-petition claim. But I've never encountered it with the context of the assume and assign, because it envisions a smooth transition. Has your dialogue led you to believe that there's some difference in perception on this one?

MR. WISLER: No, Your Honor, that's what I was just saying. My dialogue with the debtor indicates that this -- that it is New GM's intent to just continue to pay claims in the ordinary course of business regardless of when they were incurred. But, again, that has not been formalized, it has not been unequivocally stated. Today's the day I have to present this objection. If it's not formalized or unequivocally stated, we have a problem is we go into closing and we don't

know the answer to that question. So our simple request for relief is, Your Honor, do not approve assumption and assignment of the CIGNA agreement until the debtor formally and unequivocally clarifies those three points.

THE COURT: Thank you, Mr. Wisler.

MR. WISLER: Thank you, Your Honor.

THE COURT: Mr. Smolinsky, you're rising. Is this just to respond to what Mr. Wisler said?

MR. SMOLINSKY: Yes, it is.

THE COURT: Sure, come on up.

MR. SMOLINSKY: Your Honor, again, Joe Smolinsky from Weil Gotshal.

I'm not sure if Mr. Wisler is in communication with his client. We are aware of the CIGNA situation. Seth Drucker of Honigman Miller has been working with Janice Heulig, who is the head of HR at GM. I've received no fewer than a dozen e-mails over the last forty-eight hours specifically with respect to CIGNA. We are assuming the CIGNA contracts. We have provided them with the -- with a lot of information. In fact, Jay Manor, an employee of GM who is on vacation this week, came back to the office to put together the documents that CIGNA has requested. There are bank accounts that need to be moved, the company is in the process of moving those bank accounts.

As I understand it, CIGNA has requested execution of a variety of documents. Consent agreements and other documents

which other of our suppliers, such as Medco who provide a similar service, has not requested. I haven't reviewed those document yet to the extent that they are not problematic we will provide them with the assurances they need. But to the extent that CIGNA does stand in our way of closing and transferring the employee benefits we will be back in front of you, Your Honor.

THE COURT: All right, thank you. Okay. Can I now get to debtor reply.

MR. MILLER: I hate to disappoint you, Your Honor, but the U.S. Attorney has asked to go first.

THE COURT: Sure, Mr. Jones.

MR. JONES: Thank you, Your Honor. We thought it appropriate to let GM have the last word, and so we'll have a short summation first.

First, Mr. Schwartz is going to address, particularly, Your Honor's consent decree question, and then I'll have remarks on additional issues.

THE COURT: Sure. Mr. Schwartz.

MS. CORDRY: Your Honor?

THE COURT: Ms. Cordry?

MS. CORDRY: Yes, sir. Karen Cordry from National Association of Attorneys Generals.

We've been working with the debtors late into the night and this morning, and all this time. I think we're at

close to an agreement. But the discussion we've been having with them when we had the terms in the order we would be able to say we have a resolution that I am still in the process of getting all the attorneys general to sign on to that. If it didn't then we would be in position to weave our objections on the record, if the order is not done. I didn't realize I was momentarily distracted, we got it in of everybody else there.

I think we are very close to having that. I guess I would just like to reserve my right to state where that whole position is. I don't want to necessarily hold up all this. And I don't think anything I would say with that would necessarily require them to have any different rebuttal than they would have.

THE COURT: What's your recommendation, Ms. Cordry, do I let Mr. Schwartz or Mr. Miller speak? Maybe you'll have the answer again. Otherwise, I assume that on issues that haven't been resolved to your satisfaction I have your papers. But I also sense that you're so close to the go line that you're saying it might help me to do my job if you have some news to report to me.

MS. CORDRY: Yes. I think in the same way that you were saying that other people were trying to work towards reporting, I hope I'm going to be in that position as soon as I hear back their last couple of words or two on that page.

THE COURT: Let's agree that as of this point the

train hasn't left the station. If you need to be heard after everybody else is done, I'll give you that chance, subject to anybody else's rights to express a different view if you need to.

MS. CORDRY: Okay. And when I do that I would certainly keep in mind Your Honor has heard a great deal on a great many topics that we had in our papers.

THE COURT: Yes. I've also heard capable arguments.

MS. CORDRY: Exactly, every capable arguments, far beyond what I was probably planning on doing. So anything that I would say would be specifically on very short points and other issues that people definitely have no raised to this point. So thank you, Your Honor.

THE COURT: Okay.

MR. MILLER: Your Honor, there will be one other speaker. I understand that the UAW would also like to speak.

THE COURT: Is this a good time, or would the UAW be speaking after the U.S. and the debtor?

MR. MILLER: After the Treasury, Your Honor.

MR. SCHWARTZ: Why don't I make my remarks which will take about a minute, and then Mr. Jones and Mr. Bromley can discuss their order.

I just wanted to address -- Matthew Schwartz for the United States, the questions Your Honor asked about environmental consent decrees because, of course, we're here

representing the United States, including the Environmental Protection Agency.

Your Honor asked two specific questions, I'd like to quickly provide answers and then suggest why it is you don't have to answer those questions yourself today on this motion.

First, I heard the Court ask yesterday whether an environmental consent decrees is a contract -- an executory contract that can be rejected by a debtor in bankruptcy. As Mr. Bernstein said, a consent decree has features of contract and features of order. But I think the law is relative clear that they are not executory contracts that can be rejected. I would point you to Judge Coudle's (ph.) opinion in New York v. Mirant. That's at 300 B.R. 174 at page 181.

The further question that Your Honor asked today, I think the important question, is whether a consent decrees is, therefore, enforceable against the debtor. And as Your Honor said that turns on whether the consent decree creates a monetary or injunctive obligation. Whether it embodies a claim within the meaning of the Bankruptcy Code that's Chateaugay in the Second Circuit, Trouweko in the Third Circuit. That is a remarkably fact-intensive inquiry. And the fact --

THE COURT: Depends on what the decree actually says.

MR. SCHWARTZ: That's right. And I've only skimmed the consent decree that Mr. Bernstein was speaking to, but I'll make the general comment that simply because the obligations of

the debtor under a consent decree are to pay money does not necessarily mean that it is a claim within the meaning of the Bankruptcy Code. I think that's enough for today's purposes. Because ultimately the objection that Mr. Bernstein raised is not an objection to the sale. His consent decree is either enforceable against GM or it isn't. So that obligation will either be treated as an unsecured claim, or it will be enforceable and so they will have to pay in full. But either way, the claim is against OldCo. The claim is not against NewCo. There's no basis, as Mr. Bernstein suggests, to go into the MSPA and rewrite excluded liabilities to add his consent decree. That's the only issue on today's record. And so Mr. Bernstein's objection should be denied and we can take up the more substantive issues on a --

THE COURT: To be denied without prejudice to his raising it in a different context against OldCo.

MR. SCHWARTZ: Against OldCo, correct.

THE COURT: Okay.

MR. SCHWARTZ: Against NewCo it's just essentially the successor liability issue.

THE COURT: Okay. All right, Mr. Jones?

MR. JONES: Thank you, Your Honor.

Your Honor, the government simply is not sacrificing principles for expediency as it has been accused of doing. Far from it. We are using established law to purchase assets full

stop. Specifically, the government sponsored purchasing entity is purchasing the pieces necessary to operate the strongest possible New GM. This is a liquidating estate, there's no dispute about that. There is no alternative and no scenario in which this bankruptcy proceeding ends in anything other than some form of liquidation. And as in any liquidation proceeding, the goal is to maximize recoveries and distributions to the estate and its creditors.

So what is before the Court today is simply an asset sale. It's not a plan. What is before the Court does not dictate anything about the treatment of any creditor going forward in the bankruptcy proceedings which will remain in place. The evidence is clear that this sale achieves far and away the highest possible recovery for the assets being sold. And as is salient for legal purposes, vastly in excess of their liquidation value which is the only legally relevant or possible alternative scenario.

The evidence also shows that the opportunity to achieve value through the sale is fleeting. And that the achievable value of this -- of any portion of General Motors is fragile and soon will be lost if not seized now.

There will be a plan as this case progresses. Again, the case will go forward and there are mechanisms to ensure the estate will remain administratively solvent and funded through an orderly wind-down process. And the Court's well established

procedures under the Bankruptcy Code will provide the framework for determining the respect of recoveries for all parties-in-interest

Your Honor, the evidence is unambiguous and unrebutted that the government has no intention of funding this deal if an order is not in place by July 10th. Mr. Richman speculates that the government doesn't really mean it, and that the government will fund beyond that date if Your Honor just calls our supposed bluff. But, Your Honor, speculation does not trump evidence. There is no evidence of bad faith and there is no evidence undermining what the government has plainly stated in Court during these proceedings.

To the contrary, Mr. Wilson was extraordinary forthright and he explained compellingly and without hesitation what steps the government has taken in regards to General Motors so far. And the reasons for those actions. And its plans for its future actions with regard to New GM.

Your Honor, the gamble that Mr. Richman asks the Court to take would be extraordinarily risky and contrary to the best interest of the estate. In fact, he concedes that the risk he asks the Court to take today would, in fact, breach the fiduciary duty if undertaken by GM itself. It is clear that the Court cannot require a lender to lend. It is clear that the Court cannot compel a buyer to buy.

This transaction is certain. It is here today. It

is extraordinarily favorable, and it is the only one insight. The purchase fully complies with all applicable law, including Section 363 of the Code. The Second Circuit just recently in Chrysler heard these issues squarely, and intensively argued to it in an appeal from Judge Gonzalez's decision which also fully considered the very arguments here today. And of course Judge Gonzalez explicitly adopted and followed TWA, the Third Circuit's decision in TWA and has, in turn, been affirmed by the Second Circuit for the reasons Judge Gonzalez stated. That TWA order, just as the Chrysler order, expressly affirmed a sale free and clear of claims, both known and unknown, and it further enjoined claims in the future being brought against the purchaser of the assets.

Your Honor, the -- I know Your Honor's made reference to reading the transcript of arguments before the Second Circuit, and I will not undertake here a detailed exegesis of the interlocking provisions of the Bankruptcy Code. But I will note that Fiat's counsel did an extraordinarily abled job of doing just that in arguing before the Second Circuit. So, for my purposes today, Your Honor, I'll limit myself to saying the case law is very clear and establishes that exactly what is happening here today is permissible and entirely authorized by Section 363.

So -- and, Your Honor, in addition to being law, case law that, at a minimum under principles of stare decisis,

supports the relief sought today, the ruling was correct on its own terms, as shown in ours and GM's papers, and that ruling simply controls here.

Your Honor, I won't elaborate, although -- and go into --

THE COURT: That ruling being Chrysler, you're saying?

MR. JONES: I'm sorry?

THE COURT: That ruling being Chrysler?

MR. JONES: Correct, Your Honor. And through Chrysler, because it expressly adopted TWA, TWA's analysis as well.

THE COURT: Um-hum.

MR. JONES: Your Honor, I'm not going to go into detail on objections. I expect that Weil will address those very ably, more than ably. I want to take a moment to thank the extraordinary assistance provided throughout these proceedings by the Cadwalader who is not authorized to represent the government in court but has done a fantastic job of supporting us in our endeavors and in serving the government as a whole. And, Your Honor, in closing, let me simply urge the Court that for the reasons stated and supported by the evidence presented to the Court over these three days, the Court should grant the 363 sale motion. Thank you.

THE COURT: Thank you.

Sure, Mr. Schein, come on up.

MR. SCHEIN: Yes, Your Honor. So that Mr. Miller can have his final comment, I'm not adding any further comments as to Export Development Canada's position. First of all, for the record, Michael Schein, Vedder Price, on behalf of Export Development Canada for the governments of Ontario and Canada.

I just want to clarify one legal point that was raised yesterday by Mr., I believe, Jakubowski with respect to an argument that he said was that if the DIP lenders exercise their rights under the loan agreement come the July 10th milestone, not defer their fund, he made a statement that that would be an implied breach of covenant of fair dealing and good faith and that maybe that would give rise to a contract claim by the committee.

I'd just like to give the Court a cite that expressly rejects that argument so the Court's aware that if that right is exercised. Specifically, Your Honor, it is Mirax Chemical Products Corp. v. First Interstate Commercial Corp., and Eighth Circuit Court of Appeals Case, 950 F.2d 566. And just one statement. The Court said that that duty, which was the duty of good faith and fair dealing, however, cannot be breached by actions that are specifically authorized in an agreement. That's just the one clarification, Your Honor. Thank you.

THE COURT: Thank you.

Mr. Bromley?

MR. BROMLEY: Thank you, Your Honor. James Bromley of Cleary Gottlieb on behalf of the UAW. Just want to make one particular point before I ceded to Mr. Miller, which is, to address Mr. Richman's issue as opposed -- as it relates to the linkage between the collective bargaining agreement and the VEBA. Mr. Richman made a fair amount of hay out of a lack of linkage, as he said, in the documents and in the evidence. But I think it's important to look at the evidence. What we have here is testimony from Mr. Henderson that if there was no VEBA there would be no collective bargaining agreement, and with no collective bargaining agreement there would be no workforce.

We have testimony from Mr. Wilson, again, saying if there was no VEBA there would be no collective bargaining agreement and, again, without a 1collective bargaining agreement, no workforce.

Mr. Curson's declaration said exactly the same thing. The exhibits to Mr. Curson's declaration, the ratification summary at Exhibit 1 -- Exhibit A, I'm sorry, at page 1 and page 11 made it crystal clear that when the UAW membership was voting, they were voting on both the VEBA and the collective bargaining agreement. And as Mr. Curson said unequivocally, it was a single vote, up or down, for both.

Exhibit B to Mr. Curson's declaration is the white book, the white book which contains the amendments to the collective bargaining agreement. It makes absolutely clear

that the VEBA and the modifications are part of the collective bargaining agreement that appears at page i, which says that the ratification is on the terms of the ratification, that single vote up or down.

And the addendum relating to the changes to the VEBA appears at page 169 of that white book, and it is indeed part and parcel of the amendments to the collective bargaining agreement.

And this shouldn't come as any surprise to the objectors. It's not new. Indeed, of all the information that's been provided to the Court, this is probably the least new because there is a full paragraph in the Chrysler opinion going directly to this point where Judge Gonzalez found that there is unequivocal evidence presented in the Chrysler trial by Mr. Curson as the witness that there was direct linkage, there was clear and unequivocal value being presented to the new company and that the value of the VEBA was receiving was not being received by the old company but indeed by the new company.

In addition, the UAW is an express third-party beneficiary of the master sale and purchase agreement. That agreement requires that the collective bargaining agreement be assumed and assigned. It requires that the VEBA be entered into by the new company. These are unwaivable conditions to closing.

In addition, Section 7.4(h) of the DIP says that unless by July 10 the agreement, the master service sale and purchase agreement, is approved, that there'll be an event of default under the DIP. That includes all of the related documents, and the UAW retiree settlement agreement in Schedule 1.1(e) to the DIP is one of those agreements.

So, Your Honor, I think that the record is replete with evidence of linkage between the UAW's collective bargaining agreement and the VEBA. And there shouldn't be any doubt or any concern that a showing's been made on that front. And it's very important to keep in mind that that showing is being made by the UAW on behalf of the 475,000 individuals who have either worked or depended on those who've worked for General Motors, as well as the 61,000 active employees. There are over half a million individuals who are dependent on this transaction closing, and closing quickly. And I think we need to look through the shorthand that is being used as timing. If a little more time is given, everything will be fine, nothing will change. But that's shorthand for if there's a little more time, I can get a little more, maybe a lot more. And it would fundamentally change all of the carefully constructed arrangements that have been put in place and, indeed, would go directly to the problem that both Treasury and General Motors have pointed out, which is the damage that would be done to this business in connection with a long-term contested Chapter

11 proceeding.

So for those reasons, Your Honor, the UAW strongly urges that the Court approve the sale transaction.

THE COURT: Okay.

MR. BROMLEY: Thank you.

THE COURT: Thank you.

Mr. Miller?

MR. MILLER: Good afternoon, Your Honor. Harvey Miller on behalf of the debtors. First, Your Honor, one overarching comment. I was brought up in the school that closing arguments should be confined by the record that was made before the Court. As I sat here and listened to the closing arguments, Your Honor, many of the closing arguments made no reference to evidence which is in the record in these cases. Rather, we heard opinions as to what could have happened and not references to evidence that's in the record. So I just make that as an overarching comment.

I want to note that none of the objectors has suggested to the Court that it wants to see a liquidation of the assets of GM. Rather, each of the objectors reiterates that it should not be affected by the 363 transaction and, therefore, it will receive more consideration than what otherwise will be recoverable from the Old GM pursuant to the plan of liquidation which will follow the consummation of the 363 transaction.

Every objector recognizes that a liquidation will result in no recovery to general unsecured creditors. So what has happened? By objecting to the 363 transaction, the objectors are exercising what they perceive to be their leverage. Certain of the objectors are asking the Court to conditionally allow the 363 transaction by laying down terms and conditions that the purchaser would have to comply with or walk.

To paraphrase the words of Mr. Jakubowski, Your Honor, they want you to enter the negotiations and bargain with the purchaser. Indeed, Mr. Jakubowski suggested that the debtors and the purchasers should have come to you as soon as they knew you were assigned to the case to negotiate the terms and conditions of the sale before finalizing the master purchase agreement. I suggest that the role that Mr. Jakubowski has tailored for you is inconsistent with your role and your responsibilities as a judge.

The essence of what the objectors want, as pointed out by my predecessors, is that you should gamble the preservation of the value of the GM assets, the hundreds of thousands of jobs involved, the welfare of the communities they rely upon in an ongoing automotive industry as well as incur the risk of the probability of systemic failure in the hope that the undisputed testimony of the Treasury's representative is a lie and that the Treasury will not exercise its rights to

cease financing the debtors.

This is an awesome gamble. It ignores the interests of all other economic stakeholders, including the over 60,000 UAW active employees as well as the approximate 500,000 retirees and dependents represented by the UAW, as well as the bondholders who have supported the 363 transaction, the suppliers and their industry and the states and communities who will be severely prejudiced if the gamble is lost. Essentially, the objectors ask Your Honor to play Russian Roulette.

Now, Mr. Richman referred to footnote 15 in Judge Gonzalez's decision, and he read to you a portion of it, but he did not read the last sentence. He read the sentence, "The Court concludes that gambling on the possibility that the government was bluffing and risking the potential for a lesser recovery in a resulting liquidation would have been a breach of the debtor's fiduciary duty." The next sentence is the key sentence, Your Honor: "This was simply not a viable option."

So what Judge Gonzalez held and used as a material point in his decision, he could not take that option of the financing disappearing and risking and bluffed -- that the U.S. Treasury was bluffing.

In effect, the objectors are saying if I can't get my pound of flesh, then let GM go down in flames and everybody lose and the devil take the hindmost. It is not a rational

avenue for the Court to go down in the face of the record in these proceedings. Liquidation or the risk of liquidation is too great a danger to imperil the many beneficiaries of the 363 transaction. A transaction, Your Honor, that squarely complies with the applicable principles of law, no objector questions the business rationale articulated by GM in support of the sale. No evidence was presented to Your Honor, through testimony or otherwise, that the business rationale to reconstitute these assets and make them the foundation of a viable automotive manufacturing company -- there is no contrary evidence in the record. Rather, the complaint is that the pie is not big enough to satisfy the particular needs of each objector and, therefore, the 363 transaction cannot be approved. That is not a legally sustainable objection.

Mr. Bressler, representing the tort victims, or some tort victims who have actual claims has argued that this clients are entitled to extra indulgence. He cites no legal proposition or authority for that proposition -- I'm sorry, no legal authority for that proposition. Of course everybody empathizes with his clients, but as stated, bankruptcy is a zero-sum game. And if GM is liquidated, his clients will receive no recovery.

He described the purchase as an extraordinary transaction because the government is not the usual purchaser. But as Mr. Jones has pointed out, Your Honor, the United States

Treasury, in the perspective of this case, is a creditor; it is a secured creditor. It can stand in the position of any secured creditor that appears in the bankruptcy proceeding.

From that conclusion, he jumps to another and more far-fetched contention that the purchase is a result of a conspiracy among the Treasury, General Motors, and I guess the UAW, to deprive his clients of their right to trace the assets to New GM. He argues that New GM must assume the potential liabilities due to his clients because there was no independent purchaser of the GM assets. Yet, the record is devoid of any evidence to establish the facts that would support a finding and conclusion of the existence of a conspiracy directed at all product liability claimants. It's just not in the record, Your Honor.

So Mr. Bressler argues that there are no similar situations where a pre-petition lender has been the purchaser and the DIP financer and pre-petition creditor. I suggest that Mr. Bressler is on weak ground. The concept of loan-to-own has permeated bankruptcy practice throughout this decade. An example is In re Radner Holdings Corporation, 353 B.R. 820, a bankruptcy case in Delaware before Judge Walsh. In that case, Tennenbaum Capital Partners was a substantial investor. It continued to finance the debtor as its fortunes declined and acquired more and more collateral security in substantially of the debtor's property. When the debtor's revolving lenders

threatened to cut off funding, the company commenced a Chapter 11 case.

TCP, Tennenbaum, agreed to purchase the assets under Section 363 and credit bid its 128.8 million dollar pre-petition date claims. That was challenged, Your Honor, as not an independent purchaser, was challenged in the context of recharacterization and equitable subordination.

In another case, Your Honor, of that -- and I didn't have a chance, Your Honor, to do a great deal of research, but another case is In re Medical Software Solutions, 286 B.R. 431, a bankruptcy case out of the district of Utah.

THE COURT: Before you go on to the second one, the Software Solutions, you told me the contention rendered. Judge Walsh rejected the contention and he said that the lender did in fact have the ability to --

MR. MILLER: Yes, Your Honor.

THE COURT: -- take it over?

MR. MILLER: And he approved the 363 sale, and in a long opinion, Your Honor.

THE COURT: With the same types of protection on 363?

MR. MILLER: Yes, Your Honor.

THE COURT: Um-hum.

MR. MILLER: In the Medical Software case, Judge Thurman held that there was a sound business reason that existed for the sale of the Chapter 11 debtors outside the

ordinary course of business and outside of the plan based chiefly upon the lack of funds for continued operations and the narrowing window for the sale of assets before they significantly declined in value.

THE COURT: The Judge Thurman, is that Bill Thurman out in Utah?

MR. MILLER: Yes, sir. A corporate insider that had provided both pre- and post-petition financing for the operation of the debtor's business had a valid security interest in the assets being sold and could credit bid its secured claim. An insider qualified as a good-faith purchaser, and the Court approved the sale as being for a fair and reasonable price and supported by sound business reasons.

There are -- I'm sure, Your Honor, with additional time, we can find many more cases that follow in the concept of loan-to-own.

So, turning to the concept that this was not an independent transaction, the record demonstrates, Your Honor, that there were strenuous arms'-length negotiations. There were differences of opinion. There were requests made by GM; they were either rejected by Treasury or they were negotiated. And one example, Your Honor, is that GM tried to, in respect of the seven-plus billion dollars of retiree benefits, it tried to keep the cut down to sixty-two percent, but the Treasury came back and said no, it's got to be sixty-six and two-thirds.

There was a negotiation over that, and that's just one little item, Your Honor, of what was negotiated during the course of this somewhat complex proceeding.

In terms of independence, Your Honor, a great deal of moment is given to the fact that Mr. Henderson will be the CEO of New GM. Other executives will be employees of New GM. And because of that, this is a tainted transaction. But as Your Honor knows, there are many cases in the bankruptcy court where an acquirer of a business will take that business with its employees. And when you think of this behemoth that is Old GM, a purchaser would not be in its right frame of mind if it did not take the employees who know the business, at least initially, to allow the stabilization of the business while other events may unfold. The testimony is clear, Your Honor, Mr. Henderson doesn't have an employment contract, he has no employment contract with the purchaser, and none of the other executives have employments contracts.

And in terms of independence, Your Honor, what's happened to the stockholders of Old GM? They're being wiped out, Your Honor, because of the financial condition of the estate. New GM will have new stockholders. In addition, New GM, Your Honor, will have an independent board of directors. Five independent directors from Old GM, people of great repute and great business experience, are moving over to New GM. Mr. Henderson is moving over to New GM. But there will be

seven other directors. And Mr. Edward Whittaker, the former CEO of AT&T, has already been designated to be the chairman of the board of directors.

That board of directors, Your Honor, will decide the role in the future -- I mean the future role that Mr. Henderson and other executives and other employees of Old GM will occupy in the operation of New GM. There has been full disclosure, Your Honor, in this record of what the relationships are between the parties and which, I submit to Your Honor, clearly established the independence of the parties.

Mr. Bressler also complains that the UAW VEBA is just too good a deal to be approved. He ignores the fact that it is the purchaser who made the deal with the VEBA in its interest of getting employees to operate the business and enhance the recoveries and the general unsecured creditors who will receive equity securities as part of this transaction. One objective of this transaction, Your Honor, is to enhance the value of the equity securities. And that enhancement obviously requires the employment of the UAW and the other employees. There would be no business without that. And as Mr. Curson testified, Your Honor, and notwithstanding Mr. Richman's statements, the record is clear there is only one witness -- and he testified, and he's a union officer -- that the ratification of a modified collective bargaining agreement and the VEBA was one ratification. And if the VEBA is not approved, all of the

modifications to the collective bargaining agreement are rescinded and we're back to where we were before with work conditions, wage rates, et cetera, which are not tenable in an automotive industry that is in such severe crisis as this automotive industry.

The argument, Your Honor, that another potential 900 million dollars of liabilities, irrespective of the asbestos liabilities, assuming the asbestos liabilities, and another 300 million-plus dollars of liabilities in connection with retiree benefits, is insignificant. And, therefore, the purchaser should be required to assume those liabilities.

The objective of the purchase, as I said, Your Honor, is to acquire the assets and assume only those liabilities that will contribute to the success of the purchaser. You take 900 million, 300 million, another 600 million, and pretty soon you're in the area where Senator Dirksen said you're talking about real money.

The purchaser has drawn the line as to what it is willing to pay for the assets in the context of its credit bid and its assumption of liabilities and the voluntary contractual obligations that it has made to the UAW VEBA.

Now, Your Honor, turning to Mr. Jakubowski, Mr. Jakubowski made an impassioned argument. Essentially he told the Court that it should forget about being in the Second Circuit and it should ignore the Court's stated principle of

consistency in the decisions of the bankruptcy court in this district. Mr. Jakubowski speaks of Judge Posner in the Seventh Circuit as if he is immortal and infallible. I have great respect for Judge Posner and for his colleague Judge Easterbrook, but neither is infallible and particularly conversant with bankruptcy in Chapter 11. I once debated Judge Easterbrook at a University of Pennsylvania Business and Law Forum. He argued that persons in businesses should be allowed to contractually waive the benefit of the right to seek bankruptcy protection. He posited the argument on the basis that the contracting parties had equal bargaining leverage and could freely negotiate that provision. I asked Judge Easterbrook if he had ever studied a credit card agreement and tried to change the terms of that printed agreement or borrowed money from a financial institution while in financial distress. He replied in the negative and then said he would have to rethink his position.

As for Judge Posner, Mr. Jakubowski never named a particular case that he was talking about yesterday and stating that it was in conflict with TWA. Let us not forget, Your Honor, that the Seventh Circuit is the circuit that is the Chicago school of finance, and it is the circuit that is the least receptive to business reorganizations. A circuit, Your Honor, that is so unreceptive that it does not endorse the critical vendor situation that is so important in most

reorganizations. But --

THE COURT: Or NOL protection.

MR. MILLER: Or NO -- exactly, Your Honor. But be that as it may, Mr. Jakubowski argued that the jurisdiction of this Court is extremely limited and unless you are able to find specific words in the Code you are acting beyond your power. He invites you to teach a lesson to the Second Circuit and tell the judges of that court that they don't really understand statutory construction. Yet, his idol Judge Posner, in a case called FutureSources LLC v. Reuters Limited at 312 F.2d 281, 283, a 2002 case, Judge Posner criticized a district court for relying on an unreported opinion from another circuit and for one of the parties to rely upon it in his argument. Judge Posner said that while, and I'm quoting, "The reasoning of a district judge is of course is entitled to respect, the decision of a district judge cannot be controlling precedent. The law's coherence could not be maintained if district courts were deemed to make law for their circuit, let alone for the nation, since district courts do not have circuitwide or nationwide jurisdiction." Notwithstanding those piercing words of Judge Posner, Mr. Jakubowski wants you to take on the Second Circuit judges and, in effect, suggests to them that they really ought to act a lot more like Judge Posner. I don't believe that Your Honor has a death wish.

Last week in the argument on the effect of the

Sprague Sixth Circuit decision, Your Honor unequivocally stated that Sprague was never binding on you -- was not binding on you and that your obligation is to follow the directions of the Second Circuit and to maintain consistency of bankruptcy court decisions in this district in the absence of clear error. And as Your Honor stated yesterday, you don't view Judge Gonzalez's decision as clear error. And right now, Your Honor, the law of this circuit is the decision of the Second Circuit affirming the Chrysler decision on the basis of the reasoning that Judge Gonzalez used in his opinion. That's the law in this circuit which I believe Your Honor is required to follow.

Mr. Jakubowski alluded to stare -- I'm sorry, Your Honor, alluded to stare decisis and the peril of the Court to fill in gaps in the statute. Mr. Jakubowski argued that 363(f) subject to the plain meaning rule and must be construed narrowly based upon a whole host of Supreme Court decisions that he cited generally involving Chapter 7 or Chapter 13 cases. Bankruptcy courts deal with business reorganizations as situations which require flexibility and the exercise of reasonable judgment by a bankruptcy court. Courts need to fit the requirements of the case in achieving the objectives and policies of the Code. A perfect example of the kind of role that must be played by bankruptcy courts is demonstrated with the situation that arose as a result of the Supreme Court's decision in Hartford Accident and Underwriters v. Union

Planter's Bank at 530 U.S. 1, a 2000 case. As Your Honor undoubtedly knows, the case involved the construction of Section 506(c) of the Bankruptcy Code and whether the Hartford Accident and Underwriters could present a case for administrative expenses under 506(c) when the language of the statute read that only a trustee could do that.

And the Supreme Court, in applying what essentially, I think, was Judge Scalia, the plain meaning rule, said the statute says the trustee can only do that, therefore Hartford could not step into the shoes of the trustee, could not qualify under 506(c), and that's what the statute says and that's what courts have to pay attention to. So -- and they cite the Ron Pair case and some of the cases that were cited by Mr. Jakubowski.

So what followed after Hartford? In 2003, a case came to the Third Circuit, Cybergenics case at 130 F.3d 545, a 2003 case. This was an en banc --

THE COURT: You're talking about Cybergenics before or after the first en banc?

MR. MILLER: I'm talking about the en banc decision, Your Honor. The issue in Cybergenics involved Section 544(b) of the Bankruptcy Code and that's the section, part of the avoidance powers where a trustee may prosecute actions based upon nonbankruptcy law to recover preferences, fraudulent transfers, et cetera.

The language of the statute is almost precisely the same as Section 506(c) of the Bankruptcy Code. And when the case was heard before the Third Circuit on appeal from the bankruptcy court and the district court, a three-judge court in the Third Circuit reversed the lower courts on the basis of the Hartford Accident case, a pure case of statutory construction as far as the three-judge court was concerned. That decision was withdrawn as a result of the granting of a motion that the case be heard en banc.

When it was heard en banc, the issue of the creditors' committee prosecuting avoidance actions under Section 544(b) was upheld by a majority of the en banc court. The Third Circuit decision, the en banc decision, reflects a court recognizing the needs of the case and the necessity of making the statute work. And, if I might find -- let me just get that decision.

THE COURT: You're talking the second Cybergenics decision, the en banc one that --

MR. MILLER: Yes, I am. As Your Honor does with great frequency, first you look at the statute. And they looked at the statue. And -- can you hear me? How's that.

First the Court noted that statutory construction is a holistic endeavor, citing the Timbers case. And then, Your Honor, in reviewing what had occurred, the Third Circuit noted that the fact that the language does not authorize derivative

action in the first instance, should be recognized. But that there was a missing link. And where there was a missing link the Court said we believe that the missing link is supplied by bankruptcy court's equitable powers "to craft flexible remedies in situations where the Code's causes of action failed to receive their intended purpose."

The Third Circuit went on to say, Your Honor, "that the Supreme Court has long recognized that bankruptcy courts are equitable tribunals that apply equitable principals in the administration of bankruptcy proceedings." And it noted, Your Honor, that the Court in the 105(a) has the power to issue any orders, process or judgment that is necessary or appropriate to carry out the provisions of this title. No provisions of this title providing for the raising of an issue by a party-in-interest shall be construed to preclude the Court from sua sponte taking any action or making any determination necessary or appropriate to enforce or implement court orders or rules, or to prevent an abuse of process.

So what that -- those decisions say, Your Honor, is where there is a statutory provision that doesn't comport with a holistic interpretation of the Bankruptcy Code, and the objectors and policies of the Bankruptcy Code, the bankruptcy courts have the equitable power to construe that statute to accomplish those objectives and purposes of the Bankruptcy Code.

And in connection with Section 363(f), Your Honor, Mr. Jakubowski says you can't give it effect. It cannot -- it just doesn't cover claims. Claims are not included in the statutory language and, therefore, this Court is without power to issue an order that provides free and clear of all liens, claims and encumbrances.

Now, if you think about Mr. Jakubowski's argument, Your Honor, what he is basically saying that every single unsecured claim carries over, that 363(f) is totally inapplicable, that it doesn't work. That, Your Honor, is not a principal statutory construction. Courts are under the duty, I believe, Your Honor, to give effect to the words of a statute, and to harmonize a statue so that it is effective. And for many, many years, Your Honor, courts have issued 363(f) protections in connection with the 363(b) transaction. And the law in this Circuit, based upon Judge Gonzalez' order, is that this Court -- the bankruptcy court has the authority to issue a free and clear order as requested by the debtors in this action, which is almost identical to the order that was entered in the Chrysler case.

The scope of the power of the bankruptcy court under Section 363 Your Honor once referred to in the Magnesium Corporation of America case. And you said in that case on June 13, 2002 "I believe Judge Walsh got it exactly right in TWA. I am not going to burden this already very lengthy decision by

telling you all of the reasons I believe Judge Walsh is right. But I have rarely seen on my time on the bench a decision that was as closely relevant and directly on point" -- and this was in connection with a 363(b) sale, "and as well thought out as his decision. At the risk of appearing less than thorough I am going to adopt his analysis by reference."

THE COURT: That is the same TWA but before it was affirmed all the way up to the Third Circuit?

MR. MILLER: That's correct, Your Honor. Your Honor also referred to the Leckie Smokeless Coal Company case at 99 F.3d 573. Your Honor said that Leckie -- that you interpreted the Fourth Circuit as saying "That Congress did not expressly indicate that the language of 363(f) was intended to limit the scope of its application to in rem interest."

If Mr. Jakubowski's argument was taken and adopted by Your Honor it would mean, Your Honor, that 363(b) is out of the statute, and there can never be any sales of assets if they're always going to be subject to the claims, the unsecured claims, of the debtor. Even outside of selling substantially all of the assets every single sale under Section 363(b) would be impaired by the fact that the purchaser is assuming or is going to be responsible for claims that may drift or migrate with the assets that are being sold. That, Your Honor, cannot be the law. Common sense says that you cannot effect that kind of a ruling in the face of what has transpired in bankruptcy courts

through thirty years since the adoption of the 1978 code. And, again, Your Honor, as I said before, the law in this circuit is clearly Chrysler.

Now, Mr. Jakubowski also, like a true plaintiff's lawyer, immediately jumped up and said if the government doesn't go through with this acquisition or finance this acquisition it will be a clear breach of contract. And he turns to the creditors' committee and says I hope you're drafting a complaint against the government.

Counsel referred to a case right on point and in Willis on Contracts under the title Express Conditions "assume liabilities and express conditions in a contract, where there are express conditions in a contract, where there are milestone that have to be accomplished, such as there are in this financing, if there is no order of approval on September 10 and there is no wavier on the part of the U.S. Treasury, the U.S. Treasury has the absolute right to terminate. And that does not give rise to a breach of contract. And it is not subject to a commercially unreasonable actions."

In connection, Your Honor, to the arguments that Mr. Jakubowski made that the treasury is not -- if it wants to act like a commercial bank it should be treated like a commercial bank. I would submit to Your Honor that the commercial bank analogy is inappropriate. We are not just talking about a JPMorgan or a Citibank, we are involved with a federal

department that is attempting to salvage an industry and all it represents, as well as protect the taxpayers' money. The Treasury hired an extremely abled cadre of experienced persons to discharge this function. They have made -- the Treasury has made a decision that a prompt approval of the 363 transaction is a condition precedent. If there is no sale order there's no more financing. And, Your Honor, there is no evidence to the contrary in respect of that.

Mr. Richman raises for the first time the credibility of Mr. Wilson. Mr. Wilson testified yesterday candidly and at length. And there is nothing in his testimony which would establish that he was lying, falsifying any respect whatsoever. And counsel for the treasury has reiterated the position that Mr. Wilson testified, and there's nothing else in the record, Your Honor.

The Court must accept that undisputed evidence and take it into account the consequences of non-approval. So in connection with Mr. Jakubowski's argument, both the statutory construction, I would submit to Your Honor that this Court has ample power under its equitable powers to construe a statute so that it may implement and further the interests of bankruptcy reorganization and bankruptcy law under the bankruptcy code.

And in the context of stare decisis, again, Your Honor, the Chrysler case is the decisional authority in this circuit. And, certainly, the TWA case is very persuasive, both

on bankruptcy court level and on the Court of Appeals level.

So then, Your Honor, I turn to Mr. Esserman. And in connection with that I will also deal with all the asbestos claimants. The argument is made, Your Honor, that somehow OldCo should comply with 524(g). 524(g), by it's very language, refers to the confirmation of a plan of reorganization that would discharge asbestos claimants. There is not going to be any discharge here, Your Honor. OldCo is in liquidation, there will be no discharge of liabilities. 524(g), by its very terms, could not be complied with because fifty percent of the equity of the so-called surviving corporation is not available. So 524(g) is not a player in this scenario, Your Honor. And Judge Gonzalez, again, Your Honor, specifically held that 524(g) did not apply to the Chrysler 363 transaction. There is no discharge and there is no channeling order requested. What we have said to Your Honor in the course of these proceedings, this will be an issue that Old GM, OldCo, will have to deal with. That the creditors' committee will have to deal with in structuring a plan of liquidation for OldCo. How existing asbestos claimants are going to be treated to the extent they have allowed claims, and potential future claimants may be treated is an appropriate subject for OldCo. And it would not be different from some other cases where, in the situation of a liquidation, a specific fund is created to deal with future claimants. But

that's an issue to be determined, Your Honor, after the sale is consummated.

THE COURT: Mr. Miller, there's no channeling order, but there is an injunction requested. And the two lawyers who were raising asbestos issues pointed out that if you did give personal notice and applied it to every state in the United States you wouldn't be able to do much with it because they wouldn't know that they've contracted asbestos.

Now, I have an interesting twist here. Both of those folks represent existing asbestos claimants who analytically in the Jakubowski situation. But I also believe that this issue was raised that hasn't been discussed in the Second Circuit argument in the (indiscernible) appeal. To what extent would it be proper or improper in Your view if words were added to any approval order that said to the fullest extent constitutional principal?

MR. MILLER: Just speaking for myself, Your Honor, without consultation for client, I don't have problem with that language. But I would, again, note, Your Honor, that Judge Gonzalez dealt with the issue of notice and I do not recall the colloquy between Judge Sack and Mr. Esserman, and I'm not sure that colloquy related to injunctions or the ability to sue. All I'm saying, Your Honor, there is going to be an estate. And estate which we believe will have significant value.

Part of the claimants who will have rights against

the property of that estate will be asbestos claimants, current and future. And that estate, as part of its plan of liquidation can provide a mechanic to deal with future claimants. That's not unheard of, Your Honor, the creation of a fund or putting aside assets, so when the disease manifests itself and there is an actual claim there will be a source of recovery. That can be done within that context. And there is no discharge in connection with that, Your Honor.

And besides, Your Honor, I think it was Mr. Koch testified it will be three or five years, the asbestos situation has been going on now, Your Honor, for I think pretty close to thirty-five years. GM has not been using brake linings with asbestos for a long time. If and when these claims manifest and whether they're allowable or not, Your Honor, is another issue that has to be dealt with. But as far as 363(f) is concerned, as Judge Gonzalez held, and the specific provision in the order is I would construe it as a very broad provision. And you have to assume, Your Honor, that in the appeal in Chrysler it was considered as Your Honor may have noted in the colloquy, there was a discussion of it.

THE COURT: Oh, there was definitely a discussion of it.

MR. MILLER: And also, Your Honor, I think we have to refer to the per curiam decision of the Supreme Court in connection with the application for a stay. While the Supreme

Court said that it wasn't ruling on the merits, it did say that the applicant, the Indiana Pension Funds, had failed to demonstrate: 1) a reasonable probability that four justices would consider an issue sufficiently meritorious to grant certiorari, or to no probable jurisdiction. Now, in reaching that conclusion they had to evaluate what was decided by Judge Gonzalez. 2) a fair prospect that a majority of the Court will conclude that the decision below was erroneous; and 3) a likelihood that an irreparable harm would result from the denial of the stay. So while it's not a ruling on the merits, Your Honor, it does say something about the Supreme Court's view of Judge Gonzalez's decision.

So coming back, Your Honor, into the context of stare decisis, again, this is the law in the Second Circuit, and this is the law that should be followed in connection with this transaction that is so important to so many people.

Now, Your Honor, turning to Mr. Kennedy who made, likewise, a very impassioned and emotional argument, and likewise, I and everybody here, Your Honor, empathizes with his clients and wished that there was a way to assuage his emotion as well as his client's. But alas, I can't do it, Your Honor. He took issue, Your Honor, with a statement I made in connection with my initial closing argument referring to his papers as construing that there was a conspiracy, a conspiracy among GM and the Treasury to deprive the splinter union

retirees of their benefits.

There is nothing in this record, Your Honor, that would support a determination of a conspiracy and all of the elements that would constitute a conspiracy. Indeed, the record goes the other way, Your Honor. Mr. Henderson testified that up until the very end of May, there was the hope of GM that the bond exchange offer would be successful. And if the bond exchange offer would have been successful, there would have been no impact on the retirees.

And further, Your Honor, in Mr. Rory's deposition, which has been designated to Your Honor, at page 44 -- I'm sorry, page 43, Your Honor, he refers to an exhibit which is really Exhibit 9, which is in the record. And he was directed his attention to the first page of that exhibit. And there's a line in this exhibit, and the title of this exhibit, Your Honor, is History of OPEB Defeasement - IUE. And in the middle of the third bullet point, it says, "2006, IUE resisted mitigation VEBA concept - reluctant to bargain retiree VEBA for large population from legacy operations (e.g. Frigidaire) not represented by active members - relatively small active population to generate wage and COLA deferrals."

So what does that demonstrate, Your Honor? That in 2006, GM was in actual negotiations with the IUE about creating a VEBA, a VEBA that would have provided the health and medical benefits, and yet the union resisted that. That VEBA could

have been set up in 2006, Your Honor, and it would have been active.

In addition, Your Honor, Mr. Kennedy is an excellent lawyer, and he knew how to play the strings on numbers. He talked about the 26,000 retirees of the splinter unions who will be deprived of retiree benefits. And actually, as he spoke, Your Honor, he went on to say that approximately 20,000 of those retirees are already post-sixty-five, so they're on Medicare. And under the proposed retiree benefits that had been offered, all benefits cease from the VEBA or General Motors at the point that you go on Medicare. So basically, Your Honor, we're talking about 6,000 retirees, who right now, are getting their retiree benefits.

Unfortunately, as OldCo goes into liquidation, there's no way that you can sustain paying 26 million dollars a month for retiree and medical benefits. The exhibit -- I forget the number, Your Honor -- of the statement made by Mr. Henderson, clearly demonstrates that there was an effort to try and find a way, a means, to assist the splinter union retirees and the maintenance of benefits for those retirees. There's nothing else in the record, Your Honor, except that what happened at the end of May when a decision was made that there had to be a transaction, there had to be something to regenerate and maintain the going concern value of these assets, and that the 363 transaction was the best way to do

that, that this sale was finalized.

That doesn't give rise, Your Honor, to a conspiracy to deprive these retirees of their benefits. As Mr. Wilson testified, Your Honor, the guiding principle of the Treasury was to acquire the assets and assume the liabilities which were necessary and incidental to the creation of a commercial success; a commercial success, Your Honor, which would inure to the benefit of OldCo and the creditors of OldCo.

This morning Your Honor heard of a potential compromise with the State of Michigan on Workman's Compensation, where NewCo or New GM has agreed to pick up the Workman's Compensation obligations. Now, why was that done? That was done because if GM -- New GM did not do that, the State of Michigan was not going to allow New GM to be a self insurer, which would have cost New GM an enormous amount of money; and which would come out of its cash flow. By assuming that liability, it is now going to be allowed to be a self insurer.

Essentially, Mr. Kennedy, in his impassioned plea, is arguing something which is novel. He is basically saying, Your Honor, that Sections 1113 and 1114 are effectively in the same status as liens on the land. They run with the assets. That you cannot transfer assets of a unionized business without dealing with obligations under 1113 and 1114. There is no legal authority that supports that proposition, Your Honor.

There is no requirement that before you transfer assets, you must reject the collective bargaining agreement, if that's the condition. There is no requirement in connection with a 363 sale that you must comply with 1114. OldCo --

THE COURT: Can I assume that there will be compliance by OldCo with 1114?

MR. MILLER: Until such time as Your Honor may rule on an 1114 motion. Yes, sir. Right now, today, all of the IUE retirees are still receiving the full benefits under that program. That's what's costing -- and I'm including all the splinter unions, Your Honor -- that's what's costing approximately twenty-five- to twenty-six million dollars a month.

Now, as OldCo goes into its liquidation phase, obviously that is not a sustainable benefit in a liquidation scenario, nor is it a sustainable benefit in the context of New GM, Your Honor. Are we going to inflict upon New GM some of the problems that contributed mightily to the demise of Old GM. The concept of having job banks of thousands of employees who sit around and don't do anything except paychecks with no benefit to the ongoing operations, work rules, et cetera, and conditions under collective bargaining agreements. What has happened here, Your Honor, is the Treasury, a government sponsored purchaser, who has had to make an agreement with the UAW because otherwise there would be no employees. And it's

unfortunate that the IUE has basically no active employees. Not necessary to the operation of the plants that are being acquired by the purchaser. And there has to be a line of commercial reasonableness in terms of what New GM is going to assume in connection with a sale.

Mr. Kennedy also criticized me because I used the word jealousy in respect of the discussions or descriptions that have been made in connection of the UAW recoveries through the purchaser. I withdraw the word jealousy. Nonetheless, through half this case I have heard repeated over, and over again, that the UAW is getting too much and that it's just unfair. Well, it's the economic circumstances, Your Honor, that resulted in the UAW situation. The proposal by Mr. Jakubowski that Your Honor an order of conditional approval just doesn't work, it's not acceptable to the purchaser. It doesn't benefit the New GM and it doesn't benefit the Old GM. Because the conditional approval will have a terrible negative effect on consumers. Everything that this company has been fighting for the last thirty days to make it clear to the consumer that it's not going to be entangled in a bankruptcy case, that these assets which will form a foundation of a new OEM will be there free of the entanglements of bankruptcy will dissipate.

And Mr. Richman, again, raised the issue in his closing argument well, GM is really doing well in Chapter 11,

look at the month of June. It was only thirty-three percent below June of 2008. And as Mr. Henderson testified lead sales were down by an even greater margin. And if Your Honor happened to read this morning's New York Times it shows the relative figures between Chrysler, Ford and GM. And what you have to surmise out of that or infer out of those discussions, Your Honor, that Ford's market share is rising. And where is that market share coming from. As we sit here today -- stand here today, GM's market share is our owee. And the longer it's in this process the more that will happen.

And Mr. Henderson testified that GM will not make money in 2009, which means that somebody has to finance these operations going forward. And not one objector has brought forth a financier. Not one objector has brought forth an alterative -- a viable alternative other than, Your Honor, you should deny this application, we'll play poker or Russian roulette with the government. And if the government walks, well, we'll just have a Chapter 11 case and see what happens.

Well, what does that mean, Your Honor? Without financing it would be the obligation of Old GM to close every factory, to terminate every employee except those that are needed to preserve and protect the properties. The results will be catastrophic, Your Honor, and irreversible. So we're be brought back again, Your Honor, to the bluff game.

But there's nothing in the record that says that the

Treasury is bluffing. And I take the representation of counsel for the United States that that representation is made on information furnished to him by his client, the U.S. Treasury. But again we hear the argument, Your Honor, that this was all a -- this is not a true sale, and part of that also relates back to this infamous document, Bondholders' Exhibit 2 from the Cadwalader firm, about the use of Section 363. I would venture to say, Your Honor, if anybody goes to a CLE program on bankruptcy, they will get this slide show without the names. I don't want to demean Cadwalader, Your Honor, but I think that this is in general circulation.

Now, looking at that exhibit, Your Honor, and looking at the record as to what GM did, if the board of directors of GM did not consider the various alternatives, that board of directors might have been remiss in its duties. It had an obligation to consider all alternatives and to rely upon the advice of its professionals and advisors. That's what the board of directors did, and that's what the exhibits establish. Clearly, there were presentations to the board as to what bankruptcy provides for, what happens in a bankruptcy. Otherwise, the board of directors could not be discharging its fiduciary obligations.

I just want to see where I am in this, Your Honor.

Now, if I might, Your Honor, I would turn to Mr. Richman's comments. Last evening, Your Honor, Mr. Richman

asked for more time to prepare his closing arguments so that he could address the evidence in the record. I listened carefully to Mr. Richman's argument. There were no references to the record other than his claim that Mr. Wilson is not credible. During the course of these proceedings, he put on no evidence, no witnesses, no declaration of fact, no expert witness. In fact, he didn't do very much other than work off what was in the record.

All of the others' evidence shows good-faith bargaining, good-faith business judgment. And he concedes that it's in the best interest of all parties that the GM assets be sold. His cross-examination of Mr. Wilson certainly did not shake Mr. Wilson's credibility. What he's doing, Your Honor, he's asking you to take his opinion and speculate on the future and not refer to the evidence that has been sworn to in these cases -- in these proceedings. And basically he says, Your Honor, oh, Chapter 11 is an easy process, given a few days parties can agree on various things and in ninety days we can be out of Chapter 11. I would just say, Your Honor, just taking these three days of hearings as an example of what happens in a Chapter 11, the concept that you could file a Chapter 11 plan, and he doesn't even describe the Chapter 11 plan that you would file on the first day, but any Chapter 11 plan that you file that had open ends to it would involve the appointment of creditors' committees, disclosure statements,

arguments over valuation. The concept that a case of the size and complexity of GM would move through some accelerated basis so that you can have a confirmation in ninety days, I think, Your Honor, is not credible. It just doesn't happen.

I refer to the Delphi case. The Delphi case was supposed to move on a fast track. That track seems to have disappeared. And in July -- later this month, I should say, Your Honor, Delphi will either have a resolicited plan of reorganization or will have a 363 sale with substantially less recoveries for the creditors and basically no recoveries for the unsecured creditors.

The problem with long term bankruptcies -- and I don't mean long term to be years, Your Honor -- is that things happen in bankruptcy cases. People come into the court with all kinds of motions, applications, and various moves to get leverage. We spent three days on this proceeding. Think of the days that would be spent in valuation discussions; the possibility of the appointment of an examiner; fights between ad hoc committees and independent committees. And all during this process, Mr. Richman never refers to who's going to finance it. Where's the money going to come from while everybody's having fun in the courtroom.

Mr. Jones says don't look at the Treasury. We've got to protect the taxpayer's money and we're not going to put good dollars after bad dollars. And while this is happening, Your

Honor, the consumer is scratching his or her head and saying is there going to be a GM that's going to produce good vehicles, reliable vehicles that I know I can service? What are the dealers going to say, Your Honor, when this process goes on with no plan other than "We're going to stiff the Treasury and we're going to make the Treasury put in more money." That is an awful gamble to play in this case when you're dealing with -- and I sympathize with Mr. Kennedy and his 26,000 retirees, but we're talking about the UAWs with almost 600,000 retirees and active employees, 235,000 GM employees worldwide.

Yesterday, I think, Your Honor, Lear, a supplier to GM, commenced bankruptcy, Chapter 11 cases. In the past month I think there have been three or four suppliers. If this case doesn't come out the way it has been programmed, with a 363 transaction, there will be chaos in the supplier industry. Systemic danger is all over the horizon, Your Honor.

So what do we get down to, Your Honor? We get down to a situation in which there is no palatable alternative. No financier has shown up, and I think it is very significant, Your Honor, that notwithstanding all the notoriety about GM pre-Chapter 11 and post-Chapter 11, nobody -- no hedge fund, no private equity fund, no foreign investor has come along and said gee, I really would like to take a look at GM and maybe I would like to buy it or parts of it. Not one party has been interested. Not one party has been willing to sign a

confidentiality agreement to get into the data room and look at it for the purposes of considering a bid. There hasn't been one expression of interest.

So we have a situation, Your Honor, where the only offer at all for these assets is the government-sponsored purchaser, the only entity that will be able to get financing and make these assets into a valuable original equipment manufacture. The only other option is to commence the liquidation process because this company cannot survive without financing, and there is no financing. And when that becomes public knowledge, that's the end of its ability to really sell cars. Then you are in the liquidation and no consumer, unless he gets a terrific discount and takes his chances or her chances, will buy a GM vehicle.

There has to be a cutoff and a creation of certainty as to the future of these GM assets. And the fact, Your Honor, as I alluded to before, that GM management is moving over, doesn't make it a nonsale. It's a sale. There's a real purchase price that's being paid here. There is an independent company that is buying these assets and will be an independent company going forward, and hopefully in a very short period of time, a publicly owned company for the benefit not only of shareholders of this company but the whole automotive industry.

Mr. Richman said that the White House will not allow GM to fail. I haven't heard anything come out of the White

House recently about these cases, but I recall President Obama's speech that either Chrysler finds itself a purchaser by May 1 or April 30 or there will be no further financing. And if GM doesn't come up with a viable plan by June 1st, that's the end. And I believe the President meant it. And clearly, the Chrysler people believe that he meant it, even though it must have given Fiat some bargaining leverage. There is nothing on the record -- I keep repeating this Your Honor -- that there will ever be additional financing.

I believe all of the objectors agree that if Your Honor found that this is a legitimate sale, then the transaction should be approved. Delaying the transaction so that various parties can try to exercise leverage by being ad hoc committees in a Chapter 11 or attempting to be additional committees only means further delay in the conservation of a plan, a delay that cannot be borne by this company.

Mr. Richman's closing argument, Your Honor, as I said, had nothing to do with the record that was made before Your Honor in the past two days. It was his ipse dixit as to what he thinks could happen in a Chapter 11 case. With no expert testifying, there's no other person offering any support for that position. He offers nothing in the way of a purchaser. He offers nothing in the way of a financier.

I believe, Your Honor, Mr. Richman's closing argument was just his opinion and his advice to you that you should take

up the purported bluff of the U.S. Treasury and that's an awesome responsibility that he wants to impose on your shoulders.

With respect to, Your Honor, to Mr. Parker, we have submitted, Your Honor, and I'm not going to speak further on it, the statements and the arguments made by Mr. Parker with respect to the equal and ratable clauses in the indentures, are just not accurate. Mr. Parker has not established and he's not produced any certifications or a record of any lien filings with respect to the excluded assets, and the agreements are quite clear that if there were no liens granted to the federal government, the U.S. Treasure in connection with the security agreement of 12/31/08 that was subject to those indentures.

THE COURT: Let me go back to the Secured Financing 101. UCC-1 perfects the security interests but the security interest has to -- it's separately granted, am I correct?

MR. MILLER: That's correct, Your Honor.

THE COURT: And romanette v says that (indiscernible) will be granting the security interest?

MR. MILLER: I'm sorry, sir?

THE COURT: And romanette v says, in its excluded assets -- or excluded liens provision, that there isn't a grant of security?

MR. MILLER: That's correct, Your Honor.

THE COURT: Okay.

MR. MILLER: And Mr. Henderson testified at length, Your Honor, that there were no liens granted in violation of the indentures.

Bad faith. Mr. Parker says that the purchaser has not acted in good faith. Yet the record is to the contrary. The record establishes the extent and nature of the negotiations, how they were conducted, and that they were consistent with the standards of good faith under the cases.

The TARP argument. Again, Your Honor, that argument was raised in Chrysler, and Judge Gonzalez ruled on that. It involved the DDSA and TARP, and that argument was not successful and was continually raised by the Indiana pension plans that you can't use TARP money for these purposes. And in this circuit, Your Honor, at least, that is not an argument that can stand.

Mr. Parker also complains about the scheme of distribution. And again, the basis of his argument on the scheme of distribution is the UAW is just getting too much, while the record is replete with the rationalization and reasons why the UAW ended up in that position. There are sometimes, Your Honor, when union membership is a good thing. Sometimes not. But these active employees are critical to this transaction. If we did not have these employees, there would not be a 363 transaction. And more importantly, Your Honor, the consideration that is being given to the UAW VEBA is coming

from the purchaser and not from OldCo.

And if this deal is not approved and this transaction doesn't go forward, and Mr. Curson's testimony demonstrates, the UAW claims, the VEBA claims will be reasserted in the OldCo case so that you will be adding on an additional twenty plus billion dollars of liabilities which will substantially dilute the position of the bondholders and other creditors.

I am not going to deal with Mr. Bernstein's argument, Your Honor, as to the consent decree and the effect of that. That's an issue that can be determined in the future. My colleague, Mr. Karotkin, said I should refer to the case of In re Rochnunis (ph.) and say pay the 62,000 dollars. I'm not going to do that.

As I understand it, Your Honor, the indenture trustees are no longer objecting. Mr. Reinsel, I think his name is, made the same arguments as Mr. Esserman in respect of asbestos claimants, and I think I've dealt with that.

So Your Honor, we get down to the basic issue. And in connection with --

THE COURT: Before you wrap up, do you want to comment in any way on Ms. Taylor's point that I should have language in the approved order that says, in substance -- I don't know if she's saying just that nothing in this order affects the government's ability to use its police power or if she's looking for more than that. And I don't know if what she

says has controversial implications that I'm not sensitive enough to.

MR. MILLER: I would just note, Your Honor, that the proposed sale order in paragraph 55 states, "Nothing contained in this order shall in any way: 1) diminish the obligation of the purchasers to comply with environmental laws or 2) diminish the obligations of the debtors to comply with environmental laws consistent with their rights and obligations as debtors-in-possession under the Bankruptcy Code." I would submit to Your Honor that is fairly broad language that imposes on the purchaser and the debtors as debtors-in-possession. And there is no intent to circumvent or evade the environmental laws. To the extent that New GM is acquiring plants that may have environmental problems, they will be responsible for that. To the extent --

THE COURT: Kind of like in Magcorp.

MR. MILLER: I'm sorry?

THE COURT: Kind of like in Magnesium Corporation of America.

MR. MILLER: That's correct, Your Honor. And to the extent that OldCo retains plants that haven't -- I mean, the whole controversy, Your Honor, about the wind-down budget only related to environmental claims. As the analysis of the environmental claims and the potential exposure there went up, the committee, justifiably, said we need more in the wind-down

budget to cover environmental claims. So there is no intent -- and I would submit to Your Honor the language is sufficiently broad, and if the New York State Attorney General has a problem with it, we'd be happy to work that language out with her.

THE COURT: Okay. Continue.

MR. MILLER: So Your Honor, we come down to the final aspect, I hope, of this proceeding. The record, Your Honor, I believe is abundantly clear. The business justification has been articulated. Mr. Richman referred to the Lionel case and the various factors in the Lionel case. And in the Lionel case, as Your Honor may recall, the sale was disapproved. It was disapproved and reversed by the Second Circuit because it was being done at the insistence of the creditors' committee who wanted a cash distribution as part of a subsequent plan of reorganization. And the issue was their electronics, the common stock of that partially owned subsidiary. But in the Lionel case, Your Honor, there was no danger of diminution in value. Dale Electronics was an independent company listed on the New York Stock Exchange. The value of that stock was not diminishing. And as it turns out, three years later or two years later it was at the same value.

We have a different case, Your Honor. And as pointed out by the Second Circuit in Lionel, the most important factor is the potential diminution in the value of the assets. This record establishes that if this transaction is not approved,

the value of the GM assets will deteriorate and may deteriorate at a much more rapid pace than either you or I or Mr. Richman understands. The fact that GM did better than its downside projections in the month of June doesn't establish anything when the month of June was thirty-three percent below the same period in 2008, and a decline of forty-three percent in fleet sales. And then we have Mr. Henderson's testimony, even going forward GM will lose money in 2009. If we don't start -- if the purchaser doesn't start using these assets as part of a new GM, a new, leaner, more competitive, more efficient GM, the downward cycle will be irreversible.

So we fit right within Lionel and its progeny. We have -- I will have to call it, Your Honor -- I don't want to call it a melting ice cube because I got criticized for that once before -- a wasting asset. These are assets that will deteriorate in value. And that deterioration will be felt by all of the stakeholders, including the stakeholders that oppose this transaction.

The bottom line, Your Honor, is that there is no viable alternative. And that's the kind of situation that Section 363 was enacted for, to deal with a situation where there had to be a relatively quick sale of assets. And fortunately, we've had thirty days to see if there's anybody else in the market for these assets. What we have done, Your Honor, is establish the value of these assets. We've also

established that nobody's interested in buying them other than this purchaser.

And the fact that it's the government, Your Honor, doesn't detract that it is a purchaser. It's voluntarily doing this, Your Honor. One, to protect the taxpayer's monies in the hope that it will recover a portion of the taxpayer's monies. And two, to try and salvage an industry. But there are limits to that, Your Honor, and the government has clearly said what the limits are.

So we are in a situation where we can do this transaction, we can create a new GM. Yes, we're going to use the same name, but we're only going to have four brands, Your Honor. We're going to have Cadillac, Chevrolet, Buick, and GMC. A leaner, more competitive GM that will benefit the domestic industry, that will provide more value to the economic stakeholders than any other alternative that has been proffered, and no alternative, unfortunately, Your Honor, has been proffered to date.

So on behalf of the debtors, Your Honor, we submit that this case fits squarely within the four corners of 363(b). There has been an articulated business reason for this sale. It is reasonable business judgment. The board of directors of GM discharged their fiduciary obligations in considering the alternatives and going forward with this Section 363 sale. And the purchaser, the government-sponsored entity, has acted in

good faith in negotiating this transaction, as demonstrated by the negotiations that have gone on to this very hour. There has been no bad faith as Mr. Parker alleges.

To allow these assets to go through a process of liquidation would be horrific, Your Honor, a situation that Your Honor should not allow. And Your Honor should approve this transaction. Thank you.

THE COURT: All right. Thank you. All right. Ladies and gentlemen, this hearing is now closed. We're going to take a lunch break for an hour, and then if you have any deals to announce to me or any housekeeping matters, I'll hear them an hour from now. However, there will be no further argument on today. If it turns out that there are no additional deals to announce or understandings to confirm, it will be very short an hour from now. The purpose of this, among other things, is to give you a chance to talk to folks to ascertain whether or not you need or want to put anything on the record. And there may be other people similarly situated. I also will need to talk to at least one person of medium or higher level seniority from each constituency to discuss getting the transcript and exhibits to make sure that I have a full set and the like. This matter is taken under submission and at this point we're in recess. Thank you.

(Recess from 1:42 p.m. until 2:54 p.m.)

THE COURT: Okay, folks, I need to get to work. And

we said that we would set aside some time for you folks to put deals on the record and deal with housekeeping matters, and I have one or two of my own.

Mr. Karotkin or Ms. Cordry, who would like to take the lead on taking care of some of those things?

MR. KAROTKIN: Your Honor, I believe we have reached an understanding with Ms. Cordry as to the proposed terms and provisions of a proposed order to address the concerns she has raised.

THE COURT: Okay.

MR. KAROTKIN: Is that correct?

MS. CORDY: Yes.

MR. KAROTKIN: Okay. And the one -- so I think that addresses those issues. If I might, Your Honor, the Attorney General from the State of Texas would like to leave to catch a plane.

THE COURT: Sure.

MR. KAROTKIN: So I --

THE COURT: Would you like to say something before you have to go?

MR. KAROTKIN: He had asked me if I would read into the record --

THE COURT: Oh, okay.

MR. KAROTKIN: -- three paragraphs which would address his concerns as well.

THE COURT: All right.

MR. KAROTKIN: These would be three paragraphs that would be inserted into the proposed order:

"Entry by GM into the Participation Agreements with Accepting Dealers is hereby approved, and that the offer by GM and entry into the Participation Agreements was appropriate and not the product of coercion. The Court makes no finding as to whether any specific provision of any participation agreement governing the obligations of Purchaser and its Dealers is enforceable under applicable provisions of state law. Any disputes that may arise under the Participation Agreements shall be adjudicated on a case-by-case basis in an appropriate forum other than this court."

THE COURT: Mr. Roy, did he get it right?

MR. ROY: He got the first paragraph right, Your Honor.

THE COURT: Still didn't express your last implication there?

MR. KAROTKIN: This is very stressful for me, Your Honor.

THE COURT: Okay.

MR. KAROTKIN: The next paragraph would be, "Nothing contained in the preceding two paragraphs shall impact the authority of any state to regulate Purchaser subsequent to the closing."

And the final paragraph is as follows: "This Court retains exclusive jurisdiction to enforce and implement the terms and provisions of this order, the MPA, all amendments thereto, any waivers and consents thereunder, and each of the agreements executed in connection therewith, including the Deferred Termination Agreements in all respects, including but not limited to retaining jurisdiction to: (a) compel delivery of the Purchased Assets to the Purchaser; (b) compel delivery of the Purchase Price or performance of other obligations owed by or to the Debtors; (c) resolve any disputes arising under or related to the MPA, except as otherwise provided therein; (d) interpret, implement and enforce the provisions of this order; (e) protect the Purchaser against any of the retained liabilities or the assertion of any lien, claim, encumbrance or other interest of any kind or nature whatsoever against the Purchased Assets; and (f) resolve any disputes with respect to or concerning the Deferred Termination Agreements.

"The Court does not retain jurisdiction to hear disputes arising in connection with the application of the Participation Agreements, which disputes shall be adjudicated as necessary under applicable state or federal law in any other court or administrative agency of competent jurisdiction."

THE COURT: Okay, I'll try to -- again, Mr. Roy, did he get it right this time?

MR. ROY: He got it all right this time, Your Honor.

THE COURT: Okay. Fair enough.

MR. KAROTKIN: I believe, with that, this gentleman is prepared to withdraw the --

MR. ROY: Yeah, Your Honor, with the agreement that that language is going to be in the order that the debtors submit as a proposed sale order, and with the understanding that there's no objection from any other party, including Treasury, the State of Texas is prepared to withdraw its objection.

THE COURT: Okay, Mr. Schwartz?

MR. SCHWARTZ: That's correct, there's no objection. We had a small tweak to add the federal government's ability to continue to regulate the purchaser. I'm not sure if these folks have signed off on it.

THE COURT: In other words, you're proposing that there be an even more regulatory environment than what Mr. Roy was asking for?

MR. SCHWARTZ: Exactly right.

MR. ROY: So I'm getting more than I asked for.

THE COURT: It sounds to me like you wouldn't care if they got that, Mr. Roy.

MR. ROY: No, not at all. This -- I believe that this protects the state's ability to enforce its regulatory scheme.

THE COURT: Okay. Well, fair enough. I assume that

takes care of your needs and concerns then, Mr. Roy?

MR. ROY: It does, Your Honor.

THE COURT: Have a good flight.

MR. ROY: Thank you so much.

THE COURT: Thank you.

MR. ROY: It's been a privilege.

THE COURT: Thank you.

Ms. Cordry?

MS. CORDY: Having come here and sat here through the last couple of days, I did want to indicate for the record the basis on which the states were finding a resolution of their objection. And I will be very brief, but I do want to, sort of, lay out what is in here and what the basis was for pulling what we had filed.

Certainly this is an extraordinary case; I think everyone agrees on that. On the other hand, in some ways it's also like every other Chapter 11 case in that it has to follow the Bankruptcy Code. The Supreme Court has told us that the uniformity clause sets aside bankruptcy from every other portion of Congress's powers. So it's for those reasons that the states initially analyzed this case under their view of what the Bankruptcy Code says without a special exception for the mega auto bankruptcy problems.

We had a number of problems with the order with respect to clarity in a number of respects, with taxes,

environmental law, other provisions. We had concerns with the substance of the terms in terms of what was being assumed, what was not being assumed. The treatment of these dealer agreements was a major issue for the states, and I'll get to that in just a moment, and then some of the terms of the order in terms of the way it was phrased about successor liability, which was some of the questions I asked yesterday.

We have worked very hard since the beginning of the case with debtors' counsel initially, with Treasury counsel, almost everybody in this room at some point or another, it feels like. And I think a great number of improvements have been made in this agreement over that time period. The first was the assumption of the future product liability claims. Obviously, we -- you know, in a perfect world, we would not be distinguishing between those two categories, but certainly that's better than none of them. And it certainly goes a ways to addressing issues that were raised by the state Attorney Generals. And by the way, I am speaking strictly on behalf of the forty-five-Attorney-General-objection that's there.

With respect to the dealers, you heard yesterday, one set of dealers talked to you about the process of being required to sign on to those. And there was a statement that while 99.6 percent of the people signed it, so it must have been a great deal. I -- as a matter of reality, I think most things that you get 99.6 percent of people signing on are

probably not the greatest deal in the world; they're just better than something really awful. But we're leaving aside that concern.

There was a second concern that the ongoing terms of those agreements that we were being asked to sign had provisions that could be substantively unlawful under state law. And we do not understand that anything that is said with respect to rejection can carry over to the notion of saying that if you assume a contract you can thereby assume some terms that violate state law on a going-forward basis, any more than if someone could make you sign a contract that said I'll take less than the minimum wage and then assume that contract and make you take less than the minimum wage.

So that was a concern on the dealer agreements. And what you just heard read into the record dealt with that by leaving us free to -- and the jurisdictional piece as well, taking the jurisdiction to enforce ongoing agreements between nondebtor parties, post-closing, that could not affect the estate in trying to leave them in this bankruptcy court's jurisdiction.

THE COURT: Let me interrupt you --

MS. CORDY: Sure.

THE COURT: -- for a second, Ms. Cordry. When Mr. Roy was standing up next to Mr. Karotkin, they were talking about the things in the context of resolving Mr. Roy's

objections. That was -- he was standing there and you weren't, but that was part of a dialogue to which you were also a part.

MS. CORDY: Right. Yes, and that is part of the overall package that is here. He spoke to it simply because he had the separate objection on it. But, yes, that is one of the pieces that went into this overall deal here.

So we were very concerned about that treatment of assumed contracts, and that agreement works on that part. We also wanted to be sure that lemon laws were covered under the notion of warranty claims, but they did not specifically refer to state lemon laws, and that coverage is being picked up.

Privacy, we had no idea what they were going to do with privacy. We've read the consumer privacy ombudsman's report. We couldn't talk to them directly, but we did try to give some input. And what I've seen from his report appears to be constructive and useful. And there is some language in the agreement right now that was drafted without seeing his report. It's pretty much consistent with what the report recommends, perhaps not completely consistent. That's, I think, up to Your Honor to decide with the debtor what they'll require for that. We had signed off on the other language before we saw what the consumer privacy ombudsman said.

On taxes, we clarified that the taxes in the first-day order are all being assumed by the purchaser. We clarified a number of other pieces of language; some of them are in with

the environmental piece.

THE COURT: Time out, Ms. Cordry.

MS. CORDY: Yes.

THE COURT: I thought I authorized taxes to be paid under the first-day order.

MS. CORDY: Yes.

THE COURT: Your point being that, to the extent they haven't been paid, they'll be assumed?

MS. CORDY: Well, that the -- the assumption was clarified, which was somewhat unclear in the order, that the provision for assumption of taxes is congruent with the kind of taxes that were covered by the first-day order so that if they are the kind of taxes that were being picked up under the first-day order, they will be the kind of taxes that will be assumed, either that there -- there may be some that have just not been paid yet or a dispute or an audit, an ongoing assessment, any of those kind --

THE COURT: One way or another, they'll get paid --

MS. CORDY: Right.

THE COURT: -- at some point in time?

MS. CORDY: Right, and that so they're going to be assumed. And similarly with the environmental liabilities, we clarified that the New GM intends to be fully liable for environmental liabilities of its transferred facility.

So all of these were matters that were very important

to us.

The other piece we talked about, obviously, was the successor liability. And the basic construct we dealt with was this notion that I raised yesterday of what is -- assuming you can sell free and clear of liability on a claim or on something, what is the scope of that? And we came to an agreement that we would limit it to a bankruptcy claim, a 1015 claim. So the language on that is all in the agreement.

On the TWA issue, I can only say our view remains as to what it is of the proper construction of law. But we also recognize that there's been a little water under the dam and a lot of people have structured deals based on what they believe the law to be, and certainly this case is an example of that.

So for all those reasons, after exhaustive, literally of course, negotiations, we have reached agreement with the debtor, with Treasury on the terms of the order that I have recom -- well, when we say "we", mostly me. I've recommended to the AGs; I have talked to the staff, counsel, contacts, the ones I could gather last night at 10:00. We have sent it around. We have made the request to all the Attorneys General to sign off on this, which they started getting that request at about 9:30 this morning. As of now, I've been told there are forty-five -- the final total, I believe, was forty-five Attorney Generals on the brief. At this point I've been told, I think, that the last count of approvals so far is twenty-

seven. I'm reasonably optimistic that we will continue to get the rest of them signed on over the course of the day or so.

At this point, my view would be I believe that we have an agreement. I don't believe we're going to have dissent that would overturn the agreement, but the last position, I understood, with the debtors and Treasury, was simply that if for any reason we -- if the other fifteen AGs come back and say no, no, over our dead bodies, that we would just say the deal's off, the order goes back to what you were doing before you had the agreement without us, and we'd just stand on our objections. But as of now, we think this agreement is going to hold and we think it is a preferable agreement for the Attorney Generals. We also think it's preferable for all the other parties as well in not having the Attorney Generals seek to overturn this transaction.

THE COURT: All right, thank you.

Mr. Karotkin?

MR. KAROTKIN: Thank you, Your Honor. With respect to Ms. Cordry's colloquy and commentary, I don't know if that was meant to be interpreting what the order said or embellishing what the order said. As far as we are concerned, the agreement we have reached is in the order. And we are not necessarily agreeing that how she described it or how she interpreted it is accurate or inaccurate. It is what it is.

THE COURT: If I approved the motion and entered the

order in the form as modified, the order would say whatever it says?

MR. KAROTKIN: Correct.

THE COURT: Okay.

MR. KAROTKIN: For example, to the extent she was referring to how environmental laws are being treated under the order, they are being treated as they are being treated.

THE COURT: You're saying the order has them in support of sales.

MR. KAROTKIN: Exactly, sir.

THE COURT: And that what she's saying isn't like a presidential signing statement or --

MS. CORDY: I would stipulate to that, Your Honor. If I get to be president, then I'll determine what kind of authority I have at this point. But --

THE COURT: Okay.

MS. CORDY: -- I was simply attempting to deal with the fact that we did deal with issues regarding environmental laws and made some improvements in that area that I think are --

THE COURT: Okay.

MS. CORDY: -- hopeful and satisfactory to my clients. Thank you.

THE COURT: All right. Fair enough.

MR. KAROTKIN: Thank you, sir.

THE COURT: To what extent do we have other things that people want to note on the record?

Mr. Smolinsky, I see a few people coming up. You want to, kind of, help coordinate that, if you can?

MR. SMOLINSKY: Sure, Your Honor. Let me at least try. Your Honor, there are approximately 600 objections related to what I would call contract issues, and they continue to come in. So I thought, to try to head off everyone coming up and making reservation of rights, that I would describe to Your Honor the process that we're undergoing and perhaps that satisfies everyone's concerns, and we could make -- shorten the time here.

Your Honor, in connection with the sale, the purchaser has identified over 700,000 contracts for probable assumption and assignment. We've done everything in our power to manage the process focused on three goals: First, to have the ability to update the reconciliation process as new invoices come in from the pre-petition and post-petition period; two, allow the purchaser to continue its due diligence with respect to the contracts; and, finally, to try to not bog down this Court's docket with multiple objections.

The company, together with AlixPartners, developed a fully trackable system to allow counterparties to see online their contracts which are scheduled for assumption, as well as backup on how cure amounts are derived.

You've heard a little bit about the call center. The call centers set up in Warren, Michigan have been fielding calls, have been proactively reaching out to all parties who have filed objections, and have also handled over 6,600 calls from other parties that are making inquiries as to their supplier agreements.

Your Honor, when we filed our initial reply last Friday, we attached to it a schedule of those parties that filed objections with respect to contract disputes. And on Monday when we filed our supplemental brief, we attached a new Schedule J, which had three schedules in it, creatively named J-1, J-2 and J-3.

I just want to walk Your Honor through these schedules. And let me just update that, Monday night after we had made further progress on the contracts, we filed a supplemental schedule and I think we made some significant progress. And if Your Honor would allow, I'd like to hand up a copy.

THE COURT: Sure.

MR. SMOLINSKY: I have taken the liberty of highlighting for you the few changes that have been made since then. Your Honor, if you turn to Schedule J-1, which is about six pages long, that is a schedule of withdrawn objections. Now, just to make clear for the record, that doesn't mean that each and every counterparty on the schedule has agreed that

there are no reconciliation issues. Either they've been withdrawn because the reconciliation issues have been resolved, or they signed trade agreements which elected into the alternative dispute resolution to the extent a reasonable resolution can't be obtained simply by talking to the call center and working out their differences. And we've had significant progress there.

The only changes I just want to note for the record, on page 1, Cellco Partnership d/b/a Verizon Wireless is going to be moved to J-2; the same for Fiat on page 2. On page 3, Hitachi Cable Indiana, Inc. and Hitachi, Limited will be moved to J-2. Isuzu Motors will be moved to J-2; LMC Phase II to phase (sic) 2. On page 4, Progressive Stamping Company, Inc. moved to J-2. On page 5, Interpublic Group of Companies Inc. to page 2 -- to J-2, as well as Toyota Motor Sales U.S.A. And on the last page, the two Verizon contracts will be moved to J-2.

Other than that, Your Honor, we believe that the remaining objections can be marked off calendar.

We have provided, in consultation with the creditors' committee, to include in the order that if a contract was withdrawn and then there's still a basis for coming back to the Court, that both parties can do so on no less than fifteen days' notice in case there are any further mistakes or omissions. What we'll propose at the end is to file a final

schedule and then to provide Your Honor's chambers with a list by docket number rather than alphabetically so that the matters could be marked off calendar.

Your Honor, Schedule J-2 is a schedule of objections that have been limited to cure disputes, and they are subject to adjournment. And we have included in the order a request for a hearing date around the third week of July for Your Honor to carry these objections while we continue to try to resolve them and get them off the Court's docket.

We have been having open dialogues with each of these parties; we have delivered documents to them. We have worked with them on finalizing a list of contracts and cure amounts. And we've dealt with a number of them in stipulations, which I'll get to in a moment.

So the only changes to Schedule 2 is on page 2. Behr-Hella Thermocontrol has filed a withdrawal, and that could be moved to J-1, along with, on page 3, the Hewlett Packard three objections can be moved to J-1 as well.

Your Honor, Schedule J-3 is a schedule which has gotten shorter and shorter, which deals with objections that we have not been able to resolve, some of which we have been now able to resolve, and I just want to walk through a few of them and then we can give the other parties an opportunity to speak today if they still have ongoing objections. To the extent that they don't, I would suggest that we move them to J-2 and

adjourn them along with the others as a holding date while we continue to reach out for them.

So if you turn to --

THE COURT: I sense the way you did it, Mr. Smolinsky, that these deal with something different than cure amounts?

MR. SMOLINSKY: It's unclear, Your Honor. We've looked at all of these objections and we believe that most of them, even though they may raise adequate protection -- adequate assurance issues, they -- I believe they're all quintessentially cure objections, with the exceptions of the ones that I'm going to walk through.

THE COURT: Okay.

MR. SMOLINSKY: The first one that I'd like to speak about is Hertz Corporation. Your Honor will recall that Mr. Henderson testified that some of the fleet customers are not purchasing vehicles from General Motors because they have issues, internal issues. Hertz is a prime example. They have securitizations. And if their contracts are not assumed by a certain date, then they have to provide additional collateral into their securitizations, which is an anti-competitive issue for them.

So we have entered into discussions with Hertz. We have agreed to assume their contract now with the understanding that they have no objection to the assignment of that contract

to New GM upon the sale closing. They acknowledge in the stipulation they're not aware of any cure amounts that are outstanding, and we do not believe that there are any either. We've discussed this with U.S. Treasury, we've discussed this with the committee, and they have no objection.

THE COURT: Okay. Continue, please.

MR. SMOLINSKY: Okay. Your Honor, the next contract, Kolbenschmidt Pierburg AG, that could now be moved to J-2. LBA Realty Fund -- I think you heard from counsel to LBA this morning.

THE COURT: Mr. LeHane?

MR. SMOLINSKY: That's correct, Your Honor. And, again, I could put it on the record, but I think you heard the agreement that we intend to assume at closing, to the extent that we finish our amendment discussions, or modification discussions, and the indemnities will follow through with respect to any claims that arise or become known after the closing.

Pratt & Miller Engineering & Fabrication can be moved to J-1. They withdrew their objection.

Royal Bank of Scotland, these contracts -- there are four contracts that relate to the Lordstown plant. Subject to closing, GM has agreed to assume those contracts and we agreed to work cooperatively with RBS to make sure that we deal with any transfer documents that are necessary and any third-party

consents.

Last one, Trafasee (ph.) Marketplaces Inc., that could be moved to J-2 as well.

So, Your Honor, we did our best in these schedules to reflect the desire and intention of the parties. We're also working with the committee to add language to the order to make it clear as to what the cure resolution process is and to preserve everyone's rights while we work it out.

We're not currently intending to bar any reasonable late objections. We understand the process was quick. We're -- ultimately our goal is to try to reconcile all the claims to the satisfaction of all parties. Of course, if there's an unreasonable delay, then we'll bring it to Your Honor.

We intend to send notice; we propose in our order within two business days of the entry of the order. We would send out notice to each of the parties in here notifying them of the adjourn date for their objection or, if their objection has been withdrawn, notifying them as to why it was withdrawn and giving them the opportunity to come back and explain if there was an error.

