2635. Pursuant to UTAH CODE ANN. § 13-11-4, the Utah Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $2,000 for each Utah Class member, reasonable attorneys' fees, and any other just and proper relief available under the Utah CSPA.

ONE HUNDRED THIRTY-FIFTH CLAIM FOR RELIEF

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY
(UTAH CODE ANN. § 70A-2-314)

2636. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Utah Class.

2637. Old GM and New GM were at all relevant times merchants with respect to motor vehicles.

2638. Old GM and New GM impliedly warranted that its vehicles were of good and merchantable quality and fit, and safe for their ordinary intended use—transporting the driver and passengers in reasonable safety during normal operation, and without unduly endangering them or members of the public.

2639. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the non-deployment of airbags in the event of a collision.

2640. As a direct and proximate result of the Companies' breach of the implied warranty of merchantability, Utah Class members have been damaged in an amount to be proven at trial.

VERMONT

ONE HUNDRED THIRTY-SIXTH CLAIM FOR RELIEF

VIOLATION OF VERMONT CONSUMER FRAUD ACT
(VT. STAT. ANN. TIT. 9, § 2451 *et. seq.*)

2641. This claim is brought on behalf of Class members who are Vermont residents (the "Vermont Class").

2642. Old GM was, and New GM is, a seller within the meaning of VT. STAT. ANN. TIT. 9, § 2451(a)(c).

2643. The Vermont Consumer Fraud Act ("Vermont CFA") makes unlawful "[u]nfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce…." VT. STAT. ANN. TIT. 9, § 2453(a). The Companies engaged in unfair and deceptive acts or practices in trade or commerce in violation of the Vermont CFA by failing to disclose and actively concealing the ignition switch defects in the Defective Vehicles.

2644. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression, or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or

commerce in violation of the Vermont CFA, and also has successor liability for the violations of Old GM.

2645. As alleged above, both Companies knew of the ignition switch defects, while the Vermont Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2646. The Companies knew or should have known that their conduct violated the Vermont CFA.

2647. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2648. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2649. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2650. The Companies each owed Plaintiffs a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from the Vermont Class; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from the Vermont Class that contradicted these representations.

2651. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the Vermont Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2652. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the Vermont Class, about the true safety and reliability of Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the Vermont Class.

2653. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to Vermont Class members. Had Vermont Class members known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2654. All members of the Vermont Class suffered ascertainable loss caused by the Companies' failure to disclose material information. Vermont Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and Vermont Class members own vehicles that are not safe.

2655. Vermont Class members have been damaged by Old GM and New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished because of Old GM and New GM's failure to timely disclose and remedy the serious defects. Old GM and New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in Old GM and New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2656. Vermont Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the Vermont CFA, and these violations present a continuing risk to the Vermont Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest.

2657. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2658. As a direct and proximate result of the Companies' violations of the Vermont CFA, Vermont Class members have suffered injury-in-fact and/or actual damage.

2659. Vermont Class members are entitled to recover "appropriate equitable relief" and "the amount of [their] damages, or the consideration or the value of the consideration given by [them], reasonable attorney's fees, and exemplary damages not exceeding three times the value of the consideration given by [them]" pursuant to VT. STAT. ANN. TIT. 9, § 2461(b).

ONE HUNDRED THIRTY-SEVENTH CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2660. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Vermont Class.

2661. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2662. The Companies knew these representations were false when made.

2663. The vehicles purchased or leased by Vermont Class members were, in fact, defective, unsafe, and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2664. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because Vermont Class members relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2665. The aforementioned concealment was material because if it had been disclosed Vermont Class members would not have bought, leased, or retained their vehicles.

2666. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing, or retaining a new or used motor vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2667. Vermont Class members relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing or retaining the Defective Vehicles.

2668. As a result of their reliance, Vermont Class members have been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

2669. The Companies' conduct was knowing, intentional, with malice, demonstrated a complete lack of care, and was in reckless disregard for the rights of the Vermont Class. Vermont Class members are therefore entitled to an award of punitive damages.

VIRGINIA

ONE HUNDRED THIRTY-EIGHTH CLAIM FOR RELIEF

VIOLATION OF VIRGINIA CONSUMER PROTECTION ACT
(VA. CODE ANN. 15 §§ 59.1-196, *et. seq.*)

2670. This claim is brought solely on behalf of Class members who are Virginia residents (the "Virginia Class").

2671. Old GM was and New GM are "supplier[s]" under VA. CODE ANN. § 59.1-198.

2672. The sale of the Defective Vehicles to Virginia Class members was a "consumer transaction" within the meaning of VA. CODE ANN. § 59.1-198.

2673. The Virginia Consumer Protection Act ("Virginia CPA") lists prohibited "practices" which include: "5. Misrepresenting that good or services have certain characteristics;" "6. Misrepresenting that goods or services are of a particular standard, quality, grade style, or model;" "8. Advertising goods or services with intent not to sell them as advertised, or with intent not to sell at the price or upon the terms advertised;" "9. Making false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions;" and "14. Using any other deception, fraud, or misrepresentation in connection with a consumer transaction." VA. CODE ANN. § 59.1-200. The Companies violated the Virginia CPA by misrepresenting the Defective Vehicles had certain quantities, characteristics, ingredients, uses, or benefits; misrepresenting that Defective Vehicles were of a particular standard, quality, grade, style, or model when they were another; advertising Defective Vehicles with intent not to sell them as advertised; and otherwise "using any other deception, fraud, false pretense, false promise, or misrepresentation in connection with a consumer transaction.

2674. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression, or omission of any material fact with intent that others rely upon such concealment,

suppression, or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or commerce in violation of the Virginia CPA, and also has successor liability for the violations of Old GM.

2675. As alleged above, both Companies knew of the ignition switch defects, while the Virginia Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2676. The Companies knew or should have known that their conduct violated the Virginia CPA.

2677. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2678. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2679. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2680. The Companies each owed Virginia Class members a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from the Virginia Class; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from the Virginia Class that contradicted these representations.

2681. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the Virginia Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2682. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the Virginia Class, about the true safety and reliability of Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the Virginia Class.

2683. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to Virginia Class members. Had Virginia Class members known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2684. All members of the Virginia Class suffered ascertainable loss caused by the Companies' failure to disclose material information. Virginia Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and Virginia Class members own vehicles that are not safe.

2685. Virginia Class members have been damaged by New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished because of New GM's failure to timely disclose and remedy the serious defects. New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2686. Virginia Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the Virginia CPA, and these violations present a continuing risk to the Virginia Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest.

2687. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2688. As a direct and proximate result of the Companies' violations of the Virginia CPA, Virginia Class members have suffered injury-in-fact and/or actual damage.

2689. Pursuant to VA. CODE ANN. § 59.1-204, Virginia Class members seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $500 for each Virginia Class Member. Because the Companies' conduct was committed willfully and knowingly, the Virginia Classis entitled to recover, for each Virginia Class Member, the greater of (a) three times actual damages or (b) $1,000.

2690. Plaintiffs also seek an order enjoining New GM's unfair and/or deceptive acts or practices, punitive damages, and attorneys' fees, and any other just and proper relief available under General Business Law § 59.1-204, *et. seq.*

ONE HUNDRED THIRTY-NINTH CLAIM FOR RELIEF

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY
(VA. CODE ANN. § 8.2-314)

2691. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Virginia Class.

2692. Old GM and New GM were at all relevant times merchants with respect to motor vehicles.

2693. Old GM and New GM impliedly warranted that their vehicles were of good and merchantable quality and fit, and safe for their ordinary intended use—transporting the driver and passengers in reasonable safety during normal operation, and without unduly endangering them or members of the public.

2694. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective

Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the non-deployment of airbags in the event of a collision.

2695. As a direct and proximate result of the Companies' breach of the implied warranty of merchantability, the Virginia Class has been damaged in an amount to be proven at trial.

ONE HUNDRED FORTIETH CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2696. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Virginia Class.

2697. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2698. The Companies knew these representations were false when made.

2699. The vehicles purchased or leased by Virginia Class members were, in fact, defective, unsafe and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2700. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because Virginia Class members relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2701. The aforementioned concealment was material because if it had been disclosed Virginia Class members would not have bought, leased, or retained their vehicles.

2702. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing or retaining a new or used motor vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2703. Virginia Class members relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing or retaining the Defective Vehicles.

2704. As a result of their reliance, the Virginia Class has been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

2705. The Companies' conduct was knowing, intentional, with malice, demonstrated a complete lack of care, and was in reckless disregard for the rights of the Virginia Class. Virginia Class members are therefore entitled to an award of punitive damages.

WASHINGTON

ONE HUNDRED FORTY-FIRST CLAIM FOR RELIEF

VIOLATION OF THE CONSUMER PROTECTION ACT
(REV. CODE WASH. ANN. §§ 19.86.010, *et. seq.*)

2706. This claim is brought on behalf of Class members who are Washington residents (the "Washington Class").

2707. The Companies committed the acts complained of herein in the course of "trade" or "commerce" within the meaning of WASH. REV. CODE. WASH. ANN. §§ 19.96.010.

2708. The Washington Consumer Protection Act ("Washington CPA") broadly prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." WASH. REV. CODE. WASH. ANN. §§ 19.96.010. The Companies engaged in unfair and deceptive acts and practices and violated the Washington CPA by failing to disclose and actively concealing the ignition switch defects in the Defective Vehicles.

2709. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression, or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or commerce in violation of the Washington CPA, and also has successor liability for the violations of Old GM.

2710. As alleged above, both Companies knew of the ignition switch defects, while the Washington Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2711. The Companies knew or should have known that their conduct violated the Washington CPA.

2712. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2713. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2714. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2715. The Companies each owed Washington Class members a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from Washington Class members; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully

withholding material facts from Washington Class members that contradicted these representations.

2716. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the Washington Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2717. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the Washington Class, about the true safety and reliability of Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the Washington Class.

2718. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to Washington Class members. Had the Washington Class known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2719. All members of the Washington Class suffered ascertainable loss caused by the Companies' failure to disclose material information. Washington Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and Washington Class members own vehicles that are not safe.

2720. Washington Class members have been damaged by Old GM and New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished because of Old GM and New GM's failure to timely disclose and remedy the serious defects. Old GM and New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in Old GM and New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2721. Washington Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the Washington CPA, and these violations present a continuing risk to the Washington Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest.

2722. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2723. As a direct and proximate result of the Companies' violations of the Washington Act, Washington Class members have suffered injury-in-fact and/or actual damage.

2724. New GM is liable to the Washington Class for damages in amounts to be proven at trial, including attorneys' fees, costs, and treble damages, as well as any other remedies the Court may deem appropriate under REV. CODE. WASH. ANN. § 19.86.090.

2725. Pursuant to WASH. REV. CODE. WASH. ANN. § 19.86.095, Plaintiffs will serve the Washington Attorney General with a copy of this complaint as Plaintiffs seek injunctive relief.

ONE HUNDRED FORTY-SECOND CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2726. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Washington Class.

2727. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2728. The Companies knew these representations were false when made.

2729. The vehicles purchased or leased by Washington Class members were, in fact, defective, unsafe, and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2730. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because Washington Class members relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2731. The aforementioned concealment was material because if it had been disclosed the Washington Class would not have bought, leased, or retained their vehicles.

2732. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing, or retaining a new or used motor

vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2733. Washington Class members relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing or retaining the Defective Vehicles.

2734. As a result of their reliance, the Washington Class has been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

WEST VIRGINIA

ONE HUNDRED FORTY-THIRD CLAIM FOR RELIEF

VIOLATIONS OF THE CONSUMER CREDIT AND PROTECTION ACT (W. VA. CODE § 46a-1-101, *et. seq.*)

2735. This claim is brought on behalf of Class members who are West Virginia residents (the "West Virginia Class").

2736. Old GM was, and New GM is, a "person" under W.VA. CODE § 46A-1-102(31).

2737. West Virginia Class members are "consumers," as defined by W.VA. CODE §§ and 46A-1-102(12) and 46A-6-102(2), who purchased or leased one or more Defective Vehicles.

2738. The Companies engaged in trade or commerce as defined by W. VA. CODE § 46A-6-102(6).

2739. The West Virginia Consumer Credit and Protection Act ("West Virginia CCPA") prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce.…" W. VA. CODE § 46A-6-104. Without limitation, "unfair or deceptive" acts or practices include:

> (I) Advertising goods or services with intent not to sell them as advertised;
>
> (K) Making false or misleading statements of fact concerning the reasons for, existence of or amounts of price reductions;
>
> (L) Engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding;
>
> (M) The act, use or employment by any person of any deception, fraud, false pretense, false promise or misrepresentation, or the concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any goods or services, whether or not any person has in fact been misled, deceived or damaged thereby;
>
> (N) Advertising, printing, displaying, publishing, distributing or broadcasting, or causing to be advertised, printed, displayed, published, distributed or broadcast in any manner, any statement or representation with regard to the sale of goods or the extension of consumer credit including the rates, terms or conditions for the sale of such goods or the extension of such credit, which is false, misleading or deceptive or which omits to state material information which is necessary to make the statements therein not false, misleading or deceptive;

W. VA. CODE § 46A-6-102(7).

2740. By failing to disclose and actively concealing the dangerous risks posed by the defective ignition switches in the Defective Vehicles, the Companies engaged in deceptive business practices prohibited by the West Virginia CCPA, including: (1) representing that the Defective Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Defective Vehicles are of a particular standard, quality, and grade

when they are not; (3) advertising the Defective Vehicles with the intent not to sell them as advertised; (4) representing that a transaction involving the Defective Vehicles confers or involves rights, remedies, and obligations which it does not; and (5) representing that the subject of a transaction involving the Defective Vehicles has been supplied in accordance with a previous representation when it has not.

2741. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression, or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or commerce in violation of the West Virginia CCPA, and also has successor liability for the violations of Old GM.

2742. As alleged above, both Companies knew of the ignition switch defects, while the West Virginia Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2743. The Companies knew or should have known that their conduct violated the West Virginia Act.

2744. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2745. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2746. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2747. The Companies each owed the West Virginia Class a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from the West Virginia Class; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from the West Virginia Class that contradicted these representations.

2748. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the West Virginia Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2749. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the West Virginia Class, about the true safety and reliability of Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the West Virginia Class.

2750. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to the West Virginia Class. Had West Virginia Class members known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2751. All members of the West Virginia Class suffered ascertainable loss caused by the Companies' failure to disclose material information. West Virginia Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and West Virginia Class members own vehicles that are not safe.

2752. West Virginia Class members have been damaged by Old GM and New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished

because of Old GM and New GM's failure to timely disclose and remedy the serious defects. Old GM and New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in Old GM and New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2753. West Virginia Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the West Virginia CCPA, and these violations present a continuing risk to the West Virginia Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest.

2754. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2755. As a direct and proximate result of the Companies' violations of the West Virginia CCPA, West Virginia Class members have suffered injury-in-fact and/or actual damage.

2756. Pursuant to W. VA. CODE § 46A-1-106, the West Virginia Class seeks monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $200 per violation of the West Virginia CCPA for each West Virginia Class member.

2757. The West Virginia Class also seeks punitive damages against New GM because the Companies carried out despicable conduct with willful and conscious disregard of the rights and safety of others, subjecting the West Virginia Class to cruel and unjust hardship as a result. The Companies intentionally and willfully misrepresented the safety and reliability

of the Defective Vehicles, deceived the West Virginia Class on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting a deadly flaw in the Defective Vehicles it repeatedly promised the West Virginia Class was safe. The Companies' unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

2758. The West Virginia Class believes that the recalls and repairs instituted by New GM have not been adequate, and that some or all of the Defective Vehicles will remain defective even after New GM's "remedy" is implemented.

2759. The West Virginia Class further seeks an order enjoining New GM's unfair or deceptive acts or practices, restitution, punitive damages, costs of Court, attorney's fees under W. VA. CODE § 46A-5-101, *et. seq.*, and any other just and proper relief available under the West Virginia CCPA.

2760. West Virginia Plaintiffs have complied with the notice requirement set forth in W. VA. CODE § 46A-6-106(b) by virtue of the notice previously provided in the context of the underlying action styled *Ramirez, et al. v. GM*, 2:14-cv-02344-JVS-AN (C.D. Cal.), and other underlying actions, as well as additional notice in the form of a demand letter sent on October 12, 2014.

ONE HUNDRED FORTY-FOURTH CLAIM FOR RELIEF

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY
(W. VA. CODE § 46-2-314)

2761. In the event the Court declines to certify a nationwide Class, Plaintiffs bring this claim on behalf of the West Virginia Class.

2762. Old GM and New GM were at all relevant times sellers of motor vehicles under W. VA. CODE § 46-2-314, and were also "merchant[s]" as the term is used in W. VA. CODE § 46A-6-107 and § 46-2-314.

2763. Under W. VA. CODE § 46-2-314, a warranty that the Defective Vehicles were in merchantable condition was implied by law when West Virginia Class members purchased their Defective Vehicles.

2764. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the non-deployment of airbags in the event of a collision.

2765. Old GM and New GM were provided notice of these issues by numerous complaints filed against them, their own internal investigations, and by numerous individual letters and communications sent by West Virginia Class members before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2766. As a direct and proximate result of Old GM and New GM's breach of the warranty of merchantability, the West Virginia Class been damaged in an amount to be proven at trial.

ONE HUNDRED FORTY-FIFTH CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2767. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the West Virginia Class.

2768. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2769. The Companies knew these representations were false when made.

2770. The vehicles purchased or leased by West Virginia Class members were, in fact, defective, unsafe, and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2771. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because West Virginia Class members relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2772. The aforementioned concealment was material because if it had been disclosed West Virginia Class members would not have bought, leased or retained their vehicles.

2773. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing or retaining a new or used motor vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2774. The West Virginia Class relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative

assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing, or retaining the Defective Vehicles.

2775. As a result of their reliance, the West Virginia Class has been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

2776. The Companies' conduct was knowing, intentional, with malice, demonstrated a complete lack of care, and was in reckless disregard for the rights of the West Virginia Class. West Virginia Class members are therefore entitled to an award of punitive damages.

WISCONSIN

ONE HUNDRED FORTY-SIXTH CLAIM FOR RELIEF

VIOLATIONS OF THE WISCONSIN DECEPTIVE TRADE PRACTICES ACT (WIS. STAT. § 110.18)

2777. This claim is brought on behalf of Class members who are Wisconsin residents (the "Wisconsin Class").

2778. The Companies are a "person, firm, corporation or association" within the meaning of WIS. STAT. § 100.18(1).

2779. The Wisconsin Class members are members of "the public" within the meaning of WIS. STAT. § 100.18(1). Wisconsin Class members purchased or leased one or more Class Vehicles.

2780. The Wisconsin Deceptive Trade Practices Act ("Wisconsin DTPA") prohibits a "representation or statement of fact which is untrue, deceptive or misleading." WIS. STAT. § 100.18(1). The Companies engaged in unfair and deceptive acts and practices and violated the Wisconsin DTPA by making misrepresentations and failing to disclose and actively concealing the ignition switch defects in the Defective Vehicles.

2781. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or commerce in violation of the Wisconsin DTPA, and also has successor liability for the violations of Old GM.

2782. As alleged above, both Companies knew of the ignition switch defects, while the Wisconsin Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2783. The Companies knew or should have known that their conduct violated the Wisconsin DTPA.

2784. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2785. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2786. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2787. The Companies each owed Wisconsin Class members a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from the Wisconsin Class; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from the Wisconsin Class that contradicted these representations.

2788. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the Wisconsin Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2789. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the Wisconsin Class, about the true safety and reliability of

Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the Wisconsin Class.

2790. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to the Wisconsin Class. Had the Wisconsin Class known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2791. All members of the Wisconsin Class suffered ascertainable loss caused by the Companies' failure to disclose material information. Wisconsin Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and Wisconsin Class members own vehicles that are not safe.

2792. The Wisconsin Class has been damaged by Old GM and New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished because of Old GM and New GM's failure to timely disclose and remedy the serious defects. Old GM and New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in Old GM and New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2793. Wisconsin Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the Wisconsin DTPA, and these violations present a continuing risk to the Wisconsin Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest.

2794. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2795. As a direct and proximate result of the Companies' violations of the Wisconsin DTPA, Wisconsin Class members have suffered injury-in-fact and/or actual damage.

2796. The Wisconsin Class is entitled to damages and other relief provided for under WIS. STAT. § 110.18(11)(b)(2). Because the Companies' conduct was committed knowingly and/or intentionally, the Wisconsin Class is entitled to treble damages.

2797. The Wisconsin Class also seeks court costs and attorneys' fees under WIS. STAT. § 110.18(11)(b)(2).

ONE HUNDRED FORTY-SEVENTH CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2798. In the event the Court declines to certify a nationwide Class, this claim is brought on behalf of the Wisconsin Class.

2799. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2800. The Companies knew these representations were false when made.

2801. The vehicles purchased or leased by the Wisconsin Class were, in fact, defective, unsafe, and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2802. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because the Wisconsin Class relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2803. The aforementioned concealment was material because if it had been disclosed Wisconsin Class members would not have bought, leased, or retained their vehicles.

2804. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing, or retaining a new or used motor vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2805. The Wisconsin Class relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing, or retaining the Defective Vehicles.

2806. As a result of their reliance, the Wisconsin Class has been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

2807. The Companies' conduct was knowing, intentional, with malice, demonstrated a complete lack of care, and was in reckless disregard for the rights of the Wisconsin Class. Wisconsin Class members are therefore entitled to an award of punitive damages.

WYOMING

ONE HUNDRED FORTY-EIGHTH CLAIM FOR RELIEF

VIOLATION OF THE WYOMING CONSUMER PROTECTION ACT
(WYO. STAT. § 40-12-105 *et. seq.*)

2808. This claim is brought on behalf of Class members who are Wyoming residents (the "Wyoming Class").

2809. The Wyoming Class members, Old GM, and New GM are "persons" within the meaning of WYO. STAT. § 40-12-102(a)(i).

2810. The sales of the Defective Vehicles to the Wyoming Class were "consumer transaction[s]" within the meaning of WYO. STAT. § 40-12-105.

2811. Under the Wyoming Consumer Protection Act ("Wyoming CPA"), a person engages in a deceptive trade practice when, in the course of its business and in connection with a consumer transaction it knowingly: "(iii) Represents that merchandise is of a particular standard, grade, style or model, if it is not"; "(v) Represents that merchandise has been supplied in accordance with a previous representation, if it has not…"; "(viii) Represents that a consumer transaction involves a warranty, a disclaimer of warranties, particular warranty terms, or other rights, remedies or obligations if the representation is false"; "(x) Advertises merchandise with intent not to sell it as advertised"; or "(xv) Engages in unfair or deceptive acts or practices." WYO. STAT. § 45-12-105.

2812. The Companies willfully failed to disclose and actively concealed the ignition switch defects in the Defective Vehicles as described above in violation of the Wyoming CPA. The Companies engaged in deceptive trade practices, including (among other things) representing that the Defective Vehicles are of a particular standard and grade, which they are

not; advertising the Defective Vehicles with the intent not to sell them as advertised; and overall engaging in unfair and deceptive acts or practices.

2813. In the course of their business, both Old GM and New GM willfully failed to disclose and actively concealed the dangerous ignition switch defects in the Defective Vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. Old GM and New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of Defective Vehicles. New GM is directly liable for engaging in unfair and deceptive acts or practices in the conduct of trade or commerce in violation of the Wyoming CPA, and also has successor liability for the violations of Old GM.

2814. As alleged above, both Companies knew of the ignition switch defects, while the Wyoming Class was deceived by the Companies' omission into believing the Defective Vehicles were safe, and the information could not have reasonably been known by the consumer.

2815. The Companies knew or should have known that their conduct violated the Wyoming CPA.

2816. As alleged above, the Companies made material statements about the safety and reliability of Defective Vehicles that were either false or misleading.

2817. Old GM engaged in a deceptive trade practice when it failed to disclose material information concerning the Defective Vehicles which it knew at the time of the sale. Old GM deliberately withheld the information about the vehicles' propensity to inadvertently

shut down in order to ensure that consumers would purchase its vehicles and to induce the consumer to enter into a transaction.

2818. From its inception in 2009, New GM has known of the ignition switch defects that exist in millions of Defective Vehicles sold in the United States. But, to protect its profits and to avoid remediation costs and a public relations nightmare, New GM concealed the defects and their tragic consequences and allowed unsuspecting new and used car purchasers to continue to buy the Defective Vehicles and allowed all Defective Vehicle owners to continue driving highly dangerous vehicles.

2819. The Companies each owed the Wyoming Class a duty to disclose the defective nature of Defective Vehicles, including the dangerous risk of ignition switch movement, engine shutdown, and disabled safety airbags, because they:

a. Possessed exclusive knowledge of the defects rendering Defective Vehicles inherently more dangerous and unreliable than similar vehicles;

b. Intentionally concealed the hazardous situation with Defective Vehicles through their deceptive marketing campaign and recall program that they designed to hide the life-threatening problems from the Wyoming Class; and/or

c. Made incomplete representations about the safety and reliability of Defective Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from the Wyoming Class that contradicted these representations.

2820. The Defective Vehicles posed and/or pose an unreasonable risk of death or serious bodily injury to the Wyoming Class, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents of sudden and unintended engine shutdown.

2821. The Companies' unfair or deceptive acts or practices were likely to deceive reasonable consumers, including the Wyoming Class, about the true safety and reliability of Defective Vehicles. The Companies intentionally and knowingly misrepresented material facts regarding the Defective Vehicles with an intent to mislead the Wyoming Class.

2822. The propensity of the Defective Vehicles to inadvertently shut down during ordinary operation was material to the Wyoming Class. Had the Wyoming Class known that their vehicles had these serious safety defects, they would either not have purchased their Defective Vehicles, or would have paid less for them than they did.

2823. All members of the Wyoming Class suffered ascertainable loss caused by the Companies' failure to disclose material information. Wyoming Class members overpaid for their vehicles and did not receive the benefit of their bargain. As the result of the concealment and failure to remedy the serious safety defect, and the piecemeal and serial nature of the recalls, the value of their Defective Vehicles has diminished now that the safety issues in the Defective Vehicles, and the many other serious safety issues and myriad defects in the Companies' vehicles have come to light, and Wyoming Class members own vehicles that are not safe.

2824. The Wyoming Class has been damaged by Old GM and New GM's misrepresentations, concealment, and non-disclosure of the ignition switch defects in the Defective Vehicles, as they are now holding vehicles whose value has greatly diminished because of Old GM and New GM's failure to timely disclose and remedy the serious defects. Old GM and New GM's egregious and widely-publicized conduct and the never-ending and piecemeal nature of New GM's recalls, and the many other serious defects in Old GM and New GM vehicles, have so tarnished the Defective Vehicles that no reasonable consumer

would purchase them—let alone pay what would otherwise be fair market value for the vehicles.

2825. Wyoming Class members risk irreparable injury as a result of the Companies' act and omissions in violation of the Wyoming CPA, and these violations present a continuing risk to the Wyoming Class as well as to the general public. The Companies' unlawful acts and practices complained of herein affect the public interest

2826. The recalls and repairs instituted by New GM have not been adequate. The recall is not an effective remedy and is not offered for all Defective Vehicles.

2827. As a direct and proximate result of the Companies' violations of the Wyoming CPA, Wyoming Class members have suffered injury-in-fact and/or actual damage.

2828. Pursuant to WYO. STAT. § 40-12-108(a), the Wyoming Class seeks monetary relief against New GM measured as actual damages in an amount to be determined at trial, in addition to any other just and proper relief available under the Wyoming CPA.

2829. On October 12, 2014, Plaintiffs sent a notice letter complying with WYO. STAT. § 45-12-109. Plaintiffs presently do not claim the damages relief asserted in this Complaint under the Wyoming CPA until and unless New GM fails to remedy its unlawful conduct towards the class within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Wyoming Class are entitled.

ONE HUNDRED FORTY-NINTH CLAIM FOR RELIEF

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY (WYO. STAT. § 34.1-2-314)

2830. In the event the Court declines to certify a nationwide Class, Plaintiffs brings this claim on behalf of the Wyoming Class.

2831. Old GM and New GM were at all relevant times merchants with respect to motor vehicles.

2832. Under Wyoming law, a warranty that the Defective Vehicles were in merchantable condition was implied when Wyoming Class members purchased their Defective Vehicles.

2833. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the non-deployment of airbags in the event of a collision.

2834. Old GM and New GM were provided notice of these issues by numerous complaints filed against them, their own internal investigations, and by numerous individual letters and communications sent by Wyoming Class members before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2835. As a direct and proximate result of Old GM and New GM's breach of the warranty of merchantability, the Wyoming Class has been damaged in an amount to be proven at trial.

ONE HUNDRED FIFTIETH CLAIM FOR RELIEF

FRAUD BY CONCEALMENT

2836. In the event the Court declines to certify a nationwide Class under Michigan law, this claim is brought on behalf of the Wyoming Class.

2837. As described above, Old GM and New GM made material omissions and affirmative misrepresentations regarding the Defective Vehicles.

2838. The Companies knew these representations were false when made.

2839. The vehicles purchased or leased by the Wyoming Class were, in fact, defective, unsafe and unreliable, because the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision.

2840. The Companies had a duty to disclose that these vehicles were defective, unsafe and unreliable in that the vehicles were subject to sudden unintended shut down, with the attendant loss of power steering, power brakes, and the non-deployment of airbags in the event of a collision because the Wyoming Class relied on the Companies' representations that the vehicles they were purchasing and retaining were safe and free from defects.

2841. The aforementioned concealment was material because if it had been disclosed the Wyoming Class would not have bought, leased, or retained their vehicles.

2842. The aforementioned representations were material because they were facts that would typically be relied on by a person purchasing, leasing, or retaining a new or used motor vehicle. The Companies knew or recklessly disregarded that their representations were false because they knew that people had died as the result of the vehicles' defective ignition switch systems. The Companies intentionally made the false statements in order to sell vehicles and avoid the expense and public relations nightmare of a recall.

2843. The Wyoming Class relied on the Companies' reputation—along with their failure to disclose the ignition switch system problems and the Companies' affirmative assurance that its vehicles were safe and reliable and other similar false statements—in purchasing, leasing, or retaining the Defective Vehicles.

2844. As a result of their reliance, Wyoming Class members have been injured in an amount to be proven at trial, including, but not limited to, their lost benefit of the bargain and overpayment at the time of purchase and/or the diminished value of their vehicles.

2845. The Companies' conduct was knowing, intentional, with malice, demonstrated a complete lack of care, and was in reckless disregard for the rights of the Wyoming Class. Wyoming Class members are therefore entitled to an award of punitive damages.

ONE HUNDRED FIFTY-FIRST CLAIM FOR RELIEF

NEGLIGENCE
(On Behalf of the Arkansas, Louisiana, Maryland, and Ohio Classes)

2846. Plaintiffs Camille Burns, Jennifer Crowder, Robert Wyman, George Mathis, Jayn Roush, Bonnie Taylor, and Sharon Dorsey ("Plaintiffs," for purposes of this Count) bring this Count on behalf of the Arkansas, Louisiana, Maryland, and Ohio State Classes ("Negligence Classes").

2847. Old GM and New GM have designed, manufactured, sold, or otherwise placed in the stream of commerce Vehicles with defects, as set forth above.

2848. Od GM and New GM had a duty to design and manufacture a product that would be safe for its intended and foreseeable uses and users, including the use to which its products were put by Plaintiffs and the other members of the Negligence Classes. Old GM and New GM breached their duties to Plaintiffs and the other members of the Negligence Classes because they were negligent in the design, development, manufacture, and testing of the Vehicles, and New GM is responsible for this negligence.

2849. Old GM and New GM were negligent in the design, development, manufacture, and testing of the Vehicles because they knew, or in the exercise of reasonable care should have known, that the Vehicles equipped with defective ignition systems pose an unreasonable

risk of death or serious bodily injury to Plaintiffs and the other members of the Negligence Classes, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents in which brakes, power steering, and airbags are all rendered inoperable.

2850. Whereupon Plaintiffs, individually and on behalf of the other members of the Negligence Classes, respectfully rely upon the Restatement (Second) of Torts § 395.

2851. Old GM and New GM further breached their duties to Plaintiffs and the other members of the Negligence Classes by supplying directly or through a third person defective Vehicles to be used by such foreseeable persons as Plaintiffs and the other members of the Negligence Classes when:

a. Old GM and New GM knew or had reason to know that the Vehicles were dangerous or likely to be dangerous for the use for which they were supplied; and

b. Old GM and New GM failed to exercise reasonable care to inform customers of the dangerous condition or of the facts under which the Vehicles are likely to be dangerous.

2852. Old GM and New GM had a continuing duty to warn and instruct the intended and foreseeable users of its Vehicles, including Plaintiffs and the other members of the Negligence Classes, of the defective condition of the Vehicles and the high degree of risk attendant to using the Vehicles. Plaintiffs and the other members of the Negligence Classes were entitled to know that the Vehicles, in their ordinary operation, were not reasonably safe for their intended and ordinary purposes and uses.

2853. At all times at which Old GM and New GM knew or should have known of the defects described herein, Old GM and New GM breached its duty to Plaintiffs and the other

members of the Negligence Classes because it failed to warn and instruct the intended and foreseeable users of its Vehicles of the defective condition of the Vehicles and the high degree of risk attendant to using the Vehicles.

2854. As a direct and proximate result of Old GM and New GM's negligence, Plaintiffs and the other members of the Negligence Classes suffered damages.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs, individually and on behalf of the Classes as defined herein, respectfully request that this Court enter a judgment against New GM and in favor of Plaintiffs and the Classes, and grant the following relief:

A. Determine that this action may be maintained and certified as a class action on a nationwide, statewide, and/or multistate basis under Rule 23(b)(1), 23(b)(2) and/or 23(b)(3); or alternatively, certify all questions, issues and claims that are appropriately certified under 23(c)(4); and that it designate and appoint Plaintiffs as Class Representatives, and appoint Class Counsel under Rule 23(g).

B. Declare, adjudge, and decree the conduct of New GM, as alleged herein, to be unlawful, unfair, and/or deceptive; enjoin any such future conduct; and issue an injunction under which the Court will, *inter alia*: (1) monitor New GM's response to problems with its recalls, defects in its replacement parts, and efforts to improve its safety processes, and (2) establish by Court decree and administrator, under Court supervision, a program funded by New GM, under which claims can be made and paid for Class members' recall-related out-of-pocket expenses and costs;

C. Award Plaintiffs and Class members their actual, compensatory and/or statutory damages, according to proof;

D. Award Plaintiffs and the Class members punitive and exemplary damages in an amount sufficient to punish New GM for its misconduct and deter the repetition of such conduct by New GM or others;

E. Award Plaintiffs and Class members their reasonable attorneys' fees, costs, and pre-judgment and post-judgment interest;

F. Award Plaintiffs and Class members restitution and/or disgorgement of New GM's ill-gotten gains for the conduct described in this Complaint; and

G. Award Plaintiffs and Class members such other, further and different relief as the case may require; or as determined to be just, equitable, and proper by this Court.

JURY TRIAL DEMANDED

Plaintiffs request a trial by jury on all claims so triable.