Turning to stipulations -- and many of these stipulations, I don't believe, require the signature of Your Honor; we're simply to going to file them -- we have received the stipulation from approximately 115 suppliers who have

agreed to withdraw their objection and to appear on Schedule J-1 and defer into the alternative dispute resolution process so that we don't have to deal with them further in the bankruptcy process.

We have some additional stipulations, one with International Automotive Components Group, one with Dell and one with Timken that likewise withdraw their objection, but they have not agreed to the ADR process. They have agreed to work with us to try to reconcile, and if they can't reconcile then we would use the procedure that I explained before that on fifteen days' notice we can come back to Your Honor and litigate the objection.

Your Honor, like Hertz, Avis is another fleet customer. They're having a similar issue, but they don't have the same timing issues that Hertz has. So they've entered into a stipulation, again, acknowledging that they're not aware of any cure amounts under the agreements. But we have agreed to assume and assign those contracts upon the closing. So, unlike Hertz, which happens immediately, the Avis will happen upon the sale. Again, we shared that stipulation with the committee and the Treasury and they have no problem.

Cigna, Your Honor, I think, we talked about earlier. We continue to work with Cigna to try to get their comfort level up on the assignment of those employee benefit-related contracts. And, again, we wouldn't expect to be back before

Your Honor unless there's a problem in assigning those contracts.

Equipment lessors. I just want to put on the record that Manufacturers and Traders Company, as well as Wells Fargo Bank, have equipment leases with the company. They've filed objections. There are additional indentured trustees related to those that have objections. And we've agreed to put on the record that all those contracts are still in the undetermined bucket, meaning that they haven't been noticed out for assumption and assignment. Everyone reserves their rights. We reserve the right to assume and assign those contracts. They reserve the right to object. And we're going to work with them over the next week to enter into an adequate protection stipulation with respect to the use of that equipment as we go through the transition of closing the sale. So we'll be back before Your Honor on that.

Your Honor, I think that's the end. Of course, people may want to make statements, and I'm happy to come back and explain any clarifications that are necessary.

THE COURT: Okay.

People can now come on up, and those who I sent back can now come up again.

Go ahead.

MR. BACON: Good afternoon, Your Honor. Doug Bacon with Latham & Watkins for GE Capital. We spoke at the end of

yesterday's hearing and this morning and tendered a proposed stipulation and order that has been underway for about the last five days, about twenty hours a day. And Mr. Weiss, who had to depart but left his colleague here and his special counsel to the debtor, we have been successful in getting the creditors' committee's support, or lack of objection.

Mr. Mayer -- this is the stipulation that Mr. Mayer confirmed that indeed they're fine with and Treasury's counsel is not opposed to. And we -- this bears the signature of the debtors' special counsel and me as counsel for GE. Mr. Weiss explained it to some degree earlier. We can certainly go into more detail. There's a great deal of money involved and hundreds of millions of dollars' worth of equipment, which is why both sides have put a lot of energy into this.

We tendered this earlier today, Your Honor. And since then, the only change that has been made is to change the name of the purchaser. And I'm hoping Your Honor, under the circumstances, will just indulge us in interlineation.

THE COURT: I would if it weren't for the fact that it has to be electronically entered. I guess it can be scanned. Otherwise, if I could ask somebody to -- do you have a floppy disk with the underlying document?

MR. BACON: I can arrange to have that down here this afternoon, Your Honor.

THE COURT: Can you have it e-mailed to my chambers?

MR. BACON: Easily, Your Honor.

THE COURT: Okay. My law clerk can help you as to how to do that. And I'm glad -- it's just as well that a new one's coming, Mr. Bacon, because I think you did hand me up something, or did you?

UNIDENTIFIED SPEAKER: Yes.

MR. BACON: We did.

THE COURT: I don't know if you saw how much paper was on this thing just --

MR. BACON: I understand, Judge.

THE COURT: So e-mail it when it's finalized to the Gerber chambers. Charlie will give you the exact e-mail address. And on the transmission for the e-mail, note that this is the one that Gerber said that he would enter today. And we'll take care of it today.

MR. BACON: Thank you, Judge. Thank you very much. May I approach Charlie?

THE COURT: Yes.

MR. BACON: Thank you.

THE COURT: Who's on deck?

MR. DUETCHE: I think I am, Your Honor.

THE COURT: Sure. Come on up, please.

MR. DEUTSCHE: Good afternoon, Your Honor. Benjamin Deutsche, Schnader Harrison Segal & Lewis on behalf of New United Motor Manufacturing Corp., commonly referred to as

NUMMI. NUMMI is a joint venture between Toyota and GM. We had -- we received a notice to assume and assign. Based on the notice and based on the Web site, we simply can't tell what contracts GM is talking about. We're trying to work it out. I believe -- I thought -- I spoke to Mr. Smolinsky earlier. I thought we were going to have a stipulation, basically push this over, give the parties a chance to figure out which contracts they're talking about and then mark this down for something later in July.

THE COURT: I think Mr. Smolinsky's being pulled in more than one direction at the same time.

MR. SMOLINSKY: Your Honor, I believe we've been having communications with Foley & Lardner, who are representing Toyota in this matter. And we've agreed that we're going to work together to resolve all these contracts.

MR. DEUTSCHE: Yeah -- I represent NUMMI and, obviously, my clients instructed us to get resolution. I don't represent Toyota --

THE COURT: Who does Foley represent?

MR. DEUTSCHE: I believe the Toyota part of NUMMI.

THE COURT: And who are the agreements with?

MR. DEUTSCHE: I believe with NUMMI. But, yeah, I'm sure they're contracts --

MR. SMOLINSKY: We'd be happy to involve them in the discussions.

THE COURT: Yeah, why don't you just turn it into a three-way conversation so nobody's toes get stepped on.

MR. SMOLINSKY: Certainly makes sense, Your Honor.

THE COURT: Okay.

MR. DEUTSCHE: Thank you, Your Honor.

THE COURT: All right.

MR. QUIGLEY: Good afternoon, Your Honor. Sean Quigley from Lowenstein Sandler on behalf of Group 1 Automotive Inc., a company owning approximately seven dealerships in Texas. Your Honor, we filed a limited cure objection. Subsequently, however, we recently learned from the debtors that the Group 1 dealers were sent either participation agreements or wind-down agreements. Certainly, we don't object to the sale, Your Honor, but --

THE COURT: Some have one type and some got the other?

MR. QUIGLEY: Correct, Judge. Certainly, we don't object to the sale, but to the extent there are any cure amounts or other payments due under these agreements, we simply want to reserve our rights.

THE COURT: Okay.

Would it help, folks, if I said that, unless there's some reason why I shouldn't, Mr. Smolinsky or Mr. Schwartz, that everybody who wants a reservation of rights on this stuff can have it? Or is it more complicated than that?

Got an affirmative nod from the government.

Mr. Smolinsky, that's okay with you too?

MR. SMOLINSKY: We have no problem, Your Honor.

THE COURT: Okay, good. So anybody who wants to just take a reservation of rights doesn't have to, unless they want to. You certainly have one, Mr. Quigley.

MR. QUIGLEY: Thank you, Judge.

THE COURT: Mr. Sullivan?

MR. SULLIVAN: Thank you, Your Honor. James Sullivan of Arent Fox, counsel for the Timken Company and Superior Industries International Inc. Two things, Your Honor. First, I had some communications with counsel for the debtor. We were able to get the debtor to agree to some language added to the sale order, and that's the reason why I didn't come up and actually argue anything. Assuming that the language of the sale order remains as has been represented to us, we would not be pursuing any objection. I just wanted to reserve our right to perhaps send -- or comment on the form of order that is finally submitted to Your Honor.

THE COURT: That's a big problem, Mr. Sullivan. You better get your comments in on the form of the order before the proposed form of order is sent to me, because I can't have hundreds of parties waiting for somebody to comment on the form of the order.

MR. SULLIVAN: Your Honor, as far as I know, I think

the changes have already been included, although I've not been able -- counsel for the debtor has not been willing to circulate the current form of order to all the parties.

THE COURT: I would agree upon the language, Mr. Sullivan, but I think I made my position on that clear.

MR. SULLIVAN: Okay, I'll discuss it with counsel for GM.

THE COURT: Okay.

MR. SULLIVAN: The second thing, I just wanted to correct something. I think Mr. Smolinsky made a comment on the record about the Timken Company, about the ADR procedure. I don't believe that they've opted out of that procedure. I believe that they are in fact -- agreed to that procedure. So I don't think that needs any further comment.

MR. SMOLINSKY: Your Honor, I think I said that the 3 parties that have not agreed to the ADR are subject to separate stipulations from the 120 that did.

THE COURT: Okay. All right. Thank you.

Next.

MR. BEELER: Good afternoon. Martin Beeler of Covington & Burling, on behalf of Union Pacific.

THE COURT: Okay, Mr. Beeler.

MR. BEELER: Union Pacific provides rail transportation services to the debtors under various executory contracts. We filed a limited objection to the sale, noncure

or adequate assurance-related limited objection, for the avoidance of doubt, simply seeking language in the sale order clarifying the setoff and recoupment rights of nondebtor executory contract parties for nonassumed and assigned contracts, similar to language that was included in the Chrysler order for the same purpose.

And our understanding of the MPA is that receivables related to those nonassigned contracts would stay with the debtors and, consequently, setoff and recoupment rights would be unimpaired. In discussion with debtors' counsel and in reviewing the MPA provisions with debtors' counsel, we are confirmed in that understanding and prepared to withdraw the objection.

THE COURT: Okay. Pause, please, Mr. Beeler.

Mr. Smolinsky?

MR. SMOLINSKY: Your Honor, I just wanted to be clear on this. I reviewed the language in the Chrysler order. Frankly, I really didn't understand it but -- on this point, but what the MPA says, and I'm only paraphrasing, is that receivables related to excluded assets, assets which aren't going to NewCo, are excluded assets themselves. And so I asked counsel to simply rely on that language. I didn't want to paraphrase it in the order or change the subject matter of the contract by adding language to the order.

But I think that he has reviewed the contract and is

now comfortable that the contract protects his client's rights.

THE COURT: All right.

Anything further, Mr. Beeler?

MR. BEELER: No, that's fair enough.

THE COURT: Okay, good.

MR. BEELER: Thank you.

THE COURT: Mr. Brozman?

MR. BROZMAN: Thank you, Your Honor, and good afternoon. Andrew Brozman, Clifford Chance, for the Royal Bank of Scotland, ABN AMRO and RBS Citizens. Your Honor, the agreement that I think we've arrived at with the debtors involves a structured lease transaction for the supply of energy to the Lordstown, Ohio plant. The record should note the exact contracts that the debtors have agreed to assume and assign, since the Web sites did not correctly list them and I'd like to be clear on that. There is a lease dated July 17, 2003 between ICX Corporation, which is an affiliate of RBS Citizens, as assignee of Kensington Capital Corp. and General Motors. There is a tripartite agreement of the same date among Lordstown Energy LLC, ICX, again as assignee of Kensington, and General Motors, together with the two sets of schedules pertinent thereto.

We have agreed to the assumption and the assignment. There is no dispute, to my knowledge, raised by the debtor with respect to cure amounts, if any. And the debtors, since this

is a structured lease transaction, have agreed with us to grant us further assurances in the filing of safe harbor documents in connection with the transfer of the assets.

And I think that accurately states our agreement, and I appreciate Your Honor's time.

THE COURT: Okay.

Mr. Smolinsky, do you need to be heard on what Mr. Brozman just said?

MR. SMOLINSKY: I agree, Your Honor.

THE COURT: Okay. Fair enough.

Who's next? Ms. Taylor?

MS. TAYLOR: Yes. Judge, I just wanted to report back -- Susan Taylor from the Attorney General's Office -- that we accept Your Honor's offer for a reservation of rights. And I want it to be clear that New York's objection had two parts: the part we discussed this morning, and it appears that acceptable language may be being inserted in the final order. But I don't currently have authority from my client to withdraw our objection to that portion.

And in addition, in our papers we submitted we have a successor liability -- part of our argument turns on successor liability. That part we didn't argue because it has been very competently argued. And I just wanted to be clear that we are not withdrawing the objection as to that portion either and it is now before the Court.

THE COURT: Okay.

MS. TAYLOR: Thank you very much.

THE COURT: Thank you.

Did I take care of everybody?

Mr. Bromley?

MR. BROMLEY: Your Honor, James Bromley of Cleary Gottlieb on behalf of the UAW. This is not with respect to an objection by any stretch; this is just a cleanup from earlier. I had not realized that when we were submitting our designations with respect to depositions that we also needed to submit marked copies separately to the Court. So I just have them here. We submitted them online before noon, but we have the marked ones here, so I'd like to just hand them up.

THE COURT: That's not a problem. You can give them to Charlie.

MR. BROMLEY: Thank you very much.

THE COURT: I appreciate that.

Okay, to what extent do we have anything else, folks? All right, I think -- I thought we were done but I see some folks have now come back into the courtroom.

MR. SMOLINSKY: Your Honor, just -- I'm not sure I said it, so I wanted to make clear on the record. There have been a number of objections that have been filed since we filed our last reply. We would propose to just carry those along with all the others until the holding date, July --

THE COURT: These are executory contract objections?

MR. SMOLINSKY: Cure objections, sorry.

THE COURT: Cure? Okay.

MR. SMOLINSKY: Thank you.

MR. KANZA: Good afternoon, Your Honor. Ken Kansa of Sidley Austin on behalf of the TPC lender group. We have agreed language for the order with the debtors and the purchaser that resolves the TPC lenders' objections. And so on reliance on that language, we withdraw the objection.

THE COURT: Okay.

Anybody else?

Going once. All right, I see no response.

MR. SMOLINSKY: Your Honor, we've been working on a term sheet for a resolution of the Michigan workers' compensation issues. I think everyone is agreed in principle. We just revised the term sheet over at Kinko's. And we would just need everyone to sign off, but we think that everyone is in agreement on the terms.

MS. PRZEKOP-SHAW: Good afternoon, Your Honor. My name is Susan Przekop-Shaw. I'm an assistant attorney general for the state of Michigan.

THE COURT: Forgive me again. You're last name, please?

MS. PRZEKOP-SHAW: Przekop-Shaw.

THE COURT: Okay.

MS. PRZEKOP-SHAW: It's spelled P as in Peter, R-Z-E-K-O-P, hyphen, S-H-A-W. On behalf of -- I'm here on behalf of the Attorney General of Michigan, Mike Cox, who represents the Michigan Workers' Compensation Agency and the Funds Administration. And we were compelled to file an objection in this matter to resolve the issue of New -- NGMCO's ongoing workers' compensation obligations in Michigan. And as promised by NGMCO's counsel yesterday, negotiations were held between the State of Michigan and, in fact, they were pursued by the Treasury in regards to resolving this workers' compensation issue. And these discussions culminated in the terms that were necessary for the Michigan Workers' Compensation Agency director to grant NGMCO self-insured status as an employer in Michigan when it begins its operations.

What's left is that there's -- as Mr. Smolinsky indicated, that there's ongoing steps being taken to incorporate those terms into a binding agreement that the appropriate parties, after they are identified, can sign on behalf of NGMCO.

The representation was made today that such an agreement will be finalized and signed at the end of today. And on that basis, we feel that that addresses a major concern for Michigan, who really wants to have a seamless transition for GMCO to come into there.

There were several other legal issues that were

presented based upon the proposed order that was filed. Paragraph 52 on the new one that Ms. Cordry worked with on behalf -- with counsel to culminate in has a paragraph that discusses NGMCO's assumption of these workers' compensation obligations. And we have been advised by Old GM's counsel that they will appropriately amend the master sale and purchase order to reflect that provision.

And we also observed that proposed order paragraph 41, which was dealing with preventing a state to essentially implement its statutory and regulatory system, that this provision will not apply if there's a stipulation on the record that it will not apply to the circumstances. And here, the Michigan Workers' Compensation Agency --

THE COURT: Time out. What do you mean by that, that if there's an individual stip it'll trump the moot stip?

MS. PRZEKOP-SHAW: From my understanding of paragraph 41, as provided, that effective upon the closing and except as may be otherwise provided by stipulation filed with or announced to the Court with respect to a specific matter, that that provision would -- and the following terms would not apply. And in regards to that provision, Michigan Workers' Compensation Agency and the Funds Administration, in order to operate its regulatory scheme and enforce the self-insured process in Michigan, will need to have that stipulation made on the record, and I understand counsel are prepared to do so

today.

MR. SMOLINSKY: Your Honor, I think the agreement, with respect to paragraph 41, and just to make sure that we're all clear, is that the stipulation that we're entering into allows the Workers' Compensation Board to do their business, to actually take the permit, the application that's proposed to them, to make sure they have all the documents available and to grant their license and then to regulate New GM going forward. And so the agreement that we reached is that that paragraph will not interfere with the Workers' Compensation Board exercising their regulatory duties.

Is that accurate?

MS. PRZEKOP-SHAW: In regard -- yes.

In that regards, to its ongoing regulatory obligations to meet the Workers' Compensation Agency's -- the acts requirements and the rules that apply to that.

THE COURT: Mr. Jones, you heading up?

MR. JONES: Yep. Yes, Your Honor. Thank you, Your Honor. I just need to note, the Treasury fully agrees to the agreement as -- with the agreement as described. I just do need to note for everyone that the signatory we need for the actual stipulation may not be available today, although we're trying to get that person. Failing that, we expect the person to sign tomorrow.

THE COURT: Okay.

MR. JONES: Thank you.

THE COURT: All right -- I'm sorry, go ahead.

MS. PRZEKOP-SHAW: No, thank you.

THE COURT: Thank you.

Mr. Schmidt?

MR. SCHMIDT: Yes, Your Honor. And I apologize, one point harking back to the TPC matter that you heard a few minutes ago. I just received a note from one of my colleagues that we hadn't seen that language in the order yet, and we'd just like to take a few minutes to look at it.

THE COURT: Okay. Can somebody get the creditors' committee the language they need to satisfy themselves?

MR. SCHMIDT: Thank you, Your Honor.

THE COURT: Sure.

All right, what else do we have, folks?

Mr. Karotkin?

MR. KAROTKIN: Your Honor, I think, as to the sale motion, there is nothing else, unless I'm mistaken.

THE COURT: I have one or two things. I'm not going to prejudge the motion. But I gather you have been, and may even now still be, doing a lot of work on the order that you would want me to enter, if I approved it, which, among other things, requires you to implement a lot of understandings that you have been working on even up to this minute. Am I correct in assuming that there is going to be a revised proposed order

that's going to be sent to my chambers sometime when you've been able to embody all of your deals, Mr. --

MR. KAROTKIN: Yes, sir.

THE COURT: Do you have some sense as to how long it's going to take you to -- believe me, you don't have to worry about it not getting here in time if it's going to take more than twenty-four hours, but -- or even more, but what's your sense as to how long it's going to take you to embody all of your stuff so that something comes to me?

MR. KAROTKIN: I think, actually, we've made a lot of progress. It's our intention to go back tonight, revise it, circulate it to the parties this evening and hopefully get their comments tomorrow morning, and hopefully get it to you either sometime tomorrow night or Saturday, if that's fine with you.

THE COURT: Yeah, that'll be fine.

Now, to what extent do parties have transcripts -- paper transcripts of the last three days?

MR. KAROTKIN: Excuse me, sir.

(Pause)

MR. KAROTKIN: We only have June 30 in the afternoon. There was the problem in the morning with the microphones. We don't have the other two days, but we're arranging to get those as soon as possible.

THE COURT: Those have been ordered?

MR. KAROTKIN: Yes.

Have they been ordered?

Yes.

THE COURT: On expedited --

MR. KAROTKIN: Yes, sir.

THE COURT: -- request? Okay. As soon as you or any of your colleagues -- by that I mean the Treasury, creditors' committee, other parties-in-interest, anybody gets them, I would like to have them e-mailed to the chambers e-mail address.

MR. KAROTKIN: Yes, sir.

THE COURT: All right. I think that takes care of the housekeeping matters I had, Mr. Karotkin. Do you have other stuff?

MR. KAROTKIN: There are two other items on the calendar for this afternoon.

THE COURT: Go ahead.

MR. KAROTKIN: I believe the first item, Your Honor, relates to a motion by the debtors seeking authority and approval of certain settlement with four different unions. This was noticed on shortened time pursuant to an order of your court.

This motion, Your Honor, involves a settlement with four of what, over the last few days, you've come to know as the splinter unions. They --

THE COURT: These are both non-UAW and --

MR. KAROTKIN: Non-I --

THE COURT: -- nonobjecting unions, or at least for not presently objecting unions, not the IUE steelworkers, and I forgot the third.

MR. KAROTKIN: Correct. That's correct. They encompass about 1,050 retirees and 150 active employees. There are four different settlement agreements annexed to the motion, each of which is substantially identical. And they basically provide, Your Honor, that the unions, as the 1114 representative of the covered groups, as defined in the settlement agreements, have agreed to the retiree -- the modified retiree benefits that, again, you heard about over the last few days, of the same nature that were offered to salaried employees and the same that were offered to the objecting parties as well.

But these four unions have agreed to that. Two of the unions have -- that have the active employees have also -- the debtor has also agreed to modify collective bargaining agreements with those two unions. And all of this is conditioned on approval and consummation of the sale.

And, again, like the UAW, in connection with each of these agreements, they've agreed to waive their claims for the retiree health and life benefits as against the debtor company.

THE COURT: Okay.

Any desire from the creditors' committee to be heard on this?

All right.

MR. KAROTKIN: Now, if I --

THE COURT: Normally -- I think the deadline for objections has passed, but considering the short notice, is there anybody who wants to be heard in the way of objection to that settlement?

Record will reflect no response.

MR. KAROTKIN: If I could interrupt for one second?

THE COURT: Yes.

MR. KAROTKIN: I'm sorry. If Your Honor's inclined to grant the relief in the motion, I would suggest that -- we don't have a proposed form of order with us. It was -- the form that we had was incorrect in a few respects, and we haven't had time to change it. My suggestion is if we could send it down to chambers over the next day or so.

THE COURT: I'm going to approve the motion, and your mechanics are okay with me, Mr. Karotkin. When you do that, I want your -- either your letter transmittal or your e-mail message accompanying any attached proposed order to be able to give me a representation of counsel for all of the objected unions and the creditors' committee and the U.S. government are satisfied with the form of the order as consistent with reflecting the deal as everybody understands it to be.

MR. KAROTKIN: Very well, sir.

THE COURT: Okay. Thank you.

What else do we have?

MR. KAROTKIN: The other item on the calendar is the approval of the wind-down facility. Now, I think that, based on the current state of play and all the negotiations that, again, you heard about earlier today with respect to that facility, I think the current state we're in right now is that the document is still in somewhat of a state of flux, although there is an agreement in principle as to the terms and provisions of the wind-down facility. Of course, the amount of the wind-down facility, as Your Honor heard this morning, would be 1.175 billion dollars.

I think all of the substantive terms have been agreed to. The document has not yet been finalized. We do have a proposed order that we will be in a position to submit later today or early tomorrow, which, as I understand it -- the terms of which have been substantially agreed to by both the debtors, the U.S. Treasury, the creditors' committee and the Paul Weiss firm representing the ad hoc committee of bondholders.

I don't -- there was some suggestion, Your Honor, that if we could take a short recess, perhaps we might even have a form of document down here. But --

THE COURT: That's not necessarily a problem, but before we get that far, I want to give Treasury and especially

the creditors' committee a chance to be heard if either of them wants to be.

Ms. Caton?

MS. CATON: Good afternoon, Your Honor. Amy Caton from Kramer Levin Naftalis & Frankel, on behalf of the creditors' committee. The wind-down credit facility has been a -- the product of a lot of negotiation by the creditors' committee. This is a very important document to us because it's going to govern how these estates run after the sale closes.

I believe we are satisfied largely with the resolution on the credit facility and the loan that Treasury is making. And there are a few nits that we still had to the credit agreement, but I think those will be worked out.

The one substantive comment that we have to the form of order that we're still trying to work out is corporate governance and how Old GM will be governed after the sale closes and the board leaves. I believe we have a proposal right now on the table, which is that two -- there will be a five-member board, two members of which will be proposed by the creditors' committee, nominated by the creditors' committee, and basically go through the same board approval.

THE COURT: Time out, Ms. Caton.

MS. CATON: Yes.

THE COURT: Is this an evolution since what I heard

this morning on that? I thought I heard of a three-person board, and now it sounds like it's up to five.

MS. CATON: Yes. Yes, Your Honor, it is.

MR. ECKSTEIN: There has been developments --

THE COURT: Evolution.

MR. ECKSTEIN: There has been evolution. A lot of parties have been put into this issue, and we have been trying to deal with changes as they've been evolving.

THE COURT: I understand. Okay.

MS. CATON: I apologize. I forgot about the representations that were made this morning.

THE COURT: No, that's fine. I am really trying to pay attention to what people tell me.

MS. CATON: That's good. That proves -- that definitely shows you're paying attention.

THE COURT: Is this like the guy who gets credit for having given another litigant an idea, or --

MS. CATON: Your Honor, I believe that the proposal on the table is acceptable to the creditors' committee and Weil, but we still need -- and the debtors, but we still need Treasury's acceptance of that, and that's what we're waiting on.

With that, I believe that we'll be prepared to have the order entered. And if Your Honor has any questions about the credit facility, we or Weil or anyone is happy to answer

them.

THE COURT: Well, I understand it in general terms. I'm sure I don't have the detailed understanding that the parties do, but certainly the concepts are fine with me.

Okay, anything else from your perspective, Ms. Caton?

MS. CATON: No, Your Honor.

THE COURT: Okay, Mr. Schwartz or Mr. Jones, either of you want to comment?

MR. SCHWARTZ: Not particularly. I think that was an accurate description in that we were comfortable with what was announced this morning. There have since been some proposals that we're working through, as well as the form of the order.

THE COURT: All right.

Mr. Karotkin, I'm not going anywhere this afternoon, but I'm not sure, from what I heard, whether you're going to have an order that's ready for me anytime that quickly.

MR. KAROTKIN: You read my mind. It's kind of like what you say. I suggest, Your Honor, since everyone pretty much has agreed on the substance, that rather than sticking around, we'd just submit an order to Your Honor after we've circulated it.

THE COURT: That's agreeable. And the drill is going to be the same. When I get it sent to me, I need a representation from whoever's sending it to me that it's been run past the people who are the principal ones who need to be

heard on it; I think that's Treasury and creditors' committee and the estate and Canada.

UNIDENTIFIED SPEAKER: Yes, Your Honor.

THE COURT: Right.

Okay. Mr. Schein, are your folks putting money in this deal too?

MR. SCHEIN: Your Honor, Canada is not actually funding this. But since it does change the rights of the existing DIP facility, it's conditioned upon certain provisions allowing the closing to happen. That's why we are concerned.

THE COURT: Sure.

Okay. Mr. Rosenberg?

MR. ROSENBERG: Good afternoon, Your Honor. Andrew Rosenberg, Paul, Weiss, Rifkind, Wharton & Garrison, on behalf of the ad hoc bondholders. I did -- actually, I think I was the second person or so to speak the first day. I didn't intend to be just the last person to speak on the last day, but I guess that's the way -- I just wanted to mention that when Your Honor was mentioning who needed to be served or passed by in terms of the documents, the Paul Weiss firm obviously has also been involved in looking at the sale order and the DIP order and the credit agreement. We just want to make sure also that we're staying in the loop and are going to see all drafts of those documents.

THE COURT: By all means.

Okay, Mr. Karotkin, I'm going to look to you to focus more than I focused on who needs to look at the paper you send me.

MR. KAROTKIN: Yes, sir.

THE COURT: And if you can give me a representation both that you've gotten the okays and that you've consulted everybody who has expressed the interest or need to be consulted, that'll be good enough for me.

MR. SMOLINSKY: Thank you, sir.

THE COURT: Okay.

And to what extent do we have anything else?

All right, I think we're done.

And you can get me your proposed orders by e-mail. I'm going to ask Mr. Pollack, Charlie, to hang around in case anybody needs details of e-mail addresses and things of that sort.

We're adjourned. Thank you.

MR. SMOLINSKY: Thank you, sir.

(Proceedings concluded at 3:57 PM)

P R O C E E D I N G S

THE COURT: Good morning. Have seats, everybody. Before we begin, I want to make some apologies to you. It wasn't practical to move to another courthouse with a bigger courtroom and better air conditioning. I'm told that our amplification system is overloaded, is overheated. I'll try to keep my voice up until we can get the amplification system fixed.

As far as the temperature goes, you all have permission, if you need it, to take off your suits -- your suit coats. You can take off your ties, for that matter. Anything you want to do to help make yourself more comfortable under these circumstances is fine with me.

ALL: We can't hear you, Your Honor.

THE COURT: Can you hear me now?

ALL: A little better.

THE COURT: Well, I don't mind raising my voice a little but I'm kind of screaming now. Can you hear me in the back at all?

ALL: No, Your Honor.

THE COURT: All right. Then we're going to have to take a recess until we can get this straightened up.

(Recess from 10:09 a.m. until 10:59 a.m.)

THE COURT: All right, folks. Have seats, please. I'm sorry. I don't know how many courts are typically capable

of handling a case with the needs of this one that would jog with a 100 year old building. Let's get to work.

With so many people appearing about so many things, we're going to have to establish some orderly procedures. So here's what we're going to do. If anybody sees the need to do the lease rejection motion, he can do it. He can have about five minutes or less. If counsel really wants to be heard on that, he's going to have to address my decision in Ames Department Stores. Is he here -- she here? Okay. Back then I ruled -- it's a written decision; I assume you have a copy -- that compliance with broom-clean and cleanup obligations can't be an impediment to exercising the rights to reject under 365. And that would seemingly be dispositive of this motion. But if there's something that you want to say to show me that I got it wrong back when I decided Ames Department Stores, I'll give you that opportunity.

Turning to the main issues, folks, from everything I've read, I understand the issues. And I don't want openings. They're not necessary. With everyone who has filed papers, if we had openings, we'd be here forever. We will, of course, have appropriate opportunity for summation and argument at the end of the evidentiary phase of the hearing, subject to the requirements for coordination and limits to avoid duplication that I'll discuss.

I do, however, want to hear from you, Mr. Miller, or

your designee as to how issues have been narrowed or eliminated since I got all of those briefs. And if you can speak to that after my preliminary remarks, that would be helpful.

I am also going to want, at some point, and I'll take your recommendations as to the best time, for objectors on successor liability issues, which are the main issues in this case, and of the debtor, to give me one-page submissions as to their understanding as to which of the successor liability issues remain and which have been eliminated. I want to know the extent to which modifications in the purchase agreement or otherwise have made successor liability issues go away and which of them still remain matters of concern to parties.

Okay. Then we're going to get the evidentiary record buttoned up. I'm going to take evidentiary objections first from anybody who wants to raise them. We're then going to take the cross and, of course, any applicable redirect and the like from the movant witnesses. If there's any adverse direct of any of those witnesses, and I sense from your pretrial submissions that there may be, it's my view subject to parties' rights to be heard that we should deal with it then so I won't have to make witnesses bounce up and down and to go through this stuff more than once. Then, likewise, we'll have cross of any objector witnesses, rebuttal witnesses, if any, then summation and argument. More about that in a minute.

I didn't receive any designations of deposition

testimony or, if I did, I don't know about it. Normally, I get them a few days before. But I understand how hard you folks have been working and it's possible that you folks were working right through the weekend or even yesterday to do depositions. Subject to your rights to be heard, my thought is that if anybody wants to designate any deposition testimony, he or she should do it by noon tomorrow with twenty-four hours for the debtors to submit any Rule 32 counterdesignations. If anybody thinks that's not a workable course here, I'll hear discussion on that.

Oral argument. I can't blame anybody, especially since you were obligated to put in your objections at the same time. But the objecting briefs make many similar points over and over again. As we've done in all of my other huge cases where there were many, many parties who would be aligned in interest in making the same points, we have to have some coordination. After first hearing from the debtors and the debtors' allies and their advocates for the motion, which are to be likewise coordinated to avoid duplication, with the debtors speaking first unless the debtor has a different view, I'll first take oral argument from one representative each of the following objector or limited objector groups: first, the creditors' committee to the extent it's an objector; next, the dissenting bondholders. Mr. Richman, you or your folks; Center for Auto Safety or another representative for tort claimants;

asbestos litigants; AGs; dealers; non-agreeing unions; nonunion retirees.

If issues are still outstanding and argument is really necessary, I'll take brief, very brief argument, from lienholders, taxing authorities and the County of Wayne.

I won't take oral argument from shareholders, workers' comp objectors or any objectors other than the County of Wayne expressing concerns as to decisions as to whether or not to close down particular plants.

Other parties in the classes I've described are to coordinate with their group advocate and won't separately be heard except on issues that weren't addressed at all to come back and be -- or whether there's a conflict of interest between the various objectors. Remember, folks, I have the briefs.

If the U.S. trustee or the indenture trustees wish to be heard, they can be heard any time they choose. And as I said, the U.S. government, PBGC, the UAW and other supporting unions -- supporting bondholders and others supporting the motion should coordinate with the debtors. But if they have points to make after the debtors have been heard then we're going to give them that opportunity.

Cross-examination. Cross-examination is going to be heard in the same coordinated fashion that I discussed with respect to argument with the objector representatives that I

noted being heard first. So, by way of example, we would start with the creditors' committee, then Mr. Richman and move on from there.

After that, others feeling the need to cross will have that chance but subject to other parties' rights to raise asked and answered objections and my inherent power to control my courtroom and avoid duplicative questioning. Actually, that principle will be applicable throughout. I hope that we won't have the need to raise a lot of asked and answered objections but if I have to rule on them, I will.

Next: briefs. Folks, I understand people worked hard on their briefs. But there was much too much in the way of failures to comply with the requirements of the case management order whose purpose is to help me understand briefs when -- if you put them all together, they're almost two feet high; failures to highlight defined terms so I've got to go back and make sure that you're talking about the things that I think you're talking about; and especially failures to give me tables of authorities and tables of contents make it much, much harder for me to do my job and for me to help you all. You know, I won't embarrass any particular constituency in the courtroom but when I get a sixty-one page brief without a table of authorities or a table of contents, how am I supposed to compare your discussion of TWA with the debtors or on Fairchild Aviation or of White Motor?

So, it's tough on me when you do that, folks, and -- now I don't have a page limit on briefs and I feel like no good deed goes unpunished. So the people who failed to comply with the requirements for tables of authorities and tables of contents have now until noon tomorrow to give it to me. You don't have to give me new briefs. I'm not going to strike your briefs. I'm not going to make you comply with the other respects in which you were deficient. But you're going to give me those tables of authorities because when this is done, I'm going to be going back to put your discussion of the TWAs and the other cases that are relevant to this against the debtors. And we're going to see who's right and who's wrong. But I can't do that unless you help me out, folks.

All right. Fair enough. On the listing of the issues that remain or are resolved on the successor liability issues, there should be lists or bullet points, one page hopefully per constituency and they're not to include federal argument. I just need to know what's open and what isn't.

Okay. With that said, I think it's time to hear from you, Mr. Miller.

MR. MILLER: Good morning, Your Honor. Harvey Miller, Weil Gotshal & Manges, on behalf of the debtors. In response to your question, Your Honor, as to what has been changed since June 1, as Your Honor noted, the weekend and yesterday were really devoted to depositions. They went on

through Saturday, Sunday and Monday. So there was little opportunity, Your Honor, to try and reach conclusions as to open issues. There are two areas in which there has been progress. On the product liability side, Your Honor, in respect of product liability claims arising from expressed warranties in connection with accidents from products, anything -- any accident that occurs after the closing date, Your Honor, irrespective of when the vehicle was manufactured and sold, will be assumed by the purchaser, now New General Motors Corporation. Product liability claims that may arise subsequent to the commencement of the Chapter 11 case and up through the closing to the extent they're triggered by an accident, those, Your Honor, should be administrative expense claims. So there is a major concession on the part of the purchaser, Your Honor, with respect to that type of claims.

There hasn't been any progress, Your Honor, in respect of the asbestos claimants as to future asbestos claimants and existing asbestos claimants so that those claims, under the proposal, Your Honor, would remain with Old GM.

Other tort claims, other than what I've already explained, Your Honor, would remain with Old GM. In connection with what we refer to, Your Honor, as the splinter unions and the contention made by the splinter unions led by the IUE that the treatment which may be afforded to those claimants, retirees, those will be claims against the old company. There

are no active employees of IUE or these other splinter unions that will be working for the new company. And the purchaser has exhibited no desire to assume any of those liabilities, Your Honor.

There has been an amended and restated master sales and purchase agreement which was filed on Friday, Your Honor. It is also on the website. It makes a number of changes, not many substantive changes at all, Your Honor. And we have copies here for anybody who's interested in it.

That, essentially, Your Honor, is where we stand today. The motion is as it was filed with these exceptions. And what we would propose to do, Your Honor -- one exception, Your Honor. There has been some issue raised in connection with the loan and security agreement with the United States government that was entered into on December 31, 2008. And we would like to offer that -- that was not, I think, on our original exhibit list. And we would like to offer that into evidence as part of the debtors' direct case. With the schedules that are attached to that loan and security agreement.

MR. SCHWARTZ: It's on the exhibit list.

THE COURT: Oh, it's on the exhibit list, Your Honor, but the schedules weren't there. And these are the schedules that are attached to it.

THE COURT: So the basic agreement is but the

schedules to it aren't?

MR. MILLER: Yes.

THE COURT: Okay. Any objection? Hearing none, that's admitted.

(Loan and security agreement between GM and U.S. government dated 12/31/08, was hereby received into evidence as of this date.)

MR. MILLER: And we would offer as the debtors' direct case, Your Honor, the declarations or affidavits of Mr. Henderson, the first day affidavit and the supplement to that; the declaration of Mr. Repko; and the declaration or affidavit of Mr. Worth and Mr. Koch. And in the amended evidence and witness list which was submitted to the Court, we had listed, Your Honor, Exhibits 1 through 16 in support of those declarations and affidavits. And to anybody that doesn't have a copy, Your Honor, we have additional binders with all of these documents.

THE COURT: All right. Fair enough. Any evidentiary objections? Mr. Richman?

MR. RICHMAN: Your Honor --

THE COURT: I think you need to come to one microphone or another, Mr. Richman.

MR. RICHMAN: There are two -- and we're trying also, Your Honor -- Michael Richman for the -- Patton Brogs for the family and dissenting GM bondholders -- to try to narrow the

issues and the focus to be as constructive as possible. And the issues that are the most important to us that are what we believe to be the fulcrum of the hearings are the Lionel factors of the debtors' business judgment; related to that, the expressed need for urgency; and tied into that, the effect which the bankruptcy case has on the value of the enterprise. And I say that to create focus and not to waive any of the other factors or issues. And I also don't want to argue extensively; I'm mindful that the time is limited. But as to those issues, we believe that witness credibility is very, very important. And that Your Honor should see and hear the witnesses on those issues that we should be able to see and hear them and be able to cross-examine what the witnesses actually say as distinct from what the declarations have been written to say.

So, to the limited extent of any of the declarations providing evidence on those issues, we object and we would request that there be live direct examination. Thank you, Your Honor.

THE COURT: All right. Mr. Miller?

MR. MILLER: Your Honor, I've read --

THE COURT: My message to you -- I was going to surprise you. It sounds to me I'm too loud. And, folks, including me, and I'll comply, please move back from the microphones for the benefit of the people in the other rooms.

MR. MILLER: Your Honor --

THE COURT: Go ahead, Mr. Miller.

MR. MILLER: I have read Your Honor's case management order very carefully. And Your Honor's order really states -- too loud?

THE COURT: As much as I'd like to avoid excessive sound to the others, I think it's more important that people in the courtroom and me hear what you have to say and that you guys hear what I have to say. So, this close, Mr. Miller, speak so people in the back can hear.

MR. MILLER: I'm saying, Your Honor, that I read your case management order carefully and your case management order clearly enunciates that direct cases can be put into a declaration and affidavits. Mr. Henderson, Mr. Worth, Mr. Koch are all in the courtroom and can be cross-examined as to everything that is set forth in the affidavits and declarations, Your Honor. If we're going to move this process forward, that's the way to do it.

THE COURT: Okay.

MR. MILLER: I must add one other thing, Your Honor. I neglected to say there has been considerable advances made with respect to the tax claims by governmental entities. And we believe that that will be resolved before the end of this hearing, Your Honor.

THE COURT: Okay. Thank you. Mr. Richman --

MR. MILLER: If I may, Your Honor, add one more thing about the F&D dissidents bondholders committee. As Your Honor may recall, there was a motion made by the F&M dissident bondholders committee for the appointment of an additional bondholders committee. And at the time of argument, the U.S. trustee raised the issue as to the completeness of the Rule 2019 statement on behalf of the bondholders. And counsel said that there was no problem, they would file that 2019 statement subsequent to the hearing.

There was an indication or a suggestion during the hearing, Your Honor, that the three members of the F&M dissident bondholders committee were almost par-bias of GM bonds. Subsequent to the hearing, Your Honor, an amended 2019 statement was filed. And in that 2019 statement for these three members, one member who was actually buying bonds on June 1, 2009, the date of the filing of this petition, the cost of that bondholder per hundred dollars of value was two dollars. The other bond -- none of these bondholders, Your Honor, paid more than twenty dollars per hundred dollars of -- per thousand dollars of value of these bonds. These are three bondholders, Your Honor, who claim to represent family and dissident bondholders. But there are only three members. And every one of those three members, Your Honor, bought their bonds substantially below par and one significantly, significantly below par. So I would question, Your Honor, their motivation

and their standing in connection with this proceeding.

THE COURT: All right. I'm not going to make Mr. Richman respond on the issue of standing because the amount that these guys paid for their investments to make them bondholders still doesn't go to their rights under 1109 to appear and be heard in the case.

Practically everybody in this room knows that we get distressed debt investors all the time in this courthouse and other districts as well taking very active roles in these cases having bought their bonds or other investments at very distressed prices. So I'm overruling your objection to deny him standing. And I'll allow you or anyone else, subject to relevance considerations, to amplify on the points you made as we go forward.

I looked at his amended 2019 and I find it to be in compliance with what 2019 requires. So I don't need to deal with the issues of what I or any other judge would do if a 2019 failed to comply or if constituency failed to file a 2019 at all or gave a grossly insufficient one.

The underlying objection on the direct testimony affidavit is overruled. And I don't need to spend a lot of time on the reason. As Mr. Miller appropriately pointed out, my case management order provides for it. And it's the only ways guys like me can function in complex cases with a lot of numeric and statistical information, a lot of historic facts.

This is, of course, without your right, Mr. Richman, to pool on the credibility issues as much as you choose to on cross.

Although the objection was only focused at the movants' witnesses, the same applies to anybody else who gave their direct testimony affidavits or declarations going forward.

I sense that there may be a relevance objection to some of this splinter union affidavits. I'll deal with that. But that isn't an objection on whether the affidavits are admissible at all. The question is the relevance of what they say. All right. Are there -- yes, sir?

MR. JAKUBOWSKI: Yes, Your Honor.

THE COURT: Would you identify yourself for the record, please?

MR. JAKUBOWSKI: May I approach the podium?

THE COURT: Of course. But do me a favor. I intentionally didn't want everybody making a lot of appearances on the record. But when you first speak, folks, please identify yourself.

MR. JAKUBOWSKI: Thank you, Your Honor. My name is Steve Jakubowski. I'm here from Chicago and I very much appreciate your permitting me to appear in this case. I represent product liability claimants and I'm also joint counsel with the Center for Auto Safety --

THE COURT: Yes. I saw your submission, Mr.

Jakubowski.

MR. JAKUBOWSKI: -- and a number of consumer organizations.

The evidentiary issue that I'd like to bring to the Court's attention is the question of the exhibits and the documents that we would like to have -- to use for purposes of cross-examination of witnesses. Every one of the documents -- I have five particular documents that we've designated last night as exhibits that we would like to be able to present to Your Honor to deal with the limited issues of successor liability in the TWA case. And all of those are privileged -- or excuse me. All of those are highly confidential documents that are subject to an agreement among the parties between myself and the debtor and myself and Treasury regarding the ability to disclose them in court.

The debtors have raised an objection to relevance but the relevance objection came before my particular exhibits were designated. So what I would like to do is ask whether or not -- is to try to come up with some procedure as to how to be sure that the exhibits that I would like to present to the witnesses on cross-examination are appropriately held confidential but enough to be able to give you the information you need to be able to rule properly.

THE COURT: I need some help from you, Mr. Jakubowski. Without disclosing the confidential portion, can

you tell me the nature of the confidentiality concern?

MR. JAKUBOWSKI: Sure. Well, I'm not sure. It's their concern and we haven't really discussed --

THE COURT: Oh, is the debtor concerned --

MR. JAKUBOWSKI: It's the debtor's concern.

THE COURT: -- that you got the document subject to a confidentiality --

MR. JAKUBOWSKI: Correct, Your Honor.

THE COURT: Well, maybe I should give them a chance to be heard and give you a chance to respond if you need to.

MR. JAKUBOWSKI: Thank you, Your Honor.

THE COURT: The presumption, folks, is that in a hearing in a case of this type that's of fairly considerable public importance, I really do not want to have to close the courtroom or to deprive the public of access to this if there's any possible way to be avoided.

Let's see if we can flesh this out. Another possibility, Mr. Jakubowski, is that since, under my guidelines, I would be giving the creditors' committee and Mr. Richman the first opportunities to cross, is it helpful for me to suggest that you have a caucus with the movants in the next recess to see if you can work something out with them on giving you what you need to do or the ability to do what you need to do without impairing any commercial confidentiality concerns?

MR. JAKUBOWSKI: I would be happy to do that.

THE COURT: Mr. Miller, can I get your views, please?

MR. MILLER: I beg your pardon, Your Honor?

THE COURT: Can I get your views, please?

MR. MILLER: I -- Your Honor, this amended and restated witness list from Mr. Jakubowski came in at 2 a.m. this morning. I think Your Honor's suggestion is the appropriate suggestion. I think we need some time to talk with Mr. Jakubowski and see if there is some way that we can alleviate this problem.

THE COURT: Fair enough. Then let's get on with the cross. And, Mr. Jakubowski, if you would drop down a couple notches in the questioning order, that won't be a big deal and that way you guys can hopefully resolve it at this juncture.

MR. MILLER: And, Your Honor, I take it that what I described before is now moved into evidence?

THE COURT: Yes. It is so moved and admitted. (Declarations/affidavits of Mr. Henderson, Mr. Repko, Mr. Worth and Mr. Koch were hereby received into evidence as of this date.)

MR. MILLER: Thank you, Your Honor.

THE COURT: And you had a writing for me with that stuff in the other courtroom. But if you want to just give me an extra one now, that might be helpful.

MR. MILLER: May I approach, Your Honor?

THE COURT: Yes. Thank you.

MR BRESSLER: Your Honor, may I be heard before the Court?

THE COURT: Yes.

MR. MILLER: Excuse me just one moment. This is the amended and restated master exhibit list.

THE COURT: Okay. Good morning.

MR. BRESSLER: Good morning, Your Honor. Barry Bressler from Schnader Harrison. We're the ad hoc committee of consumer victims.

THE COURT: Pause, Mr. Bressler. Now, unless I read the briefs incorrectly, you have similar concerns to Mr. Jakubowski, don't you?

MR. BRESSLER: I wanted clarify where we do not. We represent 300 tort claimants not his five. We do have a similar concern as to 363. But we have raised two other objections on which we have deposed the witnesses: one is the sub rosa plan objection and the other is a bad faith objection not raised by the --

THE COURT: Purchaser bad faith?

MR. BRESSLER: Yes. And as to those, since Mr. Jakubowski did not have those objections, I would like to be heard for the consumers.

THE COURT: This is kind of what I was talking about, that overlap, folks, 'cause Mr. Richman made very similar points. I'm not going to rule in advance but this is exactly

the kind of thing where we need to avoid duplication. And whether you agree with Mr. Richman or disagree with Mr. Richman, nobody can suggest that he wasn't a capable advocate for the views that he advanced.

So I'm going to hear from Mr. Richman. And then when it's tort claimants' turn, I'm going to hear from Mr. Jakubowski or the Center for Auto Safety, which, I gather, is his ally on this, first. And then subject to what I ruled before, if Mr. Richman failed to make a point that you think he should have made or could have made, not made it badly but if he left out -- I don't think there's going to be a distinction because if he makes it, he's going to make it competently, I think you can assume, this willingness without prejudice to your rights to come up and say we could ask something else.

MR. BRESSLER: Thank you, Your Honor. We do not intend to duplicate.

THE COURT: Okay. Anything else? All right. Mr. Richman, do you have a preference as to who you cross-examine first?

MR. RICHMAN: Your Honor, Mr. Henderson. And my partner, Mark Salzberg, is going to be my designee for this purpose.

THE COURT: Okay. Mr. Salzberg was it?

MR. RICHMAN: Yes.

THE COURT: Thank you. Is Mr. Hen -- yes. Mr.

Henderson, could you come up to the witness box, please, and remain standing to be sworn by the operator.

(Witness duly sworn)

THE COURT: Have a seat, please, Mr. Henderson. Normally, I tell people to keep their voices up. In this situation, I don't know whether to do that or tell you the opposite. Why don't you try talking the way you feel like talking and if the people can't hear then raise your hands and hopefully it won't be too loud for the other people.

THE WITNESS: Thank you, Your Honor.

THE COURT: Mr. Salzberg, proceed.

MR. SALZBERG: Thank you, Your Honor.

CROSS-EXAMINATION

BY MR. SALZBERG:

Q. Good morning. Can you please state your name for the record?

A. My name is Frederick Henderson.

Q. And, Mr. Henderson, what is your present position?

A. I'm the president and chief executive officer of General Motors.

Q. And you became the president and CEO of General Motors on what date?

A. April 1st of this year.

Q. And prior to that, you were the chief operating officer, is that correct?

A. That's correct, sir.
Q. Okay. The U.S. Treasury extended certain loans to General Motors and certain of its affiliates on December 31, 2008, is that correct?
A. That's correct.
Q. And there were some loans extended in the months subsequent up until the petition date on June 1, 2009.
A. Also correct.
Q. Do you know what the amount of those loans were that were extended on December 31, 2008?
A. Four billion dollars.
Q. And at the time the four billion dollars was extended on December 31, 2008, was GM adequately capitalized?
A. No.
Q. Okay. Was it able to pay its debts as they become due -- as they came due, excuse me.
A. Without that loan, no.
Q. Okay. And at that time, were the assets of GM in excess of its liabilities?
A. Could you repeat the question, sir?
Q. Sure. At the time that the initial four billion dollars was extended on December 31, 2008, were GM's assets in excess of its liabilities?
A. No.
Q. Okay. And there were subsequent advances made in January,

February, March, April, May of 2009, correct?
A. That's correct.
Q. And is it fair to say that in each one of those instances, when those subsequent loans were extended, GM was not adequately capitalized?
A. That would be my opinion, yes.
Q. Okay. And GM was not able to pay its debts as it came due.
A. Without those draws, correct.
Q. Okay. And its liabilities exceeded its assets, is that correct?
A. Also correct.
Q. Okay. When GM first received the initial four billion dollars, how did GM intend to pay that four billion dollars back to the U.S. Treasury?
A. At the time, we were planning to develop -- we had plans to develop a viability plan which would restructure our business, restructure our business preferably outside of a bankruptcy court. And one key objective of that restructuring would be to repay the loans to the Treasury.
Q. So it was a question. GM was not sure it could pay the loans back in its restructured business, is that correct?
A. That's correct.
Q. And would the same be true at each time that the subsequent pre-petition loans were extended that GM was only

able to pay back those loans if it restructured its business?
A. Yes.
Q. And did that restructuring include converting the debt into equity?
A. Not initially. That was not initially the view, sir.
Q. And when did that become the plan?
A. In the second quarter of this year when we launched the bond exchange, one element of that was to equitize at least half of the loans that were provided by the Treasury prior to June 1st.
Q. Okay. So sometime in April or May of 2009, GM came to the conclusion that it could only pay back its loans to the U.S. Treasury or loans from the Treasury by at least partially equitizing those loans, is that correct?
A. When we launched the bond exchange, we felt that in order for us to proceed, and for the bondholders to consider their opinions that we needed to identify that as one of the conditions to the bond exchange. We felt it was important for that to happen in order for us to have an adequate capitalization.
Q. But just so I'm clear and so the record is clear, was it GM's belief that the only way it could satisfy -- it could pay back, at that point, the approximately seventeen billion dollars in pre-petition loans was that if some of those loans were converted to equity?

A. That was our judgment, yes.

Q. Okay. So would it be fair to say that since December 31, 2008, the United States Treasury had some sort of lev -- some type of leverage over General Motors?

A. Correct.

MR. MILLER: Objection to the form of the question, Your Honor.

THE COURT: Overruled.

Q. And when GM received the four billion dollar installment December of '08, was there any other source of funding for GM? Any other source of loans?

A. No.

Q. And since that time, from December of '08 until the petition date of June of '09, was there any other source of funding for GM?

A. For our U.S. operations, no.

Q. Okay. And under the loan agreement that was entered into between the debtor and the trustee -- I'm sorry, U.S. Treasury, excuse me -- was the U.S. Treasury able to call the loans if a viability plan was not proposed by GM which was sufficient in its view?

A. Yes.

Q. So at any time from December of '08 through June 2009 when the bankruptcy was filed, U.S. Treasury could have said these loans are payable now, immediately due because GM has not

proposed a viability plan which we find acceptable?

A. Yes.

Q. Now your predecessor CEO was Richard Wagoner, is that correct?

A. Yes.

Q. And he resigned sometime around April 1st, I guess, 2009, is that correct?

A. Correct.

Q. What were the circumstances surrounding --

MR. RICHMAN: Well, let me rephrase that. Excuse me.

Q. How did Mr. Wagoner come to resign as CEO of GM?

A. We were asked to come to Washington and review with the automotive task force their preliminary results of our viability plan that was submitted on February 17th. That was a Friday. I believe it was March 27th but it was the Friday of that week. Whether -- I'm not sure if it was exactly the 27th.

At that meeting, the head of the automotive task force, Steve Rattner, asked to see Rick Wagoner in advance in a one on one meeting. And at that meeting, he asked Rick to step down.

Q. So Mr. Rattner asked the CEO of GM to step down?

A. I was not at the meeting but Mr. Wagoner indicated to me that he was asked to step down as both chairman and CEO.

Q. Do you know under what authority Mr. Rattner, on behalf of the auto task force, asked Mr. Wagoner to step down as CEO?

A. No.

Q. Did he have -- did the U.S. Treasury have contractual authority to essentially terminate the CEO of GM?

A. Not that I'm aware of.

Q. Are you familiar with papers filed by the U.S. Treasury in support of the sale motion?

A. Umm --

Q. Have you seen them?

A. No.

Q. Okay. There's reference -- I will represent to you that there's reference, and Mr. Miller will correct me if I'm wrong, to the U.S. Treasury acting as a "prudent lender" in the statement. Are you familiar with that phrase or are you aware that they use that language?

A. Yes.

Q. Okay. Do you know of any other instances where a lender has acted as a prudent lender where it actually instructed its borrower to terminate its CEO?

A. I'm not aware of any.

Q. Do you know of any other instances where lenders have instructed borrowers to terminate their CEO or undertake --

MR. MILLER: Objection, Your Honor. This assumes facts that are not in the record. Mr. Henderson testified that Mr. Rattner asked Mr. Wagoner to step down.

UNIDENTIFIED SPEAKER: We can't hear.

MR. MILLER: Sorry. Mr. Henderson testified, Your

Honor, that as far as he knows, Mr. Rattner asked Mr. Wagoner to step down. He did not terminate him. That was a decision that had to be made by the board of directors of GM. And if counsel has the document, he should show it to the witness who said he never saw the document.

THE COURT: All right. I'm going to sustain the objection on form without prejudice to rephrase.

MR. SALZBERG: Thank you, Your Honor.

BY MR. SALZBERG:

Q. Mr. Henderson, you were a member of the GM board of directors, is that correct?

A. I am now, yes.

Q. Okay. Were you a member prior to April 1 of 2009?

A. No.

Q. Okay. Were you -- did you -- well, as a nonmember, did you attend the board of directors meetings where Mr. Wagoner's resignation was discussed?

A. Yes.

Q. Okay. How did the board -- I'm sorry. Did the board ask Mr. Wagoner to resign as CEO at that meeting on or about March 27th, 2009?

A. There was a telephonic meeting of the board that had been regularly scheduled for noon that day, on the Friday. At that meeting, Mr. Wagoner indicated to the board what was asked of him and a discussion ensued. And, no, the board did not ask

for his resignation at that meeting.
Q. So how did Mr. Wagoner end up resigning?
A. Mr. Wagoner resigned, I believe, on Sunday, that weekend, after a number of board calls.
Q. Would you agree with me that Mr. Wagoner resigned at the suggestion of the U.S. Treasury?
A. Yes.
Q. And would you agree with me that Mr. Wagoner resigned at the suggestion of the head of the U.S. auto task force?
A. Yes.
Q. And would you also agree with me that Mr. Wagoner resigned at the suggestion of the only lender that GM had at that time?
A. Yes.
Q. Okay. Now, the debtor has not filed a plan of reorganization as we stand here today, is that correct?
A. That's correct.
Q. There were discussions prior to the filing of the petition regarding --
MR. SALZBERG: Strike that. Let me rephrase that.
Q. Prior to the bankruptcy being filed, there were discussions between GM and the U.S. Treasury regarding filing a plan of reorganization to accomplish this asset sale, is that correct?
A. Could you rephrase the question, please? I'm sorry.
Q. Sure. Were there discussions prior to the petition date

between the debtor and the U.S. Treasury regarding different processes for accomplishing the asset sale?

A. Yes.

Q. And one of those processes that was discussed was filing a plan, a pre-packaged plan of reorganization, is that correct?

A. Correct.

Q. And was one of the processes discussed filing a pre-negotiated plan of reorganization?

A. Yes.

Q. Okay.

MR. SALZBERG: Excuse me. Your Honor, if I may?

THE COURT: Yes.

MR. SALZBERG: Your Honor, Mr. Miller and I just have to talk about the confidentiality issue that was raised by counsel 'cause we do have some exhibits.

(Pause)

MR. SALZBERG: I apologize, Your Honor. We're just dealing with procedural --

THE COURT: Oh, I understand. Go on.

(Pause)

MR. MILLER: No objection, Your Honor.

MR. SALZBERG: Your Honor, this is a mea culpa. Over the last few days, we've been attending depositions and the one thing I forgot were exhibit stickers. And so I apologize. But may I approach -- Your Honor, may I hand mark --

THE COURT: Do it the old-fashioned way. Take a pen and then you can mark it as an exhibit.

MR. SALZBERG: Thank you, Your Honor.

THE COURT: Just tell me how you've marked and, for the record, a general description of your document without prejudice to the witness' ability to identify it --

UNIDENTIFIED SPEAKER: Your Honor, I have sticker.

MR. SALZBERG: Thank you, Your Honor. Your Honor, for the record, I'm going to mark this document Bondholder Exhibit number 1.

THE COURT: Sure.

MR. SALZBERG: And if I may approach the witness and Your Honor?

THE COURT: Yes, you may.

THE WITNESS: Thank you.

(Bondholder's Exhibit 1, proposed pre-packaged plan of reorganization, was hereby marked for identification as of this date.)

Q. Do you recognize this document, sir?

A. I recognize parts of this document but not the document in its entirety.

Q. Okay. Thank you. If you would, please turn to page 4 which is entitled "Plan B Options".

A. Yes, sir.

Q. Okay. Do you recognize this page of the document?

A. No.

Q. I'm sorry?

A. No.

Q. Okay. Let's get to it this way. You see there are three -- three boxes that one is noted "90-day Cramdown, 4/1"; the second is "60-day pre-pack, 5/31"; and the third is the "363 Sale, 5/15", do you see that?

A. Yes, I do.

Q. Okay. Were there discussions prior to the filing of the petition between the debtor --

MR. SALZBERG: Well, I'm sorry. Let me rephrase.

Q. Did the debtor contemplate filing a plan of reorganization on or about April 1, 2009?

A. No. Not April 1st.

Q. Okay. But there were discussions prior to the filing about filing a plan on the petition date, is that correct?

A. Yes.

Q. And there were discussions -- the debtor considered using the plan confirmation process in order to effectuate the sale of the assets, is that correct?

A. There was a discussion regarding a plan of reorganization pursuant to a pre-packaged bankruptcy. And also a discussion of a 363.

Q. Okay. But I just want to be clear that one of the issues -- one of the processes discussed was filing a plan of

reorganization on the first day, is that right?

A. That's correct.

MR. SALZBERG: Your Honor, I'm going to show the witness what's been marked as Bondholder Exhibit number 2. And if I may approach?

THE COURT: Yes, sir.

MR. SALZBERG: Two copies. There you go.

THE WITNESS: Thank you.

MR. SALZBERG: You're welcome.

MR. MILLER: Let me have a copy, please.

MR. SALZBERG: Yes. Your Honor, if I may, I'd like to move Exhibit -- Bondholder Exhibit 1 into evidence.

THE COURT: Any objection?

MR. MILLER: No objection.

THE COURT: Bondholder Exhibit 1 is admitted.

(Bondholder's Exhibit 1, proposed pre-packaged plan of reorganization, was hereby received into evidence as of this date.)

MR. SALZBERG: For the record, Bondholder Exhibit 2 is a document bearing Bates stamps GMPR92336 through 92360 and it bears on the first page "Cadwalader Use of Section 363 to Expedite Restructuring of Distressed OEMs".

Q. Sir, Cadwalader, the law firm, represents the U.S. trustee in this case -- the U.S. Treasury in this case, is that correct?

A. Yes.
Q. So during the planning of this bankruptcy, you had discussions -- you, being GM, had discussions with Cadwalader, is that right --
A. Yes.
Q. -- in conjunction with your counsel, is that correct?
A. Yes.
Q. Okay. If you would turn to page 3 of this document -- first of all, have you ever seen this document before?
A. Yes.
Q. Okay. When did you see it?
A. Sunday.
Q. At your deposition?
A. Yes.
Q. Prior to that had you seen it?
A. I'd seen parts of it but not in its entirety.
Q. Okay. Page 3 of the document -- did you see this page 3 prior to your deposition on Sunday?
A. No.
Q. Okay. You see there are two columns, one is entitled "Section 363" and the other is entitled "Plan"?
A. Yes.
Q. Okay. And if you read under Section 363, there's some bullet points there. Do you see the bullet points?
A. Yes, I do.

Q. Okay. Was one of the reasons why the debtor chose to file a sale motion as opposed to file a plan because the consent of creditors and shareholders would not be required under a 363 sale whereas they would be required in a plan?

A. Could you rephrase the question, please?

Q. Sure. Was one of the reasons why the debtor chose to file a sale motion as opposed to filing a plan on the petition date because the Section 363 sale could be done without obtaining the consents of creditors and shareholders?

A. No.

Q. That had nothing to do with it?

A. The discussion with respect to the Treasury was what structure they were prepared to do in terms of both financing the company as well as, in this case, the view was that they were prepared to proceed using a 363 process. The discussion, for example, of shareholder votes was not a critical factor that we discussed during the deliberations and then how creditors were being affected were basically depending upon what path was chosen.

Q. But it's correct that one of the issues pointed out by Cadwalader in support of the 363 sale was that consent of shareholders and creditors would not be required, is that correct?

A. Yes, that's correct.

MR. MILLER: Objection, Your Honor. Mr. Henderson

testified that he never saw that page.

UNIDENTIFIED SPEAKER: Can't hear.

THE COURT: I'm going to sustain the objection on the ground that what the document says is the best evidence of what it says and I'm not going to ask a witness who's only seen parts of the document before to characterize it --

MR. SALZBERG: Okay.

THE COURT: -- without prejudice to your rights to argue in summation and to bring parts of the document to my attention.

MR. SALZBERG: Thank you, Your Honor.

Q. Without looking at the document and without referring to the document, were there discussions between the debtor and the U.S. Treasury leading up to the petition date that a 363 sale would be better strategically because the standards for the sale would be lower than that required under a plan of reorganization? By U.S. trustee, I meant U.S. Treasury. I don't know why I keep making that mistake.

A. Yes. The -- we did have significant discussion regarding the benefits and the risks of 363 and a plan through -- over many months. So, I'm just trying to make sure I understand your exact question.

Q. Well, was one of the benefits you discussed, benefits of the 363 sale, was it that the standards for the sale would be lower than that required under a plan confirmation?

A. Well, I understood the standards were different, for certain.
Q. Okay. And was one of the reasons why the debtor opted for the 363 sale because it would provide less of an opportunity, less of an opportunity, for creditors to object?
A. I don't recall that discussion.
Q. Okay. Would it be fair to say that one of the reasons -- well, there were strategic reasons why the debtor chose to effectuate the sale of the assets through 363 as opposed through a plan, is that correct?
A. That's correct.
Q. Okay. Are you aware of any document filed in this proceeding which identifies the recovery for unsecured creditors as compared to the UAW retirees?
A. I've seen the document in that regard so it must be a part.
Q. Okay. And it's your testimony, just so I'm clear, that there is a document in this file which would identify the level of recovery that the unsecured creditors would get dollar wise, the dollar value of recovery, as compared to UAW retirees.
A. Yes.
Q. Okay. Do you know what the dollar value in comparison is in the recoveries?
A. It depends on the value of the equity.
Q. Okay. Well, is it correct to say that the unsecureds,

which primarily --

MR. SALZBERG: Let me back up.

Q. Is it correct that the unsecured creditor class consists primarily of the bondholders?

A. That's correct.

Q. Okay. Do you know the percentage of the claims, the bondholder claims, which make up the unsecured creditor class?

A. I don't know. I just know that the unsecured bondholders at twenty-seven billion dollars would be the largest component of the unsecured creditor class.

Q. Okay. I believe that the Form 8K filed by GM in late May said the bondholder claim would be primarily the -- primarily all the unsecured creditors.

A. That's correct.

Q. Okay. And the UAW retirees will get what out of this deal as proposed?

A. The UAW --

MR. MILLER: Objection, Your Honor. If counsel would lay a foundation -- get from whom?

UNIDENTIFIED SPEAKER: Your Honor, we can't hear.

THE COURT: Mr. Miller, there is a microphone on your desk but I don't know if bringing it closer to you is going to help --

MR. MILLER: I don't think it's on, Your Honor.

MR. SALZBERG: I'll refer --

THE COURT: People in the background, do you hear Mr. Miller's tapping on that microphone?

UNIDENTIFIED SPEAKER: No.

THE COURT: All right. Then, Mr. Miller, you're going to just have to come up to the main lectern microphone.

MR. MILLER: Your Honor, counsel keeps referring to what the UAW employees or retirees are getting as a result of the Section 363 sale. He fails to identify from whom and how. He's making an assumption that -- a predicate that is not in the record.

THE COURT: Well, I don't think there's a predicate that's not in the record but I think there's an ambiguity. So why don't we sustain it on form and you just clarify the question. You can ask it again sharpening the question.

MR. SALZBERG: Yes, Your Honor. And, by the way, I would ask that Bondholder Exhibit 2 be moved into evidence.

MR. SCHWARTZ: Objection.

THE COURT: Any objections? Please, Mr. Schwartz?

MR. SCHWARTZ: I just want to be clear for what purpose it's being --

THE COURT: Mr. Schwartz, you're going to have to come up to the mic, too. Unfortunately, we're talking into three corded ones here.

MR. SCHWARTZ: Matthew Schwartz for the United States. I just want to be clear for what purpose the exhibit

is being offered. Probably I ought to have made the same objection to the first exhibit. If it's being offered for the truth of the content, it's hearsay. And if it's being offered for anything else, Mr. Henderson testified he hadn't seen the entire document before.

THE COURT: Okay. I'll take a response.

MR. SALZBERG: Your Honor, I believe that document number 2 is a business record maintained by -- it's either the U.S. trustee -- U.S. Treasury, excuse me, or the debtor. It was produced by GM, actually, in response to a document request. It was -- from its contents, it was drafted by its counsel sometime immediately prior to or during the lead up to the bankruptcy filing.

THE COURT: Well, I don't think it's a business record. But it may qualify as an admission depending on who its author was and the purpose for which it was put forward. It also raises issues of double hearsay. My inclination, folks, is for you to -- well, it's more than that. If I mention it, it's my ruling. Lay a foundation. Find out who the author of the document is. If the author of the document is GM, they're your opponent and I'll admit it as an admission. If the author of the document is the auto task force or Treasury, they're a party in interest with a different perspective but I have problems with taking it as an admission at least without a case that says that a party -- a multi-party

1109 case -- Chapter 11 case is, by reason of 1109, a party opponent with the Federal Rules of Evidence.

Alternatively, if you want to offer it for a lesser purpose, not for the truth of the matter asserted but for the fact that somebody said something, then at least standing there, you wouldn't have any hearsay issues at all. So I'm -- Mr. Schwartz kind of hit the nail on the head when he talked about the purpose. It may be admissible for all purposes but it may be admissible only for certain ones.

MR. SALZBERG: Your Honor, in response, I believe that Mr. Wilson, who will be proffered by the U.S. Treasury, will be able to identify the document. Cadwalader acted as U.S. Treasury's outside counsel in this matter. But I think just for purposes of right now, what the document is being -- what we're seeing to introduce the document for is to show not necessarily that 363 is better than a plan for the reasons stated here but that there were discussions between the debtor and the U.S. trustee (sic) at the U.S. Treasury, and their outside counsel concerning these very issues.

THE COURT: All right. Well, if your only purpose is to show that it was discussed, I would think that that isn't for the truth of the matter asserted. Mr. Schwartz, am I missing something?

MR. SCHWARTZ: I think you're exactly right. And for that purpose, it's appropriate to mark it Bondholder's 2 for

identification, so it can be used as a talking point, but not to move it into evidence.

THE COURT: All right. Here's my ruling.

MR. SALZBERG: Your Honor, if I may? I'm sorry.

THE COURT: Yes.

MR. SALZBERG: And the other issue is that Treasury did file an opposition to our, the bondholders' opposition to the sale motion. So they are taking an affirmative stand against our position.

THE COURT: I understand that. And that's why I had the uncertainty as to what the case law would say about whether many parties in an 11 are considered party opponents for the purpose of what's an admission. And, of course, I'm talking the old style long before there were Federal Rules of Evidence.

Here's what we're doing, folks. Here's what I'm ruling. I'm taking it, for all purposes relevant to whether something was stated. I'm not yet taking it for the truth of the matter asserted, by way of example, whether 363 is better than plans, or the plans are better than 363. That's especially a matter of concern when you have subjective views being expressed in the document as to which people in this room elsewhere have differences in view.

It's without prejudice to anybody showing me a case that if somebody who disagrees with you in a multiparty alleging or anything they say is an admission. I've been at

this for almost forty years. I don't think I've seen a case on it. But you guys have done a lot more homework in preparation for this hearing than I have. So I'll keep an open mind on that second level issue.

I mean, a classic example of that is the creditors' committee. The creditors' committee has said stuff. Some people agree with the creditors' committee on some issues and not on others. I'm not of a mind, subject to seeing some case, to say that anything the creditors' committee generates is an admission of all of the unsecured creditors in this case, because its agent, the creditors' committee, said something. That's a pretty complicated area, and I'm not going to decide that on the fly now. So it's admitted for the purpose of anything that's in it having been expressed as a view. Beyond that, the objection is sustained without prejudice to reconsideration. Go ahead.

(Bondholders' Exhibit 2, document entitled "Cadwalader Use of Section 363 to Expedite Restructuring of Distressed OEMs", was hereby received into evidence for a limited purpose as of this date.)

MR. SALZBERG: Thank you, Your Honor. I'd like to mark this document -- mark it as Bondholders' Exhibit 3. And if I may approach, Your Honor?

THE COURT: Yes, sir.

(Bondholders' Exhibit 3, GM/UAW/UST VEBA discussions dated May

18, 2009, was hereby marked for identification as of this date.)

(Pause)

MR. SALZBERG: For the record, Bondholders' Exhibit 3 is Bates stamped Treasury IUE CWA 2609 through 2626. And the first page bears the title "GM/UAW/UST VEBA Discussions Dated May 18, 2009."

BY MR. SALZBERG:

Q. Sir, do you recognize this document?

A. Yes.

Q. What is this document?

A. It's a document that reviews the nature of the VEBA obligation, restructuring terms, pro forma analysis of the capital structure, and the benefits of the restructure.

Q. Was it prepared for you?

A. (No response)

Q. Let me rephrase that. Who prepared the document?

A. I think General Motors prepared this document.

Q. Okay. And did you see it on or about May 18, 2009?

A. Yes.

MR. SALZBERG: I would ask that Bondholder Exhibit 3 be moved into evidence.

THE COURT: Any objection?

MR. MILLER: No objection.

THE COURT: Admitted without objection.

(Bondholders' Exhibit 3, GM/UAW/UST VEBA discussions dated May 18, 2009, was hereby received into evidence as of this date.)

Q. Sir, if you would turn to page 12 of this document? Just tell me when you get there. What is page -- page 12 bears the title "Illustrative Valuation"?

A. Yes.

Q. What does page 12 --

THE COURT: Forgive me, Mr. Salzberg, what page were you referring to?

MR. SALZBERG: I'm sorry. Page 12.

THE COURT: Thank you.

Q. What is this page of this document purporting to show?

A. It's purporting to arrive at a pro forma common equity value.

Q. The second -- the bottom half of this page bears the title "Recovery Analysis". Do you see that?

A. Yes, I do.

Q. And we were talking a moment before regarding the recovery to be achieved by the unsecured bondholders and UAW retirees. Do you recall that conversation?

A. Yes.

Q. If you look at the line item that says New VEBA -- and VEBA, just to clarify for the Court, what does VEBA stand for?

A. It's the Voluntary Employee Benefit Association. But in this case it is intended to be the vehicle with which post

retirement healthcare plans were paid for UAW members.
Q. Simply for the UAW retirees, correct?
A. Yes.
Q. And if you look at the last column, for line item New VEBA, it shows a 65.6 percent recovery rate. Do you see that?
A. Yes, I do.
Q. And then for bondholders, who you said consist of primarily or they make up primarily all of the unsecured claimants, this is a nine percent recovery rate. Do you see that?
A. Yes.
Q. Now, these numbers were calculated using a proposal to the UAW which is not the proposal that's not on the table today, correct?
A. That's correct.
Q. There is a UAW retiree settlement agreement which has been made part of the sale motion which has different recoveries for the UAW retirees than the one shown here, correct?
A. Correct.
Q. And those are actually higher recoveries, correct?
A. Depends on the equity value.
Q. Under the UAW retiree settlement, the retirees are going to receive seventeen and a half percent of the common stock of New GM, correct?
A. Correct.

Q. A 2.5 billion dollar note, correct?

A. That's correct.

Q. 6.9 billion dollars in preferred stock?

A. 6.5.

Q. 6.5, excuse me. And warrants to acquire an additional 2.5 percent of the common stock of New GM, correct?

A. At a 75 billion equity value, yes.

Q. And that stands -- well, let's compare that to what the bondholders/unsecureds will recover out of this bankruptcy. What is that?

A. The bondholders/unsecureds would --

MR. MILLER: Objection, Your Honor. Counsel used the phrase "out of this bankruptcy"?

MR. SALZBERG: I'll rephrase.

MR. MILLER: The UAW is getting --

THE COURT: All right. Once he said he would rephrase, you don't have to continue. Go ahead, Mr. Salzberg.

Q. What is the recovery for the unsecured creditors?

A. The unsecured creditors would receive ten percent of the equity of the New General Motors and two different sets of warrants, each at seven and a half percent, so fifteen percent warrants. The first is a seven-year warrant, struck at a fifteen billion equity value, and the second, I believe, is a ten-year warrant stuck at a thirty billion equity value.

Q. And the UAW retiree claim, how much is that?

A. We've estimated the liability that was owed to the UAW at approximately twenty billion dollars, actually twenty-one billion dollars.
Q. Okay. And the unsecured -- well the bondholders' claim is twenty-seven billion dollars?
A. That's correct.
Q. Now, there were references in the sale motion that the U.S. Treasury has said that it will not fund the DIP -- continue to fund the DIP if the sale order is not entered by July 10th. Do you recall that?
A. Yes.
Q. Now, if the U.S. Treasury does not fund on July 10th and the sale order is not entered by that date, what options are there for GM at that point?
A. Well, if they don't continue, we would liquidate.
Q. And has a calculation been done by GM as to what the U.S. Treasury will recover in a liquidation?
A. We have done liquidation value, the focus of which is to determine what the recovery is of the unsecured creditors. I don't recall what the recovery of the U.S. Treasury would be.
Q. It won't be a hundred percent recovery, would it?
A. No.
Q. Do you think -- do you have any understanding of what the range would be a projected recovery?
A. I'm sorry, I don't.

Q. Let's talk about the performance of GM right now. Were there targets set for sales of vehicles in June of 2009?
A. Yes.
Q. And how is the company performing as compared to those targets?
A. We're performing in line, if not slightly better than the targets, in terms of retail.
Q. So the company is doing better than expected?
A. The company's certainly better than the forecast coming into the month, again, with respect to retail. We're off on fleet sales, because fleet customers have actually pulled back their orders associated with the bankruptcy because they didn't know their status in the bankruptcy.
Q. But with respect to other sales other than fleet, you're doing better?
A. Yes.

MR. SALZBERG: Your Honor, may I have a moment to confer?

THE COURT: Yes, sir.

(Pause)

Q. Now, in the sale motion that was filed by the debtor, there are assertions that the sale has to take place by July 10th, correct?
A. Yes.
Q. How was that date arrived at by the debtors?

A. That date was arrived at by the purchaser, actually, as a key date that they felt that was important to them.

Q. Do you have an understanding as to why that date was important to them?

A. Because they, like we, are concerned about the business status of the company in a bankruptcy process.

Q. But again, we discussed that the business of the debtor is actually doing better than expected, correct?

A. The business is doing better for a number of reasons, one of which is the expectation that this will move quickly and that the company, in the 363 process, would be successful.

Q. Just a few more questions. There are references in the documents that were produced over the weekend to a sixty to ninety-day sale after the petition date. Is that correct?

A. Yes.

Q. And so that would mean that the sale would be closing outward of ninety days out, which would be August 31 of 2009. Is that correct?

A. We said no later than that, yes.

Q. So actually, the debtor had contemplated with -- I'm --

MR. SALZBERG: Let me rephrase that.

Q. Was the August 31 date chosen in conjunction with or in communication with the U.S. Treasury?

A. Yes.

Q. So there were discussions between the debtor and the U.S.

Treasury about a sale actually closing as late as August 31, 2009?

A. The actual closing, yes.

Q. Yes, okay. Were there any discussions prepetition as to whether it was feasible to file a plan on the petition date of June 1 and get to plan confirmation within ninety days?

A. I don't recall those discussions.

Q. And you would agree with me that the plan confirmation process would afford additional opportunities for creditors and other stakeholders to raise objections and be involved in the process. Is that correct?

MR. MILLER: Objection. It calls for a legal conclusion.

THE COURT: Sustained on legal conclusion, but I'll permit his layman's understanding.

A. Could you repeat the question, please?

Q. Sure. I think. You would agree with me that a plan confirmation process would provide additional opportunities for creditors and other stakeholders to be involved and to assert objections to the proposed disposition of the GM assets?

A. That was my understanding of how it would work, yes.

Q. And in fact, in the plan confirmation process, creditors would know how other stakeholders and creditors are being treated, correct?

A. That's my understanding, yes.

Q. And there would likely be disclosure in the disclosure statement showing expected recoveries for the creditors and other stakeholders?

A. Yes, that's my understanding.

MR. MILLER: Objection. Same objection.

THE COURT: I'm taking it only as his layman's understanding, and it's subject to what the law thinks that he is.

MR. SALZBERG: I have no further questions, Your Honor. Thank you.

THE COURT: Okay. Before I provide for redirect, I'm inclined to have all of the cross proceed. Who is next along the lines that I outlined previously?

MR. RICHMAN: Your Honor, auto safety group, Your Honor. Auto safety group.

THE COURT: Thank you, Mr. Richman. Auto safety wish to -- does auto safety want to yield to Mr. Jakubowski?

MR. JAKUBOWSKI: I am here with my co-counsel, Adina Rosenbaum, for Public Citizen. We would like to yield in order to have the ability to speak to Mr. Miller --

THE COURT: Certainly. Certainly. Okay. How about asbestos litigants? Is that Mr. Esserman or somebody different? I see Mr. Esserman in the back there. You can keep it off, if you want, Mr. Esserman.

MR. ESSERMAN: Thank you, Your Honor.

CROSS-EXAMINATION

BY MR. ESSERMAN:

Q. Mr. Henderson, my name is Sandy Esserman. I represent the ad hoc committee of asbestos claimants in this case. You're aware that there are asbestos claims against General Motors, are you not?

A. Yes.

Q. And General Motors has done an estimate of its liability that they put to 10K, that shows a ten-year estimate, present valued at about 650 million dollars. Are you generally familiar with that statement?

A. Yes.

Q. And from what does this liability arise?

A. It's my understanding -- I'm not an expert. But it's my understanding that it principally arises as a result of asbestos that was used in brake linings.

Q. Did General Motors --

THE COURT: Pause, please. Did you say brake linings?

THE WITNESS: Yes.

THE COURT: Okay.

Q. And would the exposure to these claimants occur when the brakes were cleaned or changed or brake jobs were done on the cars?

A. I don't know for certain, sir. I'm sorry.

Q. Does General Motors still put asbestos in their brakes?
A. I do not believe so.
Q. Do you know when they stopped putting asbestos in their brakes?
A. I do not know.
Q. Are you aware of the treatment of asbestos claims in the sale agreement that you've entered into with the Treasury?
A. Yes.
Q. And what is that treatment?
A. The assumption of liability is not contemplated by the New General Motors.
Q. And that liability -- is that liability for current claims, for claims on file now?
A. It's my understanding it's on -- it's with respect to any claims that are outstanding today.
Q. What happens if -- are you familiar with the disease mesothelioma?
A. Not -- no, sir.
Q. Asbestos related cancer?
A. I'm familiar with that, yes.
Q. Okay. If a claimant who was working on General Motors' brakes develops asbestos related cancer five years from now, is it your understanding that New General Motors will be liable for that, if there's anything found to be liable for, for that claim?

A. Sir, I'm not an expert in this area, so I couldn't give you an opinion.

Q. What's your intention as a layman, as a representative of General Motors? Is it to take care of that claimant is it to send him to the bankruptcy court with a proof of claim?

A. In the case of the purchaser of the company is not planning to assume the obligations associated with asbestos liabilities, it would be my expectation that it would not an obligation of the New General Motors.

Q. Calling an asbestos claim that will arise post sale a future claim, would it be a correct statement of fact that all future claims would not be assumed by the new purchaser, relating to asbestos claims?

MR. SCHWARTZ: Objection, Your Honor. I think as to this entire line of questioning, the actual sale and purchase agreement is the best evidence of the terms of the deal. I know a lot of objectors are going to have questions about what stays and what goes.

THE COURT: I think, the Court's view is that's right. So Mr. Esserman, help me understand why his layman's understanding is better than what the plan says?

MR. ESSERMAN: Well --

THE COURT: Unless it's the predicate for some further questioning that --

MR. ESSERMAN: -- that's exactly what it is.

THE COURT: Can I make a suggestion?

MR. ESSERMAN: Yes, sir.

THE COURT: Perhaps not evidentiary perfect. Why don't you ask a question premised on your understanding of what the 363 sale contemplates, hopefully articulated in a nonargumentative way, so Mr. Schwartz would agree with you. And then, if the question is reasonable in its assumptions, you can ask questions concerning his businessman's understandings or knowledge that are premised upon that undisputed fact.

MR. ESSERMAN: That's fine, Your Honor.

THE COURT: Thank you.

BY MR. ESSERMAN:

Q. Mr. Henderson, it's my understanding that the New GM will not be assuming any liability for future asbestos claims. Is that --

A. That's my understanding as well, yes.

Q. But that's not true with regard to all tort claims. Is that correct?

A. That's correct.

Q. And what tort claims is GM -- what is your understanding of tort claims that GM is assuming in the future?

A. In terms of product liabilities, sir?

Q. Yes.

A. The assumption of liability would include, for any vehicle sold post-June 1st, number one. Number two, for any accidents

incurred post closing, irrespective of when they were sold. And then finally, we have indemnification obligations with respect to our dealers.

Q. And was this a recent decision that was made with regard to product liability claims?

A. The recent change was the agreement to assume obligation for accidents post-closing.

Q. And when was that change made?

A. Late last week.

Q. But there's no change as regards to asbestos claims. Is that correct?

A. That's correct.

Q. If New GM were to assume the asbestos claims, the liability from the asbestos claims, is it your understanding that that would not have an effect on the viability of the new entity?

MR. SCHWARTZ: Objection. Relevance?

THE COURT: Pause. I'm going to overrule the objection but require a predicate as to whether he has an understanding, first. If he has an understanding, you can ask him.

Q. Do you have an understanding of whether or not assumption of asbestos claims would have an effect on the viability of New General Motors?

A. My business judgment would suggest that it would not

impair our viability.

THE COURT: I couldn't hear the answer.

THE WITNESS: Excuse me. I'm sorry, Your Honor. In my judgment, it would not impair our viability.

Q. GM would still be a viable com -- just so I understand what you said, GM would still be a viable company if, in fact, the purchaser would assume the asbestos claims?

A. Yes.

Q. Whose decision was it not to assume the asbestos claims?

A. The purchaser, in their judgment, felt it was not appropriate that they should be responsible for the asbestos claims.

Q. Was that the United States Treasury?

A. Yes. They're the purchaser.

Q. In that negotiation with the United States Treasury, did you participate?

A. I participated in a number of negotiations with the U.S. Treasury.

Q. For New General Motors --

A. Yes.

Q. -- for the purchase? Were you aware of whether or not there was anyone at the bargaining table to create new General Motors that was advocating on behalf of tort claimants or asbestos claimants?

A. We outlined for the U.S. Treasury, as the purchaser, a

range of obligations that we felt were sensitive that we wanted to discuss with them, including, number one, quantifying them; number two, explaining them; and number three, outlining a range of options that might be considered.

Q. So if you considered a claim sensitive, then it was something that you advocated for with the Treasury to assume?

A. It's something that we felt warranted the discussion, yes.

Q. Did you discuss asbestos claims?

A. Yes.

Q. With the United States Treasury?

A. Yes.

Q. And what decision was made?

A. The conclusion was that the asbestos claims would not carry forward to the New GM.

Q. And did you agree with that conclusion?

A. Yes.

Q. Well, you're referring to the purchaser as New GM, but isn't New GM the same as Old GM, without some of the liabilities?

A. Well, the assets of General Motors are being purchased in forming New GM, and so, pursuant to a 363 transaction. That's how I understand it.

Q. But New GM -- there's going to be no difference between New GM and Old GM, except for shedding liabilities. Isn't that correct?

A. No, that's not correct.

Q. Well, tell us what the differences are, in your opinion?

A. Our business will be fundamentally restructured in terms of the operating -- the operations of the business and the capital structure of the business will be significantly changed and improved.

Q. So the capital structure might be changed, but the products you sell are the same, aren't they?

A. Yes.

Q. You're not moving offices, are you?

A. No.

Q. Your management isn't changing after the sale, is it?

A. It could well change, but we haven't announced those changes yet.

Q. Your employees are the same?

A. Yes.

Q. And your name's the same?

A. We'll changes some names, but the operating business will still be General Motors.

MR. ESSERMAN: I'm almost done, Your Honor.

THE COURT: Okay.

MR. ESSERMAN: There may be one other asbestos claimant that may have some follow-up questions. Thank you. I was just informed, he does not.

THE COURT: All right. Very good. I want to pause

here for a second and ask you folks to comment. We lost an hour -- more than an hour because of the overload. But now we're proceeding. It's now 12:20, though, and I don't know if you folks want to give up your lunches entirely or to give up a chance to take even breaks. So this is a possible breaking point for either a break or a lunch hour. I'd like to get your views on it. I would like to keep this hearing moving forward, and I would like to get Mr. Henderson off the stand as quickly as circumstances permit, consistent with your opportunity for folks to do their jobs. Mr. Miller, can I get your thoughts first?

MR. MILLER: Your Honor, Harvey Miller. The debtor joins with Your Honor. We are perfectly prepared to waive lunch and to proceed.

THE COURT: All right. I don't know if we're prepared to waive lunch all the way up to dinner time.

MR. MILLER: We are prepared to waive dinner too, Your Honor.

THE COURT: Well, okay. That's why judges decide things. Do other parties want to weigh in on this? I don't see any voices here. Here's what I want to do, folks. I just want to give folks a chance to go to the bathroom or get a drink. And then while we're on a roll, I don't want to take our long lunch recess now. So let's take -- I would say five minutes if I thought that people could get back from the

bathroom that quickly. Let's take ten, but with the understanding that we mean it. In that ten minute gap, Mr. Miller, I'd like you to talk to Mr. Jakubowski, about seeing if you can button up any understandings vis-a-vis what documents he can use and what he can't. And then -- folks, when I'm speaking, please give me the courtesy of not even rising or yammering.

MR. JAKUBOWSKI: Your Honor, I have one issue.

THE COURT: All right. Just a minute, please. But I still can't let you interrupt me. Mr. Jakubowski. Then we're going to resume. Mr. Henderson, while you're in recesses and while you're under cross, or for that matter, before you're questioned on redirect, I'm going to ask you not to talk to anyone other than maybe whether you want a tuna fish sandwich for lunch.

THE WITNESS: Thank you, Your Honor.

THE COURT: Okay. Mr. Jakubowski, I'll hear you now.

MR. JAKUBOWSKI: Your Honor, I have just one technical issue. I ordered my documents from Chicago by FedEx. I hear they didn't get there until 10:30. I'm going to ask Ms. Rosenbaum if she will go over to the hotel and get the documents so that we could continue through. In the meantime, I will talk to Mr. Miller about the documents being admitted into evidence. And so hopefully, I will be able to accommodate the schedule, but I do have a technical issue in terms of just

getting the box which is about half a mile away to the court.

THE COURT: Why don't I just not prejudge those things now and see if we can skin the cat by giving anybody else who wants to question a chance to get ahead of you, and -- was it Ms. Rosenbaum? Rosenberg? I'm sorry. I saw the name on the --

MR. JAKUBOWSKI: Adina Rosenbaum, Your Honor.

THE COURT: Okay. All right. Ten minute recess.

(Recess from 12:25 p.m. to 12:38 p.m.)

THE COURT: Have seats everybody. Can we resume?

(Pause)

THE COURT: Okay. Mr. Henderson, you're still under oath. Next questioner, please.

MR. CORDRY: Good afternoon, Your Honor. I was going to say good morning but we've managed to make afternoon. Karen Cordry, bankruptcy counsel for the National Association of Attorneys General and I'm appearing here on behalf of the various Attorney Generals that have filed objections in this case.

THE COURT: Sure, Ms. Cordry, go ahead.

MR. CORDRY: Thank you. Just a couple of questions.

CROSS-EXAMINATION

BY MS. CORDRY:

Q. In discussions about the specific language in the order, quite a few provisions in the order of the asset purchase

agreement dealing with successor liability. Who drafted that language as between GM and the purchaser?
A. I don't know, ma'am.
Q. Did GM have a hand in drafting that language?
A. General Motors would but who specifically I don't know, within our staff.
Q. I'm not really looking for a person as opposed to sides. Was General Motors, then, involved in drafting that language?
A. Yes, General Motors would have been involved.
Q. And was Treasury involved in drafting that?
A. I believe so. Yes.
Q. Okay. Was it primarily Treasury? Primarily GM? Was it a collaborative process? How was that language reached?
A. I have no idea.
Q. Okay. Who would have been the parties involved in deciding those issues from GM?
A. I believe it would have been the U.S. Treasury as the purchaser, General Motors as the debtor, our counsel; counsel to the Treasury would have been involved.
Q. Okay. And your counsel would be Weil Gotshal, is that true?
A. Yes, ma'am.
Q. Okay. And Treasury's counsel Cadwalader?
A. Yes, ma'am.
Q. Okay. Do you know if these are primarily issues that were

being decided on a lawyer to lawyer basis, on a business judgment to business judgment kind of process?
A. I think a combination, ma'am.
Q. Okay. Were you present at any of those discussions about that language?
A. No.
Q. Okay. So specifically would you also have any idea about who decided provisions in the order that provide that the purchaser would not be treated as the successor for any purpose?
A. I don't know for certain who would have done that but my presumption is it would be the U.S. Treasury as the purchaser.
Q. Okay. And the same question with respect to the language in a number of places there that tries to describe what -- let me back up. There's a description of a claim in the master purchase agreement that uses language, including things like defenses and rights to recoupment and investigations and so forth, do you know who drafted that language?
A. No, ma'am.
Q. Okay. Do you know between General Motors versus Treasury --
A. I don't know.
Q. -- where that came from? And has there been any discussions that you've been involved in since the case was filed about changing the scope of that -- the language in the

original purchase agreement or the order with respect to successor liability?

A. The only discussion that I've been involved in, subsequent to June 1st, had to do with the changes last week with respect to product liability.

Q. Okay.

A. That's the only area.

Q. Okay. And apart from the substance we will cover claim X versus claim Y, are you aware if there have been any discussions going on about the more global language, I will say, the language actually in the order that says that we will sell free and clear of various things, those kind of provisions?

A. I have not been involved in those discussions.

Q. And that would -- would it be the lawyers involved in that?

A. Yes.

Q. And would there be anyone else at GM that the lawyers would have been speaking to about those kind of issues if it wasn't you?

A. Yes.

Q. Okay. And who would that be?

A. I would think it would be our subject matter experts depending upon the area.

Q. Okay. So again, I'm really looking at a more global

level. There's specific inclusions and exclusions in the purchase agreement. But in the order there's some very broad language about things are being sold free and clear, we're not a successor, those kind of provisions and that's what I'm really trying to get at. Who would have been making the decisions as to whether or not to consider any changes in that language?

A. I believe the purchaser would.

Q. Okay. As opposed to GM?

A. A purchaser, this is directly relevant to them.

Q. Okay. Nothing further.

A. Thank you

THE COURT: Okay. Next please. Mr. Eckstein?

CROSS-EXAMINATION

BY MR. ECKSTEIN:

Q. Mr. Henderson, good afternoon. I'm Kenneth Eckstein from Kramer Levin representing the creditors' committee, if I may ask you a few questions?

A. Certainly.

Q. Mr. Henderson, I'm assuming as the CEO of General Motors that you are generally familiar with the principal documents that comprise the sale of substantially all of the assets from Old GM to New GM, am I correct?

A. Correct.

Q. And do those documents include the master purchase and

sale agreement?
A. Yes.
Q. And the master lease agreement?
A. Yes.
Q. And a transition services agreement?
A. Yes.
Q. And am I correct that each of those agreements are agreements between Old GM and New GM?
A. I believe so. Yes.
Q. Okay. Can you tell me who negotiated -- on behalf of Old GM who negotiated the master purchase and sale agreement?
A. It would have been the management team as well as our counsel.
Q. And were you involved in the negotiation of that agreement, sir?
A. In some areas, yes.
Q. And did there come -- and is the same true for the master lease agreement and the transition services agreement?
A. Yes, but I would not have been involved in either of those two.
Q. And who at the company had principal responsibility for the transition services agreement?
A. It would depend on the area, sir, I don't know. I mean, I think it would be multiple people.
Q. All right. Sitting here today do you know some of the

individuals in senior management who would have been responsible for the transition services agreement?
A. Certainly, for example in the area of accounting it would have been the chief financial officer and our chief accounting officer in terms of provision of accounting services. There's a whole series of issues that have to do with transition.
Q. And would you know who, among senior management, would have been responsible for the master lease agreement negotiations?
A. No.
Q. Now did there come a point in time when the board of OldCo or current GM approved the principal documents for the sale of substantially all the assets from OldCo to NewCo?
A. Yes.
Q. And about when did that board meeting take place?
A. The board meeting took place -- the final board meeting took place on May 29th and 30th in New York, which was a Friday and a Saturday.
Q. And has the board met since May 29th to consider any amendments to the principal agreements?
A. Yes.
Q. And when did those meetings take place?
A. I believe last week.
Q. Has there been only one meeting or more than one meeting since May 29th?

A. We have regular briefings for our board. I know there's at least one where it was an official meeting, which is where the amendments were considered. As to whether or not there were any other official meetings, I don't remember. We have regular briefings with our board, so there was at least one.

Q. So the board approved the basic agreements on or about May 29th, am I correct?

A. May 30th, actually. Yes.

Q. May 30th. And you're a member of the board?

A. Yes.

Q. What's your position on the board?

A. I'm a director.

Q. And who's the chairman of the board?

A. The interim chairman of the board is Kent Kresa.

Q. Thank you.

THE COURT: That name again, please?

THE WITNESS: Kent Kresa.

THE COURT: K-R-E-S-S-A?

THE WITNESS: K-R-E-S-A.

Q. And am I correct that you participated in the May 30th board meeting to approve the principal documents associated with the transaction?

A. That's correct.

Q. And the meeting that took place last week, do you recall the date of that meeting, sir?

A. It's normally Friday. And so I believe Friday but I'm not certain. We have regular briefings for our board.
Q. I understand. Middle of June?
A. Yes.
Q. And did you participate in the middle of June board meeting to approve the amended agreements?
A. Yes.
Q. And are there board meetings scheduled to approve any further amendments that are being negotiated or have been negotiated in the last few days?
A. No.
Q. And so I'm correct that the board of Old GM approved the principal transaction documents on or about May 30th and then approved the amended documents at the meeting held in the middle of June, is that correct?
A. That's correct.
Q. Now can you tell me, sir, how many members of the board are there today?
A. I believe there are either twelve or thirteen today.
Q. Now can you tell me, what is the current contemplation with respect to the board composition for NewCo? How many of the twelve or thirteen current board members are expected to become the members of the NewCo board?
A. Five members of -- five independent board members from the old General Motors will move to the New General Motors board

and myself, so six.
Q. So essentially six of the twelve or six of the thirteen are going to move and become members of the NewCo board?
A. That's correct.
Q. And presently are any members of the current board expected to become members of the OldCo board once the transaction closes?
A. No.
Q. So at present do you know who will comprise the members of the OldCo board?
A. The chief restructuring officer of what will be the Old General Motors, Albert Koch is -- has been going through a recruitment process with respect to selection of board members for the OldCo board.
Q. And am I correct, sir, that you are intended to be the CEO of NewCo, is that correct?
A. That's correct.
Q. And so therefore as CEO of NewCo am I correct that you will essentially be in charge of enforcing the principal documents that comprise this transaction as between NewCo and OldCo?
A. That's correct.
Q. You had testified in your direct, sir, that unsecured creditors of OldCo are expected to receive ten percent of the equity of NewCo, is that correct?

A. Plus warrants, yes.
Q. And in addition they're going to receive warrants from NewCo as well, that's for an additional fifteen percent, am I correct?
A. Yes.
Q. In addition to the stock that's been allocated to unsecured creditors, are there funds that have been set aside in OldCo to wind down the OldCo estate?
A. Yes.
Q. And how much has been set aside?
A. Approximately 950 million dollars.
Q. And am I correct that those funds are intended to fund the administrative and priority obligations of OldCo?
A. And wind down costs, yes.
Q. And wind down costs. And in your view are those claims intended to be adequate to fund the administrative and priority obligations of OldCo?
A. When we sized -- when we developed an estimate of what the cost would be, we developed it with the intention that it would be sufficient to cover those costs.
Q. And do you have any reason to believe today that those aren't sufficient?
A. I believe updated estimates have recently been done with respect to possible cost of environmental which might result in additional amounts beyond the 950 million dollars.

Q. Do you have any sense, sitting here today, what additional funds might be necessary?

A. I am advised that the most recent estimate could be between 1.1 and 1.2 billion dollars. But again, this is an area where the precise number is difficult to determine sometimes.

Q. But am I correct that the intention of the transaction was that there would be funds in the estate sufficient to fund the wind down of the estate so that the monies that were allocated for unsecured creditors who had the stock and warrants allocated for unsecured creditors would be distributed to unsecured creditors?

A. Certainly when we sized the 950 million dollars we intended to cover the total cost. Our current estimate is it may be short to a certain degree and certainly the other assets are there but certainly what we would hope is that the amount that was allocated would be sufficient.

Q. Thank you, sir.

A. Thank you.

THE COURT: Mr. Frankel?

MR. FRANKEL: Good afternoon, Your Honor. It's Roger Frankel from Orrick Herrington.

THE COURT: Mr. Frankel?

MR. FRANKEL: Frankel. Your Honor, we represent the unofficial creditors' committee that was appointed by the

National Dealer Counsel. I actually don't have any questions of Mr. Henderson but the dealer community was on your list and I wanted the Court to know we were in the courtroom all the way in the back so it's a little bit hard to get up here and I may have questions of some of the other witnesses.

THE COURT: Thank you, Mr. Frankel. Next?

(Pause)

MR. KENNEDY: Good morning, Your Honor. Thomas Kennedy for the objecting unions IUE-CWA, the steel workers and the operating engineers. We have prepared, Your Honor, a set of exhibits that we will be referring to many of them in the cross examination of Mr. Henderson. They consist of the deposition, extract from them, that were done on Saturday, Sunday and Monday and the exhibits that were identified in those depositions.

We've pointed out to Mr. Miller and given him copies and I would ask that I provide you with a book of those exhibits and the witness as well.

THE COURT: I couldn't hear your question.

MR. KENNEDY: Yes, I'd just like permission to provide you with a book of our exhibits.

THE COURT: Oh, all right.

MR. KENNEDY: And the deposition extracts.

THE COURT: You can give me the book and then separately focus on the one you have and you want to introduce.

MR. KENNEDY: Thank you.

(Pause)

CROSS-EXAMINATION

BY MR. KENNEDY:

Q. Good afternoon, Mr. Henderson. Would you agree with me that as of April 30, 2009 the IUE-CWA represented more than 25,000 GM retirees?

A. Yes.

Q. And the steel workers represented another 4,000 GM retirees?

A. Yes.

Q. And the operating engineers approximately forty, correct?

A. Yes.

Q. And the December 31, 2008 post retirement health and life obligation that GM owed to the IUE and other non-UAW unions as of that date was 3.724 billion dollars?

A. Correct.

Q. And ninety percent or more of that 3.724 billion dollars was owed to IUE-CWA members?

A. That's my understanding, yes.

Q. In April of 2009 GM had decided that it wanted to arrange a consensual restructuring without resort to the bankruptcy court, is that correct?

A. That's correct.

Q. And GM had determined that it needed the consent of three

key constituencies to attempt consensual organization, do you agree with that?
A. Yes.
Q. And those three were the bondholders, the UAW and the U.S. Trustee acting as a secured lender?
A. Correct.
Q. And I take it that GM launched a bond exchange in late April that would have required at least ninety percent of the bondholders to agree to exchange their bonds for slightly above ten percent of General Motors, is that also correct?
A. Yes, sir.
Q. And the UAW was asked -- the UAW VEBA was asked to accept at least one half of its obligations from GM in equity in General Motors?
A. It was a condition to the bond exchange, yes.
Q. And was a further condition to the bond exchange that the treasury would agree that one half of the pre-June 1 borrowings would be taken in the form of equity in General Motors?
A. At least one half, yes.
Q. And if the bond exchange and its preconditions had been satisfied, General Motors, as far as you understand it, would not have commenced the bankruptcy proceeding, correct?
A. Had we been successful, our view is we would have likely not proceeded with the bankruptcy proceeding.
Q. Now during the time that the bond exchange was being

proposed in April of 2009, were you having discussions with the GM leadership group about the advantages and disadvantages of a prepackaged bankruptcy for GM as opposed to a Section transaction?

A. In April, sir?

Q. Yes.

A. Yes.

Q. You examined, in that period of time, the advantages of a possible 363 asset sale, possible cram down and a traditional Chapter 11 process, correct?

A. Correct.

Q. And you examined the advantages and disadvantages of each?

A. Yes.

Q. Had General Motors made a determination of which of those three alternative bankruptcy processes if the bond exchange failed you would undertake as of April 15, 2009?

A. No.

Q. Did General Motors prepare a detailed contingency plan that described the advantages and disadvantages of a 363 filing on or around April 15th?

A. We did that type of analysis through April and May. I don't know, on or about April 15 but I think it would -- I think, yes, we were in mid-April and we were doing that kind of analysis.

Q. All right. Well, let me direct your attention to Exhibit

3, to the exhibit we have marked for your deposition which would be Exhibit 10, which is entitled contingency plan update.

A. Exhibit 10?

Q. No, Exhibit 3.

A. Okay. I'm sorry.

Q. Let me just be clear about the structure. The exhibits attached to your deposition are, for the purposes of that book, called Exhibit 10. The Exhibit 3 to your deposition is the one I'm directing your attention to right now, okay. And you've seen that --

THE COURT: Help me too, Mr. Kennedy.

MR. KENNEDY: Sure.

THE COURT: Is the document you're talking about one that says IUE APBO on the top?

MR. KENNEDY: No, Your Honor. The first thing to do would be look for the inner tab which says 10 Henderson Transcript.

(Pause)

THE WITNESS: Oh, 10 Henderson Transcript. I'm sorry.

MR. KENNEDY: Yes.

THE WITNESS: I was also on the IUE.

THE COURT: Well, maybe Mr. Henderson's with you, but I'm not.

MR. KENNEDY: I understand that, Your Honor.

THE COURT: Are we talking about this huge notebook you gave me, Mr. Kennedy?

MR. KENNEDY: Yes.

THE COURT: Okay. And if I open up to tab 10, should I see what you're talking about?

MR. KENNEDY: No, Your Honor. The first forty-seven tabs, I'm sorry. I think this is the source of the confusion, are actually part of Exhibit 9, the Rawley (ph.) transcript.

THE COURT: Oh, I see. Then I find a tab that says Henderson transcript.

MR. KENNEDY: Yes.

THE COURT: And then I go to another tab 3.

MR. KENNEDY: Yes, you do.

THE COURT: Contingency plan update?

MR. KENNEDY: Yes.

THE COURT: Okay. I'm with you now. Okay.

BY MR. KENNEDY:

Q. Now hopefully with us all literally on the same page, do you recognize this as a contingency plan that General Motors had prepared on or about April 15, 2009?

A. Yes.

Q. And for purposes of analyzing the impact of a Section 363 plan as opposed to a cram down, isn't it a fact that General Motors concluded that the UAW collective bargaining contract, your obligations with respect to it would not be affected

whether you took a 363 approach or a cram down approach. Do you have a recollection as to that, sir?

A. No, because one element of our Treasury funding a facility was that we needed to renegotiate our collective bargaining agreement with the UAW to become competitive and at the same time we needed to equitize at least half of our VEBA obligations. Whether it was outside of bankruptcy or inside of bankruptcy, that was a requirement of our loan agreement.

Q. Could you do me a favor then and take a look at page 17 of that contingency plan update that we've identified as Exhibit 3 at your deposition?

A. Certainly.

(Pause)

Q. You'll note under the title Pension OPEB and Employee Obligations there's a statement that UAW CBA will drive hourly life EDB legal and other benefit obligations - assume that similar result reached for both filing scenarios.

A. Yes.

Q. Do you see that, sir? Does that refresh your recollection?

THE COURT: Pause please, Mr. Kennedy. What serial number page was that?

MR. KENNEDY: It's page 17, Your Honor. The Bates number of that page is 327319. It's page 17 of the contingency plan.

THE COURT: I don't see the page number but it says US Liability Analysis at the top?

MR. KENNEDY: Yes, the page number is on the lower right-hand corner, white against black, sir.

THE COURT: Oh, okay. Go ahead.

Q. So does that portion of the page I just reminded you of or I should say directed your attention to, Mr. Henderson, does that refresh your recollection as to whether the UAW-CBA issues were regarded to be the same under both filing scenarios?

A. We needed the change under both, yes.

Q. All right. And isn't it also true that General Motors had concluded that IUE and other splinter group obligations may be more addressable in a 363 proceeding?

A. Yes.

Q. And you see that as the next bullet under the one I had just read you, correct?

A. I do.

Q. And when you -- General Motors concluded that the obligations for the IUE and other splinter unions could be more addressable in a 363 situation, what did you mean?

A. Well, in the event of a 363 transaction, it was not expected that the new General Motors would need to have a contract with the IUE because there were no active employees. And so therefore it wouldn't necessarily be the case that the new company should assume nor enter into a contract with the

IUE or the other splinter unions.
Q. So I take it then it was General Motors' view that under a 363 proceeding it would be easier to eliminate the obligations for the employee post retirement health and life care that we talked about at the beginning of our conversation.
A. Well, our conclusion was at that point that decision hadn't been taken. But if the new company did not need to have a contract, it did not have to assume those liabilities
Q. In fact, I gather you understood in a section 363 transaction a purchaser can cherry pick the liabilities that it assumes?
A. That was in one of the earlier exhibits, yes.
Q. And that was your assumption and General Motors assumption in planning the 363 process, correct?
A. Well the purchaser, as I understand a 363 process, it's an asset sale and the purchaser could then decide what obligations need to be assumed as part of the asset purchase that are necessary for purposes of running the business.
So it's my understanding that the selection of those liabilities is the purchaser's discretion and they can decide which liabilities they choose to assume and which they don't.
Q. I'm not asking you for a legal conclusion but as a businessman did you understand that the Bankruptcy Code imposed any obligations on the purchaser in a 363 transaction to assume certain liabilities of the seller?

MR. MILLER: Your Honor, he just answered that question.

THE COURT: Sustained.

Q. In the April and May timeframe of 2009, did you understand that if the prepackaged bankruptcy option had been chosen General Motors would need to negotiate contracts with its other unions, non-UAW unions, including principally the IUE-CWA?

A. Yes.

Q. I take it it's because in a prepackaged bankruptcy proceeding the existing General Motors would have continued to perform and would therefore have continued its obligations to its other unions?

A. That was my understanding, yes.

Q. Did General Motors prepare, from time to time, contingency planning documents that identified which obligations would be assumed by the New GM?

A. Yes.

Q. And do you know if there was a document that was prepared on May 7th that concluded that a potential 363 offered demonstrated financial advantages over a cram down?

A. A liability reduction.

MR. MILLER: Your Honor, excuse me. If there is a such a document why didn't counsel show it to the witness?

MR. KENNEDY: I'm happy to.

Q. Would you turn to page --

THE COURT: All right. Objection sustained. Go ahead.

Q. Would you turn to document 6?

A. In my deposition?

Q. In your deposition, yes.

(Pause)

Q. Specifically page 2, the first line.

A. Yes.

Q. And you would agree with me that at the point in time this documented was generated, on May 7th, General Motors had concluded that the 363 process had demonstrated financial and execution advantages over cram down?

A. Yes.

Q. And I gather, from the following line, that General Motors had concluded that a 363 process allowed incremental liability extinguishment of approximately six to seven billion?

A. Yes.

Q. Were the retiree health and life obligations owed to the non-UAW unions part of the six or seven billion that could be incrementally extinguished as part of the 363 process, as you understood it?

A. I believe so. Yes.

Q. And I take it, if you turn to page 8 of that document, there's a listing of GM liabilities to New GM, and I'm referring to page 8 of document 6 in the Henderson exhibit

portion of the book. Do you see that listing of liabilities, sir?
A. I do.
Q. And am I correct that the fourth of fifth item down indicates that the GM liabilities to the new GM were expected to include a substantial impairment to splinter group health and life benefits, is that correct?
A. It was the assumption and yes it was identified that we would have expected that.
Q. And again, that was an assumption in the context of the 363 sale, correct?
A. That's correct.
Q. Now are you aware that as part of this contingency planning 363 analysis on May 7, 2009 a pro forma analysis of the financial implications of a cram down versus a 363 scenario was created?
A. Yes.
Q. And I direct your attention to Page 11 of the document we've identified as Item 6. I'm sorry; would you make that page 10.
(Pause)
Q. Are you with me?
A. Yes.
Q. Okay. The third item on page 10, entitled GM Consolidated Liabilities Analysis - Detail, under number 3, Pension OPEB

there's a line that says "Other hourly health and life," do you see that, sir?
A. Yes, I do.
Q. That repeats that 3,724,000,000 figure that we used earlier in our discussion?
A. Correct.
Q. Do you see that? And under your cram down scenario, how much of that liability is presumed to go to the NewCo?
A. This assumed it would go in its entirety.
Q. So all 3.724 billion would go to NewCo under the cram down scenario?
A. In this analysis that was the case, yes.
Q. Yes. And the 363 scenario indicated that 1.4 billion of the non-UAW OPEB would remain with OldCo and 2.3 billion would go to NewCo, is that correct?
A. This analysis indicated that, yes.
Q. And do you know where these numbers were drawn from?
A. No, I do not know.
Q. Do you know who was responsible for preparing the May 7th contingency planning analysis?
A. I believe it would have been put together by Joseph DeMore (ph.).
Q. And he's one of your executives?
A. Yes.
Q. And I assume he was incorporating information he was

receiving from the U.S. Treasury as part of the liabilities the Treasury was willing to assume?

A. As of this date, May 7th, we wouldn't have had definition around that yet on this particular liability. So we were estimating what it might be.

Q. Well at some point, in terms of the non-UAW retiree obligations, did you get direction from Treasury to provide an outcome for the non-UAW unions that was similar to what was being given to the UAW members?

A. No.

Q. You never got -- General Motors never got such a direction?

A. Is it similar to the UAW members?

Q. Yes.

A. No.

Q. Okay. At any point was there a discussion with Treasury and General Motors about NewCo accepting some portion of the liabilities that were owed to non-UAW union members for retiree health and life?

A. Yes.

Q. And what was that discussion, sir, and can you tell us when it first occurred?

A. It was later in May and it was done in connection with a total number of liabilities. We had highlighted this through the month of May but in late May the Treasury asked us to look

at a total of liabilities which were approximately 7.9 billion dollars, which included the other hourly health and life and indicated at the time that the target reduction of that liability should be approximately two-thirds or alternatively that one third of those liabilities, which in their judgment as a purchaser may not be necessary to run the business going forward and they were prepared to assume. And so they asked they asked the management to consider a two-thirds reduction in this total 7.9 billion liability.

Q. Okay. We'll go into that conversation. Prior to that conversation, which we'll call the 7.9 billion dollar conversation, had you had any direction or had General Motors had any direction as to NewCo assuming some responsibility for non-UAW retiree health and life?

A. Discussion, no definition.

Q. Okay. And you mean by that you've had discussions with Treasury but you didn't get a definitive direction from them?

A. As the purchaser, that's correct.

Q. Has General Motors concluded that if the 363 process goes through it is probable that the Old GM will go through a Section 1114 proceeding to cancel retiree health benefits to non-UAW members?

A. That decision would either be taken by Mr. Koch as well as the board of directors of the Old General Motors. I can't presuppose what they would do. My expectation is they would

likely do that.
Q. In fact, you regard it as probable that they will go through an 1114 process once the 363 goes through, if it goes through, to cancel the non-UAW OPEB, correct?
A. Again, it's their decision not mine. But my opinion is they will likely do that.
Q. Now Old GM, at this point in the planning process if the 363 sale goes through, is going to last for how long?
A. I don't know, sir.
Q. Is there a target date as to when it will wind up its affairs?
A. I don't -- I have not seen a specific target date.
Q. I assume Mr. Koch's job, as the new CEO, is to wind up the affairs of old GM, correct?
A. Yes.
Q. And have you had any discussions with him about how long that's going to take?
A. Typically it's about several years but there's no certainty as to what the date would be.
Q. Would it be fair to say you expect it to be completed before three years are out?
A. Again, I can't say for certain but I think that's a reasonable expectation, yes.
Q. And the assets of Old GM, if the 363 sale goes through, will consist of the 950 million dedicated for wind up

activities and the ten percent of New GM plus the warrants for an addition fifteen percent, correct?
A. That's correct.
Q. Where in that process would there be any money to fund the 3.724 billion dollars that Old GM owes to non-UAW retirees?
A. The 950 million would clearly not be sufficient to fund us.
Q. So what is your anticipation as to how these retirees, many of whom worked thirty years for General Motors, are going to be able to continue their lifetime healthcare if the 363 plan goes through?
A. This was one of the reasons why we, in discussions with the Treasury, suggested we needed to bring forward at least a portion of the liabilities to provide coverage for IUE members.
Q. Because you knew that as structured -- as left in Old GM they will not be able to maintain their health benefits, correct?
A. We were concerned about that. Yes.
Q. Did you at some point conclude that the issue of retiree health and life insurance for non-UAW members was politically sensitive?
A. Yes.
Q. And you informed the Treasury that the retiree obligations to the non-UAW members were politically sensitive, correct?
A. Amongst other liabilities, yes.

Q. Who is Steve Rattner (ph.)?

A. Steve Rattner is in Automotive Task Force.

Q. In fact, is he essentially the head of it for purposes of these discussions?

A. In effect, yes.

Q. Did there come a point in time in May 2009 when you had detailed discussions with Mr. Rattner about the splinter unions?

A. Yes.

Q. And you mentioned earlier that Mr. Rattner and you discussed a grouping of liabilities that in total composed 7.9 billion?

A. That's correct.

Q. And am I right that the four elements of that -- of those liabilities consisted of salaried life and health, number one. Number two, executive life and health; number three, executive pension and number four non-UAW union healthcare and life insurance?

A. That's correct.

Q. What was the largest single element of the 7.9?

A. The 3.7 billion

Q. That was owed to the IUE and other non-UAW?

A. Yeah, the non-UAW health and life.

Q. I think you've already identified Mr. Ken Kresa as the acting chairman of the board, correct?

A. That's correct.
Q. Did you ask some GM executives to get together some information about splinter union obligations so he could present the information to Steve Rattner?
A. Yes.
Q. And did you -- did Mr. Kresa advise Mr. Rattner that General Motors was targeting to negotiate reduced OPEB liabilities with its splinter unions?
A. It was the recommendation of General Motors and Mr. Kresa that we assume a part of the liability. And, however, at the same time it would have been a reduction, yes.
Q. I'd like to direct your attention to Exhibit 7 in the portion of the book that relates to your testimony.
A. Yes.
Q. And you recognize that as an e-mail from Mr. Kresa to Gregory Lowe?
A. I do.
Q. And Mr. Lowe is an executive of some sort with General Motors, I suppose?
A. He is.
Q. Okay. And the second page of this e-mail represents the information concerning splinter unions that you had asked Mr. Lowe to get together for Mr. Kresa?
A. That's correct.
Q. Okay. I'd like to direct your attention to the second

sentence of the second paragraph which reads, "The initial direction with the UST was to provide similar funding as used for (on a pro rata basis) as with the UAW." Had you seen that before today?

A. Yes.

Q. Okay. And are you able to conclude from that that at some point General Motors had received a direction from UST to provide similar funding for the non-UAW unions as was used with the UAW?

A. I don't remember when we would have gotten that direction. We were, again, exchanging ideas as to what a possible treatment might be.

Q. Well what are Mr. Lowe's duties?

A. Mr. Lowe is responsible for executive compensation.

Q. And you asked him to get together information for Mr. Kresa to discuss with Mr. Rattner, correct?

A. That's correct.

Q. And do you assume he accurately compiled information as to what the splinter union discussions had been prior to this e-mail on May 27, 2009?

A. Yes.

Q. Is it possible that there was a direction from UST to provide similar funding for the non-UAW unions --

MR. MILLER: Objection. That's not what it says, Your Honor. Object to the form.

THE COURT: Okay. Why don't you rephrase.

MR. KENNEDY: Sure.

Q. In terms of the normal operations of you as CEO and in terms of your role with or in the discussions that were going on between Treasury and General Motors, is it likely that you would not have been aware of a direction from the Treasury to provide similar funding for the non-UAW health and retiree obligations?

MR. MILLER: Objection, Your Honor. That's not what the exhibit says. It says the initial direction with the UST. It means the initial direction made by Mr. Kresa and GM.

MR. KENNEDY: I disagree with that.

THE COURT: All right.

MR. KENNEDY: Mr. Miller can testify if he wants --

THE COURT: Folks, we're not the English parliament here. We don't talk to each other. I am going to sustain the objection but not for the reason that you said, Mr. Miller. Mr. Kennedy, you can read him the language and probe his understanding of what the language means, to the extent he has an understanding. He seems, as I understand it, to have been copied on this but not to have been the author. So you can ask it that way, don't assume that he was the author. You can read the language exactly the way it reads and find out what he knows about it and ask him to tell you what he knows about it.

Go ahead.

MR. KENNEDY: Thank you, Your Honor.

Q. Just to be clear, Mr. Henderson, the second page of the document we've been referring to was created by Mr. Lowe at your direction, correct?

A. The second page of the document was actually created by Tom Krosky (ph.) for Greg Lowe, yes.

Q. Okay. But it was ultimately at your direction?

A. Yes.

Q. And you were copied on the e-mail which included page 2?

A. Yes.

Q. And when the e-mail arrived did you read it?

A. Yes.

Q. And did you advise either Mr. Lowe or Mr. Krosky that they were in error in how they had summarized what the discussions between UST and General Motors had been at the time of the e-mail?

A. No, because the second sentence there, which was my understanding at the time, was once the Treasury understood that there were very few active workers that a much lower level of funding was going to be required.

Q. Okay. So would it be fair to say that there came a point in time when the Treasury decided, or I should say learned, that there were very few active members that were included in the non-UAW union?

A. Yes.

Q. Do you know when that was and how they learned it?
A. It would have been likely early mid-May and we would have supplied the information to them.
Q. And prior to that point, was the Treasury position -- prior to the point they learned how many actives were involved, prior to that point was it the treasury position that General Motors, the New General Motors, should provide the same level of funding for the non-UAW unions that the UAW had gotten?
A. We had, Mr. Kennedy, reviewed various alternatives and I didn't have, at any point, until later in May what I considered firm direction from the Treasury as to what they wanted to do. We looked at multiple scenarios but we had not yet engaged in something which I would consider to be direction to us.
Q. I take it at least one of the scenarios you did discuss with Treasury was the idea of funding the non-UAW retiree health and life at the same level as the UAW had received?
A. Yes.
Q. It is true, as we stand here today, that the IUE-CWA has very few active members, correct?
A. Yes.
Q. If we went back in time a year to June of 2008, the General Motors Moraine plant was still operating, correct?
A. Yes.
Q. It might have had 1,500 members?
A. That's a reasonable estimate.

Q. Okay. And General Motors closed that plan on December 23, 2008, correct?

A. Yes.

Q. So am I right that General Motors is using the fact that it closed the last IUE plant to then decide that it didn't have to provide continuing healthcare to the 25,000 IUE retirees?

MR. MILLER: Your Honor, I object to the question, grounds of relevance.

UNIDENTIFIED ATTORNEY: Can't hear.

MR. MILLER: I object to the question on the grounds of relevance.

THE COURT: Overruled. You may answer, Mr. Henderson.

A. We closed the plant because sales of the vehicles built in that plant were no longer sustainable.

Q. And the IUE asked you to put additional product in that plant, correct/

A. They did.

Q. And there has been product assigned since that plant was closed, isn't that correct?

A. Yes.

Q. And that some of those products could have been put in to the Moraine facility, isn't that also correct?

A. Could have, yes.

Q. And if product has been put in the put in the Moraine

plant, then is it your understanding that the IUE-CWA members would have been given the same OPEB treatment that the UAW members were given as a result of this bankruptcy?
A. I don't know but we would have had active employees and we would have had to negotiate an agreement.
Q. Now at some point in late May, you understood that GM was prepared to offer a retiree health and life plan to the non-UAW unions that would cost eighty percent less then the amount being paid by the Old GM, correct?
A. The liability would be eighty percent less, yes.
Q. So that would be -- in essence we'll call it a twenty percent offer to the non-UAW unions?
A. Yes.
Q. And did you receive any information from your labor relations executives on whether a twenty percent plan was likely to be accepted by the non-UAW unions?
A. Yes.
Q. And what is it they advised you?
A. They advised that this would likely -- very likely not be acceptable.
Q. The ultimate offer that was made to the non-UAW unions for the retiree health and welfare, according to the company's figures, represents a thirteen percent recovery, correct?
A. Versus the book value, yes.
Q. And if your labor relations advisors had indicated to you

that the unions were unlikely to accept a twenty percent offer, what made you think that a thirteen percent offer would in some way be acceptable to the IUE-CWA, the USW or the IUOE?

A. We offered, as we put together the package our conclusion was we would offer the retirees, the IUE and the steel workers retirees the same packages we have for our salaried employees for healthcare. That was the conclusion and that's what we felt we should move forward with.

Q. Now you had earlier identified, and I'm sorry I'm backtracked a little bit, about the 7.9 billion discussion you had with Mr. Rattner that various executive programs were included in that 7.9 billion, correct?

A. Correct.

Q. And is it true that on May 11, 2009 you personally sent Mr. Rattner an e-mail that included several presentations in effect advocating Treasury to continue the executive SERP (ph.) and life insurance?

A. We made -- early May we made a number of presentations, including myself to Steve, Steve Rattner, talking about what alternatives might be for treatment of the SERP and other liabilities.

Q. Well, would you look at Exhibit 8 --

A. Sure.

Q. -- in the portion of the book that deals with your deposition?

A. Yes, sir.
Q. That's an e-mail you sent to Steve Rattner on May 11, 2009, correct?
A. Yes.
Q. And attached to it is a document entitled sales rationale for considering salaried retiree treatment?
A. That's correct.
Q. And the third and fourth pages refer to executive compensation issues?
A. That's correct.
Q. Now isn't it fair to say, Mr. Henderson, that in both of these attached documents you advocate for existing General Motors executive programs to be continued and absorbed in the New GM?
A. Yes.
Q. Did you ever send a similar e-mail to Mr. Rattner advocating that the IUE, USW or operating engineer retiree health and life insurance be continued by the New GM?
A. Well, we recommended that the pensions be brought forward for the IUE and the steel workers along with the UAW. And with respect to the obligation for health and life, as I said, we identified what the size of the liability was and what the options would be.
Q. But in the give and take of actual negotiations, I assume Mr. Rattner --

MR. KENNEDY: Let me withdraw that.

Q. I assume you expected Mr. Rattner would regard it as significant that you sent him a personal e-mail urging the continuation of certain programs; wouldn't you agree with me on that?

A. Yes.

Q. And did you ever send a similar personal appeal to Mr. Rattner urging that the IUE or other union, non-UAW union, OPEB be continued by the New GM?

A. I certainly was involved in discussions with Steve Rattner regarding bringing forward at least a portion of the liability to the new company so that some benefits could be provided, yes.

Q. Okay. Now the portion that would be brought forward to the new company was directly --

MR. KENNEDY: Let me withdraw that.

Q. When you talk about bringing forward a portion of the liabilities owed to the IUE and the steel workers and the operating engineers, you're referring to permitting certain of the IUE and other union non-UAW union members to participate in the salaried post-retirement plan, correct?

A. For healthcare, yes.

Q. For healthcare. Now did you at some point describe to U.S. Treasury what the terms of the salaried plan were that would be extended to the IUE and other union representatives?

A. Yes.
Q. In fact, if you look at Exhibit 13 to your deposition at page 5, does that contain the detail on what the actual plan would be if they were put in the pre-Medicare plan?
A. Yes.
Q. Is that the plan that was ultimately offered to the IUE or the steel workers or the operating engineers, do you know?
A. I don't believe so.
Q. In fact the plan that's described on the page 5 of Exhibit 13 is significantly better from the point of view of the participants, meaning cost the participants a lot less then the plan that was ultimately offered to the IUE-CWA and steel worker an operating engineer members, correct?
A. The final -- we did make final changes in order to achieve it, a two-thirds reduction of the liability.
Q. And the basic assumption that you had in talking with the Treasury representatives in late May, is that the IUE, steel worker and operating engineer members would be offered the same plan as salaried retirees, correct?
A. Yes.
Q. The plan for salaried retirees was cut off at age 65, correct?
A. That's right. Medicare.
Q. So it was a pre-Medicare plan?
A. That's correct.

Q. As things stand here today, the plan that General Motors offers to the IUE, steel workers and operating engineers is a retirement to death plan, correct?

A. Yes.

Q. There is no cutoff at age 65?

A. That's correct.

Q. So the plan you were offering to the unions I represent included a cutoff at age 65 of all benefits and a limited benefit pre-65?

A. Similar to our salaried retirees, yes.

Q. Okay. But isn't it a fact that your salaried retirees, as of January 1, 2009, were provided a 300 dollar a month pension increase so they could purchase a Medigap plan to cover them post 65?

A. We did increase the benefit by 300 dollars a month at the time we made these final -- at the time we made these changes, yes.

Q. And isn't it a fact that the purpose of the change was to permit the salaried retirees to purchase insurance to replace the insurance that was taken away from them on January 1, 2009?

A. Yeah, given the status of our salaried pension plan at that point, we were able to do that and we did that, yes.

Q. Okay. The offer that was made to the IUE-CWA, the steel workers and the operating engineers did not include a similar 300 dollar a month pension increase for retirees whose health

insurance, GM health insurance would be taken away as a result of your offer, correct?
A. Correct.
Q. Did you explain to Treasury at any point that although you were purporting to offer a parallel plan, in fact it was different in that the post 65s, under the salaried plan, had an extra 300 month and under the plan you were proposing to the unions I represent there wouldn't be the 300 dollars a month?
A. I believe we did.
Q. So did Mr. Wilson know that?
A. I don't know for certain.
Q. Now I'd like to direct your attention to Exhibit 14. It's a chart entitled salary and splinter union benefit obligations; do you see that, sir?
A. Yes.
Q. I'm referring to the second page of Exhibit 14. And the total obligations is identified as 7.883 billion?
A. It's the 7.9 billion I referred to before.
Q. Okay. And if we wanted to isolate the individual components of the liability, we would simply look under the word total in the first column under either retiree basic life or salaried retiree healthcare and so forth?
A. Correct.
Q. At the time this chart was created, it appears to have presented a sixty-two percent reduction in these six

categories, correct?

A. Correct.

Q. And was that approved by the board of General Motors?

A. It was approved to submit to the Treasury by the compensation committee of the board of General Motors.

Q. And in assembling this, who is it that decided which components would be cut the most, when you were looking at the sixty-two percent proposal that you were going to give to Treasury?

A. The management was responsible.

Q. And is it fair to say that the executive non-qualified pension plan, the SERP, under the initial proposal was cut by only thirty-two percent?

A. In total, yes.

Q. And would you agree with me that in many bankruptcy proceeding an unfunded, unqualified SERP goes to zero?

MR. MILLER: I object to the question.

THE COURT: Overruled.

Q. Now in the 363 proceeding that's being contemplated, New GM is going to absorb 787 million of the existing liabilities under the SERP, is that correct?

A. Yes.

Q. And is it also true that more than two-thirds of that 787 million is payable to executives that have already retired?

A. I believe so. Yes.

Q. So your analysis of the IUE-CWA and steel worker and operating engineer liability in which it needn't be carried forward to the New GM because there were no active employees, why would you, on the other hand, permit recovery of two-thirds of that 787 million by New GM even though these are retired executives who will perform no further work for either Old GM or New GM?

A. First of all, it was the decision of the purchaser in this case but in our judgment the pension plans for both the salaried and the hourly employees were unaffected and being carried forward in their entirety to the New General Motors. And so therefore carrying forward a portion of the executive non-qualified plan would be appropriate. But in this case, it had a thirty-two percent reduction.

Q. Would you agree with me that for individuals whose -- individual executives whose combined income, between the salaried retirement plan and the SERP plan was less than 100,000 dollars a year in retirement only received a ten percent decrease?

A. A ten percent decrease in their SERP.

Q. In their SERP.

A. Yes.

Q. Okay. So if someone had a 4,000 a month salaried retiree program benefit and a 4,000 a month SERP benefit, meaning 8,000 a month, they received a cut of 400 dollars in their benefit?

A. That would be accurate, yes.
Q. And are you under the impression that there's some basic fairness between taking executives and cutting them by 400 dollars and at the same time eliminating entirely the health insurance that had been promised to IUE-CWA members for years? Is there a fairness to that?
A. Our view was the fairness valuation of the pension was bringing forward the pension in its entirety for all hourly and salaried employees was an important consideration and then having all executives salaried and the IUE and the other unions on the same healthcare plan was the appropriate treatment.
Q. Now, at some point, when General Motors suggested that the group of liabilities identified on the first page of Exhibit 14 was cut by only sixty-two percent, is it accurate that the Treasury came back to you and said we said two-thirds, we meant it, bring it up to sixty-seven percent?
A. Correct.
Q. And does this tell us where that additional five percent was found within all of these categories?
A. Yes.
Q. It was found from the salaried retiree healthcare and the non-UAW union healthcare, correct?
A. Correct.
Q. And the effect of that ultimate change was to reduce the value of the offer to the non-UAW unions to only thirteen

percent of what the book value of the obligation showed?
A. Correct.
Q. And that 400 million dollars in extra reductions was achieved by making it, the health plan, less lucrative for participants and cheaper for GM, is that fair to say?
A. Correct.
Q. In fact, the health plan that was offered to the members of the IUE-CWA and the other unions, is one in which the company's obligations are capped and fixed, is that true?
A. Correct.
Q. And the cap is about 4,000 dollars a year for a single and 8,000 for family?
A. I believe that's true, yes.
Q. And those caps are based on 2006 medical figures?
A. Yes.
Q. But are you aware that the mechanic for accomplishing the extra 400 million dollar reduction in what we've identified as Exhibit 14, page 2 was to lower those caps for years beginning 2010?
A. No, I was not aware of the mechanic.
Q. What did you think the mechanic was for squeezing 400 dollars more out of the union retirees and the salary?
A. There were changes in vision and dental. And I was aware that further changes needed to be made in order to implement that direction.

Q. And if I told you those changes were to reduce the outyear cap so as we go on this plan becomes more and more expensive for union members, would you believe me?

A. Oh, yes, I would.

Q. Are you aware that when the plan that was presented to the IUE-CWA on June 5th of this year, was presented -- it was done a take it or leave it basis?

A. I think it was presented -- I don't know on what basis it was presented, I wasn't at the meeting.

Q. Was the first offer what the company described as its last, best and final offer?

A. I think it was described as what we were able to provide as part of the negotiation with the purchaser.

Q. If you had taken -- and when I say you, I mean General Motors, the extra 400 million that was used to get to sixty-seven percent from the SERP program, could the benefit plan that was offered to the IUE-CWA and other unions have been better from the point of view of the individual participants?

A. Yes.

MR. KENNEDY: I have no further questions, Judge.

THE COURT: Okay. I would like to keep going till 2 or 2:30, but I don't think we should do away with the lunch hour entirely.

MR. KENNEDY: Your Honor, my associate reminds me that I should offer these documents into evidence.

THE COURT: All right. Are there evidentiary objections? All right, hearing none, I'll admit it.

MR. KENNEDY: Thank you, Your Honor.

THE COURT: Yes, ma'am?

MS. KATZOFF: Your Honor, my name is Sue Katzoff and I represent the Schaeffer Group. And I believe I have a couple of questions which have not --

THE COURT: You represent who?

MR. KATZOFF: The Schaeffer Group which filed an objection to the motion. And I believe I have a couple of questions which are not duplicative of anything we've heard yet today.

THE COURT: First I need your name, then I need to understand the Schaeffer Group in the context of the various categories that I said I will be taking.

MS. KATZOFF: Okay, Your Honor. My name is Sue Katzoff.

THE COURT: K-E --

MS. KATZOFF: K-A-T-Z-O-F-F.

THE COURT: Okay, Ms. Katzoff.

MS. KATZOFF: And I represent the Schaeffer Group which is part of a tort litigation not covered by the other tort claimants. But we have sued GM as a third party for common law contribution and indemnification.

THE COURT: All right. Now, I don't think the

principal advocate for your class has been heard yet, if I'm not mistaken.

MS. KATZOFF: I don't know that I have a class beyond --

THE COURT: Are they tort litigants?

MS. KATZOFF: We, personally, are not. We are being sued by a former employee. And we have in turn sued GM for common law contribution and indemnification.

THE COURT: All right. You know, all my question is trying to find out where you are could possibly take longer than your questions. So just go ahead.

MS. KATZOFF: Thank you, Your Honor.

THE COURT: But I do want everybody in the room to understand that this is the kind of thing I'm trying to avoid by an orderly procedure. Go ahead, Ms. Katzoff.

MS. KATZOFF: Thank you.

CROSS-EXAMINATION

BY MS. KATZOFF:

Q. Good afternoon.

A. Good afternoon.

Q. I just have a couple of questions for you. I assume, and correct me if I'm wrong, that you're aware that your attorneys on behalf of GM filed on or about June 26th the first update to the seller's disclosure schedules which formulated a part of the sale motion?

A. Yes.

Q. And as pat of that they identified for the first time on Schedule 2.2(a)(7), which had not previously been filed, what personal property was going to be included, and, therefore, you could determine what could be excluded from the sale motion?

A. I'm not aware of that, no.

Q. Okay. So you're not aware that one of the things listed on the schedule is the GMPT Messina plant, specifically the metallurgy and sand lab as being part of the sale motion?

A. Well, I know we needed to deal with all of our facilities. Perhaps, I could see the document?

MS. KATZOFF: Your Honor, I only have what I printed off of the website. May I approach the witness and show him the exhibit?

THE COURT: Have you shown it to your opponents?

(Pause)

MS. KATZOFF: May I approach the witness, Your Honor.

THE WITNESS: Okay. Thank you.

MS. KATZOFF: You're welcome.

Q. The document as submitted lists the personalty that is to be included in the sale transaction, which the particular personalty is located on an excluded real property site. So the real property is not being transferred as part of a sale motion, but the particular identified personalty is, according to the schedule.

A. Okay.

Q. So my question to you is can you tell me what is included in the highlighted item located at the Messina plant?

A. No.

Q. Is there someone at the company that can identify with particularity what's included in that personalty?

A. Yes.

Q. And who would that be?

A. It would be the head of the core train, basically engines and transmission, power train engineering because it's a lab.

Q. And who is that person?

A. It could be Dan Hancock.

Q. And where is he located?

A. Detroit.

Q. Detroit.

A. Actually, Pontiac, Michigan in this case.

Q. So you, then, can't tell me whether or not particular cast line or furnaces are included in the personalty that is subject to the sale motion?

A. I'm sorry, ma'am, I cannot.

MR. MILLER: The exhibit says metallurgy and sand lab complete. That's what's being transferred.

MS. KATZOFF: Yes, Your Honor. But I don't know what's included in that. And that's what I was asking the witness.

THE COURT: I think the witness told you he doesn't know, and he can't give you any assistance in that regard, Ms. Katzoff.

MS. KATZOFF: Right. I was just responding to the objection. I know what the exhibit says, I don't know what is included, that's all I was asking.

THE COURT: Any further questions?

Q. You had indicated that the Old GM would have 950 million dollars dedicated to the wind-down process. Does the Old GM currently continue funding its workers' comp insurance?

A. It's my understanding that with the exception of four states workers' compensation moves to the new company. There is still an open issue with respect to the State of Michigan on certain conditions regarding that. But other than that workers' comp, there are four states that wouldn't happen, that would not move forward, the rest of them come to the New GM with this one issue in Michigan that I know is still open.

Q. And do you know with respect to New York State whether the workers' comp will move to the new company?

A. I believe New York State it does move to the new company.

Q. And the Old GM currently is self-insured with respect to its workers' comp?

A. I believe so, yes.

Q. And do you know if the New GM would also be self-insured?

A. In general that would be our preference, yes.

Q. And I have one last question. With respect to any books and records relative to anything that's going to be part of the sale motion, are the books and records going to be transferred as well?

A. I believe so, yes.

Q. And if something is excluded from the sale motion, can I assume, then, that books and records will remain with the Old GM?

A. I believe books and records are included in transition services agreements, but they're certainly available for the Old General Motors.

Q. Okay.

MS. KATZOFF: Thank you. I have nothing further.

THE COURT: All right. Before we take the next questioner, I'm going to speak very softly and I'm going to try to keep my cool. We have hundreds of lawyers listening to these proceedings in three courtrooms, all of whom are presumably billing their clients. And I would think that everybody in these three rooms shares the objective putting more money into the pockets of creditors and minimizing the legal fees associated with serving their needs. And keeping this hearing focusing on the important stuff. It was for this reason, folks, that I directed an orderly procedure by which questioning would proceed. And I have a fear that people have forgotten why we're here, what we're trying to accomplish.

And, though, I sometimes issue my rulings without saying I rule, folks, when I say something I mean it.

Now, I'm not going to deny anybody due process. But I expect questioning more focused on the important issues that we need to decide, and by the people that I've authorized to speak, as the people whom I reviewed of the briefs suggested to me, have the greatest attention to the issues that I need to decide here. Okay.

Mr. Jakubowski, are you now ready to proceed?

MR. JAKUBOWSKI: I am ready, Your Honor. Thank you.

THE COURT: Come on up, please.

CROSS EXAMINATION

BY MR. JAKUBOWSKI:

Q. Good afternoon, Mr. Henderson.

A. Good afternoon, Mr. Jakubowski.

Q. You remember me. Mr. Jakubowski, I represent five tort claimants, personal injury claimants, and I also am here as co-counsel with a number of consumer organizations, including the Center for our Safety and Public Citizen.

A. Yes, sir.

Q. Do you have this big binder right there?

A. Okay.

Q. I'd like to turn to your deposition. And, in particular -- excuse me for just one second.

(Pause)

MR. JAKUBOWSKI: We were talking about skinning the cat earlier, Your Honor. The Federal Express that I ordered somehow has not arrived even in my hotel. And Ms. Rosenbaum checked the hotel and it had not arrived yet.

I think in the -- because it's important to move this along, I think I can go through the matters with Mr. Henderson on the basis of the fact that he's already seen the documents, we've had a discussion about it. And I think I can do it through testimony. And I don't believe I'm going to need the three other short exhibits that I was intending on introducing into evidence.

THE COURT: You can try subject to the attorney's rights to be heard.

MR. JAKUBOWSKI: Okay. Let's try that, Your Honor.

Q. Mr. Henderson, do you recall that there is an item on your balance sheet as of 12/31/08 that identifies what the product liability claims are that have been accrued for the company, correct?

A. Correct.

Q. And that number we went through was 916 million as of 12/31/2008, right?

A. Yes.

Q. And you explained that that number relates only to product liability claims, correct?

A. Claims and claims costs.

THE COURT: Pause, please, Mr. Jakubowski. By claims cost you mean the cost of processing the claims --

THE WITNESS: And defense costs.

THE COURT: I beg your pardon?

THE WITNESS: And defense costs, Your Honor.

THE COURT: Okay, continue.

Q. And, in fact, there's two major components of the lost reserve of 916 million, correct?

A. Correct.

Q. And you didn't pick that number out of thin air, did you?

A. No.

Q. And neither did anyone at GM, correct?

A. No.

Q. And, in fact, what they did is they hired Aon Global Risk Consulting, right?

A. Yes, that's correct.

Q. And they hired Aon Global Risk Consulting in order to do an analysis of what those lost reserves should be for the year-ended 2008, correct?

A. Yes.

Q. And the methodology was rigorous, right?

A. Yes.

Q. And you enabled them -- when I say you, I mean GM. GM gave the full access to the litigation records, correct?

A. They were retained for purposes of providing expert

information for our financial statements. So I believe we would have provided them any and all access necessary in order for them to do that job.

Q. Okay, thank you. And the purpose of the report as you understand it, was to provide assistance to GM in establishing a reasonable estimate of retained loss and defense costs and containment expense, right?

A. Correct.

Q. And you believe they did that, correct?

A. Yes.

Q. And you believe they did a satisfactory job, correct?

A. No reason to believe otherwise.

Q. And, in fact, you put that number in your balance sheet?

A. Yes.

Q. And, again, let's go through the two components. The first component is the loss component, right?

MR. MILLER: Excuse me, Your Honor. I object. I don't understand the relevance of this. If Mr. Jakubowski wants a mitigating offer of proof, maybe we'll stipulate to it. But, otherwise, as to the issues that affect this motion before Your Honor, I don't see the relevance of this.

THE COURT: The relevance, Mr. Jakubowski?

MR. JAKUBOWSKI: Well, I think it's pretty clear, Your Honor. The issues here are what are the liability claims that are being left behind, and what are the liability claims

that are being assumed.

THE COURT: No, I understand your clients' position, and I'm happy about them, but have more difficulty understanding how the exact number of them -- dollars to the legal issue I have to decide.

MR. JAKUBOWSKI: Well, the legal issue you have to decide is whether or not there are releases of non-debtors with respect to claims, correct? In particular, whether the purchaser is going to be released from claims asserted by non-debtor third parties, under a theories of successor liability. And so the question is what is the magnitude of that? And the reason that's important is because later on I will establish through the board meeting that there was as determination made as to how a liability should be segregated pre -- for the liabilities that would be assumed by NewCo and the liabilities that would be left at OldCo. And there was a decision that was made through a process that took about a month, and that decision was made at the board meeting on May 29th, correct, Mr. Henderson?

THE WITNESS: Yes.

THE COURT: Wait, you don't do that.

MR. JAKUBOWSKI: I'm sorry, Your Honor, I apologize. But I'd just rather confirm that -- I'm sorry. Okay, I apologize.

THE COURT: Go on.

MR. JAKUBOWSKI: So at that board meeting on May 29th/May 30th, the decision was made as to what liabilities should be assumed, and what liabilities should be left. The PowerPoint presentation, I believe the testimony is that at that meeting a determination was made as to what that number should be. And there was an additional determination made that there would be no purchase price adjustment afterwards, period. There would be no purchase price adjustment afterwards.

Now, afterwards, after the case was filed, you know that there have been changes to the deal. There have been changes to the deal in two ways. The first way is that future claims are being assumed. The future claims is part of this 916 million dollars. The question is how much of the 916 million dollars is it and I believe that is established by the report.

Now, the question is, is there a purchase price adjustment as a result of that? And the answer is no, there is no purchase price adjustment because of that. And so --

THE COURT: I'm trying to be patient. Which I was looking for the answers of which was legally relevant to the argument vis-a-vis these claims and as articulated by the creditors' committee and certain other parties in this hearing.

MR. JAKUBOWSKI: I will tell you how it is. TWA in a number of cases suggest that it may be relevant for purposes of determining successor liability whether there is a purchase

price adjustment as a result of liabilities that would be assumed or not assumed as part of the transaction. It is my contention through the evidence that if the remaining successor liability claims with respect to product liabilities were assumed by the buyer, that, in fact, there would be no purchase price adjustment. And so if they'd done it voluntarily there could be nor purchase price adjustment. If it's done involuntarily through you, I believe there could be no purchase price adjustment. And, therefore, I think it's relevant to the analysis, the policy analysis in TWA as to whether the assumption of the liabilities would have an affect on the purchase which may have a related to affect on the estate.

THE COURT: Now, I'm not going to rule on the merits of your ultimate argument. Creating pauses suggest my uncertainty in that regard. I'm going to let you make your record subject to you asking the questions in a quickly and -- you articulated the reasons by which you were asking them.

MR. JAKUBOWSKI: Okay.

THE COURT: Without prejudice to Mr. Miller's rights.

MR. JAKUBOWSKI: Understood.

THE COURT: The last objection is overruled.

BY MR. JAKUBOWSKI:

Q. Now, the ultimate loss as determined as of 12/30/08 was 916 million, correct?

A. Correct.

Q. Now, that's broken into two pieces, correct? One is cases that exist, right?
A. Yes.
Q. And the other are cases that have not been reported yet?
A. That's correct.
Q. And those are called the incurred but not reported cases, correct?
A. Correct.
Q. And if they're not reported, the likelihood, they haven't been incurred yet. In other words, they're future claims, right?
A. I think incurred but not reported suggest they have been incurred but not reported.
Q. Well, but isn't it the case that you said that for every vehicle year as to which there's a reserve that it includes all the expected future losses with respect to their vehicle year?
A. That's correct.
Q. And, therefore, there are a number of claims in that reserve that, in fact, had not even been incurred yet, have not existed?
A. The accident hasn't happened yet, yes.
Q. Okay. And so you break into these two categories of cases that exist, cases that don't exist. Now, in the report do you recall that for the cases that have been filed and exist the reserve was 414 million dollars, approximately? I guess it

would be in your deposition, but I can --

A. Let's go to the page of the deposition so I can refresh my recollection?

Q. Okay, sure.

A. I think you were after Mr. Bressler. There you are Mr. Jakubowski, page 184.

Q. Thank you.

THE COURT: I don't think I have it. I'm going to let you proceed without giving it to me, but if it makes a difference I'm going to need to see it.

MR. JAKUBOWSKI: Okay, Your Honor.

THE COURT: If it refreshes Mr. Henderson's recollection I don't' need to see it.

MR. JAKUBOWSKI: Well, what I can do, Your Honor, is simply approach the witness, show him the report and he can confirm that it's in the report. Again, I apologize, the Federal Express simply did not come today, and there's nothing I can do.

MR. MILLER: Your Honor, please, I'm going to renew my objection as to relevance. As I understand Mr. Jakubowski's argument is that the amount is so small Your Honor can order the treasury to assume that liability. The way the deal is structured, Your Honor, if they're dissatisfied with sale order, they don't have to close. But what he's doing is making a legal argument. He can make an order of proof, and then we

can move on, Your Honor. This is hardly relevant to the issues.

THE COURT: Is there going to be a credibility dispute or any other factual dispute, or as is offer of proof, or you're going to accept it as a given.

MR. MILLER: I'll accept it, Your Honor.

MR. JAKUBOWSKI: Okay. That would be fine, Your Honor. I'd be happy to go through it.

THE COURT: If you will accept it as a given, is there anybody who is aligned with Mr. Miller who disagrees with Mr. Miller's undertaking?

All right, no response. Mr. Jakubowski, make your offer of proof.

MR. JAKUBOWSKI: Okay.

THE COURT: And if Mr. Miller accepts it as being part of the record, we'll move on.

MR. JAKUBOWSKI: Thank you. The evidence through Mr. Henderson and through this exhibit would show that the 916 million dollars in losses are broken in between 414 million dollars of existing claims, and 502 million dollars of claims to be incurred.

Of that amount, in fact, that's further broken down, because that's an aggregate amount that represents loss and expense -- litigation expense. And on page 32 of the report they break down the loss reserve, the actual claims for

liability at 388 million gross. The gross reserve of 916 million, 388 million, 793,000 represent cases that exist, and 376,403 represent, effectively, future claims that are to be incurred.

So that I believe is the -- and the remainder of 151 million reflects fees associated with the two buckets of case -- existing cases and future claims. And that's broken down twenty-five million dollars in legal fees for existing claims, and 125 million of existing fees for future claims. And that takes you up to the aggregate bucket of 414 million for existing claims, 502 million for future claims. That's all that I have to say with respect to this exhibit, Your Honor.

THE COURT: All right. Mr. Miller, are you okay with that as being incorporated his assumption that I can proceed with in any decision?

MR. MILLER: Yes, Your Honor.

THE COURT: All right. Does that --

MR. JAKUBOWSKI: It does, Your Honor. Thank you very much. I just had really a few more questions.

THE COURT: Oh, of course.

MR. JAKUBOWSKI: Let me finish up.

THE COURT: Yes, by all means.

BY MR. JAKUBOWSKI:

Q. Now, with respect to the liabilities that would be segregated as of the filing, in terms of what goes to the

purchaser and what stays with Old GM, there were certain politically -- what you called politically sensitive assets, and politically sensitive liabilities, right?
A. Correct.
Q. And what did it mean to categorize an asset or liability as politically sensitive?
A. We attempted to identify for the purchaser those assets and liabilities that might normally just simply be left behind in the Old General Motors. And we also identified assets, actually, that were in that category. But certainly liabilities. And we wanted to highlight for the purchaser what those liabilities were, how much they were, and what a range of possible treatments might be for each of those obligations.
Q. And one of those liabilities was product liability claims, correct?
A. Correct.
Q. And from the company's perspective, what is the customer relationship issue associated with product liability claims?
A. OH, as we look at product liability claims, the reputation of the company, whether it's via a warranty coverage, or for recall, or in this case, product liability is an important consideration for the company.
Q. And so from the company's perspective -- particularly, from a reputational perspective, you considered it important in your capacity as CEO of the company to assume -- to have all of

the product liability claims covered, correct?
A. We showed all the information to the purchaser. We shared with them what our views were on the reputational related elements of this particular decision. And discussed with them and negotiated with them how product liability might be treated, yes.
Q. And, originally, the decision was made by the treasury, correct, that none of those liability claims would be assumed?
A. The original decision was any vehicle sold post-June 1st, that the new company would assume liability for those. New company also continues to have indemnification responsibility with respect to our dealers. Subsequent to that, late last week, agreement was reached that we would modify that to ensure that any accident which occur post-closing would also be assumed by the new company.
Q. Okay. But in terms of the 916 million dollars that was on the balance sheet at 12/31/08, all of those liabilities under the original dealers of June 1 were rejected and were supposed to be left with OldCo, correct?
A. Can you repeat the question, please?
Q. As of the filing date, and as reflected in the existing purchase agreement -- excuse me, the purchase agreement that was filed as of June 1, all of the product liability claims that arose from cars that had been sold prior to the petition date, would not be assumed by the seller?

THE COURT: Mr. Jakubowski, does that go to you establish -- or at least, stuck in part of your proffer that a chunk of the 917 million was for the defense costs and processing costs. And that -- and this may or may not be in the same bucket, but a chunk of that is for existing claims and a chunk of it was for possible claims in the future.

MR. JAKUBOWSKI: True, Your Honor. And my point is that as of the first iteration of the document in June 1, none of those future claims, put aside the legal, none of those future claims that arose out of cars sold before the petition date were going to be picked out. One of the changes made by treasury was, in fact, to pick up those future claims that were -- that happened after the closing date.

THE COURT: Why don't you ask a new question that is more sharply consistent with what you established before.

MR. JAKUBOWSKI: Okay.

Q. So, there was -- after June 1 there was a change in the bucket with respect to product liability?

A. Correct.

Q. And that change was to effectively pick up the approximately 376 million dollars worth of estimated future claims that would be incurred after the closing?

A. I don't know if the number was 376 million, but certainly the conclusion was any subsequent -- any claim arising from an accident subsequent to the closing would be assumed by the new

company.
Q. And had the closing date been, for example, as of 12/31/08, that, in fact, the 376 million dollars of future claims would have, under the deal as it exists right now, been assumed by the purchaser, correct?
A. That's a fair estimate.
Q. But prior to that change the 376 million would not have been assumed, correct?
A. Yeah, that's correct.
Q. Okay. Now, with respect to that change it's your understanding that there's no change in the purchase price as a result of the buyer picking up this effectively 376 million dollar bucket, correct?
A. The consideration provided to Old General Motors in terms of shares warrants was unchanged as a result of this move.
Q. Did any consideration change that was being paid by the purchaser in the transaction as a result of this change?
A. Not to the best of my knowledge.
Q. Okay. So now we're dealing effectively with the 388 million dollars worth of what we'll call preexisting liabilities, okay. Now, those liabilities are not being assumed by the purchaser, correct?
A. So there would be vehicles sold prior to June 1st, and vehicles where the accidents incurred prior to June 1st. That's correct.

Q. Yes, that's correct. Vehicles that where the accidents were incurred, the cases exist, as of the petition date?
A. Correct.
Q. And that is -- let's assuming the closing date was 12/31/08 that number would be approximately 388 million dollars, correct?
A. Yes.
Q. Now, you said earlier there was another amendment that effectively picks up or indemnifies a third party for some of those claims, right?
A. Well, I don't think it was an amendment -- our agreement with our dealers provides indemnification for our dealers.
Q. So if the dealers are sued by some of these preexisting claimants under state laws or whatever state law exists to pay -- that would hold the dealer responsible for the product liability claim, I take it it's now going to be the obligation of the purchaser to indemnify the dealer for their loss?
A. That's correct.
Q. And have you undertaken any kind of analysis as to what that number is?
A. I have not seen that analysis, no.
Q. No. How many -- let me ask it this way. On a ballpark range, how many cars in the past three years, four years, are sold through dealers and versus any other manner?
A. All of our cars, other than direct fleet sales --

actually, even fleet sales are sold through dealers.

Q. So, effectively, what you're saying is that for product liability claims that were incurred in the past three years, to the extent that all of them were to go against -- have the right to go against the dealer, and would be successful against the dealer, the purchaser would be required to indemnify that dealer, correct?

A. Based upon all of those assumptions, yes.

MR. JAKUBOWSKI: Now, I guess I would like to make one additional proffer with respect to this report, Your Honor. And we will get it and I would like you to at least have it in your hand.

THE COURT: You know, what I'd like you to do, Mr. Jakubowski, I want you to take a second to concur with -- to consult with Mr. Miller and see if he concurs with what you would like to do.

(Pause)

Q. Now, let me ask this, Mr. Henderson --

MR. JAKUBOWSKI: I won't make that proffer, Your Honor.

Q. Let me ask you this. I take it that at the time that the purchaser signed off on the concept of indemnifying the dealers, correct?

A. Yes.

Q. And they did not demand a change in the purchase prices as

a result of that, correct?

A. It's part of our dealer contract, they understood that, yes.

Q. So there's going to be no increase to the purchase price as a result of this indemnity to the dealer?

MR. MILLER: Objection, Your Honor. That calls for a legal conclusion.

THE COURT: Sustained.

MR. JAKUBOWSKI: I'll stick with the last answer that we have, Your Honor. I think that last answer is fine.

Q. Now, I take it, Mr. Henderson, that none of the changes that were made with respect to the assumption by the purchaser of future claims and of indemnities for the dealers is in any way going to affect the viability of New GM, correct?

A. Not in my opinion, no. I agree with you.

Q. Now, I want to be clear on one additional point, because we're required to make submissions to the Court. With respect to claims that arise in this -- excuse me, that happen. With accidents that happen between June 1 and June 30, let's assume the purchase closing was today, that those claims are not being assumed by the purchaser, they're being left in the estate but they're going to be deemed an administrative claim, correct?

MR. KAROTKIN: Your Honor, that's a legal conclusion.

THE COURT: I have to sustain the objection insofar as it asks for a legal conclusion. If you're asking for this

man's understanding as a predicate for the next question, I'll permit it. What he says is not going to bind either the debtor or the creditors' committee or any other party in interest, vis-a-vis whether it's an allowed admin claim or not.

Q. Let me ask it this way to try to put it in a businessman's perspective. If there's a accident -- if an accident occurred on June 15th with respect to a car that was sold before June 1st, is it your understanding that in the event that a loss is determined that needs to get paid, that that liability will be paid by the purchaser?

A. Cars sold prior to June 1st?

Q. And the accident happened on June 15th. What's your -- who do you understand is responsible?

A. I don't know the answer to that question.

Q. Okay. But your understanding, though, is that one way or the other they're going to get paid?

A. I just don't know the answer to the question, I'm sorry.

Q. That's fine.

THE COURT: Mr. Jakubowski, so I understand the question you asked. Pre-filing date manufacture, post-filing date injury, that's the scenario for which you asked the question. And Mr. Henderson told you he doesn't know.

MR. JAKUBOWSKI: Correct, pre-closing -- the accident was pre-closing.

Q. So the sale was pre-filed, the accident was post-petition,

pre-closing, who pays, the estate as an admin -- who pays, the state or the purchaser?

A. Mr. Jakubowski, there's been some discussion about this. I just don't understand exactly how it works, so I can't answer your question in the detail that you'd like.

Q. So were you here when counsel represented on the record what the change in the deal was with respect to that?

A. I focused on accidents post-closing that would be covered. I know there's some discussion, but it was my understanding it was vehicles sold post, but I must say I'm not an expert in this area.

Q. Okay. I take it, though, that with respect to the negotiations that you've testified at length here, it was your understanding that it was really up to the purchaser. At then end of the day it was up to the purchaser to decide which liabilities would be assumed, and which liabilities would be left behind, right?

A. Correct.

Q. And you would make some recommendations, but at the end of the day that wasn't your call, right?

A. We made recommendations, we negotiated, but the purchaser made those decisions.

Q. And is it your understanding that -- isn't it your understanding that the relative priorities among the various claimants that are being assumed, was completely irrelevant to

the purchaser?

MR. MILLER: Objection, Your Honor, I don't know what's being questioned.

THE COURT: Sustained.

MR. JAKUBOWSKI: Okay. I'll ask that of Mr. Wilson, Your Honor, I don't think I need to incur that anymore. If you don't mind, give me one more minute here, Your Honor.

(Pause)

MR. JAKUBOWSKI: One further question.

Q. You discussed with the purchaser the concept of assuming the pre-petition for product liability, correct?

A. It was one of the options, yes.

MR. MILLER: Your Honor, the questions been asked and --

THE COURT: Well, that question has been asked and answered. But if you're using that as the predicate for the next question, it's common for litigators to just ask it to set the table for the next question. Go ahead.

Q. And isn't it true that after the filing you made no additional attempt to try to get the purchaser to assume these pre-petition claims?

A. Well, there's been discussions with the purchaser with regard to product liability after the filing, pretty significant amount of discussions during the month of June. So it wouldn't be true that we had no discussions.

Q. But I thought your testimony was that the purchaser made it very clear that they had no interest in taking responsibility for pre-petition claims, correct?

A. Yes, correct. Pre-petition accident.

Q. Pre-petition accidents, pre-petition claims?

A. Yes.

Q. And, therefore, you didn't even see a need in June to even talk to them about that issue because they were so dead-set against it, correct?

A. Well, we had ongoing discussions through the month of June on product liability, but their conclusion was clear.

Q. But those discussions were focused on future claims, correct?

MR. MILLER: Your Honor, the witness answered the question, he said there were discussions.

THE COURT: Sustained.

MR. JAKUBOWSKI: Okay. Your Honor, I have no further questions. I thank you for your indulgence.

THE COURT: All right. Before the next questioner I want to ask you a question -- a few questions under 614. Remind you, of course, that you have a right to object to my questions.

Mr. Henderson, I don't know how much you drilled down in the framework of management, do you have any knowledge for relief that isn't speculation as to who often GM gets sued in

products liability actions when it is sued and the dealer that sold the car isn't also sued?

THE WITNESS: No, Your Honor, I don't know the answer to that question.

THE COURT: Okay, no further questions. Does the Center for Auto Safety have any questions at this point?

UNIDENTIFIED ATTORNEY: No, we do not.

THE COURT: It's now 2:20, I think it's now time for a lunch break. And I want thing to keep moving forward. And I would make it less than an hour except that I don't think you can get down in the elevators quickly enough and get back up quickly enough, so we're going to make it an hour.

For anybody who wants to question after the lunch break I'd like them to register with my law clerk to tell me who they are, who they represent and what they propose to question about. We're in recess for one hour.

(Recess from 2:22 p.m. until 3:23 p.m.)

THE COURT: Have seats, everybody. Ad hoc torts committee. Mr. Bressler?

MR. BRESSLER: Yes. Thank you, Your Honor. Good afternoon. After a review of what's been said already and having reviewed Mr. Henderson's deposition, for which she was more than forthcoming, we're going to designate deposition sections and not ask any live questions.

THE COURT: Very well. What I would like you to do,

Mr. Bressler, is give your designations to the debtor and the debtor is going to have twenty-four hours to counter-designate. And then I would like you or them, it doesn't matter to me, to give me the parts that's been designated, your designations in one color, theirs in another, all returned with markings so I'll know whose is who. And I'll read it.

MR. BRESSLER: Thank you, Your Honor.

THE COURT: I would like to have it available as soon as is practical for the debtors. But the debtors can take the full twenty-four hours after they get it from you if they need that. Oh, U.S. government wants the same opportunity?

MR. JONES: Yes, Your Honor. David Jones from the U.S. attorneys' office. Please, we would appreciate that.

THE COURT: Of course. Anybody else feel like they want counter-designation rights? All right. Mr. Jones and Mr. Miller or their designees will get it. And they'll have a chance to assign a designee.

MR. BRESSLER: Thank you, Your Honor.

MR. JONES: Does Mr. Bressler know, Your Honor, when we will get them?

MR. BRESSLER: His Honor said by noon tomorrow. We'll try to get them over first thing in the morning actually.

MR. JONES: Thank you.

THE COURT: Okay. All right. Next. Oliver Addison Parker?

MR. PARKER: Just one minute, Your Honor.

THE COURT: Okay. For the four people who registered to question with my law clerk before the lunch break, I'm going to take Mr. Parker first and then I'll expect everybody, of course, to be nonrepetitive. And let's proceed.

MR. PARKER: Thank you, Your Honor. I'm Oliver Addison Parker. I'm an attorney in Ft. Lauderdale, Florida and I'm, I suspect, the largest uninstitutional bondholder of General Motors. I own five million dollars.

THE COURT: Pause, please, Mr. Parker. Just ask your questions.

MR. PARKER: Okay. Sure. Thank you.

CROSS-EXAMINATION

BY MR. PARKER:

Q. Mr. Henderson, first thing I'd like to ask you, Mr. Henderson, is in December of 2008, GM's liabilities were approximately 190 billion dollars and their assets were about 82 billion dollars, something in that ballpark?