Dated: October 14, 2014

67. Scott Schultz—Wisconsin 50
68. Bedford Auto Sales, Inc.—Nationwide Dealer and Ohio State Class Representative 51

B. Defendant 52

IV. FACTUAL ALLEGATIONS 53

A. New GM Falsely Promoted All of Its Vehicles as Safe, Reliable, and High-Quality 53

B. New GM's Advertising and Marketing Literature Falsely Claimed that GM Placed Safety and Quality First 65

C. Contrary to its Barrage of Representations about Safety and Quality, New GM Concealed and Disregarded Safety Issues as a Way of Doing Business 79

D. New GM's Deceptions Continued In Its Public Discussions of the Ignition Switch Recalls 85

E. There Are Serious Safety Defects in Millions of GM-Branded Vehicles Across Many Models and Years and, Until Recently, New GM Concealed Them from Consumers 87

F. The Ignition Switch System Defects 89

1. New GM learns of the defective ignition switch. 92

2. New GM continues to conceal the ignition switch defect. 101

3. New GM receives complaints of power failures in Defective Ignition Switch Vehicles. 109

4. New GM recalls 2.1 million vehicles with defective ignition switches. 110

5. New GM recalls over 10 million additional vehicles for ignition switch defects in June and July of 2014. 112

a. June 19, 2014 Recall—Camaro Recall 113

b. June 20, 2014 recall—ignition key slot defect. 120

c. July 2 and 3, 2014 recalls—unintended ignition rotation defect. 133

6. Yet another ignition switch recall is made on September 4, 2014. 154

7. The ignition switch recalls are inadequate and poorly conducted. 157

a. New GM failed to alert drivers of recalled vehicles to the possibility of obtaining a loaner vehicle, and when consumers are aware, they often find that loaner vehicles are not available. 158

b. The repair is inadequate and/or results in new vehicle defects. 161

c. The recall is untimely. 163

d. The repair of the other ignition switch defects. 165

G. Other Safety and Important Defects Affecting Numerous GM-branded Vehicles 166

1. Other safety defects affecting the ignition in GM-branded vehicles. 167

a. Ignition lock cylinder defect in vehicles also affected by the ignition switch defect that gave rise to the first recall of 2.1 million defective ignition switch vehicles. 167

b. Ignition lock cylinder defect affecting over 200,000 additional GM-branded vehicles. 171

2. Defects affecting the occupant safety restraint system in GM-branded vehicles. 172

a. Safety defects of the airbag systems of GM-branded vehicles. 172

(1) Wiring harness defect. 172

(2) Driver-side airbag shorting-bar defect. 175

(3) Driver-side airbag inflator defect. 176

(4) Roof-rail airbag defect. 177

(5) Passenger-side airbag defect. 179

(6) Sport seat side-impact airbag defect. 180

(7) Passenger-side airbag inflator defect. 180

(8) Front passenger airbag defect. 182

b. Safety defects of the seat belt systems in GM-branded vehicles....182

(1) Seat belt connector cable defect....182

(2) Seat belt retractor defect. 184

(3) Frontal lap-belt pretensioner defect. 185

3. Safety defects affecting seats in GM-branded vehicles. 187

4. Safety defects affecting the brakes in GM-branded vehicles....188

a. Brake light defect....188

b. Brake booster pump defect. 192

c. Hydraulic boost assist defect. 193

d. Brake rotor defect. 193

e. Reduced brake performance defect....194

f. Parking brake defect. 195

5. Safety defects affecting the steering in GM-branded vehicles. 195

a. Sudden power-steering failure defect. 195

b. Power steering hose clamp defect....198

c. Power steering control module defect....198

d. Lower control arm ball joint defect. 199

e. Steering tie-rod defect....200

f. Joint fastener torque defect. 200

6. Safety defects affecting the powertrain in GM-branded vehicles. 201

a. Transmission shift cable defect affecting 1.1 million Chevrolet and Pontiac vehicles....201

b. Transmission shift cable defect affecting Cadillac vehicles. 203

c. Transmission oil cooler line defect. 204

d. Transfer case control module software defect. 208

e. Acceleration-lag defect. 209

f. Transmission turbine shaft fracture defect. 210

g. Automatic transmission shift cable adjuster. 211

7. Other serious defects affecting GM-branded vehicles. 212

a. Power management mode software defect. 212

b. Light control module defect. 212

c. Electrical short in driver's door module defect. 213

d. Front axle shaft defect. 214

e. Seat hook weld defect. 215

f. Front turn signal bulb defect. 215

g. Low-beam headlight defect. 216

h. Radio chime defect. 217

i. Fuel gauge defect. 218

j. Windshield wiper system defect. 219

k. Console bin door latch defect. 220

l. Driver door wiring splice defect. 221

m. Overloaded feed defect. 222

n. Windshield wiper module assembly defect. 223

o. Engine block heater power cord insulation defect. 224

p. Rear shock absorber defect. 224

q. Electronic stability control defect. 224

r. Unsecured floor mat defect. 225

s. Fuse block defect. 226

t. Diesel transfer pump defect. 227

u. Rear suspension toe adjuster link defect. 228

v. Hood latch defect 229

w. Electrical short defect. 230

H. New GM's Deception Recalls Has Harmed Plaintiffs and the Class 231

V. TOLLING OF THE STATUTES OF LIMITATION 242

A. Discovery Rule Tolling 242

B. Fraudulent Concealment Tolling 243

C. Estoppel 243

VI. CHOICE OF LAW ALLEGATIONS 244

VII. CLASS ALLEGATIONS 245

A. The Nationwide Class 245

PRAYER FOR RELIEF 685

IX. JURY TRIAL DEMAND 686

This Consolidated and Amended Complaint ("Complaint") is filed as a civil action in this Court and is intended to serve as the Plaintiffs' Master Class Action Complaint for purposes of discovery, pre-trial motions and rulings (including for choice of law rulings relevant to Rule 23 of the Federal Rules of Civil Procedure, and class certification itself), and trial of certified claims or common questions in these multi-district litigation ("MDL") proceedings. This pleading, consistent with Fed. R. Civ. P. 1's directive to secure the "just, speedy and inexpensive determinations of every action and proceeding," extensively details New GM's unprecedented abrogation of basic standards of safety, truthfulness, and accountability to the detriment of tens-of-millions of consumers and the public at large. This Complaint draws upon an array of sources, including a careful review of the documents produced to date (including tens-of-thousands of pages of unheeded consumer complaints), New GM's own public concessions, and other extensive materials. Notwithstanding the foregoing, certain claims or issues for certain parties may, consistent with 28 U.S.C. § 1407 and the case law thereunder, be matters for determination on remand by transferor courts.

This pleading neither waives nor dismisses any claims for relief against any defendant not included in this pleading that are asserted by any other plaintiffs in actions that have been or will be made part of this MDL proceeding, except by operation of the class notice and (with respect to any Rule 23(b)(3) class) any opt-out provisions on claims or common questions asserted in this Complaint and certified by this Court.

I. INTRODUCTION

1. Rule No. 1: Manufacturers of any product—from toys to automobiles—must manufacture and sell products that are, above all else, safe to use. Not only is safety essential to long-term brand value and corporate success, it's also required by law.

2. Rule No. 2: Manufacturers must also tell the complete truth about the safety of their products. When a safety defect does occur, manufacturers must initiate some form of recall to address the problem.

3. New GM violated both of these rules. It manufactured and sold over 27 million vehicles that were not safe. New GM also failed to disclose the truth about its ability to manufacture and sell safe and reliable vehicles, and failed to remedy the defects in millions of GM-branded vehicles that were on the road.

4. New GM led consumers in the United States and worldwide to believe that, after bankruptcy, it was a new company. For example, in numerous public announcements and public filings, such as in its 2012 Annual Report, New GM repeatedly proclaimed that it was a company committed to innovation, safety, and maintaining a strong brand. An example from its 2012 Annual Report:

TO OUR STOCKHOLDERS:

Last year, I closed my letter to you by talking about how GM was changing its processes and culture in order to build the best vehicles in the world much more efficiently and profitably. This year, I want to pick up where I left off, and articulate what success looks like for you as stockholders, and for everyone else who depends on us. »

5. New GM was successful in selling its "processes and culture change" and building "the best vehicles in the world" story. Sales of all New GM models went up, and New GM became profitable. As far as the public knew, a new General Motors was born, and the GM brand once again stood strong in the eyes of consumers.

6. New GM's brand image was an illusion given New GM's egregious failure to disclose, and the affirmative concealment of, ignition switch defects and a plethora of other safety defects in GM-branded vehicles. New GM concealed the existence of the many known safety defects plaguing many models and years of GM-branded vehicles, and New GM valued cost-cutting over safety, while concurrently marketing New GM vehicles as "safe" and "reliable," and claiming that it built the "world's best vehicles." Consequently, New GM enticed Plaintiffs and all GM-branded vehicle purchasers to buy or lease vehicles that have now diminished in value, as the truth about the New GM brand has come out and a stigma has attached to all GM-branded vehicles.

7. A vehicle made by a reputable manufacturer of safe and reliable vehicles is worth more than an otherwise similar vehicle made by a disreputable manufacturer that is known to devalue safety and to conceal serious defects from consumers and regulators. New GM vehicle Safety Chief, Jeff Boyer, recently highlighted the heightened materiality to consumers of safety: "Nothing is more important than the safety of our customers in the vehicles they drive." Yet New GM failed to live up to this commitment, instead choosing to conceal at least 60 serious defects in over 27 million GM-branded vehicles sold in the United States. And the value of all GM-branded Vehicles has diminished as a result of the widespread publication of those defects and New GM's corporate culture of ignoring and concealing safety defects.

8. The systematic concealment of known defects was deliberate, as New GM followed a consistent pattern of endless "investigation" and delay each time it became aware of a given defect. Recently revealed documents show that New GM valued cost-cutting over safety, trained its personnel to ***never*** use the word "defect," "stall," or other words suggesting that any GM-branded vehicles are defective, routinely chose the cheapest part supplier without regard to safety, and discouraged employees from acting to address safety issues.

9. In addition, GM was plagued by what CEO Mary Barra calls "transactional decision making," in which GM employees "color[] inside the lines of their own precise job description without thinking independently or holistically," *i.e.*, without looking at the larger issue of safety.[1]

10. In light of New GM's systemic devaluation of safety issues, it is not surprising that, from the date of its inception, New GM itself produced a grossly inordinate number of vehicles with serious safety defects. Until this year, New GM was successful in concealing both its disregard of safety and the myriad defects that resulted from that disregard.

11. According to the administrator of the National Highway Traffic Safety Administration ("NHTSA"), New GM worked to hide documents from NHTSA and created firewalls to prevent people within New GM from "connecting the dots" with respect to safety issues and defects. New GM did so to keep information about safety issues and defects secret.

12. The array of concealed defects is astounding and goes far beyond the ignition switch defects, the belated revelation of which sparked GM's 2014 serial recalls. The defects affected virtually every safety system in GM-branded vehicles, including but by no means limited to the airbags, seatbelts, brakes, brake lights, electronic stability control, windshield

[1] TIME MAGAZINE, October 6, 2014, p. 36.

wipers, sensing and diagnostic modules, and warning chimes. This defect list includes at least the following parts, many of which effect the vehicle's safety: (1) ignition switch, (2) power steering, (3) airbags, (4) brake lights, (5) shift cables, (6) safety belts, (7) ignition lock cylinders, (8) key design, (9) ignition key, (10) transmission oil cooler lines, (11) power management mode software defect, (12) substandard front passenger airbags, (13) light control modules, (14) front axle shafts, (15) brake boosts, (16) low-beam headlights, (17) vacuum line brake boosters, (18) fuel gauges, (19) accelerator, (20) flexible flat cable airbags, (21) windshield wipers, (22) brake rotors, (23) passenger-side airbags, (24) electronic stability control, (25) steering tie-rods, (26) automatic transmission shift cable adjusters, (27) fuse blocks, (28) diesel transfer pumps, (29) radio warning chimes, (30) shorting bars, (31) front passenger airbag end caps, (32) sensing and diagnostic modules ("SDM"), (33) sonic turbine shafts, (34) electrical systems, and (35) the seatbelt tensioning system.

13. New GM has received reports of crashes, deaths, injuries, and safety concerns expressed by GM's customers that put New GM on notice of the serious safety issues presented by many of these defects. Given the continuity of engineers, corporate counsel, and other key personnel from Old GM to New GM, New GM knew and was fully aware of the now infamous ignition switch defect (and many other serious defects in numerous models of GM-branded vehicles) ***from the very date of its inception on July 10, 2009***. New GM was not born innocent, and its public commitment to culture and process change remain entirely hollow.

14. New GM's claims that the defects were known only to lower level engineers is false. For example, current CEO Mary Barra, while head of product development, was informed in 2011 of a safety defect in the electronic power steering of several models. Despite 4,800

consumer complaints and more than 30,000 warranty repairs, GM waited until 2014 to disclose this defect.

15. Despite the dangerous nature of many of the defects and their effects on critical safety systems, New GM concealed the existence of the defects, created new defects, and failed to begin to remedy the problems from the date of its inception until this year.

16. New GM's now highly publicized campaign of deception in connection with the ignition switch defect first revealed in February 2014 sent shockwaves throughout the country and jump-started the ever-burgeoning erosion of consumer confidence in the New GM brand. Unfortunately for all owners of vehicles sold by New GM, the ignition switch defect announced in February 2014 was only one of a seemingly never-ending parade of recalls in 2014—many concerning safety defects that had been long known to New GM.

17. On May 16, 2014, New GM entered into a Consent Order with NHTSA in which it admitted that it violated the TREAD Act by not disclosing the ignition switch defect that gave rise to the February and March 2014 recalls, and agreed to pay the maximum available civil penalties for its violations.

18. New GM's CEO, Mary Barra, has admitted in a video message that: "Something went wrong with our process…, and terrible things happened." But that admission is cold comfort for Plaintiffs and the Class, whose vehicles have diminished in value as a result of New GM's deception.

19. New GM systematically and repeatedly breached its obligations and duties to its customers to make truthful and full disclosures concerning its vehicles—particularly, the safety and reliability of its vehicles and the importance of safety to the Company. New GM's false representations and/or omissions concerning the safety and reliability of its vehicles, and its

concealment of a plethora of known safety defects plaguing its vehicles and its brand, caused Plaintiffs and the Class to purchase GM-branded vehicles under false pretenses.

20. Plaintiffs and the Class have been damaged by New GM's conduct, misrepresentations, concealment, and non-disclosure of the numerous defects plaguing over 27 million GM-branded vehicles. Now that the truth is emerging, and consumers are aware that New GM concealed known safety defects in many models and years of its vehicles, and that the Company de-valued safety and systemically encouraged its employees to conceal serious defects, the entire New GM brand is greatly tarnished by the revelation that the Company is untrustworthy and does not stand behind its vehicles. The value of GM-branded vehicles has therefore diminished because of New GM's failure to timely disclose and remedy the many serious defects in GM-branded vehicles after the truth of New GM's safety record and culture of deceit was exposed. Examples: The 2010 and the 2011 Chevrolet Camaro have both seen a diminished value of $2,000 when compared to the value of comparable vehicles; the 2009 Pontiac Solstice has diminished $2,900 in value; the 2010 Cadillac STS diminished in value by $1,235 in September 2014; and the 2010 Buick LaCrosse by $649 in that same month. New GM's egregious and widely publicized conduct and the never-ending and piecemeal nature of New GM's recalls has so tarnished GM-branded vehicles that no reasonable consumer would have paid the price they did when the New GM brand supposedly meant safety and success.

21. Plaintiffs pursue their claims on behalf of a Class generally and initially defined as all persons who purchased or leased a GM-branded between July 11, 2009, and July 3, 2014 (the "Affected Vehicles") and who (i) still own or lease an Affected Vehicle, (ii) sold an Affected Vehicle on or after February 14, 2014, and/or (iii) purchased or leased an Affected Vehicle that was declared a total loss after an accident on or after February 14, 2014. Plaintiffs

assert claims for a nationwide class applying Michigan law for claims of fraudulent concealment, unjust enrichment, the implied warranty of merchantability, and the Magnuson-Moss Warranty Act. Plaintiffs also assert claims based upon the laws of all fifty states and the District of Columbia for a class in each jurisdiction for damages, statutory penalties, and declaratory, equitable and injunctive relief against New GM for, among other things, violations of state unfair and deceptive trade practice acts, as more specifically set forth in the claims for relief asserted below.

II. JURISDICTION AND VENUE

22. This Court has diversity jurisdiction over this action under 28 U.S.C. §§ 1332(a) and (d) because the amount in controversy for the Class exceeds $5,000,000, and Plaintiffs and other Class members are citizens of a different state than Defendant.

23. This Court has personal jurisdiction over Plaintiffs because Plaintiffs submit to the Court's jurisdiction. This Court has personal jurisdiction over New GM because New GM conducts substantial business in this District, and some of the actions giving rise to the complaint took place in this District.

24. Venue is proper in this District under 28 U.S.C. § 1391 because New GM, as a corporation, is deemed to reside in any judicial district in which it is subject to personal jurisdiction. Additionally, New GM transacts business within the District, and some of the events establishing the claims arose in this District.

III. PARTIES

25. Pursuant to the Court's instructions that Plaintiffs could file directly in the MDL court and reserve the right to have filed in another district, this Complaint is filed by each new Plaintiff as if they had filed in the district in which they reside.

A. Plaintiffs

26. Unless otherwise indicated, each Plaintiff purchased or leased his or her GM-branded vehicle primarily for personal, family, or household use.

1. Melissa Cave—Alabama

27. Plaintiff and proposed Nationwide and Alabama State Class Representative Melissa Cave is a resident and citizen of New Hope, Alabama. Ms. Cave purchased a used 2006 Chevrolet Cobalt on February 15, 2013, at High Country Toyota in Scottsboro, Alabama for approximately $7,000. Her vehicle was not covered by a warranty. Ms. Cave drives 23 miles to work and during her drive she has known her Cobalt to shut off more than 50 times in a trip. On June 21, 2014, Ms. Cave totaled her car after it shut off while she was driving approximately 35-40 miles per hour. She sustained injuries to her knee, bruising from the seatbelt, and chemical burns to her thumb and hand from the airbag. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car.

2. Valeria Glenn—Alabama

28. Plaintiff Valeria Glenn resides in Alabaster, Alabama. She purchased a used 2006 Pontiac Solstice in February 2013 in Pelham, Alabama for $13,000. The vehicle has a 100,000 mile warranty. Ms. Glenn has experienced shut downs and locking of her steering wheel while driving her vehicle. Ms. Glenn had her ignition switch replaced pursuant to the recall. Since that time, the air conditioning in her vehicle is no longer working, although it worked fine before the replacement. Knowing what she now knows about the safety defects in many GM-branded vehicles, and the Solstice in particular, she would not have purchased the vehicle and does not feel safe driving the vehicle.

3. Barbara Hill—Arizona

29. Plaintiff and proposed Nationwide and Arizona State Class Representative Barbara Hill is a resident and citizen of Mesa, Arizona. Ms. Hill purchased a used 2007

Chevrolet Cobalt on July 9, 2012, for approximately $12,000 at the Auto Nation in Tempe, Arizona. Ms. Hill purchased the Cobalt after performing research about vehicles and, based on that research, believing the Cobalt to be a safe and reliable vehicle. She no longer feels safe driving the vehicle. Ms. Hill had her ignition switch replaced in May 2014, but she does not trust that the replacement will resolve the vehicle's safety defect. Had she known about the problems with her GM-branded vehicle, she would he would not have purchased the car.

4. Courtney Williams—Arkansas

30. Plaintiff and proposed Nationwide and Arkansas State Class Representative Courtney Williams is a resident and citizen of West Memphis, Arkansas. Mr. Williams purchased a used 2011 Chevrolet Camaro on or about April 15, 2013, at Frank Fletcher Dodge in Sherwood, Arkansas for over $33,585. Mr. Williams experienced at least one complete shutdown of the Camaro on or about September 17, 2014, after driving over a bump in the road. He has also experienced difficulty in steering his vehicle. Mr. Williams has not yet had his car repaired under the recall because New GM informed him the parts are not yet available. Mr. Williams believes he suffered a diminution of value in his vehicle due to the ignition switch defects, the recalls and the surrounding publicity. He would not have purchased the Camaro, or he would have paid less for it, had he known about these defects.

5. Nettleton Auto Sales, Inc.—Nationwide Dealer and Arkansas Class Representative

31. Plaintiff and proposed Nationwide and Arkansas State Class Representative Nettleton Auto Sales, Inc. maintains its principal place of business in Jonesboro, Arkansas. Nettleton Auto Sales, Inc. purchased the following GM-branded vehicles with the intention to resale same:

- Vehicle #1: used 2009 Chevy HHR on March 27, 2014, in Nashville, Tennessee for $10,865, plus $1,268.32 in shipping costs;

- Vehicle #2: used 2011 Chevy HHR on February 14, 2014, in Jonesboro, Arkansas for $5,850, plus $1,079.49 in shipping and repair costs; and

- Vehicle #3: used 2010 Chevy HHR on March 12, 2014, in Jonesboro, Arkansas for $6,000, plus $5,028.13 in additional shipping and repair costs.

32. The 2009 HHR is still in the possession of Nettleton Auto Sales, Inc. The other two have been sold to Arkansas consumers. The 2011 HHR is currently covered by a warranty, while the other two are not. The 2011 HHR had its ignition switch replaced on June 30, 2014, and the other two vehicles have not had the repair performed. Nettleton Auto Sales, Inc. continues to try and sell the 2009 HHR. The 2011 HHR was sold to consumers on June 28, 2014, in fair condition for $8,500 with mileage of 126,682. The 2010 HHR was sold to consumers on June 4, 2014, in fair condition for $12,900 with 86,960 in mileage. Nettleton Auto Sales, Inc. believes the value of its vehicle have been diminished as a result of the defects. It would not have purchased these cars if New GM had been honest about the safety defects.

6. Anna Andrews—California

33. Plaintiff and proposed Nationwide and California State Class Representative Anna Andrews is a resident and citizen of La Quinta, CA. She purchased a used 2010 Buick LaCrosse in Cathedral City, California on August 25, 2011, for $36,686.86. Ms. Andrews purchased her LaCrosse, in part, because she wanted a safely designed and manufactured vehicle. She further believed that New GM was a reputable manufacturer of safe and reliable vehicles and that the Company stands behind its vehicles once they are on the road. Plaintiff did not learn of the many defects in GM-branded vehicles until shortly before filing this lawsuit.

Had New GM disclosed the many defects in GM-branded vehicles, Plaintiff would either not have purchased her LaCrosse, or would have paid less than she did.

7. Marc Koppelman—California

34. Plaintiff and proposed Nationwide and California State Class Representative Marc Koppelman is a resident and citizen of Torrance, California. Mr. Koppelman purchased a certified used 2010 Chevy HHR in 2012 in California for approximately $12,900.00. The 2010 Chevy HHR was still covered under the original factory warranty, and the dealership provided an additional 1-year warranty as part of the purchase price. Mr. Koppelman's decision to buy the car was influenced by the perceived safety associated with the car's airbag system and advertising touting the car's reliability. This was important to Mr. Koppelman because his wife was going to be the principal driver. In June 2012, about 4 months after he purchased the vehicle, while driving in Maryland on a residential street, the HHR lost power and lost power steering. Mr. Koppelman managed to pump the brakes and get the car safely off the road. When he received his recall notice, Mr. Koppelman called his GM dealership and they told him that he should reduce the weight on his keychain. Mr. Koppelman had to wait for the dealer to receive the new parts so that his HHR would be repaired under the recall. In August 2014, the recall repair work was completed. After the GM dealers gave him "the run-around" with regard to getting the new part installed, he and his wife considered selling the vehicle. In late May or early June 2014, Mr. Koppelman researched his car on Kelley Blue Book and it was valued at approximately $9,200. He went to his local dealer, Martin Chevrolet in Torrance, California, and they only offered him $6,100 to trade it in. Mr. Koppelman was shocked at the low number so he declined to sell it. He then took the vehicle to another GM dealer in Long Beach, California and they quoted him a similar value as the last dealership. They told him that due to the recalls, the HHR's value had declined, and they were even lowering the retail prices on their

own vehicles for sale. In mid-July 2014, Mr. Koppelman checked Kelley Blue Book again and saw that his car value dropped to approximately $8,400. He remembers comparable HHRs were selling for $12,000-14,000 retail at the time the recalls were first announced, but now the retail price has dropped to approximately $10,000. Mr. Koppelman was a loyal GM-brand owner, having previously owned Corvettes, Buicks, and Cadillacs, but now he says he will never purchase a GM-branded vehicle again. Mr. Koppelman would not have purchased this vehicle had New GM been honest about the safety defects.

8. David Padilla—California

35. Plaintiff and proposed Nationwide and California State Class Representative David Padilla is a resident and citizen of Stockton, California. Mr. Padilla purchased a new 2010 Chevy Cobalt in April 2010 in Stockton, California for $21,690.27. The vehicle was under warranty when he purchased it. On one occasion, Mr. Padilla was backing out of his garage when his vehicle inexplicably shut off. As a result, Mr. Padilla was afraid to drive his vehicle. Those fears increased once he learned of the ignition switch recall and the risks posed by the defects. Mr. Padilla had the ignition switch replaced under the recall repair program. He believes the value of his vehicle has been diminished as a result of the defects. Mr. Padilla would not have purchased this car if New GM had been honest about the safety defects.

9. Daniel Ratzlaff—California

36. Plaintiff and proposed Nationwide and California State Class Representative Daniel Ratzlaff is a resident and citizen of Quartz Hill, California. Mr. Ratzlaff purchased a used a 2005 Chevy Equinox in October 2013 in Palmdale, California for $10,000. The vehicle was under warranty when he purchased it, and he also purchased an extended warranty which expires in 2015. Mr. Ratzlaff chose the Equinox, in part, because he wanted a safely designed and manufactured vehicle. He saw advertisements for GM-branded vehicles before he purchased the

Equinox and, although he does not recall the specifics of the advertisements, he does recall that safety and quality were consistent themes across the advertisements he saw. These representations about safety and quality influenced Mr. Ratzlaff's decision to purchase the Equinox. Mr. Ratzlaff experienced the ignition switch defect described by the General Motors recall. On several occasions, he remembers all electrical systems turning off, including air bags and dash-signaling monitor information. He would have to consistently turn the ignition switch on and off until the condition resolved, and felt that he was in danger. He did not learn of the ignition switch defects until about March 2014. Had he known about the ignition switch defects, he would not have purchased his Equinox, or would have paid less than he did, and would not have retained the vehicle.

10. Randall Pina—California

37. Plaintiff Randall Pina resides in Soledad, California. On or about April 25, 2011, Mr. Pina purchased a new 2011 Chevrolet HHR in Fresno, California for $23,270.99. Mr. Pina still owns the 2011 Chevrolet HHR, which is under extended warranty until April 25, 2018. Mr. Pina's vehicle is one of the cars recently identified by New GM as a Defective Vehicle. He believes that he overspent on a lower quality product and acquired a vehicle that posed an undisclosed risk to his health and safety. One of New GM's main selling points has been the efficiency, cost effectiveness, and safety of its vehicles. Plaintiff's purchase was based, in significant part, on these representations and assertions by New GM. New GM failed to disclose that most of its models over the last few years have contained defective ignition switches that pose a serious risk of injury and death to the driver and occupants, as well as other motorists and pedestrians on the road. If New GM had disclosed the nature and extent of its problems, Plaintiff would not have purchased a vehicle from New GM, or would not have purchased that the vehicle for the price paid.

11. Nathan Terry—Colorado

38. Plaintiff and proposed Nationwide and Colorado State Class Representative Nathan Terry is a resident and citizen of Loveland, Colorado. Mr. Terry purchased a used 2007 Pontiac G5 GT on January 4, 2011, in Westminster, Colorado for $10,589.49. He also purchased a three-year warranty on the vehicle. Mr. Terry decided to purchase this GM-branded vehicle after a thorough investigation, including online advertisements and reviews, regarding the brand and model's safety, reliability, and quality. Mr. Terry's car inadvertently shut down on him twice while driving. In one instance, he was in high traffic on the highway when the vehicle lost power and he had to force the car over to the shoulder of the road, a task made more difficult by the fact that his power steering had also shut down. Mr. Terry learned of the ignition switch defects in March 2014. The recall repairs were performed thereafter, after waiting for the parts to arrive. In the last month or two, in preparation to sell his car, Mr. Terry checked Kelley Blue Book against his vehicle, which was in excellent condition with low mileage and fully-equipped, and it was valued at $7,041. He then checked thirteen other 2007 Pontiac G5 GT models for sale at dealerships in his vicinity, and their advertised sale prices ranged from $7,367 to $9,000. Finally, he checked four models for sale by private owners, with sale prices ranging from $6,800 to $7,840. Several dozen private buyers contacted Mr. Terry about his vehicle, and three visited him to test drive it. All three potential buyers seemed to like the car, but were aware of the numerous GM recalls, including the ignition switch recalls pertaining to the model. Even though he listed his car at the $7,041 Kelley Blue Book price, the average offer for the car was $4,500. His bargaining value was noticeably impeded, as all potential buyers repeatedly referred to the recalls in their negotiations. It was clear to Mr. Terry that the potential buyers knew about these recalls and used it to their advantage. As he browsed dealerships at the same time, he also found the trade-in value was grossly hurt by the recalls. Again, all dealerships mentioned the safety

and recall issues, and out of six trade-in offers, the highest was $2,634. Because of the negative effects of the recalls on his vehicle value, Mr. Terry was eventually forced to sell the vehicle to CarMax at nearly half his vehicle's Kelley Blue Book value. Mr. Terry would not have purchased this GM-branded vehicle, or any GM-branded vehicle, had he known about its safety defects and New GM's deception. He will never purchase a GM-branded vehicle again.

12. LaTonia Tucker—Delaware

39. Plaintiff and proposed Nationwide and Delaware State Class Representative LaTonia Tucker is a resident and citizen of Dover, Delaware. Ms. Tucker purchased a used HHR in Dover, Delaware, in October 2013 for $8,000. She purchased the vehicle with a six month warranty. Ms. Tucker purchased the HHR because she drives long distances on the highway to and from work and wanted a safe vehicle. Ms. Tucker experienced a stall while driving her vehicle on a highway; she was able to stop the car at the side of the road. It took several tries before she was able to restart the vehicle. After this event, she took her car to a mechanic, but the mechanic was unable to determine the cause of the stall. Even after having her ignition switch replaced pursuant to the recall, Ms. Tucker feels unsafe driving her vehicle. The vehicle also now has a noise it did not have before the ignition switch was replaced, but the dealership told her it is unable to find anything wrong with her vehicle. She has grandchildren, and does not feel safe allowing them as passengers in her vehicle. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car.

13. Pajja Jackson—District of Columbia

Plaintiff and proposed Nationwide and District of Columbia State Class Representative Pajja Jackson is a resident and citizen of Washington, D.C. Mr. Jackson's grandmother purchased a new 2011 Buick Regal on August 23, 2010, in Mississippi for $31,393.40. The vehicle was covered under the standard manufacturer's warranty when she purchased it. After

his grandmother fell ill last year, Mr. Jackson took possession of the car and assumed its payments. Over the course of 2013, he paid the remaining $10,000 owed on the note and had the car re-titled in his name. Ever since he began driving the vehicle, Mr. Jackson has experienced the brakes locking up on him a handful of times. The worst incident occurred when he was driving at the airport. He was driving regularly and touched on his brakes when they seized up unexpectedly. He repeatedly pumped the brakes and they eventually unlocked. Then, this summer, the car's battery exploded and its acidic vapors infiltrated the car. Mr. Jackson took the vehicle into a GM dealership to have the battery issue repaired. This prompted Mr. Jackson to investigate the problems with his vehicle and the GM-brand in general. This investigation led him to the ignition switch defect, as well as the myriad of other recalls and problems associated with GM vehicles. Mr. Jackson also recently researched the value of his vehicle via the Internet and learned that his car was only selling for approximately $15,000. Because of his concern for both the safety of his vehicle and its dropping value, he has considered trying to sell it. But Mr. Jackson has refrained from doing so because his vehicle is paid off and he does not wish to incur a new car payment. As a father of two sons, ages one and four, Mr. Jackson is worried about the safety of driving his vehicle with his kids in the car. He no longer trusts the GM brand. Had he known about the safety defects and risks posed by his car and the GM-brand, he would not have purchased this car, but rather would have chosen another manufacturer.

14. Kim Genovese—Florida

40. Plaintiff and proposed Nationwide and Florida State Class Representative Kim Genovese is a resident and citizen of Lake Worth, Florida. Ms. Genovese purchased a used 2005 Saturn Ion in late 2009 in Boynton Beach, Florida for $5,500. She also purchased a 90-day warranty on the vehicle. She purchased because she believed that it was a reliable and safe vehicle with a good engine, and because it was a small, fuel efficient vehicle. Ms. Genovese has

experienced over 20 shutdown incidents with her vehicle. On many of these occasions, her vehicle would stop in the middle of the road and, sometimes, in the middle of an intersection; to restart her vehicle she would have to turn the key from the off position back to the on position. She also experienced issues with the vehicle not starting on multiple occasions. Upon hearing of the recall, Ms. Genovese stopped driving her vehicle and purchased another vehicle that she hopes is safer. On June 5, 2014, Ms. Genovese's Saturn Ion's ignition switch was replaced pursuant to the recall. Her husband still drives the vehicle because she doubts that anyone would purchase the vehicle given the widespread knowledge about the recalls. Knowing what Ms. Genovese now knows about the safety defect of her Saturn Ion, she would not have purchased the vehicle.

15. Rhonda Haskins—Florida

41. Plaintiff and proposed Nationwide and Florida State Class Representative Rhonda Haskins is a resident and citizen of Ocala, Florida. Ms. Haskins purchased a used 2007 Chevy Cobalt on November 15, 2013, in Ocala, Florida for $8,473.00. The vehicle was under a 30-day or 1,000 mile warranty when she purchased it. Approximately two or three times, Ms. Haskins' vehicle has shut-off while she was sitting idle in her Cobalt and her knee touched the ignition switch or key area. Ms. Haskins is concerned about her ongoing safety in driving the vehicle and believes its value is now greatly diminished as a result of the ignition switch defects. Ms. Haskins did not learn about the ignition switch defects until March 2014. She would not have purchased this vehicle had she known about the safety defects.

16. Joni Ferden-Precht—Florida

Plaintiff and proposed Nationwide and Florida State Class Representative Joni Ferden-Precht is a resident and citizen of Miami Lakes, Florida. Ms. Ferden-Precht purchased a new 2011 Chevy Traverse on May 27, 2011, in Miami Lakes, Florida for $33,262.17. The vehicle

was covered by the manufacturer's standard warranty when she purchased it. In deciding to buy this vehicle, Ms. Ferden-Precht consulted Chevy's advertising materials for the Traverse and also conducted many Internet searches on the vehicle model. She also saw TV advertisements and Miami Lakes Auto Mall newspaper advertisements about the Traverse. These advertisements and representations mentioned the safety and reliability of the Traverse, which influenced her decision to purchase the vehicle. Ms. Ferden-Precht experienced an airbag service light illuminating intermittently in her vehicle on multiple occasions before having her vehicle repaired under the airbag recall. She was concerned for her safety so she stopped driving her vehicle during these times, and because she did not receive a loaner vehicle, she was forced to car pool and find alternative means of transportation. Ms. Ferden-Precht would not have purchased this vehicle had she known about the safety defects.

17. Nykea Fox—Georgia

42. Plaintiff and proposed Nationwide and Georgia State Class Representative Nykea Fox is a resident and citizen of Marietta, Georgia. Ms. Fox purchased a used 2010 Chevrolet HHR in December 2012, from Steve Raymond Chevrolet in Smyrna, Georgia for approximately $17,000. Her vehicle was covered by a warranty at the time of purchase and she believes it may still be covered by a warranty. At the time, Internet searches showed that the vehicle appeared to have a good reputation for safety and reliability, with few negative comments. This fact and New GM's reputation as a quality brand—at the time—influenced her decision to buy the vehicle. Ms. Fox believed her vehicle was safe and defect free when she purchased it.

Ms. Fox's vehicle has shut off spontaneously several times in 2013. On one occasion, it shut off spontaneously while she was driving near her home. The vehicle gearshift was in "drive" and the ignition key was in the "run" position. On several other occasions at the end of a period of driving, the vehicle turned off when she attempted to move the vehicle into "park" mode.

Ms. Fox also experienced other problems with the ignition. On several occasions in 2013, the key got stuck in the ignition. Plaintiff Fox was ultimately successful in removing the key from the ignition, but it took a great deal of effort each time. Ms. Fox's ignition switch was replaced in the summer of 2014 in connection with the recalls. At the same time, New GM replaced other vehicle parts in connection with a separate power-steering recall. Ms. Fox sent the car in for ignition switch repairs in May of 2014 and received the vehicle back in August of 2014. Had New GM disclosed the defects in its vehicles, Ms. Fox would either not have purchased the vehicle, or would have paid less.

18. Barry Wilborn—Georgia

43. Plaintiff and proposed Nationwide and Georgia State Class Representative Barry Wilborn is a resident and citizen of Milner, Georgia. He purchased a used 2007 Chevrolet Cobalt in 2013 in Canton, Georgia in a private sale for $4,000. The car was not under warranty at the time of purchase. Within months of purchasing the vehicle, he experienced multiple shut downs while driving. The most recent shut down occurred while driving 60 mph on the highway; he had to veer to the right to avoid hitting another vehicle, went down an embankment and had to have his vehicle towed home. Following the last shut down, he substantially reduced his use of the vehicle because he thought it unsafe. Once he learned of the recall, he stopped driving the vehicle altogether. Mr. Wilborn purchased the vehicle because he believed New GM's representations that the vehicle was safe and reliable, and also based on its mileage rating. Mr. Wilborn's had his ignition switch replaced after his vehicle was at the dealership for over one month. Knowing what he now knows about the safety defects in many GM-branded vehicles, he would not have purchased the vehicle.

19. Patrick Painter—Illinois

44. Plaintiff and proposed Nationwide and Illinois State Class Representative Patrick Painter is a resident and citizen of Monee, Illinois. Mr. Painter purchased a new 2010 Chevy Cobalt in April 2011 at a GM dealership in Joliet, Illinois for approximately $21,000. His car was under warranty at the time he purchased it. In the summer of 2012, Mr. Painter had the ignition replaced because the vehicle would not turn off and the key could not be removed from the ignition. He recently received the ignition switch recall notice in the mail, but has not yet had the recall repairs performed. Mr. Painter believes the value of his vehicle has diminished, and he would either not have purchased the vehicle, or would have paid less for it, had New GM disclosed the defects in its vehicles.

20. Karen Rodman—Indiana

45. Plaintiff and proposed Nationwide and Indiana State Class Representative Karen Rodman is a resident and citizen of Kendallville, Indiana. Ms. Rodman purchased a used 2004 Saturn Ion in 2013 in Fort Wayne, Indiana, for $6,000. The vehicle did not have a warranty. Ms. Rodman purchased the vehicle because she thought it was safe and reliable. Since purchasing the vehicle, however, she has experienced many stalling incidents. On one occasion, she was going to the doctor and stopped at a red light. The car shut down and would not restart, and she had to have the vehicle towed. Ms. Rodman had the ignition switch replaced pursuant to the recall in or around June 2014. She continues to have the same stalling problems since the replacement that she had before the ignition switch was replaced. Ms. Rodman is afraid to drive her vehicle, but it is her only form of transportation; she would like a different vehicle that is safe to drive. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car.