MR. MILLER: Excuse me, Your Honor. Could he establish a foundation? Is he talking about --

MR. PARKER: I'm trying to establish a foundation for something.

MR. MILLER: If he wants to --

THE COURT: Don't communicate with each other. You're saying you want a foundation for the question he just

asked?

MR. MILLER: He's asking about assets and liabilities. Is he talking about for accounting purposes or what?

THE COURT: Fine. Sustained as to form. You can rephrase, Mr. Parker.

MR. PARKER: Okay.

THE COURT: Talk about whether you're talking book value, appraised value or whatever you want.

MR. PARKER: All right.

Q. In the fourth quarter in 2008, General Motors released a profit and loss statement, correct?

A. Correct.

Q. Okay. And under that profit and loss statement, they showed what they had, roughly 190 billion dollars in liabilities and something like eighty-two billion dollars in assets, is that correct?

A. I believe so.

Q. And so, under that profit and loss statement, shareholder equity in December of 2008 was negative, is that correct?

A. Correct.

Q. In 2008, the market value -- I mean, the share price of General Motors stock was somewhere around four or five dollars a share, is that correct?

A. Certainly, toward the end of the year, yes.

Q. And there were roughly 600 million, 650 million shares outstanding?

A. Correct.

Q. So the market value of the shares was somewhere between two and a half and three billion dollars? Maybe three and a half billion dollars?

A. Reasonable estimate.

Q. Okay. Now, in December 1st of -- sorry. In December 31st of 2008, General Motors signed a loan agreement with the United States Treasury, is that correct?

A. Correct.

Q. And under the terms of the loan agreement, you were supposed to get 13.4 billion dollars, that's billion with a B, with a first installment on December 31st of four billion. Is that correct?

A. Yes.

Q. Now, is it safe to say that four billion dollars is more than twenty percent of shareholder equity whether you use book value, which was negative, or market value which was between two and a half and three and a half billion dollars?

A. Yes.

Q. Okay. The mortgages -- the money that you borrowed from the Treasury and the mortgages that you gave the Treasury, the mortgages, the liens, the -- whatever else you want to -- security interest, were the loans for property that you bought?

Were the liens on security for the property that you bought?
A. No.
Q. Were the loans on property -- sorry. Were the security interests, the mortgages, on property that you already owned? By you, I mean General Motors.
A. General Motors? Yes.
Q. Now, had General Motors entered into any sort of a contract with United States that required General Motors to enter into a pledge or security agreement to secure partial progress, advance or other payments pursuant to contractor statute?
A. No.
Q. Okay. So this isn't a case where the government needed tanks to be built or needed whatever to be built and in order to make sure that you could do the job that required some sort of a mortgage or pledge in order to secure performance, is that correct?
A. Correct.
Q. This was just a straight out we need to borrow money, we're pledging assets we already have to get it?
A. Correct.
Q. Okay. The mortgage agreement that you entered into with -- by you, I mean, General Motors -- that General Motors entered into with the United States Treasury, what did it encumber?

A. It encumbered a series of assets, intellectual property, nonmanufacturing real estate, selected stocks in foreign subsidiaries, small amount of inventory.

Q. Credited its mortgage real estate, is that correct?

A. Nonmanufacturing related real estate.

Q. Okay. Did it mortgage General Motors equity or shares in any manufacturing subsidiaries?

A. Domestic manufacturing subsidiaries?

Q. Yes.

A. No.

Q. I see.

MR. PARKER: Just a second to find it.

Q. All right. Have you -- has General Motors introduced the loan and security agreement by and between the borrower listed on Appendix A and borrower, the United States Department of the Treasury?

MR. SCHWARTZ: Yes.

MR. PARKER: Have you entered these in as an exhibit?

MR. SCHWARTZ: Yes.

MR. PARKER: Could I ask what exhibit number it is?

MR. SCHWARTZ: 6.

MR. PARKER: Okay. So that's --

MR. SCHWARTZ: Exhibit 6.

MR. PARKER: -- GM6?

MR. SCHWARTZ: Yeah.

BY MR. PARKER:

Q. All right. Do you have a copy of GM6?

A. I have no idea, Mr. Parker, if it's in that book.

Q. All right.

MR. PARKER: Could I have a copy of GM6 to show the --

MR. MILLER: May I, Your Honor?

MR. PARKER: Thank you. May I approach the witness, Your Honor?

THE COURT: Yes.

Q. Would you please go to -- there's two paginations on this. There's a pagination that says 29. There's another pagination that says 35 of 111. The 35 of 111 is the top right-hand corner.

A. Yes, sir.

Q. Okay. Are you looking at Section 4, Collateral Security, 4.01, Collateral Security Interest?

A. Yes, sir.

Q. Okay. Does subparagraph (a) read: "Subject to any amendments, restatements, supplements or other modifications in Section --

MR. MILLER: Your Honor, the document speaks for itself. He doesn't have to read it into the record.

THE COURT: Of course the document does. If you want to call his attention, however, to a particular portion of it

and then ask him a question, you can do that. But don't ask him to simply read the document itself.

MR. PARKER: No. I'm reading it in order to get someplace, Your Honor.

THE COURT: All right. I'll overrule that objection but it would be helpful to me, Mr. Parker, if you got to the point a little more quickly.

MR. PARKER: Well, I'm trying to, Your Honor.

Q. If you'll go down, one, two, three, four -- four lines, does it say that "GM is giving a lien on and security interest in all of its right, title and interest in and to all personal property and real estate wherever located and without limitation the following whether now or here ever existed on where they're located"?

A. That's what that provision says, Mr. Parker, but it does go on to the next page to provide exceptions to that.

Q. Okay. If you would please tell me where the exceptions are.

A. The definitions are on page 30 of excluded collateral.

Q. All right. What paragraph is that in?

A. Top of page 30.

Q. 30 --

A. Top of page 36 of 111.

Q. 36 of 111.

A. Where it says "And the borrower is not pledging or

granting a security interest in" --
Q. What line is that in that paragraph?
A. In the third line, sir.
Q. Okay. Go ahead.
A. It says "The borrower is not pledging or granting a security interest in any properties except that such property constitutes excluded collateral."
Q. Okay. Now, was there a list of assets that were included anywhere?
A. Sir, my understanding is what's outlined in the document.
Q. Wasn't there a --
MR. PARKER: Bear with me a second.
Q. Wasn't there an appendix with a list of schedules to the document?
A. Sir, I didn't -- I wasn't involved in negotiating this document. There could very well be appendices but I wouldn't have necessarily reviewed them.
Q. Okay. So when I asked you on Saturday, I believe it was, in your deposition --
A. Sunday.
Q. Was it Sunday?
A. It was, sir.
Q. Okay. Sunday. You're right. When I asked you Sunday in your deposition, I believe you indicated that the excluded properties dealt with foreign properties and not with domestic

manufacturing?

MR. MILLER: Excuse me, Your Honor. If Mr. Parker has a deposition, would he show it to him?

THE COURT: That's the way we do it. Sustained. Show him the deposition transcript and ask him if he was asked this question and he gave that answer.

MR. PARKER: Very well, Your Honor. Since I don't have the deposition, I can't do that. However, let me at least -- 'cause I may be able to get it from other witnesses later. Let me at least go over a couple of things. Have you placed into evidence the 1995 indenture.

MR. MILLER: Yes.

THE COURT: What evidence number is it?

MR. SCHWARTZ: 10.

MR. PARKER: Okay. Do you recognize these as being copies of 10 so I can let him look at them? It's what you have provided me, right?

(Pause)

MR. SCHWARTZ: He's got it up there.

MR. PARKER: Oh, okay.

Q. Do you have Exhibit number 10 in that book?

MR. SCHWARTZ: That's the wrong book.

MR. PARKER: That's the wrong book?

MR. SCHWARTZ: It's not in that book.

MR. PARKER: Which book is it?

MR. SCHWARTZ: The one he was looking at before.

THE WITNESS: This book? Oh, okay, yeah.

Q. Exhibit number 10.

A. Yes, sir, I do.

Q. Could you go to Section 1408?

A. Of this Exhibit 10? 1408, okay.

Q. Yes.

A. Give me just a moment, sir. 1408 --

THE COURT: 1408?

A. -- says New York Contract.

Q. Right, right. The indenture is governed by New York law, correct?

A. Yes.

Q. Okay. Would you go to Section 406, please?

MR. PARKER: This is a horrible copy.

A. Yes, sir.

MR. SCHWARTZ: Wait a minute, please.

A. Limitations on Liens section.

Q. Limitation on Liens. It basically says, does it not, that GM will not give --

MR. MILLER: Your Honor, same objection. The document speaks --

THE COURT: Sustained.

Q. Under 406, could General Motors give a lien on its manufacturing facilities? Domestic. Domestic manufacturing

facilities.

MR. MILLER: Objection. Calls for a legal conclusion.

THE COURT: Sustained.

Q. From your business judgment, could GM give a --

MR. MILLER: Excuse me, Your Honor. It's not a question of business judgment.

MR. PARKER: Okay.

THE COURT: Sustained. Mr. Parker, I normally cut a lot of slack for pro se litigants. I don't get that many pro se litigants who are lawyers. I think under those circumstances I have to give you kind of a hybrid kind of courtesy.

MR. PARKER: Right.

THE COURT: What I would suggest is if there is exception of the document of undisputed content that you want to rely on --

MR. PARKER: Yes, sir.

THE COURT: -- read him the sentence that you have in mind. Then ask him if he has a business understanding as to what that means. This businessman's understanding isn't binding on the company or any of the other parties in the case as -- with respect to what it says it's a judgment of law that I would make after hearing appropriate argument when necessary.

MR. PARKER: Right. Okay.

THE COURT: But if and to the extent relevant you want to ask him his businessman's understanding on the provisions in the agreement, I'll let you do it notwithstanding that the fact that the legal conclusions trumps his businessman's understanding.

MR. PARKER: All right.

BY MR. PARKER:

Q. Section 406 provides that "For the benefit of the securities, the corporation will not nor will it permit any manufacturing subsidiary to issue or assume any debt secured by a mortgage upon any principal domestic manufacturing property or corporation of any manufacturing subsidiary upon any shares of stock or indebtedness of any manufacturing subsidiary whether such principal domestic manufacturing shares of stock, indebtedness, et cetera, together with that of the corporation" -- basically -- well, it's very long. Have you read it?

A. I just read it here.

Q. Okay. When General Motors entered into its agreement with the United States Treasury, were they aware of the limitation on liens provision of this document?

A. Yes, sir.

Q. Okay. Was the Treasury Department aware of the limitations on lien provision of this document?

A. Sir, I wasn't involved in the negotiation of the document in December of '08, but it's my understanding they were aware.

Q. Okay. Is an empty building a manufacturing plant or facility?

A. If it's an empty manufacturing plant, yes, sir.

Q. Okay. So what does a manufacturing plant or facility mean to you, sir?

A. It's a facility that's intended to manufacture vehicles, power trains, stampings, the various parts of our business.

Q. Would it include machinery?

A. Generally, yes.

Q. Okay. Did -- under the loan agreement, did you grant a lien on all of your machinery? The loan agreement with the United States Treasury, did GM grant a security agreement on all of its domestic machinery.

MR. MILLER: I assume, Your Honor, he's just asking for Mr. Henderson's understanding.

MR. PARKER: Yes.

THE COURT: With the clarification, the objection becomes moot.

A. Could you repeat the question, sir?

Q. Sure. Under your understanding of GM's loan agreement with the Treasury, did the Treasury have a security interest on the manufacturing equipment in domestic manufacturing plants?

A. I don't believe so.

Q. Okay. Did it -- did you give a security interest on the shares of stock of any subsidiaries of GM, domestic

subsidiaries?

A. No domestic manufacturing subsidiary to the best of my knowledge.

Q. What are the domestic manufacturing subsidiaries of General Motors?

A. Generally, our manufacturing operations are included in the corporation. I think if we have a domestic manufacturing subsidiary, it might be Saturn. But I don't think -- we generally don't have substantial domestic manufacturing subsidiaries. The parent -- the corporation owns the U.S. manufacturing plants.

Q. Is Saturn a separate plant -- I mean, a separate corporation?

A. I believe so, yes.

Q. And did you grant a lien on Saturn's shares?

A. I don't know.

MR. PARKER: May I ask a question of counsel? The exhibit -- no, no. The exhibit that you provided with the appendices, on the two appendices to the agreement that listed the properties that are included and the ones that were excluded, they were blank. Do you have a copy?

MR. MILLER: I don't know what he's talking about.

MR. SCHWARTZ: I don't know what you're talking about.

MR. PARKER: Okay. What I'm talking about is the --

(Pause)

MR. PARKER: You might notice it. It's a schedule -- that's out of order. This is the first page. It's a schedule of appendices to the loan agreement.

MR. SCHWARTZ: Which one?

MR. PARKER: The one between Treasury and GM. And when you get to the final two schedules, they're blank. They're the schedules for assets that are liened and assets that are excluded. Toward the end. Actually, if I may -- I'll show you since it's this area. Schedule 6.29 and 6.30. As you can see, they're blank with a statement that it's privileged information. Is it attached to what you gave the Court?

(Pause)

MR. PARKER: It was page -- on this, it's page GMPR3959 and GMPR3961 -- 3960. There's a big skip. Here's 3958. While they're looking, I'll move on.

THE COURT: Thank you.

BY MR. PARKER:

Q. Would you go to Section -- Schedule 6.28 of the document?

A. Which document, sir?

Q. The -- it's called -- it's schedules of, I guess, Exhibit 10.

A. 6.28.

Q. Yes.

A. Section 6.28, did you say?

Q. Yes.
A. All right. So it's earlier in the document.
Q. No. It's Schedule 6.28 not section.
A. Okay.
Q. I'm sorry. Schedule 6.28.
A. What's the name of the schedule, sir?
Q. Assets Subject to Senior Lien.
A. Maybe you can show it to me. I can't find it here.
Q. Well, this is the copy they gave me.
A. So, let me find it. Mr. Parker, which page so that I can get on the same page as you are.
Q. Does yours have the stamps on them?
A. No. Unfortunately, I don't have a GMPR on this page.
Q. 'Cause it's 3955. The schedules aren't otherwise aren't numbered. The only numbers on these schedules are the GMPR stamps.
A. Perhaps there's -- would you like me to work from yours?
Q. Yeah. If you take a look at the first one, the first asset, I believe it's -- there's a one 1,400,000,000 lien in favor of a bank, is that correct?
A. Yeah. This was a 1.4 billion dollar machinery and equipment term loan that was issued in 2006.
Q. On Saturn, correct?
A. That was Saturn as guarantor so it was basically, the parent -- the corporation as well as Saturn Corporation.

Q. Right. And did it also guaranty -- pledge sixty-five percent of Saturn's stock?

A. This is the --

Q. It's in that same page.

A. This is the 2006 transaction?

Q. Yes.

THE COURT: Forgive me. Mr. Parker, I'm trying very, very hard to be --

MR. PARKER: I know.

THE COURT: -- very, very patient. The costs to the creditors in this case with examination is enormous. I can no longer permit you to ask your opponents to find stuff for you.

MR. PARKER: Okay.

THE COURT: And I can no longer ask the witness to find things or to construe documents that are already in the record. If you want to make legal arguments based upon what the documents say, of course you may do that. But you're going to have to help me understand why this examination can't proceed more quickly and why you should be putting the witness through a memory test on what the company's documents say.

MR. PARKER: All right, Your Honor. It's my position that the -- it's -- I'm sorry. I've got the wrong page. If I may? It's my position the bondholders are actually secured creditors, Your Honor.

THE COURT: Fair enough. But if the documents are in

evidence, why can't you make you argument based on what the documents say?

MR. PARKER: All right. I'd like to introduce a document that is not in evidence, if I may. It's a document I received in discovery from General Motors. I'm going to ask the witness if he can identify it.

MR. MILLER: Your Honor, this is a document filed June 27, 20003.

MR. PARKER: Yes, it is.

MR. MILLER: I don't know where Mr. Henderson was on June 27th, 2003.

THE COURT: I guess he can tell us when Mr. Parker tries to lay the foundation for the submission.

MR. PARKER: All right. I'd like to label this Parker Exhibit 1 for identification. 4424D5.

THE COURT: All right. Parker Exhibit 1 for id.

(Parker's Exhibit 1, GM Perspecta Supplement 2, was hereby marked for identification as of this date.)

BY MR. PARKER:

Q. Could you take a look at that document, sir? Okay? Now, do you recognize it?

A. No.

Q. Did General Motors issue a set of Series C subordinated bonds?

A. Mr. Parker, at that time I was president of GM Asia

Pacific. I had nothing to do --

Q. Okay.

A. But I do believe we did issue bonds, the specifics of which I wasn't involved in at the time.

Q. All right. Who could identify it?

A. Well, this is a General Motors document. I mean, it's -- but I just --

Q. Well, but do you recognize it as a General Motors document?

A. Yes, sir. It looks like it's a Perspecta Supplement.

Q. It's a Perspecta Supplement with a attached Perspectus that it's a Perspecta Supplement 2.

A. Yes, sir.

Q. All right. So all I'm asking is can you identify it as a Perspecta Supplement from General Motors.

A. I believe it is, yes.

MR. PARKER: All right. Your Honor, I'd like to introduce --

THE COURT: Any objection?

MR. MILLER: No, Your Honor.

THE COURT: All right. It's admitted.

MR. PARKER: Okay.

(Parker's Exhibit 1, GM Perspecta Supplement 2, was hereby received into evidence as of this date.)

MR. PARKER: When I argue on it, may I refer to

sections of it, Your Honor?

THE COURT: Can't think of any reason why not.

MR. MILLER: What are we marking this as, please?

MR. PARKER: Parker's Exhibit 1 in a --

Q. Do you still have that other document?

A. I do, sir.

Q. On the second page of the document, is there -- does it indicate -- and the document, I believe, is the exhibits -- the atta -- the schedules to Exhibit 10, General Motors Exhibit 10.

A. I'm reading. This is the second page of the document you gave me.

Q. Yeah. Well, the second -- yes.

A. Yes.

Q. I believe it's Schedule 6 -- I mean, about 628.

A. 6.28, that's what it says.

Q. It's page 2 of Schedule 6.28, correct?

A. Yes.

Q. Does it indicate a loan? Not to the government.

MR. MILLER: Objection, Your Honor.

THE COURT: Sustained.

MR. PARKER: Your Honor, the predicate is under the term --

THE COURT: Forgive me, Mr. Parker, but I believe I've ruled. You can ask your next question.

MR. PARKER: Okay.

Q. Under the terms of that, is there an indebted creditor whose security is sixty-five percent of Saturn?
A. The sixty-five percent of the stock is Controlodora General Motors S.A. de Sivi which is General Motors de Mexico.
Q. Okay. I misread it then. Thank you.
A. You're welcome.
Q. So what's encumbered -- well, under the sales agreement that General Motors is asking the -- the master sale purchase agreement that the debtor is asking the Court to approve, your manufacturing facilities were being sold to the new GM, is that correct?
A. That's correct, sir.
Q. Is it true that in your negotiations with General Motors -- sorry -- in General Motor's negotiations with the Treasury Department regarding the master sale and purchase agreement that you strongly advocated the senior executive -- retaining the senior executive retirement plan?
A. I testified to that before, yes.
Q. Okay. Did you also strongly advocate negotiating a better deal for bondholders?
A. Yes.
Q. What were your efforts in that regard?
A. Two things. I had two areas I would call. One, when we launched the bond exchange, the Treasury indicated to us that they would not be supportive of offering the bondholders any

more than ten percent of the company. We, therefore, selected ten percent. We went to the maximum because we felt it was the right thing to do. And the second thing is, when the bond exchange failed and the Treasury approached us with regard to providing an updated proposal to the bondholders, this is subsequent to the bond exchange failing, we reacted quickly. That subsequent offer included both ten percent of the new company substantially de-levered from what was in the bond exchange plus the two different sets of warrants of seven and a half percent each. And we immediately moved to issue an 8K, provided a disclosure, so that the advisor to the informal bond committee could go out and contact bondholders.

Q. Okay. In April of 2008, did an ad hoc bond committee come to GM to try to negotiate a different settlement offer?

A. I believe it was April 2009, yes.

Q. Yeah. 2009, yes, sir. Did that happen?

A. We were approached and we suggested that -- since we were -- I don't remember exactly what date but we suggested that the committee approach the Treasury.

Q. All right. Did you tell the committee that you weren't authorized to negotiate?

A. Because at that point, I believe -- I'm not certain but I believe our bond exchange was in the market. And so, we were not authorized to negotiate.

Q. Okay. At any time, did you -- at any time subsequent to

that that you urged the Treasury to negotiate with the bondholders and give them more favorable treatment than the ten percent off?

A. In late May.

Q. Prior to that.

A. Prior to that? While the bond exchange was outstanding? We were quite careful that we would not -- we could not -- we could not bargain at that point.

Q. Is it true that you originally approached the government for a loan in late September -- by you, I mean GM -- in late September, early October of 2008?

A. I believe that's correct.

Q. Is it true that the Treasury Department said that they would not grant you a loan under TARP at that time?

A. I believe that's also correct.

Q. Did they recommend that you go to Congress to ask for a loan to get congressional authorization for a loan?

A. At some point, yes.

Q. Was Treasury's stated reason that they couldn't give you a loan was that TARP could not authorize -- they were not authorized to lend money under TARP?

MR. SCHWARTZ: Objection, relevance.

THE COURT: Well, if your point, Mr. Schwartz, is with the enabling legislation is what's relevant to Mr. Henderson's understanding of it basically -- is that basically

your relevance point, Mr. Schwartz?

MR. SCHWARTZ: That's one of several actually. I mean, in addition, the authority of Treasury to lend money under TARP is not relevant. The bills that were not passed by Congress are not relevant.

THE COURT: I need to hear your response on the evidentiary issue, Mr. Parker.

MR. PARKER: Yes, sir. I believe the fact that Treasury originally took the position that they were not authorized to act -- that TARP did not authorize them to extend loans, that they recommended that they go to Congress, that Congress declined to authorize them to lend loans to General Motors, and that subsequently Treasury changed its mind is relevant.

THE COURT: Well --

MR. PARKER: I'm simply trying to establish the facts.

MR. SCHWARTZ: If I might, I appreciate --

THE COURT: Yeah. Go ahead, Mr. Schwartz.

MR. SCHWARTZ: I appreciate the argument but this transaction doesn't involve any TARP money. The proper time to make this objection would have been last week in connection with the DIP which this Court approved with a specific binding that the funds were appropriately expended under EESA and TARP.

THE COURT: Yeah, I understand that. Of course, the

more fundamental issue is whatever the authority of the government to do what it did is, this witness' understanding of the governmental authority is irrelevant. I'm sustaining the objection.

MR. PARKER: Your Honor, I was simply trying to get the factual --

THE COURT: Mr. Parker --

MR. PARKER: -- predicate of what happened.

THE COURT: You're a lawyer. You know that when a judge rules --

MR. PARKER: Yes, sir.

THE COURT: -- you go on.

MR. PARKER: I'll go on.

BY MR. PARKER:

Q. Mr. Henderson, I believe you testified that there's approximately -- there's 950 million dollars that -- I'm unclear whether General Motors is leaving that behind or whether it's new DIP financing. Whichever way, the 950 million dollars that Old GM is going to have after the transaction might not be enough to pay all the administrative expenses, is that correct?

A. Correct.

Q. Under the master sale and purchase agreement, if it is insufficient to pay -- the 950 million is insufficient to pay the -- all the administrative expenses, is New GM under an

obligation to get further money?
A. No.
Q. Okay. Is -- how much money does General Motors have on hand at the moment?
A. We expect in the U.S. to have at the end -- well, excuse me. At the end of last week, we had a little over twelve billion dollars. We have very large secured -- the line of credit as well as the term loans are due and payable this week. So we expect substantial outflows this week.
Q. Okay. When you close the transaction, assuming that the Court approves the transaction, will there be a net transfer of cash from Old GM to New GM?
A. Yes.
Q. About how much?
A. I don't know.
Q. Do you have any idea?
A. Not today, no.
Q. Okay. Did Treasury require GM to negotiate with the UAW?
A. Yes.
Q. As a condition of the sale?
A. It was part of our loan agreement, number one. And number two, it was part of a condition -- as a condition of the sale, yes.
Q. Okay. Under 363 sale and purchase, is it your understanding -- do you have an understanding as to whether or

not a purchaser is required to assume a collective bargaining agreement?

A. I believe so, yes.

Q. Okay. So is General Motors going to assume all of the collective bargaining agreements that presently exist?

A. No. The new General Motors will not.

Q. New General Motors will not? Does the new General Motors have the right to decide which collective bargaining agreements it will --

THE COURT: Sustained.

MR. PARKER: Okay.

Q. Is management to receive any stock or stock options? Is the management of the new GM to receive any stock or stock options?

A. First of all, with respect to stock options, I think they're prohibited on -- as I understand, under current legislation, at least for the top twenty-five. And with respect to stock, it is expected that that would be the case. But at this point, no decisions have been made with respect to the amount of stock that might be granted to the management.

Q. But it's expected management will be given some stock?

A. Yes.

Q. You said that one of the differences between the old GM and the new GM is that management may be different in the new GM, is that correct?

A. Yes, sir.

Q. Okay. Do we know who the new CEO is going to be?

A. I believe it will be me.

Q. The senior management team, is it going from the old GM to the new GM?

A. Yes.

Q. Okay. Did -- under Section 4.05 of the 1995 indenture agreement, the management is required to give a statement of officers that the corporation is not in default of the loans within the first four months of each year. In 2009, did management give a statement of officers that General Motors is not in default under the terms of the bonds?

A. First four months in 2009?

Q. Yes.

A. I don't know the answer to that question.

Q. Okay. Is it true that the bonds that were issued in 2003 were under the 1995 indenture agreement with Citibank?

MR. MILLER: Your Honor, same objection. The document --

THE COURT: Sustained.

Q. Is there a limitation on liens provision in the loan and security agreement?

MR. MILLER: Same objection, Your Honor.

THE COURT: Sustained. I'm not, Mr. Parker, going to turn this into a memory case on what documents contain. If the

documents are otherwise admissible then you can tell me what they say in oral argument. It's not fair to Mr. Henderson and it's especially not fair to the creditors of this estate.

Q. Who determined the ten percent number for the bondholders -- well, for the unsecured creditors?

MR. MILLER: Your Honor, the guidelines for this hearing was that we should not be duplicating questions that have been already prepondered.

THE COURT: Sustained.

MR. PARKER: Okay.

Q. In May of 2009, was General Motors the top seller of automobiles in the United States?

A. Yes.

Q. So far, in June of 2009, is General Motors the top seller of automobiles in the United States?

A. Yes.

Q. Did Evercore do an analysis of New GM equity?

A. Yes.

Q. What was their analysis?

A. They did an analysis of what the possible equity value for the company might be.

Q. Okay. Could you give us what the result was if you know it?

A. They had a range of potential equity values on a steady state basis, if you will, of approximately thirty-eight to

forty-eight billion dollars.

Q. Thirty-eight to forty-eight?

A. Yes, sir.

Q. Okay.

MR. PARKER: No more questions, Your Honor.

THE COURT: Very well. All right. Who was next on our list?

MR. BERNSTEIN: I believe I was.

MR. PARKER: By the way, Your Honor -- Your Honor, would I be given an opportunity later to take a look at Exhibit 10 in evidence?

THE COURT: Now that the document's in evidence, it's a public document. Your point is that you didn't bring a copy so you need somebody else to give it to you?

MR. PARKER: No. I'm saying that my copy -- my point is that I don't have a -- if I've got a copy of it, it's apparently incomplete. And I just wanted to compare it with the copy that's in evidence.

THE COURT: Anybody object to giving Mr. Parker another look at Exhibit 10?

MR. SCHWARTZ: No, Your Honor.

THE COURT: No? I see a lot of negative nods. Work it out, Mr. Parker. Of course you may.

MR. PARKER: All right. Thank you.

MR. BERNSTEIN: Good afternoon, Your Honor. My name

is Norman Bernstein. I'm also one of the trustees, the Environmental Conservation Chemical Corporation Site Trust Fund.

CROSS-EXAMINATION

BY MR. BERNSTEIN:

Q. Mr. Henderson, I want to quickly summarize what I understood you testified to this morning as a preface to asking you a related -- a different question. Is it correct that from the latter part of December 2008 through the end of May 2009 General Motors could only pay its bills in the ordinary course as they came due by borrowing money from the Treasury?

A. That's correct.

Q. Is the reciprocal also true that by borrowing money from the Treasury, it could pay its bills in the ordinary course?

A. Correct.

Q. In May 2009, did General Motors pay all of its bills as they came due in the ordinary course given the fact that it could?

A. I believe so, yes.

MR. BERNSTEIN: Your Honor, I'd like to make a brief offer of proof based on the documents we've already submitted with our papers that on or about September 10, 1991, Judge Nolan of the United States District Court of the Southern District of New York entered a consent decree for the cleanup of a superfund site called Environmental Conservation Chemical

Corporation Site and that General Motors was a signatory to that consent decree as well as the United States, the state of Indiana and a significant number of other companies; second, that the EnviroChem Superfund Site is on EPA's national priority list of some of the worst, or at least most serious, superfund sites in the United States; third, that pursuant to the terms of that consent, a trust was created to obtain money from certain defendants, including General Motors, to fund the cleanup of that site and that, pursuant to the Court's order, General Motors was obligated to make payments to the trustees; that on April 20th of 2009, General Motor received an assessment from the trustees of the Environmental Conservation Chemical Corporation Site Trust Fund of one-half million dollars in total of which General Motors' share was 62,591 dollars.

It was not just simply a party to the consent decree, it was the largest company in terms of percentage interest. And that on or about May 20th, the trustees of EnviroChem Site Trust Fund were informed by General Motors that it would not honor any consent decree and that it would not pay the payment due in the consent decree even though it was a payment due in the ordinary course and, as we've established today, it, in fact, could do so.

THE COURT: All right. Putting aside the slightly argumentative last sentence, does the debtor prepared to

stipulate to that, Mr. Miller?

MR. MILLER: Your Honor, I don't have any knowledge of the facts concerning this.

THE COURT: All right.

MR. MILLER: Although, I'd be happy to look into it, Your Honor.

MR. BERNSTEIN: May I add, Your Honor, that all those facts are set forth in our papers which were duly filed with this Court under docket number 1865.

THE COURT: Yeah. I saw them there as part of my preparation, Mr. Bernstein.

MR. BERNSTEIN: Thank you.

THE COURT: Some of this stuff that you said I can take judicial notice of, like court decrees and the like. The fact that the debtor didn't pay it is probably something that you can stipulate to. Somehow I suspect that if the debtor had paid it, you wouldn't be here.

MR. BERNSTEIN: Yes, sir.

THE COURT: Let's do it this way because I think what we're really talking about is whether your objection is well grounded in law or not but it isn't particularly a factual dispute. I sense without prejudice to giving the estate a chance to hear that -- to be heard on that. So what I would like to suggest is that you propose the stipulation in oral terms with your offer of proof and the debtors will get back to

you after they've had a chance to sleep on it and to caucus on it. And if we need to find out a mechanism to find the core of facts which are deemed to have been satisfactorily evidenced as issues of fact, we'll figure out a way to do it without prejudice to your position and any opponent's position on the underlying solution.

MR. BERNSTEIN: That's fine, Your Honor. May I ask the witness one additional question?

THE COURT: Sure. Go ahead.

BY MR. BERNSTEIN:

Q. If, in fact, General Motors made a conscious decision not to carry out its obligations under a federal court consent decree in May of 2009, who would have had the authority at General Motors to make such a decision?

A. I honestly don't know, sir.

Q. Were you a party to any discussions concerning the payment for environmental liabilities?

A. This is the first time I've heard this discussion. So --

Q. Well, you previously testified that there were some politically -- I think you said sensitive issues. Were environmental liabilities one of the politically sensitive issues?

A. We discussed environmental liabilities in general.

Q. And with whom did you have that discussion?

A. It would be with the Treasury.

Q. And did the Treasury take any position as to General Motors payment of its environmental liabilities?

A. I wasn't involved in those discussions so I couldn't say what the purchaser's and Treasury's position was.

Q. Could you say who was involved for General Motors on those discussions relating to environmental issues, sir?

A. I'm sorry. I don't know who it would have been.

Q. Is it fair to assume that General Motors had a team that was doing the negotiating with the Treasury?

A. Yes.

Q. Who were members of the team?

A. That would include -- depends on the facts but it could include Mr. Jordan Barken (ph.); could include our counsel; it could include our labor team to the extent it was labor related; it could include compensation specialists to the extent it was compensation related; it could include me depending upon the subject matter; it could include the chief financial officer; it could include our general counsel; could include our head of manufacturing; could have included a lot -- we have a lot of people involved with the purchaser.

Q. Was there someone who had primary responsibility for environmental issues?

MR. MILLER: Your Honor, please, he's talking about 67,000 dollars. It's costing this estate more right now on his questioning of the 67,000 dollars.

MR. BERNSTEIN: If you'd pay your bill, I wouldn't be here, sir.

MR. MILLER: We didn't pay the bill and that may be a fact.

THE COURT: I'm going to sustain the objection simply on the Court's hearing power. Mr. Bernstein, I think we've laid the factual predicate that you need to get your objection heard if it's well founded in law. I think that this is not a good use of our time to be going beyond what you already accomplished.

MR. BERNSTEIN: All right, Your Honor. Thank you, Your Honor.

THE COURT: Thank you. Anybody else? Come on up, please?

MR. REINSEL: Good afternoon, Your Honor. Ron Reinsel from Caplin & Drysdale. I represent Mr. Mark Buttita (ph.).

THE COURT: Sure. Your last name again, please?

MR. REINSEL: Reinsel, R-E-I-N-S-E-L. Mr. Buttita is a personal representative of Mr. Sal Buttita --

THE COURT: Right. I know that.

MR. REINSEL: -- a deceased asbestos claimant.

CROSS-EXAMINATION

BY MR. REINSEL:

Q. Mr. Henderson, I want to follow up on just a few questions

that Mr. Esserman asked you. I don't want to be redundant but I'll just kind of take you back to that testimony if I could.
A. Certainly, sir.
Q. Mr. Esserman questioned you about and you said that you were familiar with a report referenced in GM's March '09 10K that provided an estimate of GM's asbestos liability. Do you recall that?
A. Yes, sir.
Q. And that that was about approximately a 650 million dollar liability over a ten year period, is that right?
A. That's correct.
Q. And, in effect, most of that 650 is for future claims, is that right?
A. I believe so, yes.
Q. And those are future claims of folks who have not yet become and don't know if they have a claim yet.
A. So this is a -- I understand this is a very complex area. I simply know that the liabilities intended to provide a longer term perspective. And as to when a particular liability is triggered, I'm not an expert in that field.
Q. But generally, illnesses haven't manifested themselves yet.
A. Over a ten year period? Again, I'm not an expert in this area.
Q. Would you agree, sir, that if people who have not yet

manifested their illness wouldn't know they have a claim yet?

MR. MILLER: That's speculation, Your Honor.

THE COURT: I'll allow it.

A. I think it's a fair assumption.

Q. Mr. Henderson, as a part of GM filing its present bankruptcy proceeding and the sale, it gave broad notice of these proceedings.

A. Yes, sir.

Q. The objective being to let people know that if they have a claim, those claims and their rights could be effective, is that right?

A. Yes, sir.

Q. You would agree that if someone doesn't know they have a claim yet, that notice wouldn't do them any good?

MR. MILLER: Again, Your Honor, same objection.

THE COURT: Overruled.

A. I would agree with you.

Q. 'Cause they wouldn't get notice.

THE COURT: You made your point once, Mr. Reinsel. You don't need to do it again.

MR. REINSEL: Second point -- second set of questions and I'm done, Your Honor.

Q. Mr. Henderson, as we understand if the sale is approved, goes forward as it's presently proposed with the exclusion of asbestos -- future asbestos liabilities, New GM, either because

those claims are not being assumed or they're otherwise being protected, New GM's being protected from people asserting those, a future claimant will not have recourse against New GM, is that right?

A. That's my understanding, yes.

Q. And if I recall your earlier testimony, if the sale goes through, Old GM will then liquidate, is that right?

A. Yes.

Q. If asbestos claim -- and you say that that liquidation period, you estimated, would be done within three years?

A. I said I didn't know for certain but it was a fair assumption that it could be done within three years. I just don't know.

Q. Relatively expeditiously.

A. I think that would be the objective, yes.

Q. And, say, then that if an asbestos or any of the other excluded future injuries arise after that liquidation is concluded, it would have no recourse against Old GM, is that right?

MR. MILLER: Your Honor, again it calls for a conclusion.

THE COURT: Yes. That calls for a conclusion as well and I'm going to sustain that objection.

MR. REINSEL: All right. Thank you, Your Honor.

THE COURT: And I don't think his businessman's

understanding would help us much in that regard.

MR. REINSEL: That's fine, Your Honor. Thank you very much.

THE COURT: Okay. All right. I think we've now heard everybody who told us that they wanted to follow up with a committee representatives and the main ones. I think it's time for your allies and the debtor to question. Do you need or would you like a short recess before we begin, Mr. Miller, or would you like --

MR. MILLER: Could we have five minutes, Your Honor?

THE COURT: Beg your pardon?

MR. MILLER: Five minutes.

THE COURT: You've got it. All right. We're in a five minute recess.

(Recess from 4:31 p.m. until 4:41 p.m.)

THE COURT: Can we settle down, please? Mr. Miller, as soon as it quiets down, you can begin. Mr. Henderson, you're still under oath.

MR. MILLER: Harvey Miller for the debtors.

REDIRECT EXAMINATION

BY MR. MILLER:

Q. Mr. Henderson, during your cross-examination, you referred to sales during the month of June. How did those sales compare with sales last year for the same period?

A. We expect to be down in total of approximately thirty

percent and then retail down at least twenty percent from the prior year.

Q. And in the prior year, did GM make money in the month of June?

A. I do not believe so, no.

Q. And did GM make money in 2009 in the month of June?

A. We do not expect to make money in June of 2009.

Q. Do you have an opinion as to why GM beat the downside projections for the month of June 2009.

A. I do.

Q. What is that opinion?

A. Three reasons, I believe. Perhaps four but we'll go through one at a time. First, our marketing has been focused on loyal GM customers. We have a GM credit card, for example, that has historically been used by loyal GM customers. We went out to those customers this month to offer them a set of incentives which made it attractive for a loyal GM customer to consider a GM vehicle in this particular month sold. Our marketing was very, very focused on the loyal GM customer as opposed to the conquest GM customer who we would like to have consider our product.

Number two, the offers we've had have been attractive for that loyal GM customer. So the value is there for the customer.

Number three, we have some fantastic cars and trucks with

a great offer on the table. And so, we have marketed them to the best of our ability.

And number four, I believe that there's a confidence certainly that a customer can purchase a GM vehicle -- certainly the loyal GM customers are looking at it and saying you can purchase a GM vehicle, be assured that it could be serviced. You can receive parts. The government has, in fact, actually stood behind our warranty even though we don't believe the government will have to ever make good on that guaranty because we will be there for the customer.

And the expectation that the bankruptcy process, having seen what's happened with Chrysler, would go quickly with General Motors as well.

Q. And do you believe that the Chrysler case had anything to do with the sales?

A. As I said in my comments, I think it's the last point, the fact that Chrysler did -- 363 transaction with Chrysler did go relatively quickly, provided some buyers certainly some assurance that, in fact, this can be done relatively quickly.

Q. And do you have a category of potential customers under the title of, say, "Conquest"?

A. Yes.

Q. What does it mean?

A. Conquest would typically mean where we are -- where a customer might either be loyal to a Toyota or a Nissan or some

other brand or, in fact, perhaps would consider us but wasn't coming out of a GM vehicle. So they hadn't been a loyal GM customer. So therefore, it could be someone who's been very satisfied with some other brand and we would be -- this is the toughest marketing challenge, if you will. Or, customers who are coming out of a GM product would consider our product but also looking at a full range of other products at the same time.

Q. And how did GM fare in the conquest category during these --

A. Our conquest matrix which have been -- I think it's one of our biggest challenges -- certainly, in the last several months and certainly in the month of June in the last wave of research we saw which show the consideration for customers thinking about General Motors has fallen which is of significant concern to us.

Q. And fallen for what reasons, if you know?

A. Well, the rapid falloff actually took place in the last wave of research which was in the middle of June. So we think at least, in part, it had to do with our filing.

Q. Now, Mr. Henderson, turning to the UAW settlement, do you know what the source of the consideration that would be provided to the UAW retirees and beneficiaries is?

A. I think the source is the purchaser.

Q. And as part of that settlement, the claim that the UAW may

have the VEBA and under the collective bargaining agreement, against Old GM, if this sale is approved, that claim will be waived, will it not?

A. It'll be released, yes, that's my understanding.

Q. And is OldCo providing any of the consideration that is going to the UAW as part of the UAW settlement?

A. OldCo, sir?

Q. Yes.

A. I believe not.

Q. Did GM manufacture any asbestos products?

A. No.

Q. What is the source of the asbestos claims against GM?

A. To the best of my knowledge, the largest single factor were asbestos used in brake linings.

Q. And those brake linings were furnished by a supplier?

A. Yes.

Q. And have you ever heard of the expression orphan-share?

A. No.

THE COURT: I didn't hear that expression.

MR. MILLER: Orphan-share, Your Honor.

THE COURT: Often-share?

MR. MILLER: An orphan. This is the share in an asbestos settlement where one or more of the companies has gone into bankruptcy, and whoever remains picks up that orphan share.

THE COURT: I've sat in many asbestos cases and I still didn't hear that. Often?

MR. MILLER: Orphan.

THE COURT: Oh, orphan. It must be your New York accent.

MR. MILLER: It's probably the New York accent.

THE COURT: Orphan-share, yes I have -- okay.

Q. Mr. Henderson, turning to the cross-examination by Mr. Kennedy. Mr. Kennedy referred to the 300 dollars per month that was added to the retirees' pension plan payments?

A. Yes, from the salaried retiree plan, yes.

Q. And that 300 dollars per month is payable out of what?

A. It's paid from the salaried pension fund.

Q. And at the time that the decision was made to increase the pension payments, what was the status of the fund?

A. It was overfunded at the time.

Q. And had there been a previous increase in the pension benefits prior to the 300 dollars?

A. For salaried employees?

Q. Yes.

A. No.

Q. For how long?

A. For many years.

Q. In connection -- if you would, Mr. Henderson, would you look at the binder that Mr. Kennedy was using?

A. Which one? First hearing or 9 to 12?

Q. Nine to twelve. And if you would look under the exhibits relating to your deposition? So that would be under 10. And if we could go to page 3, GM assets to New GM?

A. Page 3 of the deposition?

Q. Under -- yes. Not of the deposition. I'm sorry.

MR. MILLER: Might I approach, Your Honor, just to show him?

THE COURT: And after you help him, you can help me.

THE WITNESS: Oh, tab 3.

(Pause)

Q. If you look under tab 6 --

A. Tab 6 behind my deposition?

Q. Yes.

THE COURT: The contingency plan 363 now?

MR. MILLER: On page 3.

THE WITNESS: I have it now. Thank you.

Q. If you would look, Mr. Henderson, at page 3, GM assets to New GM, the third bullet point says, "Core Assets Retained." Do you know what was meant by the phrase "core assets"?

A. These would be assets that we generally consider to be necessary and important to run the business going forward.

Q. And was that a subject matter in which the U.S. Treasury was involved?

A. Yes.

Q. And essential in what sense?
A. We had iden -- it was management's view that we needed to identify those assets which needed to be part of the New General Motors to run the business. And we wanted to be able to show those and outline them for the purchaser.
Q. And that was in connection with making New GM a viable entity?
A. Yes.
Q. And if GM was a highly viable entity, what would be the effect on the capital stock of the New GM?
A. It provides the best chance to maximize value.
Q. And as more liabilities were imposed upon New GM, what wouldn't be the effect of that?
A. It would reduce value.
Q. How many active employees do the splinter unions -- and by the splinter unions, I mean the IUE and the other unions which Mr. Kennedy referred to --
A. Actually working today?
Q. Actually working today?
A. I think about 150.
Q. And how many active employees does the UAW have?
A. Approximately 60,000.
Q. 60,000? Would New GM be able to operate its plants without the UAW employees?
A. No.

Q. Do you know what the cost of the IUE retiree benefits are on a monthly basis?

A. The total cost that we're paying today is approximately 26 million dollars a month.

Q. And on an annual basis that would be --

A. That's not IUE. That's IUE plus all the splinter unions, yes.

Q. And on an annual basis --

THE COURT: Mr. Henderson, as to all the unions, you meant all of the splinter unions --

THE WITNESS: Yes, sir.

THE COURT: -- but not the UAW?

THE WITNESS: Correct, sir. Yes, sir.

Q. So that --

THE COURT: What was the figure? I'm sorry.

THE WITNESS: Twenty-six million dollars a month.

THE COURT: Thank you.

Q. So on an annual basis, that would be more than 300 million dollars a year?

A. That's correct.

Q. Now, if you would turn please to -- let me ask you this. The salaried retirees of GM, what will happen to their retiree benefits if the 360(b) transaction is approved?

A. The salaried retiree healthcare benefits?

Q. Yes.

A. They would be modified in accordance with the schedule to achieve the sixty-seven percent reduction in the liability, and they would continue on that basis.
Q. And those benefits would generally encompass what?
A. We provide a certain level of coverage that's capped prior to age sixty-five. And then once someone -- once a retiree reaches Medicare, they go to Medicare, and the company is no longer responsible.
Q. And the New GM will assume those responsibilities?
A. Correct.
Q. And as to pension for salaried employees and for hourly employees, are those being assumed by New GM?
A. In their entirety, yes, both plans.
Q. Now, Mr. Kennedy referred to -- if I can find it -- if you would turn, Mr. Henderson, I think it's Tab 14, entitled "Salaried and Splinter Union Benefit Obligations Guideline Objectives."
A. Yes, sir.
Q. And this is the chart which referred to the original proposal of sixty-two percent?
A. Correct.
Q. And the changes made?
A. Correct.
Q. Now, looking at the line SOBP-Executive Life, what happened to those benefits?

A. These were benefits provided to executives for life insurance, and they are eliminated in their entirety.
Q. And going above that, Mr. Henderson to "Salaried Retiree Health Care and Executive Nonqualified Pension (DB)", what actually had been taken with those benefits prior to the date of this document?
A. Well, the salaried healthcare plan had been changed several times in the last several years. The first thing that was done with the salaried -- and by the way, salaried healthcare includes all executives. So there's no difference in plan between -- on healthcare between an executive and a salaried employee -- or retiree, excuse me. We capped the company's contributions. I believe that was during 2006. And then effective 1/1/09 was when we -- when we drop after a retiree reaches Medicare.
Q. So that over the years prior to the date of this document, salaried employees have been subjected to a number of cuts?
A. Yes.
Q. And during that period of time, were members of the splinter unions subjected to similar cuts?
A. In 2006, subsequent to the negotiation in 2005 of healthcare changes with the UAW, we did negotiate with the IUE and made modifications which, in the end, lowered the company's costs associated with healthcare in a way that was analogous to what the UAW did in 2005.

Q. And that was the subject of collective bargaining?

A. Yes.

Q. And as to the salaried employees, GM had a unilateral right to reduce?

A. Correct.

Q. Mr. Henderson, did General Motors commence these Chapter 11 cases as part of a conspiracy to deprive the splinter unions of retiree health and medical benefits?

A. No.

Q. Now, in the cross-examination by Mr. Jakubowski, he spent some time about whether the purchase price was subject to modification. And he talked about the assumption of liabilities by the Treasury. Isn't it a fact that assuming liabilities increases the purchase price?

A. That's true.

Q. And puts more liabilities on NewCo?

A. Correct.

Q. And in terms of the provision in the MPA or the master sales and purchase agreement, it prohibits, without approval, adjustments downward in the purchase price, rather than upwards?

A. I don't know.

Q. And in connection with the indemnity of dealers as to product liability of clients, I believe you said that GM generally indemnifies all of its dealers?

A. Correct.

Q. And post closing of a 363 transaction, would that mean that in connection with product liability claims that are sustained, the New GM would have to indemnify the dealers concerning those claims?

A. Correct.

Q. And GM is going -- New GM will retain a good portion of the dealer network?

A. Yes.

MR. MILLER: Just one moment, Your Honor.

Q. Mr. Henderson, in the deliberations of the auto directors and management as to, let me call it, choice of debtor relief, consideration was given to a traditional Chapter 11?

A. Yes.

Q. And in connection with that consideration, was there any consideration given to the financing of such a Chapter 11 case?

A. Yes.

Q. And what conclusion was reached?

A. The conclusion was reached, we outlined this actually in a report that we submitted on February 17th, a viability plan, that a traditional Chapter 11 process, one, would involve very substantial amounts of financing, even beyond that which is being identified here, potentially; and two, it would take a reasonably long period of time. And the only source of financing was the U.S. Treasury.

Q. And to the best of your knowledge, that was a consideration that the United State Trustee gave in reaching its conclusions?

A. The U.S. Treasury?

Q. Yes.

A. I believe so, yes.

Q. And that additional -- the financing that has been approved by the Court in connection with these Chapter 11 cases is 33.3 billion dollars. You're aware of that?

A. That's the debtor-in-possession financing, yes.

Q. And the indebtedness to the U.S. Treasury pre-June 1 commencement date is 19.4 billion dollars?

A. Correct.

Q. And if the --

MR. MILLER: I'll withdraw that.

Q. Do you have any opinion, Mr. Henderson, that absent a UAW retiree settlement, what action the UAW would take in connection with their continued Chapter 11 for a different transaction for the disposition of these assets?

A. Well, certainly one of the requirements of our loan and service agreement and of the U.S. Treasury was that we needed to negotiate a new collective bargaining agreement or changes to the collective bargaining agreement which would allow us to be fully competitive and equatize at least half of the VEBA obligation we had. Otherwise it was our judgment that the

treasury would not proceed.

Q. And would you characterize the negotiations with the Treasury as arm's-length, strenuous negotiations.

A. They were very strenuous negotiations.

Q. And were they conducted in good faith?

A. Yes.

MR. RICHMAN: Your Honor, that calls for a legal conclusion.

THE COURT: If you mean by 363(m) standards, or rather good faith as used under the applicable standard for 363 sales, it's sustained on legal conclusion. If you want, you can rephrase and get a businessman's understanding, as long as it doesn't equate to what Mr. Richman is driving at.

Q. Mr. Henderson, during the course of your career, you've been engaged in a lot of negotiations?

A. Yes.

Q. And the negotiations with the Treasury, from your perspective, were they good faith negotiations?

MR. RICHMAN: Same objection, Your Honor.

THE COURT: Sustained.

Q. How would you describe those negotiations, Mr. Henderson?

A. I would describe them as professional, tough, just given the situation we were all in. I have, in my career, not seen a more dedicated group of people in the automotive task force working around the clock with us working around the clock to

try to find solutions. They were tough on us where they needed to be. We did -- we tried to problem solve to find solutions. And there were a number of cases where we were at loggerheads and we tried to find solutions, and in other cases, as the purchaser, their views were of paramount importance. And given their position as a secured lender, they had a significant amount of leverage in the negotiations.

Q. During a hearing in this Court last week, the attorney for the creditors' committee referred to the U.S. Treasury as an 800 pound elephant. Would you agree with that?

A. Well, it's a mixed metaphor, actually. But they were very powerful, yes.

MR. MILLER: That's all, Your Honor. Thank you.

THE COURT: Anybody supporting the motion want to redirect before I give an opportunity for recross?

MR. JONES: No, thank you, Your Honor.

THE COURT: Anybody else? Okay. I will now take a recross, same order as originally, limited to the scope of redirect.

MR. RICHMAN: Good afternoon, again, Your Honor. Michael Richman for the family and dissident GM bondholders.

RECROSS-EXAMINATION

BY MR. RICHMAN:

Q. Good afternoon, Mr. Henderson.

A. Good afternoon.

Q. I'm going to just ask a few questions related to some questions that Mr. Miller just asked. Mr. Miller was asking why you thought that GM's business was doing so well in June compared to prior months, and particularly after the bankruptcy was filed. And you gave four reasons, the first three of which were changes in the business model and other innovations in dealing with customers. Remember that testimony?

A. Yes, I do.

Q. Then you spoke to -- and I don't know if I remember your words correctly, but you said you also felt that customers have confidence now that a vehicle can be serviced and that the company would stand by the warranties, and an expectation that the bankruptcy process will go quickly. Isn't it a fact that the government announced that it was standing behind the warranties well before the bankruptcy case was filed?

A. Oh, it did. Sure.

Q. So the confidence that customers would have in warranties and servicing related to steps the government took that were completely independent of the bankruptcy filing. Isn't that correct?

A. It was -- they announced it before the bankruptcy filing, and it's been something we've continuously communicated through the process.

Q. Right. Now, do you have your declaration in front of you? I think it's Debtors' Exhibit 15.

A. I do not have it in front of me.

MR. RICHMAN: Do we have an exhibit binder with that?

THE WITNESS: Is it in here?

Q. It's in one of them. Do you have two?

A. I've got two. I don't think it's in the IUE. It must be in the other one.

Q. In the other one.

A. What tab is it in?

Q. It's toward the back. It is Debtors' Exhibit 15.

A. Here it is. Thank you.

Q. Thank you. I want to direct your attention to paragraph 84 where you discuss the risks to GM of a prolonged Chapter 11 process.

A. Yes, sir.

Q. Is that what you meant when Mr. Miller asked your opinion of a traditional Chapter 11 bankruptcy?

A. Yes.

Q. A prolonged process, in your words?

A. Yes.

Q. And isn't it a fact that when the case was filed, these bankruptcy cases were filed on June 1, that you made several public statements to the effect that GM expected to emerge from bankruptcy in sixty to ninety days?

A. No later than sixty to ninety days, yes.

Q. Yes. And then the White House made similar statements,

didn't they?
A. Yes.
Q. You also say in paragraph 84 that "Information compiled by or at the direction of the company confirms that the mere threat of a bankruptcy filing has depressed GM's sales, and that in an extended period of a bankruptcy case, the sales reductions and customer defections can be expected to be even more significant." Do you see that statement?
A. Yes.
Q. That hasn't happened yet, has it?
A. Based upon June sales, it has not happened yet.
Q. And when you told Mr. Miller that it was your opinion that customers had an -- expectations -- that one reason you were doing well in June was because customers had an expectation that the bankruptcy process would go quickly, was that based on any information compiled by or at the direction of the company?
A. That's pure judgment, sir.
Q. Your personal pure conjecture?
A. And -- well, dealers, talking -- basically we get anecdotal information from dealers as to what they believe. But there's no -- we don't have hard research which would suggest that.
Q. And were you to file a Chapter 11 plan that could create New GM in sixty to ninety days, don't you believe that customers would continue to be assured and will continue to

purchase vehicles as they have during the month of June?
A. Well, in this case, the U.S. Treasury as purchaser indicated that we needed to move forward with the 363 transaction. And that's how we've proceeded.
Q. Because Treasury directed you to do it that way?
A. They were providing the financing for the transaction.
Q. Right. And Treasury has indicated that its financing will go through July 10, but has not, so far as I can tell from anything I've seen in the record, said anywhere that at July 10, they will never agree to any extensions or further financing, have they?
A. I just know that July 10, sir.
Q. Is their deadline?
A. Yes.
Q. And that they've made -- today, they haven't made any commitments beyond that?
A. I have not heard any such commitments.
Q. Briefly, just on the collective bargaining agreement Mr. Miller asked you about with respect to the UAW. Isn't it a fact that the collective bargaining agreement as modified through the negotiations that Treasury asked you to engage in has already become effective?
A. The operating measures are -- I think at this point, are by and large, in effect.
Q. They are in effect. So the union is already operating in

connection with the amended collective bargaining agreement?

A. The -- I believe some parts of it are. For example, the changes in the jobs bank -- or excuse me, doing away with the jobs bank, launching the attrition plan. I'm not sure if all of the provisions are in place today. I'm just not sure. And I know that the VEBA has not yet, certainly, changed.

Q. If the Court expressed a preference to proceed under an accelerated Chapter 11 plan, to create a New GM in sixty to ninety days, do you have any reason to believe that the union is going to breach its collective bargaining agreement or otherwise cease working because the judge expressed a preference that a sale not take place within the time frame being requested?

A. I can't speak for the UAW.

Q. Okay.

MR. RICHMAN: I have nothing further, Your Honor.

THE COURT: Okay. Any re-redirect?

MR. MILLER: No, Your Honor.

THE COURT: Okay. Oh.

MR. JAKUBOWSKI: Your Honor, I have some questions.

THE COURT: Oh, I'm sorry.

RECROSS-EXAMINATION

BY MR. JAKUBOWSKI:

Q. Mr. Henderson, Mr. Miller asked you on direct, redirect, whether or not the purchase price to the seller increases to

the extent that it assumes various liabilities, right? And you recall saying the answer to that is yes?

A. Yes.

Q. But from the estate's perspective, there's no diminution, is there, as a result of that increase, is there?

A. Well, the purchaser would be paying more, and so therefore, if a liability that was otherwise with the old company was going to go with the new company, the old company would be better off.

Q. Okay. So the estate would actually be enhanced as a result of that increase -- the resulted increase in purchase price to the purchaser?

A. That's correct.

Q. Okay. Now, I would like to ask you about the dealer indemnity that Mr. Miller brought up on redirect.

MR. JAKUBOWSKI: And let me go to the next exhibit, is it Exhibit 4, Mr. Henderson? Does anyone know?

Q. How many exhibits do you have in front of you right now?

MR. JAKUBOWSKI: Does anyone know --

A. Incalculable.

Q. So we will do the product liability claimant advocates PLCA Exhibit 1.

MR. JAKUBOWSKI: And if I may approach the witness, and I'll give you a copy, Your Honor. And I will give a copy to --

THE COURT: I assume your opponent received a copy?

MR. JAKUBOWSKI: Yes, Your Honor.

THE WITNESS: Thank you, sir.

Q. Do you recognize this document, PLCA-1?

A. Yes.

Q. And could you just tell the Court generally what this document is?

A. It's providing an update on the 363 sale as of June 5th.

Q. And this is a format that the company, GM, has used to provide periodic updates to its executives and to Treasury, correct?

A. And to our board of directors, yes.

Q. And this is an update that was prepared after the filing of the bankruptcy, correct?

A. Correct.

Q. And in that, you have a -- on PowerPoint page 4 of that, you have identified what you call a liability reduction tracking sheet, right?

A. Correct.

Q. And what was the purpose of that?

A. To provide an update on where we stand on each of these individual liabilities.

Q. And these were liabilities that would either be assumed by NewCo or not be assumed by NewCo, correct?

A. Correct.

Q. And you broke them into various categories, buckets -- for example, your general debt; your pension; your OPB litigation; tax related; and operational liabilities. Correct?

A. Correct.

Q. And these were forecasted based on your 12/31/08 numbers, correct?

MR. JAKUBOWSKI: Strike that question. I'm sorry. I apologize.

Q. It also includes off-balance liabilities that you were tracking, correct?

A. Yes.

Q. Now, would you please turn to page 13 -- PowerPoint page 13 of the document? Excuse me. Please start with page 12. And the summary on page 4 is broken down at the back of the document at pages 12, 13 and 14, correct?

A. Yes.

Q. And as far as you can tell, do you believe that this reflected an accurate analysis on June 5th of the initial forecast of liability reduction and the current forecast as of that date?

A. As of June 5th?

Q. Yes.

A. No reason to believe otherwise.

Q. So if you look at the section called "Litigation", number 6 on page 13, you see it references product liability claims,

correct?
A. Yes.
Q. And the 934 million dollar initial forecast was based on the first quarter 10Q as of March 31, 2009, correct?
A. I believe that's true.
Q. And your current forecast as of June 5th says that that projected liability reduction is actually going to go down by 400 million dollars, correct?
A. Correct.
Q. And you said the reason -- isn't it the case that the reason it went down was because of the dealer indemnity agreements that you had struck just after the filing of the petition?
A. Our dealer agreements customarily include indemnification for dealers. And so it is true that we would have updated our estimate, and it's purely an estimate of what that might be.
Q. But your estimate at the time was about 400 million dollar assumption of liabilities by the purchaser, correct?
A. Through the indemnification, yes, that would be a fair assumption.
Q. Okay. Now, Mr. Miller talked to you a bit about product liability case. And are you aware, as a businessman, of the approximate number of states in which dealers are required by law to pay for product liability claims with respect to vehicles they sell?

A. No, I'm not.

Q. You have no sense of that?

A. No, sir.

MR. JAKUBOWSKI: Your Honor, I have no further questions. I guess I do have one question for you, if I may. And that is whether or not you have any interest in seeing a supplemental memorandum on the issue of the responsibility of dealers in various states for indemnity obligations?

THE COURT: No.

MR. JAKUBOWSKI: Okay.

THE COURT: I don't think that's relevant to legal issues that are before me.

MR. JAKUBOWSKI: Okay. I have no further questions, Your Honor. Thank you.

THE COURT: Fine. Mr. Esserman?

MR. ESSERMAN: Yes.

RECROSS-EXAMINATION

BY MR. ESSERMAN:

Q. Mr. Henderson, my name is Sandy Esserman. I represent the ad hoc asbestos committee, and I have a few follow-up questions that were raised by Mr. Miller's direct. And then I think you're just about done for the day. Mr. Henderson, you talked about several factors that you thought might be part of the reason why GM sales were looking pretty good. You talked about your marketing your GM credit card. Do you recall that

testimony just now?

A. What I said was our sales were going to be down twenty to thirty percent. So they were better than we had expected. They're still terrible. And the point is, is that the marketing around the GM card has been a factor, yes.

Q. And that GM credit card that you're talking about, that's used in connection with the purchase of a GM automobile?

A. Yes. There's credits that a customer would have that they could use in connection with the purchase of a GM automobile.

Q. And those credit cards are good for Old GM as well as New GM?

A. These are cards actually issued by a bank that's had an affinity program with us for many years.

Q. And have those cards been used to purchase Old GM cars, cars made by this debtor?

MR. MILLER: Can you fix a period in time, please?

Q. Any time prior to today?

A. Yes, certainly.

Q. And will those credit cards also be honored post-sale by General Motors?

A. The -- what the customer has are credits that they can use, akin -- I mean these are credits that they build up by using the card over time. And we very much welcome when customers wish to use them. As a form of incentive, it's actually a fairly attractive way to maintain loyalty with

traditionally loyal GM customers.
Q. Can we just cut through to all of that -- those credit cards were good to purchase cars from Old GM, they're going to be good to purchase cars from New GM?
A. That's not true. The credit cards don't purchase the cars. The credits --
Q. The credits, okay. The credits.
A. -- on the credit card can be used to purchase a GM vehicle.
Q. Both from Old or New GM, correct?
A. Well the Old GM won't be selling -- the New GM will be selling GM vehicles.
Q. Old GM's selling cars today, aren't they?
A. Yes. Yes, sorry.
Q. So, and there is no New GM yet, correct?
A. Correct.
Q. So all cars being sold by GM are being sold by Old GM. Is that right?
A. That's correct.
Q. And these credits can be used to purchase cars from either Old GM or New GM. Is that right?
A. New GM doesn't exist today.
Q. When New GM does exist?
A. That's correct.
Q. And you talked about your marketing loyalty of your

customers. Those would be the customers that you hope will continue from the Old GM to the New GM. Is that correct?
A. Well, loyal -- traditionally, a loyal GM customer would have been someone who would have bought over the course of years a number of GM vehicles and has a proclivity and inclination to continue to buy a GM vehicle. That's what we refer to when we talk about a more traditionally loyal GM customer.
Q. And you want that customer to view this as a seamless transaction, don't you?
A. Yes.
Q. Something that he won't notice that when he goes in to buy his Cadillac, that there's any difference from what he purchased last year. Is that correct?
A. Correct.
Q. And the same answer would be for your excellent GM service, your parts, and your standing behind the warranty. You want that to be a seamless transaction to New GM, do you not?
A. That's correct.
Q. Let's talk a little bit about the UAW settlement that Mr. Miller discussed with you.
A. I believe Mr. Miller stated and you agreed that OldCo is providing no consideration to the UAW, that their stock that they're going to receive as part of this transaction isn't

going to be paid by NewCo. Is that right?

A. The stock they received, they received from the Treasury. And so that's part of their -- that's part of the deal in the new company.

Q. And that OldCo is providing no consideration of the UAW, is that --

A. I'm not aware of any consideration of OldCo providing to the UAW.

Q. Okay. But isn't it a fact, under the sale agreement, OldCo is giving the UAW a release?

A. I think the UAW gives OldCo a release.

Q. OldCo doesn't give the UAW a release?

A. Perhaps they do. I don't know.

Q. It would be in a document if, in fact, it's the case?

A. I'm aware of the UAW and the VEBA giving OldCo the release, so that they no longer have a claim for post-retirement healthcare benefits against the Old General Motors.

Q. Are you aware of any releases being given by OldCo as part of this transaction to sell to New GM?

A. I'm sorry, sir, I'm not aware.

Q. That's fine. Part of Mr. Miller's recross was talking about --

MR. MILLER: Redirect.

MR. ESSERMAN: Oh, sorry, redirect. Thank you, Mr. Miller.

Q. -- I won't get into this orphan share, I frankly couldn't understand it either -- but this asbestos brakes is what he asked you about. Do you recall that line of questioning?
A. I do, sir.
Q. And Mr. Miller said that the asbestos brakes were furnished by suppliers to GM. Is that --
A. It is. The brake linings, yes.
Q. -- okay. And one of those suppliers was Delphi, isn't it?
A. I'm not -- I don't know if Delphi was ever in brake linings. They may have been. I just am not aware. They were brakes, but they were not -- I'm not sure if they were in brake linings.
Q. Do you know where GM purchased their brake linings from, then?
A. Multiple suppliers.
Q. Could Delphi have been one of them?
A. They could have been, but I don't know.
Q. Okay. Finally, Mr. Miller talked about the tough negotiations as part of the sale transaction. You're aware of that?
A. Yes.
Q. And a couple final questions I have for you. As part of these tough negotiations, would it be a correct statement of fact that no one from GM carried the banner or represented at the table the asbestos claimants?

A. I think we outlined for the Treasury the level -- the nature of the asbestos liability, the issues surrounding it, and the purchaser, or the Treasury, in this case, concluded that it was not appropriate to bring forward.

Q. My question -- and listen to my question carefully, because I understand your answer, but I don't think that was quite what I was asking. Did anyone at GM advocate for the interests of asbestos claimants in negotiating with the U.S. Treasury Department?

A. Beyond simply highlighting it, no.

Q. And did anyone at the Treasury Department advocate for the interests of the asbestos claimants?

A. I don't know.

Q. Do you recall giving your deposition few days ago?

A. Um-hmm.

Q. I'd like you to read a statement and see if you agree with this statement that I represent you gave --

A. Yes, sir.

Q. -- at your deposition. It was at page 415 -- 414, line 25. And see if this is a correct statement.

THE COURT: Mr. Esserman, what I normally like to do is, does he have a copy in front of him, I'd like if he'd be able to read along with you.

MR. ESSERMAN: Okay.

UNIDENTIFIED ATTORNEY: There's one in our book, Your

Honor.

THE WITNESS: I'll grab it. Hold on.

Q. Page 414, starting at line 25.

A. Yes, sir.

Q. Okay. "Question: In negotiating with the U.S. Treasury Department, did anyone at GM advocate for the interests of the asbestos claimants?

"A. The purchaser didn't. In looking at this, had no reason to assume these liabilities for a number of reasons, and concluded it wasn't necessary for the New General Motors to operate going forward."

And that's the end of the answer. Is that the correct answer?

A. That's what I said.

MR. ESSERMAN: Okay. Thank you, Your Honor. Thank you.

THE COURT: Are you done, Mr. Esserman?

MR. ESSERMAN: Yes.

THE COURT: All right.

MR. JAKUBOWSKI: Your Honor, while we're changing the guard, I inadvertently forgot to move for admission of PLCA-1 into evidence. And I would like to do that, with your indulgence?

THE COURT: Objections?

MR. MILLER: No objection.

THE COURT: No objection. It's admitted.

(Exhibit PLCA-1, debtors' update on 363 sale as of 6/5, was hereby received into evidence as of this date.)

THE COURT: All right. Now back giving the debtors any final opportunity.

MR. KENNEDY: Well, Your Honor, I had a question or two on recross.

THE COURT: Oh, I'm sorry, Mr. Kennedy. Come on up, please.

RECROSS-EXAMINATION

BY MR. KENNEDY:

Q. Mr. Henderson, could I direct you to Exhibit 14 in the section of Exhibit 10 that's related to your deposition in the exhibit, sir? It's that chart, "Salaried and Splinter Union Benefit Obligations" that I think you've addressed once or twice, and I believe you looked at again with Mr. Miller.

A. Yes, sir. Okay.

Q. Now, would you agree with me that since the Sprague decision in the eighties, it's been clear that General Motors' salaried employees were subject to having their retiree basic life insurance canceled at any point by the company, unilaterally?

A. Changed, modified or canceled, yes.

Q. Okay. And the same is true with respect to the salaried retiree healthcare plan, correct?

A. We did change -- we did freeze it and implement a new plan.

Q. And the executive nonqualified pension was subject to being canceled, certainly, in this bankruptcy proceeding, correct?

A. Yes.

Q. And the SLBP executive life was subject to cancelation by General Motors, correct?

A. Correct.

Q. And that leaves the splinter unions life insurance healthcare. Would you agree with me that the IUE, CWA and the other unions that are covered by that group, have always taken the position that their members' entitlement to these benefits is vested and uncancelable by the company?

A. That has been their position.

Q. And General Motors has taken the position that you could, in fact, change them, correct?

A. Yes.

Q. And in resolving those to positions, isn't it also true that in October of 2008, GM and the IUE agreed to fund a VEBA for IUE retirees in the amount from General Motors of 2.455 billion dollars?

MR. MILLER: If Your Honor pleases, that goes way beyond redirect.

THE COURT: Sustained.

MR. KENNEDY: I have no other questions, Your Honor. Thank you.

THE COURT: Okay. Are there any other objectors who I forgot. I seemed to have done that a couple of times. Now, one more time, Mr. Miller, anything further?

MR. MILLER: No, Your Honor.

THE COURT: All right. Mr. Henderson, you're excused. You can step down and remain in the courtroom.

THE WITNESS: Thank you, Your Honor.

THE COURT: Thank you. Okay. It's 5:30. My energy level is okay. I'd like to keep going at least for another couple of hours, if you people feel up to it also. What I think I would like to do is determine now, who will be the next witness, take five minutes, and resume with the next witness, cross examination and the similar -- Mr. Richman, were you the leadoff man, you or your partner?

MR. RICHMAN: Yes, Your Honor.

THE COURT: Who would you like to take next?

MR. RICHMAN: Mr. Worth.

THE COURT: Mr. Worth?

MR. RICHMAN: Yes.

THE COURT: Okay. Five minutes, and we'll continue with Mr. Worth.

(Recess from 5:30 p.m. until 5:45 p.m.)

THE COURT: Take your seats, please. Before we begin

with Mr. Worth, I'd like to be in a position where we can help everybody to plan their evening and tomorrow. So I would like to take a moment for a nonbinding estimates, how long we expect to be with this witness, then to ascertain whether the person who's number 3 in the lineup would be needed tonight or I could tell him he could leave. I'm not going to put a sock in anybody's mouth or cut him off, but I'd like to get a sense from you, Mr. Richman, as to how long you think this would be. How many folks, besides you, want to question Mr. Worth, and then answer my questions for the next couple of minutes?

MR. RICHMAN: Thank you, Your Honor. We've had some discussions among counsel during the break, also, to see whether there was any common ground. I don't have a great many number of questions for Mr. Worth or for Mr. Koch. I don't think either of them will take very long.

THE COURT: That's the order of the two folks you want to take?

MR. RICHMAN: Yes.

THE COURT: You want to take Mr. Worth first and then Mr. Koch?

MR. RICHMAN: And then Mr. Koch. I can't speak for other parties in the courtroom and it may well be with my questions being limited that that could well expand the needs of other parties. But it certainly seems to us that once you get to Mr. Wilson, you're going to be engaged in another

exercise that may be comparable in time to what we had with Mr. Henderson. And I think for everyone's benefit, at a minimum that would be a good time for a break to start fresh with Mr. Wilson in the morning, rather than to try to begin that this evening.

THE COURT: I hear you. Then, what I would like to do is now ask the other folks whether a scenario that takes Mr. Worth and Mr. Koch tonight and starts with Mr. Wilson in the morning makes sense.

MR. RICHMAN: Just so I can clarify, Your Honor, I didn't mention Mr. Repko. We do not have any plans to question him, but other parties may. And he's the forth of the debtors' four witnesses who will be before we got to Mr. Wilson. So just for clarity of record, other parties may want to comment on that.

THE COURT: Fair enough. Why don't we invite other people to weigh in?

MR. MILLER: As far as the debtors are concerned, Your Honor, we would agree with Mr. Richman to take Mr. Worth and Mr. Koch tonight and start fresh with Mr. Wilson tomorrow morning, hopefully early, Your Honor.

THE COURT: All right. Mr. Jakubowski, you rise to be heard?

MR. JAKUBOWSKI: Thank you, Your Honor. We have no questions for any of the other debtors' witnesses that are

proposed. And the only other questioning we'll have is of Mr. Wilson.

THE COURT: Okay. Anybody -- Mr. Kennedy?

MR. KENNEDY: We have ten minutes or so for Mr. Repko, none for the other witnesses until we get to Mr. Wilson.

THE COURT: Okay. Mr. Eckstein.

MR. ECKSTEIN: We may have a few questions for Mr. Koch.

THE COURT: Yeah, I thought you might. Okay. Then let's assume that we're going to definitely start with Mr. Wilson in the morning. I guess the question is, is it too ambitious or should be give Mr. Repko a break and tell him he could go home tonight? Everybody's shrugging their shoulders. As far as tomorrow goes --

MR. RICHMAN: Did you mean Mr. Repko or Mr. Worth?

MR. KENNEDY: I meant Repko.

THE COURT: All right. As far as tomorrow goes, I have an 8:00 relief from stay motion which was perceived by somebody to be important. So I'll hear it at 8:00. And then what I was going to ask you people is if you wanted to start at 9 instead of 9:45. And if you want I'll start and finish that relief from stay motion if that helps. I don't know if it will or not. I would have thought that a relief from stay motion wouldn't take a long time, but I would have thought that it wouldn't be arguable. Mr. Richman, I want to get your

perspective.

MR. RICHMAN: Well, I think some of it relates to getting into the courthouse and the courtroom. This morning people weren't allowed in until about beginning at 8:30 and it took a very long time for the line to clear.

And related to that, will we have this courtroom tomorrow and we'll be able somehow to reserve these seats so we don't have the kind of chaos we had this morning.

THE COURT: Well, those are legitimate questions. I think that if I tell the marshals that I want you guys let in, they'll listen to me. And I'll do that.

As far as -- yes, we've got clearance to use this courtroom. And I know you guys all have your places and things like that, but what I would like to do is have the people who have their existing places and more prominent roles in the case, having the spots at cancel table. And those of you who are in the audience you're welcome to come back as far as I'm concerned. I do need to have the comfort that the people who have participated so far know that they can get into this courtroom and that they won't have to fight for places to be heard, or to hear what I have to say.

So, Mr. Richman, the answer is sure. I'll also let you leave your stuff here as long as you understand that I can't guarantee its security. But as far as having permission to leave your stuff in the courtroom, that's fine.

So the one open issue is what time we're going to start the main event tomorrow. And I'm afraid, Mr. Richman, even if I give the marshals the authority to let people in early we're still going to have logistic issues. So I'm going to start the main event a 9:00.

With that, let's bring up Mr. Worth. Okay. Mr. Worth is here.

MR. RICHMAN: Thank you, Your Honor.

CROSS-EXAMINATION

BY MR. RICHMAN:

Q. Good afternoon, Mr. Koch -- I'm sorry, Mr. Worth. Just so we have clarity of the record, Mr. Worth, could you for the record describe what your and Evercore's assignment was in this case, when it began and where it stands right now.

A. We have been advisors to General Motors since about June of 2008.

Q. Could you use the mic? I think people are having difficulty hearing in the back.

A. Absolutely. Is that better?

Q. Yes.

A. We've been financial advisors to General Motors since about June of 2008, on a variety of matters, as this case has progressed.

Q. Now, are you -- next to Mr. Repko, are you the senior person responsible for the engagement?

A. Yes.
Q. And were you responsible for the preparation of the fairness opinion?
A. Yes.
Q. That fairness opinion I note is attached to your declaration which is in evidence as Debtors' Exhibit 3, is that -- did I get that right? Is it 3? Exhibit 3. So are you able to testify about the contents of the fairness opinion? Do you have specific knowledge from your oversight and preparation of it to be able to speak to its contents?
A. Yes.
Q. Do you have it in front of you, there should be a binder of debtors' exhibits? It would be tab 3, Exhibit 3. And just for the record it's called "Fairness Opinion Letter" which is Exhibit A to your declaration. And that's a letter dated May 31, 2009 on the letterhead of Evercore Group LLC, and addressed to the board of directors of General Motors Corporation?
A. Yes, sir.
Q. I'd like to refer you to page 3 of that letter.
A. Yes.
Q. The paragraph at the bottom of the page indicates "that in preparing the fairness opinion Evercore" -- and I'm just reading from the letter to ask you to confirm this "relied on management in Evercore's conclusion that GM's range of options have narrowed to a choice between (1)the 363 sale, or (2)a

bankruptcy liquidation as described in the liquidation analysis," that's a correct statement?

A. Yes.

Q. So would I be correct in saying you were directed not to consider a fair valuation of New GM under any other scenario?

A. Can you repeat the question?

Q. Did you perform any fairness valuation of New GM if New GM was created, for example, as a spin-off under a Chapter 11 plan?

A. No.

Q. Or any other scenario other than the two indicated in the letter, which is the 363 sale or a liquidation?

A. No, we did not.

Q. In your experience would there be any reason to believe that if New GM was created in a Chapter 11 plan with the same business objectives, that the valuation would be different than it would be in a Section 363 sale?

MR. MILLER: Objection, Your Honor. You have to establish foundation. Who does the financing? How the case is going to proceed without financing. He's talking apples and oranges, Your Honor.

THE COURT: I'm going to sustain it. But if you lay out a few more parameters in a way of background facts, and if you want to get his opinion on that opinion.

MR. RICHMAN: Thank you, Your Honor.

Q. Mr. Worth, how many Chapter 11 plan valuations have you been involved in, in your career, ballpark?

A. Very few.

Q. Very few?

A. Yes.

Q. Approximately how many?

A. Where I've testified?

Q. No, where you have as a professional provided a fairness opinion, or supervised a fairness opinion?

MR. MILLER: In a Chapter 11 context?

MR. RICHMAN: Yes.

Q. I'm asking specifically about the valuation of a company being created under a Chapter 11 plan?

A. Fairness opinions, none.

Q. Did you take into account or did person working under your supervision in preparing the fairness opinion, take into account General Motors' net operating losses?

A. Which General Motors; OldCo or NewCo?

Q. OldCo.

A. Not other than in the capital structure of NewCo. The only company we valued was NewCo.

Q. How are NOLs valued in NewCo? Where would I find that? Is that actually in the letter or in any of the documents that were produced?

A. Yes. It's implicit in the valuation of NewCo. There are

deferred tax attributes at current General Motors that carry over into NewCo, those are part of the valuation.

Q. Could I trouble you to just show me where I would find that in your fairness letter or in the exhibits?

A. In the valuation methodology description, it's probably the best place. Exhibit G, where we describe the various methodologies we use to value OldCo -- sorry, NewCo. Give me a second and I'll find a reference. I apologize, I don't see a page number. The third page of Exhibit G.

THE COURT: What exhibit?

THE WITNESS: Exhibit G.

THE COURT: G, golf?

THE WITNESS: G, golf. The third page last paragraph.

A. There's a description of how we valued the deferred tax attributes, deferred tax assets of General Motors.

Q. But this doesn't contain any particular amounts, does it?

A. No, simply methodology.

Q. Is there a place where I would find the amount of the NOLs?

A. It is more implicit in the core enterprise value than it is explicit on the amount in any page. So -- let me refer you back to the appendix. Give me one second. In Exhibit F to the affidavit.

Q. I appreciate your help with this.

A. Page 22 of Exhibit F. There's a line there that says "core enterprise value."

Q. This is in the -- it looks like a PowerPoint presentation?

A. Correct. There's a line three lines down that says "core enterprise value," the value of the tax assets is imbedded in core enterprise value.

Q. But it's not broken out as a separate number anywhere?

A. No, sir.

Q. So we can't see what the -- do you know what the existing NOLs are that are in the Old General Motors?

A. I recall the value of those tax attributes was somewhere in the ten to twelve billion dollar range?

Q. Ten to twelve billion, did you say?

A. Correct.

Q. And do you have any understanding of how they are able to get to New GM?

A. I'm not a tax lawyers, but I have a lay understanding of the process that they're going to use, called the G re-org, to preserve those tax attributes.

THE COURT: G re-org, did you say?

THE WITNESS: Yes, sir.

A. To preserve those tax attributes.

Q. But that hasn't been done -- that's not in the current structure?

A. It is assumed to have been accomplished as part of this

transaction. So those tax assets would be preserved if a G re-org is approved.

Q. Can you explain for us what a G re-org is, in your understanding?

A. Not being a tax attorney, probably not adequately.

Q. I'm not either.

A. It would have the net impact of preserving the value of the NOLs currently at General Motors, and being transferred from OldCo to NewCo.

Q. So am I correct in understanding that if this G re-org is not done then the value of the NOLs will not transfer to New GM?

A. Not in totality, no. Some but not all would be available to NewCo.

MR. RICHMAN: Excuse me one second, Your Honor.

Q. Just last question. When I was reading from page 3 of the letter before there was a reference to the two options; the 363 sale and the liquidation analysis. Was the liquidation analysis that was referred to in the fairness opinion, the one that was prepared by AlixPartners and Mr. Koch?

A. Yes, sir.

Q. Thank you.

MR. RICHMAN: I have no further questions, Your Honor.

THE COURT: Okay, thank you. Mr. Kennedy?

MR. KENNEDY: Your Honor, I was in error before, I do have some questions of Mr. Worth, not of Mr. Repko, I apologize.

THE COURT: All right. You want to come up?

MR. KENNEDY: Well, I'm typically not the second person, so I don't know if there are other people who want to go first.

THE COURT: I think Mr. Eckstein focused on Mr. Koch. Do you have any of Mr. Worth, sir?

MR. ECKSTEIN: I do have a few questions for Mr. Worth.

THE COURT: Whichever.

CROSS-EXAMINATION

BY MR. KENNEDY:

Q. Mr. Worth, I'd like to direct you to Exhibit F to your declaration, which is Exhibit 3 in the exhibits marked by the debtor. That consists of a project main presentation to the board of directors. Can you go to that, sir? Do you have in front of you?

A. I have it right in front of me.

Q. Would you describe what the Exhibit F is?

A. It is a presentation that we delivered to the board of General Motors on May --

Q. It's dated if it would help, the first page.

A. May 31st.

Q. And is that date the date it was presented?

A. Yes.

Q. And is that the same date that the board of General Motors made the decision to proceed with the bankruptcy petition?

A. Yes, sir.

Q. I'd like to address your attention to page 5, if I could.

A. Yes.

MR. KENNEDY: Do you have it, Your Honor?

THE COURT: Not yet. If you'll bear with me. You said Exhibit F, page 5?

MR. KENNEDY: Yes, sir. To Exhibit 3. And this is not my book. This one isn't my fault.

THE COURT: No. I understand. Bear with me.

MR. KENNEDY: You had it right there, sir. I think that could be it, I don't know.

THE COURT: You're right. Okay. Go ahead.

MR. KENNEDY: Move to page 5 of that.

THE COURT: Overview of transaction in (indiscernible) process?

MR. KENNEDY: Yes, sir.

Q. What is this page intended to depict, Mr. Worth?

A. It is a simplified version of the capitalization of the company at the end of the transaction.

Q. So at the end of the 363 transaction, this is essentially what the company is going to look like, correct?

MR. MILLER: As of that date?

Q. As of that date, yes?

A. Correct.

Q. And I take it that you identified a few of the important elements of the capitalization on this page, would you agree with me on that?

A. Yes.

Q. And I noticed that you called out pension and OPEB obligations, why were they among all the potential obligations of this company? Why were they called out for special mention on page 5?

A. Part of the success of NewCo and the profile of NewCo depended on the restructuring of some of those obligations. Principally OPEB obligations and Canadian pension obligations.

Q. Okay. So that they -- first the pension and OPEB obligations referred to is the obligation for NewCo to pay 900 million in cash and 700 million in note to a Canadian healthcare trust structure, is that correct?

A. Correct.

Q. And the second one was prefunding of an assumed Canadian pension with 3.6 billion in cash, is that also correct?

A. Correct.

Q. But the third one is actually a reduction of liability, it's not a recognition of liability on the new company, correct?

A. Can you rephrase the question?
Q. Sure. Is the third one item mentioned here a reduction in liability as opposed to a statement of cash or equity that would have to be paid out?
A. It is a statement of an assumption, which at the time we gave this presentation was still undefined that there would be a reduction in the cash flow requirements for the non-UAW OPEB obligations. And that that would then have an impact on the profile of NewCo.
Q. Okay. So that the non-UAW OPEB obligations which you've been sitting here you may now at least recognize refers to IUE, Steelworkers, IUOE and other unions, that was identified as significant enough to be included on this page, correct?
A. Correct.
Q. And how much of a reduction in OPEB obligation for non-UAW unions were you assuming at the point you were preparing this document?
A. I believe at the time we did this analysis we had assumed --
Q. While you think about it, let me remind you if it does. And I believe the total of the non-UAW OPEB obligation is 3.725 billion?
A. Correct.
Q. Does that help refresh your recollection as to how much you might have been referring to as a reduction?

A. Let me answer the question this way. At the time that we were developing the models -- I'm sorry, rephrase that. At the time that the NewCo models were being developed and we did the valuation of NewCo there was an assumption made around non-UAW OPEB. And at this very moment, I can't remember exactly what that assumption was. But there was an assumption that they would be reduced.

Q. In fact, would it be fair to say that the assumption of the reduction would be in billions of dollars or it would not have been identified separately on this page?

A. That's fair.

Q. And that that was one of the factors that the board considered in determining whether to go through the new company transition, or transaction, rather?

A. That's fair.

Q. All right. I'd like to address your attention to page 15. I take it from this page and from other information that the credit bid Treasury is making to accomplish the 363 transaction is in the amount of 48.7 billion dollars?

A. That's correct.

Q. And it's also true that as of the filing, June 1, Treasury had made 19.4 billion in pre-petition loans to General Motors, correct?

A. Correct.

Q. Are the 19.4 billion in pre-petition loans included in the

48.7 billion dollar credit bid which is referred to on page 15 of Exhibit F and elsewhere in these documents?
A. Yes.
Q. I also gathered from the document, and if you need to I'm referring to page 16, that the NewCo equity value is assumed to be between thirty-eight billion and forty-eight billion?
A. Yes, sir.
Q. And if you look at the combination of holdings that the U.S. Treasury has -- is expected to have as a result of the 363 transaction of 72.5 percent equity, and 2.5 billion in preferred, what amount of the thirty-eight to forty-eight billion would you understand Treasury to own?
A. The U.S. Treasury?
Q. Yes.
A. A loan?
Q. Uh-huh.
A. I believe the percentage is sixty percentish of the equity.
Q. So if we were looking at the equity range, thirty-eight to forty-eight billion, we would understand the treasury owned about sixty percent of that, or a little more, maybe?
A. Of the common shares outstanding at close, correct.
Q. And when you say at close, you mean at the expected close?
A. Correct.
Q. And how much of that sixty percent in effect of equity or

value that the U.S. Treasury would have is represented by the portion of the credit bid reflecting the 19.4 billion pre-petition loans?

A. Point of clarification?

Q. Sure.

A. The U.S. Treasury and Industry Canada are both part of the DIP loan.

Q. Okay.

A. So the equity that results from the credit bid --

Q. You might want to speak up, I hear somebody saying they can't hear.

A. Sorry. The equity that results from the credit bid is, both to the U.S. Treasury and Canada EDC.

Q. So that sixty percent figure is representative of both U.S. Treasury and Canada.

A. Sixty is just the UST.

Q. I see.

A. The Canada equity ultimately in the transaction comes from the credit bid and from the other amounts that the Canadian government is lending into the overall transaction. So it's -- you need a calculator to give you the answer that you just asked, which is the portion of the credit bid that is specifically related to the UST, which results in a sixty percent ownership.

Q. Okay. Is it at least clear as we sit here today that some

of the equity ownership the treasury is obtaining is as a result of their pre-June 1 loans to General Motors?

A. Yes.

MR. KENNEDY: All right. I have no other questions, Your Honor.

THE COURT: Okay. Mr. Eckstein.

CROSS-EXAMINATION

BY MR. ECKSTEIN:

Q. Mr. Worth, good evening. My name is Kenneth Eckstein, I represent the official creditors' committee. I have a few questions, if I may.

A. Good evening.

Q. Mr. Worth, can you just clarify for me on whose behalf did Evercore provide a fairness opinion in connection with this transaction?

A. We provided an opinion to the board of directors of General Motors.

Q. So, essentially, OldCo, the selling company, is that correct?

A. Yes.

Q. And do I understand correctly that in connection with providing the opinion, you advised the board of directors?

A. We provided the opinion to the board of directors. We've been an advisor to the company and to the board of directors during the course of our assignment.

Q. Did Evercore participate in the negotiations of the transaction as well as providing a famous opinion to the board of directors?
A. In portions.
Q. Which portions of the negotiations were you involved with, or was the form of Evercore involved with?
A. There were multiple areas that we were witnesses of and provided advice to the company. It was probably a half dozen different areas. We were not front and center in those negotiations, though.
Q. Did you participate in the negotiations between representatives of the bondholders and U.S. Treasury regarding the allocation of equity to OldCo?
A. During it's final iteration, no.
Q. Did you participate in the negotiations with UAW?
A. No.
Q. I assume that the opinion that Evercore provided was the written opinion that is attached to your declaration, is that correct?
A. Correct.
Q. And that's dated May 29, 2009, am I correct?
A. I believe it's dated May 31st.
Q. May 31 or May 29?
A. May 31st.
Q. May 31st, right. And was there a meeting with the board

of directors at which you presented your opinion and recommendations?
A. There was.
Q. Was that one meeting or several meetings?
A. There was a meeting on Saturday, the 30th, I believe, in which we went through our presentation. We subsequently delivered our opinion on a telephonic meeting on the 31st.
Q. Were there any subsequent meetings in which you dated your recommendations to the board?
A. Yes.
Q. When did those take place?
A. This past Friday we were asked whether the changes to the MSPA as they had occurred as distinct from the MSPA that we had May 31st the day of our opinion, whether had we known those changes at the time that we had delivered our opinion, would it have changed the substance of our opinion. And we met with our creditors' committee, we obtained the opinion committee on the substance of the changes and we advised the board during that telephonic board meeting that the substance of our opinion would not have changed had we known all of those facts at the time we had presented them with our opinion. We did not update our opinion in writing.
Q. Which changes to the MSPA were you considering in connection with your supplemental advice?
A. There were a few, about sixteen different small changes.

Some of them were mechanics in the MSPA. One specific was around the warrants and the capitalization table, which, at the time we delivered our opinion, we did not have the exact number of warrants that were being issued, nor did we have a cap table. We also -- another change was the product liability and the assumption of product liability.

Q. Was this the change that reflected the agreement by NewCo to assume product liability that arises subsequent to the closing of the transaction?

A. Yes. And there were a handful of other changes to the MSPA, all non-major substantive money issues.

Q. Were there any other changes that you could recall that, in your view, materially affected the amount of liability that was being left with OldCo or was not being assumed by NewCo?

A. Could you repeat the question?

Q. Were there any other modifications that in your view were material that involved an assumption of additional liability by OldCo or releasing NewCo of liabilities that it had previously agreed to assume?

A. There were none that were material to our opinion.

Q. Were there any modifications made in connection with workers' compensation liability?

A. I don't recall specifically. But, again, none that I recall that would have affected our opinion.

Q. And as you said, this was not done in writing, this was

done orally, am I correct?
A. Yes.
Q. Okay. Can you tell me what you understand the value of the equity that is being left with NewCo to be under this transaction?
A. Can you repeat that, you mean OldCo?
Q. What is the value of the equity being left with OldCo?
A. Again, clarification, the equity and the warrants?
Q. First the equity?
A. Our estimate of the value of NewCo was the range between thirty-eight and forty-eight billion dollars for 100 percent of the common equity of NewCo. So straight ten percent of that would be 3.8 to 4.8 billion dollars.
Q. 3.8 to 4.8 billion dollars was ten percent?
A. Correct.
Q. And did you ascribe a value to the seven-year warrant for seven and a half percent of the equity?
A. We did.
Q. And approximately how much value did you ascribe to the warrant?
A. The value -- I'm going to refer you back to page 14 of that same Exhibit F that we've been talking about. The value ascribed in this presentation was 2.1 to 2.9 billion dollars for that warrant -- the seven-year warrant. At the time that we did this valuation, we did not have the exact number of

warrants, nor the cap table, that affects the valuation slightly of both the warrants and the way that we would do the valuation. The net impact, though, internal of all of that new information was not significant on the bottom line range that you have here of 7.4 to 9.4 million dollars. So that is the value of the entire package; ten percent of the equity plus the fifteen percent warrants.

Q. So based upon the amended opinion that you provided last week, the value ranges have not changed in your opinion?

A. Not substantively, no.

Q. And just so I understand the value that you ascribed to the ten-year warrant, what is referred to as warrant B, is that one and a half to 2.1 billion dollars?

A. That's correct.

Q. And so am I correct that the value that -- of the equity -- the straight equity and the warrants that are being left with OldCo in your view is between 7.4 and 9.8 billion dollars?

MR. MILLER: He just testified to that, Your Honor.

THE COURT: I'm going to sustain. But just to try to get to the next question, you can move on. I think you got it enough that I wrote it in my notes, Mr. Eckstein.

MR. ECKSTEIN: Thank you, your Honor, that's fine.

Q. In connection with your opinions did you make any evaluation of the liabilities that were being retained by

OldCo?

A. Yes. In estimating the value of those assumed liabilities, we took the book value of those liabilities. But for pension where in all of our valuation methodology, we estimated the value of pensions to be the present value of future contributions.

Q. Can you tell me what liability level you were assuming was being retained by OldCo in connection with this transaction?

A. If you look at page 15 of that same exhibit the total numbers 48.4 billion dollars.

THE COURT: Mr. Worth, would you mind standing a little closer to the microphone, please?

THE WITNESS: Certainly, sorry.

A. So the total on page 15 is 48.4 billion dollars.

Q. These are the liabilities that are being retained by OldCo, or the liabilities that are being assumed by NewCo?

A. Forgive me, those are the liabilities that are being assumed by NewCo.

Q. I had asked you the question, did you make any assumptions as to the aggregate amount of liabilities being retained by OldCo?

A. No.

Q. So for purposes of your fairness opinion, you simply looked at the value of the -- let's called it the asset side rather than the liability side of the transaction, at least as

it impacted OldCo, am I correct?

A. Yes, sir.

Q. Did you express any opinion as to the fairness of the transaction on the OldCo creditors in connection with your opinion?

A. No.

MR. ECKSTEIN: Your Honor, that's all I have. Thank you.

THE COURT: Okay. Any other objectors want to question? No. Okay, redirect, Mr. Miller?

MR. MILLER: No, Your Honor.

THE COURT: All right. Mr. Worth, you're excused, thank you.

MR. PARKER: No. I do, sir. I raised my hand.

THE COURT: Come on up.

MR. PARKER: I don't have many questions.

CROSS-EXAMINATION

BY MR. PARKER:

Q. Mr. Worth, I believe you stated that the value of the net operating losses is ten to twelve billion dollars, is that correct?

A. Yes, sir.

Q. Is that their market value to acquiring a corporation?

A. No.

Q. Okay.

A. That is the value implicit in the value of NewCo. So it is the value of those tax assets to a fully operational NewCo.

Q. Okay. So on page 22 of your report you have the MPV at 37.3 to 53.9, is that correct? Page -- I think it was 22.

A. 22.

THE COURT: 22 of the exhibit, the one that said to NewCo DCF?

MR. PARKER: Yes, sir.

A. Can you repeat the question?

Q. Maybe I misheard your testimony that's why I'm asking. But you said the MPV is between 37.3 and 53.9?

A. That is the MPV of the base case, value of the equity in a base case, just in a cash flow analysis.

Q. Okay. So that has nothing to do with the net operating losses?

A. Included in that value it is an estimate of the value of the net operating losses to NewCo.

Q. Okay. Was there anywhere on this page where you had the value of the net operating losses?

A. No. It's implicit in the core enterprise value.

Q. Okay. I'm curious how you came up with a ten to twelve billion dollar figure for the net operating losses?

A. We valued the business as a full taxpayer.

Q. Uh-huh.

A. And a discounted cash flow analysis. And separately we

valued the usage of the NOLs based on the projected taxable earnings of the U.S. company, and of all the companies around the world.

Q. Do you know what the net operating losses of Old GM are right now?

A. The face value of them escapes me right now.

Q. Has old GM had operating losses of about eighty-eight billion dollars over the last five years, does that sound about right?

A. I don't know.

Q. You're being offered as an expert witness, right?

A. Yes, sir.

Q. Okay. Assuming for a moment that the net operating losses for the last five years were somewhere in the eight billion dollar range, what would be their value to a company?

THE COURT: Sustained, under what circumstances? In a liquidation as a going concern?

Q. Well, first off, what would be their worth to the company in tax savings?

A. Which one?

Q. The company who has them. Suppose GM started to make profits again, what would that be in tax savings to them, what would it represent?

A. The value of those --

THE COURT: Wait just a minute, an attorney rises to

be heard. You've got to pause. Mr. Miller, go ahead.

MR. MILLER: Your Honor, please, I object. It's pure speculation, there's no foundation laid.

THE COURT: I'm going to sustain. Mr. Parker, if you want to ask about this you'd better give a lot more facts.

MR. PARKER: Okay.

Q. Do that operating losses have a market value to someone who could purchase them to use them to offset income?

A. In isolation?

Q. Yeah.

A. If one can structure a purchase in such a way that the acquirer can take advantage of them?

Q. Yes.

A. Yes, they can have value.

Q. What kind of value can they have?

A. The value --

MR. MILLER: Excuse me. Again, Your Honor.

MR. PARKER: I'm asking for market value.

THE COURT: Well, I'm going to overrule the objection. It's a big question and it deserves a big answer. You can give an answer commensurate with the question that was asked.

A. The value of the net operating losses depends on their ability to shield taxes in the future.

Q. Okay. Do you know what the corporate tax rate is?

A. I would assume thirty-five percent.

Q. So thirty-five percent of eighty billion would be something like twenty-eight billion? That's the amount that --

MR. MILLER: Your Honor, that's the --

THE COURT: Sustained.

Q. Okay. On page 15 of your -- I think it's your Exhibit F, the one that says Analysis of Proposed Transaction Summary Purchase Price Analysis.

A. Yes, sir.

Q. Okay. I notice that in analyzing the -- I take it this is an order to analyze the fair price, the fair purchase price, is that correct, of the assets that Old GM is giving to New GM?

A. Sorry, can you rephrase the question?

Q. What was the purpose of the analysis of proposed transaction summary purchase price analysis?

A. To compare the purchase price as defined in the MSBA to the liquidation analysis performed by AlixPartners.

Q. Okay. You took the credit bid of 48.7 billion, added assumed liabilities of 48.4, added the 7.4 to 9.8 that's allegedly being given to OldCo and sub-rated out 13.4 billion in cash, is that correct?

A. Correct.

Q. And you came up with ninety-one to ninety-three billion?

A. Correct.

Q. The thing I'm curious about here is, a 48.4 billion that

you've got, does that include the 20.5 billion that's going to the UAW VEBA is giving up a claim of 20.5 billion against old UAW -- sorry, against Old GM when the transaction has been completed, I believe that was testified to by Mr. -- the new CEO of GM.

A. Mr. Henderson.

Q. Yeah. So does that include the twenty -- it says 48.4 billion in assumed liabilities, does that include the liabilities owed to the UAW VEBA?

A. No.

Q. Okay. One of the things in there it says is employee obligations, so what does that mean?

A. Can you flip to page 25?

Q. Sure.

A. It'll break it down for you, what was included in that obligation. The employee obligations you're referring to are payroll and pensions.

Q. Okay. The government's credit bid is for roughly forty-nine billion, is that correct?

A. That's correct.

Q. Okay. Other than 400 million that's owed by GM Canada to the Canadian government, is the Canadian government presently a creditor of GM?

A. Yes.

Q. How much are they owed?

A. In the DIP facility of 33.3 --
Q. Uh-huh.
A. -- the total amount of Canadian participation in the 33.3 should be about 3.2 of the --
Q. Okay. So if I recall the documents correctly Canada is supposed to be contributing roughly nine billion dollars between debt forgiveness and new money, is that correct?
A. Could you rephrase the question?
Q. Okay. Canada's contribution to the New GM roughly equals about nine billion dollars, is that correct?
A. I think about nine and a half.
Q. Nine and a half. And that includes debt forgiveness for new money, correct?
A. I don't understand the distinction debt forgiveness and new money.
Q. Well, right now it's contributing 3.2 million toward the 33.3 million, correct of financing?
A. Correct.
Q. Okay. It's -- where's the other six million?
A. That would be lent directly to GMCL, GM's Canadian operation.
Q. Post the transaction?
A. Some pre, some post.
Q. Okay. Then it sounds like the forty-nine billion dollar credit bid that the government's making includes 3.2 billion

that goes to Canada, is that correct?

A. Correct.

Q. So the government's contribution -- the government's share of the credit bid is roughly forty-six billion?

A. That sounds fair.

Q. 19.4 billion of which is pre-bankruptcy debt and the remainder is post-bankruptcy debt, right?

A. Correct.

Q. So you were earlier asked -- you admitted that some of the 60.8 percent of equity that the government is getting from New GM or retaining with New GM is due to pre-bankruptcy debt, the 19.4 billion. It would sound like it wouldn't be that hard to do a calculation, would it?

MR. MILLER: Your Honor, please. This is -- Mr. Eckstein did this. This has been on the record and he keeps repeating the same stuff.

THE COURT: Sustained. Mr. Parker, I'm not going to cut you off but you've got to be more focused on new stuff.

(Pause)

Q. I'm also confused by one other thing, is the value of New GM, the stock value, between thirty-eight and forty billion or is it between thirty-eight and forty-eight billion? I'm not sure which one I heard.

A. We chose a reference rate of thirty-eight to forty-eight.

Q. Thirty-eight to forty-eight? Okay.

MR. PARKER: No further questions, Your Honor.

THE COURT: Are we now ready for any redirect?

MR. MILLER: Just one question, Your Honor.

THE COURT: Go ahead, Mr. Miller. Come on up.

REDIRECT EXAMINATION

BY MR. MILLER:

Q. Mr. Worth, how long have you been in the investment banking business?

A. Over twenty years.

Q. And during the course of your career have you participated and formulated fairness opinions outside the Chapter 11 context?

A. Many.

Q. How many?

A. Over thirty.

Q. Thank you.

THE COURT: Any recross? All right. None. Mr. Worth, you're excused. Folks, I'd like to go right into Mr. Koch now unless people need a break. Mr. Richman?

MR. RICHMAN: That's fine. I do want to revise one statement I made earlier. Bbased on Mr. Worth's testimony I would like some limited question of Mr. Repko.

THE COURT: All right.

MR. RICHMAN: And that can be tomorrow.

THE COURT: Okay. Do we still have consensus that we

want to ask Mr. Koch to come up now?

MR. MILLER: Yes. I'm on the fence on that, Your Honor. If everybody wants to proceed we can proceed.

THE COURT: I think Mr. Koch is on the fence because you're on the fence.

MR. RICHMAN: He's at the gate, Your Honor.

THE COURT: Come on up, please, Mr. Koch. Mr. Worth, you want to give him your spot, please?

(Pause)

THE COURT: Mr. Koch, after you get in there, you want to remain standing for a moment?

(Witness duly sworn)

THE COURT: Okay. Thank you. Have a seat please, Mr. Koch. I think on balance you need to keep the microphone close to you.

CROSS-EXAMINATION

BY MR. RICHMAN:

Q. Good evening, Mr. Koch.

A. Good evening.

Q. Could you please describe your affiliation at present and your assignment for General Motors, when it began, what it consists of?

A. I'm a managing director and vice chairman with AlixPartners. And beginning in December we began serving as advisors to General Motors, primarily focused on contingency

planning in the event that an out-of-court solution was not possible. We were working with the company to prepare for a possible bankruptcy filing and that's been the substance of what we've been working on.

Q. And your declaration, I want to ask you if you have it in front of you, it's Debtor's Exhibit 5 in the binder.

(Pause)

A. I have it.

Q. That includes within it a liquidation analysis, doesn't it?

A. It does.

Q. Could you explain who asked you to prepare that and what the purpose of it was?

A. We were asked by the company's counsel, Weil Gotshal, to prepare that. And it is for the purpose of demonstrating that the -- what the creditors will receive under a proposed transaction with the U.S. Treasury is at least as great as what creditors would receive in a liquidation.

Q. When were you asked to prepare that?

A. I'm going to guess that it was early in May, perhaps a little earlier.

Q. Were you asked to prepare a liquidation analysis in connection with the proposed Chapter 11 plan?

A. The liquidation analysis would have been the same in a Chapter 11 regardless of how it was to be used in a chapter

proceeding.

Q. Were you surprised that nobody objected to the proposed transaction on the basis of perhaps a belief they would receive more in liquidation value?

MR. MILLER: Objection, Your Honor, whether Mr. Koch was surprised or not is not relevant to what's going on in today's courtroom.

THE COURT: Mr. Richman, help me on this one.

MR. RICHMAN: Your Honor, I'll move on.

THE COURT: Okay. Objection sustained.

Q. Did you hear my discussion earlier with Mr. Worth about NOLs?

A. I did.

Q. Do you have understanding of NOLs in your experience?

A. I have some. I'm not a tax attorney but I have some understanding.

Q. You have been in the business a long time, I know.

A. I have.

Q. About how many years have you been doing financial advisory work?

A. A long time.

Q. Ballpark.

A. More than forty years.

Q. More than forty years, congratulations.

A. Thank you.

Q. Approximately how many Chapter 11 cases have you been involved with, probably hundreds?

A. Certainly dozens.

Q. In forty years I bet it's more than that.

A. Well, I haven't been doing restructuring work for all of that forty years.

Q. Do you have an understanding from your experience of how a company can keep NOLs or transfer NOLs to a purchaser?

A. It is a -- it is relatively difficult to structure a transaction where NOLs will survive. And the specifics of how to do that are really beyond my expertise. In a Chapter 11, which is a reorganization where there's a change of control, there are typically limitations that are placed on the use of NOLs. I know that there was some legislation that benefitted -- will benefit the OEMs, General Motors in the use of NOLs going forward. But I'm not familiar -- I'm not conversant with the details.

Q. You said before that this liquidation analysis would be the same analysis that would be applied for a conventional Chapter 11 plan, is that correct?

A. Yes.

Q. So if the debtors had filed a Chapter 11 plan on June 1st and tried to get confirmation on an accelerated basis, the same liquidation analysis would have been used for that exercise, correct?

A. I believe that's correct.

MR. RICHMAN: Excuse me one second, Your Honor.

THE COURT: Sure.

(Pause)

Q. And just to be clear, when I asked you if the liquidation analysis would be the same, this liquidation analysis would be used to show that creditors under a Chapter 11 plan would receive more than the value shown in the liquidation analysis, correct?

A. Presumably that would be the case, yes.

Q. Okay.

A. The liquidation analysis would show what it shows.

Q. For a liquidation of the company?

A. Correct.

Q. Thank you.

MR. RICHMAN: That's all for now, Your Honor.

THE COURT: Okay. Mr. Eckstein, did you want to question too?

MR. ECKSTEIN: Yes.

CROSS-EXAMINATION

BY MR. ECKSTEIN:

Q. Mr. Koch, good evening.

A. Good evening.

Q. My understanding is that currently you are the chief restructuring officer for General Motors, is that correct?

A. That is correct.
Q. And am I correct that once the proposed transaction closes, that you are anticipated to become the CEO of what's referred to as OldCo, am I correct?
A. That is correct.
Q. And what do you understand your responsibilities as CEO of OldCo would be?
A. Well, it would be to oversee the wind down of OldCo, the settlement of claims and the distribution of the stock that -- of NewCo that is held by OldCo.
Q. And do you anticipate that OldCo will be retaining any of the employees of current General Motors?
A. The current plan is for all employees of General Motors to move to NewCo.
Q. So the employees of OldCo will essentially be yourself and other AlixPartners individuals, is that correct?
A. A number of AlixPartners individuals as well as other people, perhaps, that we -- perhaps retirees of General Motors that have a particular expertise that, you know, we may retain as consultants or as contractors.
Q. So am I correct that an important part of implementing the wind down of OldCo will be the implementation of a transition of services agreement between OldCo and NewCo, am I correct?
A. It is an element. It's an important element, yes.
Q. Do you recall hearing Mr. Henderson testify that the

transition services agreement was one of the key transactional documents being negotiated in connection with the transaction?
A. Yes.
Q. And are you responsible at the company -- principally responsible for negotiating the transition of services agreement?
A. I and my colleagues have, on behalf of OldCo, have taken a lead role in negotiating those, yes.
Q. And I assume you would agree that it's important to OldCo to make sure that we have as much cooperation as possible from NewCo once the transaction closes, am I correct?
A. That is correct.
Q. Now I'm assuming one of the areas where cooperation is going to be needed is going to be to maintain access to the legal staff at NewCo in terms of assisting OldCo in winding down the assets and the liabilities, am I correct?
A. Certainly we need access to legal records. I believe the decision has been made that GM legal will not be providing services to OldCo going forward.
Q. Who made the decision that GM legal will not be providing services to OldCo, Mr. Koch?
A. I believe GM legal.
Q. And sitting here today, do you know how you're going to get the legal advice necessary to deal with all of the remaining contracts and claims that are being left with OldCo?

A. Yeah. I believe we will primarily work with debtors' counsel. Weil Gotshal will remain our counsel going forward. So we'll primarily rely on them. To the extent necessary, we'll retain other law firms and if necessary we'll hire attorneys internally.

Q. Did you participate in the negotiation of that provision, Mr. Koch?

A. I would say yes.

Q. In your opinion, is this the relationship that you think is most advantageous to OldCo going forward with respect to the provision of legal services?

MR. MILLER: Objection, Your Honor. I don't know. This line of testimony doesn't relate to the issues which are before the Court.

THE COURT: Overruled.

A. I believe it's a satisfactory result.

Q. Would it be fair for me to assume that it would be preferable to OldCo if it had ongoing access to the in-house General Motors legal staff, isn't that correct?

A. I believe that I've answered that it's a satisfactory arrangement.

Q. In connection with the -- am I correct that part of the transaction that's being considered by the Court is an arrangement whereby OldCo will be leasing various plants to NewCo post the closing of the transaction?

A. That is correct.
Q. Approximately how many plants do you expect will be left with OldCo and leased to NewCo?
A. I'm going to say there might be -- I don't have a number on the top of my head, you know. I would say in the range of ten plants, perhaps, that have varying shutdown dates that have been identified that NewCo will lease from OldCo until the date that they're taken out of service.
Q. And do you know how the determination was made to leave certain plants with OldCo rather than have them go to NewCo?
A. I believe that was based upon the company's production plans going forward and in an assessment of the vehicles that are being produced and a whole range of business factors that led them to that conclusion.
Q. And so there are ten plants, thereabout, that are being left with OldCo and is there going to be a lease agreement that's being entered into between OldCo and NewCo in connection with these plants?
A. Yes, there is.
Q. And does this lease agreement essentially provide for NewCo to assume the ongoing responsibilities in connection with these plants while the plants are being used by NewCo in its business?
A. Yes, they're constructed as triple-net leases plus one dollar a foot rental income for OldCo.

Q. So it's fair for me to assume that the business intention is for OldCo not to have ongoing liabilities arising out of these plants while these plants are being utilized by NewCo, is that correct?
A. Let me phrase it this way, to the extent that liabilities are created between the date of the sale and the date that GM exits, NewCo would be responsible for those matters. To the extent there are existing environmental issues, they would be dealt with by OldCo.
Q. So let me understanding, you're saying if an environmental liability exists today, that liability is being left with OldCo?
A. Yes, sir.
Q. But if an environmental liability arises post closing while the plant is being operated by NewCo, that would be a liability of NewCo, is that what you're saying?
A. That is correct.
Q. And at this point in time are you aware of any environmental liabilities that exist with respect to the plants that are being retained by OldCo?
A. Yes, we are.
Q. And have those been included in any estimates of the wind down liabilities that are expected to be the responsibility of OldCo?
A. Yes, they have.

Q. And do you have any estimate as to what those amounts are?
A. We estimate presently approximately 530 million dollars.
Q. And have those liabilities been included in the 950 million dollars that is being left with OldCo in order to satisfy the wind down responsibilities?
A. We're having ongoing discussions with General Motors as well as with the U.S. Treasury as to what the wind down budget needs to be. And so we're working with draft -- with a draft budget. And to the extent that either new liabilities or we learn of liabilities that are going to be left in OldCo that either we were unaware of or that we thought -- did not realize were to be settled in cash, then we needed to increase the budget for that.

Similarly, as we have learned more from environmental consultants that we retained, we've adjusted the estimated cost to reflect what we've learned from our environmental consultants.

Q. Other than the environmental liabilities that you just addressed, are there any other categories of liabilities associated with the plants that will be leased to NewCo that are not being assumed by NewCo under the master lease agreement?
A. May I ask you to repeat that, please?
Q. Other than the environmental liabilities that you just referred to, are you aware of any other category of liability

that is not being assumed by NewCo in connection with these plants that are being leased to NewCo post closing?
A. Yes. Plant decommissioning cost and holding cost of the property after GM exists, after NewCo exits, property taxes, insurance, security, those costs will remain with OldCo.
Q. And are these costs -- have they been included in the wind down budget that you've prepared in connection with what it will cost to wind down OldCo?
A. We have.
Q. And you believe that there are sufficient reserves to deal with the costs you've just described?
A. We do.
Q. Are you familiar with the categories of liabilities, prepetition liabilities, that are being retained by OldCo?
A. I believe I'm generally familiar, yes.
Q. Sitting here today, do you have an estimate of what those liabilities will aggregate?
A. No.
Q. Have you prepared any analyses that would set forth what those liabilities would aggregate?
A. No.
Q. Is it fair for me to assume that this is an exercise that will need to be undertaken post closing?
A. Yes, sir.
Q. Do you have any sense of how long that exercise is likely

to take?

A. We think that it will probably be first quarter 2010 to second quarter 2010 before we'll be in a position to file a liquidating plan at the earliest. And we'll need to set a bar date so I think it'll probably be early in 2010 that we'll be in a position to estimate liabilities.

Q. Mr. Koch, in your capacity as CRO and your future capacity as the CEO of OldCo, is it your expectation that the -- that OldCo will have sufficient assets to satisfy the administrative and priority obligations being incurred by General Motors?

A. To the extent that claims such as cure claims are not assumed by NewCo, we have had ongoing discussions with the Treasury. They have more diligence work to do on the budget but it has been reaffirmed that it is their intention to leave behind adequate assets to satisfy the liabilities. And so I have comfort that the answer to your question is yes.

Q. Thank you, sir.

MR. ECKSTEIN: No further questions.

THE COURT: Before you come up, Mr. Kennedy, just give me a second, please.

(Pause)

THE COURT: Okay. Mr. Kennedy, whenever you're ready.

(Pause)

CROSS-EXAMINATION

BY MR. KENNEDY:

Q. Good evening, Mr. Koch. My name is Tom Kennedy. I'm acting on behalf of the IUE-CWA, the steel workers and the operating engineers in this proceeding. I just have a couple of questions.

How long do you expect the wind up of General Motors to take if the 363 sale transaction is approved?

A. I think the heavy lifting we'll move as quickly as we can. I think the heavy lifting will be finished in two to three years. And there undoubtedly will be some aspects that may drag on a couple of years longer than that.

Q. Are you aware that Old GM has a book value obligation of 3.7 billion dollars to its non UAW unions for post retirement life and health?

A. Yes, sir.

Q. And you indicated a moment ago that Treasury has committed to provide enough money to Old GM to satisfy its wind down obligations, is that correct?

A. That's correct.

Q. Is any part of that 950 million dollar wind down budget, or whatever it ends up being, intended to satisfy the claims of non-UAW union retirees for their health and welfare?

A. There is a portion that is anticipated. We do anticipate a contract rejection procedure. And so there is a portion that is estimated that will be an administrative expense prior to

the consummation of that contract rejection action.

Q. Are you familiar with the phrase Section 1113 of the Bankruptcy Code?

A. Yes, sir.

Q. And is that what you refer to when you used the words contract rejection a moment ago?

A. Yes, sir.

Q. Are you also familiar with the term Section 1114 of the Bankruptcy Code?

A. Yes, sir.

Q. And you're aware that that's a section that deals with post retirement health obligations?

A. Yes, sir.

Q. And is it your anticipation, as we sit here today, that if the 363 sale's process is approved, Old GM will begin a Section 1114 process to cancel the health and welfare owed to non-UAW union members?

A. Yes, sir.

Q. And when would you anticipate doing that?

A. Next week.

MR. KENNEDY: All right. I have no other questions, Your Honor.

THE COURT: Okay. Thank you, Mr. Kennedy.

CROSS-EXAMINATION

BY MR. BRESSLER:

Q. Good evening, Mr. Koch. My name is Barry Bressler, I represent the Ad Hoc Committee of Consumer Victims, product liability tort claimants and I just have a couple of questions.

Have you contemplated a procedure yet for liquidating the existing product liability tort claims?

A. Not in detail but we have contemplated that we would look to put in place a mediation process.

Q. And has the cost of handling that procedure been included in the wind down budget?

A. Yes, sir.

Q. Are you contemplating a binding mediation process or mediation process with some sort of appeals?

A. We have not gotten that far.

MR. BRESSLER: Thank you, sir.

THE COURT: Okay. Mr. Esserman?

MR. ESSERMAN: Just a few questions, Your Honor.

THE COURT: Okay.

CROSS-EXAMINATION

BY MR. ESSERMAN:

Q. Good evening, Mr. Koch. My name is Sandy Esserman. I'm counsel to the Ad Hoc Asbestos Committee. I just have a few questions for you on your testimony. As it stands now, the wind down budget is set at 950 million, is that correct?

A. That number has been referred to, that would not be the amount that we're currently anticipating.

Q. And what amount are you anticipating?

A. We currently believe that wind down will be something slightly in excess of 1.25 billion dollars.

THE COURT: Pause, please, Mr. Esserman. Did you say 1.25 billion, Mr. Koch?

THE WITNESS: Yes, Your Honor.

Q. Has the United States Treasury committed to leave 1.25 billion dollars behind in this estate to liquidate it?

A. What the treasury has committed to us is that they will meet with us, we'll work through -- they need to do some more diligence on the wind down budget. But it is their stated intention to leave us with sufficient cash to satisfy the costs estimated in the wind down budget that is ultimately agreed to.

Q. Well, what happens if the Treasury Department disagrees with you on how much it's going to wind down this estate and this Court has approved a sale?

A. I expect that we will have reached agreement with the U.S. Treasury before that occurs.

Q. Well, this Court may rule tomorrow or the next day, are you anticipating an agreement between tonight as we sit here today and tomorrow morning such that that agreement will be in writing and circulated to the creditors?

A. I don't know that it would be in writing but it will be documented.

Q. You mean not in writing, I always thought documented was

in writing.
A. Sir, you asking me to speculate as to how long it's going to take to generate a legal agreement. What I'm telling you is that I'm relying on what the Treasury folks have said. They've been very straightforward to work with so far, I anticipate they will continue to be straightforward to work with. And I believe that we will have, in ample time, what is needed to document the agreement.
Q. You know, Mr. Koch, you're right it is speculation. Because as you sit here today you don't know whether the treasury department will agree to a budget that will adequately fund a wind down of this estate, do you? You're hopeful. I understand that.
A. Well --
Q. But you don't know that, do you?
A. Well, I know it -- I believe I do know it because yesterday my partner and I talked with one of the treasury people who reaffirmed that that is the intention of the Treasury to do that.
Q. But you have nothing in writing from the U.S. Treasury on this subject, do you?
A. I do not today, no.
Q. Okay. And yet you're here asking the Court to approve a sale which may leave inadequate funds for a wind down budget if you and the Treasury don't agree, isn't that what you're asking

this Court to do?

A. Sir, I'm not asking the Court to approve a sale.

Q. You're not? Okay. You're not asking the Court to approve the sale? Okay. Would you like this Court to deny the sale?

A. No.

Q. Okay. As it sits today, if there are no further agreements with the United States Treasury, what is the amount of money that the United States Treasury has allowed as a wind down budget of this estate?

A. I believe the number is 950 million.

Q. And it's your view that that number is inadequate?

MR. SCHWARTZ: I'm sorry; I think documents were filed last night that say at least 950 million dollars.

MR. ESSERMAN: I don't know what they filed last night but --

THE COURT: Well --

MR. ESSERMAN: My point simply, Your Honor --

THE COURT: No, Mr. Esserman.

MR. ESSERMAN: I apologize.

THE COURT: Thank you. On the one hand I can understand why you might not know what something that was filed last night says. But on the other hand, once you've been told that there's a document out there that may be inconsistent with the premise of your question, I'm not going to permit you to ask a question premised upon a fact that's in doubt until it's

clarified. And frankly, if a lawyer, any lawyer on any side of this case makes a representation to me, until he or she has shown to me that that lawyer's own reliability is unreliable, I think a representation from a lawyer in this courtroom is good enough for me.

Now there's a problem with a premise so you can ask a question that doesn't have that premise. Or if you think it's so important, I'll give you the opportunity to ask more questions of Mr. Koch tomorrow after you can see if Mr. Schwartz is lying to you and lying to me when that representation was made.

MR. ESSERMAN: Your Honor, I would have no further questions and, frankly, would withdraw every question I asked if Mr. Schwartz would stand up and say we're committed to fund the estate for a wind up budget of --

THE COURT: No. We're not going to make let's make a deal here. What we will do is you're entitled to test Mr. Schwartz' credibility in making a representation to me, if you want to.

MR. ESSERMAN: Okay. Your Honor, it's -- there's nothing nefarious here. I'm just concerned, from the estate's standpoint, that there's enough money being left behind. And I get concerned --

THE COURT: Mr. Esserman, you made that point to me between five and ten minutes ago. I understood it when Mr.

Eckstein made it.

MR. ESSERMAN: Okay.

THE COURT: I understood it when you made the first five or ten questions of your further examination and I understand when you asked the question, in words or in substance, there isn't anything in writing yet and Mr. Koch pretty much agreed with you. Not pretty much, totally agreed with you. You made your point at that point in time.

MR. ESSERMAN: I'm done and I apologize to the Court.

THE COURT: All right. Thank you. Thank you. Other objectors? Okay, Mr. Parker, you're up, please.

(Pause)

CROSS-EXAMINATION

BY MR. PARKER:

Q. Mr. Koch. Hi. I'm Oliver Parker. I've got a couple of questions for you. The -- your liquidation value that you did, as part of the liquidation value, did you make a calculation of what the net operating losses might be worth to an acquiring company in a liquidation?

A. Sir, in a Chapter 7 liquidation, net operating losses would have zero value.

Q. Okay. In a Chapter 7 liquidation, a -- the corporate shell could not be sold independently of the assets?

A. The -- I believe, sir, that the rules surrounding survivability of net operating losses would really preclude

that from occurring.

Q. Okay. You're going to be the chief restructuring officer of the new -- I'm sorry, of the old company, correct? Sorry, the new CEO?

A. Yes, sir.

Q. When -- are there any other liabilities that are going to be administrative expenses besides the environmental liability and, of course, the cost of administration and the cost of the mediation process that you're talking about?

MR. MILLER: In Mr. Parker's question, he said the cost of administration. That includes everything that relates to the administration. So I don't know what he's talking about.

THE COURT: Sustained as to form. But you can rephrase, Mr. Parker.

MR. PARKER: Okay.

Q. Besides the cost of actually hiring some people like yourself and others to wind up OldCo, you indicated that there were some other costs of administration; there was environmental costs of -- I think you said something like 530 million dollars; there were costs of mediation for the tort claimants to try to settle with them. Are there any other costs, administrative or priority costs, that you anticipate?

A. Well, there will be some priority tax claims. We don't have an estimate of their amount, but all of the expenses that

we incur, whether it be wind-down costs or holding costs for plants that are being decommissioned, all of those would be, in my view, costs of administration that are included in as administrative expenses.

Q. Are those plants going to have any value?

A. Well, we hope so, but they're going to be -- they're going to be very difficult to -- they're going to be very difficult to either sell or dispose of. Many, if not most, have some form of environmental contamination that will need to be dealt with. So we'll have a very difficult time. We'll do the best that we can.

Q. Do you know, is the Treasury Department willing to amend the contract with General Motors to provide that if the costs of administration exceed their estimate that there will be a -- that they will bring additional money to the table?

MR. SCHWARTZ: Objection.

THE COURT: Asked and answered?

MR. SCHWARTZ: Asked and answered.

THE COURT: Sustained.

Q. Okay. The 950 million, or whatever it turns out to be, the money that's given to wind down the estate to pay the cost of administration, will that have a lien or claim on the ten percent stock and fifteen percent warrants that are supposed to be distributed?

A. I believe that as -- that it will not have a lien on

the -- it will not have a lien on the stock, but the -- it will be a nonrecourse loan to the Treasury. So the stock of New GM will be held free and clear in OldCo until we're in a position to make a distribution to the creditors.

Q. And the U.S. Treasury will not be one of the creditors that gets a distribution?

A. That is my understanding, sir, unless --

MR. SCHWARTZ: Objection. To clarify, that's on account of the LSA and the DIP.

THE COURT: All right, time out here, because I think, in essence, you were trying to correct Mr. Parker. I don't have the ability to make an evidentiary ruling on whether this question is objectionable or not. I think what we need to do is I have to temporarily sustain that objection. You have to lay a foundation, Mr. Parker. And that's the way we would have to do it by the book, by conditional use of evidence. Maybe if you want to take eight seconds to talk to Mr. Schwartz about how you can ask the question so he won't object to it, that would save us a lot of time, more time than going by the book.

(Pause)

Q. What I'm trying to find out is, is the government going to be getting some of the ten percent stock and fifteen percent warrants that's going to Old Company because of the 950 million dollars?

A. No, sir.

Q. Okay, so Treasury isn't looking for reimbursement from the stock and the warrants for the 950, or whatever it is?

MR. MILLER: Answered, Your Honor.

THE COURT: Sustained.

MR. PARKER: Okay.

Q. How much does it cost to decommission a plant?

A. It varies by plant, but I believe it's probably on the order of five or six million dollars to drain the fluids and basically do the above-ground environmental that will make the plant safe.

Q. And how many plants are we decommissioning?

A. Well, there's a total, I believe, of about sixty-nine million dollars in the budget. So that probably sounds like about a dozen.

Q. Okay. The -- I realize that the cost of the 513 and 514 procedures, from your testimony, is going to be an administrative cost, but whatever the --

THE COURT: What? What sections do those include, did you say?

MR. PARKER: 1113 and 1114.

THE COURT: Oh, okay.

MR. MILLER: I'm sorry.

Q. But once it's determined whatever the outstanding claim is of the non-UAW unions, that's not an administrative cost, is

it?

A. No, sir.

Q. And while the cost of mediation is an administrative cost, that is, a cost of mediation for the tort claimants, their underlying claims would not be administrative costs, correct?

A. That is correct.

Q. Do you have any idea what you expect the total claims to range, the nonadministrative claims to range?

MR. MILLER: Objection, Your Honor. Asked and answered.

THE COURT: It's in exhibits we have in the record, Mr. Parker.

MR. PARKER: Yeah, but I don't think he's testified to it, Your Honor.

THE COURT: If you think that his knowledge trumps what's in the exhibits and is relevant for that purpose, you may answer. Go ahead, Mr. Koch. If you have an understanding, I'll let you answer.

A. I did answer earlier that we do not have an estimate of total claims at this time.

Q. Any ballpark?

A. No, sir.

Q. Okay.

MR. PARKER: Is it possible for us to get a copy of the document that was filed yesterday, Your Honor -- I mean,

this morning, Your Honor?

THE COURT: Forgive me, Mr. Parker. I've cut you an awful lot of slack about coming to the Court unprepared, and I don't think it's fair to ask the other parties, or the Court, to fetch for you.

MR. PARKER: No, Your Honor --

THE COURT: Make your presentation. Are you talking about seeing a document that's in evidence?

MR. PARKER: No, sir, I'm talking about seeing a document that the government represents was filed this morning. None of us has seen it.

THE COURT: Mr. Schwartz, is it on the electronic filing system?

MR. SCHWARTZ: Yes, it's, to be clear, not a document that the government filed. It's a motion the debtors filed. But as to timing, actually, this has been on the docket for some time. In the final DIP order that Your Honor signed on the 25th of this month, it provides for a wind-down facility, quote, "in an amount not less than 950 million dollars".

THE COURT: All right. You want to let Mr. Parker look over your shoulder so he can see what you were reading from?

MR. PARKER: Your Honor, I'm a little confused because I understood when the previous person asked -- was asking questions, he wanted to know whether or not there was

anything in writing that said the government would give 1.25 billion for the --

THE COURT: No, he asked two separate questions, Mr. Parker.

MR. PARKER: And he was then informed that something was filed this morning with that regard. That's what I thought I heard.

THE COURT: No. What I heard -- I guess what I hear probably counts as much as anything -- I heard that management, Mr. Koch, believed that it'd probably take in the ballpark of about 1.2 billion to cover the administrative costs. And I heard Mr. Schwartz say -- and I also heard Mr. Koch say, and this is a paraphrase, that he understood the government would do that which was necessary. The exact words were the exact words, and if there's a difference between my memory, the exact words trump what my memory is.

Now, apart from that, I think Mr. Schwartz represented that a document had been filed in court that said -- and, Mr. Schwartz, you can read it again now because I don't think my memory should trump the words you've read. But I think we have those three separate things that were transmitted to me. Now, if anybody thinks that's wrong, I won't be so pig-headed as to insist that my memory is correct. And I certainly want to hear the exact words Mr. Schwartz read once again, even though I know it's repetitious.

MR. SCHWARTZ: I think that you captured exactly what I said, which was a response, I think, to the suggestion in Mr. Esserman's questioning that it was precisely a 950 million dollar budget. And I rose to say that there was a document filed which says it turns out to be the final DIP order, that there is a wind-down facility, quote, "in an amount not less than 950 million dollars".

THE COURT: All right.

MR. PARKER: But, Your Honor, not less than does not necessarily mean they're going to go more than.

THE COURT: I understand that.

MR. PARKER: And I thought the line of questioning was that how do we know that there'll be sufficient funds? And I had thought that we were being told that the government is -- Treasury is representing that there will be sufficient funds, that they won't --

THE COURT: Well, we haven't heard that from the Treasury yet.

MR. PARKER: Okay.

THE COURT: I think Mr. Koch has told you his understanding, which is, frankly, all you can get out of Mr. Koch.

MR. PARKER: Thank you, Your Honor.

THE COURT: Okay.

MR. PARKER: I have no further questions.

THE COURT: Okay. All right, any other objectors up for Mr. Koch? Redirect, Mr. Miller?

REDIRECT EXAMINATION

BY MR. MILLER:

Q. Mr. Koch, you heard Mr. Worth's testimony as to the value of the equity and warrants that will be the property of the estate of OldCo?

A. I did.

Q. And do you recall what that value was?

A. 3.9 to 4.9 billion dollars.

Q. Did you take into account the value of the warrants?

MR. RICHMAN: Objection, Your Honor. The question went to Mr. Worth's testimony and what Mr. Koch recalls. So --

THE COURT: Sustained.

Why don't you rephrase, please, Mr. Miller?

MR. MILLER: If I may, Your Honor, may I show the witness -- I think it's Exhibit 3, Mr. Worth's --

THE COURT: Yes, you may.

MR. MILLER: -- declaration.

Q. I draw your attention to page 14. Do you see the value that Mr. Worth beforehand put down, the equity value and the common stock going to OldCo?

A. I do.

Q. And that value's how much?

A. 7.4 billion to 9.8 billion dollars.

Q. So that the estate -- if that value is correct, the estate of OldCo will have over 7 billion dollars of value, not counting the 950 million dollars?

A. That is correct.

Q. At least the 950 million dollars, is that correct?

A. Yes, sir.

Q. In your opinion, is there any possibility of the administrator -- the estate of OldCo being administratively insolvent?

A. No, sir.

MR. MILLER: Thank you.

THE COURT: All right. Any recross?

MR. RICHMAN: One second, Your Honor.

THE COURT: Sure.

(Pause)

MR. RICHMAN: Just a few, Your Honor.

RECROSS-EXAMINATION

BY MR. RICHMAN:

Q. Mr. Koch, are you familiar with the widely reported agreement of GM's bondholders with Treasury that was reported just prior to the bankruptcy filing as to what consideration they would be receiving from NewCo?

A. I know only what I read in the newspaper.

Q. Was that ten percent of the equity of NewCo and warrants to acquire another fifteen percent were going to be what

bondholders, indeed what all unsecured creditors, could expect to receive from NewCo in these Chapter 11 cases?

MR. MILLER: Objection, Your Honor. If Mr. Richman has such a document, if he could show it to the witness. All Mr. Koch said is what he read in the newspaper.

Q. Do you have knowledge that there is an agreement that has been reported that unsecured creditors will receive ten percent of the equity of NewCo and warrants to acquire another fifteen percent?

MR. MILLER: That assumes facts that are not in the record, Your Honor, and goes beyond redirect.

MR. RICHMAN: I believe it is in the record in a number documents, including briefs.

THE COURT: I think it does not exceed redirect, and I'm going to overrule the objection with the understanding that if you -- that you don't have to accept his premises if you don't want to, Mr. Koch. You can answer the question as best you can.

A. I have only a very general understanding. So to make a -- some -- to give you a specific answer as to what my understanding of the specific deal that's been reached, I don't know the specific deal that's been reached.

Q. Well, if there was a specific deal reached of the type I just described that would provide ten percent of the equity of NewCo and warrants to acquire another fifteen percent for the

benefit of all unsecured creditors, would I be correct that your testimony in response to Mr. Miller's last question is that unsecured creditors could not, under any reasonable scenario, expect to receive those distributions?

A. It is possible that we would need to sell some of the new stock. It is -- we would -- if we had 950 million dollars to work with, we'll do our very best to wind down the estate at minimum cost. Any excess monies will be returned to the Treasury. I think it would be unlikely that we would get it done for 950; I wouldn't rule it out entirely. And so if we were unable to get it done for 950, then it is possible we would need to sell some of the stock.

Q. So I would be correct in saying, then, that the -- any distribution that has been set aside for unsecured creditors would likely have to be invaded and diminished in order to handle wind-down and other administrative costs that are not being covered by Treasury --

A. It is --

Q. -- correct?

A. That is possible.

MR. RICHMAN: Thank you.

THE COURT: Okay. Mr. Eckstein?

RECROSS-EXAMINATION

BY MR. ECKSTEIN:

Q. Mr. Koch, let me just clarify a couple of items that I

believe were the subject of your testimony. Did I understand you to testify that in your view this estate will have sufficient assets outside of the stock that is being retained by OldCo, the stock and the warrants; that this estate will have sufficient liquid assets, either the 950 or some additional amount of cash being provided by Treasury, to satisfy the wind-down obligations of this estate?

MR. MILLER: Objection, Your Honor.

THE COURT: Sustained. And here's the problem, folks. I understand the point that both of you folks are making. Mr. Miller, you made the point that there's aggregate assets so that there's no way that I or another judge could find the case administratively insolvent. Mr. Eckstein is making quite a different point, which is that a good chunk, let's call it between 7.4 and 9.8 billion bucks' worth of stock, is going to be illiquid until it's converted to cash and before it's registered with the SEC without an 1145 exemption. It's going to be hard to unload. In the meantime, the estate's going to be short on liquidity.

I understand the points that you're trying to make, Mr. Epstein, but you got to ask questions that are focused on liquidity as contrasted to administrative insolvency in the technical sense, unless you're trying to show me something different.

MR. ECKSTEIN: Your Honor, and I'll save it for --

the argument I'll save for later in the hearing, but I am making a somewhat different point, and that is that -- and I understood Mr. Koch to testify that he expects that the amount of cash that is being left in the estate by the United States Treasury will be sufficient to satisfy the wind-down obligations separate and apart from the stock and the warrants. And it was that issue that I was going to, which subsumes the liquidity issue, Your Honor. But --

THE COURT: Okay, but then if you've got further nuances, I'm not keeping up with you on that. So if you have further questions that you want to develop, go ahead and do it; just make them a little clearer in terms of whether you're talking about assets, liquidity or something possibly --

MR. ECKSTEIN: I will do so, Your Honor. Thank you.

THE COURT: Okay. Thanks.

BY MR. ECKSTEIN:

Q. Mr. Koch, are you familiar with negotiations that took place, prior to the commencement of this case, between representatives of an ad hoc committee for bondholders and the United States Treasury regarding the amount of equity and warrants that will be left for the benefit of unsecured creditors of this estate?

A. I have secondhand knowledge of those discussions.

Q. And what did -- what was your understanding as to what was agreed to, to be left for unsecured creditors of this estate?

MR. MILLER: Objection, Your Honor. It's hearsay.

THE COURT: It is hearsay. So unless it's not for the truth of the matter asserted, I have to sustain Mr. Miller's objection.

MR. ECKSTEIN: Just a few more questions, if I may.

THE COURT: Sure. Of course.

Q. Mr. Koch, did you ever see a term sheet that summarized the understanding reached between the bondholders and the U.S. Treasury?

MR. MILLER: Object to the question, Your Honor. It assumes there was an agreement between the bondholders and somebody. I don't know who he's talking about.

THE COURT: Sustained as to form for lack of foundation. But if you can lay the foundation, Mr. Eckstein, you can try.

Q. Mr. Koch, are you familiar with a term sheet that reflected any discussions that took place between U.S. Treasury and an ad hoc committee of bondholders?

A. I don't recall if I ever saw a term sheet or not.

MR. ECKSTEIN: Your Honor, may I approach the witness for a moment?

THE COURT: Sure. You can go ahead and see it now. But before you ask the question --

MR. ECKSTEIN: I will, Your Honor.

THE COURT: -- give Mr. Miller a copy, and anybody

else who needs to see it.

(Pause)

Q. Mr. Koch, have you ever seen this term sheet?

A. No, sir.

Q. So you're not familiar with it?

A. That is correct.

Q. Okay.

MR. ECKSTEIN: Thank you, You Honor. I'll save the question.

THE COURT: Okay. Any other objectors for Mr. Koch? All right, Mr. Miller, anything further?

MR. MILLER: No, sir.

THE COURT: All right, Mr. Koch, you're excused. Thank you.

THE WITNESS: Thank you.

THE COURT: Okay, folks, it's now twenty-five to 8. I'd like to get a sense as to how long Mr. Repko's expected to be. If he's more than a very modest period of time, I inclined to go tomorrow.

MR. RICHMAN: Your Honor?

THE COURT: Mr. Richman?

MR. RICHMAN: With your permission, I would prefer that we do that tomorrow. I think it would be more efficient. I don't know who else has questions. There's -- I think we can benefit from a break as well.

MR. MILLER: Your Honor, can we get some idea as to what Mr. Richman -- how many -- what time he expects --

THE COURT: You can get an idea, but I'll tell you that I'm not going to bind him to his representation. Mr. Richman, do you have a sense as to how long you're going to be?

MR. RICHMAN: I'm thinking in the nature of thirty to forty-five minutes. It may be less.

THE COURT: Okay. Are there other folks who think they may -- other objectors who think they want to question Mr. Repko too? All right, Mr. Parker raised his hand. I will start -- we'll do Mr. Repko tomorrow. But, Mr. Richman, who do you want to take first so that people can plan?

MR. RICHMAN: Mr. Repko.

THE COURT: All right. Fair enough. Okay then, folks --

MR. MILLER: Your Honor, if I might interrupt.

THE COURT: Yes, Mr. Miller?

MR. MILLER: There are some other matters on the calendar which I think we could clear up very quickly.

THE COURT: All right. Any objection to that?

UNIDENTIFIED SPEAKER: Couldn't hear. What?

MR. MILLER: There are other matters on the -- that were set on the calendar for today which we could clear up very quickly, including some uncontested matters.

THE COURT: Okay. Yeah, I think you have to tell

people what you have in mind so that -- because if I ask if they object without them knowing, it makes it a little hard for them to respond.

MR. MILLER: I tried, Your Honor. Mr. Smolinsky will handle that, Your Honor.

THE COURT: Okay.

MR. SMOLINSKY: Good evening, Your Honor. Joe Smolinsky from Weil, Gotshal & Manges, for the debtors. On the calendar today we have a lease rejection motion that Your Honor alluded to earlier. We're rejecting thirty-nine leases and six subleases. The rejection is effective today. There was one objection, Your Honor, Environmental Testing Corporation, which was a lease, a thirty-eight year lease. It expires on its terms December 2009. ETC had objected to the sale based on 105 of the Bankruptcy Code; Your Honor had made a comment about that earlier. And in speaking with counsel for ETC, they were willing to rest on their papers and have Your Honor decide as to whether or not Your Honor would defer to the business judgment of the company in rejecting that lease.

THE COURT: All right. Charlie, do you have my file on that?

MR. SMOLINSKY: Your Honor, we did file a reply yesterday. I'm not sure if Your Honor has it.

THE COURT: All right. I'm granting the motion vis-a-vis the nonobjectors, and I'm also granting it vis-a-vis the

objector, in reliance, in part, on my 2004 decision in Ames Department Stores, 306 B.R. 43. In that case we had a very similar situation in which a debtor wanted to reject the lease and leave his mess behind. And the landlord contended that the debtor couldn't reject the lease until it left the leased premises in the condition that they were supposed to have been left in under the lease.

And I ruled that the very purpose of the rejection aimed to relieve the estate of burdensome obligations. The failures to meet lease obligations could not themselves be impediments to the ability of a debtor to enforce those rights or to apply its rights to reject for the benefit of the creditors of the estate.

And I stated at page 51, "The Court necessarily must reject the landlord's implicit contention that the debtor's statutory right to reject can be qualified by requirements not in the Bankruptcy Code itself and especially by an implied requirement in compliance with lease covenants that are burdensome to the debtor, that they form part of the rationale for rejection in the first place." I'm not going to read the totality of that language, but I think it's directly on point here.

I fully recognize that any rejection can be a hardship to the lease counterparty, but there are a lot of people suffering in this case and I simply can't help everybody

who appears before me.

I refer everybody to the Ames decision in greater length for a more extensive discussion of that. But the motion is granted even vis-a-vis the objector.

And, Mr. Smolinsky, I would appreciate it if you or your designee would provide a copy of this portion of the transcript to your counterparty and, with that, then settle an order granting relief vis-a-vis that entity as well as the remainder, the ruling being nunc pro tunc to the time of the filing of the motion.

MR. SMOLINSKY: Thank you, Your Honor. Actually, the effective date of the rejection is today.

THE COURT: Oh, okay. That's less controversial.

MR. SMOLINSKY: Thank you, Your Honor.

THE COURT: Okay.

MR. SMOLINSKY: To clean up the docket, Your Honor, there were two utility objections that were carried over from the 25th. We have now resolved those objections and we can mark those matters off calendar.

THE COURT: Okay.

MR. SMOLINSKY: We can notify chambers. Your Honor, the last matter is an ordinary-course professional motion. It seeks to allow us to use streamlined procedures for the engagement of ordinary-course professionals, which are limited to lawyers and limited to those that bill less than 150,000

dollars a month with a two million dollar overall cap for each professional. The motion also contains a 20,000 dollar a month cap on de minimis professionals which don't need to go through the procedures of filing declarations and affidavits with the Court.

We've been in discussions -- we've had discussions with the U.S. trustee, with the creditors' committee; they have no objection. Your Honor, the U.S. trustee had asked us to make a representation on the record with respect to the de minimis professionals, that those professionals will not be engaged in activities related to the debtors' core restructuring activities. And while we don't necessarily object to the general premise of that representation, we do have certain concerns about misrepresenting the facts. So if I could just spend a minute to explain how the company engages professionals. We have approximately 70 ordinary-course professionals, which is between the 20,000 and 150,000. We have hundreds of professionals that would fall below the 20,000 dollars. These professionals are engaged -- these lawyers are engaged by the hundred-plus in-house lawyers that work for General Motors. So it's hard to coordinate the efforts of understanding what every de minimis professional is doing at every moment.

These de minimis professionals are engaged in providing legal opinions in the ordinary course, assisting on

international aspects of transactions, lemon law litigation, product liability litigation, environmental litigation, labor law, franchise law issues.

So these professionals are not engaged, are not hired for the bankruptcy, but the concern is that they may do certain aspects that relate indirectly to the bankruptcy efforts, such as getting legal opinions in connection with mortgages, and the like. So we can make the representation that these de minimis professionals are not engaged specifically but have long-standing relationships with the company for the aspects of the work that they're going to be engaged in.

THE COURT: Okay. Mr. Masumoto, Ms. Davis, are you okay with what he had to say? Just come to the microphone, if you would.

MR. MASUMOTO: Yes, Your Honor. The representations made satisfy the requirements that we set -- agreed to with counsel.

THE COURT: Okay. Okay, Mr. Eckstein, do you guys want to be heard now?

MR. ECKSTEIN: Your Honor, we're satisfied with the relief being sought.

THE COURT: Okay. Thank you.

MR. SMOLINSKY: Yes, Your Honor, with respect to the rejection of leases, there are two leases that are going to be handled by co-counsel because of conflict issues.

THE COURT: Sure. Come on up, please.

MR. MURRAY: Your Honor, Dan Murray for Jenner & Block, special counsel for the debtor. Your Honor, this is the second -- this is the debtor's second omnibus motion to reject certain unexpired leases of nonresidential real property. It's on the agenda for today. Your Honor, the landlord has no objections to the entry of an order that's been slightly modified by us, a draft order, to make a correction on an address. And it's not objected to by the landlord, Your Honor. We would submit --

THE COURT: Okay. Is the order that I've already received in the form that the landlords have had a chance to see it?

MR. MURRAY: They have seen the revised version, Your Honor, and I have it with me to give it to your clerk at the conclusion of the hearing.

THE COURT: Okay. Do that as soon as we're done, Mr. Murray.

MR. MURRAY: I will, Your Honor. Thank you.

THE COURT: It's approved.

MR. MURRAY: Thank you, Your Honor.

THE COURT: Okay. Anything else? Mr. Miller?

MR. MILLER: Yes, Your Honor. Mr. Eckstein's --

THE COURT: Sure. Come on up, please, Mr. Eckstein.

MR. ECKSTEIN: Thank you, Mr. Miller. Thank you,

Your Honor. Your Honor, item number 3 on the agenda in the uncontested section is the application of the official committee to retain my firm, Kramer Levin, as counsel for the official committee. I am told by my partner, Mr. Schmidt, that this application has been discussed extensively with the United States trustee. And I believe all of the issues have been resolved to the satisfaction of the United States Trustee, and there are no objections that have been filed. So we would respectfully ask --

THE COURT: Okay. Yeah, why don't you just stand in place for a second? Mr. Masumoto, can you join Mr. Eckstein at the lectern, please?

MR. MASUMOTO: Yes, Your Honor. That's correct. We have no further objections to the retention.

THE COURT: Okay.

MR. MASUMOTO: Your Honor, if I may, just as a housekeeping matter, with respect to the ordinary-course professionals, I just did want to indicate that it was also an agreement with our office that the debtors would modify the language of the order to indicate that if they intended to seek a raising of the limit of the ordinary-course professional cap, that they would apply to the Court.

THE COURT: Okay. Let me just try to stay organized here. I want to give Mr. Eckstein a chance to sit down and to give his partner some comfort. Mr. Eckstein, you're motion's

granted.

MR. ECKSTEIN: Thank you, Your Honor.

THE COURT: Now, Mr. Smolinsky, if you can come on up and just confirm that you're okay with what Mr. Masumoto's saying.

MR. ECKSTEIN: Your Honor --

MR. SMOLINSKY: Yes, Your Honor.

MR. ECKSTEIN: Sorry. We'll submit an order.

THE COURT: Sure.

MR. SMOLINSKY: Yes, Your Honor. We will comply with that and we'll add language to the order. And we'll get in touch with Brian to make sure that he's okay with the language.

And I also stand because I -- while I don't want to prejudge the outcome, I don't believe Your Honor has approved the motion yet.

THE COURT: I haven't approved which motion?

MR. SMOLINSKY: The ordinary-course professional.

THE COURT: This is why we need to take a recess tonight. Yes, your ordinary-course professionals motion is granted.

MR. SMOLINSKY: Thank you, Your Honor.

MR. MILLER: Thank you, Your Honor.

THE COURT: Okay, Mr. Miller.

MR. MILLER: Your Honor, there is one other matter on the calendar, Greater New York Automobile Dealers Association's

motion for consideration of amicus curiae statement, an amicus curiae statement regarding the 363 transaction.

THE COURT: Can you think of any reason why I should tell them they can't file a brief?

MR. MILLER: No, sir.

THE COURT: It's granted.

MR. MILLER: Thank you, Your Honor.

THE COURT: Okay. All right. We're adjourned until tomorrow, 8:00 for the relief from stay motion. I assume that that will be lightly attended, one lawyer, or whatever, on behalf of the estate, or whatever it takes, should be here at 8:00 for the movant. And he or she should tell security, if there's a problem in getting in early, that that person's needed for an 8:00 hearing. I'll tell the marshals to let people in starting at 7:30, unless we need to get things -- people going through security even earlier than that. And I'll expect the rest of you folks at 9. Those folks who have staked out positions at the counsel table or, for that matter, in this courtroom, should tell the marshals, if you have a problem, that I said you can have your seats back. Okay, we're adjourned until tomorrow.

ALL: Thank you, Your Honor.

(Whereupon these proceedings were concluded at 7:51 p.m.)

MOTORS LIQUIDATION COMPANY GUC TRUST
QUARTERLY GUC TRUST REPORTS AS OF JUNE 30, 2014

The Motors Liquidation Company GUC Trust (the "**GUC Trust**"), by its undersigned counsel, pursuant to the Amended and Restated Motors Liquidation Company GUC Trust Agreement dated June 11, 2012 and between the parties thereto (as amended, the "**GUC Trust Agreement**") and in accordance with Paragraph 31 of the order of this Court dated March 29, 2011 confirming the Debtors' Second Amended Joint Chapter 11 Plan of liquidation dated March 18, 2011 of Motors Liquidation Company and its affiliated post-effective date debtors (the "**Confirmation Order**"), hereby files the following for the most recently ended fiscal quarter of the GUC Trust.

Financial statements required under Section 6.2(b) of the GUC Trust Agreement for the fiscal quarter ended June 30, 2014 are annexed hereto as Exhibit A (the "**GUC Trust Reports**").

The GUC Trust has no officers, directors or employees. The GUC Trust and Wilmington Trust Company, solely in its capacity as trustee and trust administrator (the "**GUC Trust Administrator**"), rely solely on receiving accurate information, reports and other representations from GUC Trust professionals and other service providers to the GUC Trust. In submitting the GUC Trust Reports and executing any related documentation on behalf of the GUC Trust, the GUC Trust Administrator has relied upon the accuracy of such reports, information and representations.

The GUC Trust has not presented a reconciliation from net income to cash flow from operations. As an entity in liquidation, the GUC Trust does not have continuing operations that result in the measurement of net income as that term is used by generally accepted accounting principles to measure results of operations.

See Accompanying Notes to Condensed Financial Statements.

Motors Liquidation Company GUC Trust
Notes to Condensed Financial Statements
June 30, 2014

1. Description of Trust and Reporting Policies

The Motors Liquidation Company GUC Trust ("GUC Trust") is a successor to Motors Liquidation Company (formerly known as General Motors Corp.) ("MLC") for the purposes of Section 1145 of the United States Bankruptcy Code ("Bankruptcy Code"). The GUC Trust holds, administers and directs the distribution of certain assets pursuant to the terms and conditions of the Amended and Restated Motors Liquidation Company GUC Trust Agreement (the "GUC Trust Agreement"), dated as of June 11, 2012 and as amended from time to time, and pursuant to the Second Amended Joint Chapter 11 Plan (the "Plan"), dated March 18, 2011, of MLC and its debtor affiliates (collectively, along with MLC, the "Debtors"), for the benefit of holders of allowed general unsecured claims against the Debtors ("Allowed General Unsecured Claims").

The GUC Trust was formed on March 30, 2011, as a statutory trust under the Delaware Statutory Trust Act, for the purposes of implementing the Plan and distributing the GUC Trust's distributable assets. The Plan generally provides for the distribution of certain shares of common stock ("New GM Common Stock") of the new General Motors Company, formerly known as NGMCO, Inc. ("New GM"), and certain warrants for the purchase of shares of such stock (the "New GM Warrants," and, together with the New GM Common Stock, the "New GM Securities") to holders of Allowed General Unsecured Claims pro rata by the amount of such claims. In addition, the Plan provides that each holder of an Allowed General Unsecured Claim will obtain, in the form of GUC Trust Units (as defined below), a contingent right to receive, on a pro rata basis, additional shares of New GM Common Stock and New GM Warrants (if and to the extent such New GM Common Stock and New GM Warrants are not required for the satisfaction of previously Disputed General Unsecured Claims (as defined in Note 2) or liquidation for the payment of the expenses and liabilities of the GUC Trust) and certain cash, if any, remaining at the dissolution of the GUC Trust.

The GUC Trust exists solely for the purpose of resolving claims, distributing New GM Securities (and associated Dividend Cash (as defined below)) and winding down the affairs of MLC, all in accordance with a plan of liquidation of MLC approved by the Bankruptcy Court. Accordingly, the GUC Trust has prepared the accompanying financial statements on the liquidation basis of accounting in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Under the liquidation basis of accounting as prescribed by the Financial Accounting Standards Board (FASB) Accounting Standards Codification, assets are stated at their estimated net realizable value, which is the non-discounted amount of cash into which an asset is expected to be converted during the liquidation period, while liabilities continue to be recognized at the amount required by other U.S. GAAP, and are not remeasured to reflect any anticipation that an entity will be legally released from an obligation. Additionally, under the liquidation basis of accounting, a reserve is established for estimated costs expected to be incurred during the liquidation period. Such costs are accrued when there is a reasonable basis for estimation. As described below, beginning in the quarter ended June 30, 2014, an accrual is made for estimated income or cash expected to be received over the liquidation period to the extent that a reasonable basis for estimation exists. These estimates are periodically reviewed and adjusted as appropriate. The valuation of assets at net realizable value, the accrual for dividends on the GUC Trust's holdings of New GM Common Stock expected to be received over the liquidation period, reserves for residual wind-down claims and reserves for expected liquidation costs represent estimates, are based on present facts and circumstances known to the GUC Trust Administrator, and are subject to change.

As described above, the beneficiaries of the GUC Trust are future holders and, to the extent their liquidating distributions have not yet been paid to them, current holders of Allowed General Unsecured Claims and future and current holders of GUC Trust Units ("Trust Beneficiaries"). As Disputed General Unsecured Claims are resolved and allowed and thereby become Allowed General Unsecured Claims, the holders thereof become entitled to receive liquidating distributions of New GM Securities (and the related Dividend Cash) and GUC Trust Units pro rata by the amount of such Claims and, upon such occurrence, the GUC Trust incurs an obligation to distribute such securities. Accordingly, liquidating distributions payable are recorded (at the fair value of such New GM Securities and the related Dividend Cash) as of the end of the period in which the Disputed General Unsecured Claims are resolved as Allowed General Unsecured Claims. Similarly, to the extent potential Term Loan Avoidance Action Claims (as defined in Note 2) were to arise (and would become allowed) in the manner described in Note 2, liquidating distributions payable would be recorded for the New GM Securities and the related Dividend Cash (at fair value) that would become distributable to holders of Term Loan Avoidance Action Claims upon such occurrence. Prior to the resolution and allowance of Disputed General Unsecured Claims (or potential Term Loan Avoidance Action Claims), liabilities are not recorded for the conditional obligations associated with Disputed General Unsecured Claims. Rather, the beneficial interests of Trust Beneficiaries in the residual assets of the GUC Trust are reflected in Net Assets in Liquidation of the GUC Trust in the accompanying financial statements.

The accompanying (a) condensed statement of net assets in liquidation at March 31, 2014, which has been derived from audited financial statements, and (b) the unaudited interim condensed financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all information and footnotes required by U.S. GAAP for complete financial statements. The GUC Trust believes all adjustments, normal and recurring in nature, considered necessary for a fair presentation have

been included. The changes in net assets in liquidation for the three months ended June 30, 2014 are not necessarily indicative of the changes in net assets that may be expected for the full year. The GUC Trust believes that, although the disclosures contained herein are adequate to prevent the information presented from being misleading, the accompanying interim condensed financial statements should be read in conjunction with the GUC Trust's financial statements for the year ended March 31, 2014 included in Form 10-K filed by the GUC Trust with the Securities and Exchange Commission on May 22, 2014.

The preparation of condensed financial statements in conformity with U.S. GAAP requires the GUC Trust Administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and are subject to change.

Changes to U.S. GAAP are made by the FASB in the form of accounting standards updates (ASU's) to the FASB's Accounting Standards Codification. The GUC Trust considers the applicability and impact of all ASU's. ASU's not noted herein were assessed and determined to be not applicable. During the quarter ended June 30, 2014, the GUC Trust adopted Accounting Standards Update No. 2013-07, "Liquidation Basis of Accounting". Such standard requires that income or cash expected to be received over the liquidation period be estimated and accrued to the extent that a reasonable basis for estimation exists. The effect of adoption of such standard was not material to the GUC Trust's financial statements for the quarter ended June 30, 2014. As of June 30, 2014, the GUC Trust has accrued approximately $4.7 million for (a) dividends of $4.6 million expected to be received by the GUC Trust on its holdings of New GM Common Stock and (b) interest income of approximately $155,000 expected to be earned on marketable securities over the estimated remaining liquidation period of the GUC Trust. Such accrued dividends consist of dividends of $0.30 per share declared by New GM in August 2014 payable to common stockholders of record on September 10, 2014. No accrual has been made with respect to any additional dividends that may be declared by New GM in the future, because the GUC Trust believes that a reasonable basis for estimation of such potential dividends does not exist at this time.

2. Plan of Liquidation

On March 31, 2011, the date the Plan became effective (the "Effective Date"), there were approximately $29,771 million in Allowed General Unsecured Claims. In addition, as of the Effective Date, there were approximately $8,154 million in disputed general unsecured claims which reflects liquidated disputed claims and a Bankruptcy Court ordered distribution reserve for unliquidated disputed claims ("Disputed General Unsecured Claims"), but does not reflect potential Term Loan Avoidance Action Claims. The total aggregate amount of general unsecured claims, both allowed and disputed, asserted against the Debtors, inclusive of the potential Term Loan Avoidance Action Claims, was approximately $39,425 million as of the Effective Date.

Pursuant to the GUC Trust Agreement, holders of Disputed General Unsecured Claims become entitled to receive a distribution of New GM Securities from the GUC Trust if, and to the extent that, such Disputed General Unsecured Claims become Allowed General Unsecured Claims. Under the GUC Trust Agreement, the GUC Trust Administrator has the authority to file objections to such Disputed General Unsecured Claims and the Bankruptcy Court has extended the time by which the GUC Trust may object to Disputed General Unsecured Claims and Administrative Expenses as defined in the Plan to September 16, 2014 (which date may be further extended by application to the Bankruptcy Court). Such claims may be prosecuted through alternative dispute resolution proceedings, including mediation and arbitration ("ADR Proceedings"), if appropriate. As of June 30, 2014, there were approximately $79.5 million in Disputed General Unsecured Claims, which amount has been significantly reduced from approximately $8,154 million as of the Effective Date. See "—Allowed and Disputed Claims" below.

To the extent that all or a portion of a Disputed General Unsecured Claim is deemed invalid—or "disallowed"—by order of the Bankruptcy Court, by order of the tribunal presiding over the ADR Proceeding (if applicable), or by settlement with the GUC Trust, such portion of the Disputed General Unsecured Claim that is disallowed is not entitled to a distribution from the GUC Trust (subject to any appeal rights of the claimant). However, to the extent that a Disputed General Unsecured Claim is fully resolved, and such resolution results in all or a portion of the original Disputed General Unsecured Claim being deemed valid—or "allowed"—by order of the Bankruptcy Court, by order of the tribunal presiding over the ADR Proceeding (if applicable), or by settlement with the GUC Trust, such portion of the Disputed General Unsecured Claim that is allowed will be considered an Allowed General Unsecured Claim on the Effective Date (such claims, "Resolved Disputed Claims").

Only one avoidance action, captioned Official Committee of Unsecured Creditors of Motors Liquidation Co. v. JPMorgan Chase Bank, N.A. et al., Adv. Pro. No. 09-00504 (Bankr. S.D.N.Y. July 31, 2009) (the "Term Loan Avoidance Action"), was commenced prior to the statutory deadline for commencing such actions. The Term Loan Avoidance Action was commenced by the Official Committee of Unsecured Creditors of Motors Liquidation Company (the "Committee"), and seeks the return of approximately $1.5 billion that had been transferred by the Debtors (with funds advanced after the commencement of the Debtors' chapter 11 cases by the United States Treasury and Export Development Canada (together, the "DIP Lenders")) to a consortium of prepetition lenders pursuant to the terms of the order of the Bankruptcy Court. On December 15, 2011, in accordance with the Plan, upon the dissolution of MLC, the Term Loan Avoidance Action was transferred to the Avoidance Action Trust (as defined below). To the extent that Wilmington Trust Company, not in its individual capacity but solely in its capacity as the trustee and trust administrator of the Avoidance Action Trust (the "Avoidance Action Trust Administrator"), is successful in obtaining a judgment against the defendant(s)

to the Term Loan Avoidance Action, Allowed General Unsecured Claims will arise in the amount of any transfers actually avoided (that is, disgorged) pursuant thereto (such general unsecured claims "Term Loan Avoidance Action Claims," and together with Resolved Disputed Claims, the "Resolved Allowed Claims").

It is still unclear whether any amounts actually avoided pursuant to the Term Loan Avoidance Action would be for the benefit of holders of Allowed General Unsecured Claims. The Committee has taken the position that (a) the DIP Lenders are not entitled to any proceeds of the Term Loan Avoidance Action and have no interests in the trust established for the action under the Plan (the "Avoidance Action Trust") and (b) the holders of Allowed General Unsecured Claims have the exclusive right to receive any and all proceeds of the Term Loan Avoidance Action, and are the exclusive beneficiaries of the Avoidance Action Trust with respect thereto.

Litigation with respect to these issues is ongoing (with the Term Loan Avoidance Action currently pending before the U.S. Court of Appeals for the Second Circuit), and the rights to any recoveries on the Term Loan Avoidance Action are still disputed. In no event, however, will any funds reclaimed from the pre-petition lenders be transferred to or otherwise benefit the GUC Trust or be distributed to holders of GUC Trust Units.

GUC Trust Distributable Assets

Pursuant to the terms of the Plan, the Bankruptcy Court authorized the distribution of 150 million shares of New GM Common Stock issued by New GM, warrants to acquire 136,363,635 newly issued shares of New GM Stock with an exercise price set at $10.00 per share ("New GM Series A Warrants"), and warrants to acquire 136,363,635 newly issued shares of New GM Stock with an exercise price set at $18.33 per share ("New GM Series B Warrants"). Record ownership of the New GM Securities was held by MLC for the benefit of the GUC Trust until the dissolution of MLC on December 15, 2011, at which time record ownership was transferred to the GUC Trust.

The GUC Trust received dividends on the New GM Common Stock it held in March and June 2014 aggregating $9.2 million. New GM has also declared a dividend of $0.30 per share to holders of New GM Common Stock of record as of September 10, 2014. Such dividends and any future declared dividends on New GM Common Stock are required to be applied to the same purpose as the New GM Common Stock to which such dividends relate. If shares of New GM Common Stock are distributed to holders of subsequently Resolved Allowed Claims and GUC Trust Units, then the dividends relating to those shares will also be distributed to such holders. If, however, shares of New GM Common Stock are sold by the GUC Trust in accordance with the GUC Trust Agreement to fund the costs and liabilities of the GUC Trust, then, in that case, the dividends relating to those shares will be applied to such costs and liabilities of the GUC Trust and (just like the cash proceeds from the sale of the shares of New GM Common Stock) will be maintained in Other Administrative Cash. Because such dividends are applied to the same purpose as the New GM Common Stock, references in this Form 10-Q to New GM Common Stock and New GM Securities that have been set aside from distribution, reserved or sold should be understood to include the dividends (if any) relating to such New GM Common Stock, unless expressly indicated otherwise. The amount of cash and cash equivalents held by the GUC Trust that relates to dividends received by the GUC Trust on New GM Common Stock held by the GUC Trust is referred to as Dividend Cash.