21. Alphonso Wright—Indiana

46. Plaintiff and proposed Nationwide and Indiana State Class Representative Alphonso Wright is a resident and citizen of Fishers, Indiana. Mr. Wright purchased a used 2005 Chevrolet Cobalt on August 16, 2012, in Indianapolis, Indiana for $9,727.99. His vehicle was not covered by a written warranty at the time of purchase. On two separate occasions, in January 2013 and April 2014, Mr. Wright's vehicle shut down while he was driving over train tracks. The steering locked on both occasions as well. After waiting approximately one month for the parts to arrive, Mr. Wright's vehicle had the recall repair done on June 5, 2014. Mr. Wright was truly frightened by his two inadvertent shut down experiences, and would not have purchased his car if he had known about the defects in his GM-branded vehicle.

22. Charles David Loterbour—Iowa

47. Plaintiff and proposed Nationwide and Iowa State Class Representative Charles David Loterbour is a resident and citizen of Des Moines, Iowa. He purchased a used 2010 HHR in October 2011 in Iowa City for $15,274. He purchased the vehicle with the original manufacturer's warranty, along with Reliant Repair Protection. He purchased the HHR over other vehicles because of New GM representations that it is rated higher for safety and fuel mileage than many other vehicles. The dealership also touted the multiple airbag system and the traction control system in the HHR. Mr. Loterbour experienced problems with his vehicle beginning in September 2012, including problems disengaging the ignition key, being unable to turn the vehicle off without disconnecting the battery, and a loss of power steering. The dealership replaced the ignition switch in 2012 in response to these problems. Since the recall announcement, the dealership informed Mr. Loterbour that it replaced the ignition switch in 2012 with an "old style" ignition switch, and he would need it replaced under the recall. Knowing what he now knows about the safety defects in many GM-branded vehicles, he would not have

purchased the vehicle and will never again purchase another GM-branded vehicle. He would trade in his vehicle if the opportunity arises, but he doubts that will happen with the current recalls.

23. Trina & John Marvin Brutche Jr.—Kansas

48. Plaintiffs and proposed Nationwide and Kansas Class Representatives Trina and John Marvin Brutche, Jr., husband and wife, are residents and citizens of Goodland, Kansas. The Brutches purchased a used 2009 Impala LTZ on June 14, 2014, in Grand Junction, Colorado for $15,471. They did not purchase any warranty other than the manufacturer's warranty. John is a longtime Chevrolet fan, and he has preferred to purchase them because he believes, based on advertising he has seen over the years, that Chevrolets are excellent quality, reliable family cars. The Brutches purchased the Impala just two weeks before its recall was announced. Several times, John experienced the steering on the Impala becoming tight or heavy. He continues to drive the Impala on a daily basis, but he would like to get the recall repairs performed. He called about the recall, and New GM directed him to his local dealer to schedule the maintenance. When John called his local dealer, they acted as if New GM's referral for service did not make sense. The dealer reported that the recall parts were not available, so no repair has been performed yet. The Brutches would not have purchased their vehicle, or they would have paid less for it, had they known about these defects.

24. Phyllis Hartzell—Kansas

49. Plaintiff and proposed Nationwide and Kansas State Class Representative Phyllis Hartzell is a resident and citizen of Burlingame, Kansas. Ms. Hartzell purchased a used 2006 Saturn Ion in 2011 in Burlingame, Kansas. The vehicle had a 30-day dealer warranty. Ms. Hartzell purchased the vehicle because she thought it was safe and reliable and would be a good vehicle for transporting her grandchildren. She no longer feels safe driving the vehicle and

will no longer drive her grandchildren in the car. As of September 2014, Ms. Hartzell is still awaiting replacement of her ignition switch; she contacts her dealership regularly, and they continue to tell her they do not have parts but should have them soon. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car and will never again purchase a GM-branded vehicle.

25. Elizabeth Stewart—Kentucky

50. Plaintiff and proposed Nationwide and Kentucky State Class Representative Elizabeth Stewart is a resident and citizen of Raceland, Kentucky. She purchased a used 2010 Chevrolet Cobalt in February 2012 from a dealer in Paintsville, Kentucky for $14,000. Ms. Stewart's Chevrolet Cobalt was under factory warranty when she purchased it, and she also purchased an extended bumper-to-bumper warranty. The factory warranty and extended warranty have both expired. Around the time of her purchase, Ms. Stewart recalls seeing several commercials in which GM touted the Cobalt's safety and stated that it is the best vehicle in its class. She believed the vehicle was safe and defect free when she purchased it. Just two-and-a-half months after buying the car, in April 2012, Ms. Stewart experienced her first inadvertent shut down. She was driving in Kentucky when the engine suddenly shut off while the key was still turned and the transmission was in "drive." The loss of power made the steering wheel almost impossible to turn. Ms. Stewart managed to get to the side of the road and, thankfully, was not injured. She was also thankful that her children were not in the vehicle at the time, especially given that she purchased it primarily for use as the family car. Ms. Stewart experienced many similar shut downs between the purchase date of February 2012 and July 2014, when the ignition switch was replaced under the recall. Even post-recall "repair," Ms. Stewart has issues with the car indicative of power loss, where the headlights dim and the steering wheel locks up. GM should have disclosed these defects when Ms. Stewart purchased

the vehicle. Had New GM disclosed the defects in its vehicles, Ms. Stewart would either not have purchased the vehicle, or would have paid less.

26. Lisa West—Louisiana

51. Plaintiff and proposed Nationwide and Louisiana State Class Representative Lisa West is a resident and citizen of Baton Rouge, Louisiana. Ms. West purchased a used 2008 Chevrolet Cobalt on August 3, 2010 from All Star Hyundai in Baton Rouge for $9,621. Her vehicle was covered by a warranty at the time of purchase. It expired last year. At the time she purchased it, the GM dealer told her it was a very safe vehicle. Had New GM disclosed the defects in its vehicles, Ms. West would either not have purchased the vehicle, or would have paid less.

27. Michelangelo De Ieso—Maine

52. Plaintiff and proposed Nationwide and Maine State Class Representative Michelangelo De Ieso is a resident and citizen of Dover-Foxcroft, Maine. Mr. De Ieso purchased a used 2008 Pontiac Solstice on June 20, 2013, in Auburn, Massachusetts for $20,250.00. The vehicle was not under warranty when he purchased it. Mr. De Ieso did not learn about the ignition switch defects until March 2014. Mr. De Ieso is concerned about his safety in driving the vehicle and believes its value is now greatly diminished as a result of the ignition switch defects. As a precaution, Mr. De Ieso has not driven his vehicle since June 2014 and continues to wait to have the recall work performed on his vehicle. In fact, he purchased another non-GM vehicle to drive in the interim. In addition, he has tried to sell his Solstice privately but has been unsuccessful. He would not have purchased this vehicle had he known about the safety defects.

28. Harry Albert—Maryland

53. Plaintiff and proposed Nationwide and Maryland State Class Representative Harry Albert is a resident and citizen of Montgomery Village, Maryland. Mr. Albert purchased a

new 2012 Chevrolet Camaro from Ourisman's Rockmont Chevrolet in Rockville, Maryland, in October 2012 for $34,000. On at least three occasions, the power in Mr. Albert's Camaro failed during normal vehicle operation. During the second of these incidents, on May 13, 2014, Mr. Albert was operating his vehicle on a roadway at the posted speed when his power failed. Mr. Albert was nearly rear-ended by the vehicle traveling behind him, but the vehicle swerved and avoided a collision. Mr. Albert's knees did not impact the ignition key during this event. He was able to restart the Camaro and immediately took it to the Ourisman Rockmont dealership for testing. The dealership tested the vehicle, but could find nothing wrong. Less than one month later, Mr. Albert's vehicle experienced another power failure when he was turning into a parking lot. Again, he was almost rear-ended. This time, Ourisman Rockmont provided Mr. Albert with a loaner car while it attempted to determine the source of the problem. Shortly thereafter, New GM publicly announced the recall of the Camaro vehicles, but Mr. Albert did not learn of the ignition switch defect in his vehicle until June 2014. He took it back to the Ourisman Rockmont dealership, and they removed the blade from the ignition key fob and put it on a keychain and returned the vehicle to him. Mr. Albert was nonetheless so afraid to drive his Camaro that he traded it in for a used 2013 Chevy Impala in July 2014 in Germantown, Maryland. He received $27,000 for his Camaro, and paid $17,999 for the Impala. At the time of his trade-in, Mr. Albert did not yet know about the ignition switch recall out on his Impala. He would not have purchased the Camaro had he known about the safety defects, and now he is concerned about the safety of his Impala.

29. Bryan Mettee—Maryland

54. Plaintiff and proposed Nationwide and Maryland State Class Representative Bryan Mettee is a resident and citizen of Jarrettsville, Maryland. Mr. Mettee purchased a used 2006 Chevy Cobalt in 2012 from a dealership in Maryland for $10,000. He also purchased a

"bumper to bumper" warranty for the lifetime of the car, as well as an extended warranty. Mr. Mettee has experienced his ignition shutting down at least ten separate times during normal driving conditions. The first incident occurred in September 2013 while he was going approximately 35-40 miles per hour. He had to use the emergency brake to stop the car. In all instances he knows his knee did not bump into the ignition switch or keys when the car shut off. He visited the dealership no less than three times to attempt to resolve the shutdown issues, but in all cases the problem resumed after the dealer purported to fix it, and all were out of pocket repair costs. It was only after all this hassle that he received the recall notice. His ignition switch was repaired shortly after he received the recall notice. Had New GM disclosed the defects in its vehicles, Mr. Mettee would either not have purchased the vehicle, or would have paid less for it.

30. Richard Leger—Massachusetts

55. Plaintiff and proposed Nationwide and Massachusetts State Class Representative Richard Leger is a resident and citizen of Franklin, Massachusetts. Mr. Leger purchased a used Pontiac G5 in Attleboro, Massachusetts, in 2013 for $8,000. He purchased the vehicle with a 90-day warranty. Mr. Leger purchased the vehicle because he thought it was safe. Mr. Leger's vehicle started experiencing stalling in November 2013. The first time was at a traffic light, when the car just shut down. That happened several more times. He also experienced loss and/or locking of the power steering. He does not feel safe driving the car, nor does he feel safe having his children drive it. Mr. Leger has attempted to have the ignition switch replaced several times, but each time he went to the dealership the part was not available. As of September 2014, he has not had his ignition switch replaced pursuant to the recall. Had he known about the problems with his GM-branded vehicle, he would not have purchased the car.

31. Rafael Lanis—Michigan

56. Plaintiff and proposed Nationwide and Michigan State Class Representative Rafael Lanis is a resident and citizen of Birmingham, Michigan. Mr. Lanis purchased a used 2006 Chevy Cobalt in July 2011 at auction at Westland Auto Care in Michigan for $2,800. His car was no longer under warranty at the time he purchased it. Mr. Lanis has experienced his ignition shutting down approximately ten separate times after starting his car and then removing his hand from the key. It also shut down once while sitting idle at a traffic light. His ignition switch was repaired approximately one month after he received the recall notice, in April 2014. But his car was affected by further recalls and when he tried to secure a loaner from New GM before repairing his ignition switch, they refused. Mr. Lanis tried to sell his vehicle over the last 4-5 months but has been unsuccessful. He noted that the Kelley Blue Book value of his car has dropped from $4,700 to $4,000 since announcement of the recalls. Had New GM disclosed the defects in its vehicles, Mr. Lanis would either not have purchased the vehicle, or would have paid less for it.

32. Sheree Anderson—Michigan

57. Plaintiff and proposed Nationwide and Michigan State Class Representative Sheree Anderson is a resident and citizen of Detroit, Michigan. Ms. Anderson purchased a used 2008 Chevy HHR on November 15, 2011, in Michigan for approximately $16,500. The vehicle had a warranty on it when she purchased it. Ms. Anderson chose the HHR in part because she desired a safe vehicle. Ms. Anderson did not learn about the ignition switch defects until March 2014. Although Ms. Anderson has not experienced her vehicle shutting down while driving, she is concerned for her safety as a result of the ignition switch defects. She must continue to drive her vehicle, however, because it is her main form of transportation, and she must drive it to work every day. Ms. Anderson's HHR received the ignition switch recall repair work on June 10,

2014. She believes the value of her vehicle is now greatly diminished as a result of the ignition switch defects. Had she known about the ignition switch defects, she would either not have purchased the HHR or would have paid less for it.

33. Anna Allhouse—Minnesota

58. Plaintiff and proposed Nationwide and Minnesota State Class Representative Anna Allhouse is a resident and citizen of Clarks Grove, Minnesota. Ms. Allhouse purchased a used 2007 Chevy HHR in 2012 in Minnesota for approximately $12,000. Her car was under warranty when she purchased it, and she also purchased an extended warranty and gap insurance from the dealership at the same time. The car is currently under warranty. Ms. Allhouse experienced one incident related to the car shutting off on its own. In the winter of 2013, she was backing out of her driveway, and the car suddenly turned off. She was able to restart the car and was not involved in an accident. After receiving the recall notice, Ms. Allhouse took her car to the GM dealer. They told her there was nothing wrong with her ignition. Ms. Allhouse still owes approximately $9,800 on the vehicle. Recently, she tried to trade it in for a new vehicle at the same dealership but was told they would only offer $2,000 for the car. Ms. Allhouse has two small children and wanted a safe, reliable vehicle. She would never have purchased a GM-branded vehicle if she knew about the defects.

34. Elizabeth D. Johnson—Mississippi

59. Plaintiff and proposed Nationwide and Mississippi State Class Representative Elizabeth D. Johnson is a resident and citizen of Jackson, Mississippi. Ms. Johnson purchased a used 2007 Chevrolet Cobalt on March 27, 2012, from Bond Auto Sales, Jackson, Mississippi for $7,200.00. Ms. Johnson twice had her vehicle shut down and on one occasion was in an accident as a result, her airbags did not deploy. Her car was totaled and she has lost value as a result.

Ms. Johnson would not have purchased the vehicle, or paid as much, if she had known the vehicle was a safety hazard.

35. Linda Wright—Mississippi

60. Plaintiff and proposed Nationwide and Mississippi State Class Representative Linda Wright is a resident and citizen of Greenwood, Mississippi. Ms. Wright purchased a used 2007 Chevrolet Cobalt on July 8, 2013, in Greenwood, Mississippi for $4,300. At the time she purchased her vehicle, it was not covered by a warranty. On two occasions, on November 13, 2013, and May 18, 2014, Ms. Wright experienced her engine shutting down while operating the vehicle under normal driving conditions at 25-40 miles per hour. Each time, she was forced to try and steer the car to the side of the road before restarting the engine. The steering also locked up in both instances. Her vehicle had the ignition switch repair done at a dealership in Greenwood, Mississippi. Had New GM disclosed the defects in its vehicles, Ms. Wright would either not have purchased the vehicle, or would have paid less.

36. Cynthia Hawkins—Missouri

61. Plaintiff and proposed Nationwide and Missouri State Class Representative Cynthia Hawkins is a resident and citizen of Pevely, Missouri. Ms. Hawkins purchased a used 2010 Chevy Cobalt on July 23, 2013, in Missouri for approximately $13,000. The car was not under warranty when she purchased it. She believed the car was a good family car and one that a teenager could drive. Ms. Hawkins did not receive a recall notice, but rather heard about it on the news and immediately contacted her GM dealer. The dealer told her the parts were not available. Ms. Hawkins could not drive her vehicle from April 7, 2014, to August 29, 2014, while she awaited the recall repair parts to come in and be installed in her car. Since announcement of the recalls, she believes her car's value has decreased significantly, and it

prevents her from re-selling it for a fair price. Ms. Hawkins would not have purchased this GM-branded vehicle had she known about these defects.

37. Ronald Robinson—Missouri

62. Plaintiff and proposed Nationwide and Missouri State Class Representative Ronald Robinson is a resident and citizen of Bridgeton, Missouri. Mr. Robinson purchased a used 2010 Chevy Impala in June 2010 in Missouri for approximately $16,000. He purchased an extended warranty that expires on March 16, 2015, or at 82,000 miles. Before purchasing, Mr. Robinson viewed email advertising highlighting the quality of the GM product, and this positively impacted his decision to buy the car. Mr. Robinson first heard about the recalls in the summer of 2014. He contacted his local dealer to inquire about his Impala, and they told him his specific make and model was not being recalled. Then just a few months later in August 2014, he received a notice in the mail about his car being recalled for the ignition switch defect. Mr. Robinson's vehicle has still not been repaired, however, because the GM dealership told him the parts are not available—and they do not know when they will become available. He believes his car's value has diminished and he is worried about trying to sell the car now because he does not believe he can get a fair price for it. Mr. Robinson would not have purchased this GM-branded vehicle had he known about these defects, and under no circumstances would he have even considered buying the car for a lesser price.

38. Patricia Backus—Montana

63. Plaintiff and proposed Nationwide and Montana State Class Representative Patricia Backus is a resident and citizen of Bigfork, Montana. Ms. Backus purchased a used 2006 HHR in 2012 in Idaho for $10,900. Ms. Backus purchased a short-term warranty, which she cancelled shortly after purchasing the vehicle. Ms. Backus purchased the HHR because she believed it reliable and safe. Within six months of purchasing the vehicle, she experienced a stall

while approaching a traffic light. She had three additional shut downs while driving. During these incidents, she had no control of the steering, and, on at least one of the occasions, her steering locked. It took Ms. Backus several attempts for her vehicle to turn back on. She no longer feels safe driving the vehicle even though the ignition switch was replaced, and since learning about the recall she is angry towards New GM for keeping the safety defect a secret. Ms. Backus had her ignition switch replaced in August 2014. Since the replacement, the radio in her vehicle turns off. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car. She will never purchase another GM-branded vehicle.

39. Susan Rangel—Nebraska

64. Plaintiff and proposed Nationwide and Nebraska Class Representative Susan Rangel is a resident and citizen of North Platte, Nebraska. She purchased a used 2008 Chevrolet Cobalt in the fall of 2009 at Jerry Remus Chevrolet in North Platte, Nebraska, for $14,000. At the time of purchase, the vehicle had the original manufacturer's warranty. Ms. Rangel purchased the vehicle believing it to be safe and reliable. When she learned about the recall, she requested a rental/loaner vehicle because she did not believe the vehicle was safe to drive, but she was informed by New GM that she would not be given a loaner vehicle. The dealership replaced the ignition switch in June 2014 pursuant to the recall. Nevertheless, Ms. Rangel does not believe the vehicle is safe for her family to drive and has attempted to sell the vehicle. As of September 2014, those efforts have been unsuccessful. Had she known about the problems with her GM-branded vehicle, she would he would not have purchased the car and will never again purchase another GM-branded vehicle.

40. Sandra Horton—Nevada

65. Plaintiff and proposed Nationwide and Nevada State Class Representative Sandra Horton is a resident and citizen of Las Vegas, Nevada. Ms. Horton purchased a used 2007

Pontiac Solstice in October 2013 in Nevada for $10,000. Her car was not under warranty at the time of purchase. On several occasions she has experienced issues with her vehicle that are consistent with the ignition switch defects. Her vehicle was repaired under the recall, but only after waiting four months for the parts to arrive. New GM did not provide her with a loaner vehicle during this waiting period. Ms. Horton would not have purchased her GM-branded vehicle had she known about its safety defects.

41. Gene Reagan—New Jersey

66. Plaintiff and proposed Nationwide and New Jersey State Class Representative Gene Reagan is a resident and citizen of South Amboy, New Jersey. Mr. Reagan purchased a new 2010 HHR in December 2009, at a dealership in Middletown, New Jersey, for approximately $20,000. His vehicle had a standard warranty, but he does not recall its details. Mr. Reagan purchased a GM-branded vehicle because he believed that New GM stood for safety and reliability. Mr. Reagan has experienced several safety problems with his vehicle, including his ignition locking and inability to turn the key to the "on" position, requiring the car to be towed to the dealership. Because of his ignition problems, Mr. Reagan had his ignition replaced approximately three years ago. That did not solve the problems he was experiencing with his vehicle. As of September 2014, Mr. Reagan is still awaiting replacement of his ignition switch pursuant to the recall and feels nervous driving it in its current defective condition. Had he known about the problems with his GM-branded vehicle, and particularly that New GM was building vehicles plagued with defects and not committed to safety and reliability, he would he would not have purchased the car. Mr. Reagan will never purchase another GM-branded vehicle.

42. Lorraine De Vargas—New Mexico

67. Plaintiff and proposed Nationwide and New Mexico State Class Representative Lorraine De Vargas is a resident and citizen of Santa Fe, New Mexico. Ms. De Vargas purchased a used 2005 Saturn Ion on November 25, 2009, in Santa Fe, New Mexico for $5,000. There was no warranty on the vehicle when Ms. De Vargas purchased it. Ms. De Vargas bought her Ion in part because of her desire for a safe vehicle. Ms. De Vargas was involved in an accident on December 14, 2012. While Ms. De Vargas was driving her Ion, the vehicle shut down unexpectedly and caused her to collide with a fence at 25-30 miles per hour. Her airbags failed to deploy. The vehicle damage has been repaired, and while she is thankful to have survived the accident with no injuries, Ms. De Vargas must continue to drive her Ion to work every day. She is concerned about the safety of her vehicle, the impact the defects have had on the value of her vehicle, and the costs she has incurred in fixing the vehicle previously. Ms. De Vargas did not learn of the ignition switch defects until March 2014. She believes that New GM withheld information about the safety of its vehicles.

43. Javier Delacruz—New Mexico

68. Plaintiff and proposed Nationwide and Alabama State Class Representative Javier Delacruz is a resident and citizen of Albuquerque, New Mexico. Mr. Delacruz purchased a new 2009 Chevy Cobalt in September 2009 in Albuquerque, New Mexico for $20,698. The vehicle was under warranty when he purchased it. In 2011, Mr. Delacruz could not shut-off his vehicle and the ignition switch was replaced. Mr. Delacruz fears driving his vehicle due to the ignition switch recall and the risks posed by the defects. Mr. Delacruz had the ignition switch replaced, again, this year as a result of the recall. He believes the value of his vehicle has been diminished as a result of the defects. Mr. Delacruz would not have purchased this car if New GM had been honest about the safety defects.

44. Renate Glyttov—New York

69. Plaintiff and proposed Nationwide and New York State Class Representative Renate Glyttov is a resident and citizen of New Windsor, New York. Ms. Glyttov purchased a used 2009 Chevrolet HHR on March 28, 2012 from Barton Birks Chevrolet in Newburgh, New York for $15,995. Ms. Glyttov's vehicle was covered by a certified pre-owned limited warranty that expired on March 28, 2013, as well as a standard maintenance plan that was effective from her purchase date until March 28, 2014. Ms. Glyttov has purchased many GM-branded vehicles, believing that they were safe and reliable vehicles based on the strength of the brand name. Operating under the belief that GM was a quality brand and that the vehicle would be safe and reliable and defect-free, she purchased her HHR. Ms. Glyttov's vehicle regularly shut off spontaneously on many occasions in 2012 and 2013 while traveling around New Windsor, New York; Newburgh, New York; Wallkill, New York; and in Pennsylvania when driving onto an off ramp of I-84. The vehicle would shut off when Ms. Glyttov drove on bumpy roads or hit a pothole. On each occasion, the vehicle gearshift was in "drive" and the ignition key was in the "run" position. Ms. Glyttov also experienced other problems with the ignition. On several occasions in 2012 and 2013, she put the key in the ignition, but the key would not turn and would then get stuck in the ignition. Eventually the key would move after attempting to turn the ignition on for several minutes. On May 16, 2012, Ms. Glyttov's ignition lock cylinder was replaced during a routine oil change. Plaintiff Glyttov experienced numerous shut off events after this replacement. Ms. Glyttov's ignition switch was replaced in connection with the recalls initiated in response to the ignition switch defects. First, Ms. Glyttov's ignition key was replaced on April 16, 2014, and then her ignition switch was replaced on June 11, 2014. Ms. Glyttov would not have purchased the vehicle had she known of the defects.

45. Nicole Mason—New York

70. Plaintiff and proposed Nationwide and New York State Class Representative Nicole Mason is a resident and citizen of Rochester, New York. Ms. Mason purchased a new 2010 Chevrolet Cobalt on May 17, 2010, from Bob Johnson Chevrolet in Rochester, New York for $22,010.47. Ms. Mason purchased an extended warranty that covers the vehicle for 72 months or 48,000 miles. Ms. Mason reviewed advertisements for the Cobalt that ran in her local newspaper, the *Democrat & Chronicle*, and her decision to buy the vehicle was influenced by these advertisements. Ms. Mason believed the Chevrolet Cobalt was a safe and reliable vehicle. Ms. Mason's vehicle has spontaneously shut off on at least three occasions. The vehicle first shut off on September 3, 2010, near Emerson and Glide streets in Rochester, New York when Ms. Mason's daughter, Jessica Mason, was driving it home from a test to get her drivers' license. The vehicle shut off a second time on September 16, 2010, in Rochester, New York when Jessica Mason was traveling on Britton Road. Most recently, on September 4, 2014, the vehicle shut off while Ms. Mason was driving it in Myrtle Beach, South Carolina. On each shutdown occasion, the vehicle lost power for no apparent reason. Ms. Mason and her daughter were not driving on a bumpy road and did not hit the ignition switch with their knees. On each occasion, the vehicle gearshift was in "drive" and the ignition key was in the "run" position. On the September 16, 2010 incident, Jessica Mason was forced to use the emergency break to get the vehicle to stop and avoid an accident. The vehicle would not turn back on immediately and had to be towed to Ms. Mason's home. Ms. Mason took the vehicle to a GM dealer after the September 16, 2010 incident, but the dealer could not identify a cause for the shut off and made no repairs to the vehicle. Ms. Mason's ignition switch was replaced in June 2014 in connection with the recalls initiated in response to the ignition switch defect. Had New GM disclosed the defects in its vehicles, Ms. Mason would either not have purchased the vehicle, or would have paid less.

46. Steven Sileo—New York

71. Plaintiff and proposed Nationwide and New York State Class Representative Steven Sileo is a resident and citizen of Skillman, New York. Mr. Sileo purchased a used 2009 Chevy Cobalt in July 2010 in Burlington, New Jersey for $10,000. The vehicle was under warranty when he purchased it. Although Mr. Sileo has not experienced any issues with his Cobalt, he fears driving his vehicle after learning of the ignition switch recall and the risks posed by the defects. Mr. Sileo is still waiting for the recall repair work to be completed on his vehicle. He is eager to sell the vehicle but cannot honestly market it without the ignition switch being replaced. Also, he believes the value of his vehicle has been diminished as a result of the defects and the stigma with the GM brand. Mr. Sileo would not have purchased this car if New GM was honest about the safety defects.

47. Dawn Tefft—New York

72. Plaintiff and proposed Nationwide and New York State Class Representative Dawn Tefft is a resident and citizen of Mt. Upton, New York. Ms. Tefft purchased a used 2010 Chevy Cobalt on June 21, 2011, in Sidney, New York for $13,695.50. There was no warranty on the vehicle when Ms. Tefft purchased it. Ms. Tefft bought her Cobalt in part because of her desire for a safe vehicle. Ms. Tefft was involved in a serious accident on October 24, 2013, while driving to work. While Ms. Tefft was driving her Cobalt, the vehicle shut down unexpectedly and caused her to collide head-on with a bridge at 40-45 miles per hour. The airbags failed to deploy, and the vehicle was totaled as a result of the accident. Ms. Tefft did not learn about the ignition switch defects until March 2014. Had she been aware of the ignition switch defects, Ms. Tefft would either not have purchased her Cobalt or would have paid less for it.

48. Silas Walton—North Carolina

73. Plaintiff and proposed Nationwide and North Carolina State Class Representative Silas Walton is a resident and citizen of Fayetteville, North Carolina. Mr. Walton purchased a used 2008 Chevrolet Cobalt in 2010 in Clarksville, Tennessee for between $14,000 and $15,000. The vehicle was under warranty, but he does not recall the warranty terms. Mr. Walton purchased the vehicle because he thought it was a reliable and safe vehicle. Mr. Walton often experienced problems with starting the vehicle and turning the key to any position. On at least one occasion, he experienced a shutdown in his vehicle, which caused the steering wheel to lock. This occurred while he was driving downhill on a highway. At first, he was unable to control the car, but eventually he was able to maneuver it to the side of the road. After about ten minutes, he was able to restart the vehicle. Mr. Walton had the ignition switch replaced in the summer of 2014; however, his key continues to stick in the ignition. He remains concerned about driving the vehicle. Had he known about the problems with his GM-branded vehicle, he would not have purchased the car and will never again trust New GM.

49. Jolene Mulske—North Dakota

74. Plaintiff and proposed Nationwide and North Dakota State Class Representative Jolene Mulske is a resident and citizen of Gladstone, North Dakota. Ms. Mulske purchased a used 2005 Chevrolet Cobalt in 2010 in Dickinson, North Dakota, for approximately $10,000. Ms. Mulske purchased the vehicle because she wanted a safe and reliable vehicle for her daughter to drive. Ms. Mulske had the ignition switch replaced in the summer of 2014, but she and her daughter are afraid to drive it now. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car and will never again purchase a New GM vehicle.

50. Peggy Robinson—Ohio

75. Plaintiff and proposed Nationwide and Ohio State Class Representative Peggy Robinson is a resident and citizen of Cincinnati, Ohio. Ms. Robinson purchased a used 2004 Saturn Ion in 2013 in Cincinnati, Ohio for $4,999. Ms. Robinson purchased the Ion because she thought it was safe. Within six months of purchasing the vehicle, she began experiencing shut downs while driving. The shut downs occurred two or three times per week on average. She no longer feels safe driving the vehicle, especially because she has children. Ms. Robinson had her ignition switch replaced in August 2014, and she has experienced two shut downs since then. Had she known about the problems with her GM-branded vehicle, she would he would not have purchased the car.

51. Jerrile Gordon—Oklahoma

76. Plaintiff and proposed Nationwide and Oklahoma State Class Representative Jerrile Gordon is a resident and citizen of Del City, Oklahoma. Mr. Gordon purchased a used 2006 Chevy Cobalt on September 3, 2011, in Oklahoma City, Oklahoma for $14,950. Mr. Gordon chose the Cobalt, in part, because he wanted a safely designed and manufactured car. Mr. Gordon's vehicle has shut down on four separate occasions between December 2011 and July 2012. In two instances, he was driving on the highway when the shut downs occurred, and he had to steer his vehicle to the side of the road to restart. On the other two occasions, his car shut off while driving over a bump in the road. Mr. Gordon did not learn of the ignition switch defects until March 2014. Had he been aware of the ignition switch defects, Mr. Gordon would either not have purchased his Cobalt or would have paid less for it than he did.

52. Bruce and Denise Wright—Oklahoma

77. Plaintiffs and proposed Nationwide and Oklahoma State Class Representatives Bruce and Denise Wright, husband and wife, are residents and citizens of Enid, Oklahoma. If

not for this MDL, the Wrights would have filed a class action in the United States District Court for the Western District of Oklahoma. The Wrights purchased a new 2011 Chevrolet Camaro on March 18, 2011, in Norman, Oklahoma for $31,000. The vehicle was covered by a standard three year, 36,000 mile warranty. Prior to buying, they saw television, print, and billboard ads regarding the vehicle's five star rating and safety. Ms. Wright drove the vehicle daily to and from her and Mr. Wright's places of work. The Wrights learned of the June 30, 2014 recall affecting their Camaro in July 2014 through the news media, and they called the local GM dealership to confirm the recall and the safety concerns relating to recall. Afterwards, Ms. Wright was no longer comfortable driving the Camaro, so they proceeded to dispose of the vehicle as quickly as practical. They traded the car to a local Ford dealership on August 9, 2014. The Wrights believe they suffered a diminution of value in their vehicle due to the ignition switch defects and the surrounding publicity, and that they could have received more for their Camaro but for the defect. Had New GM disclosed the defects in its vehicles, Plaintiff would either not have purchased the vehicle, or would have paid less.

53. Jennifer Reeder—Oklahoma

78. Plaintiff and proposed Nationwide and Oklahoma State Class Representative Jennifer Reeder is a resident and citizen of Oklahoma City, Oklahoma. If not for the MDL, Ms. Reeder would have filed a class action in the Unites States District Court for the Western District of Oklahoma. Ms. Reeder purchased a used 2012 Chevrolet Impala on August 30, 2013, in Norman, Oklahoma, from David Stanley Chevrolet for $18,595. Ms. Reeder also purchased an extended warranty for the vehicle from David Stanley Chevrolet at the time of purchase. On or about July 26, 2014, Ms. Reeder was unable to remove the key from the ignition, and the steering and brakes would not lock. After 30 minutes of manipulating the key in an effort to remove it from the ignition, she was forced to leave the key in the ignition overnight; her

husband was able to remove the key from the ignition the following day. Ms. Reeder was unaware of any recall notice affecting her Impala until, some time shortly after the key became stuck in the ignition overnight, a neighbor informed her about the recall covering Impalas. Ms. Reeder watched the television concerning the recalls and researched the vehicle recalls online, but she never received a written recall notice in the mail regarding her Impala. Ms. Reeder and her son, both of whom drive the Impala to and from work, would have liked to discontinue driving the Impala until the ignition system was repaired, but they were unable to do so because it would have left her family with a single means of transportation among herself, her husband, and her son due to their other vehicle, a Chevrolet Cobalt, already being totaled in a defect-related crash. The family could not afford to pay for a rental car. Finally, on September 16, 2014, a GM dealership notified her that it was ready to repair the Impala. The repair was performed on September 22, 2014, and the dealership provided her with a loaner or rental vehicle that day while the repairs were performed. At the time the repair was performed, Ms. Reeder reported to the dealership that the Impala's engine light sometimes comes on unexpectedly and, occasionally, the vehicle will not start at all. Replacing the battery has not eliminated the problem. The dealership reported that there were no recalls related to such electrical problems, and they did not do anything to fix it. The electrical problem has recurred since the ignition recall repair. Ms. Reeder believes she has suffered a diminution of value in her vehicle due to the ignition switch defects, recalls, and surrounding publicity.

79. Ms. Reeder also purchased a used 2010 Chevrolet Cobalt on or about February 5, 2014, in Del City, Oklahoma, from Ricks Auto Sales for $9,595. Ms. Reeder purchased an extended warranty for the Cobalt from Ricks Auto Sales at the same time. Ms. Reeder purchased the vehicle primarily for Anthony Reeder, her son, for his personal, family, and household use.

On May 19, 2014, Anthony Reeder was driving in bumper-to-bumper traffic when the vehicle suddenly shut off, the brakes became ineffective, the steering wheel stopped operating, and he struck the vehicle in front of him, totaling the Cobalt and injuring Anthony. Ms. Reeder and Mr. Reeder were unaware of any recall on the Cobalt until after the accident when they learned of the recall from a neighbor. They had never received any recall notice in the mail. After the accident, Ms. Reeder and her son have been and are currently sharing Ms. Reeder's 2012 Chevrolet Impala, because they cannot afford another car due to the balance remaining on the financing note of the Cobalt. From sharing the Impala, they have increased the miles accumulated on it so much that they have used up its extended warranty. A combined total of 45,000 miles were added to the Impala since the crash of the Cobalt, and they had to pay the $2,500 deductible not paid by the insurance company for the totaled Ion. Ms. Reeder also claims damages for the decreased value of the Impala because of its increased usage in the absence of the Cobalt, the difference in the amount of the cost of gasoline between Mr. Reeder using the Impala and using the better-mileage Cobalt, the value of the extended warranty on the Impala used up by the excess of miles, and the increase in her auto insurance premiums as a result of the accident caused by the Cobalt's defective design being attributed to Mr. Reeder. The difference between the settlement paid to Ms. Reeder by her insurance company, Geico, on the Cobalt after the wreck and her loan for the vehicle left her with an outstanding balance of more than $1,500. In valuing the Cobalt, Geico took into account values of vehicles on dates after the July 13, 2014 announcement of the ignition recall on Cobalts and other GM Vehicles received wide publicity. The valuation Geico thus arrived at was lower than it would have been had the defect not been present in the Cobalt and other models. Geico's valuation explicitly noted the existence of the recalls complained of herein.

54. Deneise Burton—Oklahoma

80. Plaintiff and proposed Nationwide and Oklahoma State Class Representative Deneise Burton is a resident and citizen of Warr Acres, Oklahoma. Ms. Burton purchased a used 2007 Saturn Ion on September 8, 2012 in Oklahoma for $11,995. She also purchased a limited warranty for 24 months or 24,000 miles. Once, in April 2013, her engine shut off while backing out of her driveway after her knee bumped the ignition switch area, knocking her keys from the ignition. Her ignition switch was repaired after she received the recall notice. In two attempts before GM agreed to provide her a loaner vehicle so as not to risk her and her children's lives while using the car and waiting for the repair parts to arrive. She has tried to sell her vehicle since the recalls were announced, but the value of her vehicle is now too low. Ms. Burton would not have purchased her vehicle, or she would have paid less for it, had she known about these defects.

55. Janice Bagley—Pennsylvania

81. Plaintiff and proposed Nationwide and Pennsylvania State Class Representative Janice Bagley is a resident and citizen of Patton, Pennsylvania. Ms. Bagley purchased a used 2007 Chevrolet Cobalt in 2013 in Carroltown, Pennsylvania, for approximately $6,000. The vehicle had a 30-day warranty at the time of purchase. Ms. Bagley purchased the Cobalt because she had owned GM-branded vehicles in the past, thought her previous vehicles to be safe and reliable, and believed the Cobalt also would be safe and reliable. She also thought it would be a safe, reliable vehicle for her 19 year old daughter to drive. Within the first 30 days of owning the vehicle, she experienced two stalling events; a few weeks later she had a third stalling incident. Each time she took the vehicle to a mechanic because she was concerned she would be stranded one day. In February 2014, she was involved in an accident when a deer ran in front of her; she was driving 35 miles per hour yet her airbags did not deploy. Following the recall, she

made the connection between the frontal collision and airbag failure and the safety recall. Ms. Bagley had her ignition switch replaced in June or July of 2014. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car and will never again purchase any GM-branded vehicle.