Funding for GUC Trust Costs of Liquidation

The GUC Trust has incurred and will continue to incur certain costs to liquidate the trust assets and implement the Plan. On or about the Effective Date, pursuant to the Plan, MLC contributed approximately $52.7 million to the GUC Trust to be held and maintained by the GUC Trust Administrator (the "Administrative Fund") for the purpose of paying certain fees and expenses (including certain tax obligations) incurred by the GUC Trust (including fees of the GUC Trust Administrator and the GUC Trust Monitor and the fees and expenses for professionals retained by the GUC Trust), other than the Reporting Costs, as defined below ("Wind-Down Costs"). As of June 30, 2014, the remaining Administrative Fund aggregated $10.7 million (consisting of cash and cash equivalents and marketable securities aggregating $9.8 million and prepaid expenses of $0.9 million). Of that amount, approximately $8.0 million has been separately designated for the satisfaction of certain costs and liabilities of the GUC Trust (other than Reporting Costs (as defined below)) and $2.7 million is available for other Wind-Down Costs, which funds must be exhausted prior to the use of any Other Administrative Cash (as defined below) for such purposes. Cash or investments from the Administrative Fund, if any, which remain at the winding up and conclusion of the GUC Trust must be returned to the DIP Lenders.

The GUC Trust Agreement authorized the GUC Trust to liquidate approximately $5.7 million of New GM Securities (the "Initial Reporting Cash") shortly after the Effective Date for the purposes of funding certain fees and expenses of the GUC Trust (the "Reporting Costs"), including those directly or indirectly relating to (i) reports to be prepared and filed by the GUC Trust pursuant to applicable rules, regulations and interpretations of the Securities and Exchange Commission, (ii) the transfer, registration for transfer and certification of GUC Trust Units, and (iii) the application by the Committee to the Internal Revenue Service for a private letter ruling regarding the tax treatment of the GUC Trust and the holders of Allowed General Unsecured Claims in respect to the distribution of New GM Securities. The GUC Trust Agreement provides that the Administrative Fund may not be utilized to satisfy any Reporting Costs.

The GUC Trust Agreement provides that, if the GUC Trust Administrator determines that the Administrative Fund is not sufficient to satisfy the current or projected Wind-Down Costs or the Initial Reporting Cash is not sufficient to satisfy the current or projected Reporting Costs, the GUC Trust Administrator, with the approval of the GUC Trust Monitor, is authorized to set aside New GM Securities from distribution for these purposes. The GUC Trust Administrator may then liquidate such "set aside" New GM Securities to fund the Wind-Down Costs and/or Reporting Costs with the required approval of the Bankruptcy Court. New GM Securities that are set aside and/or sold in this manner will not be available for distribution to the beneficiaries of GUC Trust Units, and the cash proceeds of any such sale (including related Dividend Cash) will be classified as "Other Administrative Cash" under the GUC Trust Agreement. Although any such liquidation of set aside New GM Securities will be reflected in the financial statements of the GUC Trust at the time of liquidation, the setting aside of New GM Securities, including Dividend Cash, itself is not reflected in the Statement of Net Assets in Liquidation or any of the other financial statements of the GUC Trust. Separate from this process of setting aside New GM Securities to satisfy unfunded projected costs and expenses of the GUC Trust, as a matter of financial reporting, the GUC Trust records a reserve in its Statement of Net Assets in Liquidation (the source of funding of which is not addressed therein) for all expected costs of liquidation for which there is a reasonable basis for estimation. For this reason, among others, there is not a direct relationship between the amount of such reserve reflected in the Statement of Net Assets in Liquidation and the value of any New GM Securities that are set aside for current or projected costs and expenses of the GUC Trust. Adjustments to the Reserve for Expected Costs of Liquidation as reported in the Statement of Net Assets in Liquidation are recorded only when there is a reasonable basis for estimation of the expected incurrence of additional costs or a reduction in expected costs. For more information regarding the Reserves for Expected Costs of Liquidation reflected in the Statement of Net Assets in Liquidation, see Note 7.

The Bankruptcy Court previously approved in March 2012, and December 2012, the sale of New GM Securities to fund the then current and projected costs and expenses of the GUC Trust. In March 2012, the Bankruptcy Court order also authorized the sale of further New GM Securities for the purpose of funding certain fees, costs and expenses of the Avoidance Action Trust (as described below under the heading "—Funding for Avoidance Action Trust"). Through March 31, 2013, sales of New GM Securities to fund projected Reporting Costs and Wind-Down Costs aggregated approximately $50.2 million, including the Initial Reporting Cash (which amounts comprised part of the GUC Trust's Other Administrative Cash). Such securities sold aggregated 902,228 shares of New GM Common Stock, 820,205 New GM Series A Warrants and 820,205 New GM Series B Warrants. There have been no subsequent sales of securities to fund Wind-Down Costs and Reporting Costs.

As of June 30, 2014, Other Administrative Cash aggregated $11.5 million. To the extent that any of the Other Administrative Cash is not ultimately required and is held by the GUC Trust at the time of its dissolution, such remaining Other Administrative Cash will be distributed by the GUC Trust to holders of the GUC Trust Units.

As of June 30, 2014, New GM Securities with an aggregate fair market value as of that date of $64.3 million and related Dividend Cash of $0.5 million have been set aside for projected GUC Trust fees, costs and expenses to be incurred beyond 2014, including $5.4 million set aside for projected income taxes on dividends received on holdings of New GM common Stock as described below in "Funding for Potential Tax Liabilities on Dispositions of New GM Securities and Dividends on New GM Common Stock". Accordingly, such New GM Securities are currently not available for distribution to the beneficiaries of the GUC Trust Units.

Funding for Potential Tax Liabilities on Dispositions of New GM Securities and Dividends on New GM Common Stock

The GUC Trust is subject to U.S. federal income tax on realized net gains from the distribution and sale of shares of New GM Common Stock and New GM Warrants (such taxes, "Taxes on Distribution"). The GUC Trust is also subject to U.S. federal income tax on dividends received on New GM Common Stock held by the GUC Trust (such taxes, "Dividend Taxes"). The GUC Trust Agreement provides that the Administrative Fund may not be utilized to satisfy any Taxes on Distribution or Dividend Taxes. As such, the GUC Trust Administrator is authorized, with the approval of the GUC Trust Monitor, to set aside from distribution certain numbers of New GM Securities, the liquidated proceeds of which, along with the related Dividend Cash, would be sufficient to satisfy any potential Taxes on Distribution or Dividend Taxes. The New GM Securities that are set aside for Dividend Taxes are included in the set-aside for Wind-Down Costs described above in "Funding for GUC Trust Costs of Liquidation". The GUC Trust Administrator may then liquidate such "set aside" New GM Securities to fund the Taxes on Distribution or Dividend Taxes, with the approval of the GUC Trust Monitor, but, with respect to Taxes on Distributions, without the necessity of obtaining approval of the Bankruptcy Court. New GM Securities that are set aside and subsequently sold in this manner will not be available for distribution to the beneficiaries of GUC Trust Units, and the cash proceeds of any such sale, along with the related Dividend Cash, will be classified as "Other Administrative Cash" under the GUC Trust Agreement. New GM Securities that have been so set aside are included in Holdings of New GM Securities in the accompanying Statement of Net Assets in Liquidation. In the event such set-aside New GM Securities were sold to fund Taxes on Distribution or Dividend Taxes, the proceeds of such sale would be reflected in Cash and Cash Equivalents

and/or Marketable Securities until expended to pay Taxes on Distribution or Dividend Taxes. While the set-aside New GM Securities and the related Dividend Cash are not available for distribution, there is no corresponding liability or reserve related to such set aside assets reflected in the Statement of Net Assets in Liquidation or any of the other financial statements of the GUC Trust.

During the quarter ended June 30, 2014, the GUC Trust Administrator reviewed the current and potential Taxes on Distribution. As a result of such review, the GUC Trust Administrator determined that New GM Securities with an aggregate fair market value (as of June 30, 2014) of $552.0 million and related Dividend Cash of $4.3 million should be set aside for potential Taxes on Distribution based on (1) the GUC Trust's method for calculating potential net gains on distributions or sales of New GM Securities (reduced by carryforward net operating and capital losses and future deductible expenses at June 30, 2014) and (2) the GUC Trust's method for converting the potential tax liability to the number of securities to be set aside. Such New GM Securities are not currently available for distribution to the beneficiaries of GUC Trust Units. The GUC Trust Administrator intends to continue to reevaluate the numbers of New GM Securities set aside on a quarterly basis.

As previously disclosed, during the quarter ended September 30, 2013, the GUC Trust made a determination to file its U.S. federal income tax returns taking the position that beneficial ownership for a substantial majority of New GM Securities was transferred from MLC to the GUC Trust on March 31, 2011, and that the tax basis of such New GM Securities should be determined with reference to the value of such securities on such date, instead of December 15, 2011, when record ownership of the remaining New GM Securities still held by MLC was transferred from MLC to the GUC Trust. For the remaining substantial minority of New GM Securities transferred from MLC to the GUC Trust, the GUC Trust determined that the transfer of beneficial ownership occurred on other dates for which the tax basis should be determined by reference to the value of such securities on such dates. Subsequently, the GUC Trust filed its U.S. federal income tax return for the years ended March 31, 2014 and 2013 with the Internal Revenue Service using the new tax position described above. This new tax position resulted in an increased tax basis of the New GM Securities from the prior tax position and, therefore, reduced taxable gains and increased taxable losses on distributions and sales of New GM Securities since March 31, 2011. The new tax position has not been sustained on examination by the Internal Revenue Service as of the date hereof. However, the GUC Trust believes, based on the available evidence and consultation with GUC Trust professionals, that it is more likely than not that the new tax position will be sustained on examination by the Internal Revenue Service based on the technical merits of the position. Accordingly, this new tax position has been recognized in the current and deferred income tax liabilities and the income tax provision in the GUC Trust's financial statements since the quarter ended September 30, 2013. By contrast, as a conservative measure, the calculation of the "set aside" of New GM Securities for potential Taxes on Distribution utilizes the prior tax position rather than the new tax position. The calculation of the "set aside" of New GM Securities for potential Taxes on Distribution will not reflect the new tax position unless and until the new tax position has been sustained on examination by the Internal Revenue Service, or the liability of the GUC Trust for Taxes on Distribution otherwise has been finally determined in accordance with Section 505(b) of the Bankruptcy Code, for all applicable income tax returns, including the GUC Trust's U.S. federal income tax returns for the year ended March 31, 2014 and subsequent years. The GUC Trust's U.S. federal income tax return for the year ended March 31, 2014 was filed with the Internal Revenue Service on June 12, 2014, and a prompt determination of tax liability pursuant to Section 505(b) of the Bankruptcy Code was requested that same day. As of the date of this Form 10-Q, the GUC Trust has not received notification from the Internal Revenue Service whether or not its income tax return for the year ended March 31, 2014 has been selected for examination. In the event that the GUC Trust subsequently receives such notification from the Internal Revenue Service, it intends to file a current report on Form 8-K disclosing whether or not the tax return will be audited by the Internal Revenue Service.

Residual Wind-Down Claims and Costs

Upon the dissolution of the Debtors, which occurred on December 15, 2011, the GUC Trust became responsible for resolving and satisfying (to the extent allowed) all remaining disputed administrative expenses, priority tax claims, priority non-tax claims and secured claims (the "Residual Wind-Down Claims"). On December 15, 2011, under the Plan, the Debtors transferred to the GUC Trust an amount of cash necessary (the "Residual Wind-Down Assets") to satisfy the ultimate allowed amount of such Residual Wind-Down Claims (including certain litigation defense costs related to the Term Loan Avoidance Action (the "Avoidance Action Defense Costs")), as estimated by the Debtors, and the costs, fees and expenses relating to satisfying and resolving the Residual Wind-Down Claims (the "Residual Wind-Down Costs"). The Residual Wind-Down Assets initially aggregated approximately $42.8 million (which amount consisted of approximately $40.0 million in cash, including approximately $1.4 million for the payment of Avoidance Action Defense Costs, and the transferred benefit of approximately $2.8 million in prepaid expenses). Should the Residual Wind-Down Costs and the Residual Wind-Down Claims be less than the Residual Wind-Down Assets, any excess funds will be returned to the DIP Lenders. If at any time the GUC Trust Administrator determines that the Residual Wind-Down Assets are not adequate to satisfy the Residual Wind-Down Claims (including the actual amount of Avoidance Action Defense Costs) and Residual Wind-Down Costs, such costs will be satisfied by Other Administrative Cash. If there is no remaining Other Administrative Cash, the GUC Trust Administrator is authorized to, with GUC Trust Monitor approval, set aside and, with Bankruptcy Court approval, sell New GM Securities to cover the shortfall. To the extent that New GM Securities are set aside and sold to obtain funding to complete the wind-down of the Debtors, such securities will not be available for distribution to the beneficiaries of the GUC Trust. Therefore, the amount

of Residual Wind-Down Claims and Residual Wind-Down Costs could reduce the assets of the GUC Trust available for distribution. Although any such sale of set aside New GM Securities would be reflected in the financial statements of the GUC Trust in the period of sale, the setting aside of New GM Securities and related Dividend Cash itself would not be reflected in the Statement of Net Assets in Liquidation or any of the other financial statements of the GUC Trust. After the GUC Trust has concluded its affairs, any funds remaining that were obtained from the sale of New GM Securities to fund the wind-down process or the resolution and satisfaction of the Residual Wind-Down Claims will be distributed to the holders of the GUC Trust Units.

The amount of Avoidance Action Defense Costs incurred to date exceeds the corresponding cash of $1.4 million received by the GUC Trust from MLC on the Dissolution Date by approximately $1.1 million. As a result, new Residual Wind-Down Claims have arisen in the amount of such excess. It is expected that additional Avoidance Action Defense Costs will be incurred for which additional Residual Wind-Down Claims will arise to be paid from the other remaining Residual Wind-Down Assets and, following the depletion of such assets, the Administrative Fund (to the extent of any excess amounts remaining in the Administrative Fund from the funds separately designated for the satisfaction of certain costs and liabilities of the GUC Trust), Other Administrative Cash or the sale of New GM Securities. As of June 30, 2014, $30.0 million in Residual Wind-Down Assets were held by the GUC Trust, which are recorded in cash and cash equivalents and marketable securities (aggregating approximately $29.9 million) and other assets and deposits (approximately $0.1 million) in the accompanying Condensed Statement of Net Assets in Liquidation. By comparison, there were approximately $1.3 million in Residual Wind-Down Claims against such assets as of June 30, 2014, subject to increase for new Residual Wind-Down Claims that are expected to arise for Avoidance Action Defense Costs.

In addition to the Residual Wind-Down Assets, the GUC Trust also received on the Dissolution Date approximately $3.4 million in cash from MLC for the purposes of funding (1) $1.4 million in respect of certain costs, fees and expenses payable under the Plan to the indenture trustees and fiscal and paying agents for the previously outstanding debt of MLC, or the Indenture Trustee / Fiscal and Paying Agent Costs, and (2) $2.0 million in respect of Reporting Costs. The funds received were credited to the reserve for expected costs of liquidation. Any unused portion of the funds designated for the Indenture Trustee / Fiscal and Paying Agent Costs must be returned to the DIP Lenders and will not be available for distribution to the holders of GUC Trust Units at the winding up and conclusion of the GUC Trust. As of June 30, 2014, funds designated for the Indenture Trustee / Fiscal and Paying Agents Costs held by the GUC Trust approximated $0.5 million and are recorded in cash and cash equivalents in the accompanying Condensed Statement of Net Assets in Liquidation.

3. Net Assets in Liquidation

Description

Under the GUC Trust Agreement and the Plan, as described more fully in Note 1, the beneficiaries of the GUC Trust are future and, to the extent their liquidating distributions have not yet been paid to them, current holders of Allowed General Unsecured Claims and future and current holders of GUC Trust Units. Certain assets of the GUC Trust are reserved for funding the expected costs of liquidation and potential tax liabilities and are currently not available to the Trust Beneficiaries. Other assets of the GUC Trust, primarily Holdings of New GM Securities, as described in Notes 1 and 5, are available to be distributed to the Trust Beneficiaries ("GUC Trust Distributable Assets") in accordance with the Plan and the GUC Trust Agreement. The amounts of net assets in liquidation presented in the accompanying Condensed Statements of Net Assets in Liquidation at June 30, 2014 and March 31, 2014 correspond to the amounts of GUC Trust Distributable Assets as of June 30, 2014 and March 31, 2014.

Trust Units

As described in Note 1, each holder of an Allowed General Unsecured Claim will retain a contingent right to receive, on a pro rata basis, additional shares of New GM Common Stock and New GM Warrants (if and to the extent such shares of New GM Common Stock and New GM Warrants are not required for the satisfaction of previously Disputed General Unsecured Claims or liquidation for the payment of the expenses or tax liabilities of the GUC Trust) and certain cash, if any, remaining at the dissolution of the GUC Trust. The GUC Trust issues units representing such contingent rights ("GUC Trust Units") at the rate of one GUC Trust Unit per $1,000 of Allowed General Unsecured Claims to each holder of an Allowed General Unsecured Claim, subject to rounding pursuant to the GUC Trust Agreement, in connection with the initial recognition of each Allowed General Unsecured Claim.

The GUC Trust makes quarterly liquidating distributions to holders of GUC Trust Units to the extent that certain previously Disputed General Unsecured Claims asserted against the Debtors' estates are either disallowed or are otherwise resolved favorably to the GUC Trust (thereby reducing the amount of GUC Trust assets reserved for distribution in respect of such asserted claims) and the amount of Excess GUC Trust Distributable Assets (as defined in the GUC Trust Agreement) as of the end of the relevant quarter exceeds thresholds set forth in the GUC Trust Agreement.

The following presents the changes during the three months ended June 30, 2014 in the number of GUC Trust Units outstanding or for which the GUC Trust was obligated to issue:

	Trust Units
Outstanding or issuable at March 31, 2014	31,853,702
Issued during the period	10,326
Less: Issuable at beginning of period (1)	(10,326)
Add: Issuable at end of period (1)	—
Outstanding or issuable at June 30, 2014 (2)	31,853,702

(1) The number of GUC Trust Units issuable at any time represents GUC Trust Units issuable in respect of Allowed General Unsecured Claims that were newly allowed during the fiscal quarter.

(2) The number of GUC Trust Units outstanding at any time represents GUC Trust Units issued in respect of Allowed General Unsecured Claims that were allowed in prior periods, including GUC Trust Units held by the GUC Trust for the benefit of (a) holders of Allowed General Unsecured Claims who had not yet supplied information required by the GUC Trust in order to effect the initial distribution to which they are entitled and (b) governmental entities that are precluded by applicable law from receiving distributions of GUC Trust Units and New GM Securities.

Allowed and Disputed Claims

The total cumulative pro rata liquidating distributions ultimately received by Trust Beneficiaries is dependent upon the current amount of Allowed General Unsecured Claims and final resolution of outstanding Disputed General Unsecured Claims and potential Term Loan Avoidance Action Claims (as described in Note 2). Disputed General Unsecured Claims at June 30, 2014 reflect claim amounts at their originally filed amounts, a court ordered distribution "set aside" for certain claims filed without a claim amount and other adjustments as ordered by the court or permitted by the Plan. The Disputed General Unsecured Claims may settle at amounts that differ significantly from these amounts and at amounts that differ significantly from the historical pattern at which claims have been settled and allowed in proportion to claims resolved and disallowed. As described in Note 1, prior to the resolution and allowance of Disputed General Unsecured Claims (or potential Term Loan Avoidance Action Claims), liabilities are not recorded for the conditional obligations associated with Disputed General Unsecured Claims. Liquidating distributions payable are recorded (at the fair value of New GM Securities to be distributed) as of the end of the period in which the Disputed General Unsecured Claims are resolved as Allowed General Unsecured Claims. Similarly, to the extent potential Term Loan Avoidance Action Claims were to arise (and would become allowed) in the manner described in Note 2, liquidating distributions payable would be recorded for the New GM Securities (at fair value) that would become distributable to holders of Term Loan Avoidance Action Claims upon such occurrence.

The following table presents a summary of the Allowed and Disputed General Unsecured Claims and potential Term Loan Avoidance Action Claims for the three months ended June 30, 2014:

(in thousands)	Allowed General Unsecured Claims	Disputed General Unsecured Claims	Term Loan Avoidance Action Claims	Maximum Amount of Unresolved Claims (1)	Total Claim Amount (2)
Total, March 31, 2014	$ 31,853,630	$ 79,500	$1,500,000	$1,579,500	$33,433,130
New Allowed General Unsecured Claims, net	—	—	—	—	—
Disputed General Unsecured Claims resolved or disallowed	—	—	—	—	—
Total, June 30, 2014	$ 31,853,630	$ 79,500	$1,500,000	$1,579,500	$33,433,130

(1) Maximum Amount of Unresolved Claims represents the sum of Disputed General Unsecured Claims and Term Loan Avoidance Action Claims.

(2) Total Claim Amount represents the sum of Allowed General Unsecured Claims and Maximum Amount of Unresolved Claims.

4. Liquidating Distributions

Liquidating distributions in the three months ended June 30, 2014 consisted of the following:

(in thousands)	Fair Value
Distributions during the period	$ 3,411
Less: Liquidating distributions payable at March 31, 2014	(42,111)
Add: Liquidating distributions payable at June 30, 2014	48,978
Total	$ 10,278

The distributions during the three months ended June 30, 2014 consisted of distributions to (1) holders of Resolved Disputed Claims and (2) holders of Allowed General Unsecured Claims who previously failed to fulfill informational requirements for distribution established in accordance with the GUC Trust Agreement, but subsequently successfully fulfilled such information requirements.

The GUC Trust was obligated at June 30, 2014 to distribute 627,650 shares of New GM Stock, 570,485 of New GM Series A Warrants, and 570,485 of New GM Series B Warrants in the aggregate to the following: (1) holders of GUC Trust Units for excess distributions payable and (2) certain holders of Allowed General Unsecured Claims who had not then satisfied certain informational requirements necessary to receive these securities. In addition, as of June 30, 2014, cash of $0.4 million was then distributable to (a) governmental entities which are precluded by applicable law from receiving distributions of New GM Securities, (b) for distributions in lieu of fractional shares and warrants, and (c) for Dividend Cash associated with the New GM Common Stock that the GUC Trust was obligated to distribute at June 30, 2014.

5. Holdings of New GM Securities

At June 30, 2014, the Holdings of New GM Securities, at fair value, consisted of the following:

	Number	Fair Value (in thousands)
New GM Common Stock	15,249,101	$ 553,542
New GM Series A Warrants	13,862,577	368,883
New GM Series B Warrants	13,862,577	257,290
Total		$1,179,715

As described in Note 4, as of June 30, 2014, the GUC Trust had accrued liquidating distributions payable aggregating $49.0 million, consisting of $48.6 million in respect of New GM Securities and cash of $0.4 million then distributable. As a result, the numbers of New GM Securities reflected above include shares and warrants for which liquidating distributions were then pending. As of June 30, 2014, these securities for which distributions were then pending aggregated 627,650 shares of New GM Common Stock, 570,485 Series A Warrants and 570,485 Series B Warrants.

As of June 30, 2014, the number of common stock shares and warrants in the table above also includes New GM Securities aggregating $64.3 million (excluding related Dividend Cash) reserved, or set aside, for projected GUC Trust fees, costs and expenses to be incurred beyond 2014 (including $5.4 million for projected Dividend Taxes) and $552.0 million (excluding related Dividend Cash) of New GM Securities reserved, or set aside, for potential Taxes on Distribution. As a result, as of June 30, 2014, the numbers of New GM Securities in the table above include an aggregate of 7,966,477 shares of New GM Common Stock, 7,242,226 New GM Series A Warrants, and 7,242,226 New GM Series B Warrants which have been so set aside.

Set forth below are the aggregate number and fair value of all such shares and warrants which are pending distribution or are reserved, or set aside, and are not available for distribution at June 30, 2014.

	Number	Fair Value (in thousands)
New GM Common Stock	8,594,127	$ 311,967
New GM Series A Warrants	7,812,711	207,896
New GM Series B Warrants	7,812,711	145,004
Total		$ 664,867

6. Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value. The GUC Trust's Cash Equivalents, Marketable Securities, Holdings of New GM Securities and Liquidating Distributions Payable are presented as provided by this hierarchy.

Level 1—In general, fair values determined by Level 1 inputs use quoted prices in active markets for identical assets and liabilities that the GUC Trust has the ability to access.

Level 2—Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets or liabilities in active markets, and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3—Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset or liability. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset or liability. The GUC Trust had no assets or liabilities that are measured with Level 3 inputs at June 30, 2014 and March 31, 2014.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The GUC Trust's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

The GUC Trust also holds other financial instruments not measured at fair value on a recurring basis, including Accounts Payable and Other Liabilities. The fair value of these liabilities approximates the carrying amounts in the accompanying financial statements due to the short maturity of such instruments.

The following table presents information about the GUC Trust's assets and liabilities measured at fair value on a recurring basis at June 30, 2014 and March 31, 2014, and the valuation techniques used by the GUC Trust to determine those fair values.

	June 30, 2014			
(in thousands)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents:				
Money market funds	$ 10,780	$ —	$ —	$ 10,780
Marketable Securities:				
Municipal commercial paper and demand notes	—	13,631	—	13,631
Corporate commercial paper	—	25,675	—	25,675
Holdings of New GM Securities:				
New GM Common Stock	553,542	—	—	553,542
New GM Warrants	626,173	—	—	626,173
Total Assets	$1,190,495	$39,306	$ —	$1,229,801
Liabilities:				
Liquidating distributions payable	$ 48,978	$ —	$ —	$ 48,978

	March 31, 2014			
(in thousands)	Level 1	Level 2	Level 3	Total
Assets:				
Cash equivalents:				
Money market funds	$ 8,953	$ —	$ —	$ 8,953
Marketable Securities:				
Municipal commercial paper and demand notes	—	18,005	—	18,005
Corporate commercial paper	—	26,377	—	26,377
Holdings of New GM Securities:				
New GM Common Stock	526,533	—	—	526,533
New GM Warrants	587,545	—	—	587,545
Total Assets	$1,123,031	$44,382	$ —	$1,167,413
Liabilities:				
Liquidating distributions payable	$ 42,111	$ —	$ —	$ 42,111

The following are descriptions of the valuation methodologies used for assets and liabilities measured at fair value:

- Due to its short-term, liquid nature, the fair value of cash equivalents approximates its carrying value.
- Holdings of New GM Securities are valued at closing prices reported on the active market on which the securities are traded.
- Marketable securities include municipal commercial paper and variable demand notes and corporate commercial paper. Municipal variable demand notes trade daily at par value and, therefore, their fair value is equal to par value. Due to their short term maturities, the fair value of municipal and corporate commercial paper approximates their carrying value.
- Liquidating distributions payable are valued at closing prices of New GM Securities reported on the active market on which the securities are traded.

The GUC Trust's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no such transfers during the three months ended June 30, 2014 and the year ended March 31, 2014.

7. Reserves for Expected Costs of Liquidation and Residual Wind-Down Claims

The following is a summary of the activity in the reserves for expected costs of liquidation for the three months ended June 30, 2014 and 2013:

	Three months ended June 30, 2014					
(in thousands)	Reserve for Expected Wind-Down Costs	Reserve for Expected Reporting Costs	Reserve for Indenture Trustee/Fiscal and Paying Agent Costs	Reserve for Avoidance Action Defense Costs	Reserve for Residual Wind-Down Costs	Total Reserves for Expected Costs of Liquidation
Balance, March 31, 2014	$ 22,529	$ 12,235	$ 464	$ —	$ 1,258	$ 36,486
Plus additions to (reductions in) reserves	2,437	(593)	—	—	—	1,844
Less liquidation costs incurred:						
Trust Professionals	(1,526)	(585)	—	—	(20)	(2,131)
Trust Governance	(917)	(453)	(18)	—	—	(1,388)
Other Administrative Expenses	(10)	(121)	—	—	—	(131)
Balance, June 30, 2014	$ 22,513	$ 10,483	$ 446	$ —	$ 1,238	$ 34,680

	Three months ended June 30, 2013					
(in thousands)	Reserve for Expected Wind-Down Costs	Reserve for Expected Reporting Costs	Reserve for Indenture Trustee/Fiscal and Paying Agent Costs	Reserve for Avoidance Action Defense Costs	Reserve for Residual Wind-Down Costs	Total Reserves for Expected Costs of Liquidation
Balance, March 31, 2013	$ 38,043	$ 20,442	$ 499	$ 898	$ 1,631	$ 61,513
Plus additions to (reductions in) reserves	141	(1,819)	—	—	—	(1,678)
Less liquidation costs incurred:						
Trust Professionals	(3,604)	(685)	—	(138)	(237)	(4,664)
Trust Governance	(973)	(449)	(8)	—	—	(1,430)
Other Administrative Expenses	(13)	(127)	—	—	—	(140)
Balance, June 30, 2013	$ 33,594	$ 17,362	$ 491	$ 760	$ 1,394	$ 53,601

During the three months ended June 30, 2014, estimates of expected Wind-Down Costs and estimates of expected Reporting Costs (for which there is a reasonable basis for estimation) increased by $2.4 million and decreased by $0.6 million, respectively. During the three months ended June 30, 2013, estimates of expected Wind-Down Costs and estimates of expected Reporting Costs (for which there is a reasonable basis for estimation) increased by $0.1 million and decreased by $1.8 million, respectively. Such revisions in the estimates were recorded as additions to (reductions in) the reserves for expected costs of liquidation in such periods. The GUC Trust has recorded reserves for expected costs of liquidation that represent amounts expected to be incurred over the estimated remaining liquidation period of the GUC Trust for which there was a reasonable basis for estimation as of June 30, 2014.

The amount of liquidation costs that will ultimately be incurred depends both on that time period and on the extent of activities required for the GUC Trust to complete its functions and responsibilities under the Plan and the GUC Trust Agreement. Significant uncertainty remains both as to that time period and as to the extent of those activities. As of June 30, 2014, the recorded reserves for expected costs of liquidation reflect estimated costs for a remaining liquidation period extending through October 31, 2016, which has been estimated predominantly on a probability-weighted basis as permitted under U.S. GAAP and which the GUC Trust believes is the most appropriate measurement basis in the circumstances. Where an outcome is estimated to be likely, the likely outcome has been used as the best estimate and no weight has been given to the unlikely outcome. The remaining liquidation period is dependent predominantly on the estimate of the remaining period of time for resolution of the Term Loan Avoidance Action, as well as certain additional estimated time as necessary to wind down the GUC Trust. In addition, certain liquidation costs that are expected to be prepaid by the GUC Trust upon its dissolution have also been estimated and accrued. It is reasonably possible that the GUC Trust's estimates regarding the costs and remaining liquidation period could change in the near term.

The following is a summary of the activity in the reserves for Residual Wind-Down Claims for the three months ended June 30, 2014 and 2013:

(in thousands)	2014	2013
Balance, beginning of period	$28,698	$30,855
Less claims allowed during the period	(363)	(1,163)
Balance, end of period	$28,335	$29,692

8. Income Tax Provision

The income tax provision in the Condensed Statements of Changes in Net Assets in Liquidation for the three months ended June 30, 2014 and 2013 was determined by computing the current and deferred tax provisions for the interim period using the GUC Trust's statutory tax rate of 39.6% that became effective on April 1, 2013. There was no current tax benefit or provision in any of such periods due to cumulative net operating and capital losses, and no income taxes have been paid by the GUC Trust.

The components of the income tax provision in the Condensed Statements of Changes in Net Assets in Liquidation for three months ended June 30, 2014 and 2013 are as follows:

(in thousands)	2014	2013
Current	$—	$ —
Deferred	—	166,170
Total	$—	$166,170

Deferred taxes in the accompanying condensed statement of net assets in liquidation at June 30, 2014 are comprised of the following components:

Deferred tax assets:	
Reserves for expected costs of liquidation	$ 12,555
Net operating and capital loss carryovers	106,526
Gross deferred tax assets	119,081
Less: Valuation allowance	(40,895)
Deferred tax asset, net of valuation allowance	78,186
Deferred tax liabilities:	
Fair value in excess of tax basis of holdings of New GM Securities	(76,311)
Other	(1,875)
Gross deferred tax liabilities	(78,186)
Net deferred tax liability	$ —

For the years ended March 31, 2013 and 2014, the GUC Trust has filed its U.S. federal income tax returns taking the position that beneficial ownership for a substantial majority of New GM Securities transferred from MLC to the GUC Trust on March 31, 2011, and that the tax basis of such New GM Securities should be determined with reference to the value of such securities on such date instead of December 15, 2011, when record ownership of the remaining New GM Securities still held by MLC was transferred from

MLC to the GUC Trust. For the remaining substantial minority of New GM Securities transferred from MLC to the GUC Trust, the GUC Trust determined that transfer of beneficial ownership occurred on other dates for which the tax basis should be determined by reference to the value of such securities on such dates. This new tax position resulted in an increased tax basis of the New GM Securities from the prior tax position and, therefore, reduced taxable gains and increased taxable losses on distributions and sales of New GM Securities since March 31, 2011. The GUC Trust believes, based on the available evidence and consultation with GUC Trust professionals, that it is more likely than not that the new tax position in the amounts reflected in the GUC Trust's income tax returns, will be sustained on examination by the Internal Revenue Service, based on the technical merits of the position. Although the GUC Trust's federal income tax returns for the years ended March 31, 2012 and 2013 are no longer subject to examination by the Internal Revenue Service as a result of the application of Section 505(b) of the Bankruptcy Code, this new tax position, as of the date hereof, has not been sustained on examination by the Internal Revenue Service. Accordingly, capital loss carryovers generated in the years ended March 31, 2012 and 2013, from the new tax position, could be subject to examination by the Internal Revenue Service in subsequent years when those losses are utilized. On June 12, 2014, the GUC Trust filed its U.S. federal income tax return for the year ended March 31, 2014 with the Internal Revenue Service, and requested a prompt determination of tax liability pursuant to Section 505(b) of the Bankruptcy Code that same day. As of the date of this Form 10-Q, the GUC Trust has not received notification from the Internal Revenue Service whether or not its income tax return for the year ended March 31, 2014 has been selected for examination.

A full valuation allowance against net deferred tax assets aggregating $40.9 million was established as of June 30, 2014 due to uncertainty as to whether the deferred tax assets are realizable. Such valuation allowance was reduced by $30.3 million from the full valuation allowance against net deferred tax assets established as of March 31, 2014. Realization of the net deferred tax assets is dependent upon the generation of taxable gains upon the distribution or sale of New GM Securities in the future, which is not determinable prior to occurrence, or the receipt of future dividends on New GM Common Stock held by the GUC Trust for which a reasonable basis for estimation does not exist at this time.

As of June 30, 2014, the GUC Trust has net operating loss carryforwards of $83.9 million and capital loss carryforwards of $185.1 million (resulting in a deferred tax asset of $106.5 million) after giving effect to the new tax position with respect to the tax basis of New GM Securities described above.

9. Related Party Transactions

In addition to serving as GUC Trust Administrator, Wilmington Trust Company continues to serve as trustee pursuant to the indentures for certain series of previously outstanding debt of MLC. Wilmington Trust Company has received and will continue to receive certain customary fees in amounts consistent with Wilmington Trust Company's standard rates for such service. The Bankruptcy Court previously approved the creation of a segregated fund for the purposes of funding such fees for Wilmington Trust Company, as well as the other indenture trustees and fiscal and paying agents for previously outstanding debt of MLC. There were no such fees for Wilmington Trust Company in the three months ended June 30, 2014 and 2013.

In addition, Wilmington Trust Company has also entered into certain arrangements with the GUC Trust pursuant to which it or its affiliates have previously received, and may in the future receive, reasonable and customary fees and commissions for services other than services in the capacity of GUC Trust Administrator. Such arrangements include the provision of custodial, investment advisory and brokerage services to the GUC Trust. The fees and commissions charged by Wilmington Trust Company and its affiliates pursuant to these arrangements are consistent with the standard fees and commissions charged by Wilmington Trust Company to unrelated third-parties in negotiated transactions. During the three months ended June 30, 2014 and 2013, the total amount of such fees and commissions was approximately $6,000 and $18,000, respectively.

MOTORS LIQUIDATION COMPANY GUC TRUST
QUARTERLY SECTION 6.2(C) REPORT AND
BUDGET VARIANCE REPORT AS OF SEPTEMBER 30, 2014

The Motors Liquidation Company GUC Trust (the "**GUC Trust**"), by its undersigned counsel, pursuant to the Amended and Restated Motors Liquidation Company GUC Trust Agreement dated June 11, 2012 and between the parties thereto (as amended, the "**GUC Trust Agreement**") and in accordance with Paragraph 31 of the order of this Court dated March 29, 2011 confirming the Debtors' Second Amended Joint Chapter 11 Plan of liquidation dated March 18, 2011 of Motors Liquidation Company and its affiliated post-effective date debtors (the "**Confirmation Order**"), hereby files the following for the most recently ended fiscal quarter of the GUC Trust.

Reporting required under Section 6.2(c)(i) of the GUC Trust Agreement is annexed hereto as Exhibit A (the "**6.2(c) Report**").

The quarterly variance report as described in the third sentence of Section 6.4 of the GUC Trust Agreement for the fiscal quarter ended September 30, 2014, in accordance with the *Order Authorizing the GUC Trust Administrator to Liquidate New GM Securities for the Purpose of Funding Fees, Costs and Expenses of the GUC Trust and the Avoidance Action Trust*, dated March 8, 2012, is annexed hereto as Exhibit B (the "**Budget Variance Report**").

The 6.2(c) Report is not intended to constitute, and should not be construed as, investment advice. The 6.2(c) Report has been provided to comply with the GUC Trust Agreement and the Confirmation Order and for informational purposes only and may not be relied upon to evaluate the merits of investing in any securities or interests referred to herein.

The GUC Trust has no officers, directors or employees. The GUC Trust and Wilmington Trust Company, solely in its capacity as trustee and trust administrator (the "**GUC Trust Administrator**"), rely solely on receiving accurate information, reports and other representations from GUC Trust professionals and other service providers to the GUC Trust. In submitting the 6.2(c) Report, the Budget Variance Report and executing any related documentation on behalf of the GUC Trust, the GUC Trust Administrator has relied upon the accuracy of such reports, information and representations.

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

(1) The Initial Distribution Date took place on or about April 21, 2011 (with a secondary distribution on or about May 26, 2011 to certain holders of allowed claims as of the Initial Distribution Date who did not receive the April 21, 2011 distribution). The second quarter distribution took place on or about July 28, 2011. The third quarter distribution took place on or about October 28, 2011. The Section 2.3(a) Distribution, as defined below, took place on or about January 13, 2012. As described further below, the GUC Trust was not required to make, and did not make, a fourth quarter distribution in respect of the quarter ended December 31, 2011. The fifth quarter distribution took place on or about April 27, 2012. The sixth quarter distribution took place on or about August 3, 2012. The seventh quarter distribution took place on or about November 5, 2012. The eighth quarter distribution took place on or about February 8, 2013. The ninth quarter distribution took place on or about May 10, 2013. The tenth quarter distribution took place on or about August 9, 2013. The eleventh quarter distribution took place on or about October 31, 2013. The Special Nova Scotia Distribution, as defined below, took place on or about December 2, 2013, and the Special Excess Distribution, as defined below, took place on or about December 23, 2013. As described further below, the GUC Trust was not required to make, and did not make, a twelfth quarter distribution in respect of the quarter ended December 31, 2013. The thirteenth quarter distribution took place on or about May 9, 2014. As described further below, the GUC Trust was not required to make, and did not make, a fourteenth quarter distribution in respect of the quarter ended June 30, 2014. As described further below, the fifteenth quarter distribution is expected to take place on or about November 12, 2014.

Pursuant to Section 2.3(a) of the GUC Trust Agreement, the GUC Trust was required to distribute, within thirty (30) days of the "GUC Trust Funding Date," as such term is defined in the GUC Trust Agreement, any New GM Securities that would have been distributed on the next quarterly distribution date to holders of Resolved Allowed General Unsecured Claims and holders of Units as of the GUC Trust Funding Date (the "Section 2.3(a) Distribution"). The GUC Trust Funding Date was December 15, 2011 and, as such, the record date for the Section 2.3(a) Distribution was December 15, 2011. The Section 2.3(a) Distribution took place on or about January 13, 2012, and consisted solely of a distribution to holders of such Resolved Allowed General Unsecured Claims, and holders of Allowed General Unsecured Claims who previously failed to fulfill informational requirements for distribution established in accordance with the GUC Trust Agreement, but successfully fulfilled such informational requirements for the Section 2.3(a) Distribution. Because the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold, no distribution to holders of Units was made in connection with the Section 2.3(a) Distribution.

The fourth quarter distribution was scheduled to take place on or as promptly as practicable following January 1, 2012, based upon the GUC Trust's books and records as of December 31, 2011. However, as no Disputed General Unsecured Claims were allowed between the GUC Trust Funding Date and the December 31, 2011 record date for the fourth quarter distribution, no distribution was required to be made to holders of Resolved Allowed General Unsecured Claims. In addition, as the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold, no distribution to holders of Units was required. As such, no quarterly distribution (other than the Section 2.3(a) Distribution referenced herein) was made during January 2012.

The fifth, sixth, seventh, eighth, ninth, tenth and eleventh quarter distributions consisted solely of distributions to holders of Resolved Allowed General Unsecured Claims since the end of the previous fiscal quarter, and holders of Allowed General Unsecured Claims who previously failed to fulfill informational requirements for distribution established in accordance with the GUC Trust Agreement, but successfully fulfilled such informational requirements for the distribution that quarter. Because the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold for each quarter, no distribution to holders of Units was made in connection with such distributions.

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

The GUC Trust made a distribution on or about December 2, 2013 (the "Special Nova Scotia Distribution") solely to holders of claims arising from the 8.375% guaranteed notes due December 7, 2015 and the 8.875% guaranteed notes due July 10, 2023, in each case issued in 2003 by General Motors Nova Scotia Finance Company (the "Nova Scotia Claims"), which claims were allowed, in an aggregate amount of $1.55 billion, pursuant to a settlement agreement (the "Nova Scotia Settlement") which was approved by an order of the Bankruptcy Court dated October 21, 2013 (the "Nova Scotia Order").

In accordance with the Nova Scotia Settlement and the Nova Scotia Order, a special distribution of excess distributable assets of the GUC Trust was made to holders of Units on or about December 23, 2013 (the "Special Excess Distribution"), consisting of 6,735,070 shares of New GM Common Stock, 6,122,789 New GM Series A Warrants, and 6,122,789 New GM Series B Warrants.

The twelfth quarter distribution was scheduled to take place on or as promptly as practicable following January 1, 2014, based upon the GUC Trust's books and records as of December 31, 2013. However, as no Disputed General Unsecured Claims were allowed during the quarter ended December 31, 2013, other than claims with respect to which distributions were made in the Special Nova Scotia Distribution, no further distribution was required to be made in respect of that quarter to holders of Resolved Allowed General Unsecured Claims. In addition, as the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold at December 31, 2013, no distribution to holders of Units was required. As such, the GUC Trust was not required to make, and did not make, a twelfth quarter distribution in respect of the quarter ended December 31, 2013.

The thirteenth quarter distribution consisted solely of distributions to holders of Resolved Allowed General Unsecured Claims since the end of the previous fiscal quarter, and holders of Allowed General Unsecured Claims who previously failed to fulfill informational requirements for distribution established in accordance with the GUC Trust Agreement, but successfully fulfilled such informational requirements for the thirteenth quarter distribution. Because the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold for the thirteenth quarter distribution, no distribution to holders of Units was made in connection with such distribution.

The fourteenth quarter distribution was scheduled take place on or as promptly as practicable following July 1, 2014, based upon the GUC Trust's books and records as of June 30, 2014. However, as no Disputed General Unsecured Claims were allowed during the quarter ended June 30, 2014, no distribution was required to be made in respect of the quarter ended June 30, 2014 to holders of Resolved Allowed General Unsecured Claims. In addition, as the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold at June 30, 2014, no distribution to holders of Units was required. As such, the GUC Trust was not required to make, and did not make, a fourteenth quarter distribution in respect of the quarter ended June 30, 2014.

The fifteenth quarter distribution is scheduled take place on or as promptly as practicable following October 1, 2014, based upon the GUC Trust's books and records as of September 30, 2014. As no Disputed General Unsecured Claims were allowed during the quarter ended September 30, 2014, no distribution is required to be made to holders of Resolved Allowed General Unsecured Claims. However, as of September 30, 2014, the amount of Excess GUC Trust Distributable Assets exceeded the Distribution Threshold, primarily as a result of a release of distributable assets of the GUC Trust that were previously set aside in respect of potential Taxes on Distribution. Accordingly, the GUC Trust currently anticipates making a distribution of Excess GUC Trust Distributable Assets to holders of Units on or about November 12, 2014, consisting of 3,712,897 shares of New GM Common Stock, 3,375,361 New GM Series A Warrants, 3,375,361 New GM Series B Warrants, and $3,341,607 in cash received by the GUC Trust in the form of dividends on New GM Common Stock ("Dividend Assets").

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

(2) On January 14, 2014, New GM declared a dividend of $0.30 per share on the shares of New GM Common Stock and paid such dividend on March 28, 2014 (the "March 2014 Dividend"). On April 8, 2014, New GM declared a second quarterly dividend of $0.30 per share on the shares of New GM Common Stock and paid such dividend on June 26, 2014 (the "June 2014 Dividend"). On August 12, 2014, New GM declared a third quarterly dividend of $.30 per share on the shares of New GM Common Stock and paid such dividend on September 26, 2014 (the "September 2014 Dividend"). On October 8, 2014, New GM declared a fourth quarterly dividend of $0.30 per share on the shares of New GM Common Stock, with such dividend payable on December 23, 2014 to holders of record of New GM Common Stock as of December 10, 2014 (the "Declared December 2014 Dividend," and, together with the March 2014 Dividend, the June 2014 Dividend and the September Dividend, the "Current Dividends"). Although New GM has disclosed in its 2013 Annual Report on Form 10-K its intention to continue to pay quarterly dividends on the New GM Common Stock, any such future dividends on the New GM Common Stock (the "Potential Future Dividends") will only be paid if and as declared by New GM and will depend on a variety of other factors beyond the control of the GUC Trust.

The following table summarizes the changes in the New GM Securities and Dividend Assets that comprise the GUC Trust's "Distributable Assets as of September 30, 2014" to the "Cumulative total including amounts in respect of the November 2014 Distribution":

	Number of Securities			
	New GM Common Stock	New GM Series A Warrants	New GM Series B Warrants	GUC Trust Dividend Assets
Distributable assets as of September 30, 2014	7,244,108	6,585,443	6,585,443	$ 4,346,465
Adjustments to "set aside" new GM securities and dividend assets	3,278,659	2,980,598	2,980,598	560,850
Expected November 2014 excess distribution	(3,712,897)	(3,375,361)	(3,375,361)	(3,341,607)
Dividend assets received September 26, 2014				4,563,175
Cumulative distributable assets as of September 30, 2014	6,809,870	6,190,680	6,190,680	$ 6,128,883

(3) Units represent the contingent right to receive, on a *pro rata* basis as provided in the Plan, Excess GUC Trust Distributable Assets (as described in greater detail in Sections G and H hereof). As a result of the no-action relief received from the SEC in May, 2012 (which provided that the SEC would not recommend enforcement if the Units were issued in a global transferable form but were not registered under Section 12(g) of the Securities Exchange Act of 1934, as amended), each holder of an Allowed General Unsecured Claim is issued Units issued in global form only, registered in the name of and held only through the participants of DTC, as depositary. Previous to the receipt of such no-action relief, the Units were evidenced by appropriate notation on the books and records of the GUC Trust only and were not held through DTC.

Units are issued at a ratio of one Unit for each $1,000 in amount of allowed general unsecured claim, such that if all Disputed General Unsecured Claims as of September 30, 2014 were subsequently allowed, the GUC Trust would issue approximately 33.43 million Units (inclusive of all Units previously distributed). Units in respect of general unsecured claims allowed as of the Initial Distribution were not issued until after the Effective Date. Hence, for purposes of this presentation only, Units outstanding as of the Effective Date are deemed to be zero. The 31,853,702 Units outstanding as of September

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

30, 2014 correlate to the $31.85 billion in allowed claims as of June 30, 2014. The Number of Units outstanding as of September 30, 2014 does not directly correspond to allowed claims as of June 30, 2014 on a 1 to 1,000 basis because 71 additional Units were issued due to rounding.

(4) The amounts reported as GUC Trust Distributable Assets are net of liquidating distributions payable in respect of Allowed General Unsecured Claims as further described in Notes 4, 5 and 6 of the Notes to the Financial Statements of the GUC Trust for the quarter ended June 30, 2014, as previously filed.

(5) The categories presented under Sections C and E hereof correspond to terms defined in the GUC Trust Agreement and further described in Notes 1, 3 and 4 of the Notes to the Financial Statements of the GUC Trust for the quarter ended June 30, 2014, as previously filed.

(6) Section 2.3(e)(i) of the GUC Trust Agreement required MLC, on behalf of the GUC Trust, to sell New GM Securities in the approximate amount of $5.75 million on, or as soon as reasonably practical after, the Effective Date of the Plan. The proceeds of this sale were required to be used to provide the initial funding for certain reporting costs of the GUC Trust ("Reporting and Transfer Costs"). In respect thereof, on May 24, 2011, MLC, on behalf of the GUC Trust, sold 87,182 shares of New GM Common Stock and 79,256 warrants of each class of warrants, resulting in cash proceeds of $5,649,328 (the "Reporting and Transfer Cash"), which proceeds were held by MLC on behalf of the GUC Trust until MLC's dissolution on December 15, 2011. On December 15, 2011, MLC transferred, net of payments already made on account of such Reporting and Transfer Costs, $2,049,608 of these funds to the GUC Trust and $500,000 to the Avoidance Action Trust in accordance with Section 2.3 of the GUC Trust Agreement.

In addition to the initial funding of the Reporting and Transfer Costs as described above, the GUC Trust Agreement affords the GUC Trust Administrator, with the approval of the GUC Trust Monitor, the discretion and authority to set aside from distribution New GM Securities and Dividend Assets in numbers sufficient to satisfy (i) any current or projected fees, costs and expenses (including certain tax obligations and administrative costs) of the GUC Trust (the "Wind-Down Costs") that were not budgeted or exceed the amounts budgeted for use from the funds contributed by MLC on the Effective Date of the Plan for purposes of satisfying such Wind-Down Costs, (ii) any current or projected Reporting and Transfer Costs that exceed the then currently available funds, or (iii) any current or projected income tax liabilities of the GUC Trust arising from the disposition of New GM Securities ("Taxes on Distribution"). This process is not related to, and is separate from, the process of recognizing current and deferred income tax liabilities, as well as reserves for expected costs of liquidation in the Statement of Net Assets in Liquidation, as a matter of financial reporting. Such liabilities and reserves must be determined in accordance with generally accepted accounting principles applicable to the GUC Trust. By contrast, the estimates of projected costs and potential liabilities for which the GUC Trust may set aside New GM Securities and Dividend Assets are generally made on a more conservative (i.e., more inclusive) basis over the duration of the GUC Trust and include contingencies and amounts of potential income tax liabilities that are not permitted to be recognized under applicable accounting standards. The GUC Trust Administrator may liquidate New GM Securities and use Dividend Assets that have been set aside from distribution to fund (with the required approval of the Bankruptcy Court) the current or projected Wind-Down Costs or Reporting and Transfer Costs of the GUC Trust and (with the required approval of the GUC Trust Monitor) current and potential Taxes on Distribution.

Beginning in the fiscal quarter ended December 2011, the GUC Trust Administrator set aside from distribution, in accordance with Sections 6.1(b), 6.1(c), and 6.1(d) of the GUC Trust Agreement and with the approval of the GUC Trust Monitor, New GM Securities in numbers that the GUC Trust Administrator determined was necessary to satisfy then current and projected Wind-Down Costs and Reporting and Transfer Costs and potential Taxes on Distribution of the GUC Trust (collectively, the "Set Aside Securities"). Because the GUC Trust Administrator reevaluates the projected Wind-Down Costs and Reporting and Transfer Costs and the potential Taxes on Distribution of the GUC Trust on a quarterly basis, and because fluctuations in the

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

market values of the Set Aside Securities also impact the calculations of the numbers of such securities needed to be set aside to satisfy such estimated costs and liabilities, the numbers of the Set Aside Securities necessarily fluctuate over time.

On two separate occasions, once in March 2012 and again in December 2012, the GUC Trust Administrator sought and received authority from the Bankruptcy Court to liquidate Set Aside Securities for the purposes of funding then current and projected Wind-Down Costs and Reporting and Transfer Costs for the calendar years 2011 through 2013, as well as certain fees, costs and expenses of the Avoidance Action Trust ("Avoidance Action Trust Administrative Costs") estimated for the calendar years 2012, 2013 and 2014 (collectively, the "Liquidation Orders"). In the aggregate, pursuant to the Liquidation Orders, the GUC Trust liquidated (i) 538,222 shares of New GM Common Stock and 489,292 warrants of each class of warrant for the aggregate proceeds of $29,305,877 in respect of Wind-Down Costs; (ii) 276,824 shares of New GM Common Stock and 251,657 warrants of each class of warrant for the aggregate proceeds of $15,181,061 in respect of Reporting and Transfer Costs; and (iii) 269,422 shares of New GM Common Stock and 244,929 warrants of each class of warrant for the aggregate proceeds of $13,715,264 in respect of Avoidance Action Trust Administrative Costs (which amount was subsequently transferred to the Avoidance Action Trust). Copies of the Liquidation Orders are available at the Motors Liquidation Company GUC Trust website at https://www.mlcguctrust.com/.

The numbers of New GM Securities and Dividend Assets available to be set aside to fund such projected costs and potential liabilities are subject to inherent limitation because of fixed total numbers of New GM Securities and Dividend Assets administered by the GUC Trust and the requirement also to set aside sufficient New GM Securities and Dividend Assets to satisfy all potential Allowed General Unsecured Claims. As disclosed in the GUC Trust's prior SEC filings and Section 6.2(c) Reports, as part of the GUC Trust's evaluations for each of the quarters ended March 31, 2013 and June 30, 2013, the numbers of New GM Securities set aside to fund projected Wind-Down Costs and Reporting and Transfer Costs were reduced from the GUC Trust's then-current estimates of potential future requirements to fund such costs, as a result of such limitations. In addition, during the quarter ended June 30, 2013, the numbers of New GM Securities set aside to fund potential Taxes on Distribution were similarly reduced from the GUC Trust's then-current estimates of potential future requirements to fund such liabilities, as a result of such limitations. Consequently, for the quarters ended March 31, 2013 and June 30, 2013, the number of New GM Securities set aside in respect of then projected Wind-Down Costs and Reporting and Transfer Costs was insufficient to cover the GUC Trust's estimates of such potential costs. Similarly, for the quarter ended June 30, 2013, the number of New GM Securities set aside in respect of then potential Taxes on Distribution was insufficient to cover the GUC Trust's estimates of such potential liabilities.

Commencing with the quarter ended September 30, 2013, the GUC Trust revised the methodology for calculating the set asides associated with Wind-Down Costs and Reporting and Transfer Costs (the "Administrative Costs Set Aside Methodology"). Previously, such calculation converted estimates of projected Wind-Down Costs and Reporting and Transfer Costs into the number of New GM Securities to be set aside from distribution by dividing such estimates by the lowest closing prices for the New GM Securities since December 15, 2011 (the date record ownership of the New GM Securities was transferred to the GUC Trust from MLC). Commencing with the quarter ended September 30, 2013, however, the conversion calculation was revised so that the GUC Trust's estimates of such projected costs were instead divided by the trailing twelve month average closing prices for the New GM Securities instead of the lowest closing prices since December 15, 2011. Commencing with the quarter ended September 30, 2013, the GUC Trust also revised its methodology for calculating the set asides associated with potential Taxes on Distribution (the "Taxes on Distribution Set Aside Methodology"). Previously, this set aside calculation methodology estimated potential Taxes on Distribution by applying the applicable U.S. federal income tax rate to estimates of potential capital gains, which were arrived at by comparing the highest closing price for the New GM Securities since December 15, 2011, against the tax basis of the New GM Securities on December 15, 2011 (as determined based on the date of transfer of record ownership of the New GM Securities). The set aside calculation methodology then converted the estimate of potential Taxes on Distribution into the numbers of New GM Securities

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

to be set aside from distribution by dividing such estimate by the lowest closing market price for such securities since December 15, 2011. Just as under the prior methodology, the revised set aside calculation methodology uses the highest closing prices for the New GM Securities since December 15, 2011 in estimating the potential Taxes on Distribution. However, commencing with the quarter ended September 30, 2013, the conversion calculation was revised so that such estimates of potential Taxes on Distribution were divided by the trailing twelve month average closing prices for the New GM Securities, instead of by the lowest closing price since December 15, 2011.

As of September 30, 2013, and following the change in methodology described above, the numbers of New GM Securities set aside from distribution to fund Wind-Down Costs, Reporting and Transfer Costs and Taxes on Distribution were sufficient to satisfy such projected costs and potential liabilities as estimated by the GUC Trust. As of September 30, 2013, the GUC Trust had set aside from distribution, in the aggregate, 881,487 shares of New GM Common Stock and 801,327 warrants of each class of warrants to fund projected Wind-Down Costs and Reporting and Transfer Costs. In addition, as of September 30, 2013, the GUC Trust had set aside from distribution, in the aggregate, 7,447,810 shares of New GM Common Stock and 6,770,737 warrants of each class of warrants to fund potential Taxes on Distribution.

As of December 31, 2013, the number of New GM Securities set aside from distribution to fund projected Wind-Down Costs and Reporting and Transfer Costs of the GUC Trust remained sufficient to satisfy projected Wind-Down Costs and Reporting and Transfer Costs as estimated by the GUC Trust. As of December 31, 2013, the GUC Trust had set aside from distribution, in the aggregate, 718,272 shares of New GM Common Stock and 652,949 warrants of each class of warrants to fund projected Wind-Down Costs and Reporting and Transfer Costs. As of December 31, 2013, the GUC Trust Administrator determined that the Taxes on Distribution Set Aside Methodology described above would require the GUC Trust to set aside 7,944,979 shares of New GM Common Stock and 7,222,708 warrants of each class of warrants. However, as a result of limitations on the numbers of New GM Securities available to be set aside for such purposes, similar to the limitations described above for the quarters ended March 31, 2013, and June 30, 2013, the number of New GM Securities available to be set aside from distribution to fund such potential Taxes on Distribution as of December 31, 2013 was only 7,695,633 shares of New GM Common Stock and 6,996,030 warrants of each class of warrants, for a net shortfall of 249,346 shares of New GM Common Stock and 226,678 warrants of each class of warrants. Accordingly, as of December 31, 2013, the set asides for potential Taxes on Distribution were insufficient to satisfy in full the Taxes on Distribution Set Aside Methodology.

As of March 31, 2014, the numbers of New GM Securities and Dividend Assets set aside from distribution to fund Wind-Down Costs and Reporting and Transfer Costs remained sufficient to satisfy such projected costs as estimated by the GUC Trust in accordance with the above detailed Administrative Costs Set Aside Methodology (provided, however, as described further in Footnote 7 below, the set asides for Wind-Down Costs and Reporting and Transfer Costs did not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM). Also as of March 31, 2014, the numbers of New GM Securities and Dividend Assets set aside from distribution to fund potential Taxes on Distribution regained a level of sufficiency to satisfy such potential liabilities as estimated by the GUC Trust in accordance with the above detailed Taxes on Distribution Set Aside Methodology (provided, however, as described further in Footnote 7 below, the set aside for Taxes on Distribution did not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM). As of March 31, 2014, the GUC Trust had set aside from distribution, in the aggregate, 708,901 shares of New GM Common Stock, 644,430 warrants of each class of warrants and $212,671 in Dividend Assets to fund projected Wind-Down Costs and Reporting and Transfer Costs. In addition, as of March 31, 2014, the GUC Trust had set aside from distribution, in the aggregate, 7,363,141 shares of New GM Common Stock, 6,693,764 warrants of each class of warrants and $2,208,942 in Dividend Assets to fund potential Taxes on Distribution.

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

As of June 30, 2014, the numbers of New GM Securities and Dividend Assets set aside from distribution to fund Wind-Down Costs and Reporting and Transfer Costs remained sufficient to satisfy such projected costs as estimated by the GUC Trust in accordance with the above detailed Administrative Costs Set Aside Methodology (provided, however, as described further in Footnote 7 below, the set asides for Wind-Down Costs and Reporting and Transfer Costs did not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM). Also as of June 30, 2014, the numbers of New GM Securities and Dividend Assets set aside from distribution to fund potential Taxes on Distribution remained sufficient to satisfy such potential liabilities as estimated by the GUC Trust in accordance with the above detailed Taxes on Distribution Set Aside Methodology (provided, however, as described further in Footnote 7 below, the set aside for Taxes on Distribution did not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM). As of June 30, 2014, the GUC Trust had set aside from distribution, in the aggregate, 830,774 shares of New GM Common Stock, 755,224 warrants of each class of warrants, and $498,464 in Dividend Assets to fund projected Wind-Down Costs and Reporting and Transfer Costs. In addition, as of June 30, 2014, the GUC Trust had set aside from distribution, in the aggregate, 7,135,703 shares of New GM Common Stock, 6,487,002 warrants of each class of warrants, and $4,281,422 in Dividend Assets to fund potential Taxes on Distribution.

During the three months ended September 30, 2014, the number of New GM Securities and Dividend Assets set aside from distribution to fund projected Wind-Down Costs and Reporting and Transfer Costs of the GUC Trust increased by 70,515 shares of New GM Common Stock, 64,105 warrants of each class of warrants and $312,696 in Dividend Assets from those previously set aside as of June 30, 2014, with the total number of such set aside New GM Securities and Dividend Assets consisting of 901,289 shares of New GM Common Stock, 819,329 warrants of each class of warrants and $811,160 in Dividend Assets as of September 30, 2014. Such overall increases were primarily related to increases in the estimated future costs of the GUC Trust. As of September 30, 2014, such set aside amounts were sufficient to satisfy projected Wind-Down Costs and Reporting and Transfer Costs as estimated by the GUC Trust in accordance with the above detailed Administrative Costs Set Aside Methodology. As described further in Footnote 7 below, however, the set asides for Wind-Down Costs and Reporting and Transfer Costs do not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM.

During the three months ended September 30, 2014, the number of New GM Securities and Dividend Assets set aside from distribution to fund potential Taxes on Distribution of the GUC Trust was reduced by 3,349,174 shares of New GM Common Stock, 3,044,703 warrants of each class of warrants, and $873,546 in Dividend Assets from those previously set aside as of June 30, 2014, with the total number of such set aside New GM Securities and Dividend Assets consisting of 3,786,529 shares of New GM Common Stock, 3,442,299 warrants of each class of warrants, and $3,407,876 in Dividend Assets as of September 30, 2014. Such overall decreases were primarily related to (i) the GUC Trust's filing of a prompt determination of tax liability pursuant to 11 U.S.C. § 505(b) for the GUC Trust's tax year ended March 31, 2014, and the passage of the related statutory time period without receipt of notification of an audit from the Internal Revenue Service, and (ii) an adjustment to the Taxes on Distribution Set Aside Methodology, solely with respect to certain New GM Securities anticipated to be distributed as part of the fifteenth quarter distribution, as more fully described in the GUC Trust's Form 8-K filed with the Securities and Exchange Commission on October 24, 2014. As of September 30, 2014, such set aside amounts were sufficient to satisfy potential Taxes on Distribution as estimated by the GUC Trust in accordance with the above detailed Taxes on Distribution Set Aside Methodology. As described further in Footnote 7 below, however, the set aside for Taxes on Distribution does not include any New GM Securities or Dividend Assets set aside for tax liabilities in respect of Potential Future Dividends, should future dividends be declared by New GM.

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

It is the view of the Trust Administrator, after consultation with the GUC Trust Monitor and Trust Professionals, that the Administrative Costs Set Aside Methodology and the Taxes on Distribution Set Aside Methodology are generally conservative methodologies for calculating the projected administrative costs and potential tax obligations of the GUC Trust. Accordingly, it is the view of the GUC Trust Administrator and the GUC Trust Monitor that the New GM Securities and Dividend Assets currently held in the set asides for Wind-Down Costs, Reporting and Transfer Costs, and potential Taxes on Distribution would be sufficient, upon liquidation, to satisfy the administrative and tax obligations of the GUC Trust as of the date of this report. However, there can be no assurance that the numbers of New GM Securities and Dividend Assets set aside to fund projected Wind-Down Costs and Reporting and Transfer Costs and potential Taxes on Distribution will be sufficient to fund such costs and liabilities as they are actually incurred, in particular if the market price of the New GM Securities falls below the trailing twelve month average closing prices used to convert the GUC Trust's estimates of such projected costs and potential liabilities into numbers of GUC Trust Securities to be set aside, as described above. In addition, there can be no assurance that, as a result of future evaluations, additional numbers of New GM Securities and Dividend Assets will not need to be set aside or sold to fund additional costs and liabilities, beyond those that are currently included in the GUC Trust's estimates, in particular as a result of fluctuations in the market price of the New GM Securities or changes in the GUC Trust's estimates of projected costs and potential liabilities.

(7) The GUC Trust incurs a federal income tax liability at a rate of 39.6% on all cash dividends received in respect of New GM Common Stock held by the GUC Trust ("Dividend Taxes"). Pursuant to the GUC Trust Agreement, Dividend Taxes (like certain other taxes) must be paid by the GUC Trust from the proceeds of sale of Excess GUC Trust Distributable Assets and not from the cash proceeds from the dividend itself. However, the cash dividends received on New GM Common Stock which ultimately comprise Excess GUC Trust Distributable Assets will be distributed, *pro rata*, to holders of Units when such New GM Common Stock is included in a distribution of Excess GUC Trust Distributable Assets.

In the period ended September 30, 2014, the GUC Trust Administrator, in consultation with Trust Professionals, included in the set aside for Wind-Down Costs 87,653 shares of New GM Common Stock, 79,686 warrants of each class of warrants and $78,888 in Dividend Assets, for Dividend Taxes relating to the Current Dividends. With respect to any liability for Dividend Taxes on any Potential Future Dividends, however, the GUC Trust Administrator, in consultation with Trust Professionals, determined not to increase the set aside for Wind-Down Costs as at September 30, 2014 due to the uncertainty associated with a number of variables, including but not limited to (i) the likelihood of the payment of, and the timing of, any Potential Future Dividends, (ii) the amount per share of any Potential Future Dividends, and (iii) the numbers of shares of New GM Common Stock that will be held by the GUC Trust as of the record date of any Potential Future Dividend.

To the extent that the GUC Trust Administrator determines that the level of uncertainty associated with any of the aforementioned variables has sufficiently decreased, the GUC Trust Administrator reserves the right to, at its discretion and without advance notice, increase or decrease the set aside for Wind-Down Costs in an amount sufficient to cover all estimated Dividend Taxes associated with all then anticipated Potential Future Dividends. In such event, and assuming that, for the remainder of the estimated life of the GUC Trust (as estimated for other set aside purposes), New GM continues to pay quarterly dividends at the current rate per share and the number of shares of New GM Common Stock held by the GUC Trust as at September 30, 2014 (after reduction for the expected November 2014 excess distribution) does not decrease, and based upon the GUC Trust's current applicable income tax rate and the market value of New GM Securities at September 30, 2014, there could be up to a further $31.9 million of New GM Securities and Dividend Assets required to be set aside. The dollar value of New GM Securities and Dividend Assets comprising such additional set aside would vary if, for example, no dividend is paid by New GM for one or more future quarters, the rate per share of any dividend that is actually paid by New GM in future periods increases or decreases, the applicable income tax rate changes, the life of the GUC Trust is longer or shorter than that assumed, or if (as is likely)

Motors Liquidation Company GUC Trust

Notes to Claims and Distribution Summary – Section 6.2 (c) Report

September 30, 2014

the number of shares of New GM Common Stock held by the GUC Trust declines over its remaining life and the market value of the New GM Securities increases or decreases.

(8) Distributions to holders of Resolved Allowed General Unsecured Claims include (a) distributions such claimants would have received had their claims been allowed as of the Initial Distribution and (b) to the extent Excess GUC Trust Distributable Assets have previously been made available to Unit holders and/or are being made available at the time of the relevant distribution, additional assets in the form of New GM Securities and/or cash in respect of their being beneficiaries of certain numbers of Units.

(9) Pursuant to the Plan, no portion of the initial distribution to claimants was made "in respect of Units". Only subsequent distributions of Excess GUC Trust Distributable Assets are made "in respect of Units".

As described in footnote (1) above, no distributions to holders of Units were made in connection with the Section 2.3(a) Distribution (as defined in footnote (1) above), the fourth quarter distribution, the fifth quarter distribution, the sixth quarter distribution, the seventh quarter distribution, the eighth quarter distribution, the ninth quarter distribution, the tenth quarter distribution, the eleventh quarter distribution, the twelfth quarter distribution, the thirteenth quarter distribution, or the fourteenth quarter distribution as the amount of Excess GUC Trust Distributable Assets did not exceed the Distribution Threshold. As described in footnote (1) above, the GUC trust anticipates making a distribution of Excess GUC Trust Distributable Assets to holder of Units on or about November 12, 2014, consisting of consisting of 3,712,897 shares of New GM Common Stock, 3,375,361 New GM Series A Warrants, 3,375,361 New GM Series B Warrants, and $3,341,607 in Dividend Assets.

(10) Categorizations represent a subjective assessment by the GUC Trust as to the nature of the underlying claims based on information provided by the claimant and/or contained in the books and records of the GUC Trust. Such categorizations are subject to change at the sole discretion of the GUC Trust and without notice to any party. Amounts represented herein represent Class 3 General Unsecured Claims (as defined in the Plan). The amounts as currently ordered represent unsecured claims at either, as applicable, (i) original amounts as filed, (ii) amounts as currently reclassified or reduced by court order, or (iii) amounts as allowed per executed or ordered settlement. The amounts as allowed represent Allowed Class 3 General Unsecured Claims (as defined in the Plan). The amounts as currently ordered contains a category denoted as "other" which, as of the quarter ended September 30, 2014, reflects an aggregate claim amount of approximately $50 million. This "other" category consists of approximately (i) $12,024,405 in claim amount of Disputed General Unsecured Claims that were previously disallowed by the Bankruptcy Court, but are currently subject to appeals, and (ii) $37,975,595 in claim amount of Disputed General Unsecured Claims that is not associated with any particular claim but which has been set aside by the GUC Trust Administrator as a general claim contingency.

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
MOTORS LIQUIDATION COMPANY, *et al.*, f/k/a General Motors Corp., *et al.*	:	**09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

DEBTORS' SECOND AMENDED JOINT CHAPTER 11 PLAN

Motors Liquidation Company (f/k/a General Motors Corporation); MLC of Harlem, Inc. (f/k/a Chevrolet-Saturn of Harlem, Inc.); MLCS, LLC (f/k/a Saturn, LLC); MLCS Distribution Corporation (f/k/a Saturn Distribution Corporation); Remediation and Liability Management Company, Inc.; and Environmental Corporate Remediation Company, Inc., the above-captioned debtors, propose the following chapter 11 plan pursuant to section 1121(a) of title 11 of the United States Code:

ARTICLE I.

DEFINITIONS AND INTERPRETATION

DEFINITIONS. The following terms used herein shall have the respective meanings defined below (such meanings to be equally applicable to both the singular and plural):

1.1 363 Transaction means the sale of substantially all the assets of General Motors Corporation and certain of its Debtor subsidiaries, and the assumption of certain executory contracts and unexpired leases of personal property and nonresidential real property, to a U.S. Treasury-sponsored purchaser pursuant to section 363 of the Bankruptcy Code, as embodied in the MSPA.

1.2 Administrative Expenses means costs or expenses of administration of any of the Chapter 11 Cases allowed under sections 503(b), 507(a)(1), and 1114(e) of the Bankruptcy Code that have not already been paid by the Debtors, including, without limitation, any actual and necessary costs and expenses of preserving the Debtors' estates, any actual and necessary costs and expenses of operating the Debtors' businesses, any indebtedness or obligations incurred or assumed by the Debtors, as debtors in possession, during the Chapter 11 Cases, including, without limitation, for the acquisition or lease of property or an interest in property or the rendition of services, any compensation and reimbursement of expenses to the extent allowed by Final Order under sections 330 or 503 of the Bankruptcy Code, and any fees or charges assessed against the

1.106 Plan S□pplement means the forms of documents, in a form reasonably acceptable to the U.S .Treasury, the Creditors' Committee, the Asbestos Claimants' Committee, and the Future Claimants' Representative, to the extent such documents affect the respective party, effectuating the transactions contemplated by this Plan, which documents shall be filed with the Clerk of the Bankruptcy Court no later than ten (10) days prior to the Confirmation Hearing. Upon its filing with the Bankruptcy Court, the Plan Supplement may be inspected at the Office of the Clerk of the Bankruptcy Court during normal court hours. Holders of Claims and Equity Interests may obtain a copy of the Plan Supplement upon written request to the undersigned counsel. Copies of the Plan Supplement also are available on the Voting Agent's website, www.motorsliquidationdocket.com.

1.10□ Post-Effective Date MLC means MLC on and after the Effective Date.

1.10□ Priority Non-Tax Claim means any Claim, other than an Administrative Expense or a Priority Tax Claim, entitled to priority in payment as specified in section 507(a)(3), (4), (5), (6), (7), or (9) of the Bankruptcy Code.

1.109 Priority Order Sites means the non-owned sites, as set forth on Exhibit □E□hereto, that are sub□ect to an order requiring performance of an Environmental Action.

1.110 Priority Order Sites Consent Decrees and Settlement A□reements means the Consent Decrees and Settlement Agreements to be filed with the Bankruptcy Court in respect of the Priority Order Sites.

1.111 Priority Tax Claim means any Claim of a governmental unit of the kind entitled to priority in payment as specified in sections 502(i) and 507(a)(□) of the Bankruptcy Code other than Priority Tax Claims that □ew GM is liable for under the MSPA.

1.112 Pro Rata Share means the ratio (expressed as a percentage) of (i) the amount of any Allowed Claim in a particular Class to (ii) the sum of (x) the aggregate amount of Allowed Claims in such Class and (y) the aggregate amount of Disputed Claims in such Class. Solely for purposes of determining the Pro Rata Share with respect to any distribution from (a) the Debtors with respect to the Term Loan Avoidance Action, (b) the GUC Trust, or (c) the Avoidance Action Trust, the aggregate amount of Disputed Claims shall include (x) Disputed General Unsecured Claims, (y) the Asbestos Trust Claim in the amount set forth in the Confirmation Order until such time as the amount of the Asbestos Trust Claim is finally determined as set forth in Section 1.15 hereof, and (□) the □Maximum Amount□(as defined in the GUC Trust Agreement) of the potential General Unsecured Claims arising from any successful recovery of proceeds from the Term Loan Avoidance Action or other Avoidance Actions. The Debtors may seek a determination by the Bankruptcy Court of the amount that should be reserved in determining the Pro Rata Share on account of Disputed Claims on an individual or aggregate basis.

1.113 Property or Properties means the Environmental Response Trust Properties and the Priority Order Sites.

1.11 Property Environmental Claim means any civil Claim or Cause of Action by the Governmental Authorities against the Debtors under Environmental Laws with respect to the Properties except for any General Unsecured Claim reserved in Paragraph 100 of the Environmental Response Trust Consent Decree and Settlement Agreement or the Priority Order Sites Consent Decrees and Settlement Agreements.

1.115 Protected Party means (i) the Debtors, (ii) any Entity that, pursuant to the Plan or after the Effective Date, becomes a direct or indirect transferee of, or successor to, any assets of the Debtors (including, without limitation, the GUC Trust, the Environmental Response Trust, the Avoidance Action Trust, the GUC Trust Administrator, the Environmental Response Trust Administrative Trustee, the Avoidance Action Trust Administrator, the GUC Trust Monitor, the Avoidance Action Trust Monitor, and their respective professionals) or the Asbestos Trust (but only to the extent that liability is asserted to exist by reason of its becoming such a transferee or successor), (iii) the holders of DIP Credit Agreement Claims, (iv) any Entity that, pursuant to the Plan or after the Effective Date, makes a loan to the Debtors, Post-Effective Date MLC, or the Asbestos Trust, or to a successor to, or transferee of, any assets of the Debtors or the Asbestos Trust (but only to the extent that liability is asserted to exist by reason of such Entity's becoming such a lender or to the extent any pledge of assets made in connection with such a loan is sought to be upset or impaired), (v) an officer, director, or employee of the Debtors, of any past or present affiliate of the Debtors, of any predecessor in interest of the Debtors, or of any Entity that owns or at any time has owned a financial interest in the Debtors, in any past or present affiliate of the Debtors, or in any predecessor in interest of the Debtors, but only to the extent that he or she is alleged to be directly or indirectly liable for the conduct of, Claims against, or Demands on the Debtors or the Asbestos Trust on account of Asbestos Personal In ury Claims, (vi) any Entity to the extent he, she, or it is alleged to be directly or indirectly liable for the conduct of, Claims against, or Demands on the Debtors or the Asbestos Trust on account of Asbestos Personal In ury Claims by reason of such Entity's provision of insurance to the Debtors, to any past or present affiliate of the Debtors, to any predecessor in interest of the Debtors, or to any Entity that owns or at any time has owned a financial interest in (I) the Debtors, (II) any past or present affiliate of the Debtors, or (III) any predecessor in interest of the Debtors, but only to the extent that the Debtors or the Asbestos Trust enters into a settlement with such Entity that is approved by the Bankruptcy Court and expressly provides that such Entity shall be a Protected Party under the Plan, or (vii) with the consent of the Asbestos Claimants' Committee and the Future Claimants' Representative, or the Asbestos Trust Administrator, as applicable, any other Entity that, pursuant to an agreement approved by Final Order, has been determined to be providing appropriate consideration to the Debtors' estates or the Trusts (including, by way of example, by waiving the Entity's claim(s) against the Debtors or any of the Trusts) in exchange for being included in the definition of a Protected Party herein (including, without limitation, Remy International, Inc. (f/k/a Delco Remy International, Inc. and DR International, Inc.

and its wholly-owned subsidiary Remy Inc. (f/k/a Delco Remy America, Inc. and DRA Inc.)) (□**Remy**□), for whom no further consent from the Asbestos Claimants' Committee and the Future Claimants' Representative, or the Asbestos Trust Administrator, as applicable, is required), to the extent he, she, or it is alleged to be directly or indirectly liable for the conduct of, Claims against, or Demands on the Debtors or the Asbestos Trust on account of Asbestos Personal In□ury Claims by reason of one or more of the following: (a) without in any way limiting clause (v) above, such Entity's involvement in the management of the Debtors or of any predecessor in interest of the Debtors, (b) such Entity's ownership of a financial interest in the Debtors, in any past or present affiliate of the Debtors, or in any predecessor in interest of the Debtors, (c) such Entity's involvement in a transaction changing the corporate structure, or in a loan or other financial transaction affecting the financial condition, of the Debtors, of any past or present affiliate of the Debtors, of any predecessor in interest of the Debtors, or of any Entity that owns or at any time has owned a financial interest in the Debtors, in any past or present affiliate of the Debtors, or in any predecessor in interest of the Debtors, (d) such Entity's current ownership of the assets of a former division of the Debtors or of a former division of the Debtors, or (e) such Entity's lease of real property owned or formerly owned by the Debtors. □otwithstanding the foregoing, □ew GM shall neither be included in the definition of Protected Party herein nor shall Section 4.5 hereof govern or en□oin claims against □ew GM; *provided, however*, that nothing contained in the Plan shall in any way modify or limit any protections or rights afforded to □ew GM under or in connection with the Bankruptcy Court order approving the 363 Transaction.

1.116 REALM means Remediation and Liability Management Company, Inc., a Michigan corporation, as debtor or debtor in possession, as the context requires.

1.11□ Re□istered Holder means the registered holders (or bearers, if applicable) of the securities issued pursuant to the Indentures or the Fiscal and Paying Agency Agreements.

1.11□ Resid□al Wind-Do□n Assets means the Cash necessary to fund the resolution of Administrative Expenses, Priority Tax Claims, Priority □on-Tax Claims, and Secured Claims, and the Cash reserved to pay such Administrative Expenses and Claims. If the Debtors have not resolved and paid all of the foregoing Claims and Administrative Expenses by the date of MLC's dissolution, then the Residual □ ind-Down Assets (including the power to ob□ect, settle, and or satisfy such Claims and Administrative Expenses) shall be transferred to the GUC Trust.

1.119 Sched□les means the schedules of assets and liabilities and the statements of financial affairs filed by the Debtors under section 521 of the Bankruptcy Code, Bankruptcy Rule 1007, and the Official Bankruptcy Forms of the Bankruptcy Rules as such schedules and statements have been or may be supplemented or amended through the Confirmation Date.

1.120 Sec□red Claim means a Claim (i) secured by Collateral, to the extent of the value of such Collateral (A) as set forth in the Plan, (B) as agreed to by the holder of

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K (the "Form 10-K") contains forward-looking statements about the assets, financial condition and prospects of the Motors Liquidation Company GUC Trust, or the GUC Trust. Actual results could differ materially from those indicated by the forward-looking statements because of various risks and uncertainties, including, without limitation, the resolution of the Disputed General Unsecured Claims (as defined below), the outcome of and the ultimate recovery on the Term Loan Avoidance Action (as defined below), any related incurrence of Allowed General Unsecured Claims (as defined below), the GUC Trust's incurrence of professional fees, tax liabilities and other expenses in connection with administration of the GUC Trust, economic conditions, changes in tax and other governmental rules and regulations applicable to the GUC Trust, fluctuations in the market price of the New GM Securities (as defined below) and other risks, as well as various risks and uncertainties associated with New GM (as defined below), as described in New GM's periodic and current reports filed under the Securities Exchange Act of 1934, as amended. Some of these risks and uncertainties are beyond the ability of the GUC Trust to control, and in many cases, risks and uncertainties that could cause actual results to differ materially from those indicated by the forward-looking statements cannot be predicted. When used in this Form 10-K, the words "believes," "estimates," "plans," "expects," "intends," and "anticipates" and similar expressions are intended to identify forward-looking statements.