56. Janelle Davis—South Dakota

82. Plaintiff and proposed Nationwide and South Dakota State Class Representative Janelle Davis is a resident and citizen of South Sunburst, South Dakota. Ms. Davis purchased a used 2006 Chevrolet Cobalt in 2011 in Sioux Falls, South Dakota, for $7,200. Ms. Davis purchased the vehicle because she thought it was a reliable and safe vehicle and also because it has good mileage ratings. When Ms. Davis learned about the recall, she contacted the dealership about a loaner vehicle because she has a one year old daughter and did not feel safe driving her in a vehicle with a safety defect. She was denied a loaner and/or rental vehicle, even though she told the dealership about her fear of driving her one year old daughter in an unsafe vehicle, because she had not experienced shut downs or stalls. Ms. Davis had her ignition switch replaced pursuant to the recall in the summer of 2014. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car.

57. Louise Tindell—Tennessee

83. Plaintiff and proposed Nationwide and Tennessee State Class Representative Louise Tindell is a resident and citizen of Murfeesboro, Tennessee. Ms. Tindell purchased a used 2007 Saturn Ion in 2010 in Murfeesboro, Tennessee, for approximately $10,000. The vehicle was under warranty; she believes there were two years remaining on the warranty at the time she purchased the car. When Ms. Tindell believed that the Ion was a safe and reliable vehicle. Within seven months of purchasing the vehicle, Ms. Tindell's vehicle shut down while she was driving. She veered to the right, came to a stop, and waited before turning her car back

on. On another occasion, her vehicle shut down on her way to church. These events make her afraid to drive her car, and, since learning about the recall, she is angry towards New GM for keeping the safety defect a secret. Ms. Tindell had her ignition switch replaced in approximately June 2014. Since the replacement, she has experienced problems with her seat belts. She no longer trusts the Ion; she will never feel safe regardless of repairs or replacement parts. She continues to fear she will experience more shut downs. Had Ms. Tindell known about the problems with her GM-branded vehicle, she would not have purchased the car. She now tries to drive as infrequently as possible, and when she does she is fearful.

58. Michael Graciano—Texas

84. Plaintiff and proposed Nationwide and Texas State Class Representative Michael Graciano is a resident and citizen of Arlington, Texas. On October 17, 2011, Mr. Graciano purchased a used 2007 Chevrolet Cobalt from a dealership in Arlington, Texas, for $22,197.20. Prior to March 4, 2014, his fiancé and her daughter had experienced the car stalling on numerous occasions with a corresponding loss of power steering. They had the car looked at by family members experienced in car repair and one independent repair shop, but no one was able to diagnose the problem. Mr. Graciano received a safety recall notice pertaining to his vehicle in March 2014. After receiving the notice, Mr. Graciano and his fiancé, fearful for her daughter's safety, instructed her not to drive the car any more. Mr. Graciano's fiancé called a local Chevrolet dealer in Colorado twice in March 2014 about having the recall repair performed and each time she was told the dealer did not have the necessary parts, and each time the dealer failed to offer a loaner vehicle. The car was eventually serviced under the recall by AutoNation Chevrolet North in Denver, Colorado, and Mr. Graciano's fiancé's daughter was provided with a rental car as a loaner vehicle. While Mr. Graciano waited on repair of the Cobalt, his fiancé's daughter moved to Texas to go to college, bringing the rental car with her. Finally, in

approximately mid-June, the dealer called to say the recall repair had been made, some two months after the car was left with the dealer. Had New GM disclosed the defects in its vehicles, Mr. Graciano would not have purchased the Cobalt.

59. Keisha Hunter—Texas

85. Plaintiff and proposed Nationwide and Texas State Class Representative Keisha Hunter is a resident and citizen of Fort Worth, Texas. Ms. Hunter purchased a used 2006 Chevy Cobalt on March 22, 2013, in Arlington, Texas for $24,965.01. Ms. Hunter chose the Cobalt in part because she wanted a safe vehicle. Ms. Hunter is concerned for her safety and the diminished value of her vehicle as a result of the ignition switch defects. Ms. Hunter did not learn of the ignition switch defects until March 2014. Had she been aware of the of the ignition switch defects, Ms. Hunter would either not have purchased her Cobalt or would have paid less for it than she did.

60. Alexis Crockett—Utah

86. Plaintiff and proposed Nationwide and Utah State Class Representative Alexis Crockett is a resident and citizen of Eagle Mountain, Utah. Ms. Crockett purchased a used 2005 Chevrolet Cobalt in 2013 in Oehi, Utah, for $5,200. The vehicle did not have a warranty. Ms. Crockett experienced problems turning the vehicle on and off on numerous occasions; she also had difficulty removing the key from the ignition. In some weeks, the key would get stuck in the ignition several times. She also has experienced stalling when reversing out of her driveway. Ms. Crockett has not had her ignition switch replaced pursuant to the recall as of September 2014. She regularly calls the dealership and is told that the part is not ready; she has been told by another dealership that her vehicle is not on the recall list. Ms. Crockett is afraid to drive her vehicle, especially when she has to transport her siblings to see her father which requires highway driving. She would like to sell her vehicle but has to pay more than the car is now

worth, so cannot afford to sell it. Had she known about the problems with her GM-branded vehicle, she would not have purchased the car.

61. Ashlee Hall-Abbott—Virginia

Plaintiff and proposed Nationwide and Virginia State Class Representative Ashlee Hall-Abbott is a resident and citizen of Hampton, Virginia. Ms. Hall-Abbott and her husband Brian Abbott purchased a new 2014 Chevy Silverado in March 2014 at Hampton Chevrolet in Hampton, Virginia for $38,204.19. Her vehicle is currently covered by GM's two-year, 100,000-mile warranty and an unlimited lifetime warranty through Hampton Chevrolet. Ever since purchasing the truck earlier this year, Ms. Hall-Abbott's vehicle has been repaired under at least three or four separate recalls, and she just recently received what she believes is the fifth recall notice in the mail. She and her husband recently went to the GM dealership to inquire about trading in the Silverado for a Chevy Tahoe. The dealership finance manager immediately declined the offer, however, saying the dealership would be upside down in negative equity if they accepted. Had Ms. Hall-Abbott and her husband known about the safety defects and problems associated with their Silverado, they would have purchased another vehicle.

62. Michael Garcia—Washington

87. Plaintiff and proposed Nationwide and Washington State Class Representative Michael Garcia is a resident and citizen of Yakima, Washington. Mr. Garcia purchased a used 2010 Chevy Cobalt in June 2011 in Mt. Vernon, Washington for $16,470. The vehicle was under warranty when he purchased it. Mr. Garcia fears driving his vehicle due to the ignition switch recall and the risks posed by the defects. Mr. Garcia had the ignition switch replaced under the recall repair program. He believes the value of his vehicle has been diminished as a result of the defects. Mr. Garcia would not have purchased this car had New GM been honest about the safety defects.

63. Tony Hiller—Washington

88. Plaintiff and proposed Nationwide and Washington State Class Representative Tony Hiller is a resident and citizen of Sumner, Washington. He purchased a used 2009 Chevrolet HHR in March of 2013 in Puyallup, Washington for $10,965.50. The car was not under warranty at the time of purchase. After learning of the recall, Mr. Hiller simulated a shutdown incident. He pulled lightly on his key and the vehicle shut off. On July 23, 2014, Mr. Hiller's ignition switch was replaced pursuant to the recall. Mr. Hiller traded in his HHR on August 8, 2014 because he does not believe the vehicle is safe to drive. He believes he received less in trade in value due to the recall and the safety defects in the vehicle. Knowing what he now knows about the safety defects in many GM-branded vehicles, he would not have purchased the vehicle.

64. Melinda Graley—West Virginia

89. Plaintiff and proposed Nationwide and West Virginia State Class Representative Melinda Graley is a resident of Alum Creek, West Virginia. Ms. Graley purchased a used 2003 Saturn Ion in March 2012 in Charleston, West Virginia for $13,000. The car was not under warranty at the time of purchase. In February, Ms. Graley's husband was driving the car when it inadvertently shut down, causing him to crash into an embankment. Ms. Graley also experienced steering lock-up events with her car. In one instance, it locked up on her while she was driving up a hill in the mountains, causing her car to drift left into the oncoming lane. She narrowly avoided colliding with a coal truck. The vehicle was serviced under an ignition switch recall in June 2014. During those three months her dealership called on multiple instances, insisting she return the loaner vehicle because there was "nothing wrong" with her ignition switch and that her vehicle never failed. With the assistance of her counsel, Ms. Graley was able to refuse these demands and retain her loaner through June when her car was finally repaired.

Ms. Graley attempted to sell her car to a dealership, CNO Motors, in August 2014. They only offered her $1,000 for the car, however, so she decided not to sell it. Had GM disclosed the defects in its vehicles, Ms. Graley would either not have purchased the vehicle, or would have paid less.

65. Nancy Bellow—Wisconsin

90. Plaintiff and proposed Nationwide and Wisconsin State Class Representative Nancy Bellow is a resident and citizen of Oconto Falls, Wisconsin. She purchased a used 2007 Chevrolet Cobalt in late March or early April 2012 at King Buick in Oconto, Wisconsin for $10,000. The car was not under warranty at the time of purchase. She purchased the vehicle after reading advertisements about the Cobalt on the Internet. Her ignition switch was not repaired under the recall until September 18, 2014, and she was never offered a loaner car during this waiting period. Knowing what she now knows about the safety defects in many GM-branded manufactured vehicles, she would not have purchased the vehicle.

66. Henry Redic—Wisconsin

91. Plaintiff and proposed Nationwide and Wisconsin State Class Representative Henry Redic is a resident and citizen of Milwaukee, Wisconsin. Mr. Redic purchased a used 2008 Buick Lucerne on September 19, 2011, from Joe Van Horn Chevrolet Inc. in Milwaukee, Wisconsin for $15,876. Mr. Redic's vehicle was covered by a written warranty and is currently covered by two extended warranties: the Advantage Contract # AD40 473150 and the Advantage Wrap Plan. Mr. Redic has owned six Buicks and has long favored this vehicle model. He purchased the vehicle at issue based on his belief that the GM brand was a trusted name and that the Buick was a safe and reliable vehicle. Mr. Redic believed his vehicle was safe and defect free when he purchased it. Mr. Redic's vehicle has spontaneously shut off on six different occasions. The first shut off occurred on July 13, 2013, in Chicago, Illinois. Mr. Redic

was driving over railroad tracks in heavy traffic when his vehicle suddenly shut off. He attempted to pull the vehicle over without causing an accident but was unable to do so and side-swiped a utility pole. The second incident occurred in Milwaukee, Wisconsin on September 1, 2013, when the vehicle shut off after hitting a pothole. The remaining four shut off incidents also occurred in Milwaukee, Wisconsin after hitting potholes, but Mr. Redic does not recall the precise dates of those incidents. Aside from the incident on July 13, 2013, Mr. Redic was able pull the vehicle to the side of the road and allow it to coast until he was able to get it to stop. Mr. Redic would not have purchased the vehicle had he known of the defects.

67. Scott Schultz—Wisconsin

92. Plaintiff and proposed Nationwide and Wisconsin State Representative Scott Schultz is a resident and citizen of Medford, Wisconsin. Mr. Schultz purchased a used 2006 Saturn Ion in 2011 from a Chevy dealership in Wisconsin for $5,000-6,000. The vehicle was not covered by a warranty. Mr. Schultz's vehicle has shut off on him approximately ten times. The worst incident occurred in March or April 2014 when the car shut off and he had to maneuver to avoid an incoming vehicle and ditch. The power steering and brakes were also disabled when the vehicle shut off. Other times the car shut off while driving on gravel roads or railroad tracks. It is possible his knee hit the ignition switch on some occasions, but he does not recall. He only kept two keys on his key fob. His car first shut down about six months after purchasing it, and the most recent time occurred in the spring of 2014. In all instances, it took all his strength to turn the steering wheel and apply the brakes. The ignition switch on his vehicle has not been repaired under the recall because he got tired of waiting for the parts and traded it in around August 2014. Mr. Schultz also tried selling his vehicle in a private sale but no one was interested due to the recall issues on the vehicle. He checked the car's value on Kelley Blue Book and it was $3,700-4,700 for trade in value. When he traded the car in around August 2014, he only got

$3,500 for it. Mr. Schultz believes the value of his vehicle has been diminished and would not have purchased the car, or would have at least paid less for it, had he known about these defects.

68. Bedford Auto Sales, Inc.—Nationwide Dealer and Ohio State Class Representative

93. Nationwide Class and Ohio State Class representative Bedford Auto Sales, Inc. maintains its principal place in Bedford, Ohio. Plaintiff Bedford Auto Sales, Inc. purchased the following vehicles with the intention to resale same:

YEAR	MAKE	MODEL	VIN #	DATE PURCHASED
2005	COBALT	CBT	1G1AK12F657528414	2/13/2014

2007	SATURN	SI2	1G8AJ55F57Z199235	3/3/2014

94. At the time the transactions for the purchase of these vehicles were made, Plaintiff Bedford Auto Sales, Inc. did not know the vehicles were defective. Plaintiff Bedford Auto Sales, Inc. relied on GM to produce a safely designed and manufactured vehicle.

95. Plaintiff Bedford Auto Sales, Inc. continues to pay interest on these vehicles that sit on the lot. Plaintiff Bedford Auto has attempted to have the vehicles repaired through Jay Buick GMC in Bedford, Ohio on four occasions, and was informed the dealership did not have the parts to perform the repairs. Plaintiff Bedford Auto Sales, Inc. has been unable to sell these vehicles, or had to sell the vehicles at a discounted rate, given the safety recall.

96. As a result of the vehicle defect and subsequent recalls, Plaintiff Bedford Auto Sales, Inc. has been unable to re-sell these vehicles, or had to sell the vehicles at a discounted rate, and is incurring considerable expense, financial loss, and economic damage as a result.

B. Defendant

97. Defendant General Motors LLC ("New GM") is a Delaware limited liability company with its principal place of business located at 300 Renaissance Center, Detroit, Michigan, and is a citizen of the States of Delaware and Michigan. The sole member and owner of General Motors LLC is General Motors Holding LLC. General Motors Holdings LLC is a Delaware limited liability company with its principal place of business in the State of Michigan. The sole member and owner of General Motors Holdings LLC is General Motors Company, which is a Delaware Corporation with its principal place of business in the State of Michigan, and is a citizen of the States of Delaware and Michigan. New GM was incorporated in 2009 and, effective on July 10, 2009, acquired substantially all assets and assumed certain liabilities of General Motors Corporation through a Section 363 sale under Chapter 11 of the U.S. Bankruptcy Code.

Among the liabilities and obligations expressly assumed by New GM are the following:

> From and after the Closing, Purchaser [New GM] shall comply with the certification, reporting and recall requirements of the National Traffic and Motor Vehicle Act, the Transportation Recall Enhancement, Accountability and Documentation Act, the Clean Air Act, the California Health and Safety Code, and similar laws, in each case, to the extent applicable in respect of vehicles and vehicle parts manufactured or distributed by [Old GM].

IV. FACTUAL ALLEGATIONS

A. New GM Falsely Promoted All of Its Vehicles as Safe, Reliable, and High-Quality

98. New GM was financially successful in emerging from the Old GM bankruptcy. Sales of all its models went up, and New GM became profitable. New GM claimed to have turned over a new leaf in the bankruptcy—a new GM was born, and the GM brand once again stood strong in the eyes of consumers—or so the world thought.

99. In 2010, New GM sold 4.26 million vehicles globally, an average of one every 7.4 seconds. Joel Ewanick, New GM's global chief marketing officer at the time, described the success of one of its brands in a statement to the press: "Chevrolet's dedication to compelling designs, quality, durability and great value is a winning formula that resonates with consumers around the world."[2]

100. New GM repeatedly proclaimed to the world and U.S. consumers that, once it emerged from bankruptcy in 2009, it was a new and improved company committed to innovation, safety, and maintaining a strong brand:

[2] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2011/Jan/0117_chev_ global.

General Motors Company 2010 Annual Report, cover page.

101. In New GM's 2010 Annual Report, New GM proclaimed its products would "improve safety and enhance the overall driving experience for our customers:"

> As we regain our financial footing, we expect the number of new product launches to steadily rise over the next several years. And these new products will increasingly embrace advanced technology to reduce fuel consumption and emissions, improve safety and enhance the overall driving experience for our customers.

General Motors Company 2010 Annual Report, pp. 4, 10.

102. New GM claimed it would create vehicles that would define the industry standard:

> BUILDING THE NEW GM
> We are moving with increased speed and agility, and implementing change faster than ever before. We are becoming a company with the capability, resources and confidence to play offense, not defense. Instead of creating new vehicles that are just better than their predecessors, we're working to design, build and sell vehicles that define the industry standard.

General Motors Company 2010 Annual Report, p. 5.

103. In its 2010 Annual Report, New GM told consumers that it built the world's best vehicles:

> *We truly are building a new GM, from the inside out. Our vision is clear: to design, build, and sell the world's best vehicles, and we have a new business model to bring that vision to life. We have a lower cost structure, a stronger balance sheet, and a dramatically lower risk profile. We have a new leadership team – a strong mix of executive talent from outside the industry and automotive veterans – and a passionate, rejuvenated workforce.*

> *"Our plan is to steadily invest in creating world-class vehicles, which will continuously drive our cycle of great design, high quality and higher profitability."*

General Motors Company 2010 Annual Report, p. 2.

104. New GM represented that it was building vehicles with design excellence, quality, and performance:

> *And across the globe, other GM vehicles are gaining similar acclaim for design excellence, quality, and performance, including the Holden Commodore in Australia. Chevrolet Agile in Brazil, Buick LaCrosse in China, and many others.*
>
> *The company's progress is early evidence of a new business model that begins and ends with great vehicles. We are leveraging our global resources and scale to maintain stringent cost management while taking advantage of growth and revenue opportunities around the world, to ultimately deliver sustainable results for all of our shareholders.*

General Motors Company 2010 Annual Report, p. 3.

105. These themes were repeatedly put forward as the core message about New GM's Brand:

The new General Motors has one clear vision: to design, build and sell the world's best vehicles. Our new business model revolves around this vision, focusing on fewer brands, compelling vehicle design, innovative technology, improved manufacturing productivity and streamlined, more efficient inventory processes. The end result is products that delight customers and generate higher volumes and margins—and ultimately deliver more cash to invest in our future vehicles.

A New Vision, a New Business Model

Our vision is simple, straightforward and clear: to design, build and sell the world's best vehicles. That doesn't mean just making our vehicles better than the ones they replace. We have set a higher standard for the new GM—and that means building the best.

Our vision comes to life in a continuous cycle that starts, ends and begins again with great vehicle designs. To accelerate the momentum we've already created, we reduced our North American portfolio from eight brands to four: Chevrolet, Buick, Cadillac and GMC. Worldwide, we're aggressively developing and leveraging global vehicle architectures to maximize our talent and resources and achieve optimum economies of scale.

Across our manufacturing operations, we have largely eliminated overcapacity in North America while making progress in Europe, and we're committed to managing inventory with a new level of discipline. By using our manufacturing capacity more efficiently and maintaining leaner vehicle inventories, we are reducing the need to offer sales incentives on our vehicles. These moves, combined with offering attractive, high-quality vehicles, are driving healthier margins—and at the same time building stronger brands.

Our new business model creates a self-sustaining cycle of reinvestment that drives continuous improvement in vehicle design, manufacturing discipline, brand strength, pricing and margins, because we are now able to make money at the bottom as well as the top of the industry cycles.

We are seeing positive results already. In the United States, for example, improved design, content and quality have resulted in solid gains in segment share, average transaction prices and projected residual values for the Chevrolet Equinox, Buick LaCrosse and Cadillac SRX. This is just the beginning.

General Motors Company 2010 Annual Report, p. 6.

106. New GM represented that it had a world-class lineup in North America:

A World-Class Lineup in North America

Chevrolet Cruze
Global success is no surprise for the new Chevrolet Cruze, which is sold in more than 60 countries around the world. In addition to a 42 mpg Eco model (sold in North America), Cruze's globally influenced design is complemented by its exceptional quietness, high quality and attention to detail not matched by the competition.

Buick Regal
The sport-injected Buick Regal is the brand's latest addition, attracting a whole new demographic for the Buick brand. The newly designed Buick lineup, which saw 52 percent volume growth in 2010 in the United States alone, is appealing to a broader spectrum of buyers.

Chevrolet Equinox
The Chevrolet Equinox delivers best-in-segment 32-mpg highway fuel economy in a sleek, roomy new package. With the success of the Equinox and other strong-selling crossovers, GM leads the U.S. industry in total unit sales for the segment.

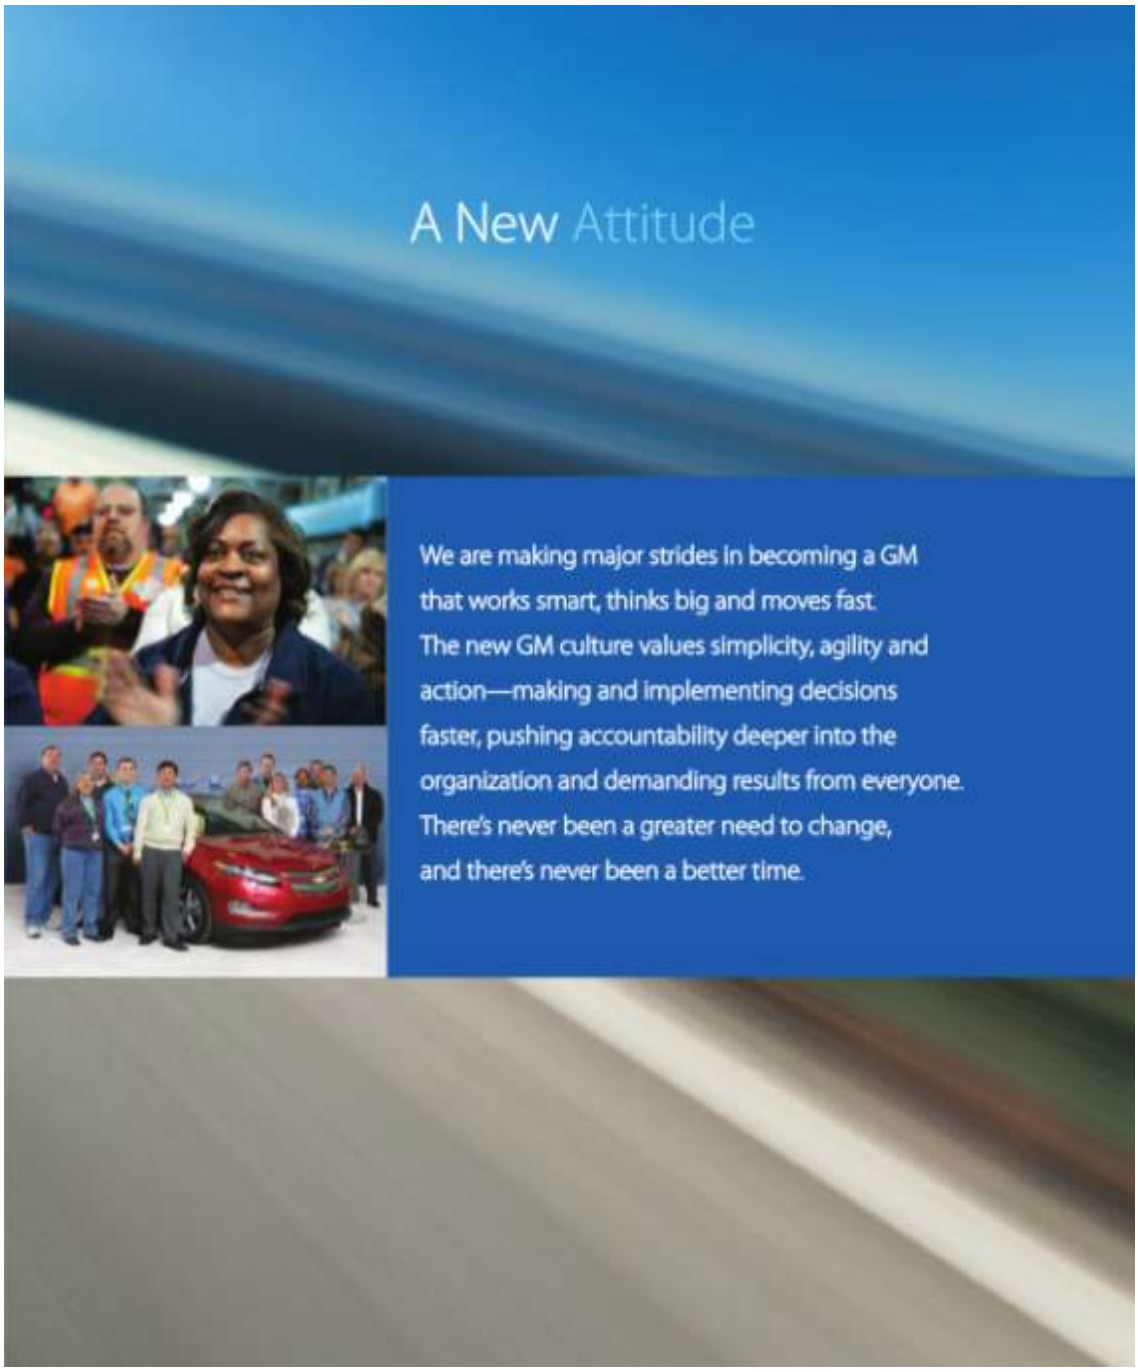
Chevrolet Sonic
Stylish four-door sedan and sporty five-door hatchback versions of the Chevrolet Sonic will be in U.S. showrooms in fall 2011. Currently the only small car built in the United States, it will be sold as the Aveo in other parts of the world.

Buick LaCrosse
Buick builds on the brand's momentum in the United States and China with the fuel-efficient LaCrosse. With eAssist technology, the LaCrosse achieves an expected 37 mpg on the highway.

Buick Verano
The all-new Buick Verano, which will be available in late 2011, appeals to customers in the United States, Canada and Mexico who want great fuel economy and luxury in a smaller but premium package.

General Motors Company 2010 Annual Report, pp. 12-13.

107. New GM boasted of its new "culture":

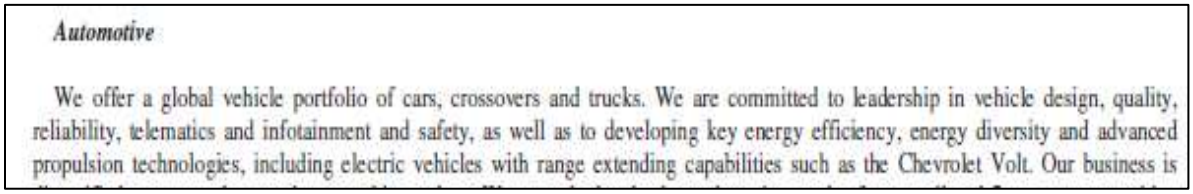


General Motors Company 2010 Annual Report, p. 16.

108. In its 2011 Annual Report, New GM proclaimed that it was putting its customers first:

General Motors Company 2011 Annual Report, p. 1.

109. New GM also announced that it is committed to leadership in vehicle safety:



General Motors Company 2011 Annual Report, p. 11.

110. In a "Letter to Stockholders" contained in its 2011 Annual Report, New GM noted that its brand had grown in value and that it designed the "World's Best Vehicles":

Dear Stockholder:

Your company is on the move once again. While there were highs and lows in 2011, our overall report card shows very solid marks, including record net income attributable to common stockholders of $7.6 billion and EBIT-adjusted income of $8.3 billion.

- *GM's overall momentum, including a 13 percent sales increase in the United States, created new jobs and drove investments. We have announced investments in 29 U.S. facilities totaling more than $7.1 billion since July 2009, with more than 17,500 jobs created or retained.*

Design, Build and Sell the World's Best Vehicles

This pillar is intended to keep the customer at the center of everything we do, and success is pretty easy to define. It means creating vehicles that people desire, value and are proud to own. When we get this right, it transforms our reputation and the company's bottom line.

General Motors Company 2011 Annual Report, p. 2.

Strengthen Brand Value

Clarity of purpose and consistency of execution are the cornerstones of our product strategy, and two brands will drive our global growth. They are Chevrolet, which embodies the qualities of value, reliability, performance, and expressive design; and Cadillac, which creates luxury vehicles that are provocative and powerful. At the same time the Holden, Buick, GMC, Baojun, Opel and Vauxhall brands are being carefully cultivated to satisfy as many customers as possible in select regions.

Each day the cultural change underway at GM becomes more striking. The old internally focused, consensus-driven and overly complicated GM is being reinvented brick by brick, by truly accountable executives who know how to take calculated risks and lead global teams that are committed to building the best vehicles in the world as efficiently as we can.

That's the crux of our plan. The plan is something we can control. We like the results we're starting to see and we're going to stick to it – always.

General Motors Company 2011 Annual Report, p. 3.

These themes continued in GM's 2012 Annual Report:

DANIEL F. AKERSON
Chairman & Chief Executive Officer
with the 2014 Cadillac CTS

TO OUR STOCKHOLDERS:

Last year, I closed my letter to you by talking about how GM was changing its processes and culture in order to build the best vehicles in the world much more efficiently and profitably. This year, I want to pick up where I left off, and articulate what success looks like for you as stockholders, and for everyone else who depends on us. >>

General Motors Company 2012 Annual Report, p. 3.

111. New GM boasted of its "focus on the customer" and its desire to be "great" and produce "quality" vehicles:

> *What is immutable is our focus on the customer, which requires us to go from "good" today to "great" in everything we do, including product design, initial quality, durability, and service after the sale.*

General Motors Company 2012 Annual Report, p. 4.

112. New GM also indicated it had changed its structure to create more "accountability" which, as shown below, was a blatant falsehood:

That work continues, and it has been complemented by changes to our design and engineering organization that have flattened the structure and created more accountability for produce execution, profitability and customer satisfaction.

General Motors Company 2012 Annual Report, p. 10.

113. And New GM represented that product quality was a key focus—another blatant falsehood:

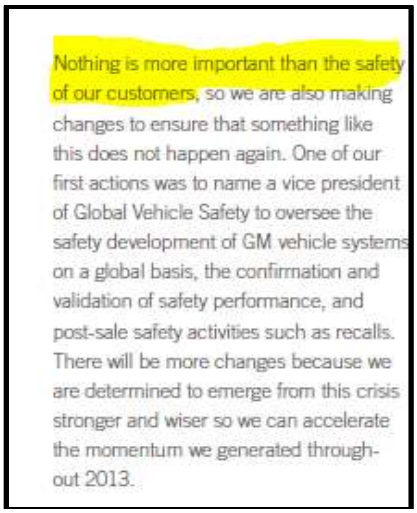
Product quality and long-term durability are two other areas that demand our unrelenting attention, even though we are doing well on key measures.

General Motors Company 2012 Annual Report, p. 10.

114. New GM's 2013 Annual Report stated, "Today's GM is born of the passion of our people to bring our customers the finest cars and trucks we've ever built":

General Motors Company 2013 Annual Report, inside front cover dual page, (unnumbered).

115. Most importantly given its inaccuracy and the damage wrought in this case, New GM proclaimed, "Nothing is more important than the safety of our customers":



Nothing is more important than the safety of our customers, so we are also making changes to ensure that something like this does not happen again. One of our first actions was to name a vice president of Global Vehicle Safety to oversee the safety development of GM vehicle systems on a global basis, the confirmation and validation of safety performance, and post-sale safety activities such as recalls. There will be more changes because we are determined to emerge from this crisis stronger and wiser so we can accelerate the momentum we generated throughout 2013.

General Motors Company 2013 Annual Report, p. 4.

B. New GM's Advertising and Marketing Literature Falsely Claimed that GM Placed Safety and Quality First

116. In May of 2014, New GM sponsored the North American Conference on Elderly Mobility. Gay Kent, director of New GM global vehicle safety and a presenter at the conference, proclaimed the primacy of safety within New GM's new company culture: "The safety of all our customers is our utmost concern."[3]

117. New GM vigorously incorporated this messaging into its public-facing communications. In advertisements and company literature, New GM consistently promoted all its vehicles as safe and reliable, and presented itself as a responsible manufacturer that stands behind GM-branded vehicles after they are sold. Examples of New GM's misleading claims of safety and reliability made in public statements, advertisements, and literature provided with its vehicles follow.

118. An online ad for "GM certified" used vehicles that ran from July 6, 2009, until April 5, 2010, stated that "GM certified means no worries."

[3] https://media.gm.com/media/us/en/gm/news.detail./content/Pages/news/us/en/2014/May/0514-cameras.

119. In April 2010, General Motors Company Chairman and CEO Ed Whitacre starred in a video commercial on behalf of New GM. In it, Mr. Whitacre acknowledged that not all Americans wanted to give New GM a second chance, but that New GM wanted to make itself a company that "all Americans can be proud of again" and "exceed every goal [Americans] set for [General Motors]." He stated that New GM was "designing, building, and selling the best cars in the world." He continued by saying that New GM has "unmatched lifesaving technology" to keep customers safe. He concluded by inviting the viewer to take a look at "the new GM."[4]

120. A radio ad that ran from New GM's inception until July 16, 2010, stated that "[a]t GM, building quality cars is the most important thing we can do."

121. On November 10, 2010, New GM published a video that told consumers that New GM actually prevents any defects from reaching consumers. The video, entitled "Andy Danko: The White Glove Quality Check," explains that there are "quality processes in the plant that prevent any defects from getting out." The video also promoted the ideal that, when a customer buys a New GM vehicle, they "drive it down the road and they never go back to the dealer."[5]

[4] https://www.youtube.com/watch?v=jbXpV0aqEM4.

[5] https://www.youtube.com/watch?v=JRFO8UzoNho&list=UUxN-Csvy_9sveql5HJviDjA.

122. In 2010, New GM ran a television advertisement for its Chevrolet brand that implied its vehicles were safe by showing parents bringing their newborn babies home from the hospital, with the tagline "as long as there are babies, there will be Chevys to bring them home."[6]

123. Another 2010 television ad informed consumers that "Chevrolet's ingenuity and integrity remain strong, exploring new areas of design and power, while continuing to make some of the safest vehicles on earth."

124. New GM's 2010 brochure for the Chevy Cobalt states, "Chevy Cobalt is savvy when it comes to standard safety" and "you'll see we've thought about safety so you don't have to." It also states "[w]e're filling our cars and trucks with the kind of thinking, features and craftsmanship you'd expect to pay a lot more for."[7]

[6] https://www.youtube.com/watch?v=rb28vTN382g.

[7] https://www.auto-brochures.com/makes/Chevrolet/Cobalt/Chevrolet_US%20Cobalt_2010.pdf.

COBALT

STREET-SMART ABOUT SAFETY.

Chevy Cobalt is savvy when it comes to standard safety. It's equipped with dual frontal air bags and HEAD-CURTAIN SIDE-IMPACT AIR BAGS,[2] the OnStar[4] Safe & Sound Plan (standard for the first year), and a Driver Information Center that alerts you to tire pressure, oil life and many other vehicle functions and also includes personalization settings. The STABILITRAK Electronic Stability Control System (including Traction Control) is standard on SS models. Factor in antilock brakes – standard on 2LT and SS, available on LS and 1LT – and you'll see we've thought about safety so you don't have to.

CHEVY To us, it's pretty simple: Build vehicles that anyone would be proud to own, and put them within reach. We offer more models than Toyota or Honda with 30 MPG HIGHWAY OR BETTER! We're backing our quality with the BEST COVERAGE IN AMERICA, which includes the 100,000 mile/5-year[2] transferable Powertrain Limited Warranty plus Roadside Assistance and Courtesy Transportation Programs. We're filling our cars and trucks with the kind of thinking, features and craftsmanship you'd expect to pay a lot more for. This philosophy has earned us more *CONSUMERS DIGEST* "BEST BUY" awards for 2009 models[3] than any other brand. So owning a Chevy isn't just a source of transportation. It's a source of pride. CHEVY.COM

125. New GM's 2010 Chevy HHR brochure proclaims, "PLAY IT SAFE" and "It's easier to have fun when you have less to worry about."[8]

HHR

PLAY IT SAFE.

It's easier to have fun when you have less to worry about. HHR earned FIVE-STAR ratings for both frontal and side-impact crash tests.[3] HHR comes with standard side-impact air bags,[2] as well as the STABILITRAK Electronic Stability Control System (including Traction Control) and antilock brakes to help keep you confident while you're on the road. And ONSTAR[4] with the Safe & Sound Plan – standard for the first year – includes Automatic Crash Response with built-in vehicle sensors that can send an alert to OnStar. Even if you don't respond, an OnStar Advisor can request that emergency help be sent right away.

An available rearview camera system helps keep certain stationary objects like bikes in view when backing up (available summer 2009).

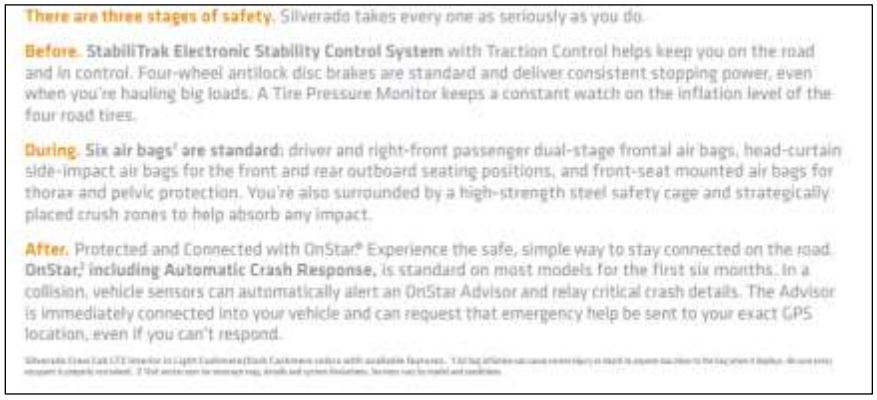
126. New GM's brochure for the 2011 Chevrolet Silverado states, "Silverado – the most dependable, long-lasting full size pickups on the road." It goes on to say, "There are three stages of safety. Silverado takes every one as seriously as you do."[9]



127. The brochure for the 2011 Cadillac DTS and STS states, "Passenger safety is a primary consideration throughout the engineering process," and "[t]he STS and DTS were carefully designed to provide a host of features to help you from getting into a collision in the first place."[10]

[9] https://www.auto-brochures.com/makes/Chevrolet/Silverado/Chevrolet_US%20Silverado_2011.pdf.

[10] https://www.auto-brochures.com/makes/Cadillac/Cadillac_US%20STS-DTS_2011.pdf.

128. On August 29, 2011, New GM's website advertised: "Chevrolet provides consumers with fuel-efficient, safe and reliable vehicles that deliver high quality, expressive design, spirited performance and value."[11]

129. On September 29, 2011, New GM announced on the "News" portion of its website the introduction of front center airbags. The announcement included a quote from Gay Kent, New GM Executive Director of Vehicle Safety and Crashworthiness, who stated that: "This technology is a further demonstration of New GM's above-and-beyond commitment to provide continuous occupant protection before, during and after a crash."[12]

130. On December 27, 2011, Gay Kent was quoted in an interview on New GM's website as saying: "Our safety strategy is about providing continuous protection for our customers before, during and after a crash."[13]

[11] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2014/Jul/0731-mpg.

131. New GM's brochure for the 2012 Chevrolet Impala proclaims: "A safety philosophy that RUNS DEEP," and that "if a moderate to severe collision does happen, Impala is designed to respond quickly":[14]

132. New GM's brochure for the 2012 Cadillac CTS announces, "At Cadillac, we believe the best way to survive a collision is to avoid one in the first place," and "Active safety begins with a responsive engine, powerful brakes, and an agile suspension."[15]

[14] https://www.chevrolet.com/content/dam/Chevrolet/northamerica/usa/nscwebsite/en/Home/Help%20Center/Download%20a%20Brochure/02_PDFs/2012_Impala_eBrochure.pdf.

[15] https://www.auto-brochures.com/makes/Cadillac/CTS/Cadillac_US%20CTS_2012.pdf.

133. On January 3, 2012, Gay Kent, New GM Executive Director of Vehicle Safety, was quoted on New GM's website as saying: "From the largest vehicles in our lineup to the smallest, we are putting overall crashworthiness and state-of-the-art safety technologies at the top of the list of must-haves."[16]

134. An online national ad campaign for New GM in April 2012 stressed "Safety. Utility. Performance."

135. On June 5, 2012, New GM posted an article on its website announcing that its Malibu Eco had received top safety ratings from the National Highway Traffic Safety Administration and the Insurance Institute for Highway Safety. The article includes the following quotes: "With the Malibu Eco, Chevrolet has earned seven 2012 TOP SAFETY PICK awards," said IIHS President Adrian Lund. "The IIHS and NHTSA results demonstrate GM's commitment to state-of-the-art crash protection." And, "We are now seeing the results from our commitment to design the highest-rated vehicles in the world in safety performance," said Gay Kent, New GM Executive Director of Vehicle Safety. "Earning these top safety ratings

[16] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2012/Jan/0103_sonic.

demonstrates the strength of the Malibu's advanced structure, overall crashworthiness and effectiveness of the vehicle's state-of-the-art safety technologies."[17]

136. On June 5, 2012, New GM posted an article on its website entitled "Chevrolet Backs New Vehicle Lineup with Guarantee," which included the following statement: "We have transformed the Chevrolet lineup, so there is no better time than now to reach out to new customers with the love it or return it guarantee and very attractive, bottom line pricing," said Chris Perry, Chevrolet global vice president of marketing. "We think customers who have been driving competitive makes or even older Chevrolets will be very pleased by today's Chevrolet designs, easy-to-use technologies, comprehensive safety and the quality built into all of our cars, trucks and crossovers."[18]

137. On November 5, 2012, New GM published a video to advertise its "Safety Alert Seat" and other safety sensors. The video described older safety systems and then added that new systems "can offer drivers even more protection." A Cadillac Safety Engineer added that "are a variety of crash avoidance sensors that work together to help the driver avoid crashes." The engineer then discussed all the sensors and the safety alert seat on the Cadillac XTS, leaving the viewer with the impression safety was a top priority at Cadillac.[19]

138. New GM's brochure for the 2013 Chevrolet Traverse states, "Traverse provides peace of mind with an array of innovative safety features," and "[i]t helps protect against the unexpected."[20]

139. A national print ad campaign in April 2013 states that, "[w]hen lives are on the line, you need a dependable vehicle you can rely on. Chevrolet and GM … for power, performance and safety."

[20] https://www.auto-brochures.com/makes/Chevrolet/Traverse/Chevrolet_US%20Traverse_2013.pdf.

140. On November 8, 2013, New GM posted a press release on its website regarding GMC, referring to it as "one of the industry's healthiest brands":[21]

> **About GMC**
> **GMC** has manufactured trucks since 1902, and is one of the industry's healthiest brands. Innovation and engineering excellence is built into all GMC vehicles and the brand is evolving to offer more fuel-efficient trucks and crossovers, including the Terrain small SUV and Acadia crossover. The 2014 Sierra half-ton pickup boasts all-new powertrains and design, and the Sierra Heavy Duty pickups are the most capable and powerful trucks ever built by GMC. Every retail GMC model, including Yukon and Yukon XL full-size SUVs, is now available in Denali luxury trim. Details on all GMC models are available at http://www.gmc.com/, on Twitter at @thisisgmc or at http://www.facebook.com/gmc.

141. A December 2013 New GM testimonial ad stated that "GM has been able to deliver a quality product that satisfies my need for dignity and safety."

142. In 2013, New GM proclaimed on its website, https://www.gm.com, the company's passion for building and selling the world's best vehicles as "the hallmark of our customer-driven culture":[22]

[21] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2013/Nov/1108-truck-lightweighting.

[22] https://www.gm.com/company/aboutGM/our_company.

143. On the same website in 2013, New GM stated: "At GM, it's about getting everything right for our customers – from the way we design, engineer and manufacture our vehicles, all the way through the ownership experience."[23]

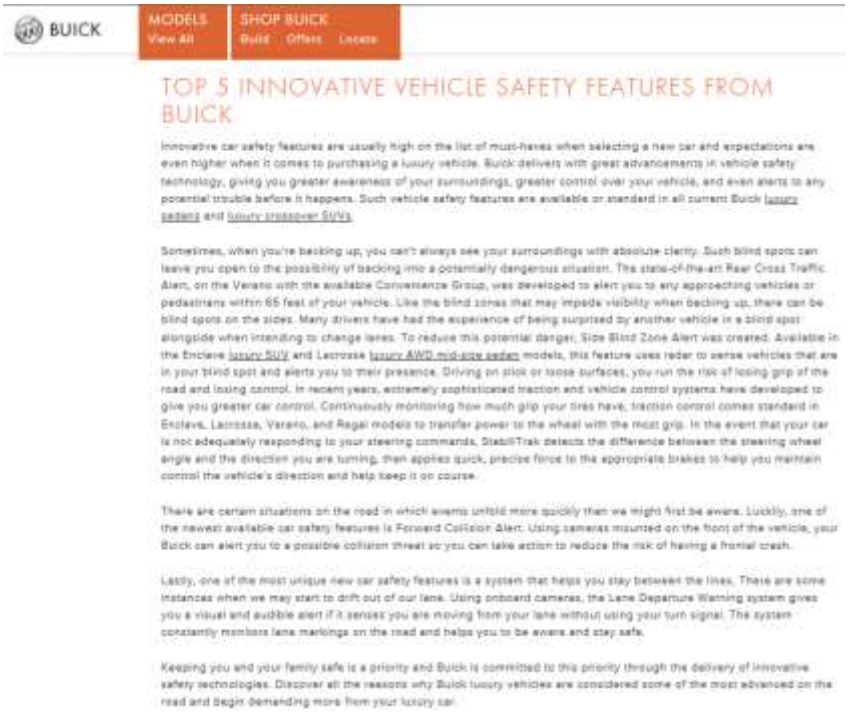
144. On its website, Chevrolet.com, New GM promises that it is "Putting safety ON TOP," and that "Chevy Makes Safety a Top Priority":[24]

145. On its website, Buick.com, New GM represents that "Keeping you and your family safe is a priority":[25]

[23] https://www.gm.com/vision/quality_safety/it_begins_with_a_commitment_to_Quality.

[24] https://www.chevrolet.com/culture/article/vehicle-safety-preparation.

[25] https://www.buick.com/top-vehicle-safety-features.



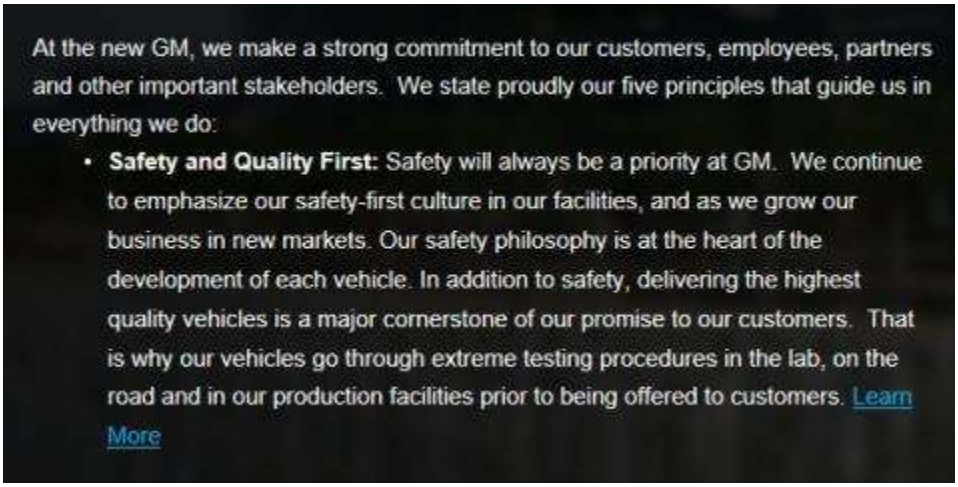
146. New GM's website currently touts its purported "Commitment to Safety," which is "at the top of the agenda at GM:"[26]

> *Innovation: Quality & Safety; GM's Commitment to Safety; Quality and safety are at the top of the agenda at GM, as we work on technology improvements in crash avoidance and crashworthiness to augment the post-event benefits of OnStar, like advanced automatic crash notification.*
>
> *Understanding what you want and need from your vehicle helps GM proactively design and test features that help keep you safe and enjoy the drive. Our engineers thoroughly test our vehicles for durability, comfort, and noise minimization before you think about them. The same quality process ensures our safety technology performs when you need it.*

147. New GM's website further promises "Safety and Quality First: Safety will always be a priority at New GM. We continue to emphasize our safety-first culture in our facilities," and that, "[i]n addition to safety, delivering the highest quality vehicles is a major cornerstone of our promise to our customers":[27]

[26] https://www.gm.com/vision/quality_safety/gms_commitment_tosafety.

[27] https://www.gm.com/company/aboutGM/our_company.



148. New GM's current website states that "leading the way is our seasoned leadership team who set high standards for our company so that we can give you the best cars and trucks. This means that we are committed to delivering vehicles with compelling designs, flawless quality, and reliability, and leading safety, fuel economy and infotainment features…"[28]

149. In its 2011 10-K SEC filing, New GM stated "We are a leading global automotive company. Our vision is to design, build and sell the world's best vehicles. We seek to distinguish our vehicles through superior design, quality, reliability, telematics (wireless voice and data) and infotainment and safety within their respective segments." General Motors 2011 Form 10-K, p. 50.[29]

150. New GM made these and similar representations to boost vehicle sales while knowing that millions of GM-branded vehicles, across numerous models and years, were plagued with serious and concealed safety defects. New GM was well aware of the impact vehicle recalls, and their timeliness, have on its brand image. In its 2010 Form 10-K submitted to the United States Securities and Exchange Commission ("SEC"), New GM admitted that "Product recalls can harm our reputation and cause us to lose customers, particularly if those

[28] https://www.gm.com/company/aboutGM/our_company.

[29] https://www.sec.gov/Archives/edgar/data/1467858/000119312511051462/d10k.htm.

recalls cause consumers to question the safety or reliability of our products. Any costs incurred or lost sales caused by future product recalls could materially adversely affect our business." General Motors 2010 Form 10-K, p. 31.[30] This is precisely why New GM decided to disregard safety issues and conceal them.

C. Contrary to its Barrage of Representations about Safety and Quality, New GM Concealed and Disregarded Safety Issues as a Way of Doing Business

151. Ever since its inception, New GM possessed vastly superior (if not exclusive) knowledge and information to that of consumers about the design and function of GM-branded vehicles and the existence of the defects in those vehicles.

152. Recently revealed information presents a disturbing picture of New GM's approach to safety issues—both in the design and manufacturing stages, and in discovering and responding to defects in GM-branded vehicles that have already been sold.

153. New GM made very clear to its personnel that cost-cutting was more important than safety, deprived its personnel of necessary resources for spotting and remedying defects, trained its employees not to reveal known defects, and rebuked those who attempted to "push hard" on safety issues.

154. In stark contrast to New GM's public mantra that "Nothing is more important than the safety of our customers" and similar statements, a prime "directive" at New GM was "cost is everything."[31] The messages from top leadership at New GM to employees, as well as their actions, were focused on the need to control cost.[32]

[30] https://www.sec.gov/Archives/edgar/data/1467858/000119312510078119/d10k.htm#toc85733_4.

[31] Valukas Report at 249.

[32] *Id.* at 250.

155. One New GM engineer stated that emphasis on cost control at New GM "permeates the fabric of the whole culture."[33]

156. According to Mark Reuss (President of GMNA from 2009-2013 before succeeding Mary Barra as Executive Vice President for Global Product Development, Purchasing and Supply Chain in 2014), cost and time-cutting principles known as the "Big 4" at New GM "emphasized timing over quality."[34]

157. New GM's focus on cost-cutting created major disincentives to personnel who might wish to address safety issues. For example, those responsible for a vehicle were responsible for its costs, but if they wanted to make a change that incurred cost and affected other vehicles, they also became responsible for the costs incurred in the other vehicles.

158. As another cost-cutting measure, parts were sourced to the lowest bidder, even if they were not the highest quality parts.[35]

159. Because of New GM's focus on cost-cutting, New GM engineers did not believe they had extra funds to spend on product improvements.[36]

160. New GM's focus on cost-cutting also made it harder for New GM personnel to discover safety defects, as in the case of the "TREAD Reporting team."

161. New GM used its TREAD database (known as "TREAD") to store the data required to be reported quarterly to NHTSA under the TREAD Act.[37] From the date of its

[33] *Id.*

[34] *Id.*

[35] *Id.* at 251.

[36] *Id.*

[37] *Id.* at 306.

inception in 2009, TREAD has been the principal database used by New GM to track incidents related to its vehicles.[38]

162. From 2003-2007 or 2008, the TREAD Reporting team had eight employees who would conduct monthly searches and prepare scatter graphs to identify spikes in the number of accidents or complaints with respect to various GM-branded vehicles. The TREAD Reporting team reports went to a review panel and sometimes spawned investigations to determine if any safety defect existed.[39]

163. In or around 2007-08, Old GM reduced the TREAD Reporting team from eight to three employees, and pared down the monthly data mining process.[40] In 2010, New GM restored two people to the team, but they did not participate in the TREAD database searches.[41] Moreover, until 2014, the TREAD Reporting team did not have sufficient resources to obtain any of the advanced data mining software programs available in the industry to better identify and understand potential defects.[42]

164. By starving the TREAD Reporting team of the resources it needed to identify potential safety issues, New GM helped to insure that safety issues would not come to light.

165. "[T]here was resistance or reluctance to raise issues or concerns in the GM culture." The culture, atmosphere and supervisor response at New GM "discouraged individuals from raising safety concerns."[43]

---

[38] *Id*.

[39] *Id*. at 307.

[40] *Id*.

[41] *Id*. at 307-308.

[42] *Id*. at 208.

[43] *Id*. at 252.

166. New GM CEO, Mary Barra, experienced instances where New GM engineers were "unwilling to identify issues out of concern that it would delay the launch" of a vehicle.[44]

167. New GM supervisors warned employees to "never put anything above the company" and "never put the company at risk."[45]

168. New GM systematically "pushed back" on describing matters as safety issues and, as a result, "GM personnel failed to raise significant issues to key decision-makers."[46]

169. So, for example, New GM discouraged the use of the word "stall" in Technical Service Bulletins ("TSBs") that it sometimes sent to dealers about issues in GM-branded vehicles. According to Steve Oakley, who drafted a Technical Service Bulletin in connection with the ignition switch defects, "the term 'stall' is a 'hot' word that GM generally does not use in bulletins because it may raise a concern about vehicle safety, which suggests GM should recall the vehicle, not issue a bulletin."[47] Other New GM personnel confirmed Oakley on this point, stating that "there was concern about the use of 'stall' in a TSB because such language might draw the attention of NHTSA."[48]

170. Oakley further noted that "he was reluctant to push hard on safety issues because of his perception that his predecessor had been pushed out of the job for doing just that."[49]

171. Many New GM employees "did not take notes at all at critical safety meetings because they believed New GM lawyers did not want such notes taken."[50]

[46] *Id.* at 253.

[47] *Id.* at 92.

[48] *Id.* at 93.

[49] *Id.*

[50] *Id.* at 254.

172. A New GM training document released by NHTSA as an attachment to its Consent Order sheds further light on the lengths to which New GM went to ensure that known defects were concealed. It appears that the defects were concealed pursuant to a company policy that New GM inherited from Old GM. The document consists of slides from a 2008 Technical Learning Symposium for "designing engineers," "company vehicle drivers," and other employees at Old GM. On information and belief, the vast majority of employees who participated in this webinar presentation continued on in their same positions at New GM after July 10, 2009.

173. The presentation focused on recalls and the "reasons for recalls."

174. One major component of the presentation was captioned "Documentation Guidelines," and focused on what employees should (and should not say) when describing problems in vehicles. Employees were instructed to "[w]rite smart," and to "[b]e factual, not fantastic" in their writing. In practice, "factual" was a euphemism for avoiding facts and relevant details.

175. New GM vehicle drivers were given examples of comments to avoid, including the following: "This is a safety and security issue"; "I believe the wheels are too soft and weak and could cause a serious problem"; and "Dangerous … almost caused accident."

176. In documents used for reports and presentations, employees were advised to avoid a long list of words, including: "bad," "dangerous," "defect," "defective," "failed," "flawed," "life-threatening," "problem," "safety," "safety-related," and "serious."

177. In truly Orwellian fashion, the company advised employees to use the words (1) "Issue, Condition [or] Matter" instead of "Problem"; (2) "Has Potential Safety Implications" instead of "Safety"; (3) "Broke and separated 10 mm" instead of "Failed"; (4)

"Above/Below/Exceeds Specification" instead of "Good [or] Bad"; and (5) "Does not perform to design" instead of "Defect/Defective."

178. As NHTSA's Acting Administrator Friedman noted at the May 16, 2014 press conference announcing the Ignition Switch Defect Consent Order, it was New GM's company policy to avoid using words that might suggest the existence of a safety defect:

> *GM must rethink the corporate philosophy reflected in the documents we reviewed, including training materials that explicitly discouraged employees from using words like 'defect,' 'dangerous,' 'safety related,' and many more essential terms for engineers and investigators to clearly communicate up the chain when they suspect a problem.*

179. Thus, New GM trained its employees to conceal the existence of known safety defects from consumers and regulators. Indeed, it is nearly impossible to convey the potential existence of a safety defect without using the words "safety" or "defect" or similarly strong language that was forbidden at New GM.

180. So institutionalized was the "phenomenon of avoiding responsibility" at New GM that the practice was given a name: "the 'GM salute,'" which was "a crossing of the arms and pointing outward towards others, indicating that the responsibility belongs to someone else, not me."[51]

181. CEO Mary Barra described a related phenomenon, "known as the 'GM nod," which was "when everyone nods in agreement to a proposed plan of action, but then leaves the room with no intention to follow through, and the nod is an empty gesture."[52]

182. According to the New GM Report prepared by Anton R. Valukas (known as the "Valukas Report"), part of the failure to properly correct the ignition switch defect was due to

[51] GM Report at 255.

[52] *Id.* at 256.

problems with New GM's organizational structure[53] and a corporate culture that did not care enough about safety.[54] Other culprits included a lack of open and honest communication with NHTSA regarding safety issues,[55] and the improper conduct and handling of safety issues by lawyers within New GM's Legal Staff.[56] On information and belief, all of these issues independently and in tandem helped cause the concealment of, and failure to remedy, the many defects that have led to the spate of recalls in 2014.

183. An automobile manufacturer has a duty to promptly disclose and remedy defects. New GM knowingly concealed information about material safety hazards from the driving public, its own customers, and the Class, thereby allowing unsuspecting vehicle owners and lessees to continue unknowingly driving patently unsafe vehicles that posed a mortal danger to themselves, their passengers and loved ones, other drivers, and pedestrians.

184. Not only did New GM take far too long in failing to address or remedy the defects, it deliberately worked to cover-up, hide, omit, fraudulently conceal, and/or suppress material facts from the Class who relied upon it to the detriment of the Class.

D. New GM's Deceptions Continued In Its Public Discussions of the Ignition Switch Recalls

185. From the CEO on down, GM has once again embarked on a public relations campaign to convince consumers and regulators that, ***this time***, New GM has sincerely reformed.

186. On February 25, 2014, New GM North America President Alan Batey publicly apologized and again reiterated New GM's purported commitment to safety: "Ensuring our

[53] *Id*. at 259-260.

[54] *Id*. at 260-61.

[55] *Id*. at 263.

[56] *Id*. at 264.

customers' safety is our first order of business. We are deeply sorry and we are working to address this issue as quickly as we can."[57]

187. In a press release on March 18, 2014, New GM announced that Jeff Boyer had been named to the newly created position of Vice President, Global Vehicle Safety. In the press release, New GM quoted Mr. Boyer as stating that: "Nothing is more important than the safety of our customers in the vehicles they drive. Today's GM is committed to this, and I'm ready to take on this assignment."[58]

188. On May 13, 2014, New GM published a video to defend its product and maintain that the ignition defect will never occur when only a single key is used. Jeff Boyer addressed viewers and told them New GM's Milford Proving Ground is one of "the largest and most comprehensive testing facilities in the world." He told viewers that if you use a New GM single key that there is no safety risk.[59]

189. As of July 2014, New GM continues to praise its safety testing. It published a video entitled "90 Years of Safety Testing at New GM's Milford Proving Ground." The narrator describes New GM's testing facility as "one of the world's top automotive facilities" where data

[57] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2014/Feb/0225-ion.

[58] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2014/mar/0318-boyer.

[59] https://www.youtube.com/watch?v=rXO7F3aUBAY.

is "analyzed for customer safety." The narrator concludes by saying, "[o]ver the past ninety years one thing remained unchanged, GM continues to develop and use the most advanced technologies available to deliver customers the safest vehicles possible."[60]

190. On July 31, 2014, Jack Jensen, the New GM engineering group manager for the "Milford Proving Ground" dummy lab, told customers that "[w]e have more sophisticated dummies, computers to monitor crashes and new facilities to observe different types of potential hazards. All those things together give our engineers the ability to design a broad range of vehicles that safely get our customers where they need to go."[61]

191. As discussed in this Complaint, these most recent statements from New GM personnel contrast starkly with New GM's wholly inadequate response to remedy the defects in its vehicles, including the ignition switch defect.

E. There Are Serious Safety Defects in Millions of GM-Branded Vehicles Across Many Models and Years and, Until Recently, New GM Concealed Them from Consumers

192. Over the first nine-months of 2014, New GM announced at least 60 recalls for more than 60 separate defects affecting over 27 million GM-branded vehicles sold in the United

[60] https://www.youtube.com/watch?v=BPQdlJZvZhE&list=UUxN-Csvy_9sveql5HJviDjA.

[61] https://media.gm.com/media/us/en/gm/news.detail/content/Pages/news/us/en/2014/Jul/0731-mpg.

States from model years 1997-2014. The numbers of recalls and serious safety defects are unprecedented, and can only lead to one conclusion: New GM was concealing the fact that it was incapable of building safe vehicles free from defects. For context, in 2013, the whole auto industry in the United States issued recalls affecting 23 million vehicles, and the record for the whole industry in a given year is 31 million (in 2004). Thus, New GM's recalls just 10 months into this year impacts more vehicles than the ***entire industry's*** recalls did last year and is approaching the ***industry-wide*** record for a single year.

193. Even more disturbingly, the available evidence shows a common pattern: From its inception in 2009, New GM knew about an ever-growing list of serious safety defects in millions of GM-branded vehicles, but concealed them from consumers and regulators in order to cut costs, boost sales, and avoid the cost and publicity of recalls.

194. Unsurprisingly in light of New GM's systemic devaluation of safety issues, the evidence also shows that New GM has manufactured and sold a grossly inordinate number of vehicles with serious safety defects.

195. New GM inherited from Old GM a company that valued cost-cutting over safety, actively discouraged its personnel from taking a "hard line" on safety issues, avoided using "hot" words like "stall" that might attract the attention of NHTSA and suggest that a recall was required, and trained its employees to not use words such as "defect" or "problem" that might flag the existence of a safety issue. New GM did nothing to change these practices.

196. The Center for Auto Safety recently stated that it has identified 2,004 death and injury reports filed by New GM with federal regulators in connection with vehicles that have

recently been recalled.[62] Most or all of these deaths and injuries would have been avoided had New GM complied with its TREAD Act obligations over the past five years.

197. The many defects concealed and/or created by New GM affect important safety systems in GM-branded vehicles, including the ignition, power steering, airbags, brake lights, gearshift systems, and seatbelts.

198. The available evidence shows a consistent pattern: New GM learned about a particular defect and, often only at the prodding of regulatory authorities, "investigated" the defect and decided upon a "root cause." New GM then took minimal action—such as issuing a carefully worded "Technical Service Bulletin" to its dealers, or even recalling a limited number of the vehicles with the defect. All the while, the true nature and scope of the defects were kept under wraps, vehicles affected by the defects remained on the road, New GM continued to create new defects in new vehicles, and New GM enticed Class members to purchase its vehicles by touting the safety, quality, and reliability of its vehicles, and presenting itself as a manufacturer that stands behind its products.

199. Many of the most significant defects are discussed below.

F. The Ignition Switch System Defects

200. More than 13 million GM-branded vehicles contain a uniformly designed ignition switch and cylinder, which is substantially similar for all the vehicles, with the key position of the lock module located low on the steering column, in close proximity to a driver's knee. The ignition switch in these vehicles, the "Defective Ignition Switch Vehicles," is prone to fail during ordinary and foreseeable driving situations. New GM initially recalled 2.1 million of these Defective Ignition Switch Vehicles in February and March of 2014, and it was this initial recall

[62] *See Thousands of Accident Reports Filed Involving Recalled GM Cars: Report*, Irvin Jackson (June 3, 2014).

that set in motion the avalanche of recalls that is described in this Complaint. In June and July of 2014, New GM recalled an additional 11 million vehicles, ostensibly for distinct safety defects involving the ignition and ignition key. As set forth below, however, each of these recalls involves a defective ignition switch, and the consequences of product failure in each of the recalled vehicles is substantially similar, if not identical. Because the defects and the safety consequences are so similar, it is likely (and Plaintiffs hereby allege) that each of the defects involves a defective ignition switch that is placed in an unreasonable position on the steering cylinder and that is capable of disabling the airbag system in normal and foreseeable driving circumstances.

201. More specifically, the ignition switch can inadvertently move from the "run" to the "accessory" or "off" position at any time during normal and proper operation of the Defective Ignition Switch Vehicles. The ignition switch is most likely to move when the vehicle is jarred or travels across a bumpy road; if the key chain is heavy; if a driver inadvertently touches the ignition key with his or her knee; or for a host of additional reasons. When the ignition switch inadvertently moves out of the "run" position, the vehicle suddenly and unexpectedly loses engine power, power steering, and power brakes, and certain safety features are disabled, including the vehicle's airbags. This leaves occupants vulnerable to crashes, serious injuries, and death.

202. The ignition switch systems at issue are defective in at least three major respects. First, the switches are simply weak; because of a faulty "detent plunger," the switch can inadvertently move from the "run" to the "accessory" position. Second, because the ignition switch is placed low on the steering column, the driver's knee can easily bump the key (or the hanging fob below the key) and cause the switch to inadvertently move from the "run" to the

"accessory" or "off" position. Third, when the ignition switch moves from the "run" to the "accessory" or "off" position, the vehicle's power is disabled. This also immediately disables the airbags. Thus, when power is lost during ordinary operation of the vehicle, a driver is left without the protection of the airbag system even if he or she is traveling at high speeds.

203. Vehicles with defective ignition switches are therefore unreasonably prone to be involved in accidents, and those accidents are unreasonably likely to result in serious bodily harm or death to the drivers and passengers of the vehicles.

204. Indeed, New GM itself has acknowledged that the defective ignition switches pose an "increas[ed] risk of injury or fatality" and has linked the ignition switch defect to at least 13 deaths and over 50 crashes. Ken Feinberg, who was hired by New GM to settle wrongful death claims arising from the ignition switch defects, has already linked the defect to 21 deaths, and has over 100 potential wrongful death claims still to review. The Center for Auto Safety studied collisions in just two vehicle makes, and linked the defect to over 300 accidents. There is every reason to believe that as more information is made public, these numbers will continue to grow.

205. Alarmingly, New GM knew of the deadly ignition switch defects and their dangerous consequences from the date of its creation on July 10, 2009, but concealed its knowledge from consumers and regulators. To this day, New GM continues to conceal material facts regarding the extent and nature of this safety defect, as well as what steps must be taken to remedy the defect.

206. While New GM has instituted a recall of millions vehicles for defective ignition switches, it knew—***and its own engineering documents reflect***—that the defects transcend the design of the ignition switch and also include the placement of the ignition switch on the steering

column, a lack of adequate protection of the ignition switch from forces of inadvertent driver contact, and the need to redesign the airbag system so that it is not immediately disabled when the ignition switch fails in ordinary and foreseeable driving situations. To fully remedy the problem and render the Defective Ignition Switch Vehicles safe and of economic value to their owners again, New GM must address these additional issues (and perhaps others).

207. Further, and as set forth more fully below, New GM's recall of the Defective Ignition Switch Vehicles has been, to date, incomplete and inadequate, and it underscores New GM's ongoing fraudulent concealment and fraudulent misrepresentation of the nature and extent of the defects. New GM has long known of and understood the ignition switch defects, and its failure to fully remedy the problems associated with this defect underscores the necessity of this class litigation.

1. New GM learns of the defective ignition switch.

208. On July 10, 2009, the United States Bankruptcy Court approved the sale of General Motors Corporation, which was converted into General Motors, LLC, or New GM. From its creation, New GM, which retained the vast majority of Old GM's senior level executives and engineers, knew that Old GM had manufactured and sold millions of vehicles afflicted with the ignition switch defects.

209. In setting forth the knowledge of Old GM in connection with the ignition switch and other defects set forth herein, Plaintiffs ***do not*** seek to hold New GM liable for the actions of Old GM. Instead, the knowledge of Old GM is important and relevant because it is ***directly attributable*** to New GM. In light of its knowledge of the ignition switch defects, and the myriad other defects, New GM had (and breached) its legal obligations to Plaintiffs and the Class.

210. In part, New GM's knowledge of the ignition switch defects arises from the fact that key personnel with knowledge of the defects were employed by New GM when Old GM

ceased to exist. Moreover, many of these employees held managerial and decision making authority in Old GM, and accepted similar positions with New GM. For example, the design research engineer who was responsible for the rollout of the defective ignition switch in the Saturn Ion was Ray DeGiorgio. Mr. DeGiorgio continued to serve as an engineer at New GM until April 2014, when he was suspended (and ultimately fired) as a result of his involvement in the ignition switch crisis.

211. Mr. DeGiorgio was hardly the only employee who retained his Old GM position with New GM. Other Old GM employees who were retained and given decision making authority in New GM include: current CEO Mary T. Barra; director of product investigations Carmen Benavides; Program Engineering Manager Gary Altman; engineer Jim Federico; vice presidents for product safety John Calabrese and Alicia Boler-Davis; vice president of regulatory affairs Michael Robinson; director of product investigations Gay Kent; general counsel and vice president Michael P. Milliken; and in-house product liability lawyer William Kemp.

212. Indeed, on or around the day of its formation as an entity, New GM acquired notice and full knowledge of the facts set forth below.

213. In 2001, during pre-production testing of the 2003 Saturn Ion, GM engineers learned that the vehicle's ignition switch could unintentionally move from the "run" to the "accessory" or "off" position. GM further learned that where the ignition switch moved from "run" to "accessory" or "off," the vehicle's engine would stall and/or lose power.

214. Delphi Mechatronics ("Delphi"), the manufacturer of many of the defective ignition switches in the Defective Ignition Switch Vehicles, informed Old GM that the ignition switch did not meet Old GM's design specifications. Rather than delay production of the Saturn Ion in order to ensure that the ignition switch met specifications, Old GM's design release

engineer, Ray DeGiorgio, simply lowered the specification requirements and approved use of ignition switches that he knew did not meet Old GM's specifications.

215. In 2004, Old GM engineers reported that the ignition switch on the Saturn Ion was so weak and the ignition placed so low on the steering column that the driver's knee could easily bump the key and turn off the vehicle.

216. This defect was sufficiently serious for an Old GM engineer to conclude, in January 2004, that "[t]his is a basic design flaw and should be corrected if we want repeat sales."

217. A July 1, 2004 report by Siemens VDO Automotive analyzed the relationship between the ignition switch in GM-branded vehicles and the airbag system. The Siemens report concluded that when a GM-branded vehicle experienced a power failure, the airbag sensors were disabled. The Siemens report was distributed to at least five Old GM engineers. The Chevrolet Cobalt was in pre-production at this time.

218. In 2004, Old GM began manufacturing and selling the 2005 Chevrolet Cobalt. Old GM installed the same ignition switch in the 2005 Cobalt as it did in the Saturn Ion.

219. During testing of the Cobalt, Old GM engineer Gary Altman observed an incident in which a Cobalt suddenly lost engine power because the ignition switch moved out of the "run" position during vehicle operation.

220. In late 2004, while testing was ongoing on the Cobalt, Chief Cobalt Engineer Doug Parks asked Mr. Altman to investigate a journalist's complaint that he had turned off a Cobalt vehicle by hitting his knee against the key fob.

221. Old GM opened an engineering inquiry known as a Problem Resolution Tracking System "Problem Resolution" to evaluate a number of potential solutions to this moving engine stall problem. At this time, Problem Resolution issues were analyzed by a Current Production

Improvement Team ("Improvement Team"). The Improvement Team that examined the Cobalt issue beginning in late 2004 included a cross-section of business people and engineers, including Altman and Lori Queen, Vehicle Line Executive on the case.

222. Doug Parks, Chief Cobalt Engineer, was also active in Problem Resolution. On March 1, 2005, he attended a meeting whose subject was "vehicle can be keyed off with knee while driving." Parks also attended a June 14, 2005 meeting that included slides discussing a NEW YORK TIMES article that described how the Cobalt's engine could cut out because of the ignition switch problem.

223. In 2005, Parks sent an email with the subject, "Inadvertent Ign turn-off." In the email, Parks wrote, "For service, can we come up with a 'plug' to go into the key that centers the ring through the middle of the key and not the edge/slot? This appears to me to be the only real, quick solution."

224. After considering this and a number of other solutions (including changes to the key position and measures to increase the torque in the ignition switch), the CPIT examining the issue decided to do nothing.

225. Old and New GM engineer Gary Altman recently admitted that engineering managers (including himself and Ray DeGiorgio) knew about ignition switch problems in the Cobalt that could cause these vehicles to stall, and disable power steering and brakes, but launched the vehicle anyway because they believed that the vehicles could be safely coasted off the road after a stall. Mr. Altman insisted that "the [Cobalt] was maneuverable and controllable" with the power steering and power brakes inoperable.

226. On February 28, 2005, Old GM issued a bulletin to its dealers regarding engine-stalling incidents in 2005 Cobalts and 2005 Pontiac Pursuits (the Canadian version of the Pontiac G5).