GLOSSARY

A glossary of defined terms used in this Form 10-K is provided beginning on page 14.

PART I

Item 1. Business.

The GUC Trust was formed on March 30, 2011 as a statutory trust under the Delaware Statutory Trust Act, as amended, or the Delaware Act, upon the execution of the Motors Liquidation Company GUC Trust Agreement, or the GUC Trust Agreement (a copy of which, as amended, is filed as Exhibit 3.1 hereto), by Motors Liquidation Company, or MLC, MLC of Harlem, Inc., MLCS, LLC, MLCS Distribution Corporation, Remediation and Liability Management Company, Inc. and Environmental Corporate Remediation Company, Inc., Wilmington Trust Company, not in its individual capacity but solely in its capacity as trust administrator and trustee of the GUC Trust, or the GUC Trust Administrator, and FTI Consulting, Inc., solely in its capacity as trust monitor of the GUC Trust, or the GUC Trust Monitor, and upon the filing of the Certificate of Trust of Motors Liquidation Company GUC Trust with the Office of the Secretary of State of the State of Delaware.

The GUC Trust has no officers, directors or employees. The GUC Trust is administered by the GUC Trust Administrator, which is authorized by the GUC Trust Agreement to engage professionals, or GUC Trust professionals, to assist the GUC Trust Administrator in the administration of the GUC Trust. Accordingly, the GUC Trust and GUC Trust Administrator rely on receiving accurate information, reports and other representations from (i) the GUC Trust professionals, (ii) the GUC Trust Monitor, and (iii) other service providers to the GUC Trust. Notwithstanding such reliance, the GUC Trust Administrator is ultimately responsible for the disclosure provided in this Form 10-K. Among other rights and duties, pursuant and subject to the GUC Trust Agreement, the GUC Trust Administrator has the powers and authority as set forth in the GUC Trust Agreement, including, without limitation, the power and authority to hold, manage, sell, invest and distribute the assets comprising the corpus of the GUC Trust, prosecute and resolve objections to Disputed General Unsecured Claims (as defined below), take all necessary actions to administer the wind-down of the affairs of the Debtors (as defined below), and resolve and satisfy (to the extent allowed) any administrative expenses, priority tax claims, priority non-tax claims and secured claims, or collectively the Residual Wind-Down Claims. The activities of the GUC Trust Administrator are overseen by the GUC Trust Monitor. As further described below, the GUC Trust was formed for the purposes of implementing the Plan (as defined below) as a post-confirmation successor to MLC and resolving Disputed General Unsecured Claims against MLC and its affiliated debtors and debtors-in-possession, or the Debtors, and winding-down the Debtors' affairs, with no objective to engage in the conduct of a trade or business. The GUC Trust is a post-confirmation successor to MLC within the meaning of Section 1145 of title 11 of the United States Code, or the Bankruptcy Code.

Background: The General Motors Corporation Bankruptcy

General Motors Corporation, or Old GM, which is also known as MLC, and certain of its direct and indirect subsidiaries Chevrolet-Saturn of Harlem, Inc., n/k/a MLC of Harlem, Inc., Saturn, LLC, n/k/a MLCS, LLC and Saturn Distribution Corporation, n/k/a MLCS Distribution Corporation filed voluntary petitions for relief under chapter 11 of the Bankruptcy Code, in the United States Bankruptcy Court for the Southern District of New York, or the Bankruptcy Court, on June 1, 2009. On October 9, 2009, Remediation and Liability Management Company, Inc. and Environmental Corporate Remediation Company, Inc. filed voluntary petitions for relief under chapter 11 of the Bankruptcy Code with the Bankruptcy Court.

On July 5, 2009, the Bankruptcy Court authorized the sale of substantially all of the assets of the Debtors to an acquisition vehicle principally formed by the United States Department of the Treasury, or the U.S. Treasury. On July 10, 2009, the acquisition vehicle, NGMCO, Inc., acquired substantially all of the assets and assumed certain liabilities of the Debtors pursuant to a Master Sale and Purchase Agreement, or, as amended, the MSPA, among Old GM and certain of its debtor subsidiaries and NGMCO, Inc., in a transaction under Section 363 of the Bankruptcy Code, or the 363 Transaction. In connection with the 363 Transaction, Old GM changed its name to Motors Liquidation Company and the acquisition vehicle pursuant to a holding company reorganization became General Motors Company, or (together with its consolidated subsidiaries) New GM.

The primary consideration provided by New GM to the Debtors under the MSPA was 150 million shares of common stock of New GM, or the New GM Common Stock, issued by New GM, amounting to approximately 10% of the outstanding New GM Common Stock at the time of the closing of the 363 Transaction, a series of warrants to acquire 136,363,635 newly issued shares of New GM Common Stock with an exercise price set at $10.00 per share, expiring July 10, 2016, or the New GM Series A Warrants, and another series of warrants to acquire 136,363,635 newly issued shares of New GM Common Stock with an exercise price set at $18.33 per share, expiring July 10, 2019, or the New GM Series B Warrants, and, collectively, the New GM Warrants. Together, the New GM Warrants constituted approximately 15% of the New GM Common Stock on a fully-diluted basis at the time of their issuance. Both the New GM Series A Warrants and the New GM Series B Warrants are subject to customary anti-dilution adjustments. The New GM Common Stock and both series of New GM Warrants are currently listed on the New York Stock Exchange, or the NYSE.

Additional consideration was also provided in the form of (i) the assumption of certain liabilities by New GM, (ii) a credit bid of certain outstanding obligations under (a) certain prepetition debt held by the U.S. Treasury and (b) a debtor-in-possession credit agreement, or the DIP Credit Agreement, held by, as lenders thereunder, the U.S. Treasury and the Governments of Canada and Ontario (through Export Development Canada), and together with the U.S. Treasury, the DIP Lenders, and (iii) the cancellation of certain warrant notes issued to the U.S. Treasury.

On March 18, 2011, the Debtors filed the Debtors' Second Amended Joint Chapter 11 Plan, or the Plan, with the Bankruptcy Court, and on March 29, 2011, or the Confirmation Date, the Bankruptcy Court entered an order confirming the Plan, or the Confirmation Order. The Plan became effective on March 31, 2011, or the Effective Date. On December 15, 2011, or the Dissolution Date, as required by the Plan, MLC filed a Certificate of Dissolution with the Secretary of State of the State of Delaware and MLC was dissolved as of such date. On April 18, 2013, the Bankruptcy Court entered an order granting the GUC Trust's request for entry of a final decree administratively closing each of the Debtors' chapter 11 cases other than that of MLC.

The Plan and the Formation of the GUC Trust

The Plan treats all creditors and equity interest holders in accordance with their relative priorities under the Bankruptcy Code, and designates 6 distinct classes of claims or equity interests: secured claims, priority non-tax claims, general unsecured claims, property environmental claims, asbestos personal injury claims and equity interests in MLC. The GUC Trust is primarily tasked with the resolution and satisfaction of general unsecured claims. Under the terms of the Plan and following the Special Excess Distribution (as defined below), for each $1,000 in amount of allowed general unsecured claims against the Debtors, or the Allowed General Unsecured Claims, the holders of such claims are entitled to receive (upon delivery of any information required by the GUC Trust) approximately 4.19 shares of New GM Common Stock and approximately 3.81 warrants of each series of New GM Warrants, as well as one unit of beneficial interest in the GUC Trust, or a GUC Trust Unit, subject in each case to rounding under the Plan, the GUC Trust Agreement and/or the rules of any applicable clearing system, and exclusive of any securities received, or to be received, in respect of GUC Trust Units. Holders of disputed general unsecured claims against the Debtors, or the Disputed General Unsecured Claims, will receive subsequent distributions of New GM Common Stock and New GM Warrants (which are collectively called the New GM Securities) and GUC Trust Units, in respect of such claims, only if and to the extent that their Disputed General Unsecured Claims are subsequently allowed, or Resolved Disputed Claims.

The Plan provides for the formation of the GUC Trust to, among other duties, administer the prosecution, resolution and satisfaction of general unsecured claims and Residual Wind-Down Claims against the Debtors. As further described below, the GUC Trust is responsible for implementing the Plan, including distributing the New GM Securities and GUC Trust Units to holders of Allowed General Unsecured Claims in satisfaction of their claims, resolving (that is, seeking allowance or disallowance of all or part of such claims) Disputed General Unsecured Claims that were outstanding as of the Effective Date and distributing New GM Securities and GUC Trust Units in satisfaction of the Resolved Allowed Claims (as defined below).

Under the Plan, the Debtors were required to be dissolved no later than the Dissolution Date. Upon the dissolution of MLC, the GUC Trust assumed responsibility for the winding down of the affairs of the Debtors and resolving and satisfying the Residual Wind-Down Claims.

The GUC Trust had an initial stated term of three years from the Effective Date. On February 6, 2014, the Bankruptcy Court entered an order extending the duration of the GUC Trust to March 31, 2015. The duration of the GUC Trust may in the future be shortened or further extended upon application to and approval by the Bankruptcy Court as necessary to complete the claims resolution process and the wind-down of the Debtors' affairs. The GUC Trust will remain under the jurisdiction of the Bankruptcy Court throughout the term of its existence.

The GUC Trust Assets

As of the Effective Date, the corpus of the GUC Trust consisted solely of approximately $52.7 million in cash contributed by the Debtors to fund the administrative fees and expenses (including certain tax obligations), or the Wind-Down Costs, incurred by the GUC Trust in administering its duties pursuant to the Plan and the GUC Trust Agreement, or the Administrative Fund. The cash comprising the Administrative Fund was obtained by MLC from the DIP Lenders and is subject to a lien held by the DIP Lenders pursuant to the DIP Credit Agreement, with any excess funds remaining in the Administrative Fund required to be returned to the DIP Lenders after (i) the satisfaction in full of all Wind-Down Costs and other liabilities of the GUC Trust (subject to the terms of the GUC Trust Agreement) and (ii) the winding up of the GUC Trust's affairs. As such, the Administrative Fund cannot be utilized for distributions to holders of Allowed General Unsecured Claims.

Moreover, the usage of the Administrative Fund for the payment of fees and expenses of the GUC Trust is subject to a budget, (the "Budget"), which must be submitted on an annual basis to the GUC Trust Monitor and the DIP Lenders for their approval and is updated quarterly as needed. The GUC Trust Agreement provides that any Wind-Down Costs incurred by the GUC Trust that exceed or are not covered by the Budget cannot be paid from the Administrative Fund, except with written consent of the DIP Lenders or Bankruptcy Court approval, in limited circumstances.

The GUC Trust Agreement provides that the Administrative Fund may not be utilized to fund certain specified costs, fees and expenses, which are referred to as Reporting Costs, including those directly or indirectly relating to (i) reports to be prepared and filed by the GUC Trust pursuant to applicable rules, regulations and interpretations of the Securities and Exchange Commission (the "SEC"), (ii) the transfer, registration for transfer and certification of GUC Trust Units, (iii) the application by the Committee (as defined below) to the Internal Revenue Service for a private letter ruling regarding the tax treatment of the GUC Trust and the holders of Allowed General Unsecured Claims in respect to the distribution of New GM Securities, which is discussed in more detail below under the heading "Income Tax Liabilities for Certain Capital Gains and Dividends on New GM Common Stock," and (iv) certain legal proceedings relating to the Term Loan Avoidance Action. In addition, the Administrative Fund cannot be used to fund any current or projected tax liabilities of the GUC Trust, other than those included in the Budget. However, the GUC Trust Agreement provides the GUC Trust Administrator with the authority to set aside from distribution and sell New GM Securities to fund such Reporting Costs (the proceeds of such sales, the "Reporting and Transfer Cash") and projected tax liabilities (other than those included in the Budget), with the approval of the Bankruptcy Court and/or the GUC Trust Monitor, in each case as described below.

The GUC Trust Agreement affords the GUC Trust Administrator, with the approval of the GUC Trust Monitor, the authority to set aside from distribution New GM Securities in numbers sufficient to satisfy (i) any current or projected Wind-Down Costs of the GUC Trust that exceed the amounts budgeted or were not budgeted in the Administrative Fund, including federal income taxes incurred in respect of dividends received by the GUC Trust on New GM Common Stock held by the GUC Trust ("Dividend Taxes"), (ii) any current or projected Reporting Costs that exceed the then current Reporting and Transfer Cash, or (iii) any current or projected Taxes on Distribution (as defined below). This process is not related to, and is separate from, the process of recording current and deferred income tax liabilities, as well as reserves for expected costs of liquidation in the Statement of Net Assets in Liquidation as a matter of financial reporting, which is only required for expected costs of liquidation for which there is a reasonable basis for estimation under applicable accounting standards. See "Critical Accounting Policies and Estimates—Reserves for Expected Costs of Liquidation" and "—Income Taxes" in Item 7 ("Management's Discussion and Analysis of Financial Condition and Results of Operations") below. The GUC Trust Administrator reevaluates, on a quarterly basis, the amount of New GM Securities needed to be set aside from distribution for purposes of funding projected liquidation and administrative costs (including projected Dividend Taxes) and potential Taxes on Distribution. The calculation converts estimates of projected liquidation and administrative costs and potential Taxes on Distributions into the number of New GM Securities to be set aside from distribution, using the trailing twelve month average closing prices for the New GM Securities since the Dissolution Date (the date record ownership of the New GM Securities was transferred to the GUC Trust from MLC). For additional information, see "Net Assets in Liquidation—New GM Securities Set Aside from Distribution" in Item 7 ("Management's Discussion and Analysis of Financial Condition and Results of Operations") below.

The GUC Trust Administrator may liquidate New GM Securities that have been set aside from distribution to fund (with the required approval of the Bankruptcy Court) the current or projected Wind-Down Costs (including Dividend Taxes) or Reporting Costs of the GUC Trust and (with the required approval of only the GUC Trust Monitor) current and projected Taxes on Distribution of the GUC Trust. The cash proceeds of such sales, and the marketable securities in which such cash proceeds are invested, are referred to as Other Administrative Cash. Pursuant to the GUC Trust Agreement, any cash or marketable securities constituting Other Administrative Cash which remain at the winding up and conclusion of the GUC Trust will be distributed to the holders of GUC Trust Units. The Bankruptcy Court has previously, in March 2012, and again in December 2012, approved the sale of New GM Securities to fund certain accrued and projected Wind-Down Costs which were in excess of the amounts budgeted in the Administrative Fund for such costs, and certain projected Reporting Costs which were in excess of the Reporting and Transfer Cash. Through March 31, 2014, sales of New GM Securities to fund projected Reporting Costs and Wind-Down Costs aggregated approximately $50.2 million. As of March 31, 2014, approximately $13.2 million remained in Other Administrative Cash and was recorded in cash and cash equivalents and marketable securities in the Statement of Net Assets in Liquidation as of March 31, 2014.

Prior to the dissolution of MLC, certain designated assets and the New GM Securities were maintained at MLC (the latter was retained by MLC to avoid federal income taxes that might have been payable by the GUC Trust upon distribution of the New GM Securities with respect to any appreciation of the securities while in possession of the GUC Trust, or Taxes on Distribution; see discussion below). As required by the Plan, MLC transferred to the GUC Trust on the Dissolution Date (i) record ownership of all remaining undistributed New GM Securities, which consisted of 30,967,561 shares of New GM Common Stock, 28,152,186 New GM Series A Warrants and 28,152,186 New GM Series B Warrants, (ii) approximately $2.0 million designated for Reporting Costs, (iii) approximately $1.4 million designated for reimbursing the indenture trustees and the fiscal and paying agents under the Debtors' prepetition debt issuances for costs associated with, among other things, administering distributions to registered holders of the Debtors' prepetition debt issuances, and (iv) certain rights and obligations. Separately, on the Dissolution Date, MLC transferred $500,000 to the Avoidance Action Trust (as defined below) for the purposes of funding any potential public reporting requirements of the Avoidance Action Trust, in which funds the GUC Trust holds a residual interest to the extent unused by the Avoidance Action Trust.

Further, upon the dissolution of MLC, the GUC Trust assumed responsibility for the winding down of the affairs of the Debtors and resolving and satisfying the Residual Wind-Down Claims. Under the Plan, upon the dissolution of MLC, the Debtors were directed to transfer to the GUC Trust, Residual Wind-Down Assets (as defined below) in an amount sufficient, based upon the Debtors' reasonable estimate, to satisfy the Residual Wind-Down Claims and the Residual Wind-Down Costs (as defined below). On the Dissolution Date, MLC transferred

EXECUTION VERSION

AMENDED AND RESTATED MOTORS LIQUIDATION COMPANY GUC TRUST AGREEMENT

This AMENDED AND RESTATED MOTORS LIQUIDATION COMPANY GUC TRUST AGREEMENT, dated as of June 11, 2012 (as it may be amended from time to time, this "Trust Agreement"), by and among Wilmington Trust Company, as trust administrator and trustee (together with any successor appointed under the terms hereof, the "GUC Trust Administrator") of the Motors Liquidation Company GUC Trust (the "GUC Trust") for the benefit of the general unsecured creditors of the Debtors (as defined below), and FTI Consulting, Inc., as trust monitor (together with any successor appointed under the terms hereof, the "GUC Trust Monitor") of the GUC Trust, amends and restates in its entirety the Second Amended Trust Agreement (as defined below). Capitalized terms used herein and not otherwise defined herein shall have the meanings ascribed to such terms in the Debtors' Second Amended Joint Chapter 11 Plan of liquidation pursuant to chapter 11 of Title 11 of the United States Code, 11 U.S.C. §§ 101 et seq., as amended (the "Bankruptcy Code") dated March 18, 2011, as confirmed (including all exhibits thereto, as the same may be further amended, modified, or supplemented from time to time, the "Plan").

W I T N E S S E T H:

WHEREAS, the GUC Trust Administrator and the GUC Trust Monitor are party to the Motors Liquidation Company GUC Trust Agreement, dated as of March 30, 2011, by and among Motors Liquidation Company ("MLC"), MLC of Harlem, Inc., MLCS, LLC, MLCS Distribution Corporation, Remediation and Liability Management Company, Inc., and Environmental Corporate Remediation Company, Inc. (collectively, the "Debtors"), as debtors and debtors-in-possession, Wilmington Trust Company, as GUC Trust Administrator, and FTI Consulting, Inc., as GUC Trust Monitor (the "Original Trust Agreement"); and

WHEREAS, the Original Trust Agreement was amended pursuant to that certain amendment dated as of July 8, 2011 by and between the Debtors, the GUC Trust Administrator and the GUC Trust Monitor (the "First Amendment," and the Original Trust Agreement as amended, the "First Amended Trust Agreement"), and such First Amendment was approved by the Bankruptcy Court (as defined below) on July 6, 2011; and

WHEREAS, each of the Debtors has, on or prior to December 15, 2011, ceased to operate and dissolved; and

WHEREAS, the First Amended Trust Agreement was amended pursuant to that certain second amendment, dated as of January 3, 2012 by and between the GUC Trust Administrator and the GUC Trust Monitor (the "Second Amendment," and the First Amended Trust Agreement as amended, the "Second Amended Trust Agreement"), and such Second Amendment, because it served to rectify a defective and inconsistent provision of the First Amended Trust Agreement did not require the approval of the Bankruptcy Court; and

WHEREAS, the Second Amended Trust Agreement contemplates that the GUC Trust may issue Units (as defined below) in global form, provided that (i) the GUC Trust receives a favorable ruling from the Division of Corporation Finance of the SEC (as defined below), in a form acceptable to the GUC Trust Administrator in its sole discretion, which provides that, among other matters, the Division of Corporation Finance of the SEC would not recommend enforcement action if such Units are not registered under Section 12(g) of the Securities Exchange Act of 1934, and (ii) in addition to such favorable ruling from the Division of Corporation Finance of the SEC, the Divisions of Investment Management and Trading and Markets of the SEC formally or informally communicate that they have no objection to the issuance of Units and the establishment of the GUC Trust (collectively, the "No-Action Relief"); and

WHEREAS, on May 23, 2012 the GUC Trust received the No-Action Relief and the GUC Trust is prepared to issue Units in global form; and

WHEREAS, the definition of "Excess Distribution Record Date" as contained in the Second Amended Trust Agreement, following the receipt of the No-Action Relief, is defective in that the record date for distributions to holders of Units does not conform to certain regulatory requirements which may be applicable to the Units following their issuance in global form; and

WHEREAS, Section 3.4(a) and Section 5.6(b) of the Second Amended Trust Agreement, following the receipt of the No-Action Relief, are defective in that participants of DTC (as defined below) may round or sell fractional Units and/or fractional New GM Securities (as defined below) in accordance with their own client policies and procedures, which policies and procedures may conflict with the procedures governing fractional Units and fractional New GM Securities as set forth herein; and

WHEREAS, Section 5.4(b) of the Second Amended Trust Agreement is defective in that it fails to take into account all factors which may impact assets available for distribution in respect of the Units and, if not corrected, may impact the pro rata receipt of GUC Trust Distributable Assets (as defined below) in respect of the Units; and

WHEREAS, it is the intent of the parties hereto that this Trust Agreement amends and restates in its entirety the Second Amended Trust Agreement; and

WHEREAS, pursuant to Section 13.13(a) of the Second Amended Trust Agreement, the GUC Trust Administrator, with the approval of the GUC Trust Monitor, may amend the Second Amended Trust Agreement without notice to or consent of the Bankruptcy Court or any GUC Trust Beneficiary (as defined below) for the purpose of (in pertinent part) curing any inconsistency or correcting any defective provision; and

WHEREAS, the GUC Trust Monitor has approved this amendment and restatement of the Second Amended Trust Agreement as evidenced by its signature below; and

WHEREAS, this Trust Agreement, as it amends and restates the Second Amended Trust Agreement, shall become effective upon execution by the appropriate signatories to this amended and restated Trust Agreement.

NOW, THEREFORE, in accordance with Section 13.13(a) of the Second Amended Trust Agreement, the Second Amended Trust Agreement is hereby amended and restated as follows:

Background

A. Beginning on June 1, 2009, the Debtors filed in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court") voluntary petitions for relief under chapter 11 of Title 11 of the Bankruptcy Code (the "Chapter 11 Cases").

B. On or about August 31, 2010, the Debtors filed their Plan and Disclosure Statement in the Bankruptcy Court. The Debtors filed an amended Plan and Disclosure Statement on December 7, 2010. The Debtors filed a second amended Plan on March 18, 2011.

C. The Disclosure Statement was approved by the Bankruptcy Court on December 8, 2010.

D. On or about March 29, 2011, the Bankruptcy Court entered an order (the "Confirmation Order") confirming the Plan.

E. The Plan provides for the creation of the GUC Trust as a post-confirmation successor to MLC within the meaning of Section 1145(a) of the Bankruptcy Code, to hold and administer:

(i) the common stock of General Motors Company ("New GM Common Stock") to be contributed to the GUC Trust under the Plan, including (x) any dividends declared thereon in the form of New GM Common Stock, whether prior to or on or after the Effective Date, (y) any additional shares of New GM Common Stock (the "Additional Shares") to be issued in respect of General Unsecured Claims pursuant to the MSPA, together with any dividends declared thereon in the form of New GM Common Stock, whether prior to or on or after the Effective Date, and (z) any capital stock or other property or assets into which such New GM Common Stock may be converted or for which it may be exchanged (including by way of recapitalization, merger, consolidation, reorganization or otherwise) (the "GUC Trust Common Stock Assets");

(ii) the two series of warrants, each entitling the holder to acquire one share of New GM Common Stock, one series with an exercise price of $10.00 per share (subject to adjustment) and an expiration date of July 10, 2016 (the "New GM $10.00 Warrants") and the other with an exercise price of $18.33 per share (subject to adjustment) and an expiration date of July 10, 2019, (the "New GM $18.33 Warrants" and together with the New GM $10.00 Warrants, the "New GM Warrants" and, together with the New GM Common Stock, the "New GM Securities") to be contributed to the GUC Trust under the Plan, as such warrants may from time to time be modified or adjusted in accordance with their terms (the "GUC Trust Warrant Assets" and, together with the GUC Trust Common Stock Assets, the "GUC Trust Securities Assets");

(iii) any dividends on the GUC Trust Common Stock Assets, whether in the form of Cash, securities or other property other than New GM Common Stock, declared prior to the Effective Date (the "Initial GUC Trust Dividend Assets") and any such dividends,

	Assets reserved for distribution to holders of Units (but not yet distributed or withheld from distribution) of— GUC Common Stock Assets GUC Trust Warrant Assets GUC Trust Dividend Assets other GUC Trust Distributable Cash (whether held by MLC or the GUC Trust)	year.
I.	Additional Shares received (whether held by MLC or the GUC Trust)	During (i) the relevant fiscal quarter or fiscal year; and (ii) the period beginning on the Effective Date and ending on the last day of the relevant fiscal quarter or fiscal year.

(ii) The GUC Trust Reports shall also disclose such other information as the GUC Trust Administrator, in consultation with the Trust Professionals deems advisable or as the GUC Trust Monitor or DIP Lenders may reasonably request from time to time or as may be required by the Bankruptcy Court.

(d) The GUC Trust Administrator shall also timely prepare and file and/or distribute such additional statements, reports and submissions as may be necessary to cause the GUC Trust and the GUC Trust Administrator to be in compliance with applicable law, and shall prepare and deliver to the GUC Trust Monitor such statements, reports and other information as may be otherwise reasonably requested from time to time by the GUC Trust Monitor.

(e) The GUC Trust Administrator shall also provide quarterly reports to the DIP Lenders specifying the balance of the Residual Wind-Down Assets as of the last day of such quarter and as of the last day of the prior quarter.

6.3. SEC Reporting. The GUC Trust will file such reports as shall be required by the rules and regulations of the SEC, including pursuant to any no-action guidance issued to the GUC Trust by the staff of the SEC.

6.4. Budget. The GUC Trust Administrator shall prepare and submit to the GUC Trust Monitor and DIP Lenders for approval a reasonably detailed annual plan and budget (the "Budget") at least thirty (30) days prior to the commencement of each calendar year; *provided, however*, that the first such Budget shall be agreed to as of the Effective Date. Such annual plan and Budget shall set forth (on a quarterly basis) in reasonable detail: (A) the GUC Trust Administrator's anticipated actions to administer the GUC Trust Assets; and (B) the anticipated fees and expenses, including professional fees, associated with the administration of the GUC Trust, a separate amount representing the anticipated

fees and expenses of the GUC Trust Monitor and detail as to how the GUC Trust will budget and spend the Wind-Down Budget Cash. Such Budget shall be updated and submitted to the GUC Trust Monitor and DIP Lenders for review on a quarterly basis, and each such quarterly update shall reflect the variances (with explanations) between (x) the Budget, (y) any updated Budget, and (z) the actual results for the same period. For the avoidance of doubt, the DIP Lenders may object in the Bankruptcy Court with respect to any quarterly update that materially changes the Budget and the Bankruptcy Court shall resolve such dispute. All actions by the GUC Trust Administrator shall be consistent with the Budget, (as updated). The GUC Trust Administrator may obtain any required approval of the Budget on reasonable negative notice (which shall be not less than 15 days after receipt of the Budget) and approval of the Budget shall not be unreasonably withheld. In the event of any dispute concerning the Budget (or the taking of actions consistent with the Budget), the GUC Trust Administrator, the GUC Trust Monitor or the DIP Lenders may petition the Bankruptcy Court to resolve such dispute. For the avoidance of doubt, the Reporting and Transfer Costs shall not be set forth in the Budget and shall not be paid for with the Wind-Down Budget Cash.

6.5. Setoff. The GUC Trust Administrator may, but shall not be required to, setoff against or recoup from any payments to be made pursuant to the Plan in respect of any Allowed General Unsecured Claim, including in respect of any Units, any claims of any nature whatsoever that the GUC Trust, as successor to the Debtors, may have against the claimant, but neither the failure to do so nor the allowance of any General Unsecured Claim hereunder shall constitute a waiver or release by the Debtors or the GUC Trust Administrator of any such claim they may have against such claimant.

6.6. Compliance with Laws. Any and all distributions of GUC Trust Assets shall be in compliance with applicable laws, including applicable federal and state tax and securities laws.

6.7. Fiscal Year. Except for the first and last years of the GUC Trust, the fiscal year of the GUC Trust shall commence on April 1 and end on March 31 of the succeeding year. The first year of the GUC Trust shall commence on March 31, 2011 and end on March 31, 2012. For the last year of the GUC Trust, the fiscal year of the GUC Trust shall be such portion of the calendar year that the GUC Trust is in existence.

6.8. Books and Records.

(a) The GUC Trust Administrator shall maintain and preserve the Debtors' books, records and files that shall have been delivered to or created by the GUC Trust Administrator.

(b) The GUC Trust Administrator shall maintain books and records relating to the assets, liabilities, income and expense of the GUC Trust, all distributions made by the GUC Trust and the payment of fees and expenses of, and satisfaction of claims against or assumed by, the GUC Trust and the GUC Trust Administrator, in such detail and for such period of time as may be necessary to enable it to make full and proper

reports in respect thereof in accordance with the provisions of this Trust Agreement and otherwise to comply with applicable provisions of law, including tax law.

6.9. Cash Payments. All distributions of GUC Trust Cash required to be made by the GUC Trust Administrator may be made in Cash denominated in U.S. dollars by checks drawn on a United States domestic bank selected by the GUC Trust Administrator or, at the option of the GUC Trust Administrator, by wire transfer from a United States domestic bank selected by the GUC Trust Administrator or as otherwise required or provided in applicable agreements; *provided*, *however*, that cash payments to foreign persons may be made, at the option of the GUC Trust Administrator, in such funds as and by such means as are necessary or customary in a particular foreign jurisdiction.

6.10. Insurance. The GUC Trust shall maintain customary insurance coverage for the protection of the GUC Trust Administrator, the GUC Trust Monitor and any such other persons serving as administrators and overseers of the GUC Trust on and after the Effective Date, in all cases in accordance with the Budget. The GUC Trust Administrator may also obtain such insurance coverage as it deems necessary and appropriate with respect to real and personal property which may become GUC Trust Assets, if any, in accordance with such Budget.

6.11. Cooperation with and Indemnification of the Administrator of the Avoidance Action Trust.

(a) The GUC Trust Administrator shall timely provide the Avoidance Action Trust Administrator with such information as the Avoidance Action Trust Administrator shall reasonably request. Without limiting the foregoing, the GUC Trust Administrator shall provide to the Avoidance Action Trust Administrator copies of the GUC Trust Reports as soon as they become available, under appropriate arrangements of confidentiality to the extent the reports have at the time not yet been publicly disclosed. The GUC Trust Administrator will also from time to time, upon reasonable request of the Avoidance Action Trust Administrator, provide the Avoidance Action Trust Administrator with the GUC Trust Administrator's most recent determination of all Resolved Allowed General Unsecured Claims, the Disputed General Unsecured Claims, the Maximum Amounts, the Aggregate Maximum Amount and the Current Total Amount, and any other information within the custody and control of the GUC Trust Administrator as the Avoidance Action Trust Administrator shall reasonably request to make any calculation or determination or otherwise to fulfill its responsibilities under the agreement governing the Avoidance Action Trust. The provision of any such information shall be made under appropriate arrangements of confidentiality to the extent such information has at the time not been publicly disclosed. In addition, neither the GUC Trust Administrator nor the GUC Trust Monitor shall be required to provide access to or disclose any information where such access or disclosure would give rise to a material risk of waiving any attorney-client privilege. In the event that the GUC Trust Administrator or the GUC Trust Monitor does not provide access or information to the Avoidance Action Trust Administrator in reliance on the preceding sentence, the GUC Trust Administrator and/or the GUC Trust Monitor shall use its reasonable best efforts to communicate the applicable information to the Avoidance Action Trust Administrator in a way that would not violate such privilege.

Exhibit CC

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

JOHN MORGENSTEIN, MICHAEL JACOB, as Executor of the Estate of Doris Jacob, and ALANTE CARPENTER individually and on behalf of others similarly situated,

Appellants,

-v-

MOTORS LIQUIDATION COMPANY f/k/a/ GENERAL MOTORS CORPORATION A Delaware Corporation,

Appellee.

12 Civ. 01746 (AJN)

ORDER

ALISON J. NATHAN, District Judge:

Plaintiff-appellants appeal the decision and order entered by Bankruptcy Judge Gerber on January 18, 2012, dismissing their claim.

Plaintiffs seek to represent a putative class of Chevrolet Impala owners whose 2007 and 2008 model Impalas allegedly contained defective rear spindle rods, costing them each $450 in repairs. Plaintiffs contend that, pursuant to 11 U.S.C. § 1144, they are entitled to a "limited" revocation of the confirmation order in the General Motors bankruptcy because, Plaintiffs allege, the order was procured by fraud. Plaintiffs allege that General Motors' failure to list the putative class of creditors in General Motors' Section 521 disclosures to the Bankruptcy Court during Chapter 11 proceeding constituted a fraud on the court. Plaintiffs further allege that General Motors' failure to provide Plaintiffs direct notice as required for all "known creditors" rendered fraudulent General Motors' representations to the Bankruptcy Court that it had satisfied all of its notification obligations.

In a Decision and Order dated January 18, 2012, Bankruptcy Judge Gerber rejected Plaintiffs' claims, holding that the Complaint failed to plead fraud with sufficient particularity

and that the requested remedy of partial revocation of a confirmation order does not exist. This Court affirms the decision of the Bankruptcy Court in its entirety.

I. BACKGROUND

The posture of this case derives from Appellants' inability to file and recover a proof of claim either individually or on a class wide basis prior to the entry of the confirmation order in the General Motors bankruptcy proceedings.

As background, General Motors Corporation ("Old GM") filed for Chapter 11 protection on June 1, 2009, and thereafter changed its name to Motors Liquidation Corporation ("MLC"). (09-BR-50026 Docket # 1). On July 5, 2009, the Bankruptcy Court granted Old GM's request for an order authorizing the sale of most of Old GM's assets to a new entity ("New GM") pursuant to 11 U.S.C. § 363. ("Sale Order") (*Id.* at Docket # 2968). The Sale Order provided that New GM would assume all of Old GM's obligations under express warranties. An Order was issued on September 16, 2009, setting November 30, 2009, as the Bar Date, i.e. the last date by which to file a proof of claim. (*Id.* at Docket # 4079).

A Confirmation Order of the Debtor's reorganization plan was entered by the Bankruptcy Court on March 29, 2011. (*Id.* Docket # 9941). The confirmation plan allows general unsecured creditors to receive *pro rata* distributions of shares of common stock in New GM and warrants for the purchase of common stock paid out of a General Unsecured Creditor Trust ("GUC Trust"). Defendant represents, and Plaintiffs do not contest, that approximately 70,000 claims were filed by unsecured creditors prior to the Bar Date. (Opp. Br. at 5). As of December 31, 2011, the GUC Trust contained approximately $1.1 billion in remaining net assets to provide *pari passu* distributions to all remaining disputed claims, which number approximately 1,700. Plaintiffs represented to Judge Gerber at oral argument that they seek funds from this "pot;"

awarding Plaintiffs an award from this "pot" would obviate the need for any claw backs. (A. 364–65; 1/10/12 Tr. at 51–52).

Plaintiffs allege that in July of 2011 they learned of the Impala's rear spindle rod defect from an unrelated lawsuit against New GM in the Eastern District of Michigan. (Compl. ¶ 16; Pl. Br. at 6). Appellants filed a "Complaint for Revocation of Discharge" pursuant to 11 U.S.C. § 1144 on September 26, 2011. Section 1144 allows for revocation of a confirmation order when such order was procured by fraud. Complaints seeking revocation of a confirmation order create adversary proceedings conducted in the bankruptcy court. Fed. R. Bankr. P. 7001(5).

On December 12, 2011, Defendant MLC filed its Motion to Dismiss the Complaint. Defendant argued that (1) plaintiffs were seeking a "partial" or "limited" revocation of a confirmation order, which is not allowed under 11 U.S.C. § 1144, (2) Plaintiffs failed to allege fraud with sufficient particularity to satisfy Rule 9(b), (3) the doctrine of equitable mootness barred the relief requested, (4) Plaintiffs failed to demonstrate excusable neglect regarding their failure to file a timely proof of claim, and (5) Plaintiffs failed to present a viable class pursuant to Fed. R. Civ. P. 23 and Fed. R. Bankr. 7023.

The Bankruptcy Court held oral argument on January 10, 2012, at the end of which it indicated that it would rule against Plaintiffs. (A. 369–71). On January 18, 2012, the Bankruptcy Court issued a written opinion granting Defendant's Motion to Dismiss on the grounds that there is no "partial" revocation permitted under Section 1144 and that Plaintiffs' Complaint failed to satisfy Rule 9(b)'s heightened pleading standard for allegations of fraud. (11-BR-9409 Docket # 42). Because the Bankruptcy Court found dismissal appropriate on these grounds, it did not address Defendant's remaining arguments.

On March 9, 2012, Plaintiffs filed an appeal of Judge Gerber's ruling.

II. STANDARD OF REVIEW

A district court "may affirm, modify, or reverse a bankruptcy judge's judgment, order, or decree." Fed. R. Bankr. P. 8013. On appeal, the legal conclusions of the bankruptcy court are reviewed *de novo*, but the findings of fact are reversed only when they are "clearly erroneous." *Kuhl v. United States,* 467 F.3d 145, 147 (2d Cir. 2006) (citation omitted) (*per curiam*). If a case is appealed to the Second Circuit, the panel will "look through" the district court's opinion and "review the bankruptcy court's opinion independent of the district court's review." *In re Coudert Bros. LLP*, 673 F.3d 180, 186 (2d Cir. 2012).

III. THE COMPLAINT FAILS TO MEET RULE 9(B)'S HEIGHTENED STANDARD FOR PLEADING FRAUD WITH PARTICULARITY

Plaintiffs argue that the Bankruptcy Court was incorrect in applying a "strong inference of fraud" pleading requirement and in holding that Plaintiffs claims fail to meet the pleading standard of Rule 9(b). The Court finds no error in the Bankruptcy Court's ruling.

A. Pleading Standard

Defendant's motion to dismiss is governed by Rule 12(b)(6), which is made applicable to adversary proceedings in bankruptcy courts by Fed. R. Bankr. P. 7012(b). "Factual allegations must be enough to raise a right to relief above the speculative level," and a complaint must present facts that "state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544, 555, 570 (2007). When alleging fraud in an adversarial bankruptcy proceeding, the plaintiff must meet the heightened pleading standard of Rule 9(b). *In re Delta Air Lines, Inc.*, 386 B.R. 518, 531–32 (Bankr. S.D.N.Y. 2008).

B. The Bankruptcy Court Correctly Applied the "Strong Inference" Standard

Section 1144 requires allegations of fraudulent intent. *In re Longardner & Assoc., Inc.*, 855 F.2d 455, 461–62 (7th Cir. 1988); *In re Michelson*, 141 B.R. 715, 725 (Bankr. E.D. Cal.

1991); *Skulsky v. Nyack Autopartstores Holding Co., Inc. (In re Nyack Autopartstores Holding Co., Inc.)*, 98 B.R. 659, 662 (Bankr. S.D.N.Y. 1989) ("[I]ntent to defraud the court is a specific prerequisite for revoking a confirmation order pursuant to 11 U.S.C. § 1144.").

Long-standing case law in the Second Circuit requires plaintiffs to "allege facts that give rise to a strong inference of fraudulent intent." *Acito v. IMCERA Group, Inc.,* 47 F.3d 47, 52 (2d Cir. 1995); *Cosmas v. Hassett*, 886 F.2d 8, 12–13 (2d Cir. 1989) ("Although under Rule 9(b) a complaint need only aver intent generally, it must nonetheless allege facts which give rise to a strong inference that the defendants possessed the requisite fraudulent intent."); *see also Shields v. Citytrust Bancorp, Inc.,* 25 F.3d 1124, 1128 (2d Cir. 1994) ("[T]he relaxation of Rule 9(b)'s specificity requirement for scienter must not be mistaken for license to base claims of fraud on speculation and conclusory allegations.") (internal quotation marks omitted). "The requisite 'strong inference' of fraud may be established either by (a) alleging facts to show that defendants had both motive and opportunity to commit fraud, or (b) alleging facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness." *Shields, Inc.,* 25 F.3d at 1128..

The strong inference standard has been applied to common law fraud, securities fraud, and RICO claims. *Capital Mgt. Select Fund Ltd. v. Bennetti*, 680 F.3d 214, 225 (2d Cir. 2012) (citing *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, 551 U.S. 308, 314 (2007)); *S.Q.K.F.C., Inc. v. Bell Atl. TriCon Leasoning Corp.*, 84 F.3d 629, 633–34 (2d Cir. 1996); *Harborview Value Masterfund, L.P. Freeline Sports, Inc.*, 2012 WL 612358, at *8 (S.D.N.Y. Feb. 23, 2012). Plaintiffs acknowledge that the strong inference standard "has now been applied in a variety of settings." (Pl. Br. at 26).

Nevertheless, Plaintiffs argue that Judge Gerber was mistaken in applying the "strong inference" test and should instead have assessed whether a "fraud on the court" was "of great moment to the public," language that Plaintiffs take from *Hazel-Atlas Glass Co. v. Hartford Empire Co.*, 322 U.S. 238 (1944). This formulation does nothing to alter or displace the plaintiffs' obligation to plead a strong inference of fraudulent intent. *Hazel-Atlas*' "great moment to the public" language was the Supreme Court's response to the Third Circuit's holding that a fraudulent expert report introduced in a patent proceeding did not reach levels significant enough to obtain equitable relief. *Id.* at 246. The "great moment" language has nothing to do with the standard for pleading intent and it cannot be used to supplant the long-established "strong inference" standard when pleading fraud in the Second Circuit.

Plaintiffs cite two cases supposedly applying its version of the "*Hazel-Atlas* test," (Opp. Br. at 27), neither of which involved Section 1144 or addressed the scienter requirement for pleading fraud. *Gazes v. Delprete ("In re Clinton St. Food Corp.")*, 254 B.R. 523, 533 (Bankr. S.D.N.Y. 2000); *Tese-Milner v. TPAC, LLC ("In re Ticketplanet.com")*, 313 B.R. 46, 64-65 (Bankr. S.D.N.Y. 2004). These cases are inapposite.

Plaintiffs cite two additional cases in urging that the Court reject the "strong inference" standard for pleading fraud for purposes of Section 1144. (Opp. Br. 28–29, 34–35). Plaintiffs urge the Court to adopt what it purports to be the test for fraud adopted by a bankruptcy court in the Eastern District of California in *In re Michelson*, 141 B.R. 715, 725 (Bankr. E.D. Cal. 1991), specifically that the intent requirement of Section 1144 is met when a person "(1) is obliged to disclose, (2) knows the existence of material information, and (3) does not disclose it." (Pl. Br. at 34). But even assuming *arguendo* the correctness of this analytic framework, it does not rebut the need in this Circuit to plead facts creating a strong inference of such intent, either by showing

a motive and opportunity or strong circumstantial evidence of recklessness or conscious wrongdoing. In conjunction with *Michelson*, Plaintiffs cite *Grubin v. Rattet ("In re Food Mgmt. Grp., LLC")*, 380 B.R. 677, 714–15 (Bankr. S.D.N.Y. 2008), a case involving the common law tort of fraud on the court. Yet fraud for purposes of Section 1144 has different elements from common law fraud claims. *See* 8 *Collier's on Bankruptcy* § 1144.05. *Grubin* does not stand for the proposition that there is no intent requirement for claims arising under Section 1144 or that the "strong inference" pleading standard should not apply.

In short, the Bankruptcy Court correctly applied the well-established rule in this Circuit that, pursuant to Rule 9(b), a pleading must contain "a strong inference of fraudulent intent," *Shields*, 25 F.3d at 1128. Plaintiffs' arguments to the contrary are without merit.

C. The Bankruptcy Court Correctly Held that the Allegations in the Complaint Fail to Meet the Heightened Pleading Requirement of Rule 9(b)

Plaintiffs' allegations of fraud appear to rest on two pillars: (1) Defendants had a duty to list Plaintiffs' putative class as a scheduled creditor pursuant to 11 U.S.C. § 521 but did not (Compl. ¶ 44–46; Pl. Br. at 29) and (2) Plaintiffs were "known creditors" entitled to notice of the proceedings who did not receive such notice and, as a result, Defendants' representations to the bankruptcy court that they had served a Notice of Bar Date and copies of the Notice Package on all persons with potential claims against the Old GM estate were therefore fraudulent and not in good faith (Pl. Br. at 11–13, 29–30). Plaintiffs insist that their putative class' members were "known creditors" because Old GM issued a Product Service Bulletin to Authorized Chevrolet Dealerships, and initiated a recall as to "Police Package" Impalas ("Police Impalas") for 2007 and 2008 models, (Comp. ¶¶ 6–9), which, Plaintiffs contend, *implies* that Old GM was aware of the defect in consumer Impalas. (Comp. ¶¶ 11–14). Plaintiffs allege that not notifying them directly and not listing them in Old GM's § 521(c) filings constituted "failures in disclosure

which were central to the Plan process" and that "[f]ull disclosure would have precluded confirmation due to lack of good faith, discriminatory treatment of similarly-situated creditors, and breach of fiduciary duties." (Comp. ¶ 48; Pl. Br. at 30).

As discussed below, these allegations are insufficient to plead either motive and opportunity or strong circumstantial evidence of conscious misbehavior or recklessness, and therefore fail to satisfy the standard for pleading a strong inference of fraudulent intent. *Shields*, 25 F.3d at 1128.

1. Plaintiffs Failed to Plead Motive and Opportunity

When alleging intent based on motive and opportunity, "[m]otive would entail concrete benefits that could be realized by one or more of the false statements and wrongful nondisclosures alleged. Opportunity would entail the means and likely prospect of achieving concrete benefits by the means alleged." *Shields*, 25 F.3d at 1130.

Plaintiffs' allegations of motive with regard to a fraud on the Bankruptcy Court appear to rely on its assertion that "the Confirmation Order affords broad releases to Old GM's pre- and post-petition officer [*sic*], directors, consultants and professionals." (Pl. Br. at 13). Plaintiffs assert that "some of those parties **may** have breached their respective fiduciary duties to Plaintiffs . . . . As a result of these broad releases, Plaintiffs have no right to seek damages from those fiduciaries." (*Id.*) (emphasis added). It is noteworthy that Plaintiffs do not allege that any of these individuals actually did breach fiduciary duties and do not allege that they needed these exculpation provisions vis-à-vis Plaintiffs' putative class. Nor do Plaintiffs contend with the legitimate and "salutary" reasons for including exculpation provisions in a confirmation order.[1]

[1] Exculpation Provisions "have a salutary purpose" and "are frequently included in chapter 11 plans, because stakeholders all too often blame others for failures to get the recoveries they desire; seek vengeance against other parties; or simply wish to second guess the decision makers in the chapter 11 case." *In re DBSD North Am., Inc.*, 419 B.R. 179, 217 (Bankr. S.D.N.Y. 2009) (Gerber, J.). Such releases "are permissible under some circumstances

Plaintiffs' averments with regards to exculpation provisions are vague and fail to allege even inferentially any motive or opportunity for the alleged fraud.

Plaintiffs allege that GM's motivations to hide the need for a partial recall were: (1) "minimizing the costs of recalls, (2) inducing purchases of defective vehicles, and (3) mollifying the National Highway Safety Administration." (Pl. Br. at 23). But as the Bankruptcy Court noted, Old GM gained nothing from concealing this putative class from the bankruptcy court. *In re Motors Liquidation Co.*, 462 B.R. 494, 506–07 (Bankr. S.D.N.Y. 2012). Old GM was liquidated and those assets that were not transferred to New GM were distributed *pari passu* to creditors. *See id.* The Court fails to ascertain what motive Old GM could have had—or how it could have mattered to Old GM at all—to exclude Plaintiffs' putative class from the group of unsecured creditors receiving payments of approximately twenty-five percent of the amount owed in warrants and stocks in New GM.

In short, just as the Bankruptcy Court, this "Court can find no motive." *In re Motors Liquidation Co.*, 462 B.R. at 494.

2. Plaintiffs Failed to Plead Facts Creating Strong Circumstantial Evidence of Conscious Misbehavior or Recklessness

Nor have Plaintiffs pleaded "facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness." *Acito v. IMCERA Grp, Inc.*, 47 F.3d 47, 52 (2d Cir. 1995). The Bankruptcy Court noted that there are no "facts alleged evidencing a decision by the Debtors to deny notice to any of the named plaintiffs . . . ." *In re Motors Liquidation Co.*, 462

---

but not as a routine matter." *In re Chemtura Corp.*, 439 B.R. 561, 611 (Bankr. S.D.N.Y. 2010) (citing *In re Metromedia Fiber Network, Inc.*, 416 F.3d 136, 142 (2d Cir. 2005)). They are to be used "where the provisions are important to a debtor's plan; where the claims are 'channeled' to a settlement fund rather than extinguished; where the enjoined claims would indirectly impact the debtor's reorganization by way of indemnity or contribution; where the released party provides substantial consideration; where the plan otherwise provides for the full payment of the enjoined claims; or where creditors consent." *Id.* Judge Gerber permitted these releases in the GM bankruptcy, and did not mention anywhere in his opinion in the present case an inkling of concern that these releases would not have been obtained had the omitted "liabilities" at issue been known.

B.R. at 506. Plaintiffs state in their moving papers that Defendant's knowledge of Plaintiffs' putative class, and by extension its knowledge that it was committing a fraud on the bankruptcy court, "follows inferentially from its pre-petition conduct," i.e. alleged "partial recalls" "secret warranties" favoring only a small number of Impala owners and lessees designed to avoid the costs of reimbursing all Impala owners affected by the defective rear spindle-rods. (Pl. Br. at 19–20). This Court agrees with the Bankruptcy Court that this is at best a weak inference based on weak circumstantial evidence where a "strong inference" and strong circumstantial evidence of conscious misbehavior or recklessness are required. *In re Motors Liquidation Co.*, 462 B.R. at 505. Plaintiffs' allegations are insufficient to constitute strong circumstantial evidence of conscious misbehavior or recklessness for purposes of Rule 9(b).

Plaintiffs cite *George v. Celotex Corp.*, 914 F.2d 26, 28 (2d Cir. 1990) and *Caruolo v. A C & S, Inc.*, No. 93-CV-3752, 1999 WL 147740 (S.D.N.Y. Mar. 18, 1999) for the proposition that "a manufacturer is presumed to have the knowledge of an expert concerning its products." (Pl. Br. at 12). But *Celotex* and *Caruolo* were product liability actions where the issue was whether the manufactures "knew or should have known" of the dangers of the product. *Caruolo*, 1999 WL 147740, at *10. For purposes of that inquiry, "a manufacturer is held to knowledge of an expert in the field." *Celotex*, 914 F.2d at 28. The standard for what a manufacturer "knew or *should have known*" for purposes of a product liability case cannot create a presumption as to what Old GM *did* know when it made representations in the bankruptcy court.

Similarly inapposite is Plaintiffs' citation to *In re Equitable Office Building Corp.*, 83 F. Supp. 531, 554 (S.D.N.Y. 1949), which held that the debtor, which was a relatively small company, "may be presumed to have had a more or less intimate knowledge of its financial affairs." *In re Equitable Office Building Corp.* does not, as Plaintiffs contend, stand for the

proposition that a debtor that is a giant multinational corporation is presumed to have knowledge of a relatively minor defect in one of its numerous products when preparing a list of known creditors for the bankruptcy court.

In short, the Bankruptcy Court correctly held that the Complaint fails to meet Rule 9(b)'s heightened pleading standard for fraud. While Plaintiffs would ordinarily be granted leave to amend their Complaint in light of this ruling, such an amendment will be futile because, as discussed below, the Court finds that the remedy of "partial revocation" requested by Plaintiffs does not exist.

IV. SECTION 1144 REVOCATION

Plaintiffs alternately contend (a) that Section 1144 may be "partially" revoked and amended and (b) that the Court should completely revoke the confirmation order without restoring all interested parties to the *status quo ante*, and modify the confirmation plan solely to add Plaintiffs' putative class as an unsecured creditor. (*Compare* Reply at 3–4 *with* Reply at 5–8). Neither of these remedies is provided for by Section 1144. At base, Plaintiffs seek a partial revision or a modification of the confirmation order. This Court agrees with Judge Gerber that, subsequent to the entry of a confirmation order, a plan cannot be partially revoked or modified, but instead only completely revoked and rescinded.

A. There is no "Partial Revocation" of a Confirmation Order

The Bankruptcy Court was correct in holding that any revocation under Section 1144 must be entire and complete. *In re Motors Liquidation Co.*, 462 B.R. at 501. Plaintiffs appear to have argued in the Bankruptcy Court and in sections of their briefs on this appeal that Section 1144 allows for a confirmation order to be revoked in part.[2] As discussed below, both a textual

[2] *See* Pl. Br. at 2 ("Plaintiffs bring this action for a limited, carefully crafted plan revocation"); Reply at 3 ("Revocation, as authorized by Section 1144, need not be 'total, and absolute.'").

analysis and a survey of case law indicate that that Section 1144 does not allow for partial revocations or modifications.

The Court starts by analyzing the text of the statute. Title 11, Section 1144 reads in its entirety:

> On request of a party in interest at any time before 180 days after the date of the entry of the order of confirmation, and after notice and a hearing, the court may revoke such order if and only if such order was procured by fraud. An order under this section revoking an order of confirmation shall—
>
> > **(1)** contain such provisions as are necessary to protect any entity acquiring rights in good faith reliance on the order of confirmation; and
> >
> > **(2)** revoke the discharge of the debtor.

11 U.S.C. § 1144.

The Bankruptcy Court correctly observed that the use of the word "revoke" is by its nature complete and absolute. *See Black's Law Dictionary* 1322 (6th ed. 1990) ("To annul or make void by recalling or taking back. To cancel, rescind, repeal or reverse, as to revoke a license or will."); *Merriam-Webster's Collegiate Dictionary* 1068 (11th ed. 2003) ("to annul by recalling or taking back . . . .").

"When the language of the statue is unambiguous, judicial inquiry is complete." *Hess v. Cohen & Slamowitz LLP*, 637 F.3d 117, 120 (2d Cir. 2011) (quoting *Marvel Characters, Inc. v. Simon*, 310 F.2d 280, 290 (2d Cir. 2002)). Section 1144 does not refer to "modifying," "amending," or "revising;" it refers to "revoking." Nothing in the language of Section 1144 speaks to "partial" or "limited" revocation; the provision simply states that "the court may revoke *such* order . . . ." The statute is clear in providing only for complete revocation, and not for partial revocations or any other kinds of modifications.

Viewing Section 1144 in the context of the Bankruptcy Code as a whole further indicates that Section 1144 does not provide for partial revocations or modifications as remedies when a confirmation order is shown to have been procured by fraud. While Section 1144 provides the remedy of a "revocation," other provisions in the Bankruptcy Code allow for "modifications," *see* 11 U.S.C. § 1127 (modifications of plans permitted under certain circumstances *before confirmation*), indicating that Congress did not intend to include modifications as a remedy when a plan is procured by fraud. *See Duncan v. Walker*, 533 U.S. 167, 173 (2001) ("It is well settled that where Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion.") (internal citations and quotation marks omitted); *McInerney v. Rensselaer Polytechnic Inst.*, 505 F.3d 135, 138 (2d Cir. 2007) ("[I]t is a general principle of statutory construction that when Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is . . . presumed that Congress acts intentionally and purposely.").

Beyond the textual analysis, case law addressing this issue further indicates that Section 1144 does not permit a partial revocation of a confirmation order. *See, e.g.*, *In re Innovative Clinical Solutions, Ltd.*, 302 B.R. 136, 143 (Bankr. D. Del. 2003) (dismissing a fraud claim based on the doctrine of equitable mootness) ("[W]hat Plaintiffs seek here is to modify the release and exculpation provisions of the Plan. This is obviously not a form of relief contemplated by § 1144."); *see also In re East Shoshone Hosp. Dist.*, No. 98–20934–9, 2000 WL 33712301 (D. Idaho April 27, 2000) (applying § 1144 to a Chapter 9 bankruptcy) ("There is nothing in the statute, nor has there been authority provided by the debtor, which recognizes or

validates a theory of selective or partial revocation . . . Either an order of confirmation is revoked or it is not.").

The Court is not persuaded by Plaintiffs' argument that *Seedman v. Friedman*, 132 F.2d 290 (2d Cir. 1942), holds that confirmation orders may be partially revoked or modified when they are shown to have been procured by fraud. (Opp. Br. at 17). In *Seedman*, the Second Circuit addressed the rescission of a confirmation order that was procured by a fraud on the court. *Seedman*, 132 F.2d at 292. Control of the debtor in *Seedman* had been turned over to a creditors' committee for the purposes of liquidation, and the creditors' committee withheld material information about the state of the debtor prior to the entry of the confirmation order. *Seedman*, 132 F.2d at 292. The plaintiff was a third party who contracted with the debtor to purchase a substantial amount of the debtor's assets subsequent to the entry of the confirmation order. *Id.* After the fraud was uncovered, the referee rescinded the confirmation order and, to return the parties to the *status quo ante*, rescinded Seedman's post-confirmation order contract as well. *Id.* Seedman objected to the rescission of his contract, which Seedman entered into in reliance on the confirmation order and without any knowledge of the fraud.

The Second Circuit agreed with Seedman, noting that "[i]f contracts formed in the interval between the confirmation of an arrangement and the subsequent setting aside of that confirmation for fraud are to be . . . automatically cancelled, the policy of Chapter XI to re-establish temporarily embarrassed debtors to their former standing in the business world would be substantially nullified, for third parties would wisely refuse to do business with the reorganized debtors subject to such risks." *Id.* at 295. The Second Circuit further wrote:

> "[E]xpress provisions of the Bankruptcy Act support the view that the setting aside of a confirmation order is without prejudice to rights which arise from bona fide transactions theretofore entered into in reliance upon the original order. Thus, Sec. 64 . . . gives priority to debts contracted 'after the confirmation

> of an arrangement' over debts provable in the arrangement, in the event the arrangement is set aside, while Sec. 386(3), providing **for the modifying or altering** of an arrangement procured by fraud, expressly **protects those not participating in the fraud**, or acquiring rights innocently and for value subsequent to the confirmation of the arrangement."

Seedman, 132 F.2d at 295 (emphasis added).

While Plaintiffs seize on *Seedman's* use of the word "modifying," (Pl. Br. at 17), the language in *Seedman* regarding "modifying or altering" a confirmation order derived from then-governing Section 386(3) of the Bankruptcy Act of 1898, as amended in 1938 ("Bankruptcy Act"), Pub. L. No. 75-696, 52 Stat. 840 (1938), which itself used the words "modify or alter," a phrase that was stricken from Section 1144 when Congress adopted the Bankruptcy Code in 1978. Pub. L. No. 95-598, 92 Stat. 2549 (1978)). The "modifying" dicta in *Seedman* was premised on a provision in the Bankruptcy Act that no longer exists in the Bankruptcy Code.[3]

Plaintiffs also cite *In re Michelson*, 141 B.R. 715, 725 (Bankr. E.D. Cal. 1991) as a case in which the "court's revocation was not 'entire.'" (Pl. Br. at 16). This is a mischaracterization of *Michelson*. *Michelson* held that because a serious fraud had been purveyed on the court in that case, Section 1144 applied and that "the order confirming the plan of reorganization must be revoked." *Michelson*, 141 B.R. at 730. The *Michelson* court went on to write that the "the order revoking confirmation must also revoke the discharge of the debtor. The revocation of the discharge does not necessarily preclude a later discharge, rather **it restores the status quo immediately before confirmation**." *Id.* (emphasis added and internal citations omitted). In other words, *Michelson* stands for the opposite proposition for which Plaintiffs cite it. *Michelson* holds that when Section 1144 is applied by a bankruptcy court, the confirmation order must be

[3] On June 14, 2012, Plaintiffs filed a motion to present the court with "new authority." This "new authority" consisted of a two-paragraph Second Circuit opinion from 1941, *Levenson v. B & M Furniture Co.*, 120 F.2d 1009 (2d Cir. 1941), which construed Section 386(3) of the Bankruptcy Act. *Levenson* allowed the bankruptcy court to modify a claim and add in a new creditor following a fraud. But then-governing Section 386(3) explicitly allowed alterations and modifications, whereas presently-governing Section 1144 does not.

revoked in its entirety and the parties must be returned to the *status quo ante*.[4] There is nothing "partial" about such a revocation.

The Bankruptcy Court was correct in finding that Section 1144 does not allow for partial revocations by its own terms and no case law supports such a proposition.

B. Subsection (1) of Section 1144 Does not Permit a Court to Modify a Plan or Order a Tailored Revocation

Plaintiffs argue that, "subsection (1) of Section 1144 expressly directs the Bankruptcy Court to modify the plan where conditions so warrant." (Pl. Br. at 17 n.29). In their Reply Brief, Plaintiffs "clarify" this point, stating that they seek "revocation of the confirmation order and, thereafter, permission to file their claims and, in due course, a dividend in *pari passu* with similarly situated unsecured creditors." (*Id.*). Put differently, Plaintiffs assert that it is possible to mechanically and non-disruptively revoke the confirmation order—in reliance upon which millions of shares of stock in New GM have been issued and publicly traded (Opp Br. at 7)—add in Plaintiffs' claims, and re-confirm the order.

Plaintiffs mischaracterize Subsection (1). Subsection (1) requires that an order revoking a plan "contain such provisions as are necessary to protect any entity acquiring rights in good faith reliance on the order of confirmation." This subsection evinces recognition by Congress of the major consequences of the revocation of a confirmation order on anyone who might have acquired rights in good faith reliance upon it. *In re Motors Liquidation Co.*, 462 B.R. at 502. But it does not provide protections for plan participants, such as unsecured creditors who have received distributions in satisfaction of their claims pursuant to the confirmed plan. While Subsection (1) requires protections for individuals who have acquired rights in reliance on that

[4] Such an outcome in this case, where over a hundred million shares in New GM have been distributed to general unsecured creditors, would revive Defendant's equitable mootness argument, which the Bankruptcy Court did not see the need to rule on.

order (e.g. someone who purchased New GM common stock from a plan participant), any provision which "tailors" that revocation to avoid rescinding the distributions made to creditors pursuant to the confirmed plan—or to protect those creditors in any way—is beyond the scope of what is provided for in Subsection (1). The requirement of protections for some groups affected by rescission of a plan without any explicit protections for others indicates that Subsection (1) is not a provision that allows for modifications—and does not, as Plaintiffs argue, encompass the flexibility of the "modify or alter" language previously found in Section 386 of the Bankruptcy Act (Reply at 4)—but rather anticipates a disruptive revocation and provides protections for one group of those who will be affected by the revocation, those acquiring rights in reliance on the order, but not others.

Additionally, Plaintiffs' request for a revocation solely to allow for inclusion of their claim is, at base, a request for a *de facto* modification of the confirmation plan, and modifications are not provided for under Section 1144, as discussed in Section IV.A above.

CONCLUSION

For the foregoing reasons, the Bankruptcy Court's Order dismissing this case with prejudice is AFFIRMED. The Clerk of Court is instructed to close this case.

SO ORDERED.

PLAINTIFFS' OPPOSITION TO CHRYSLER GROUP, LLC'S MOTION TO DISMISS SECOND AMENDED COMPLAINT

Plaintiffs, by and through their undersigned counsel, by way of opposition to Chrysler Group, LLC's ("Chrysler Group") Motion to Dismiss Second Amended Complaint (the "Motion"), hereby state:

BACKGROUND

A. Chrysler Group's Assumption of Warranty Claims and Lemon Law Liabilities.

1. On April 30, 2009, Chrysler, LLC (n/k/a Old Carco LLC) and 24 of its affiliated debtors (the "Debtors") filed voluntary petitions for relief under Chapter 11 in the United States Bankruptcy Code (11 U.S.C. § 101, *et seq*.) in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court").

2. On June 1, 2009, the Bankruptcy Court entered an order approving the sale of substantially all of the Debtors' assets to Chrysler Group (the "Sale Order") [Docket No. 3232] pursuant to the terms and conditions of a Master Transaction Agreement dated as of April 30, 2009 (the "MTA") [Docket No. 3071-1].

3. Pursuant to Section 2.08 of the MTA, Chrysler Group assumed, effective as of closing, the obligation to "timely perform and discharge in accordance with their respective terms" certain liabilities of the Debtors.

4. Among the Debtors' obligations assumed by Chrysler Group were "**all Liabilities pursuant to product warranties, product returns and rebates on vehicles sold by Sellers prior to the Closing**." MTA § 2.08(g) (emphasis added).

5. "Liabilities," as used in § 2.08(g), are defined to include "all debts, liabilities and obligations of any kind whatsoever, whether asserted or unasserted, accrued or fixed, contingent or absolute, determined or determinable, or otherwise including those arising under any Law, Action or Government Order and those arising under any contract." Definitions Addendum to MTA.

6. Not only did Chrysler Group assume all of the Debtors' Liabilities pursuant to product warranties, but the Sale Order separately obligated Chrysler Group to make payment of

liabilities under "Lemon Laws" on vehicles manufactured by the Debtors in the five years prior to the sale closing. Sale Order ¶ 19.

7. Chrysler Group also expressly agreed to assume "**any Liabilities arising as a result of the operation of the Company Business after the Closing.**" MTA § 2.08(l) (emphasis added)

8. The sale closed on June 10, 2009.

9. The United States Court of Appeals for the Second Circuit affirmed the Sale Order. *Ind. State Police Pension Trust v. Chrysler LLC (In re Chrysler LLC)*, 576 F.3d 108 (2d Cir. 2009).

10. The Sale Order, *inter alia*, extinguished successor liability claims for personal injuries against Chrysler Group arising from motor vehicle accidents occurring both before and after the sale involving Chrysler vehicles manufactured before the closing.

11. Appellants, *inter alia*, challenged the provisions of the Sale Order which would have precluded claims against Chrysler Group for accidents not occurring until after the sale on due process and other grounds. *Id*. at 127.

12. In its opinion, the Second Circuit stated that "we decline to delineate the scope of the bankruptcy court's authority to extinguish future claims, until such time as we are presented with an actual claim for an injury that is caused by Old Chrysler that occurs after the Sale and is cognizable under state successor liability law." *Id.*

13. On November 19, 2009, the Bankruptcy Court entered an order approving an amendment to the MTA providing for Chrysler Group's assumption of products liability claims arising from motor vehicle accidents occurring after the sale involving Chrysler vehicles manufactured before the closing. [Docket No. 5988]

14. On December 14, 2009, the Supreme Court of the United States issued an opinion granting a petition for writ of certiorari, vacating the judgment on the Sale Order and remanding the case to the Second Circuit with instructions to dismiss the appeal as moot. *Ind. State Police Pension Trust v. Chrysler LLC (In re Chrysler LLC)*, 558 U.S. 1087 (2009).

B. Plaintiffs' Class Action.

15. On November 29, 2011, Plaintiffs filed this action in the Superior Court of the State of Delaware for the County of New Castle.

16. On January 3, 2012, Chrysler Group removed this case to the United States District Court for the District of Delaware (the "Delaware Court").

17. On August 21, 2012, Plaintiffs filed their Second Amended Complaint, a true and copy of which is attached as Exhibit A.

18. On August 28, 2012, the Delaware Court entered an Order transferring this case to the United States District Court for the Southern District of New York, for referral to the Bankruptcy Court for a determination as to whether the claims set forth in the Second Amended Complaint are barred by the Sale Order (the "Transfer Order"). A true and correct copy of the Transfer Order is attached as Exhibit B.

19. The Transfer Order provides that if the Bankruptcy Court determines that any of the claims asserted in Plaintiffs' Second Amended Complaint are not barred by the Sale Order, all remaining claims will be remanded to the Delaware Court. Transfer Order ¶ 3.

20. This is a class action arising from Chrysler Group's failure to fulfill its obligations, including, but not limited to, warranty obligations, to remediate a dangerous and defective condition in Chrysler vehicles.

21. Each of the named Plaintiffs owns a Chrysler vehicle which has a flaw that causes fuel to spill out of the filler tube during refueling. This defect is known as a "fuel spit-back" problem.

22. Plaintiffs seek: (a) an injunction requiring Chrysler Group to correct the fuel spit-back problem in Jeep Wrangler vehicles, model years 2005 through 2010, and Dodge Durango vehicles, model years 2005 through 2008; and (b) to recover the cost of the repair and replacement of necessary components in each Jeep Wrangler and Dodge Durango. The Plaintiffs do not assert any claims for personal injury damages.

23. The Second Amended Complaint contains breach of express and implied warranty claims, as well as negligence claims predicated upon from Chrysler Group's post-closing failure to properly notify consumers and remediate the fuel spit-back problem.

24. In September, 2009, Chrysler Group issued a Technical Service Bulletin ("TSB") advising Chrysler dealers that customers were experiencing fuel spit-back problems and advising the dealers on various repair steps. Second Amended Complaint ¶ 7.

25. On February 11, 2011, Chrysler Group issued a TSB granting a lifetime warranty to the owners of 2007 and 2008 Jeep Wrangler vehicles. The warranty covered the repair and replacement of certain components if and when a customer complained of a fuel spit-back problem. A true and correct copy of the February 11, 2011 TSB is attached as Exhibit C.

26. Although the U.S. Department of Transportation, National Highway Traffic Safety Administration (the "NTSA") found that the rate of fuel spit-back complaints on Jeep Wrangler vehicles "is higher than or similar to the rate experienced in previous investigations where safety recalls were conducted," it closed its investigation relying upon the lifetime warranty issued by Chrysler Group:

> In addition, Chrysler is initiating a lifetime warranty program, at no cost to the consumer, to address the fuel spit back problem in approximately 135,000 model year 2007-2008 Jeep Wrangler vehicles built from March 1, 2007 to March 31, 2008. Chrysler will notify all affected vehicle owners of this action. Consumers should refer to the warranty and service bulletins and sample owner notification letter available in the investigative file. The vehicle build date can be found on the certification label located on the driver door or door jamb.

See NTSA ODI Resume, a true and correct copy of which is attached as Exhibit D.

27. On January 20, 2012, Chrysler Group issued a TSB granting owners of 2006 through 2008 Dodge Durango vehicles a lifetime warranty due to the fuel spit-back problem. A true and correct copy of the January 20, 2012 TSB is attached as Exhibit E.

28. In the Second Amended Complaint, Plaintiffs allege that, *inter alia*, Chrysler Group failed to live up to the promises it made and obligations it assumed, when it issued these lifetime warranties in 2011 and 2012.

29. The Second Amended Complaint alleges that in each of the TSBs referenced above, the defendant failed to reasonably and safely notify current owners to allow for the prompt repair of all Chrysler products in the Class.

ARGUMENT

30. When deciding a motion to dismiss a complaint, the court views all facts and inferences to be drawn from the pleadings in favor of the party against whom the motion is sought. *Harris v. City of New York*, 186 F.3d 243, 247 (2d Cir. 1999). Indeed, "[t]he issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 556 (2007) (citation omitted). Asking for plausible grounds to infer that something has occurred as alleged does not impose a probability requirement at the pleading stage. *Twombly*, 550 U.S. at 556 (footnote omitted). When there are well-pleaded factual allegations, a court should assume their veracity and then

determine whether they plausibly give rise to an entitlement to relief. *Ashcroft v. Iqbal*, 556 U.S. 662, 129 S. Ct. 1937, 1950 (2009) (citations omitted).

31. Chrysler Group contends that Plaintiffs' Second Amended Complaint should be dismissed because all of Plaintiffs' claims are barred by the Sale Order. The only issue to be addressed on Chrysler Group's Motion is whether the Sale Order prevents Plaintiffs from maintaining this action, not whether Plaintiffs will ultimately prevail on their claims. For the reasons set forth below, Chrysler Group's Motion should be denied and this case should be remanded to the Delaware Court.

A. The Sale Order Does Not Preclude Plaintiff's Claims Under the Lifetime Warranties Chrysler Group Issued in 2011 and 2012.

32. In the Second Amended Complaint, Plaintiffs allege that Chrysler Group has failed to live up to its obligations under the lifetime warranties it issued in 2011 and 2012. There is nothing in the Sale Order which would relieve Chrysler Group from liability for failing to fulfill the lifetime warranty commitments it made **after** the sale was concluded. To the contrary, Chrysler Group expressly assumed "any Liabilities arising as a result of the operation of the Company Business after the Closing." MTA § 2.08(1). As a result, Plaintiffs should be permitted to seek to enforce Chrysler Group's post-closing promises to Jeep Wrangler and Dodge Durango vehicle owners.

B. The Sale Order Does Not Bar Plaintiffs' Negligence Claims Based Upon Chrysler Group's Post-Closing Conduct.

33. Plaintiffs' Second Amended Complaint also contains negligence claims arising from Chrysler Group's post-sale conduct. Having issued the lifetime warranties in 2011 and 2012, Chrysler Group undertook the post-sale obligation to properly repair the fuel spit-back problem in the Jeep Wrangler and Dodge Durango vehicles. *See Circle Land & Cattle Corp. v.*

Amoco Oil, 232 Kan. 482, 657 P.2d 532, 537 (1983) ("The law imposes an obligation upon everyone who attempts to do anything, even gratuitously, for another, to exercise some degree of care and skill in the performance of what he has undertaken, for nonperformance of which an action lies"); *Standifer v. Pate*, 291 Ala. 434, 282 So. 2d 261, 263 (Ala. 1973) ("where one undertakes a duty requiring skill and care, reasonable care must be exercised in the performance thereof even though there may be no consideration given therefor"); *H.R. Moch Co. v. Rensselaer Water Co.*, 247 N.Y. 160, 167 (1928) ("It is ancient learning that one who assumes to act, even though gratuitously, may thereby become subject to the duty of acting carefully"); Restatement (Second) of Torts §§ 323 and 324A.

34. Further, a manufacturer has a duty to warn consumers of risks brought to the attention of the manufacturer after the product is sold. *Cover v. Cohen*, 61 N.Y.2d 261, 473 N.Y.S.2d 378 (1984) (finding triable question of fact as to duty to warn where GM issued TSB acknowledging that vehicles may exhibit erratic idle speed and slow return to idle).

35. "The responsibility to warn of known defects cannot be satisfied merely by alerting participating service centers. Because of the likelihood that a purchaser will have a product serviced by its own technicians or by an unaffiliated service center, or possibly not serviced at all, sellers must make reasonable attempts to warn the user or consumer directly." *Walton v. Avco Corp.*, 530 Pa. 568, 610 A.2d 454, 459 (1992).

36. An asset purchaser has an independent duty to warn when it has a continuing relationship with customers of the seller. *Patton v. TIC United Corp.*, 77 F.3d 1235, 1240 (10th Cir. 1996), *cert. denied* 578 U.S. 1005 (1996); *Florom v. Elliott Mfg*, 867 F.2d 570, 577 (10th Cir. 1989); Restatement (Third) of Torts: Products Liability, § 13.

37. The asset purchaser's "liability stems not from its status as a successor, but from the establishment of a relationship with the customer that imposes certain duties and responsibilities." *Polius v. Clark Equipment Co.*, 802 F.2d 75, 84 (3d Cir. 1986).

38. By issuing the TSBs relating to the fuel spit-back problem and the lifetime warranties in 2011 and 2012, and through its prior assumption of the product warranties for Chrysler vehicles in the MTA, Chrysler Group established its own post-closing relationship with the owners of Chrysler vehicles. As a result, Chrysler Group had a post-sale duty to warn Chrysler vehicle owners of the fuel spit-back problem. Since Chrysler Group's duty arose **after** the closing, the Sale Order does not preclude Plaintiffs' claims that Chrysler Group did not reasonably alert customers to the safety defect at issue and did not properly instruct owners to have their vehicles repaired. Second Amended Complaint ¶¶ 16 and 71.

39. Chrysler Group contends that Plaintiffs' negligence claims are precluded by the Sale Order because they are based on purported defects in vehicles manufactured and sold by the Debtors prior to the closing date.

40. Chrysler Group's argument fails because the negligence claims arise from the post-closing operation of the business, the Liabilities for which were expressly assumed by Chrysler Group. MTA § 2.08(l).

41. In addition, Chrysler Group's assertion should be rejected because a Section 363 "free and clear" sale order may not extinguish a claim against a purchaser relating to a product manufactured by the debtor before the sale if the plaintiff's injury was not suffered until after the closing. *In re Grumman Olson Industries, Inc.*, 467 B.R. 694 (S.D.N.Y. 2012). To do otherwise would deny Plaintiffs "due process and violate the Bankruptcy Code's requirements of notice and opportunity to be heard for those affected by a bankruptcy court's rulings." *Id.* at 711.

Plaintiffs could not have known, before the sale was approved, that Chrysler Group would after the closing negligently fail to warn Chrysler vehicle owners of the fuel spit-back problem and negligently fail to remediate the fuel spit-back problem. Consequently, Chrysler Group's Motion should be denied.

C. Chrysler Group Assumed the Debtors' Warranty Obligations.

42. Even if Chrysler Group had not issued its own lifetime warranties promising to fix the fuel spit-back problem, Chrysler Group would not be permitted to escape from its assumption of the Debtors' warranty obligations for Chrysler vehicles.

43. Under the Sale Order and MTA, Chrysler Group clearly and unequivocally agreed to assume "all Liabilities pursuant to product warranties, product returns and rebates on vehicles sold by Sellers prior to the Closing." MTA § 2.08(g).

44. Chrysler Group's specific assumption of the Debtors' warranty obligations was a critical part of the transaction.

45. When it filed for bankruptcy protection, the Debtors represented that "to preserve goodwill and the value of Chrysler's brands that are central to any going concern sale, Chrysler must continue to honor warranties and related obligations that directly impact the purchasers of Chrysler, Dodge and Jeep vehicles." Declaration of Ronald E. Kolka [Docket No. 23] ¶ 90. The Debtors advised the Court that "[a]ny indication that Chrysler will not honor its warranty and service contract obligations will cause a loss in consumer loyalty that would negatively and perhaps irreparably impact Chrysler's ability to consummate a Sale Transaction, to the significant detriment of its estates." *Id*. at ¶2 0.

46. As a result, when Chrysler announced the sale, Bob Nardelli, the Debtors' Chairman and CEO, assured the public in an open letter to customers that "The company will

seamlessly honor all warranty claims." A true and correct copy of the open letter is attached as Exhibit F.

47. In the motion seeking approval of the sale (the "Sale Motion") [Docket No. 190], the Debtors showcased that Chrysler Group was assuming:

- Liabilities for product warranties, product returns and rebates on vehicles sold pre-closing
- Warranty obligations and product recall liabilities related to vehicles sold pre-closing

Sale Motion at 26-27.

48. The Debtors' CFO (and later President) Ronald Kolka testified during the sale hearing that Chrysler Group "plans on paying the warranty claims." May 29, 2009 Hearing Transcript 160:10-13; true and correct copies of the pertinent pages of the May 29, 2009 Hearing Transcript are attached as Exhibit G.

49. After the sale closed, Chrysler Group touted to Senator Richard Durbin that it had assumed liability for warranty and lemon law claims:

> Today, Chrysler Group has a much better appreciation of the viability of our business than it did on June 10. As a result, we will announce today that the company will accept product liability claims on vehicles manufactured by Old Carco before June 10 that are involved in accidents on or after that date. **This is in addition to our previous commitment to honor warranty claims, lemon law claims and safety recalls regarding these vehicles**.

Chrysler Group letter to Senator Richard Durbin dated August 27, 2009 (emphasis added), a true and correct copy of which is attached as Exhibit H.

50. When he testified before Congress, Ronald Bloom of President Obama's Task Force on the Automotive Industry explained that Chrysler Group assumed the warranty claims to allow it to preserve its relationship with Chrysler customers:

> **The companies also decided to honor the warranty claims of prior owners of their cars. Why, because on a commercial basis, the last buyer of a GM or Chrysler car is the most likely candidate to be the next buyer.**

Transcript of July 21, 2009 the Hearing before the Subcommittee on Commercial and Administrative Law of the Committee on the Judiciary of the House of Representatives at 31 (emphasis added); true and correct copies of the pertinent pages of the transcript are attached as Exhibit I.

51. Under these circumstances, and given the clear language of § 2.08(g) of the MTA, it would be unjust and inequitable to permit Chrysler Group to now seek to evade the warranty obligations it specifically assumed.

52. Chrysler Group's reliance on the Bankruptcy Court's unreported Opinion in *Tulacro v. Chrysler Group, LLC,* Adv. No. 11-09401 (AJG), is misplaced. In that case, the plaintiffs asserted claims under California's Lemon Law for a vehicle that was purchased more than five years prior to the closing date and, therefore, outside of the Sale Order provision regarding Chrysler Group's assumption of Lemon Law claims. In the *Tulacro* Opinion, although the Bankruptcy Court determined that Chrysler Group was not responsible for the claims under California's Lemon Law, the Bankruptcy Court noted that under Section 2.08(g) of the MTA, Chrysler Group assumed the obligation to cover the costs of all parts and labor needed to repair defective items in connection with the warranty issued for the vehicle. *Tularco* Opinion at 6.

53. Chrysler Group's citation to the Bankruptcy Court's oral opinion in *Tatum v. Chrysler Group, LLC,* United States Bankruptcy Court for the Southern District of New York, Adv. No. 11-09411(AJG), is equally misguided. In that case, the Bankruptcy Court concluded that the plaintiff's New Jersey Consumer Fraud Act claim was barred by the Sale Order. However, in its oral ruling, the Bankruptcy Court explained that that Chrysler Group had

assumed the responsibility for parts and labor costs for repairing vehicles in connection with the vehicle warranties. Tr. at 26-27. True and correct copies of the pertinent pages of the February 14, 2012, 2009 Hearing Transcript are attached as Exhibit J.

54. Indeed, in *Tatum*, Chrysler Group acknowledged that the plaintiffs' breach of warranty claims with regard to a braking defect in model-year 2009 and 2010 Dodge Journey vehicles were not precluded by the Sale Order. Although the plaintiffs' New Jersey Consumer Fraud Act claims were transferred to the Bankruptcy Court for a determination as to whether they were barred by the Sale Order, the United States District Court for the District of New Jersey denied Chrysler Group's venue transfer motion as to the plaintiffs' breach of warranty claims. In her Report and Recommendation on the venue transfer motion, which was adopted by the district court, the Magistrate Judge explained:

> The Court does not believe it appropriate to transfer Counts II-IV to the Bankruptcy Court because the remaining claims do not relate to the pending bankruptcy proceeding…These claims implicate no assumed liability issues. Instead, these claims focus exclusively on breach of warranty claims or rely entirely on allegations related to Chrysler's post-bankruptcy conduct. To that end, Chrysler conceded and stipulated on the record that it assumed the liabilities associated with breach of warranty claims arising out of the alleged defects in the vehicles at issue.