227. In the February 28, 2005 bulletin, Old GM provided the following recommendations and instructions to its dealers—but not to the public in general:

> There is potential for the driver to inadvertently turn off the ignition due to low key ignition cylinder torque/effort. The concern is more likely to occur if the driver is short and has a large heavy key chain.
>
> In the case this condition was documented, the driver's knee would contact the key chain while the vehicle was turning. The steering column was adjusted all the way down. This is more likely to happen to a person that is short as they will have the seat positioned closer to the steering column.
>
> In cases that fit this profile, question the customer thoroughly to determine if this may be the cause. The customer should be advised of this potential and to take steps, such as removing unessential items from their key chains, to prevent it.
>
> Please follow this diagnosis process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

228. On June 19, 2005, the NEW YORK TIMES reported that Chevrolet dealers were advising some Cobalt owners to remove items from heavy key rings so that they would not inadvertently move the ignition into the "off" position. The article's author reported that his wife had bumped the steering column with her knee while driving on the freeway and the engine "just went dead."

229. The NEW YORK TIMES contacted Old GM and Alan Adler, manager for safety communications, provided the following statement:

> In rare cases when a combination of factors is present, a Chevrolet Cobalt driver can cut power to the engine by inadvertently bumping the ignition key to the accessory or off position while the

> car is running. Service advisers are telling customers they can virtually eliminate the possibility by taking several steps, including removing nonessential material from their key rings.

230. Between February 2005 and December 2005, Old GM opened multiple Problem Resolution inquiries regarding reports of power failure and/or engine shutdown in Defective Ignition Switch Vehicles.

231. One of these, opened by quality brand manager Steve Oakley in March 2005, was prompted by Old GM engineer Jack Weber, who reported turning off a Cobalt with his knee while driving. After Oakley opened the PRTS, Gary Altman advised that the inadvertent shut down was not a safety issue.

232. As part of Problem Resolution, Oakley asked William Chase, an Old GM warranty engineer, to estimate the warranty impact of the ignition switch defect in the Cobalt and Pontiac G5 vehicles. Chase estimated that for Cobalt and G5 vehicles on the road for 26 months, 12.40 out of every 1,000 vehicles would experience inadvertent power failure while driving.

233. In September 2005, Old GM received notice that Amber Marie Rose, a 16 year old resident of Clinton, Maryland, was killed in an accident after her 2005 Chevrolet Cobalt drove off the road and struck a tree head-on. During Old GM's investigation, it learned that the ignition switch in Amber's Cobalt was in the "accessory" or "off" position at the time of the collision. Upon information and belief, Old GM subsequently entered into a confidential settlement agreement with Amber's mother.

234. In December 2005, Old GM issued Technical Service Bulletin 05-02-35-007. The Bulletin applied to 2005-2006 Chevrolet Cobalts, 2006 Chevrolet HHRs, 2005-2006 Pontiac Pursuits, 2006 Pontiac Solstices, and 2003-2006 Saturn Ions. The Bulletin explained that "[t]here is potential for the driver to inadvertently turn off the ignition due to low ignition key cylinder torque/effort."

235. What Old GM failed to say in this Technical Service Bulletin was that it knew that there had been fatal incidents involving vehicles with the ignition switch defect. On November 17, 2005—shortly after Amber's death and immediately before Old GM issued the December Bulletin—a Cobalt went off the road and hit a tree in Baldwin, Louisiana. The front airbags did not deploy in this accident. Old GM received notice of the accident, opened a file, and referred to it as the "Colbert" incident.

236. On February 10, 2006, in Lanexa, Virginia—shortly after Old GM issued the Technical Service Bulletin—a 2005 Cobalt flew off of the road and hit a light pole. As with the Colbert incident (above), the frontal airbags failed to deploy in this incident as well. The download of the SDM (the vehicle's "black box") showed the key was in the "accessory/off" position at the time of the crash. Old GM received notice of this accident, opened a file, and referred to it as the "Carroll" incident.

237. On March 14, 2006, in Frederick, Maryland, a 2005 Cobalt traveled off the road and struck a utility pole. The frontal airbags did not deploy in this incident. The download of the SDM showed the key was in the "accessory/off" position at the time of the crash. Old GM received notice of this incident, opened a file, and referred to it as the "Oakley" incident.

238. In April 2006, Old GM design engineer Ray DeGiorgio approved a design change for the Chevrolet Cobalt's ignition switch, as proposed by Delphi. The changes included a new detent plunger and spring and were intended to generate greater torque values in the ignition switch. These values, though improved, were still consistently below Old GM's design specifications. Despite its redesign of the ignition switch, Old GM did not change the part number for the switch.

239. In congressional testimony in 2014, New GM CEO Mary Barra acknowledged that Old GM should have changed the part number when it redesigned the ignition switch, and that its failure to do so did not meet industry standard behavior. (Old GM's failure to change the part number constituted an act of concealment of the defect.)

240. In October 2006, Old GM updated Technical Service Bulletin 05-02-35-007 to include additional model years: the 2007 Saturn Ion and Sky, 2007 Chevrolet HHR, 2007 Cobalt, and 2007 Pontiac Solstice and G5. These vehicles had the same safety-related defects in the ignition switch systems as the vehicles in the original Bulletin.

241. On December 29, 2006, in Sellenville, Pennsylvania, a 2005 Cobalt drove off the road and hit a tree. The frontal airbags failed to deploy in this incident. Old GM received notice of this incident, opened a file, and referred to it as the "Frei" incident.

242. On February 6, 2007, in Shaker Township, Pennsylvania, a 2006 Cobalt sailed off the road and struck a truck. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. Old GM received notice of this incident, opened a file, and referred to it as the "White" incident.

243. On August 6, 2007, in Cross Lanes, West Virginia, a 2006 Cobalt rear-ended a truck. The frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "McCormick" incident.

244. On September 25, 2007, in New Orleans, Louisiana, a 2007 Cobalt lost control and struck a guardrail. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "Gathe" incident.

245. On October 16, 2007, in Lyndhurst, Ohio, a 2005 Cobalt traveled off road and hit a tree. The frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "Breen" incident.

246. On April 5, 2008, in Sommerville, Tennessee, a 2006 Cobalt traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. Old GM received notice of this incident, opened a file, and referred to it as the "Freeman" incident.

247. On May 21, 2008, in Argyle, Wisconsin, a 2007 G5 traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. Old GM received notice of this incident, opened a file, and referred to it as the "Wild" incident.

248. On May 28, 2008, in Lufkin, Texas, a 2007 Cobalt traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "McDonald" incident.

249. On September 13, 2008, in Lincoln Township, Michigan, a 2006 Cobalt traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "Harding" incident.

250. On November 29, 2008, in Rolling Hills Estates, California, a 2008 Cobalt traveled off the road and hit a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. Old GM received notice of this incident, opened a file, and referred to it as the "Dunn" incident.

251. On December 6, 2008, in Lake Placid, Florida, a 2007 Cobalt traveled off the road and hit a utility pole. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. Old GM received notice of this incident, opened a file, and referred to it as the "Grondona" incident.

252. In February 2009, Old GM opened another Problem Resolution regarding the ignition switches in the Defective Ignition Switch Vehicles. Old GM engineers decided at this time to change the top of the Chevrolet Cobalt key from a "slot" to a "hole" design, as had originally been suggested in 2005. The new key design was produced for the 2010 model year. Old GM did not provide these redesigned keys to the owners or lessees of any of the vehicles implicated in prior Technical Service Bulletins, including the 2005-2007 Cobalts.

253. Just prior to its bankruptcy sale, Old GM met with Continental Automotive Systems US, its airbag supplier for the Cobalt, Ion, and other Defective Ignition Switch Vehicles. Old GM requested that Continental download SDM data from a 2006 Chevrolet Cobalt accident where the airbags failed to deploy. In a report dated May 11, 2009, Continental analyzed the SDM data and concluded that the SDM ignition state changed from "run" to "off" during the accident. According to Continental, this, in turn, disabled the airbags. Old GM did not disclose this finding to NHTSA, despite its knowledge that NHTSA was interested in airbag non-deployment incidents in Chevrolet Cobalt vehicles.

2. New GM continues to conceal the ignition switch defect.

254. In March 2010, New GM recalled nearly 1.1 million Cobalt and Pontiac G5 vehicles for faulty power steering issues. In recalling these vehicles, New GM recognized that loss of power steering, standing alone, was grounds for a safety recall. Yet, incredibly, New GM claims it did not view the ignition switch defect as a "safety issue," but only a "customer

convenience issue." Despite its knowledge of the ignition switch defect, New GM did not include the ignition switch defect in this recall. Further, although the Saturn Ion used the same steering system as the Cobalt and Pontiac G5 (and had the same ignition switch defect), New GM did not recall any Saturn Ion vehicles at this time.

255. On March 10, 2010, Brooke Melton was driving her 2005 Cobalt on a two-lane highway in Paulding County, Georgia. While she was driving, her key turned from the "run" to the "accessory/off" position causing her engine to shut off. After her engine shut off, she lost control of her Cobalt, which traveled into an oncoming traffic lane, where it collided with an oncoming car. Brooke was killed in the crash. New GM received notice of this incident.

256. On December 31, 2010, in Rutherford County Tennessee, a 2006 Cobalt traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. New GM received notice of this incident, opened a file, and referred to it as the "Chansuthus" incident.

257. On December 31, 2010, in Harlingen, Texas, a 2006 Cobalt traveled off the road and struck a curb. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. New GM received notice of this incident, opened a file, and referred to it as the "Najera" incident.

258. On March 22, 2011, Ryan Jahr, a New GM engineer, downloaded the SDM from Brooke Melton's Cobalt. The information from the SDM download showed that the key in Brooke's Cobalt turned from the "run" to the "accessory/off" position 3-4 seconds before the crash. On June 24, 2011, Brooke Melton's parents, Ken and Beth Melton, filed a lawsuit against New GM.

259. In August 2011, New GM assigned Engineering Group Manager Brian Stouffer to assist with a Field Performance Evaluation that it had opened to investigate frontal airbag non-deployment incidents in Chevrolet Cobalts and Pontiac G5s.

260. On December 18, 2011, in Parksville, South Carolina, a 2007 Cobalt traveled off the road and struck a tree. Despite there being a frontal impact in this incident, the frontal airbags failed to deploy. The download of the SDM showed the key was in the "accessory/off" position. New GM received notice of this incident, opened a file, and referred to it as the "Sullivan" incident.

261. In early 2012, Mr. Stouffer asked Jim Federico, who reported directly to Mary Barra, to oversee the Field Performance Evaluation investigation into frontal airbag non-deployment incidents. Federico was named the "executive champion" for the investigation to help coordinate resources.

262. In May 2012, New GM engineers tested the torque on numerous ignition switches of 2005-2009 Chevrolet Cobalt, 2009 Pontiac G5, 2006-2009 HHR, and 2003-2007 Saturn Ion vehicles that were parked in a junkyard. The results of these tests showed that the torque required to turn the ignition switches from the "run" to the "accessory" or "off" position in most of these vehicles did not meet GM's minimum torque specification requirements. These results were reported to Mr. Stouffer and other members of the Field Performance Evaluation team.

263. In September 2012, Stouffer requested assistance from a "Red X Team" as part of the Field Performance Evaluation investigation. The Red X Team was a group of engineers within New GM assigned to find the root cause of the airbag non-deployments in frontal accidents involving Chevrolet Cobalts and Pontiac G5s. By that time, however, it was clear that

the root cause of the airbag non-deployments in a majority of the frontal accidents was the defective ignition switch and airbag system.

264. Indeed, Mr. Stouffer acknowledged in his request for assistance that the Chevrolet Cobalt could experience a power failure during an off-road event, or if the driver's knee contacted the key and turned off the ignition. Mr. Stouffer further acknowledged that such a loss of power could cause the airbags not to deploy.

265. At this time, New GM did not provide this information to NHTSA or the public.

266. Acting NHTSA Administrator David Friedman recently stated, "at least by 2012, GM staff was very explicit about an unreasonable risk to safety" from the ignition switches in the Defective Ignition Switch Vehicles.

267. Mr. Friedman continued: "GM engineers knew about the defect. GM lawyers knew about the defect. But GM did not act to protect Americans from the defect."

268. There is significant evidence that multiple in-house attorneys also knew of and understood the ignition switch defect. These attorneys, including Michael Milliken, negotiated settlement agreements with families whose loved ones had been killed and/or injured while operating a Defective Ignition Switch Vehicle. In spite of this knowledge, New GM's attorneys concealed their knowledge and neglected to question whether the Defective Ignition Switch Vehicles should be recalled. This quest to keep the ignition switch defect secret delayed its public disclosure and contributed to increased death and injury as a result of the ignition switch defect.

269. During the Field Performance Evaluation process, New GM determined that, although increasing the detent in the ignition switch would reduce the chance that the key would

inadvertently move from the "run" to the "accessory" or "off" position, it would not be a total solution to the problem.

270. Indeed, the New GM engineers identified several additional ways to actually fix the problem. These ideas included adding a shroud to prevent a driver's knee from contacting the key, modifying the key and lock cylinder to orient the key in an upward facing orientation when in the run position, and adding a push button to the lock cylinder to prevent it from slipping out of "run." New GM rejected each of these ideas.

271. The photographs below are of a New GM engineer in the driver's seat of a Cobalt during the investigation of Cobalt engine stalling incidents:

272. These photographs show the dangerous position of the key in the lock module on the steering column, as well as the key with the slot, which allow the key fob to hang too low off the steering column. New GM engineers understood that the key fob can be impacted and pinched between the driver's knee and the steering column, and that this will cause the key to inadvertently turn from the "run" to the "accessory" or "off" position. The photographs show that the New GM engineers understood that increasing the detent in the ignition switch would

not be a total solution to the problem. They also show why New GM engineers believed that additional changes (such as the shroud) were necessary to fix the defects with the ignition switch.

273. The New GM engineers clearly understood that increasing the detent in the ignition switch alone was not a solution to the problem. But New GM concealed—and continues to conceal—from the public the full nature and extent of the defects.

274. On October 4, 2012, there was a meeting of the Red X Team during which Mr. Federico gave an update of the Cobalt airbag non-deployment investigation. According to an email from Mr. Stouffer on the same date, the "primary discussion was on what it would take to keep the SDM active if the ignition key was turned to the accessory mode." Despite this recognition by New GM engineers that the SDM should remain active if the key is turned to the "accessory" or "off" position, New GM took no action to remedy the ignition switch defect or notify customers that the defect existed.

275. During the October 4, 2012 meeting, Mr. Stouffer and other members of the Red X Team also discussed "revising the ignition switch to increase the effort to turn the key from Run to Accessory."

276. On October 4, 2012, Mr. Stouffer emailed Ray DeGiorgio and asked him to "develop a high level proposal on what it would take to create a new switch for service with higher efforts." On October 5, 2012, DeGiorgio responded:

> Brian,
>
> In order to provide you with a HIGH level proposal, I need to understand what my requirements are. what is the TORQUE that you desire?
>
> Without this information I cannot develop a proposal.

277. On October 5, Stouffer responded to DeGiorgio's email, stating:

> Ray,

> As I said in my original statement, I currently don't know what the torque value needs to be. Significant work is required to determine the torque. What is requested is a high level understanding of what it would take to create a new switch.

278. DeGiorgio replied to Stouffer the following morning:

> Brian,
>
> Not knowing what my requirements are I will take a SWAG at the Torque required for a new switch. Here is my level proposal
>
> **Assumption is 100 N cm Torque.**
>
> • New switch design = Engineering Cost Estimate approx. $300,000
>
> • Lead Time = 18 – 24 months from issuance of GM Purchase Order and supplier selection.
>
> Let me know if you have any additional questions.

279. Stouffer later admitted in a deposition that DeGiorgio's reference to "SWAG" was an acronym for "Silly Wild-Ass Guess."

280. DeGiorgio's cavalier attitude exemplifies New GM's approach to the safety-related defects that existed in the ignition switch and airbag system in the Defective Ignition Switch Vehicles. Rather than seriously addressing the safety-related defects, DeGiorgio's emails show he understood the ignition switches were contributing to the crashes and fatalities and he could not care less.

281. It is also obvious from this email exchange that Stouffer, who was a leader of the Red X Team, had no problem with DeGiorgio's cavalier and condescending response to the request that he evaluate the redesign of the ignition switches.

282. In December 2012, in Pensacola, Florida, Ebram Handy, a New GM engineer, participated in an inspection of components from Brooke Melton's Cobalt, including the ignition switch. At that inspection, Handy, along with Mark Hood, a mechanical engineer retained by the

Meltons, conducted testing on the ignition switch from Brooke Melton's vehicle, as well as a replacement ignition switch for the 2005 Cobalt.

283. At that inspection, Handy observed that the results of the testing showed that the torque performance on the ignition switch from Brooke Melton's Cobalt was well below Old GM's minimum torque performance specifications. Handy also observed that the torque performance on the replacement ignition switch was significantly higher than the torque performance on the ignition switch in Brooke Melton's Cobalt.

284. On April 29, 2013, Ray DeGiorgio, the chief design engineer for the ignition switches in these Defective Ignition Switch Vehicles, was deposed. At his deposition, Mr. DeGiorgio was questioned about his knowledge of differences in the ignition switches in early model-year Cobalts and the switches installed in later model-year Cobalts:

> Q. And I'll ask the same question. You were not aware before today that GM had changed the spring – the spring on the ignition switch had been changed from '05 to the replacement switch?
>
> MR. HOLLADAY: Object to the form. Lack of predicate and foundation. You can answer.
>
> THE WITNESS: I was not aware of a detent plunger switch change. We certainly did not approve a detent plunger design change.
>
> Q. Well, suppliers aren't supposed to make changes such as this without GM's approval, correct?
>
> A. That is correct.
>
> Q. And you are saying that no one at GM, as far as you know, was aware of this before today?
>
> MR. HOLLADAY: Object. Lack of predicate and foundation. You can answer.
>
> THE WITNESS: I am not aware about this change.

285. When Mr. DeGiorgio testified, he knew that he personally had authorized the ignition switch design change in 2006, but he stated unequivocally that no such change had occurred.

3. New GM receives complaints of power failures in Defective Ignition Switch Vehicles.

286. Throughout the entirety of its corporate existence, New GM received numerous and repeated complaints of moving engine stalls and/or power failures. These complaints are yet more evidence that New GM was fully aware of the ignition switch defect and should have timely announced a recall much sooner than it did.

287. New GM was aware of these problems year after year and nationwide, as reflected not only by the internal documents reflecting knowledge and cover-up at high levels, but in the thousands of customer complaints, some of which are reflected in the common fact patterns presented by the experiences of the named plaintiffs (as discussed above), but also, and not by way of limitation, by the records of their internal complaint logs and documents.

288. To demonstrate the pervasiveness and consistency of the problems, and by way of examples, New GM received and reviewed complaints of safety issues from Class members with Defective Ignition Switch Vehicles in Puerto Rico and in the States of Alaska, Arkansas, Connecticut, Delaware, Hawaii, Indiana, Kansas, Massachusetts, Montana, Nebraska, Nevada, New Hampshire, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Virginia, and Vermont. Documents produced by New GM pursuant to Order No. 12 (Sept. 10, 2014, ECF No. 296) show that New GM was aware of customer complaints of stalling Defective Ignition Switch Vehicles in all of these states and territories. New GM opened at least 38 complaint files between September 2009 and February 2014. Further, in December 2010, GM closed at least 40 complaint files—which Old GM had opened before the bankruptcy sale in July 2009—without

disclosing the safety defect to the customers, thus indicating that Old GM's knowledge of these Defective Ignition Switch Vehicles carried over to New GM.

289. During the years 2010 to the present, GM's Technical Assistance Center received hundreds, if not thousands, of complaints concerning stalling or misperforming vehicles due to ignition issues, including "heavy key chains."

290. Within the complaint files which GM closed after the bankruptcy sale—those opened both before and after the bankruptcy sale—at least six customers complained they did not feel safe in their vehicles because of the stalling. Three customers described accidents caused by stalling. The airbags did not deploy in one of these accidents.

291. Another customer, who contacted New GM in February 2014, complained that he was aware that people were dying from this defect and that he refused to risk the lives of himself, his wife, and his children. He was nearly rear-ended when his vehicle stalled at 60 mph.

292. Finally, a customer contacted New GM in January 2011 complaining that he had read various online forums describing the stalling problem and expressing his outrage that New GM had done nothing to solve the problem. This customer's car stalled at 65 mph on the Interstate.

4. New GM recalls 2.1 million vehicles with defective ignition switches.

293. Under continuing pressure to produce high-ranking employees for deposition in the Melton litigation, New GM's Field Performance Review Committee and Executive Field Action Decision Committee ("Decision Committee") finally ordered a recall of ***some*** vehicles with defective ignition switches on January 31, 2014.

294. Initially, the Decision Committee ordered a recall of only the Chevrolet Cobalt and Pontiac G5 for model years 2005-2007.

295. After additional analysis, the Decision Committee expanded the recall on February 24, 2014 to include the Chevrolet HHR and Pontiac Solstice for model years 2006 and 2007, the Saturn Ion for model years 2003-2007, and the Saturn Sky for model year 2007.

296. Public criticism in the wake of these recalls was withering. On March 17, 2014, Mary Barra issued an internal video, which was broadcast to employees. In the video, Ms. Barra admits:

> Scrutiny of the recall has expanded beyond the review by the federal regulators at NHTSA, the National Highway Traffic Safety Administration. As of now, two congressional committees have announced that they will examine the issue. And it's been reported that the Department of Justice is looking into this matter. . . . These are serious developments that shouldn't surprise anyone. After all, something went wrong with our process in this instance and terrible things happened.

297. The public backlash continued and intensified. Eventually, GM expanded the ignition switch recall yet again on March 28, 2014. This expansion covered all model years of the Chevrolet Cobalt and HHR, the Pontiac G5 and Solstice, and the Saturn Ion and Sky. The expanded recall brought the total number of vehicles recalled for defective ignition switches to 2,191,146.

298. Several high-ranking New GM employees were summoned to testify before Congress, including Ms. Barra and executive vice president and in-house counsel Michael Milliken. Further, in an effort to counter the negative backlash, New GM announced that it had hired Anton R. Valukas to conduct an internal investigation into the decade-long concealment of the ignition switch defect.

299. As individuals came forward who had been injured and/or whose loved ones were killed in the Defective Ignition Switch Vehicles, the public criticism continued. Under intense, continuing pressure, New GM agreed in April 2014 to hire Ken Feinberg to design and

administer a claims program in order to compensate certain victims who were injured or killed in the Defective Ignition Switch Vehicles. Ms. Barra explained to Congress: "[W]e will make the best decisions for our customers, recognizing that we have legal obligations and responsibilities as well as moral obligations. We are committed to our customers, and we are going to work very hard to do the right thing for our customers."

300. New GM's compensation of such individuals, however, was limited to the protocol set forth in the Feinberg Compensation Fund. In the courts, New GM has taken the position that any accident that occurred prior to its bankruptcy is barred by the bankruptcy sale order. In addition, New GM has argued that it has no responsibility whatsoever for the manufacture and sale of any vehicle prior to July 10, 2009. This position is obviously inconsistent with the statements Ms. Barra provided to Congress and the public at large.

5. New GM recalls over 10 million additional vehicles for ignition switch defects in June and July of 2014.

301. By actively concealing the ignition switch defects in the Defective Ignition Switch Vehicles, and by continuing to manufacture and sell millions of such vehicles for years after it acquired knowledge of the defects, New GM engaged in unlawful and fraudulent practices in violation of the law.

302. Following the waves of negative publicity surrounding New GM's recall of the first 2.1 million Defective Ignition Switch Vehicles, New GM was forced to issue a series of additional recalls for more than 10 million additional Defective Ignition Switch Vehicles, as summarized below.

303. Even so, safety regulators received dozens of complaints of moving stalls and/or power failures in the vehicles covered by New GM's June and July 2014 recalls; New GM still did nothing.

304. NHTSA's website contains more than 100 complaints about vehicle stalls for the 2006-2009 Impalas alone. In one 2012 complaint, an Impala stalled in the middle of a large intersection. The owner took it to a dealer four times but could not get it repaired. The complainant stated, "I'm fearful I will be the one causing a fatal pile-up."

305. New GM admits knowing that ignition switch defects have been linked to at least three deaths and eight injuries in the vehicle model years covered by its June and July recalls. The fatal accidents occurred in 2003 and 2004 Chevrolet Impalas in which the airbags failed to deploy.

a. June 19, 2014 Recall—Camaro Recall

306. On June 19, 2014, New GM recalled 464,712 model year 2010 through 2014 Chevrolet Camaro vehicles in the United States (NHTSA Recall Number 14V-346).

307. The great majority of the defective Camaros were sold by New GM, though some indeterminate number of the 117,959 model year 2010 Camaros were manufactured by Old GM, and some smaller number were sold by Old GM.

308. According to the recall notice, the driver of an affected Camaro may accidentally hit the ignition key with his or her knee, unintentionally knocking the key out of the "run" position and turning off the engine. If the key is not in the "run" position, the airbags may not deploy during a collision. Additionally, when the key is moved out of the "run" position, the vehicle will experience a loss of engine power, loss of power steering, and loss of power brakes.

309. Between 2010 and 2014, NHTSA received numerous complaints of power failures in 2010-2014 Camaros. These complaints started as early as January 2010, months after New GM's formation.

310. One complainant described an incident in which his model year 2010 Camaro lost all power while he was driving 55-65 mph down a mountain road in heavy traffic. The

complainant was able to stop the vehicle by jamming it into a guardrail. He stated that he was lucky he was not killed. When he notified his dealership, however, they told him there was nothing wrong with the vehicle.

311. Another complainant, in May 2010, described several instances in which his moving Camaro's power failed, including one instance in which he was driving on the highway at 70 mph. This complainant concluded his report by asking, "Will I have a head[-]on collision while trying to pass another car?"

312. Between 2010 and 2014, NHTSA received numerous complaints reporting engine stalls during normal and regular Camaro operations.

313. For example, on May 3, 2010, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> WHILE DRIVING TO THE DEALERSHIP IN BROOKDALE, MN. ON FREEWAY APPROX 70MPH WHEN CAR COMPLETELY GOES DEAD. QUICKLY I PUT IT IN NEUTRAL AND TURNED IT BACK ON AND COMPLAINED TO DEALER. DRIVING IN ST CLOUD,MN AT INTOWN SPEEDS WHEN THE CAR SHUTS DOWN AGAIN. THEN IT ALSO SHUT DOWN TWICE ON ME IN BRAINERD, MN AT A SPEED OF 50MPH WHILE DRIVING NORMAL. THEN ON 3 MAY 2010 I WAS GOING AROUND A CURVE WITH 2 FRIENDS WHEN IT AGAIN SHUT DOWN AT APPROXIMATELY 60 MPH. THIS TIME WHILE ON THE CURVE I WENT INTO THE DITCH AND HIT A MAIL BOX. THUS CAUSING DAMAGE TO THE RIGHT FRONT OF THE CAR. THE CAR WAS TOWED AND IS PRESENTLY AT THE DEALERSHIP IN BRAINERD, MN. THIS CAR IS TO DANGEROUS TO DRIVE; WILL I HAVE A HEAD[-]ON COLLISION WHILE TRYING TO PASS ANOTHER CAR?

314. On October 20, 2010, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> 2010 CHEVROLET CHEVY CAMARO V6, SUDDEN LOSS OF POWER, COMPLETE ELECTRICAL FAILURE, AND ENGINE SHUTDOWN WHILE DRIVING 30 MPH IN SUBDIVISION.

> PULLED TO SIDE OF ROAD. TURNED CAR "OFF" AND BACK ON. DROVE TO DEALER WHO SAID THEY COULD FIND NO PROBLEM AND NOTHING RECORDED IN CAR'S COMPUTER. GOOGLED RECALL OF V8 TO SHOW DEALER, BUT DEALER SAID THIS WAS UNRELATED.

315. On March 6, 2012, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> WHILE DRIVING VEHICLE FIRST SHUT OFF AT A RED LIGHT FOR NO REASON ON FEB 28 2012 SAME INCIDENT ON MARCH 1ST SHUT OFF A RED LIGHT THIRD TIME IT WAS WHILE DRIVING 10 MPH MAKING A TURN IN A PARKING SPOT. WAS ABLE TO TURN BACK CAR ON WITH NO PROBLEMS BUT IT IS OF GREAT CONCERN NOW IF THIS SHOULD HAPPEN AT A HIGH SPEED I AM SURE CAR CAN CAUSE INJURIES TO OTHERS AS WELL AS MYSELF.

316. On October 9, 2012, New GM became aware of a complaint filed with NHTSA involving a 2012 Camaro in which the following was reported:

> THE CONTACT OWNS A 2012 CHEVROLET CAMARO. THE CONTACT STATED THAT WHILE DRIVING 50 MPH, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT WAS ABLE TO RESTART THE VEHICLE. THE MANUFACTURER WAS CONTACTED AND HAD THE VEHICLE TOWED TO A LOCAL DEALER. THE DEALER RESET THE COMPUTER BUT THE REPAIR DID NOT REMEDY THE ISSUE. THE CONTACT TOOK THE VEHICLE BACK TO THE DEALER WHERE THE DEALER RESET THE COMPUTER A SECOND TIME. THE DEALER ALSO DROVE THE VEHICLE FOR ONE HUNDRED MILES AND COULD NOT DUPLICATE THE STALLING ISSUE. THE VEHICLE CONTINUED TO STALL SPORADICALLY. THE FAILURE MILEAGE WAS 4,200.

317. On July 3, 2013, New GM became aware of a complaint filed with NHTSA involving a 2013 Camaro in which the following was reported:

> THE CONTACT OWNS A 2013 CHEVROLET CAMARO. THE CONTACT STATED THAT WHILE DRIVING APPROXIMATELY 55 MPH, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT MENTIONED THAT

> THE FAILURE WOULD RECUR INTERMITTENTLY. THE VEHICLE WAS TAKEN TO A DEALER FOR A DIAGNOSTIC WHERE THE FAILURE WAS UNABLE TO BE REPLICATED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 1,460 AND THE CURRENT MILEAGE WAS 1,800.

318. On August 4, 2013, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> I PURCHASED MY 2010 CHEVY CAMARO 2SS, IN FEBRUARY OF 2012. IT HAD 4,400 MILES ON IT. ABOUT A MONTH OR TWO, AFTER I BOUGHT IT, IT COMPLETELY SHUT OFF ON ME, ON A MAJOR HIGHWAY, WHILE DOING 65 MPH. I THREW IT INTO NEUTRAL AND TURNED THE KEY AND IT STARTED RIGHT BACK UP. ABOUT A MONTH AFTER THAT, I WAS DOING ABOUT 20MPH ON A BACK ROAD AND IT DID THE SAME EXACT THING. JUST RECENTLY, ABOUT 2 WEEKS AGO, I WAS IN 6TH GEAR, ON CRUISE DOING 60MPH AND I FELT THE CAR "JERK" OR BUCK" A LITTLE BIT. FOLLOWED IMMEDIATELY BY THE CAR DECELERATING. I DOWN-SHIFTED TO 4TH GEAR AND WAS GIVING IT GAS, BUT STILL WOULDN'T SPEED UP. IT FELL DOWN TO ABOUT 40MPH, BEFORE FINALLY CATCHING ITSELF AND SPEEDING BACK UP. ABOUT A MILE LATER, I GOT OFF MY EXIT AND WAS COMING DOWN TO THE STOP SIGN,WHEN ALL THE INDICATOR LIGHTS CAME ON FOR ABOUT 10 SECONDS. THEY WENT OFF AND I MADE A LEFT HAND TURN AND WENT ABOUT A MILE UP THE ROAD. AT THAT POINT, THE CAR COMPLETELY SHUT OFF DOING ABOUT 35MPH. THERE WAS HEAVY TRAFFIC, SO I PULLED OVER AND STARTED IT BACK UP. I CALLED THE CHEVY DEALERSHIP, WHERE I BOUGHT IT FROM, AND THEY HAD NO OPENINGS FOR A WEEK. SO I TOOK IT LAST WEEK TO GET IT CHECKED AND THEY FOUND NOTHING THAT COULD HAVE CAUSED IT, THEY SAY. I AM VERY UPSET, BUT VERY THANKFUL THAT MY TWO CHILDREN WERE NOT WITH ME WHEN IT HAPPENED. I AM CURRENTLY CONTEMPLATING TRADING IT IN, CUZ I AM WORRIED THAT IF IT HAPPENS AGAIN,AND MY CHILDREN ARE IN THE CAR, THAT IT MIGHT SHUT OFF IN VERY CONGESTED BUMPER TO BUMPER TRAFFIC, ON THE HIGHWAY AT NIGHT, AND A TRACTOR TRAILER IS BEHIND ME AND I CAN'T GET IT STARTED OR SOMEONE

> DOESN'T SEE ME CUZ MY LIGHTS WOULD BE OFF. THE THOUGHT OF THAT COMPLETELY SCARES ME.

319. On September 28, 2013, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> THE CONTACT OWNS A 2010 CHEVROLET CAMARO. THE CONTACT STATED THAT WHILE DRIVING 5 MPH AND MAKING A TURN, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT WAS ABLE TO RESTART THE VEHICLE BUT THE FAILURE RECURRED. THE VEHICLE WAS TAKEN TO A DEALER WHO PERFORMED A DIAGNOSTIC AND REPLACED A COMPONENT TO CORRECT THE FAILURE. THE CONTACT WAS UNABLE TO DETERMINE THE EXACT COMPONENT HOWEVER, THE FAILURE RECURRED WITHOUT WARNING. THE VEHICLE WAS TAKEN TO DEALER HOWEVER, NO FAILURE WAS DETERMINED. THE MANUFACTURER WAS MADE AWARE OF THE ISSUE AND AN INCIDENT RECORDER WAS INSTALLED ON THE VEHICLE TO DETERMINE ANY FUTURE FAILURES. THE FAILURE MILEAGE WAS 23,000. THE CURRENT MILEAGE WAS 24,000.

320. On October 2, 2013, New GM became aware of a complaint filed with NHTSA involving a 2010 Camaro in which the following was reported:

> I REACHED OUT TO [XXX], GM CEO ON MAY 24, 2013 WITH A STRONG CONCERNS OF POWER FAILURE FOR THE 2ND TIME WHILE DRIVING THE VEHICLE; CAUSING ME NOT TO HAVE CONTROL WHILE THE VEHICLE WAS DRIVEN. THUS IT WAS ALSO NOTED THAT I ORIGINALLY REACHED OUT TO GM TO REQUEST A REPLACED VEHICLE WHILE MY VEHICLE WAS UNDER WARRANTY DUE TO THE VEHICLE LOSING POWER ON A MAJOR FREEWAY; WHICH WAS LIFE THREATENING; HOWEVER THE RESPONSE BACK FROM GM WAS A DECLINED LETTER THAT I RECEIVED ENSURING ME THAT THE VEHICLE WAS SAFE TO DRIVE. I TRAVEL MAJOR FREEWAYS AS PART OF CAREER SO HAVING A RELIABLE VEHICLE IS IMPERATIVE AS FOR I VALUE MY LIFE. [XXX], SENIOR VICE PRESIDENT OF GLOBAL QUALITY & CUSTOMER EXPERIENCE HAS NOT RETURNED MY CALLS AND NOW GM IS ALSO NOT HONORING THE WARRANTY TOO. AFTER ASSISTING ME

> WITH MY CAR FOR 5 MONTHS .PLEASE NOT MY 2010 CAMARO SS IS PARK AS FOR IT'S NOT SAFE TO DRIVE. GM OFFER ME A CONTRACT TO SIGN THAT WOULD GUARANTEE "NO FAULT TO GM ". I COULDN'T NOT DUE THEM SHOULD MY CAMARO HARM MYSELF OR OTHERS WHILE DRIVING IT. ADDITIONALLY, I WAS TOLD THAT GM KNOWS THERE IS A PROBLEM WITH THE CAMARO BUT CAN'T FIND THE PROBLEM. IT'S HAS BEEN NOTED THAT THE CORRECTIONS THAT I NEED TO HAVE MADE IN ORDER TO BE SAFE IN THE GM VEHICLE CANNOT BE OBTAINED AS FOR MY VEHICLE HAS BEEN KEEP CHEVY FOR SHOP 5 MONTHS. ….

321. On October 16, 2013, New GM became aware of a complaint filed with NHTSA concerning a 2013 Camaro, in which the following was reported:

> THE CONTACT OWNS A 2013 CHEVROLET CAMARO. THE CONTACT STATED THAT WHILE MAKING A U-TURN, THE VEHICLE STALLED WITHOUT WARNING. THE VEHICLE WAS NOT TAKEN TO A DEALER FOR DIAGNOSIS OF THE FAILURE. THE MANUFACTURER WAS NOT NOTIFIED OF THE FAILURE. THE VEHICLE WAS NOT REPAIRED. THE APPROXIMATE FAILURE AND CURRENT MILEAGE WAS 830.

322. On April 20, 2014, New GM became aware of a complaint filed with NHTSA concerning a 2014 Camaro, in which the following was reported:

> AS I WAS TURNING THE CORNER ON TO WOODWARD AVENUE MY CAR JUST SHUT DOWN. THE CAR WENT TOTALLY BLACK AND SHUT DOWN IN THE MIDDLE OF THE TURN ON THIS VERY BUSY-MAIN THOROUGHFARE.

323. On April 30, 2014, New GM became aware of a complaint filed with NHTSA concerning a 2014 Camaro, in which the following was reported:

> WITHIN TWO WEEKS AFTER PURCHASING MY CAR IT STALLED TWICE--BOTH WHEN STOPPED AT RED LIGHTS. I TOOK CAR TO DEALERSHIP AND THEY DID A ROAD TEST BUT COULD NOT REPLICATE. ON 4/9/2014 I WAS MAKING A RIGHT HAND TURN AND THE CAR STALLED IN THE MIDDLE OF THE INTERSECTION. I RESTARTED THE CAR, DROVE TO MY OFFICE AND THE CAR STALLED WHEN TURNING INTO THE PARKING GARAGE AND

AGAIN WHEN TURNING INTO THE PARKING SPACE. TOOK TO THE DEALERSHIP THE FOLLOWING DAY AND THEY KEPT FOR AN EXTENDED TEST DRIVE BUT COULD NOT REPLICATE THE PROBLEM. SINCE THERE WERE NOT ANY CODES THE CAR WAS RETURNED TO ME.

324. On May 6, 2014, New GM became aware of a complaint filed with NHTSA concerning a 2014 Camaro, in which the following was reported:

DRIVING ON CRUISE CONTROL. KNEE BUMPED KEY, ENGINE TURNED OFF AT 60 MPH. POWER STEERING AND BRAKES STILL WORKED, BUT ENGINE WAS OFF.

325. On May 9, 2014, New GM became aware of a complaint filed with NHTSA involving a 2013 Camaro, in which the following was reported:

THE CONTACT INDICATED WHILE TRAVELING 60 MPH ON A MAJOR HIGHWAY, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT WAS ABLE TO MOVE THE VEHICLE OVER TO THE SHOULDER AND AFTER SEVERAL ATTEMPTS THE VEHICLE WAS ABLE TO RESTART. THE VEHICLE WAS TO BE FURTHER INSPECTED, DIAGNOSED AND REPAIRED BY AN AUTHORIZED DEALER BUT IT WAS NOT REPAIRED. THE CONTACT WAS NOTIFIED OF NHTSA CAMPAIGN ID NUMBER: 14V346000 (ELECTRICAL SYSTEM) AFTER EXPERIENCING THE FAILURE MULTIPLE TIMES AND WAS WAITING FOR PARTS TO GET THE VEHICLE REPAIRED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 28,000.

326. On May 19, 2014, New GM became aware of a complaint filed with NHTSA involving a 2013 Camaro, in which the following was reported:

WHILE DRIVING DOWN I 75 IN OCALA FLORIDA CAR STALLED IN MIDDLE OF HIGHWAY . I PULLED OVER TO SHOULDER AND HAD TO RESTART CAR. I TOOK IT IN TO A DEALER AND THEY SAID THEY COULD NOT FIND ANY THING WRONG. THEY SAID TAKE THE CAR.

327. On May 20, 2014, New GM became aware of a complaint filed with NHTSA involving a 2012 Camaro, in which the following was reported:

> WHEN THE IGNITION SWITCH/ KEY IS SLIGHTLY BUMPED WITH KNEE, THE CAR SHUTS OFF. THREE TIMES NOW. DEALERSHIP NOT RESPONSIVE. TAUGHT MY TEEN DRIVERS WHAT TO DO IF THIS HAPPENS AND THIS SAVED MY DAUGHTER'S LIFE WHEN IT HAPPENED TO HER.

328. Astoundingly, the *sole* remedy provided by New GM in its recall will be to "remove the key blade from the original flip key/RKE transmitter assemblies provided with the vehicle, and provide two new keys and two key rings per key."

329. The proposed "remedy" is insufficient, because it does not address (i) the poor placement of the ignition switch such that the keys are vulnerable to being "kneed" by the driver; (ii) the airbag algorithm that can render the airbags inoperable *even when the vehicles are travelling at a high speed*; and (iii) the possible need for a new switch with higher torque.

330. Indeed, on July 31, 2014, after the recall was announced, New GM became aware of a complaint filed with NHTSA involving a 2014 Camaro, in which the following was reported:

> I WAS TURNING ONTO THE HIGHWAY THAT THE SPEED LIMIT IS 65 MPH FROM A SIDE ROAD. I WAITED FOR ONCOMING TRAFFIC TO PASS AND THEN PULLED OUT. AS I PULLED OUT, TURNING RIGHT, MY CAR HAD A SUDDEN LOSS OF POWER. I TRIED TO RESTART AND IT WOULD NOT RESTART. I HAD DIFFICULTY PULLING OVER TO THE SIDE OF THE ROAD DUE TO THE STEERING WHEEL BEING STIFF AND HARD TO HANDLE. AFTER I GOT TO THE SIDE OF THE ROAD, I WAS ABLE TO RESTART MY CAR. I ***DID NOT BUMP THE IGNITION SWITCH WHEN THIS HAPPENED EITHER***. [Emphasis added.]

b. June 20, 2014 recall—ignition key slot defect.

331. On June 20, 2014, New GM recalled 3,141,731 vehicles in the United States for ignition switch, or ignition key slot, defects (NHTSA Recall Number 14V- 355). New GM announced to NHTSA and the public that the recall concerns an ignition key slot defect.

332. 2,349,095 of the vehicles subject to this recall were made by Old GM. 792,636 vehicles were made and/or sold by New GM.

333. The following vehicles were included in the June 20, 2014 recall: 2005-2009 Buick Lacrosse, 2006-2014 Chevrolet Impala, 2000-2005 Cadillac Deville, 2004-2011 Cadillac DTS, 2006-2011 Buick Lucerne, 2004-2005 Buick Regal LS and RS, and 2006-2008 Chevrolet Monte Carlo.

334. The recall notice states, "In the affected vehicles, the weight on the key ring and/or road conditions or some other jarring event may cause the ignition switch to move out of the run position, turning off the engine."

335. Further, "[i]f the key is not in the run position, the air bags may not deploy if the vehicle is involved in a crash, increasing the risk of injury. Additionally, a key knocked out of the run position could cause loss of engine power, power steering, and power braking, increasing the risk of a vehicle crash."

336. During its existence GM has received hundreds of complaints at its Technical Assistance Center in which the weight of the key chain was identified as a source of the problem.[63]

337. The vehicles included in this recall were built on the same platform and their defective ignition switches are likely due to weak detent plungers, just like the Cobalt and other Defective Ignition Switch Vehicles recalled in February and March of 2014.

338. New GM was aware of the ignition switch defect in these vehicles from the date of its inception on July 10, 2009, as it acquired on that date all of the knowledge possessed by Old GM given the continuity in personnel, databases, and operations from Old GM to New GM.

[63] *See, e.g.*, GM-MDL-254300011834-35.

In addition, New GM acquired additional information thereafter. The information, all of which was known to New GM, included the following facts:

a. On August 30, 2005, Ms. Andres sent an email to Old GM employee Jim Zito and copied ten other Old GM employees, including Ray DeGiorgio. Ms. Andres, in her email, stated, "I picked up the vehicle from repair. No repairs were done. . . . The technician said there is nothing they can do to repair it. He said it is just the design of the switch. He said other switches, like on the trucks, have a stronger detent and don't experience this."

b. Ms. Andres' email continued: "I think this is a serious safety problem, especially if this switch is on multiple programs. I'm thinking big recall. I was driving 45 mph when I hit the pothole and the car shut off and I had a car driving behind me that swerved around me. I don't like to imagine a customer driving with their kids in the back seat, on I-75 and hitting a pothole, in rush-hour traffic. I think you should seriously consider changing this part to a switch with a stronger detent."

c. Ray DeGiorgio, who reportedly designed the ignition switches installed in the 2006 Chevrolet Impala vehicles, replied to Ms. Andres' email, stating that he had recently driven a 2006 Impala and "did not experience this condition."

339. On or after July 10, 2009, senior executives and engineers at New GM knew that some of the information relayed to allay Ms. Andres' concerns was inaccurate. For example, Ray DeGiorgio knew that there had been "issues with detents being too light." Instead of relaying those "issues," Mr. DeGiorgio falsely stated that there were no such "issues."

340. Plaintiffs are informed and believe that New GM has tried to characterize the recall of these 3.14 million vehicles as being different than the recall for the ignition switch defect in the Cobalts and other Defective Ignition Switch Vehicles when in reality and for all

practical purposes it is for exactly the same defect that creates exactly the same safety risks. New GM has attempted to label and describe the ignition key slot defect as being different in order to provide it with cover and an explanation for why it did not recall these 3.14 million vehicles much earlier, and why it is not providing a new ignition switch for the 3.14 million vehicles.

341. From 2001 to the present, Old GM and New GM received numerous reports from consumers regarding complaints, crashes, injuries, and deaths linked to this safety defect. The following are examples of just a few of the many reports and complaints regarding the defect.

342. On January 23, 2001, Old GM became aware of a complaint filed with NHTSA involving a 2000 Cadillac Deville and an incident that occurred on January 23, 2001, in which the following was reported:

> COMPLETE ELECTRICAL SYSTEM AND ENGINE SHUTDOWN WHILE DRIVING. HAPPENED THREE DIFFERENT TIMES TO DATE. DEALER IS UNABLE TO DETERMINE CAUSE OF FAILURE. THIS CONDITION DEEMED TO BE EXTREMELY HAZARDOUS BY OWNER. NHTSA ID Number: 739850.

343. On June 12, 2001, Old GM became aware of a complaint filed with NHTSA involving a 2000 Cadillac Deville and an incident that occurred on June 12, 2001, in which the following was reported:

> INTERMITTENTLY AT 60MPH VEHICLE WILL STALL OUT AND DIE. MOST TIMES VEHICLE WILL START UP IMMEDIATELY AFTER. DEALER HAS REPLACED MAIN CONSOLE 3 TIMES, AND ABS BRAKES. BUT, PROBLEM HAS NOT BEEN CORRECTED. MANUFACTURER HAS BEEN NOTIFIED.*AK NHTSA ID Number: 890227.

344. On January 27, 2003, Old GM became aware of a complaint filed with NHTSA involving a 2001 Cadillac Deville and an incident that occurred on January 27, 2003, in which the following was reported:

> WHILE DRIVING AT HIGHWAY SPEED ENGINE SHUT DOWN, CAUSING AN ACCIDENT. PLEASE PROVIDE ANY ADDITIONAL INFORMATION.*AK NHTSA ID Number: 10004759.

345. On September 18, 2007, Old GM became aware of a complaint filed with NHTSA involving a 2006 Chevrolet Impala and an incident that occurred on September 15, 2006, in which it was reported that:

> TL*THE CONTACTS SON OWNS A 2006 CHEVROLET IMPALA. WHILE DRIVING APPROXIMATELY 33 MPH AT NIGHT, THE CONTACTS SON CRASHED INTO A STALLED VEHICLE. HE STRUCK THE VEHICLE ON THE DRIVER SIDE DOOR AND NEITHER THE DRIVER NOR THE PASSENGER SIDE AIR BAGS DEPLOYED. THE DRIVER SUSTAINED MINOR INJURIES TO HIS WRIST. THE VEHICLE SUSTAINED MAJOR FRONT END DAMAGE. THE DEALER WAS NOTIFIED AND STATED THAT THE CRASH HAD TO HAVE BEEN A DIRECT HIT ON THE SENSOR. THE CURRENT AND FAILURE MILEAGES WERE 21,600. THE CONSUMER STATED THE AIR BAGS DID NOT DEPLOY. THE CONSUMER PROVIDED PHOTOS OF THE VEHICLE. UPDATED 10/10/07 *TR NHTSA ID Number: 10203350.

346. On April 02, 2009, GM became aware of a complaint filed with NHTSA involving a 2005 Buick LaCrosse and an incident that occurred on April 02, 2009, in which the following was reported:

> POWER STEERING WENT OUT COMPLETELY, NO WARNING JUST OUT. HAD A VERY HARD TIME STEERING CAR. LUCKY KNOW ONE WAS HURT. *TR NHTSA ID Number: 10263976.

347. The reports regarding the defect continued to be reported to New GM. For example, on February 15, 2010, New GM became aware of a complaint filed with NHTSA involving a 2008 Buick LaCrosse and an incident that occurred on February 13, 2010, in which a driver reported:

> WHILE DRIVING AT 55MPH I RAN OVER A ROAD BUMP AND MY 2008 BUICK LACROSSE SUPER SHUT

> OFF(STALLED). I COASTED TO THE BURM, HIT BRAKES TO A STOP. THE CAR STARTED ON THE FIRST TRY. CONTINUED MY TRIP WITH NO INCIDENCES. TOOK TO DEALER AND NO CODES SHOWED IN THEIR COMPUTER. CALLED GM CUSTOMER ASSISTANCE AND THEY GAVE ME A CASE NUMBER. NO BULLETINS. SCARY TO DRIVE. TRAFFIC WAS LIGHT THIS TIME BUT MAY NOT BE THE NEXT TIME. *TR. NHTSA ID Number: 10310692.

348. On April 21, 2010, New GM became aware of a complaint filed with NHTSA involving a 2006 Buick Lucerne and an incident that occurred on March 22, 2010, in which the following was reported:

> 06 BUICK LUCERNE PURCHASED 12-3-09, DIES OUT COMPLETELY WHILE DRIVING AT VARIOUS SPEEDS. THE CAR HAS SHUT OFF ON THE HIGHWAY 3 TIMES WITH A CHILD IN THE CAR. IT HAS OCCURRED A TOTAL OF 7 TIMES BETWEEN 1-08-10 AND 4-17-10. THE CAR IS UNDER FACTORY WARRANTY AND HAS BEEN SERVICED 7 TIMES BY 3 DIFFERENT BUICK DEALERSHIPS. *TR NHTSA ID Number: 10326754.

349. On April 29, 2010, New GM became aware of a complaint filed with NHTSA involving a 2005 Buick LaCrosse and an incident that occurred on March 21, 2010, in which it was reported that:

> TRAVELING ON INTERSTATE 57 DURING DAYTIME HOURS. WHILE CRUISING AT 73 MILES PER HOUR IN THE RIGHT HAND LANE, THE VEHICLE SPUTTERED AND LOST ALL POWER. I COASTED TO A STOP OFF THE SIDE OF THE ROAD. I RESTARTED THE VEHICLE AND EVERYTHING SEEMED OK, SO I CONTINUED ON. A LITTLE LATER IT SPUTTERED AGAIN AND STARTED LOSING POWER. THE POWER CAME BACK BEFORE IT CAME TO A COMPLETE STOP. I CALLED ON STAR FOR A DIAGNOSTIC CHECK AND THEY TOLD ME I HAD A FUEL SYSTEM PROBLEM AND THAT IF THE CAR WOULD RUN TO CONTINUE THAT IT WAS NOT A SAFETY ISSUE. THEY TOLD ME TO TAKE IT TO A DEALER FOR REPAIRS WHEN I GOT HOME. I TOOK THE CAR WORDEN-MARTEN SERVICE CENTER FOR REPAIRS ON MARCH 23RD. TO REPAIR THE CAR THEY: 1.REPLACED CAT CONVERTER AND OXYGEN SENSOR 125CGMPP- $750.47 A SECOND

> INCIDENT OCCURRED WHILE TRAVELING ON INTERSTATE 57 DURING DAYTIME HOURS. I WAS PASSING A SEMI TRACTOR TRAILER WITH THREE CARS FOLLOWING ME WHILE CRUISING AT 73 MILES PER HOUR WHEN THE VEHICLE SPUTTERED AND LOST ALL POWER PUTTING ME IN A VERY DANGEROUS SITUATION. THE VEHICLE COASTED DOWN TO ABOUT 60 MILES PER HOUR BEFORE IT KICKED BACK IN. I IN THE MEAN TIME HAD DROPPED BACK BEHIND THE SEMI WITH THE THREE CARS BEHIND ME AND WHEN I COULD I PULLED BACK INTO THE RIGHT HAND LANE. THIS WAS A VERY DANGEROUS SITUATION FOR ME AND MY WIFE. I CALLED ON STAR FOR A DIAGNOSTIC CHECK AND THEY TOLD ME THAT EVERYTHING WAS OK. I TOOK THE CAR WORDEN-MARTEN SERVICE CENTER FOR REPAIRS AGAIN ON APRIL 19TH TO REPAIR THE CAR THEY: 1.REPLACED MASS -AIR FLOW UNIT AND SENSOR $131.39 WHO KNOWS IF IT IS FIXED RIGHT THIS TIME? THIS WAS A VERY DANGEROUS SITUATION TO BE IN FOR THE CAR TO FAIL. *TR NHTSA ID Number: 10328071.

350. On June 2, 2010, New GM became aware of a complaint filed with NHTSA involving a 2007 Buick LaCrosse and an incident that occurred on March 1, 2010, in which the following was reported:

> 2007 BUICK LACROSSE SEDAN. CONSUMER STATES MAJOR SAFETY DEFECT. CONSUMER REPORTS WHILE DRIVING THE ENGINE SHUT DOWN 3 TIMES FOR NO APPARENT REASON *TGW NHTSA ID Number: 10334834.

351. On February 20, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Chevrolet Monte Carlo and an incident that occurred on January 16, 2014, in which the following was reported:

> I WAS DRIVING GOING APPROXIMATELY 45 MPH, I HIT A POT HOLE AND MY VEHICLE CUT OFF. THIS HAS HAPPENED THREE TIMES SINCE JANUARY. THE SAME THING HAPPENED THE SECOND TIME. THE LAST TIME IT OCCURRED WAS TUESDAY, FEBRUARY 18. THIS TIME I WAS ON THE EXPRESSWAY TRAVELING APPROXIMATELY 75 MPH, HIT A BUMP AND IT CUT OFF. THE CAR STARTS BACK UP WHEN I PUT IT IN NEUTRAL. *TR NHTSA ID Number: 10565104.

352. On March 3, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Chevrolet Impala and an incident that occurred on February 29, 2012, in which the following was reported:

> I WAS DRIVING MY COMPANY ASSIGNED CAR DOWN A STEEP HILL WHEN THE ENGINE STALLED WITHOUT WARNING. THIS HAS HAPPENED 5 OTHER TIMES WITH THIS VEHICLE. THIS WAS THE FIRST TIME I WAS TRAVELING FAST THOUGH. IT'S LIKE THE ENGINE JUST TURNS OFF. THE LIGHTS ARE STILL ON BUT I LOSE THE POWER STEERING AND BRAKES. IT WAS TERRIFYING AND EXTREMELY DANGEROUS. THIS PROBLEM HAPPENS COMPLETELY RANDOMLY WITH NO WARNING. IT HAS HAPPENED TO OTHERS IN MY COMPANY WITH THEIR IMPALAS. I LOOKED ONLINE AND FOUND NUMEROUS OTHER INSTANCES OF CHEVY IMPALAS OF VARIOUS MODEL YEARS DOING THE SAME THING. IT IS CURRENTLY IN THE REPAIR SHOP AND THE MECHANIC CAN'T DUPLICATE THE PROBLEM. I TOLD THEM ITS RANDOM AND OCCURS ABOUT EVERY 4 MONTHS OR SO. I AM AFRAID I WILL HAVE TO GET BACK IN THIS DEATH TRAP DUE TO MY EMPLOYER MAKING ME. PLEASE HELP- I DON'T WANT TO DIE BECAUSE CHEVROLET HAS A PROBLEM WITH THEIR ELECTRICAL SYSTEMS IN THEIR CARS. *TR NHTSA ID Number: 10567458.

353. On March 11, 2014, New GM became aware of a complaint filed with NHTSA involving a 2007 Cadillac DTS and an incident that occurred on January 27, 2013, in which the following was reported:

> ENGINE STOPPED. ALL POWER EQUIPMENT CEASED TO FUNCTION. I WAS ABLE TO GET TO THE SIDE OF THE FREEWAY. PUT THE CAR IN NEUTRAL, TURNED THE KEY AND THE CAR STARTED AND CONTINUED FOR THE DURATION OF THE 200 MILE TRIP. THE SECOND TIME APPROXIMATELY THREE WEEKS AGO MY WIFE WAS DRIVING IN HEAVY CITY TRAFFIC WHEN THE SAME PROBLEM OCCURRED AND SHE LOST THE USE OF ALL POWER EQUIPMENT. SHE WAS ABLE TO PUT THE CAR IN PARK AND GET IT STARTED AGAIN WITHOUT INCIDENT. I CALLED GM COMPLAINT DEPARTMENT. THEY INSTRUCTED ME TO TAKE THE CAR TO A DEALERSHIP

> AND HAVE A DIAGNOSTIC TEST DONE ON IT. THIS WAS DONE AND NOTHING WAS FOUND TO BE WRONG WITH THE VEHICLE. I AGAIN CALLED CADILLAC COMPLAINT DEPARTMENT AND OPENED A CASE. THIS TIME I WAS TOLD TO TAKE THE CAR BACK TO THE DEALERSHIP AND ASK THE SERVICE DEPARTMENT TO RECHECK IT. I INFORMED THEM I HAVE THE DIAGNOSTIC REPORT SHOWING NOTHING WRONG WAS FOUND. THEY SUGGESTED I TAKE IT BACK AND HAVE THE SERVICE PEOPLE DRIVE THE CAR. THIS DIDN'T MAKE ANY SENSE BECAUSE I DON'T KNOW WHEN AND WHERE THE PROBLEM WILL OCCUR AGAIN. WHAT WAS I TO DO FOR A CAR WHILE THE DEALERSHIP HAD MINE? I INQUIRED OF THE CADILLAC REPRESENTATIVE IF THIS CAR MAY HAVE THE SAME IGNITION AS THE CARS CURRENTLY BEING RECALLED BY GM. THEY WERE UNABLE TO ANSWER THAT QUESTION. THEY FINALLY STATED THE ONLY REMEDY WAS TO TAKE IT BACK TO THE DEALERSHIP. IF THIS PROBLEM OCCURS AGAIN SOMEONE COULD EASILY GET INJURED OR KILLED. I WOULD APPRECIATE ANY ASSISTANCE YOU CAN GIVE ME ON HOW TO RESOLVE THIS MATTER. NHTSA ID Number: 10568491.

354. On March 19, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Buick LaCrosse and an incident that occurred on March 15, 2014, in which the following was reported:

> WHILE DRIVING UP A LONG INCLINE ON I-10 VEHICLE BEHAVED AS IF THE IGNITION HAD BEEN TURNED OFF AND KEY REMOVED. IE: ENGINE OFF, NO LIGHTS OR ACCESSORIES, NO WARNING LIGHTS ON DASH. TRAFFIC WAS HEAVY AND MY WIFE WAS FORTUNATE TO SAFELY COAST INTO SHOULDER. INCIDENT RECORDED WITH BUICK, HAVE REFERENCE NUMBER. *TR NHTSA ID Number: 10573586.

355. On June 20, 2014, New GM became aware of a complaint filed with NHTSA involving a 2008 Buick LaCrosse and an incident that occurred on August 30, 2013, in which the following was reported:

> THE IGNITION CONTROL MODULE (NOT THE IGNITION SWITCH) FAILED SUDDENLY WHILE DRIVING ON THE

> HIGHWAY, CAUSING THE ENGINE TO SHUT OFF SUDDENLY AND WITHOUT WARNING. THE CAR WAS TRAVELING DOWNHILL, SO THE INITIAL INDICATION WAS LOSS OF POWER STEERING. I WAS ABLE TO PULL ONTO THE SHOULDER AND THEN REALIZED THAT THE ENGINE HAD DIED AND WOULD NOT RESTART. WHILE NO CRASH OR INJURY OCCURRED, THE POTENTIAL FOR A SERIOUS CRASH WAS QUITE HIGH. NHTSA ID Number: 10604820.

356. On July 1, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Buick LaCrosse and an incident that occurred on October 25, 2012, in which the following was reported:

> TRAVELING 40 MPH ON A FOUR LANE ABOUT TO PASS A TRUCK. MOTOR STOPPED, POWER STEERING OUT, POWER BRAKES OUT, MANAGED TO COAST ACROSS THREE LANES TO SHOULDER TO PARK. WALKED 1/4 MILES TO STORE CALLED A LOCAL GARAGE. CAR STILL WOULD NOT START, TOWED TO HIS GARAGE. CHECKED GAS, FUEL PRESSURE OKAY BUT NO SPARK. MOVED SOME CONNECTORS AROUND THE STARTING MODULE AND CAR STARTED. HAVE NOT HAD ANY PROBLEMS SINCE, HAVE THE FEAR THAT I WILL BE ON A CHICAGO TOLL ROAD AND IT WILL STOP AGAIN. NHTSA ID Number: 10607535.

357. On July 12, 2014, New GM became aware of a complaint filed with NHTSA involving a 2009 Chevrolet Impala and an incident that occurred on March 19, 2010, in which the following was reported:

> I HAD JUST TURNED ONTO THIS ROAD, HAD NOT EVEN GONE A MILE. NO SPEED, NO BLACK MARKS, CAR SHUT DOWN RAN OFF THE ROAD AND HIT A TREE STUMP. TOTAL THE CAR. THE STEERING WHEEL WAS BENT ALMOST IN HALF. I HAVE PICTURES OF THE CAR. I GOT THIS CAR NEW, SO ALL MILES WE'RE PUT ON IT BY ME. I BROKE MY HIP, BACK, KNEE, DISLOCATED MY ELBOW, CRUSHED MY ANKLE AND FOOT. HAD A HEAD INJURY, A DEFLATED LUNG. I WAS IN THE HOSPITAL FOR TWO MONTHS AND A NURSING HOME FOR A MONTH. I HAVE HAD 14 SURGERIES. STILL NOT ABLE TO WORK OR DO A LOT OF THINGS FOR MY SELF. WITH THE RECALLS

SHOWING THE ISSUES OF THE ENGINE SHUTTING OFF, I NEED THIS LOOKED INTO. NHTSA ID Number: 10610093.

358. On July 24, 2014, New GM became aware of a complaint filed with NHTSA involving a 2008 Buick LaCrosse and an incident that occurred on July 15, 2014, in which the following was reported:

WHILE DRIVING NORTH ON ALTERNATE 69 HIGHWAY AT 65 MPH AT 5:00 P.M., MY VEHICLE ABRUPTLY LOSS POWER EVEN THOUGH I TRIED TO ACCELERATE. THE ENGINE SHUT OFF SUDDENLY AND WITHOUT WARNING. VEHICLE SLOWED TO A COMPLETE STOP. I WAS DRIVING IN THE MIDDLE LANE AND WAS UNABLE TO GET IN THE SHOULDER LANE BECAUSE I HAD NO PICKUP (UNABLE TO GIVE GAS TO ACCELERATE) SO MY HUSBAND AND I WERE CAUGHT IN FIVE 5:00 TRAFFIC WITH CARS WHIPPING AROUND US ON BOTH SIDES AND MANY EXCEEDING 65 MPH. I PUT ON MY EMERGENCY LIGHTS AND IMMEDIATELY CALLED ON-STAR. I WAS UNABLE TO RESTART THE ENGINE. THANK GOD FOR ON-STAR BECAUSE FROM THAT POINT ON, I WAS IN TERROR WITNESSING CARS COMING UPON US NOT SLOWING UNTIL THEY REALIZED I WAS AT A STAND STILL WITH LIGHTS FLASHING. THE CARS WOULD SWERVE TO KEEP FROM HITTING US. IT TOOK THE HIGHWAY PATROL AND POLICE 15 MINUTES TO GET TO US BUT DURING THAT TIME, I RELIVED VISIONS OF US BEING KILLED ON THE HIGHWAY. I CANÂ€™T DESCRIBE THE HORROR, LOOKING OUT MY REAR VIEW MIRROR, WITNESSING OUR DEMISE TIME AFTER TIME. THOSE 15 MINUTES SEEMED LIKE AN ETERNITY. WHEN THE HIGHWAY PATROL ARRIVED THEY CLOSED LANES AND ASSISTED IN PUSHING CAR OUT OF THE HIGHLY TRAFFIC LANES. IT TOOK MY HUSBAND AND I BOTH TO TURN THE STEERING WHILE IN NEUTRAL. THE CAR WAS TOWED TO CONKLIN FANGMAN KC DEALERSHIP AND I HAD TO REPLACE IGNITION COIL AND MODULE THAT COST ME $933.16. THEY SAID THESE PARTS WERE NOT ON THE RECALL LIST, WHICH I HAVE FOUND OUT SINCE THEN GM HAS PUT DEALERSHIPS ON NOTICE OF THIS PROBLEM. IT HAS SOMETHING TO DO WITH SUPPLYING ENOUGH MANUFACTURED PARTS TO TAKE CARE OF RECALL. IF I COULD AFFORD TO PURCHASE ANOTHER CAR I WOULD BECAUSE I DONÂ€™T FEEL SAFE ANY LONGER IN THIS CAR. EMOTIONALLY I AM STILL

> SUFFERING FROM THE TRAUMA. NHTSA ID Number: 10604820.

359. Notwithstanding New GM's recall, the reports and complaints relating to this defect have continued to pour into New GM. Such complaints and reports indicate that New GM's proffered recall "fix" does not work.

360. For example, on August 2, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Buick LaCrosse and an incident that occurred on July 12, 2014, in which the following was reported:

> WHILE TRAVELING IN THE FAST LANE ON THE GARDEN STATE PARKWAY I HIT A BUMP IN THE ROAD, THE AUTO SHUT OFF.WITH A CONCRETE DIVIDER ALONG SIDE AND AUTOS APPROACHING AT HIGH SPEED, MY WIFE AND DAUGHTER SCREEMING I MANAGED TO GET TO THE END OF THE DIVIDER WERE I COULD TURN OFF THE AUTO RESTARTED ON 1ST TRY BUT VERY SCARY. NHTSA ID Number: 10618391.

361. On August 18, 2014, New GM became aware of a complaint filed with NHTSA involving a 2007 Buick LaCrosse and an incident that occurred on August 18, 2014, in which the following was reported:

> TL* THE CONTACT OWNS A 2007 BUICK LACROSSE. THE CONTACT STATED WHILE DRIVING APPROXIMATELY 60 MPH, SHE HIT A POT HOLE AND THE VEHICLE STALLED. THE VEHICLE COASTED TO THE SHOULDER OF THE ROAD. THE VEHICLE WAS RESTARTED AND THE CONTACT WAS ABLE TO DRIVE THE VEHICLE AS NORMAL. THE CONTACT RECEIVED A RECALL NOTICE UNDER NHTSA CAMPAIGN NUMBER: 14V355000 (ELECTRICAL SYSTEM), HOWEVER THE PARTS NEEDED FOR THE REPAIRS WAS UNAVAILABLE. THE VEHICLE WAS NOT REPAIRED. THE MANUFACTURER WAS NOT NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 110,000. NHTSA ID Number: 10626067.

362. On August 20, 2014, New GM became aware of a complaint filed with NHTSA involving a 2007 Chevrolet Impala and an incident that occurred on August 6, 2014, in which it was reported that:

> TL* THE CONTACT OWNS A 2007 CHEVROLET IMPALA. THE CONTACT STATED THAT WHILE DRIVING 25 MPH, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT RECEIVED A NOTIFICATION FOR RECALL NHTSA CAMPAIGN NUMBER: 14V355000 (ELECTRICAL SYSTEM). THE VEHICLE WAS TAKEN TO AN INDEPENDENT MECHANIC WHERE THE TECHNICIAN ADVISED THE CONTACT TO REMOVE THE KEY FOB AND ANY OTHER OBJECTS. THE VEHICLE WAS NOT REPAIRED. THE MANUFACTURER WAS MADE AWARE OF THE FAILURE. THE FAILURE MILEAGE WAS 79,000. NHTSA ID Number: 10626659.

363. On August 27, 2014, New GM became aware of the following complaint filed with NHTSA involving a 2008 Chevrolet Impala and an incident that occurred on August 27, 2014, in which it was reported that:

> TL-THE CONTACT OWNS A 2008 CHEVROLET IMPALA. THE CONTACT STATED WHILE DRIVING APPROXIMATELY 50 MPH, THE VEHICLE LOST POWER AND THE STEERING WHEEL SEIZED WITHOUT WARNING. AS A RESULT, THE CONTACT CRASHED INTO A POLE AND THE AIR BAGS FAILED TO DEPLOY. THE CONTACT SUSTAINED A CONCUSION, SPRAINED NECK, AND WHIPLASH WHICH REQUIRED MEDICAL ATTENTION. THE POLICE WAS NOT FILED. THE VEHICLE WAS TOWED TO A TOWING COMPANY. THE CONTACT RECEIVED NOTIFICATION OF NHTSA CAMPAIGN ID NUMBER: 14V355000 (ELECTRICAL SYSTEM), HOWEVER THE PARTS ARE NOT AVAILABLE TO PERFORM THE REPAIRS. THE VEHICLE WAS NOT REPAIRED. THE MANUFACTURER WAS NOT NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 70,000. MF. NHTSA ID Number: 10628704.

364. Old GM and later New GM knew that this serious safety defect existed for years yet did nothing to warn the public or even attempt to correct the defect in these vehicles until late June of 2014 when New GM finally made the decision to implement a recall.

365. The "fix" that New GM plans as part of the recall is to modify the ignition key from a "slotted" key to "hole" key. This is insufficient and does not adequately address the safety risks posed by the defect. The ignition key and switch remain prone to inadvertently move from the "run" to the "accessory" position. Simply changing the key slot or taking other keys and fobs off of key rings is New GM's attempt to make consumers responsible for the safety of GM-branded vehicles and to divert its own responsibility to make GM-branded vehicles safe. New GM's "fix" does not adequately address the inherent dangers and safety threats posed by the defect in the design.

366. In addition, New GM is not addressing the other design issues that create safety risks in connection with this defect. New GM is not altering the algorithm that prevents the airbags from deploying when the ignition leaves the "run" position even when the vehicle is moving at high speed. And New GM is not altering the placement of the ignition switch in an area where the driver's knees may inadvertently cause the ignition to move out of the "run" position.

c. July 2 and 3, 2014 recalls—unintended ignition rotation defect.

367. On July 2, 2014, New GM recalled 554,328 vehicles in the United States for ignition switch defects (Recall Number 14V-394). The July 2 recall applied to the 2003-2014 Cadillac CTS and the 2004-2006 Cadillac SRX.

368. The recall notice explains that the weight on the key ring and/or road conditions or some other jarring event may cause the ignition switch to move out of the "run" position,

turning off the engine. Further, if the key is not in the "run" position, the airbags may not deploy in the event of a collision, increasing the risk of injury.

369. On July 3, 2014, New GM recalled 6,729,742 additional vehicles in the United States for ignition switch defects (Recall No. 14V-400).

370. The following vehicles were included in this recall: 1997-2005 Chevrolet Malibu, 2000-2005 Chevrolet Impala, 2000-2005 Chevrolet Monte Carlo, 2000-2005 Pontiac Grand Am, 2004-2008 Pontiac Grand Prix, 1998-2002 Oldsmobile Intrigue, and 1999-2004 Oldsmobile Alero.

371. The recall notice states that the weight on the key and/or road conditions or some other jarring event may cause the ignition switch to move out of the "run" position, turning off the engine. If the key is not in the "run" position, the airbags may not deploy if the vehicle is involved in a collision, increasing the risk of injury.

372. In both of these recalls, New GM notified NHTSA and the public that the recall was intended to address a defect involving unintended or "inadvertent key rotation" within the ignition switch of the vehicles. As with the ignition key defect announced June 20, however, the defects for which these vehicles have been recalled is directly related to the ignition switch defect in the Cobalt and other Defective Ignition Switch Vehicles and involves the same safety risks and dangers.

373. 7,175,896 of the recalled vehicles were manufactured by Old GM. 108,174 of the vehicles were manufactured and sold by New GM.

374. Once again, the unintended ignition rotation defect is substantially similar to and relates directly to the other ignition switch defects, including the defects that gave rise to the initial recall of 2.1 million Cobalts and other vehicles in February and March of 2014. Like the

other ignition switch defects, the unintended ignition key rotation defect poses a serious and dangerous safety risk because it can cause a vehicle to stall while in motion by causing the key in the ignition to inadvertently move from the "on" or "run" position to "off" or "accessory" position. Like the other ignition switch defects, the unintended ignition key rotation defect can result in a loss of power steering, power braking, and increase the risk of a crash. And as with the other ignition switch defects, if a crash occurs, the airbags will not deploy because of the unintended ignition key rotation defect.

375. The unintended ignition key rotation defect involves several problems, and they are identical to the problems in the other Defective Ignition Switch Vehicles: a weak detent plunger, the low positioning of the ignition on the steering column, and the algorithm that renders the airbags inoperable when the vehicle leaves the "run" position.

376. The 2003-2006 Cadillac CTS and the 2004-2006 Cadillac SRX use the same Delphi switch and have inadequate torque for the "run"-"accessory" direction of the key rotation. This was known to Old and New GM, and was the basis for a change that was made to a stronger detent plunger for the 2007 and later model years of the SRX model. The 2007 and later CTS vehicles used a switch manufactured by Dalian Alps.

377. In 2010, New GM changed the CTS key from a "slot" to a "hole" design to "reduce an observed nuisance" of the key fob contacting the driver's leg. But in 2012, a New GM employee reported two running stalls of a 2012 CTS that had a "hole" key and the stronger detent plunger switch. When New GM did testing in 2014 of the "slot" versus "hole" keys, it confirmed that the weaker detent plunger-equipped switches used in the older CTS and SRX could inadvertently move from "run" to "accessory" or "off" when the "vehicle goes off road or experience some other jarring event."