Tatum v. Chrysler Group, LLC, 2011 U.S. Dist. LEXIS 113503 at * 15 (D.N.J. Oct. 3, 2011), *adopted by Tatum v. Chrysler Group*, LLC, 2011 U.S. Dist. LEXIS 144831 (D.N.J. Dec. 16, 2011).

55. In this case, Plaintiffs are seeking to enforce Chrysler Group's warranty obligations. This is not a products liability action. Plaintiffs do not seek to recover for personal injury damages. Rather, Plaintiffs seek injunctive relief and recovery of repair costs for violation of express and implied warranties applicable to Chrysler vehicles owned by Plaintiffs. Since

Chrysler Group assumed the Debtors' warranty obligations, Chrysler Group's motion to dismiss should be denied.

D. Chrysler Group Is Responsible For Payment of Lemon Law Claims.

56. Plaintiffs' breach of express and implied warranty claims, and the facts set forth in the Second Amended Complaint, also constitute "Lemon Law" claims, the responsibility for payment for which Chrysler Group assumed in ¶ 19 of the Sale Order.

57. Chrysler Group contends that Plaintiffs' claims for breach of express and implied warranties are not protected by ¶ 19 of the Sale Order because Plaintiffs do not identify any federal or state statutes in the Second Amended Complaint. Chrysler Group's argument is belied by its previous admissions.

58. In *Burton v. Chrysler Group, LLC*, United States District Court for the District of South Carolina, Civil Action No. 8:10-CV-00209-JMC, Chrysler Group acknowledged that: (a) breach of express and implied warranty claims were assumed by Chrysler Group in ¶ 19 of the Sale Order; and (b) such claims are not dependent upon proving a violation of any particular statute. In that case, the plaintiffs, individually and on behalf of a putative class, asserted that there are certain defects in model-year 2007 through 2009 Dodge Ram vehicles and pled claims against Chrysler Group for breach of express and implied warranties. Chrysler Group stipulated as follows:

> Chrysler Group acknowledges and agrees that, under Paragraph 19 of the Sale Order, it assumed the liabilities associated with claims for breach of express warranty and breach of implied warranty for model-year 2007 through 2009 Dodge Ram vehicles equipped with a 6.7 liter Cummins engine, ***except for those liabilities associated with personal injuries and/or punitive, exemplary, special, consequential or multiple damages or penalties***. Chrysler Group acknowledges that its assumption of these liabilities associated with breach of express warranty claims and breach of implied warranty claims is not dependent on a plaintiff/claimant alleging or

> proving facts which would meet the standards of any applicable "Lemon Law."

Consent Motion and Stipulation of Parties Regarding Filing of Second Amended Complaint and Assumed Liabilities dated May 11, 2011 ¶ 2, a true and correct copy of which is attached as Exhibit K (emphasis in original).

59. Furthermore, "[d]ismissal without leave to amend is improper unless it is clear that the complaint could not be saved by further amendment." *See O'Brien v. U.S.*, 73 Fed. Appx. 958, 959 (9th Cir. 2003).

60. Accordingly, to the extent that the Court determines that Plaintiffs are required to identify each state statute violated by Chrysler Group, Plaintiffs should be afforded an opportunity to amend their pleadings to do so. *Baptiste v. Cavendish Club, Inc.*, 670 F.Supp. 108 (S.D.N.Y. 1987) (denying motion to dismiss and granting motion to file amended complaint to state claim under 42 U.S.C. § 1981).[1]

61. Chrysler Group also now asserts that Plaintiffs' breach of express and implied warranty claims should be dismissed because Plaintiffs seek to recover consequential damages, which are not permitted under ¶ 19 of the Sale Order. The only "consequential damages" that Plaintiffs seek are damages for the loss of use of the vehicles while they are being repaired. To the extent that such damages are not covered by ¶ 19 of the Sale Order or otherwise recoverable, only the consequential damages claims would be subject to dismissal, not Plaintiffs' claims for repair and component part replacement costs or injunctive relief.

---

[1] There would be no prejudice to Chrysler Group from permitting Plaintiffs to amend their pleading because the Transfer Order already contemplates Plaintiffs filing a Third Amended Complaint after the case is transferred back to the Delaware Court. Transfer Order ¶ 4.

E. The Sale Order Does Not Impact Claims Relating to Vehicles Manufactured After the Sale.

62. Even if the provisions of the Sale Order and MTA relating to products liability claims, rather than Chrysler Group's clear and unequivocal assumption of Debtors' warranty obligations, were applicable, the Second Amended Complaint includes claims which would not be precluded. For example, the Second Amended Complaint also includes claims relating to model year 2009 and 2010 Jeep Wrangler vehicles which would not have even been manufactured until after the closing date.[2]

F. The Sale Order Does Not Extinguish Future Claims

63. The Sale Order would also not bar claims with respect to fuel spit-back problems, not manifesting themselves until after the sale closing.

64. As set forth above, the MTA was modified to cover "future" claims arising from post-closing accidents involving vehicles manufactured before the closing date.

65. A sale free and clear under 11 U.S.C. § 363(f) does not bar the claims arising after the sale by defective product manufactured prior to the sale under a successor liability or other

---

[2] Chrysler Group asserts that the named Plaintiffs do not have standing to bring claims for model year 2009 and 2010 vehicles because they do not own model year 2009 or 2010 vehicles. This is an argument on the merits of Plaintiffs' request for class certification which is not to be adjudicated in the context of this Motion. Nevertheless, Chrysler Group is wrong. The Plaintiffs have standing because the vehicles all have the same fuel spit-back problem. There is no requirement that there be at least one named plaintiff owner for each model vehicle. *See Wolin v. Jaguar Land Rover North America*, LLC, 617 F.3d 1168 (9th Cir. 2010) (class certification granted where named plaintiffs owned model year 2005 Land Rover LR3s and class included owners and lessees of 2004, 2005 or 2006 Land Rover LR3s); *Daffin v. Ford Motor Co.*, 458 F.3d 549 (6th Cir. 2006) (named plaintiff owned 1999 Mercury Villager minivan and certified class included all 1999 or 2000 Mercury Villager owners and lessees).

theory. *In re Grumman Olson Industries, Inc.*, 445 B.R. 243 (Bankr. S.D.N.Y. 2011), *affirmed* 467 B.R. 694 (S.D.N.Y. 2012). As the Bankruptcy Court explained in *Grumman*:

> [The plaintiffs] could not have identified as potential creditors prior to the sale or received adequate notice of the case, the sale, the confirmation or the deadline for filing a proof of claim. Even if the [plaintiffs] knew about the case, the knowledge would be meaningless and it would be nothing for them to do. They could not file a claim based on an accident that occurred years later.

Id. at 254.

66. Consequently, the Sale Order does not bar the claims of any class member against Chrysler Group, based upon a successor liability theory or otherwise, where the fuel spit-back problem did not manifest itself until after the closing date or the class member did not receive adequate notice of the bankruptcy.

CONCLUSION

67. For these reasons, Plaintiffs respectfully request that the Court enter an Order denying Chrysler Group's Motion and for such other and further relief as the Court deems just and equitable.

Exhibit A

IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF DELAWARE

AUTUMN BURTON, MATTHEW COX, RODNEY LaFLEUR, DAN GULICK JAMES SPITLER, MIKE BURKE, MIKE GASMAN, ERIC MALLOY and RYAN GILLETTE individually and in their representative capacity for all others similarly situated,	:	CLASS ACTION
Plaintiffs,	:	Case No. 12-cv-00005 LPS
vs.	:	
CHRYSLER GROUP LLC,	:	
Defendant.	:	

CLASS ACTION SECOND AMENDED COMPLAINT

The Plaintiffs, Autumn Burton, Matthew Cox, Rodney LaFleur, Dan Gulick, James Spitler, Mike Burke, Mike Gasman, Eric Malloy and Ryan Gillette individually and on behalf of all others similarly situated, sue the Defendant Chrysler Group, LLC (referred to as Chrysler) and state as follows:

NATURE OF THE ACTION

1. This is an action seeking compensation and injunctive relief requiring the repair ~~remedial repairs~~ of a dangerous and defective condition in Plaintiffs' Chrysler vehicles. This action seeks remedial repairs of all vehicle models similarly situated, thus requesting that the case be certified as a Class Action.

2. Each of the named Plaintiffs own a Chrysler product which has a design flaw that causes fuel to spill out of the filler tube during refueling. This problem has been referenced as a "fuel spit-back problem."

3. Based upon information and belief, it is alleged that beginning in the fall of 2001, the ~~defendant~~ owners of some Chrysler products began ~~receiving field reports of customers~~ complaining of fuel spit back in certain ~~Chrysler products~~ vehicle models. As a result of these complaints, ~~Chrysler admitted that this problem constituted~~ a safety defect ~~and agreed to a product~~ recall occurred in 2002.

4. In 2005, ~~the defendant conducted~~ a second safety recall of Chrysler vehicles ~~for the same type "fuel spit back problem"~~ took place for 2005 MY Durango vehicles having "fuel spit back problems".

5. Based upon information and belief, in February of 2007, ~~Chrysler began receiving~~ a rising number of ~~field complaints of~~ customers' complaints about "fuel spit back problems" in other ~~products, including the~~ model year Jeep ~~Wrangler, that were experiencing "fuel spit back problems"~~ Wranglers.

6. In January 2009, ~~the Defendant conducted~~ a further safety recall ~~of~~ was issued involving other Durango model vehicles because of ~~the safety problem created in 2005 MY Durangos with~~ "fuel spit back problems".

7. In September, 2009, defendant Chrysler published and sent a Technical Service Bulletin ~~sent~~ to its dealership network advising them that consumers were continuing to experience "fuel spit back problems", and ~~voicing complaints about refueling, and advising~~ the defendant advised dealerships on various repair steps that may be required if a customer brings in his or her Chrysler product with this ~~type~~ complaint.

8. In August, 2010, the National Highway Traffic Safety Administration opened an investigation regarding complaints of "fuel spit back problems" in 2007 and 2008 Jeep Wranglers. In communications with the Defendant, ~~the~~ NHTSA advised Chrysler that the same "fuel spit back problems" currently being investigated for 2007-2008 MY Wranglers were previously ~~received by the owners of~~ found in 2005 and 2006 Jeep Wranglers.

9. In response to the NHTSA communications in August, 2010, the Chrysler defendant admitted that the 2005 through 2010 Jeep Wrangler model vehicles ~~include~~ included the same or similar fuel system components, including the fuel tank assembly and inlet check valve. Additionally, the Chrysler defendant admitted that the 2005 through 2008 Durango model vehicles were appropriate peer vehicles with the same or similar fuel tank assembly and inlet check valve.

10. In its response to the NHTSA inquiry of August 2010, the Chrysler defendant admitted that there were 542,650 Jeep Wranglers with the same or similar fuel system assembly and inlet check valve. ~~Further, in this same response,~~ And, the defendant Chrysler admitted there were 266,315 Durangos with the same or similar fuel system assembly and inlet check valve.

11. On February 11, 2011, the defendant issued and then delivered to its dealership network a Technical Service Bulletin granting a lifetime warranty to the owners of (approximately 135,000 vehicles) 2007 to 2008 Jeep Wranglers ~~only~~. This warranty allowed for the repair and replacement of certain components if and when a customer complained of a "fuel spit-back problem". This TSB (referenced as Chrysler TSB 140001-11) was not a safety recall, it did not advise the owners of these vehicles that their vehicles contained a flaw or safety defect, and it did not appropriately notify current owners of the aforesaid hazard. This TSB

merely authorized Chrysler dealerships to inspect and repair ~~a limited number of~~ these Jeep Wranglers ~~that are brought~~ if an owner should happen to bring the vehicle into a dealership ~~with~~ complaining of "fuel spit back problems".

12. Despite the Defendant's awareness that the "fuel spit back problem" continued to exist in Jeep Wranglers for model years 2005 through 2010 and Durangos for model years 2005-2008, and despite the ~~Defendant's~~ earlier ~~admission~~ recognition that this refueling problem constituted a safety defect, the defendant ~~turned a blind eye~~ failed to ~~this issue. The Defendant, recognizing its duty~~ take necessary steps to rectify this ~~hazard, carelessly and wrongfully decided on February 11, 2011 to issue a silent recall (herein referenced as a TSB) for a limited number of the Wranglers and no Durango vehicles which contain this hazard. This negligent misconduct constituted an inadequate response to a continuing safety issue.~~ problem.

13. On February 11, 2011, the Defendant initiated a woefully inadequate procedure for the repair of ~~all~~ certain Jeep Wranglers ~~and Durangos~~ containing the same or similar hazards as those which were the subject of the aforementioned TSB.

14. ~~The~~ In 2011, the Defendant failed to conduct a proper ~~recall~~ and/~~or~~ necessary remedial program to remedy all Jeep Wranglers and Durangos containing the defective design that is responsible for the "fuel spit back problem".

15. In January 2012, the defendant sent a letter to the owners of certain Dodge Durangos advising them that because of the "fuel spit-back problem" these vehicles would now have a lifetime warranty for certain fuel system parts. And, in the event that their vehicle developed the problem, a Chrysler dealership would repair it.

16. The January, 2012 letter did not reasonably alert customers to the safety defect at issue and did not properly and reasonably instruct owners to have their vehicles repaired.

17. The Defendant is liable to the Plaintiffs and all other similarly situated Plaintiffs for the ~~defective design that causes~~ "fuel spit back problems" and because of its negligence, carelessness and other misconduct in initiating inadequate remedial action in 2011 and 2012 to rectify this hazard. This liability is not predicated upon the assumption of any legal duty that arose in the Bankruptcy Court.

18. The vehicle models identified below contain safety hazards, which result in the breach of applicable warranties.

19. The 2005 through 2010 Jeep Wranglers and 2005 through 2008 Dodge Durangos all have, according to the Defendant, and upon information and belief, the same or similar design defect that produces "fuel spit back problems."

20. The defendant Chrysler has sold 2009 and 2010 Jeep Wranglers after the Bankruptcy closing date that contain a design flaw that produces "fuel spit back problems". The design flaw in these vehicles is the same or similar to those Wranglers that are the subject of the aforementioned TSB. This design flaw has caused property damage or the loss of property, as well as the loss of value bargained for by the Plaintiffs.

21. The aforementioned defect has manifested itself in each of the Plaintiffs' vehicles, causing fuel to spill out while refueling. This spillage causes a monetary loss and it poses a potential health and safety hazard.

22. In the Bankruptcy proceedings, the defendant Chrysler did assume responsibility for the breach of product warranties (including but not limited to breach of implied warranties of merchantability, implied warranty of fitness for a particular purpose, and violation of other

consumer state laws for the marketing of unsafe products) extending back to vehicles sold five years prior to the Bankruptcy Closing date (e.g., 2004 model year vehicles) for products manufactured and sold by its predecessor.

23. The product models for which breach of warranty claims are asserted are identified below.

JURISDICTION AND VENUE

24. This Court has jurisdiction over this action predicated upon CAFA, because the ~~defendant is incorporated in~~ parties are diverse and the ~~State~~ plaintiffs number more than 100 and the claim for damages exceeds $5,000,000.00 exclusive of ~~Delaware. Defendant Chrysler's registered agent is Corporation Trust Company located at 1209 Orange Street, Wilmington, Delaware, 19801.~~ costs and attorneys fees and interest.

25. The Defendant has marketed and sold Jeep Wranglers and Dodge Durangos in the State of Delaware and the County of New Castle.

PARTIES

26. Plaintiff Autumn Burton resides in Memphis, Tennessee. In October, 2008, she purchased and currently owns a 2006 Dodge Durango [VIN 1D4HB48N86F164206]. Plaintiff has in the past and she continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. Plaintiff Burton was given/received express and/or implied warranties when she purchased the Durango. In January, 2012, Plaintiff Burton received from the defendant Chrysler an extended life time warranty regarding the components at issue. The defects in her vehicle and resulting "fuel spit-back problems" constitute a breach of warranties as described below.

27. Plaintiff Matthew Cox resides in Westminster, Colorado. In March, 2011, he purchased and currently owns a 2005 Jeep Wrangler [VIN 1JFA64S25P357114]. Plaintiff has in the past

and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. On March 30, 2011, Plaintiff Cox sent a notice to the National Highway Traffic Safety Administration and/or the defendant Chrysler notifying them of the defect in question. This defect in the product constitutes a breach of applicable warranties as set forth below.

28. Plaintiff Dan Gulick resides in Penn Yan, New York. In October, 2009, Mr. Gulick purchased and he currently owns a 2005 Jeep Wrangler [VIN 1JFA49S150342567]. Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. Plaintiff Gulick sent a notice to the National Highway Traffic Safety Administration and/or the defendant Chrysler notifying them of the defect in question. This defect in the product constitutes a breach of applicable warranties as set forth below.

29. Plaintiff Rodney LaFleur resides in Chicago, Illinois. In 2009, Mr. LaFleur purchased and currently owns a 2005 Jeep Wrangler [VIN 1J4FA44S25P320052]. The Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. Plaintiff LaFleur sent a notice to the National Highway Traffic Safety Administration and/or the defendant Chrysler notifying them of the defect in question. This defect in the product constitutes a breach of applicable warranties as set forth below.

30. Plaintiff James Spitler resides in Camden, North Carolina. In 2009, Mr. Spitler purchased and continues to own a 2006 Jeep Wrangler [VIN 1J4FA64SX6P762994]. The Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. This

defect in the product constitutes a breach of applicable warranties as set forth below. Plaintiff Spitler notified the defendant of this defect before filing this lawsuit.

31. Plaintiff Mike Burke resides in Wesley Chapel, Florida. Mr. Burke purchased and continues to own a 2007 Jeep Wrangler [VIN 1JFA49S46P750210]. The Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. This vehicle and the parts at issue have a lifetime warranty. This defect constitutes a breach of warranties as described below. The 2007 Wrangler has the same design flaws as the 2008 through 2010 Jeep Wranglers.

32. Plaintiff Eric Malloy resides in Fort Hood, Texas. Mr. Malloy purchased and continues to own a 2005 Dodge Durango [VIN 1J4FA64595P386741]. The Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. Plaintiff Malloy provided notice to Chrysler of the defects in his vehicle. These defects constitute a breach of applicable warranties as described below.

33. Plaintiff Mike Gasman resides in Appleton, Wisconsin. Mr. Gasman purchased and continues to own a 2005 Jeep Wrangler [VIN 1D4HB58D85F592207]. The Plaintiff has in the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. Plaintiff Gasman notified NHTSA/Chrysler of the defects in his vehicle. These defects constitute a breach of applicable warranties as described below.

34. Plaintiff Ryan Gillette resides in Robertsville, Missouri. Mr. Gillette purchased and continues to own a 2005 Jeep Wrangler [VIN 1J4FA39S15P376518]. The Plaintiff has in

the past and he continues to experience "fuel spit back problems" with this vehicle. This problem has caused the loss of fuel and it poses a potential health and safety risk. The defendant Chrysler was fully aware of the defect in this model vehicle. These defects constitute a breach of applicable warranties as described below.

35. Defendant Chrysler Group LLC is a limited liability company incorporated in the ~~state~~ State of Delaware.

CLASS ACTION ALLEGATIONS

36. This action seeks to establish a nationwide class against the named Defendant for negligence and breaches of warranties ~~other wrongful conduct~~ alleged in this Complaint.

37. Certification under Rule 23(b) of the ~~Del. Super. Ct. R. Civ. P.~~ Federal Rules of Civil Procedure is proper.

38. The Plaintiffs and the Class seek injunctive relief, and compensatory and incidental damages in ~~the~~ an amount determined that is for the cost/value of the repair and replacement of necessary components in each Jeep Wrangler and Dodge Durango, and any loss of the use of the vehicle, and if the condition cannot be rectified then a loss of the value of the vehicle due to the continuing loss of fuel for each class member for the Defendant's wrongful conduct as alleged herein.

39. Plaintiffs seek certification of a nationwide class against the named Defendant with the class consisting of the following:

a. "All current owners of Jeep Wranglers, model years 2005 through 2010 which include the design features responsible for the "fuel spit back problem" and which have not been corrected ~~recalled~~ or repaired in the past".

b. "All current owners of Dodge Durangos, model years 2005 through 2008 which include the design features responsible for the "fuel spit back problem" and which have not been corrected ~~recalled~~ or repaired in the past."

40. The class is further defined as follows: "The person does not have a pending action against the Defendant, on the Date of the Court's certification order, any individual action where in the recovery sought is based in whole or in part on the type of claims asserted herein, or has previously had his or her vehicle recalled or otherwise repaired to correct the safety hazard described herein." Further, "the class members do not include those who own vehicles sold before the Bankrutpcy Sale Order date that are not subject to the assumption of warranty liabilities set forth in Paragraph 19 of the Sale Order".

41. The class is further defined into the following sub-classes:

a. All Jeep Wrangler products marketed by the defendant after the Closing Date of the Bankruptcy and which contain the defect that has or will cause the "fuel spit back problem" and have not been repaired (e.g., 2009 and 2010 model year vehicles).

b. All Jeep Wrangler products containing the defect in question and to which warranties described below were existent on the Closing Date of the Bankruptcy (eg., 2005 to 2009 model year vehicles), exclusive of those referenced in ¶ 42 a.)

c. All Dodge Durango products containing the defect described and to which warranties described below were existent on the Closing date of the Bankruptcy (2005 to 2009 models), exclusive of those 2006-2008 models that were the subject of the aforementioned TSB.

d. All Dodge Durango vehicles that obtained a lifetime warranty via the January 20, 2012 letter issued by the defendant and which contain the defect described and which have not been remedied.

e. All 2007-2008 Jeep Wranglers that obtained a lifetime warranty via the February 2011 TSB issued by the defendant to repair these model vehicles which contain defects causing the "fuel spit-back problem" and which have not been remedied.

f. All Dodge Durango 2005 to 2008 model years that include the same or similar fuel system which has led to the "fuel spit-back problem" and which have not been repaired and which no longer have viable warranties, but have the defect in question, exclusive of those models that are the subject of the aforementioned TSB;

g. All Jeep Wranglers 2005 to 2010 model years that include the same or similar fuel system which has led to the "fuel spit-back problem" and which have not been repaired and which no longer have viable warranties, but have the defect in question, exclusive of those model years that are the subject of the aforementioned TSB.

42. Rule 23(a) and Rule 23(b), requirements are met because:

a. Plaintiffs estimate that the proposed class ~~consists~~ and sub-classes consist of hundreds of thousands of Jeep Wrangler and Dodge Durango owners throughout the United States, and joinder of all members in this action is impracticable.

b. There are questions of law and fact common to the class.

c. The common questions predominate over any questions affecting only individual members.

d. The named Plaintiffs are adequate representatives of the class and sub-classes. The claims of the Plaintiffs as class representative are typical of those of the class

members in that they were subjected to the same unlawful treatment, and the named Plaintiffs suffered the same type harm as suffered by other members of the class. The class representatives will vigorously pursue the claims on behalf of the class, and will fairly and adequately protect the interests of the class. Plaintiffs' counsel is experienced and professionally able to properly represent the class.

e. The claims of the representative parties are typical of the claims of each member of the class, and are based on or arise out of similar facts constituting the wrongful conduct of the Defendant.

f. A class action is far superior to any other available method for the fair and efficient adjudication of this controversy.

43. Prerequisites to a Class Action – ~~Del~~ Fed. R. Civ. P. 23(a) and Fed. R. Civ. P.23(b)(2). The prerequisites to maintaining this action as a Class action are satisfied in this case as alleged below.

a. Numerosity, on information and belief, there are hundreds of thousands of Jeep Wranglers and Dodge Durangos with the aforementioned safety defect that has not been repaired.

b. Because Defendant has exclusive control of such information, the Plaintiffs reserve the right to amend their allegations following completion of discovery. Given the scope of the Defendant's business, it is clear that the members of the Class are so numerous that joinder is impracticable and the disposition of their claims in a Class action will provide substantial benefits to the parties and the Court.

c. Commonality – Since the Plaintiffs and other members of the Class all own 2005 through 2010 Jeep Wranglers or 2005 through 2008 Dodge Durangos that include

the same or similar fuel system design, and they all suffer from the same hazardous "fuel spit back problem," there are questions of law and fact common to the Class. Such common questions of law and fact predominate over any individual questions affecting Class members.

d. Typicality – Named Plaintiffs have the same interests in this matter as all the other members of the Class, and their claims are typical of all members of the Class. The named Plaintiffs' claims are typical of the claims of all Class members because the claims originate from the same design features.

e. Adequacy of Representation – Plaintiffs' claims are aligned with the interests of the absent members of the Class such that the Class claims will be prosecuted with diligence and care by Plaintiffs as representatives of the Class. Plaintiffs are committed to pursuing this action and have retained competent counsel experienced in the prosecution and successful resolution of Class litigation. Plaintiffs will fairly and adequately represent the interests of the Class and do not have interests adverse to the Class. Plaintiffs' interests are antagonistic to the interests of the Defendant and Plaintiffs will vigorously pursue the claims of the Class.

f. Class Actions Maintainable –Class action status is also appropriate because the common question of law and fact identified above predominate over questions affecting only individual members. A Class action is superior to other available methods for the fair and efficient adjudication of this litigation. It is desirable to concentrate the litigation of the claims in this Court. Plaintiffs and their counsel do not anticipate encountering any unique difficulties in the management of this action as a Class action.

g. Injunctive relief is necessitated because of the defendant's refusal to act in accordance with the allegations set forth herein.

COUNT I ~~: NEGLIGENCE~~

NEGLIGENCE REGARDING POST-CLOSING DATE PRODUCTS.

44. Plaintiffs adopt and incorporate by reference all prior paragraphs of this Complaint as if fully set forth herein.

45. The Defendant has in the past acknowledged the inherent dangers associated with "fuel spit back" in its Jeep Wranglers and Dodge Durangos.

46. The Defendant accepted its duty to rectify the "fuel spit back" problem ~~on several occasions in the past by conducting safety recalls.~~ by issuing Technical Service Bulletins.

47. On February 11, 2011, the Defendant ~~again acknowledged the hazards associated with "fuel spit back" and~~ initiated a silent recall known as a Technical Service Bulletin (TSB) for a limited number of Jeep Wranglers ~~that were at that time past the warranty period for repairs and none of the relevant Dodge Durangos.~~, but that action did not include Wranglers sold after the Closing date and which contain the defect in question. These 2009-2010 products contain the defect in question and the failure to remedy this defect in those vehicles constitutes actionable negligence.

48. The defendant Chrysler's action on February 11, 2011 was a careless and negligent effort to rectify known hazards in Jeep Wrangler ~~and Dodge Durango model~~ vehicles.

49. The defendant's action on February 11, 2011 failed to rectify known defects in Jeep Wranglers it sold in calendar years 2009 and 2010. The TSB issued on February 11, 2011 did not provide reasonable notice to the owners of these vehicles. These products remain unsafe and/or have defects constituting a breach of warranty as described below.

50. As a result of this negligence, the defendant is liable to those owners of Jeep Wranglers sold in 2009 and 2010 by the defendant and containing the defect in question and which have not been repaired.

COUNT II

NEGLIGENCE REGARDING JEEP WRANGLERS THAT THE DEFENDANT CHOSE TO REPAIR BUT FAILED TO DO SO CAREFULLY

51. The TSB issued by the defendant on February 11, 2011 was intended to repair some Jeep Wrangler model vehicles (2007-2008) that were sold by its predecessor. In doing so, the defendant assumed a duty toward the owners of these vehicles. Nevertheless, the defendant's action did not reasonably notify the ~~public~~ owners of the aforementioned Wranglers of the "fuel spit back problem" nor did it reasonably and carefully advise that the repair of this problem should promptly take place.

52. The Defendant's ~~actions~~ action on February 11, 2011 occurred because of ~~its~~ a duty to rectify known dangers associated with these vehicles.

53. The Defendant was negligent in its ~~vehicles~~ voluntary undertaking to repair the Jeep Wrangler models in question.

54. ~~The TSB was~~ The Defendant's negligent undertaking has failed to rectify a known defect and these Jeep Wranglers remain defective as described above. This conduct has caused the harm as described above.

COUNT III

NEGLIGENCE RELATED TO A GRATUITOUS UNDERTAKING AS TO ALL DODGE DURANGOS SUBJECT TO THE TECHNICAL SERVICE BULLETIN ISSUED IN JANUARY 20, 2012.

55. The Plaintiffs incorporate by reference all of the foregoing paragraphs as if they were set forth at length herein.

56. On January 20, 2012, the defendant issued a TSB and then on January 25, 2012, the defendant sent a letter to the owners of Dodge Durangos, model years 2006 to 2008, advising that these vehicles may require the replacement of portions of their fuel system because of a defect causing "fuel spit-back problems", and providing these owners with a life-time warranty to obtain certain repairs for this defect. That letter, which constituted an admission, did not provide for appropriate and necessary measures to remedy the defect or provide for the reimbursement of costs associated with this breach.

57. Further this notification in January, 2012 was an inadequate remedial measure, constituting negligence on the part of the defendant in failing to take appropriate action to correct flaws in these vehicles.

58. These omissions constitute negligence which is the proximate cause of damages suffered by the owners of these Dodge Durangos.

COUNT IV

NEGLIGENCE AS TO ALL APPLICABLE JEEP WRANGLERS SUBJECT TO THE FEBRUARY 11, 2011 TECHNICAL SERVICE BULLETIN

59. The plaintiffs incorporate by reference all the paragraphs set forth above as though they were fully set forth herein.

60. On February 11, 2011, the defendant issued a TSB extending to the owners of 2007-2008 Jeep Wranglers a lifetime warranty to remedy the defect causing fuel spit back, but it failed to reasonably and effectively notify all owners or to provide for effective remedies of this safety defect. This TSB was inadequate to remedy the defect and constitutes negligence on the part of the defendant in failing to take appropriate action to correct flaws in these vehicles.

61. Further this TSB was an inadequate remedial measure, constituting negligence on the part of the defendant in failing to take appropriate action to correct flaws in these vehicles.

62. That TSB, which constituted an admission, did not provide for appropriate and necessary measures to remedy the defect or provide for the reimbursement of costs associated with this breach.

63. These omissions constitute negligence and the proximate cause of damages suffered by the owners of these Jeep Wranglers.

COUNT V

GENERAL NEGLIGENCE CLAIM BASED UPON THE DEFENDANT'S GRATUITOUS/VOLUNTARY EXTENSION OF WARRANTIES TO SOME BUT NOT ALL APPLICABLE JEEP WRANGLERS AND DODGE DURANGOS

64. The Plaintiffs incorporate by reference herein all of the foregoing relevant allegations as if they were set forth at length herein.

65. The several referenced TSBs were limited in scope and did not ~~attempt to~~ notify all owners of the inherent ~~flaw~~ flaws in the fuel system of all Jeep Wranglers marketed between 2005 and 2010 and Dodge Durangos marketed between 2005 and 2008.

66. This Count of negligence relates to those Jeep Wrangler and Dodge Durango model years that are not the subject of the Technical Service bulletins issued by the defendant on February 11, 2011 and January 20, 2012.

67. Because the Defendant did, on February 11, 2011 and January 20, 2012, gratuitously elect to rectify a hazardous condition ~~in certain model Jeep Wranglers~~ that it knew existed in some but not all 2005 through 2010 Jeep Wranglers and 2005 through 2008 Dodge Durangos, ~~its failure to carefully undertake this task~~ this omission constitutes actionable negligence and

established establishes the accrual of a cause of action — i.e., the running of the negligence statute of limitations as to these vehicles began on February 11, 2011.

68. The 2005 through 2010 Jeep Wranglers and 2005 through 2008 Dodge Durangos all have, according to the Defendant and upon information and belief, the same design defect that produces "fuel spit back problems." This defect has manifested itself by causing fuel to spill out while refueling. This spillage causes a monetary loss and it continues to pose a potential health and safety hazard. The Defendant has, in its prior action, acknowledged the appropriate repairs that are needed to eliminate the defect and the "fuel spit back problem."

69. The Defendant assumedThe Defendant has a duty to the owners of Jeep Wranglers and Dodge Durangos to keep abreast of performance problems that arise in association with the use of all relevant Jeep Wranglers and Dodge Durangos.

70. The Defendant assumed a duty to take necessary action to repair or otherwise correct flaws that materialize in its vehicles have materialized in the model year Jeep Wranglers and Dodge Durangos identified above, but then it negligently selected to limit its extension of warranties and limit its notification to the owners of these vehicle models to obtain remedial repairs to eliminate the defect in question.

71. The Defendant was generally careless and negligent in breaching the duty of due care it assumed for owed to the benefit owners of the Plaintiffs and class members, all relevant vehicle models both generally and in the following particular respects:

a. Failing to properly and adequately warn of the hazards associated with "fuel spit back problems;"

b. Failing to conduct a full and complete repair of all Jeep Wranglers and Dodge Durangos ~~that~~ which were designed and included the same features that are the cause of "fuel spit back problems;"

c. Conducting a silent recall without alerting all owners of 2005 to 2010 Jeep Wranglers and all owners of 2005 through 2008 Dodge Durangos of the "fuel spit back problems" and failing to provide corrective action for all such vehicles;

d. Conducting an inadequate and incomplete notification to owners of the need to repair all 2005 to 2010 Jeep Wranglers and 2005 through 2008 Dodge Durangos to eliminate the "fuel spit back problem;"

e. Failing to carefully carry out proper and reasonable remedial remedies to eliminate the hazards and safety issues and loss of fuel associated with "fuel spit back problems" in the 2005 through 2010 Jeep Wranglers and 2005 through 2008 Dodge Durangos; and,

f. Other acts of negligence and carelessness that may materialize during the pendency of this action.

COUNT VI

BREACH OF WARRANTIES REGARDING ALL APPLICABLE VEHICLES

72. The Plaintiffs incorporate by reference all the foregoing paragraphs as set forth herein at length.

73. The defendant Chrysler assumed liabilities associated with claims for breach of express and implied warranties for model year 2005 through 2009 Jeep Wranglers and 2005 through 2008 Dodge Durangos except for those liabilities associated with personal injuries or other damage claims that are not asserted herein.

74. The vehicles in question were sold and delivered with implied warranties of merchantability.

75. As described below, these vehicles have defects that constitute material breaches of these implied warranties of merchantability.

76. The defendant has received reasonable notice of the breach of warranties described herein.

77. The vehicles in question were sold with implied warranties of merchantability that included, but are not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's components will function as intended.

78. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

79. The "fuel spit-back problems" constitute a breach of implied warranties of merchantability.

80. This breach has caused damages both direct and indirect including consequential damages.

81. The vehicle models in question were sold with an implied warranty of fitness for a particular purpose.

82. As described below, these vehicles have defects that constitute material breaches of this implied warranty of fitness of a particular purpose.

83. The defendant has received reasonable notice of the breach of warranty described herein.

84. The vehicles in question were sold with implied warranty of fitness for a particular purpose that included, but is not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's fuel system components would function as intended and provide a safe storage facility for fuel.

85. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

86. The "fuel spit-back problems" constitute a breach of implied warranty of fairness for a particular purpose.

87. This breach has caused damages both direct and indirect including consequential damages.

COUNT VII

BREACH OF WARRANTIES REGARDING JEEP WRANGLERS 2009-2010 MODEL YEARS

88. The plaintiffs incorporate by reference here all the foregoing paragraphs as if they were set forth herein.

89. The vehicles in question were sold and delivered with implied warranties of merchantability.

90. As described herein, these vehicles have defects that constitute material breaches of these implied warranties of merchantability.

91. The defendant has received reasonable notice of the breach of warranties described herein.

92. The vehicles in question were sold with implied warranties of merchantability that included, but are not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's components will function as intended.

93. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

94. The "fuel spit-back problems" constitute a breach of implied warranties of merchantability.

95. This breach has caused damages both direct and indirect including consequential damages.

96. The vehicle models in question were sold with an implied warranty of fitness for a particular purpose.

97. As described below, these vehicles have defects that constitute material breaches of this implied warranty of fitness of a particular purpose, and this breach accrued within less than 4 years before the date this action was commenced.

98. The defendant has received reasonable notice of the breach of warranty described herein.

99. The vehicles in question were sold with implied warranty of fitness for a particular purpose that included, but is not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's fuel system components would function as intended and provide a safe storage facility for fuel.

100. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

101. The "fuel spit-back problems" constitute a breach of implied warranty of fitness for a particular purpose.

102. This breach has caused damages both direct and indirect including consequential damages.

COUNT VIII

BREACH OF WARRANTIES REGARDING JEEP WRANGLERS MODEL YEARS 2007-2008 AND DODGE DURANGOS MODEL YEARS 2006-2008

103. Plaintiffs incorporate by reference all the paragraphs set forth above as if they were set forth at length herein.

104. The vehicles in question were sold and delivered with implied warranties of merchantability.

105. As described herein, these vehicles have defects that constitute material breaches of these implied warranties of merchantability.

106. The defendant has received reasonable notice of the breach of warranties described herein.

107. The vehicles in question were sold with implied warranties of merchantability that included, but are not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's components will function as intended.

108. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

109. The "fuel spit-back problems" constitute a breach of implied warranties of merchantability.

110. This breach has caused damages both direct and indirect including consequential damages.

111. The vehicle models in question were sold with an implied warranty of fitness for a particular purpose.

112. As described below, these vehicles have defects that constitute material breaches of this implied warranty of fitness of a particular purpose, and this breach accrued within less than 4 years before the date this action was commenced.

113. The defendant has received reasonable notice of the breach of warranties described herein.

114. The vehicles in question were sold with implied warranties of fitness for a particular purpose that included, but is not limited to,

a. a promise that the vehicle will operate safely;

b. a promise that it can be used in a safe condition;

c. a promise that it will be free of defects; and,

d. a promise that the vehicle's fuel system components would function as intended and provide a safe storage facility for fuel.

115. The vehicles in question contain defects as described above and failed to safely store fuel for usage as intended by its design.

116. The "fuel spit-back problems" constitute a breach of implied warranty of fitness for a particular purpose.

DAMAGES

117. Plaintiffs adopt and incorporate by reference all prior paragraphs of this Complaint as if fully set forth herein.

118. The Plaintiffs individually and the Class members have in the past and/or will in the future suffer the loss of fuel and/or be exposed to potential health and safety hazards as a result of the Defendant's careless and negligent decision to conduct a woefully inadequate offer to repair a limited number of Jeep Wranglers and Dodge Durangos that all have the design flaws that cause "fuel spit-back problems."

119. Plaintiffs individually and the Class members have suffered damages because of the breach of warranties described above and they are entitled to recover damages recognized at law including repair and replacement costs plus consequential damages.

120. The Plaintiffs individually and the Class members are each entitled to the repair and replacement of all component parts that cause the "fuel spit back problems". These repairs and replacements must be made at the expense of the Defendant.

PRAYER FOR RELIEF

WHEREFORE, the Plaintiffs individually and on behalf of the proposed Class, pray for judgment as follows:

a. Certification of the proposed Class pursuant to the Delaware Rules of Civil Procedure Rule 23(a), (b)(2) and (b)(3);

b. Designation of Plaintiffs as representatives of the proposed Class and designation of Plaintiffs' counsel as Class counsel;

c. An award of compensatory damages, the amount of which is to be determined at trial;

d. An award to the Plaintiffs and Class prejudgment interest, costs and attorneys fees;

e. An award to the Plaintiffs and Class of such other and further relief as the Court deems just and proper.

UNITED STATES DISTRICT COURT
DISTRICT OF DELAWARE

AUTUMN BURTON, MATTHEW COX, DAN GULICK RODNEY LaFLEUR, AND JAMES SPITLER, individually and in their representative capacity for all other similarly situated, Plaintiffs, v. CHRYSLER GROUP LLC, Defendant.	CLASS ACTION C.A. No. 12-cv-00005-LPS

~~[PROPOSED]~~ ORDER TO TRANSFER

Before the Court is Defendant Chrysler Group LLC's Motion to Transfer. Having reviewed the motion and related briefing and the arguments of counsel at the August 20, 2012, hearing, the Court finds good cause exists to grant the motion. Accordingly, IT IS HEREBY ORDERED THAT:

1. Defendant Chrysler Group LLC's Motion to Transfer is GRANTED, and this matter is hereby transferred to the United States District Court for the Southern District of New York, for referral to the bankruptcy court.

2. Chrysler Group LLC's time to respond to Plaintiffs' Second Amended Complaint filed on August 21, 2012, is hereby stayed. After transfer, the parties shall meet and confer with respect to a briefing schedule on the issue of whether the claims asserted in Plaintiffs' Second Amended Complaint are barred by the Sale Order, and shall work toward an agreement on the

timing for briefing. [Such agreement shall be made within twenty (20) days of when this action is transferred].[1]

3. If the bankruptcy court determines that any of the claims asserted in Plaintiffs' Second Amended Complaint are not barred by the Sale Order, Chrysler Group LLC shall abide by its representations made in this Court and stipulate that any remaining claims be remanded back to this Court for further proceedings.

4. No later than fourteen (14) days after this case is referred back to this Court, the parties shall provide the Court with a Joint Status Report. The Joint Status Report shall provide the timing of the filing of Plaintiffs' Third Amended Complaint and Chrysler Group LLC's response to the Third Amended Complaint.

5. Plaintiffs' Third Amended Complaint shall conform to the directions given by the Court at the August 20, 2012, hearing as well as any order of the bankruptcy court.

Date: August 28, 2012

United States District Judge

[1] Chrysler Group's position: Plaintiffs demanded that this Proposed Order contain the bracketed language. Chrysler Group believes the bracketed language is not proper because counsel for Chrysler Group in this Court will not be representing Chrysler Group in the bankruptcy court. Similarly, it is uncertain who will be representing Plaintiffs in the bankruptcy court. And, obviously, the parties cannot control the timing of the bankruptcy court's docket. Accordingly, while Chrysler Group is willing to agree to a briefing schedule after transfer, it believes that the timing of a meet-and-confer on briefing, and the ultimate briefing scheduling, should be left to the bankruptcy court and the counsel of record in that Court. Plaintiffs' position: The Plaintiffs disagree with the inclusion of this editorial comment and feel certain that providing the parties with a prompt time period to submit a scheduling order to the Bankruptcy Court is a feature that this Honorable Court would consider appropriate.

Exhibit C

SERVICE BULLETIN

NUMBER: 14-001-11

GROUP: Fuel System

DATE: February 11, 2011

SUBJECT:
Fuel Spit Back During Refueling (Unlimited Time And Mileage Warranty Extension)

OVERVIEW:
This bulletin involves replacing the fuel tank if the condition occurs.

MODELS:

2007 - 2008	(JK)	Wrangler

NOTE: This Extended Warranty Bulletin applies to vehicles equipped with a 3.8L engine (sales code EGT) built between March 1, 2007 (MDH0301XX) and March 31, 2008 (MDH 0331XX).

SYMPTOM/CONDITION:
Some customers may experience a fuel spit back condition during a refueling event.

DIAGNOSIS:
If the customer experiences the symptom/condition, proceed to the repair procedure.

PARTS REQUIRED:

Qty.	Part No.	Description
AR (1)	52059729AG	Tank, Fuel (23 gallon)
AR (1)	52059718AH	Tank, Fuel (18.6 gallon)
(1)	55366298AA	O-ring, Fuel Pump and Level Unit

REPAIR PROCEDURE:
1. Replace the fuel tank, following the procedures in available in DealerCONNECT > TechCONNECT Service Info > 14 - Fuel System> Fuel Delivery > Tank, Fuel removal and installation procedures.

NOTE: Be sure to install the new Fuel Pump and Level Unit O-ring.

POLICY:
Reimbursable within the provisions of the warranty.

NOTE: Vehicles included in this Service Bulletin have a lifetime coverage - Unlimited Time and Mileage warranty for this repair. See Warranty Bulletins; U.S. D-11-05, Canada SAB-2011-03 or International ID-11-01 for details associated with the extended warranty.

***Description of Other:** Warranty Claims

ACTION / SUMMARY INFORMATION

Action: Close this Preliminary Evaluation.

Summary:

ODI found the rate of warranty claims related to fuel spit back on the subject vehicles is lower than other vehicles previously recalled to correct defects related to fuel spit back. Although the rate of complaints reported to the agency on the subject vehicles is higher than or similar to the rates experienced in previous investigations where safety recalls were conducted, ODI suspects that the NHTSA safety complaints submitted by subject vehicles owners may have been influenced by internet related publicity both before and during this investigation.

A safety-related defect trend has not been identified at this time and further use of agency resources does not appear to be warranted. Accordingly, this investigation is closed. The closing of this investigation does not constitute a finding by NHTSA that no safety-related defect exists. The agency will monitor the issue and reserves the right to take future action if warranted by the circumstances. See attached report for additional information.

in addition, Chrysler is initiating a lifetime warranty program, at no cost to the consumer, to address the fuel spit back problem in approximately 135,000 model year 2007-2008 Jeep Wrangler vehicles built from March 1, 2007 to March 31, 2008. Chrysler will notify all affected vehicle owners of this action. Consumers should refer to the warranty and service bulletins and sample owner notification letter available in the investigative file. The vehicle build date can be found on the certification label located on the driver door or door jamb.

Additional Information:

The complaints allege that while refueling the vehicle, fuel can spill out or spit back from the filler port. Some of the complaints also allege the fuel can splash on the person fueling the vehicle. Three complaints reported minor injuries when fuel got in the eyes causing irritation or when fuel splashed on the foot causing a "gas burn," a form of skin irritation.

Chrysler states the fuel tank's inlet check valve, which is designed to close at the completion of refueling process, can stick in the open position and allow fuel to spit back from the filler port. According to Chrysler, testing showed the use of fuels with ethanol content greater than that found in E10 (10% ethanol) fuel can cause the inlet check valve's poppet to expand resulting in inadequate clearance between the valve's poppet and housing. According to Chrysler, the subject vehicles are designed for fuels such as E10 or regular unleaded and not for flexible fuel E85 (85% ethanol) or other ethanol blends. The types of fuel that are being used in the vehicles experiencing fuel spit back conditions in the field are not known.

Chrysler did not identify any specific root cause of fuel spit back nor any relevant design or manufacturing issues on model year 2005 through 2010 Jeep Wrangler vehicles. Nevertheless, ODI has identified a subset of the Wrangler vehicles – approximately 135,000 vehicles built between March 2007 and March 2008 – having higher rates of complaints and warranty claims than the model year 2007-2008 Wranglers built outside of the production period, as well as other model year Wranglers (2005-2006 and 2009-2010). ODI found the warranty claim rate of the suspect population is about 0.5 percent of vehicles, or a time exposure-adjusted rate of less than 0.2 percent per year, which is lower than the warranty rates experienced in previous investigations where safety recalls were conducted to correct defects related to fuel spit back.

NHTSA has received a high number of complaints (473) on model year 2007-2008 Jeep Wrangler vehicles. Significant reporting of complaints began on October 11, 2009 – the date that a Wrangler owner posted the internet link to the agency's safety complaint form on an internet forum (jk-forum.com), titled "The Ultimate Jeep JK Wrangler Bulletin Board." The complaint link was posted with a message urging other owners to file complaints with NHTSA. Several other Wrangler owners reposted the complaint link with similar messages. ODI found that many owners filed the complaints after seeing the internet messages. ODI believes the increased reporting of the complaints is the result of the internet related publicity, making the number of complaints artificially high.

Printed from AutoWeek.com

Chrysler statement from Chairman and CEO Bob Nardelli

12:44 pm, March 30, 2009

Today marks an important milestone for Chrysler LLC. We are encouraged by the commitments of the Administration, U.S. Treasury and President's Auto Task Force to the American automobile industry and Chrysler's viability, with a Fiat alliance.

We are pleased that Chrysler, Fiat and Cerberus have reached agreement on a global alliance, supported by the U.S. Treasury. Chrysler has consistently said that the alliance with Fiat enhances its business model that expands its global competitiveness. We appreciate the willingness of the Task Force, along with industry and financial experts, to consult closely with us in order to achieve this significant step.

By providing Chrysler with product and platforms, technology cooperation and global distribution, Fiat strengthens Chrysler's ability to create and preserve U.S. jobs; gives U.S. consumers more choices for environmentally advanced vehicles; gives its dealers more of the products they need to be successful; helps stabilize the supplier base; and allows Chrysler to pay back government loans sooner.

Chrysler has had a series of very constructive discussions since our plan was submitted February 17, including weekly face-to-face meetings with the Task Force. We have been impressed by their speed, diligence, good faith and strong grasp of the difficult issues our industry faces in this financial crisis. This is evidenced by the U.S. government's initiatives to support consumer warranties and suppliers, as well as their appointment of Dr. Edward Montgomery, Director of Auto Recovery.

I want to personally assure all of our customers, dealers, suppliers and employees that Chrysler will operate 'business as usual' over the next 30 days. While we recognize that we still have substantial hurdles to resolve, Chrysler is committed to working closely with Fiat, the Administration, U.S. Treasury and the Task Force to secure the support of necessary stakeholders. If successful, the government will consider investing up to the additional $6 billion requested by Chrysler to help this partnership succeed.

A. It's the way you look at it, yes.
Q. A stakeholder?
A. Yes.
Q. Yes. And you owe fiduciaries to those creditors and stakeholders, correct?
A. Yes.
Q. And your fiduciary duties require you to try to maximize value for them, correct?
A. Yes.
Q. So, let me ask you again. Have you given any thought to what the warranty creditors are going to get under the transaction currently before the Court?
A. I believe that NewCo plans on paying the warranty claims.
Q. Were you interested in that?
A. I would like, just from a personal standpoint I like to see our customers taken care of for, yeah, so yes.
Q. But you didn't really care?
A. No, I do care.
Q. You do care. Like, as a fiduciary you care?
A. I would say from a customer care perspective I care.
Q. But as a fiduciary you didn't negotiate for that provision to be in the agreement.
A. NewCo will make the decision on who they pay warranty claims.
Q. Well, do you know who -- is OldCo a party to this

CHRYSLER

August 27, 2009

John T Bozzella

The Honorable Richard Durbin
United States Senate
Washington, DC 20510

Dear Senator Durbin:

We very much appreciate the support you have given to the new Chrysler Group LLC, and we understand the concerns you have raised about Chrysler Group's commitments on product liability claims.

As you know, on June 10, 2009, Chrysler Group purchased substantially all of the assets of the former Chrysler LLC (now known as "Old Carco LLC"). As part of the bankruptcy court-approved sale transaction, Chrysler Group assumed product liability claims relating solely to vehicles sold by Chrysler Group to its dealers. Chrysler Group did not assume product liability claims arising out of vehicles sold before June 10, 2009 (except to the extent required by our sales and service agreements with sustained dealers).

Today, Chrysler Group has a much better appreciation of the viability of our business than it did on June 10. As a result, we will announce today that the company will accept product liability claims on vehicles manufactured by Old Carco before June 10 that are involved in accidents on or after that date. This is in addition to our previous commitment to honor warranty claims, lemon law claims and safety recalls regarding these vehicles. As a result of today's announcement, Chrysler Group's approach is consistent with that taken by General Motors as part of its bankruptcy process.

While Chrysler Group still faces challenges, we are confident today that the future viability of the company will not be threatened if we assume these obligations. We want our customers to feel comfortable and confident buying, driving and enjoying one of our vehicles. Chrysler Group vehicles meet or exceed all applicable federal safety standards and have excellent safety records.

We appreciate your dedication to exploring this issue with us through hearings and conversations with our key executives. We hope this decision alleviates your concerns and assures you that we stand behind our products, our customers and our dealers.

Sincerely,

Cc: Chairman Patrick Leahy
Senator Arlen Specter
Senator Herb Kohl

APPENDIX

MATERIAL SUBMITTED FOR THE HEARING RECORD

Response to Post-Hearing Questions from Ron Bloom, Senior Advisor, U.S. Department of the Treasury 59

going out of business. They were desperate. They came and fortunately this Administration took a whole lot of concern, and they realized that to let the automobiles, two of the largest go under would not be worth it. It would be better for them to work out this agreement of creating new companies.

Now, maybe these other two dealers that were saved should have done what the Ford Motor Company did. They refused. They declined. They didn't want any part of it and so everybody had an opportunity to do that. They came to us on bended knee literally trying to stay in business.

And sure it was tough and sure they had to give up a lot of things but what about the workers that gave up their jobs? What about the plants that closed down? And I am investigating whether some of those factories moved overseas, which is going to leave me thinking about the North American Free Trade Agreement in a new light. So I just want you to feel as well as you can as a valuable Member of this Committee.

Mr. FRANKS. Would the gentleman yield for 1 minute?

Mr. CONYERS. Sure.

Mr. FRANKS. I just, I guess, because I take the gentleman's points and I appreciate the sincerity of it, but you still remain in a situation here where secured lenders got 29 cents on the dollar, unsecured lenders, in the case of, or unsecured creditors in the case of UAW were 55 cents on the dollar.

I realize everybody lost things and a lot of jobs were lost, but if this becomes the norm, secured lending will disappear and jobs will disappear far more than what has happened here, and it is a precedent Mr. Chairman.

So that is—I thank you for yielding.

Mr. CONYERS. Mr. Bloom, how should I answer that to make him feel better?

Mr. BLOOM. I am not sure I can him feel better but I can try to answer it again. It is in fact quite common for secured lenders to not be fully paid out in a bankruptcy. That is, unfortunately, there are many companies whose wherewithal is simply smaller than their secured loan, number one.

Number two, the idea that unsecured creditors of one sort of another receive a different treatment, again, is very common in a bankruptcy. For example, in the Chrysler bankruptcy is it true that the UAW had their health care benefits dramatically modified but not completely eliminated.

But the suppliers to these companies had their debts paid in the ordinary course. Why, because it was a commercial decision by the company to maintain relationships with their supply base because you can't make cars without having steering wheels.

The companies also decided to continue to honor the warranty claims of prior owners of their cars. Why, because on a commercial basis, the last buyer of a GM or Chrysler car is the most likely candidate to be the next buyer.

So the companies made a whole series of commercial decisions and their relationship with the UAW, which as people who know about it know is based on a very, while professional, a very arm's length, sophisticated relationship. They extracted all from the UAW that they felt possible.

And that was the basis on which that deal was done, and likewise their treatment of the secured lenders. So I believe, again, and I think the courts have affirmed this that this was in fact while it was much larger, while it was done under a microscope, this was, in fact, ordinary course treatment.

Mr. COHEN. Mr. Conyers, do you yield?

Mr. CONYERS. Yes sir, I return.

Mr. COHEN. Thank you, Senator.

Mr. CONYERS. Thank you for your generosity.

Mr. COHEN. All right, Mr. Jordan, do you seek recognition?

Mr. JORDAN. Yes.

Mr. COHEN. You are recognized for 5 minutes.

Mr. JORDAN. Thank you, Mr. Chairman.

Mr. Bloom in your opening statement you said that GM and Chrysler are operating as independent companies. You said that you were instructed as a member of the auto task force to refrain from intervening in the day-to-day decisions of these companies. Do you really believe those two statements?

Mr. BLOOM. Yes.

Mr. JORDAN. Well, let me ask you this. How do those statements square with the series of events and facts that we have seen play out in the last several months? How do they square with the fact that President Obama fired Rick Wagoner?

How do they square with the fact that the government task force, the taxpayers, have a 60 percent equity stake in GM, control the majority of the board? How do they square with the fact that 2 weeks ago in an interview Fritz Henderson said he is on a "short leash" when it comes to running General Motors?

How do those statements square with the fact that Barney Frank, as reported in the Wall Street Journal, can call up Mr. Henderson and get special treatment for a facility in his State? How do they square with the facts that Mr. Franks brought up where you have Mr. Lauria an attorney, a Democrat attorney, who stated publicly that he is willing to testify to threatening treatment his client got from the White House?

Let me put it in this context as well. Over the last 6 weeks, I have sat through hearings that question Mr. Ken Lewis, that question Mr. Ben Bernanke, questioned Mr. Hank Paulson about the treatments Ken Lewis and Bank of America got in their acquisition of Merrill Lynch, the threats and the intimidation and, frankly, in my judgment, the deception they received from members of our government in that dealing.

So to me it just—when you walk through these series of events and I will even say this, I remember the Sunday night before General Motors was going to announce, file for bankruptcy. We were on a conference call. Maybe some of the Members of this Committee, I assume Mr. Conyers was on that same conference, or maybe our Chairman.

In the intro to that conference call, Mr. Sperling, made this statement, he said, "We will only get involved in decisions with General Motors if they are a, quote, 'major event'." And so Mr. Rattner spoke, Mr. Sperling spoke, and it was time for questions and several Members got on and this and that, in fact the speaker

whether the vehicle purchase date was on or prior to the closing date or after the closing date.

Thereafter, certain amendments were made that extended Chrysler Group's liability for vehicles purchased by consumers prior to the closing date within certain circumscribed parameters. Those liabilities related to certain types of accident claims pursuant to Section 2.09(h)(2)(i) of the MTA and liabilities under lemon laws pursuant to paragraph 19 of the sale order.

Count I of the complaint alleges violations of the New Jersey Consumer Fraud Act; therefore, Count I of the complaint does not relate to accidents or to lemon law claims. The plaintiffs argue that the fraud act is a mechanism to enforce lemon law claims. That statute, however, does not conform to the definition in the sale order of lemon law statutes that were being assumed, which were statutes requiring a manufacturer to provide a consumer remedy where the manufacturer is unable to conform the vehicle to the warranty after a reasonable number of attempts as defined in the applicable statute.

With respect to vehicles sold to consumers prior to the closing date, pursuant to Section 2.08(g), the Chrysler Group's liability under the written warranties is limited to the costs of repairing with parts and labor. It does not include any warranty-related cause of action. In the Tulacro

decision, the Court set forth its interpretation of the interplay of the various provisions of the MTA and the sale order.

In addition to the written limited warranties under Section 2.08(g) of the MTA, as noted, certain lemon law liabilities were assumed under paragraph 19 of the sale order. The Chrysler Group did not assume other warranty-related liabilities. The liability assumed was limited to the repair costs, and the Chrysler cause (ph.) did not assume any other breach of warranty for the vehicles. To the extent that any repair is not effective, that liability was not assumed. Thus, Chrysler Group did not assume liability for breach of warranty claims. Section 2.09(i) bars claims for breach of product warranty.

Beyond labor and parts, the agreements were carefully crafted to limit Chrysler Group's exposure to any product liability causes of action that might be asserted, especially included any effects to obtain punitive, exemplary, special, consequential, or multiple damages or penalties or other consequences. Therefore, the Court grants the defendant's motion with respect to Count I, and that count is dismissed, and Chrysler Group should set an order consistent with this Court's ruling.

Thank you.

MR. COWDEN: Thank you, Your Honor.

THE COURT: You're welcome. Good night.

UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF SOUTH CAROLINA
GREENVILLE DIVISION

BRYCE BURTON, *et al.*, on behalf of themselves and all others similarly situated,	)	C.A. No.: 8:10-CV-00209-JMC
Plaintiffs,	)	**CONSENT MOTION AND STIPULATION OF PARTIES REGARDING FILING OF SECOND AMENDED COMPLAINT AND ASSUMED LIABILITIES**
v.	)	
CHRYSLER GROUP LLC,	)	
Defendant.	)	

Defendant Chrysler Group LLC ("Chrysler Group") and Plaintiffs Bryce Burton, Gioacchino DeBenedetto, Larry Easterly, Steve Faulkner, Eric Fisher, Edward Halvorson, John Hether, Lloyd Kay, Thomas Kelly, Jr., Thomas Koester, Louis Luckett, Humberto Ochoa, Lana Selby, Lange Thomas, Edward Vivian, and Joseph Wardlow ("Plaintiffs"), hereby move and stipulate, subject to the Court's approval, as follows:

WHEREAS Plaintiffs, individually and on behalf of a putative class, have filed their First Amended Class Action Complaint, wherein they allege that there are certain defects in model-year 2007 through 2009 Dodge Ram vehicles equipped with a 6.7 liter Cummins engine; and

WHEREAS Plaintiffs pleaded claims for: breach of express warranty (Count I); breach of implied warranty of merchantability (Count II); breach of implied warranty of fitness for a particular purpose (Count III); violation of the Magnuson-Moss Warranty Act (Count IV); and violation of consumer protection statutes (Count V); and

WHEREAS Plaintiffs have pleaded in the Complaint that Chrysler Group assumed the liabilities at issue under Paragraph 2.08 of a Master Transaction Agreement identified in the Complaint; and

WHEREAS Chrysler Group contends that it did not assume any of the liabilities at issue under Paragraph 2.08 of the Master Transaction Agreement; and

WHEREAS Chrysler Group has contemplated filing a motion seeking to transfer this case to United States District Court for the Southern District of New York, for referral to the Bankruptcy Court in that District; and

WHEREAS, at the present time, the parties desire to avoid the expenses associated with litigating the issues associated with any dispute over which liabilities were assumed by Chrysler Group and which were not;

THE PARTIES HEREBY STIPULATE AND AGREE AS SET FORTH BELOW

1. Plaintiffs will file a second amended complaint within 15 days of the Court's approval of this Stipulation, wherein they will allege that Chrysler Group assumed the liabilities associated with their warranty-based claims under Paragraph 19 of the "Order (I) Authorizing the Sale of Substantially All of the Debtors' Assets Free and Clear of All Liens, Claims, Interests and Encumbrances, (II) Authorizing the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases in Connection Therewith and Related Procedures and (III) Granting Related Relief," which was entered on June 1, 2009 in the case of In re Old Carco LLC (f/k/a Chrysler LLC), No. 09-50002 (Bankr. S.D.N.Y.) ("the Sale Order"). In their second amended complaint, Plaintiffs will withdraw their references to the assumption of any liabilities under Section 2.08 of the Master Transaction Agreement.

2. Chrysler Group acknowledges and agrees that, under Paragraph 19 of the Sale Order, it assumed the liabilities associated with claims for breach of express warranty and breach of implied warranty for model-year 2007 through 2009 Dodge Ram vehicles equipped with a 6.7 liter Cummins engine, ***except for those liabilities associated with personal injuries and/or***

punitive, exemplary, special, consequential or multiple damages or penalties. Chrysler Group acknowledges that its assumption of these liabilities associated with breach of express warranty claims and breach of implied warranty claims is not dependent on a plaintiff/claimant alleging or proving facts which would meet the standards of any applicable "Lemon Law".

3. Plaintiffs acknowledge and agree that any consumer protection or fraud-based claims that they plead are intended to be based on the alleged acts and omissions of Chrysler Group only, and are not intended to be based on any assumed liability theory.

4. Chrysler Group agrees that it will not seek to transfer this case to the Bankruptcy Court if: (a) the warranty claims made in Plaintiffs' second amended complaint are limited to alleged defects in model-year 2007 through 2009 Dodge Ram vehicles equipped with a 6.7 liter Cummins engine; and (b) Plaintiffs do not seek damages for personal injuries and/or punitive, exemplary, special, consequential or multiple damages or penalties; and (c) the basis of any consumer protection statute or fraud claims are limited to acts and omissions committed by Chrysler Group after June 10, 2009 (the closing date of the transaction under the Sale Order) and are not based on any "assumed liability" theory.

5. Nothing in this Stipulation is intended to prohibit or limit: (a) Plaintiffs' right to plead any non-warranty based claims now or in the future; (b) Chrysler Group's right to seek dismissal of, or to plead affirmative defenses to, any claims set forth in any amended complaint; (c) Chrysler Group's right to contest its assumption of liabilities for any non-warranty claims and/or claims for personal injuries or punitive, exemplary, special, consequential or multiple damages or penalties; (d) Chrysler Group's right to contest its liabilities for any and all consumer protection and fraud-based claims pleaded by Plaintiffs which involve vehicles manufactured and sold by Old Carco LLC; and/or (d) Chrysler Group's right to seek transfer of this case to the

Bankruptcy Court in the event any fraud-based claim implicates fraudulent acts or omissions allegedly attributable to Old Carco and/or which involve allegations that Chrysler Group assumed any type of fraud liabilities.

6. The parties agree that the time for Chrysler Group to respond to Plaintiffs' First Amended Complaint shall be tolled. If this Stipulation is approved by the Court, Chrysler Group will not answer the First Amended Complaint, but will answer, move, or otherwise respond to the Second Amended Complaint within 14 days of being served with it. If the Court does not approve this Stipulation, Chrysler Group will answer, move, or otherwise respond to the First Amended Complaint within 14 days of the Court's rejection of the Stipulation.

ROBERT E. GERBER
UNITED STATES BANKRUPTCY JUDGE

In this contested matter in the chapter 11 case of Motors Liquidation Company (formerly, General Motors Corp., and referred to here as "**Old GM**") and its affiliates, General Motors LLC ("**New GM**") seeks a determination from this Court that New GM did not assume the liabilities associated with a tort action in which a car accident took place before the date ("**Closing Date**") upon which New GM acquired the business of Old GM, but the accident victim died thereafter.[1] The issue turns on the construction of the documents under which New GM agreed to assume liabilities from Old GM—which provided that New GM would assume liabilities relating to "accidents or incidents" "first occurring on or after the Closing Date"—and in that connection, whether a liability of this character is or is not one of the types of liabilities that New GM thereby agreed to assume.

Upon consideration of those documents, the Court concludes that the liability in question was not assumed by New GM. However, if a proof of claim was not previously filed against Old GM with respect to the accident in question, the Court will permit one to be filed within 30 days of the entry of the order implementing this Decision, without prejudice to rights to appeal this determination.

The Court's Findings of Fact and Conclusions of Law in connection with this determination follow.

[1] Technically speaking, the motion is denominated as one to Enforce the 363 Sale Order, which protects New GM from liabilities it did not assume. The Court here speaks to the motion's substance.

Findings of Fact

In June 2007, Beverly Deutsch was severely injured in an accident while she was driving a 2006 Cadillac sedan. She survived the car accident, but in August 2009, she died from the injuries that she previously had sustained.[2]

In January 2010, the Estate of Beverly Deutsch, the Heirs of Beverly Deutsch, and Sanford Deutsch (collectively "**Deutsch Estate**") filed a Third Amended Complaint against New GM (and others) in a state court lawsuit in California (the "**Deutsch Estate Action**"), claiming damages arising from the accident, the injuries which Beverly sustained, and her wrongful death. The current complaint superseded the original complaint in the Deutsch Estate Action, which was filed in April 2008, before the filing of Old GM's chapter 11 case.

In July 2009, this Court entered its order (the "**363 Sale Order**") approving the sale of Old GM's assets, under section 363 of the Bankruptcy Code, to the entity now known as New GM. The 363 Sale Order, among other things, approved an agreement that was called an Amended and Restated Master Sale and Purchase Agreement (the "**MSPA**").

The MSPA detailed which liabilities would be assumed by New GM, and provided that all other liabilities would be retained by Old GM. The MSPA provided, in its § 2.3(a)(ix), that New GM would not assume any claims with respect to product liabilities (as such term was defined in the MSPA, "**Product Liability Claims**") of the Debtors except those that "arise directly out of death, personal injury or other injury to Persons or damage to property caused by *accidents or incidents* first occurring on or after

[2] There is no contention by either side that her death resulted from anything other than the earlier accident.

the Closing Date [July 10, 2009] … "[3] Thus, those Product Liability Claims that arose from "accidents or incidents" occurring before July 10, 2009 would not be assumed by New GM, but claims arising from "accidents or incidents" occurring on or after July 10, 2009 would be.

Language in an earlier version of the MSPA differed somewhat from its final language, as approved by the Court. Before its amendment, the MSPA provided for New GM to assume liabilities except those caused by "accidents, incidents, *or other distinct and discrete occurrence*s."[4]

The 363 Sale Order provides that "[t]his Court retains exclusive jurisdiction to enforce and implement the terms and provisions of this Order" and the MSPA, including "to protect the Purchaser [New GM] against any of the Retained Liabilities or the assertion of any … claim … of any kind or nature whatsoever, against the Purchased Assets."[5]

Discussion

The issue here is one of contractual construction. As used in the MSPA, when defining the liabilities that New GM would assume, what do the words "accidents or incidents," that appear before "first occurring on or after the Closing Date," mean? It is undisputed that the accident that caused Beverly Deutsch's death took place in June 2007, more than two years prior to the closing. But her death took place after the closing. New GM argues that Beverly Deutsch's injuries arose from an "accident" and an "incident"

[3] Amended Master Sale and Purchase Agreement, at § 2.3(a)(ix) (as modified by First Amendment) (emphasis added).

[4] Amended Master Sale and Purchase Agreement, at § 2.3(a)(ix) (prior to modification by First Amendment) (emphasis added) (typographical error corrected).

[5] 363 Sale Order ¶ 71.

that took place in 2007, and that her death did likewise. But the Deutsch Estate argues that while the "accident" took place in 2007, her death was a separate "incident"—and that the latter took place only in August 2009, after the closing of the sale to New GM had taken place.

Ultimately, while the Court respects the skill and fervor with which the point was argued, it cannot agree with the Deutsch Estate. Beverly Deutsch's death in 2009 was the *consequence* of an event that took place in 2007, which undisputedly, was an accident and which also was an incident, which is a broader word, but fundamentally of a similar type. The resulting death in 2009 was not, however, an "incident[] first occurring on or after the Closing Date," as that term was used in the MSPA.

As usual, the Court starts with textual analysis. The key provision of the MSPA, § 2.3(a)(ix), set forth the extent to which Product Liability Claims were assumed by New GM. Under that provision, New GM assumed:

> (ix) all Liabilities to third parties for death, personal injury, or other injury to Persons or damage to property caused by motor vehicles designed for operation on public roadways or by the component parts of such motor vehicles and, in each case, manufactured, sold or delivered by Sellers (collectively, "Product Liabilities"), *which arise directly out of death, personal injury or other injury to Persons or damage to property caused by accidents or incidents first occurring on or after the Closing Date and arising from such motor vehicles' operation or performance* (for avoidance of doubt, Purchaser shall not assume or become liable to pay, perform or discharge, any Liability arising or contended to arise by reason of exposure to materials utilized in the assembly or fabrication of motor vehicles manufactured by Sellers and delivered prior to the Closing Date, including

> asbestos, silicates or fluids, regardless of when such alleged exposure occurs).[6]

The key words, of course, are "accidents" and "incidents," neither of which are defined anywhere else in the MSPA, and whose interpretation, accordingly, must turn on their common meaning and any understandings expressed by one side to the other in the course of contractual negotiations. Also important are the words "first occurring on or after the Closing Date," which modify the words "accidents" and "incidents," and shed light on the former words' meaning.

The word "accidents," of course, is not ambiguous. "Accidents" has sufficiently clear meaning on its own, and in any event its interpretation is not subject to debate, as both sides agree that Beverly Deutsch's death resulted from an accident that took place in 2007, at a time when, if "accidents" were the only controlling word, liability for the resulting death would not be assumed by New GM. The ambiguity, if any, is instead in the word "incidents," which is a word that by its nature is more inclusive and less precise.

But while "incidents" may be deemed to be somewhat ambiguous, neither side asked for an evidentiary hearing to put forward parol evidence as to its meaning. Though it is undisputed that "incidents" remained in the MSPA after additional words "or other distinct and discrete occurrences," were deleted, neither side was able, or chose, to explain, by evidence, why the latter words were dropped, and what, if any relevance the dropping of the additional words might have as to the meaning of the word "incidents" that remained. The words "or other distinct and discrete occurrences" could have been deleted as redundant, to narrow the universe of claims that were assumed, or for some

---

[6] Amended Master Sale and Purchase Agreement, at § 2.3(a)(ix) (as modified by First Amendment) (emphasis added).

other reason. Ultimately, the Court is unable to derive sufficient indication of the parties' intent as to the significance, if any, of deleting the extra words.

So the Court is left with the task of deriving the meaning of the remaining words "accidents or incidents" from their ordinary meaning, the words that surround them, canons of construction, and the Court's understanding when it approved the 363 Sale as to how the MSPA would deal with prepetition claims against Old GM. Ultimately these considerations, particularly in the aggregate, point in a single direction—that a death resulting from an earlier "accident[] or incident[]" was not an "incident[] first occurring" after the closing.

Starting first with ordinary meaning, definitions of "incident" from multiple sources are quite similar. They include, as relevant here,[7] "an occurrence of an action or situation felt as a separate unit of experience";[8] "an occurrence of an action or situation that is a separate unit of experience";[9] "[a] discrete occurrence or happening";[10] "something that happens, especially a single event";[11] "a definite and separate occurrence; an event";[12] or, as proffered by the Deutsch Estate, "[a] separate and definite occurrence: EVENT."[13] In ways that vary only in immaterial respects, all of the

---

7 The word "incident" has other meanings, in other contexts, which most commonly follow definitions of the type quoted here. Particularly since the definition proffered by the Deutsch Estate is so similar to the others, the Court does not understand either side to contend that definitions of "incident" in other contexts are relevant here.

8 Webster's Third New International Dictionary Unabridged (1993) at 1142.

9 Merriam-Webster's Collegiate Dictionary (11th ed. 2003) at 629.

10 Black's Law Dictionary (8th ed. 2004) at 777.

11 Encarta Dictionary: English (North America), http://encarta.msn.com/encnet/features/dictionary/dictionaryhome.aspx (query word "incident" in search field).

12 American Heritage College Dictionary (4th ed. 2004) at 700.

13 Deutsch Estate Reply Br. at 4 (quoting Webster's II New College Dictionary (1999) at 559).

definitions articulate the concept of a separate and identifiable event. And, and of course, from words that follow, "arising from such motor vehicles' operation or performance," the event must be understood to relate to be one that that involves a motor vehicle. Accidents, explosions or fires all fit comfortably within that description. Deaths or other consequences that result from earlier accidents, explosions or fires technically might fit as well, but such a reading is much less natural and much more strained.

Turning next to words that surround the words "accidents or incidents," these words provide an interpretive aid to the words they modify. The word "incident[]" is followed by the words "first occurring." In addition to defining the relevant time at which the incident must take place (*i.e.*, after the closing), that clause inserts the word "first" before "occurring." That suggests, rather strongly, that it was envisioned that some types of incidents could take place over time or have separate sub-occurrences, or that one incident might relate to an earlier incident, with the earliest incident being the one that matters. Otherwise it would be sufficient to simply say "occurring," without adding the word "first." This too suggests that the consequences of an incident should not be regarded as a separate incident, or that even if they are, the incident that first occurs is the one that controls.

Canons of construction tend to cut in opposite directions, though on balance they favor New GM. The Deutsch Estate appropriately points to the canon of construction against "mere surplusage," which requires different words of a contract or statute to be construed in a fashion that gives them separate meanings, so that no word is superfluous.[14] The Court would not go as far as to say that the words "accident" and

[14] *See, e.g., Sprietsman v. Mercury Marine*, 537 U.S. 51, 63 (2003) (a statute's preemption clause, which applied to ''a [state or local] law or regulation'' did not preempt common law tort claims,

"incident" cannot *ever* cover the same thing—or, putting it another way, that they *always* must be different.[15] But the Court agrees with the Deutsch Estate that they cannot *always* mean the same thing. "Incidents" must have been put there for a reason, and should be construed to add something in at least some circumstances.

But how different the two words "accidents" and "incidents" can properly be understood to be —and in particular, whether "incidents" can be deemed to separately exist[16] when they are a foreseeable consequence, or are the resulting injury, from the accidents or incidents that cause them—is quite a different matter. A second canon of construction, "*noscitur a sociis,"* provides that "words grouped in a list should be given related meaning."[17] Colloquially, "a word is known by the company it keeps …"[18] For instance, in *Dole*, in interpreting a phrase of the Paper Work Reduction Act, the Supreme Court invoked *noscitur a sociis* to hold that words in a list, while meaning different things, should nevertheless be read to place limits on how broadly some of those words might be construed. The *Dole* court stated:

> [t]hat a more limited reading of the phrase "reporting and recordkeeping requirements" was intended derives some further support from the words surrounding it. The traditional canon of

because if "law" were read that broadly, it might also be interpreted to include regulations, which would render the express reference to "regulation" in the preemption clause superfluous). *See also* Gustafson v. Alloyd Co., 513 U.S. 561, 574 (1995) ("***Alloyd***") (in statutory construction context, "the Court will avoid a reading which renders some words altogether redundant.").

15 As previously noted, "incident" is a word that is inherently broader than "accident." Every accident could fairly be described as an incident. But not every incident could fairly be described as an accident.

16 It is important to note that to prevail on this motion, the Deutsch Estate must show that the alleged "incident" that is the resulting death was a wholly separate "incident." Even if the death took place after the Closing Date, if the death was an incident that was part of an earlier incident, it could not be said to be "*first* occurring" after the Closing Date.

17 *Dole v. United Steelworkers of America*, 494 U.S. 26, 36 (1990).

18 *Alloyd*, 513 U.S. at 575 (applying *noscitur a sociis* in context of statutory interpretation).

> construction, *noscitur a sociis*, dictates that words grouped in a list should be given related meaning.[19]

Here application of the canon against surplusage makes clear, as the Deutsch Estate argues, that "incidents" must at least sometimes mean something different than "accidents"—but application of that canon does not tell us when and how. The second canon, *noscitur a sociis*, does that, and effectively trumps the doctrine of surplusage because it tells us that "accidents" and "incidents" should be given related meaning.

The Deutsch Estate argues that the Court should construe a death resulting from an earlier "accident" or "incident" to be a separate and new "incident" that took place at a later time. But ultimately, the Court concludes that it cannot do so. While it is easy to conclude that "accidents" and "incidents," as used in the MSPA, will not necessarily be the same in all cases, they must still be somewhat similar. "Incidents" cannot be construed so broadly as to cover what are simply the consequences of earlier "accidents" or other "incidents."

Applying *noscitur a sociis* in conjunction with the canon against "mere surplusage" tells us that the two words "accidents" and "incidents" must be understood as having separate meanings in at least some cases, but that these meanings should be conceptually related. At oral argument, the Court asked counsel for New GM an important question: if an "incident" would not necessarily be an "accident," what would it be? What would it cover? Counsel for New GM came back with a crisp and very

[19] *Dole*, at 36. (internal quotations and citations omitted) (emphasis in original). *See also Massachusetts v. Morash*, 490 U.S. 107, 114-15 (1989) (quoting *Schreiber v. Burlington Northern Inc.*, 472 U.S. 1, 8 (1985)); *Alloyd*, 513 U.S. at 575 ("This rule we rely upon to avoid ascribing to one word a *meaning so broad that it is inconsistent with its accompanying words*, thus giving unintended breadth to the Acts of Congress." (emphasis added) (internal quotation marks deleted)).

logical answer; he said that "incident" would cover a situation where a car caught fire or had blown up, or some problem had arisen by means other than a collision.[20]

Conversely, the interpretation for which the Deutsch Estate argues—that "incidents" refers to *consequences* of earlier accidents or incidents—is itself violative or potentially violative, of the two interpretive canons discussed above. It is violative of *noscitur a sociis*, since a death or other particular injury is by its nature distinct from the circumstance—collision, explosion, fire, or other accident or incident—that causes the resulting injury in the first place. The Deutsch Estate interpretation also tends to run counter to the doctrine against mere surplusage upon which the Deutsch Estate otherwise relies, making meaningless the words "first occurring" which follow the words "accidents or incidents," in any cases where death or other particular injury is the consequence of an explosion, fire, or other non-collision incident that causes the resulting injury.

The simple interpretation, and the one this Court ultimately provides, is that "incidents," while covering more than just "accidents," are similar; they relate to fires, explosions, or other definite events that *cause* injuries and *result* in the right to sue, as contrasted to describing the *consequences* of those earlier events, or that relate to the resulting damages.

[20] Counsel for New GM answered:

> Now, what's the difference between an accident or an incident, if it were relevant with respect to product liability claims? And I think there's an easy answer. You could have a car accident. Or you could have a car catching on fire; that's not necessarily an accident; that's an incident. Or a car could blow up with someone in the car. Or something else could happen; some other malfunction could cause a fire or injury to someone, not an accident with another vehicle necessarily; or an accident where you ran off the road. So I think that's easily explained.

Transcript, at 31.

Finally, this Court's earlier understanding of the purposes of New GM's willingness to assume certain liabilities of Old GM is consistent with the Court's conclusion at this time as well. When the Court approved GM's 363 Sale, this Court noted, in its opinion, that New GM had chosen to broaden its assumption of product liabilities.[21] The MSPA was amended to provide for the assumption of liabilities not just for product liability claims for motor vehicles and parts delivered after the Closing Date (as in the original formulation), but also, for "all product liability claims arising from *accidents or other discrete incidents* arising from operation of GM vehicles occurring subsequent to the closing of the 363 Transaction, regardless of when the product was purchased."[22] As reflected in the Court's decision at the time, the Court understood that New GM was undertaking to assume the liabilities for "accidents or other discrete incidents" that hadn't yet taken place.

Finally, the Deutsch Estate notes another interpretative canon, that ambiguities in a contract must be read against the drafter.[23] If the matter were closer, the Court might consider doing so.[24] But the language in question is not

22 *Id.* (emphasis added and original emphasis deleted)

23 *See Jacobson v. Sassower*, 66 N.Y.2d 991, 993 (N.Y. 1985) ("In cases of doubt or ambiguity, a contract must be construed most strongly against the party who prepared it, and favorably to a party who had no voice in the selection of its language"); *Cf. Aetna Casualty & Surety Co. v. General Time Corp.*, 704 F.2d 80, 85 (2d Cir. 1983) ("Since the insurer is assumed to have control over drafting the contract provisions, it is fair to hold it responsible for ambiguous terms, and accord the insured the benefit of uncertainties which the insurer could have, but failed to clarify").

24 In that event, the Court would then have to consider the specifics of the negotiating environment at the time. The Deutsch Estate was of course not a party to those negotiations at all. But there was little in the record at the time of the 363 Sale, and there is nothing in the record now, as to who, if anybody, had control over the drafting of any MSPA terms.

that ambiguous, and the relevant considerations, fairly decisively, all tip in the same direction. While it cannot be said that the Deutsch Estate's position is a frivolous one, the issues are not close enough to require reading the language against the drafter.

Conclusion

The Deutsch Estate's interpretation of "accident or incident" is not supportable. Thus, the Debtor's motion is granted, and the Deutsch Estate may not pursue this claim against New GM.[25] New GM is to settle an order consistent with this opinion. The time to appeal from this determination will run from the time of the resulting order, and not from the date of filing of this Decision.

Dated: New York, New York
January 5, 2011

s/Robert E. Gerber
United States Bankruptcy Judge

[25] Under the circumstances, however, since the Deutsch Estate's issues were fairly debatable and plainly raised in good faith, the Court will provide the Deutsch Estate with 30 days from the resulting order to file a claim against Old GM if it has not already done so, without prejudice to its underlying position and any rights of appeal.