378. Plaintiffs are informed and believe that New GM has tried to characterize the recall of these 7.3 million vehicles as being different than the other ignition switch defects that gave rise to the February recall ***even though*** these recalls are aimed at addressing the same defects and safety risks as those that gave rise to the other ignition switch defect recalls. New GM has attempted to portray the unintended ignition key rotation defect as being different from the other ignition switch defects in order to deflect attention from the severity and pervasiveness of the ignition switch defect and to try to provide a story and plausible explanation for why it did not recall these 7.3 million vehicles much earlier, and to avoid providing new, stronger ignition switches as a remedy.

379. Further, New GM acquired knowledge of the defects in these vehicles on July 10, 2009. On that date, it acquired knowledge of the following facts, as well as others not pleaded herein:

a. In January of 2003, Old GM opened an internal investigation after it received complaints from a Michigan GM dealership that a customer had experienced a power failure while operating his model year 2003 Pontiac Grand Am.

b. During the investigation, Old GM's Brand Quality Manager for the Grand Am visited the dealership and requested that the affected customer demonstrate the problem. The customer was able to recreate the shutdown event by driving over a speed bump at approximately 30-35 mph.

c. The customer's key ring was allegedly quite heavy. It contained approximately 50 keys and a set of brass knuckles.

d. In May 2003, Old GM issued a voicemail to dealerships describing the defective ignition condition experienced by the customer in the Grand Am. Old GM identified

the relevant population of the Affected Vehicles as the 1999-2003 Chevrolet Malibu, Oldsmobile Alero, and Pontiac Grand Am.

e. Old GM did not recall these vehicles. Nor did it provide owners and/or lessees with notice of the defective condition. Instead, its voicemail directed dealerships to pay attention to the key size and mass of the customer's key ring.

f. On July 24, 2003, Old GM issued an engineering work order to increase the detent plunger force on the ignition switch for the 1999-2003 Chevrolet Malibu, Oldsmobile Alero, and Pontiac Grand Am vehicles. Old GM engineers allegedly increased the detent plunger force and changed the part number of the ignition switch. The new parts were installed beginning in the model year 2004 Malibu, Alero, and Grand Am vehicles.

g. Old GM issued a separate engineering work order in March 2004 to increase the detent plunger force on the ignition switch in the Pontiac Grand Prix. Old GM engineers did not change the part number for the new Pontiac Grand Prix ignition switch.

h. Then-Old GM design engineer Ray DeGiorgio signed the work order in March 2004 authorizing the part change for the Grand Prix ignition switch. Ray DeGiorgio maintained his position as design engineer with New GM.

i. On or around August 25, 2005, Laura Andres, an Old GM design engineer (who remains employed with New GM), sent an email describing ignition switch issues that she experienced while operating a 2006 Chevrolet Impala on the highway. Ms. Andres' email stated, "While driving home from work on my usual route, I was driving about 45 mph, where the road changes from paved to gravel & then back to paved, some of the gravel had worn away, and the pavement acted as a speed bump when I went over it. The car shut off. I took the car in for

repairs. The technician thinks it might be the ignition detent, because in a road test in the parking lot it also shut off."

j. Old GM employee Larry S. Dickinson, Jr. forwarded Ms. Andres' email on August 25, 2005 to four Old GM employees. Mr. Dickinson asked, "Is this a condition we would expect to occur under some impacts?"

k. On August 29, 2005, Old GM employee Jim Zito forwarded the messages to Ray DeGiorgio and asked, "Do we have any history with the ignition switch as far as it being sensitive to road bumps?"

l. Mr. DeGiorgio responded the same day, stating, "To date there has never been any issues with the detents being too light."

380. From 2002 to the present, Old GM and New GM received numerous reports from consumers regarding complaints, crashes, injuries, and deaths linked to this safety defect. The following are just a handful of examples of some of the reports known to Old GM and New GM.

381. On September 16, 2002, Old GM became aware of a complaint filed with NHTSA regarding a 2002 Oldsmobile Intrigue involving an incident that occurred on March 16, 2002, in which the following was reported:

> WHILE DRIVING AT 30 MPH CONSUMER RAN HEAD ON INTO A STEEL GATE, AND THEN HIT THREE TREES. UPON IMPACT, NONE OF THE AIR BAGS DEPLOYED. CONTACTED DEALER. PLEASE PROVIDE FURTHER INFORMATION. *AK **NHTSA ID Number:** 8018687.

382. On November 22, 2002, Old GM became aware of a complaint filed with NHTSA involving a 2003 Cadillac CTS involving an incident that occurred on July 1, 2002, in which it was reported that:

> THE CAR STALLS AT 25 MPH TO 45 MPH, OVER 20 OCCURANCES, DEALER ATTEMPTED 3 REPAIRS. DT NHTSA ID Number: 770030.

383. On January 21, 2003, Old GM became aware of a complaint filed with NHTSA involving a 2003 Cadillac CTS, in which the following was reported:

> WHILE DRIVING AT ANY SPEED,THE VEHICLE WILL SUDDENLY SHUT OFF. THE STEERING WHEEL AND THE BRAKE PEDAL BECOMES VERY STIFF. CONSUMER FEELS ITS VERY UNSAFE TO DRIVE. PLEASE PROVIDE ANY FURTHER INFORMATION. NHTSA ID Number: 10004288.

384. On June 30, 2003, Old GM became aware of a complaint filed with NHTSA regarding a 2001 Oldsmobile Intrigue which involved the following report:

> CONSUMER NOTICED THAT WHILE TRAVELING DOWN HILL AT 40-45 MPH BRAKES FAILED, CAUSING CONSUMER TO RUN INTO THREES AND A POLE. UPON IMPACT, AIR BAGS DID NOT DEPLOY. *AK NHTSA ID Number: 10026252.

385. On March 11, 2004, Old GM became aware of a complaint filed with NHTSA involving a 2004 Cadillac CTS involving an incident that occurred on March 11, 2004, in which the following was reported:

> CONSUMER STATED WHILE DRIVING AT 55-MPH VEHICLE STALLED, CAUSING CONSUMER TO PULL OFF THE ROAD. DEALER INSPECTED VEHICLE SEVERAL TIMES, BUT COULD NOT DUPLICATE OR CORRECT THE PROBLEM. *AK NHTSA ID Number: 10062993.

386. On March 11, 2004, Old GM became aware of a complaint with NHTSA regarding a 2003 Oldsmobile Alero incident that occurred on July 26, 2003, in which the following was reported:

> THE VEHICLE DIES. WHILE CRUISING AT ANY SPEED, THE HYDRAULIC BRAKES & STEERING FAILED DUE TO THE ENGINE DYING. THERE IS NO SET PATTERN, IT MIGHT STALL 6 TIMES IN ONE DAY, THEN TWICE THE NEXT DAY. THEN GO 4 DAYS WITH NO OCURRENCE, THEN IT WILL STALL ONCE A DAY FOR 3 DAYS. THEN GO A WEEK WITH NO OCURRENCE, THEN STALL 4 TIMES A DAY FOR 5 DAYS, ETC., ETC. IN EVERY OCURRENCE, IT TAKES APPROXIMATELY 10 MINUTES BEFORE IT WILL

> START BACK UP. AT HIGH SPEEDS, IT IS EXTREMELY TOO DANGEROUS TO DRIVE. WE'VE TAKEN IT TO THE DEALER, UNDER EXTENDED WARRANTY, THE REQUIRED 4 TIMES UNDER THE LEMON LAW PROCESS. THE DEALER CANNOT ASCERTAIN, NOR FIX THE PROBLEM. IT HAPPENED TO THE DEALER AT LEAST ONCE WHEN WE TOOK IT IN. I DOUBT THEY WILL ADMIT IT, HOWEVER, MY WIFE WAS WITNESS. THE CAR IS A 2003. EVEN THOUGH I BOUGHT IT IN JULY 2003, IT WAS CONSIDERED A USED CAR. GM HAS DENIED OUR CLAIM SINCE THE LEMON LAW DOES NOT APPLY TO USED CARS. THE CAR HAS BEEN PERMANENTLY PARKED SINCE NOVEMBER 2003. WE WERE FORCED TO BUY ANOTHER CAR. THE DEALER WOULD NOT TRADE. THIS HAS RESULTED IN A BADLUCK SITUATION FOR US. WE CANNOT AFFORD 2 CAR PAYMENTS / 2 INSURANCE PREMIUMS, NOR CAN WE AFFORD $300.00 PER HOUR TO SUE GM. I STOPPED MAKING PAYMENTS IN DECEMBER 2003. I HAVE KEPT THE FINANCE COMPANY ABREAST OF THE SITUATION. THEY HAVE NOT REPOSSED AS OF YET. THEY WANT ME TO TRY TO SELL IT. CAN YOU HELP ?*AK NHTSA ID Number: 10061898.

387. On July 20, 2004, Old GM became aware of a complaint filed with NHTSA involving a 2004 Cadillac SRX, involving an incident that occurred on July 9, 2004, in which the following was reported:

> THE CAR DIES AFTER TRAVELING ON HIGHWAY. IT GOES FROM 65 MPH TO 0. THE BRAKES, STEERING, AND COMPLETE POWER DIES. YOU HAVE NO CONTROL OVER THE CAR AT THIS POINT. I HAVE ALMOST BEEN HIT 5 TIMES NOW. ALSO, WHEN THE CARS DOES TURN BACK ON IT WILL ONLY GO 10 MPH AND SOMETIMES WHEN YOU TURN IT BACK ON THE RPM'S WILL GO TO THE MAX. IT SOUNDS LIKE THE CAR IS GOING TO EXPLODE. THIS CAR IS A DEATH TRAP. *LA NHTSA ID Number: 10082289.

388. In August 2004, Old GM became aware of a complaint filed with NHTSA regarding a 2004 Chevrolet Malibu incident that occurred on June 30, 2004, in which it was reported that:

> WHILE TRAVELING AT ANY SPEED VEHICLE STALLED. WITHOUT CONSUMER HAD SEVERAL CLOSE CALLS OF BEING REAR ENDED. VEHICLE WAS SERVICED SEVERAL TIMES, BUT PROBLEM RECURRED. *AK. NHTSA ID Number: 10089418.

389. Another report in August of 2004 which Old GM became aware of involved a 2004 Chevrolet Malibu incident that occurred on August 3, 2004, in which it was reported that:

> WHEN DRIVING, THE VEHICLE TO CUT OFF. THE DEALER COULD NOT FIND ANY DEFECTS. *JB. NHTSA ID Number: 10087966.

390. On October 23, 2004, Old GM became aware of a complaint with NHTSA regarding a 2003 Chevrolet Monte Carlo, in which the following was reported:

> VEHICLE CONTINUOUSLY EXPERIENCED AN ELECTRICAL SYSTEM FAILURE. AS A RESULT, THERE'WAS AN ELECTRICAL SHUT DOWN WHICH RESULTED IN THE ENGINE DYING/ STEERING WHEEL LOCKING UP, AND LOSS OF BRAKE POWER.*AK NHTSA ID Number: 10044624.

391. On April 26, 2005, Old GM became aware of a complaint filed with NHTSA involving a 2005 Pontiac Grand Prix, pertaining to an incident that occurred on December 29, 2004, in which the following was reported:

> 2005 PONTIAC GRAND PRIX GT SEDAN VIN #[XXX] PURCHASED 12/16/2004. INTERMITTENTLY VEHICLE STALLS/ LOSS OF POWER IN THE ENGINE. WHILE DRIVING THE VEHICLE IT WILL SUDDENLY JUST LOSES POWER. YOU CONTINUE TO PRESS THE ACCELERATOR PEDAL AND THEN THE ENGINE WILL SUDDENLY TAKE BACK OFF AT A GREAT SPEED. THIS HAS HAPPENED WHILE DRIVING NORMALLY WITHOUT TRYING TO ACCELERATE AND ALSO WHILE TRYING TO ACCELERATE. THE CAR HAS LOST POWER WHILE TRYING TO MERGE IN TRAFFIC. THE CAR HAS LOST POWER WHILE TRYING TO CROSS HIGHWAYS. THE CAR HAS LOST POWER WHILE JUST DRIVING DOWN THE ROAD. GMC HAS PERFORMED THE FOLLOWING REPAIRS WITHOUT FIXING THE PROBLEM. 12/30/2004 [XXX]- MODULE, POWERTRAIN CONTROL-ENGINE

> REPROGRAMMING. 01/24/2005 [XXX]-SOLENOID,PRESSURE CONTROL-REPLACED. 02/04/2005 [XXX]-MODULE, PCM/VCM-REPLACED. 02/14/2005 [XXX]-PEDAL,ACCELERATOR-REPLACED. DEALERSHIP PURCHASED FROM CAPITAL BUICK-PONTIAC-GMC 225-293-3500. DEALERSHIP HAS ADVISED THAT THEY DO NOT KNOW WHAT IS WRONG WITH THE CAR. WE HAVE BEEN TOLD THAT WE HAVE TO GO DIRECT TO PONTIAC WITH THE PROBLEM. HAVE BEEN IN CONTACT WITH PONTIAC SINCE 02/15/05. PONTIAC ADVISED THAT THEY WERE GOING TO RESEARCH THE PROBLEM AND SEE IF ANY OTHER GRAND PRI WAS REPORTING LIKE PROBLEMS. SO FAR THE ONLY ADVICE FROM PONTIAC IS THEY WANT US TO COME IN AND TAKE ANOTHER GRAND PRIX OFF THE LOT AND SEE IF WE CAN GET THIS CAR TO DUPLICATE THE SAME PROBLEM. THIS DID NOT IMPRESS ME AT ALL. SO AFTER WAITING FOR 2-1/2 MONTHS FOR PONTIAC TO DO SOMETHING TO FIX THE PROBLEM, I HAVE DECIDED TO REPORT THIS TO NHTSA. *AK *JS INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6) NHTSA ID Number: 10118501.

392. In May 2005, Old GM became aware of a complaint filed with NHTSA regarding a 2004 Chevrolet Malibu incident that occurred on July 18, 2004, in which it was reported that:

> THE CAR CUT OFF WHILE I WAS DRIVING AND IN HEAVY TRAFFIC MORE THAN ONCE. THERE WAS NO WARNING THAT THIS WOULD HAPPEN. THE CAR WAS SERVICED BEFORE FOR THIS PROBLEM BUT IT CONTINUED TO HAPPEN. I HAVE HAD 3 RECALLS, THE HORN FUSE HAS BEEN REPLACED TWICE, AND THE BLINKER IS CURRENTLY OUT. THE STEERING COLLAR HAS ALSO BEEN REPLACED. THIS CAR WAS SUPPOSED TO BE A NEW CAR. NHTSA ID Number: 10123684.

393. On June 2, 2005, Old GM became aware of a complaint with NHTSA regarding a 2004 Pontiac Grand Am incident that occurred on February 18, 2005, in which the following was reported:

> 2004 PONTIAC GRAND PRIX SHUTS DOWN WHILE DRIVING AND THE POWER STEERING AND BRAKING ABILITY ARE LOST.*MR *NM. NHTSA ID Number: 10124713.

394. On August 12, 2005, Old GM became aware of a complaint filed with NHTSA involving a 2003 Cadillac CTS, regarding an incident that occurred on January 3, 2005, in which it was reported that:

> DT: VEHICLE LOST POWER WHEN THE CONSUMER HIT THE BRAKES. THE TRANSMISSION JOLTS AND THEN THE ENGINE SHUTS OFF. IT HAS BEEN TO THE DEALER 6 TIMES SINCE JANUARY. THE DEALER TRIED SOMETHING DIFFERENT EVERY TIME SHE TOOK IT IN. MANUFACTURER SAID SHE COULD HAVE A NEW VEHICLE IF SHE PAID FOR IT. SHE WANTED TO GET RID OF THE VEHICLE.*AK THE CHECK ENGINE LIGHT ILLUMINATED. *JB NHTSA ID Number: 10127580.

395. On August 26, 2005, Old GM became aware of a complaint with NHTSA regarding a 2004 Pontiac Grand Am incident that occurred on August 26, 2005, in which the following was reported:

> WHILE DRIVING MY 2004 PONTIAC GRAND AM THE CAR FAILED AT 30 MPH. IT COMPLETELY SHUT OFF LEAVING ME WITH NO POWER STEERING AND NO WAY TO REGAIN CONTROL OF THE CAR UNTIL COMING TO A COMPLETE STOP TO RESTART IT. ONCE I HAD STOPPED IT DID RESTART WITHOUT INCIDENT. ONE WEEK LATER THE CAR FAILED TO START AT ALL NOT EVEN TURNING OVER. WHEN THE PROBLEM WAS DIAGNOSED AT THE GARAGE IT WAS FOUND TO BE A FAULTY "IGNITION CONTROL MODULE" IN THE CAR. AT THIS TIME THE PART WAS REPLACED ONLY TO FAIL AGAIN WITHIN 2 MONTHS TIME AGAIN WHILE I WAS DRIVING THIS TIME IN A MUCH MORE HAZARDOUS CONDITION BEING THAT I WAS ON THE HIGHWAY AND WAS TRAVELING AT 50 MPH AND HAD TO TRAVEL ACROSS TWO LANES OF TRAFFIC TO EVEN PULL OVER TO TRY TO RESTART IT. THE CAR CONTINUED TO START AND SHUT OFF ALL THE WAY TO THE SERVICE GARAGE WHERE IT WAS AGAIN FOUND TO BE A FAULTY "IGNITION CONTROL MODULE". IN ANOTHER TWO WEEKS TIME THE CAR FAILED TO START AND WHEN DIAGNOSED THIS TIME IT WAS SAID TO HAVE "ELECTRICAL PROBLEMS" POSSIBLE THE "POWER CONTROL MODULE". AT THIS TIME THE CAR IS STILL UNDRIVEABLE AND UNSAFE FOR TRAVEL. *JB NHTSA ID Number: 10134303.

396. On September 22, 2005, Old GM became aware of a complaint filed with NHTSA involving a 2005 Cadillac CTS, concerning an incident that occurred on September 16, 2005, in which the following was reported:

> DT: 2005 CADILLAC CTS – THE CALLER'S VEHICLE WAS INVOLVED IN AN ACCIDENT WHILE DRIVING AT 55 MPH. UPON IMPACT, AIR BAGS DID NOT DEPLOY. THE VEHICLE WENT OFF THE ROAD AND HIT A TREE. THIS WAS ON THE DRIVER'S SIDE FRONT. THERE WERE NO INDICATOR LIGHTS ON PRIOR TO THE ACCIDENT. THE VEHICLE HAS NOT BEEN INSPECTED BY THE DEALERSHIP, AND INSURANCE COMPANY TOTALED THE VEHICLE. THE CALLER SAW NO REASON FOR THE AIR BAGS NOT TO DEPLOY. . TWO INJURED WERE INJURED IN THIS CRASH. T A POLICE REPORT WAS TAKEN. THERE WAS NO FIRE. *AK NHTSA ID Number: 10137348.

397. On September 29, 2006, Old GM became aware of a complaint filed with NHTSA involving a 2004 Cadillac CTS and an incident that occurred on September 29, 2006, in which the following was reported:

> DT*: THE CONTACT STATED AT VARIOUS SPEEDS WITHOUT WARNING, THE VEHICLE LOST POWER AND WOULD NOT ACCELERATE ABOVE 20 MPH. ALSO, WITHOUT WARNING, THE VEHICLE STALLED ON SEVERAL OCCASIONS, AND WOULD NOT RESTART. THE VEHICLE WAS TOWED TO THE DEALERSHIP, WHO REPLACED THE THROTTLE TWICE AND THE THROTTLE BODY ASSEMBLY HARNESS, BUT THE PROBLEM PERSISTED. *AK UPDATED 10/25/2006 – *NM NHTSA ID Number: 10169594.

398. On April 18, 2007, Old GM became aware of a complaint filed with NHTSA involving a 2004 Cadillac SRX, regarding an incident that occurred on April 13, 2007, in which it was reported that:

> TL*THE CONTACT OWNS A 2004 CADILLAC SRX. THE ENGINE STALLED WITHOUT WARNING AND CAUSED ANOTHER VEHICLE TO CRASH INTO THE VEHICLE. THE VEHICLE WAS ABLE TO RESTART A FEW MINUTES

> AFTER THE CRASH. THE DEALER AND MANUFACTURER WAS UNABLE TO DIAGNOSE THE FAILURE. THE MANUFACTURER HAD THE VEHICLE INSPECTED BY A CADILLAC SPECIALIST WHO WAS UNABLE TO DIAGNOSE THE FAILURE. THE DEALER UPDATED THE COMPUTER FOUR TIMES, BUT THE ENGINE CONTINUED TO STALL. THE CURRENT AND FAILURE MILEAGES WERE 48,000. NHTSA ID Number: 10188245.

399. On September 20, 2007, Old GM became aware of a complaint filed with NHTSA involving a 2007 Cadillac CTS, in connection with an incident that occurred on January 1, 2007, in which it was reported that:

> TL*THE CONTACT OWNS A 2007 CADILLAC CTS. WHILE DRIVING 40 MPH, THE VEHICLE SHUT OFF WITHOUT WARNING. THE FAILURE OCCURRED ON FIVE SEPARATE OCCASIONS. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE. AS OF SEPTEMBER 20, 2007, THE DEALER HAD NOT REPAIRED THE VEHICLE. THE POWERTRAIN WAS UNKNOWN. THE FAILURE MILEAGE WAS 2,000 AND CURRENT MILEAGE WAS 11,998. NHTSA ID Number: 10203516.

400. On September 24, 2007, Old GM became aware of a complaint filed with NHTSA involving a 2004 Cadillac SRX, regarding an incident that occurred on January 1, 2005, in which the following was reported:

> TL*THE CONTACT OWNS A 2004 CADILLAC SRX. WHILE DRIVING 5 MPH OR GREATER, THE VEHICLE WOULD SHUT OFF WITHOUT WARNING. THE DEALER STATED THAT THE BATTERY CAUSED THE FAILURE AND THEY REPLACED THE BATTERY. APPROXIMATELY EIGHT MONTHS LATER, THE FAILURE RECURRED. THE DEALER STATED THAT THE BATTERY CAUSED THE FAILURE AND REPLACED IT A SECOND TIME. APPROXIMATELY THREE MONTHS LATER, THE FAILURE OCCURRED AGAIN. SHE WAS ABLE TO RESTART THE VEHICLE. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE, HOWEVER, THEY REPLACED THE CRANK SHAFT SENSOR. THE FAILURE CONTINUES TO PERSIST. AS OF SEPTEMBER 24, 2007, THE DEALER HAD NOT REPAIRED THE VEHICLE. THE POWERTRAIN WAS UNKNOWN. THE

> FAILURE MILEAGE WAS 8,000 AND CURRENT MILEAGE WAS 70,580. NHTSA ID Number: 10203943.

401. On June 18, 2008, Old GM became aware of a complaint filed with NHTSA involving a 2006 Cadillac CTS and an incident that occurred on June 17, 2008, in which it was reported that:

> TL*THE CONTACT OWNS A 2006 CADILLAC CTS. WHILE DRIVING 60 MPH AT NIGHT, THE VEHICLE SHUT OFF AND LOST TOTAL POWER. WHEN THE FAILURE OCCURRED, THE VEHICLE CONTINUED TO ROLL AS IF IT WERE IN NEUTRAL. THERE WERE NO WARNING INDICATORS PRIOR TO THE FAILURE. THE CONTACT FEELS THAT THIS IS A SAFETY HAZARD BECAUSE IT COULD HAVE RESULTED IN A SERIOUS CRASH. THE VEHICLE WAS TAKEN TO THE DEALER TWICE FOR REPAIR FOR THE SAME FAILURE IN FEBURARY OF 2008 AND JUNE 17, 2008. THE FIRST TIME THE CAUSE OF THE FAILURE WAS IDENTIFIED AS A GLITCH WITH THE COMPUTER SWITCH THAT CONTROLS THE TRANSMISSION. AT THE SECOND VISIT, THE SHOP EXPLAINED THAT THEY COULD NOT IDENTIFY THE FAILURE. IT WOULD HAVE TO RECUR IN ORDER FOR THEM TO DIAGNOSE THE FAILURE PROPERLY. THE CURRENT AND FAILURE MILEAGES WERE 43,000. NHTSA ID Number: 10231507.

402. On October 14, 2008, Old GM became aware of a complaint filed with NHTSA involving a 2008 Cadillac CTS and an incident that occurred on April 5, 2008, in which it was reported that:

> WHILE DRIVING MY 2008 CTS, WITH NO ADVANCE NOTICE, THE ENGINE JUST DIED. IT SEEMED TO RUN OUT OF GAS. MY FUEL GAUGE READ BETWEEN 1/2 TO 3/4 FULL. THIS HAPPENED 3 DIFFERENT OCCASIONS. ALL 3 TIMES I HAD TO HAVE IT TOWED BACK TO THE DEALERSHIP THAT I PURCHASED THE CAR FROM. ALL 3 TIMES I GOT DIFFERENT REASONS IT HAPPENED, FROM BAD FUEL PUMP IN GAS TANK, TO SOME TYPE OF BAD CONNECTION, ETC. AFTER THIS HAPPENED THE 3RD TIME, I DEMANDED A NEW CAR, WHICH I RECEIVED. I HAVE HAD NO PROBLEMS WITH THIS CTS, RUNS GREAT. *TR NHTSA ID Number: 10245423.

403. On November 13, 2008, Old GM became aware of a complaint with NHTSA regarding a 2001 Oldsmobile Intrigue, in which the following was reported:

> L*THE CONTACT OWNS A 2001 OLDSMOBILE INTRIGUE. WHILE DRIVING 35 MPH, THE VEHICLE CONTINUOUSLY STALLS AND HESITATES. IN ADDITION, THE INSTRUMENT PANEL INDICATORS WOULD ILLUMINATE AT RANDOM. THE VEHICLE FAILED INSPECTION AND THE CRANKSHAFT SENSOR WAS REPLACED, WHICH HELPED WITH THE STALLING AND HESITATION; HOWEVER, THE CHECK ENGINE INDICATOR WAS STILL ILLUMINATED. DAYS AFTER THE CRANKSHAFT SENSOR WAS REPLACED, THE VEHICLE FAILED TO START. HOWEVER, ALL OF THE INSTRUMENT PANEL INDICATORS FLASHED ON AND OFF. AFTER NUMEROUS ATTEMPTS TO START THE VEHICLE, HE HAD IT JUMPSTARTED. THE VEHICLE WAS THEN ABLE TO START. WHILE DRIVING HOME, ALL OF THE LIGHTING FLASHED AND THE VEHICLE SUDDENLY SHUT OFF. THE VEHICLE LOST ALL ELECTRICAL POWER AND POWER STEERING ABILITY. THE CONTACT MANAGED TO PARK THE VEHICLE IN A PARKING LOT AND HAD IT TOWED THE FOLLOWING DAY TO A REPAIR SHOP. THE VEHICLE IS CURRENTLY STILL IN THE SHOP. THE VEHICLE HAS BEEN RECALLED IN CANADA AND HE BELIEVES THAT IT SHOULD ALSO BE RECALLED IN THE UNITED STATES. THE FAILURE MILEAGE WAS UNKNOWN AND THE CURRENT MILEAGE WAS 106,000. NHTSA ID Number: 10248694.

404. On December 10, 2008, Old GM became aware of a complaint filed with NHTSA regarding a 2004 Oldsmobile Alero and an incident that occurred on December 10, 2008, in which the following was reported:

> I WAS DRIVING DOWN THE ROAD IN RUSH HOUR GOING APPROX. 55 MPH AND MY CAR COMPLETELY SHUT OFF, THE GAUGES SHUT DOWN, LOST POWER STEERING. HAD TO PULL OFF THE ROAD AS SAFELY AS POSSIBLE, PLACE VEHICLE IN PARK AND RESTART CAR. MY CAR HAS SHUT DOWN PREVIOUSLY TO THIS INCIDENT AND FEEL AS THOUGH IT NEEDS SERIOUS INVESTIGATION. I COULD HAVE BEEN ON THE HIGHWAY AND BEEN KILLED. THIS ALSO HAS HAPPENED WHEN IN A SPIN

> OUT AS WELL THOUGH THIS PARTICULAR INCIDENT WAS RANDOM. *TR NHTSA ID Number: 10251280.

405. On March 31, 2009, Old GM became aware a complaint filed with NHTSA regarding a 2005 Chevrolet Malibu incident that occurred on May 30, 2008, in which it was reported that:

> TL*THE CONTACT OWNS A 2005 CHEVROLET MALIBU. THE CONTACT STATED THAT THE POWER WINDOWS, LOCKS, LINKAGES, AND IGNITION SWITCH SPORADICALLY BECOME INOPERATIVE. SHE TOOK THE VEHICLE TO THE DEALER AND THEY REPLACED THE IGNITION SWITCH AT THE COST OF $495. THE MANUFACTURER STATED THAT THEY WOULD NOT ASSUME RESPONSIBILITY FOR ANY REPAIRS BECAUSE THE VEHICLE EXCEEDED ITS MILEAGE. ALL REMEDIES AS OF MARCH 31, 2009 HAVE BEEN INSUFFICIENT IN CORRECTING THE FAILURES. THE FAILURE MILEAGE WAS 45,000 AND CURRENT MILEAGE WAS 51,000. NHTSA ID Number: 10263716.

406. The defects did not get any safer and the reports did not stop when Old GM ceased to exist. To the contrary, New GM continued receiving the same reports involving the same defects. For example, on August 11, 2010, New GM became aware of the following complaint filed with NHTSA involving a 2005 Cadillac CTS, the incident occurred on May 15, 2010, in which it was reported:

> TL*THE CONTACT OWNS A 2005 CADILLAC CTS. WHILE DRIVING 40 MPH, ALL OF THE SAFETY LIGHTS ON THE DASHBOARD ILLUMINATED WHEN THE VEHICLE STALLED. THE VEHICLE WAS TURNED BACK ON IT BEGAN TO FUNCTION NORMALLY. THE FAILURE OCCURRED TWICE. THE DEALER WAS CONTACTED AND THEY STATED THAT SHE NEEDED TO BRING IT IN TO HAVE IT DIAGNOSED AGAIN. THE DEALER PREVIOUSLY STATED THAT THEY WERE UNABLE TO DUPLICATE THE FAILURE. THE VEHICLE WAS NOT REPAIRED. THE FAILURE MILEAGE WAS 4100 AND THE CURRENT MILEAGE WAS 58,000. NHTSA ID Number: 10348743.

407. On April 16, 2012, New GM became aware of a complaint filed with NHTSA involving a 2005 Cadillac SRX and an incident that occurred on March 31, 2012, in which the following was reported:

> TL* THE CONTACT OWNS A 2005 CADILLAC SRX. WHILE DRIVING APPROXIMATELY 45 MPH, THE CONTACT STATED THAT THE STEERING BECAME DIFFICULT TO MANEUVER AND HE LOST CONTROL OF THE VEHICLE. THERE WERE NO WARNING LIGHTS ILLUMINATED ON THE INSTRUMENT PANEL. THE CONTACT THEN CRASHED INTO A HIGHWAY DIVIDER AND INTO ANOTHER VEHICLE. THERE WERE NO INJURIES. THE VEHICLE WAS TOWED TO AN AUTO CENTER AND THE MECHANIC STATED THAT THERE WAS A RECALL UNDER NHTSA CAMPAIGN ID NUMBER 06V125000 (SUSPENSION:REAR), THAT MAY BE RELATED TO THE FAILURE. THE MANUFACTURER WAS MADE AWARE OF THE FAILURE AND STATED THAT THE VIN WAS NOT INCLUDED IN THE RECALL. THE VEHICLE WAS NOT REPAIRED. THE APPROXIMATE FAILURE MILEAGE WAS 46,000. NHTSA ID Number: 10455394.

408. On March 20, 2013, New GM became aware of a complaint filed with NHTSA regarding a 2003 Chevrolet Impala incident that occurred on March 1, 2013, in which it was reported that:

> CAR WILL SHUT DOWN WHILE DRIVING AND SECURITY LIGHT WILL FLASH. HAS DONE IT NUMEROUS TIMES, WORRIED IT WILL CAUSE AN ACCIDENT. THERE ARE MULTIPLE CASES OF THIS PROBLEM ON INTERNET. *TR NHTSA ID Number: 10503840.

409. On May 12, 2013, New GM became aware of the following complaint filed with NHTSA regarding a 2005 Chevrolet Malibu incident that occurred on May 11, 2012, in which the following was reported:

> I WAS AT A STOP SIGN WENT TO PRESS GAS PEDAL TO TURN ONTO ROAD AND THE CAR JUST SHUT OFF NO WARNING LIGHTS CAME ON NOR DID IT SHOW ANY CODES. GOT OUT OF CAR POPPED TRUNK PULLED RELAY FUSE OUT PUT IT BACK IN AND IT CRANKED

> UP,THEN ON MY WAY HOME FROM WORK,GOING ABOUT 25 MPH AND IT JUST SHUT DOWN AGAIN,I REPEATED PULLING OUT RELAY FUSE AND PUT IT BACK IN THEN WAITED A MINUTE THEN IT CRANKED AND I DROVE STRAIGHT HOME. *TR NHTSA ID Number: 10458198.

410. On February 26, 2014, New GM became aware of a complaint filed with NHTSA involving a 2004 Pontiac Grand Prix, concerning an incident that occurred on May 10, 2005, in which it was reported that:

> TL – THE CONTACT OWNS A 2004 PONTIAC GRAND PRIX. THE CONTACT STATED THAT WHILE DRIVING AT VARIOUS SPEEDS AND GOING OVER A BUMP, THE VEHICLE WOULD STALL WITHOUT WARNING. THE VEHICLE WAS TAKEN TO THE DEALER. THE TECHNICIAN WAS UNABLE TO DIAGNOSE THE FAILURE. THE MANUFACTURER WAS MADE AWARE OF THE FAILURE. THE VEHICLE WAS NOT REPAIRED. THE VIN WAS NOT AVAILABLE. THE FAILURE MILEAGE WAS 12,000 AND THE CURRENT MILEAGE WAS 82,000. KMJ NHTSA ID Number: 10566118.

411. On March 13, 2014, New GM became aware of a complaint filed with NHTSA involving a 2006 Pontiac Grand Prix and an incident that occurred on February 27, 2014, in which a driver reported:

> I WAS DRIVING HOME FROM WORK AND WHEN I TURNED A CORNER, THE ENGINE CUT OUT. I BELIEVE IT WAS FROM THE KEY FLIPPING TO ACCESSORY. I'VE HEARD THAT THIS HAS CAUSED CRASHES THAT HAVE KILLED PEOPLE AND WOULD LIKE THIS FIXED. THIS IS THE FIRST TIME IT HAPPENED, BUT NOW I'M WORRIED EVERY TIME I DRIVE IT THAT THIS IS GOING TO HAPPEN AND I DON'T FEEL SAFE LETTING MY WIFE DRIVE THE CAR NOW. WHY ARE THE 2006 PONTIAC GRAND PRIX VEHICLES NOT PART OF THE RECALL FROM GM? *TR NHTSA ID Number: 10569215.

412. On April 1, 2014, New GM became aware of a complaint filed with NHTSA involving a 2003 Cadillac CTS and an incident that occurred on January 1, 2008, in which the following was reported:

> TL* THE CONTACT OWNS A 2003 CADILLAC CTS. THE CONTACT STATED THAT THE VEHICLE EXHIBITED A RECURRING STALLING FAILURE. THE VEHICLE WAS TAKEN TO THE DEALER NUMEROUS TIMES WHERE SEVERAL UNKNOWN REPAIRS WERE PERFORMED ON THE VEHICLE BUT TO NO AVAIL. THE FAILURE MILEAGE WAS 59,730 AND THE CURRENT MILEAGE WAS 79,000. UPDATED 06/30/14 MA UPDATED 07/3/2014 *JS NHTSA ID Number: 10576468.

413. On April 1, 2014, New GM became aware of a complaint with NHTSA regarding a 2003 Chevrolet Monte Carlo and an incident that occurred on September 16, 2013, in which the following was reported:

> WHILE DRIVING AT ANY SPEED THE IGNITION SYSTEM WOULD RESET LIGHTING UP THE DISPLAY CLUSTER JUST AS IF THE KEY WAS TURNED OFF AND BACK ON. THIS WOULD CAUSE A MOMENTARY SHUTDOWN OF THE ENGINE. THE PROBLEM SEEMED TO BE MORE PREVAILANT WHILE TURNING THE WHEEL FOR A CURVE OR TURN OFF THE ROAD. THE TURN SIGNAL UNIT WAS FIRST SUSPECT SINCE IT SEEMED TO CORRELATE WITH APPLYING THE TURN SIGNAL AND TURNING THE WHEEL. THE CONDITION WORSENED TO THE IGNITION SHUTDOWN FOR LONGER PERIODS SHUTTING DOWN THE ENGINE CAUSING STEERING AND BRAKING TO BE SHUT DOWN AND FINALLY DIFFICULTY STARTING THE CAR. AFTER 2 VISITS TO A GM SERVICE CENTER THE PROBLEM WAS FOUND TO BE A FAULTY IGNITION THAT WAS REPLACED AND THE PROBLEM HAS NOT RECURRED. NHTSA ID Number: 10576201.

414. On April 8, 2014, New GM became aware of a complaint with NHTSA regarding a 2003 Chevrolet Impala and an incident that occurred on August 14, 2011 and the following was reported:

> I HAVE HAD INCIDENTS SEVERAL TIMES OVER THE YEARS WHERE I WOULD HIT A BUMP IN THE ROAD AND MY CAR WOULD COMPLETLY SHUT OFF. I HAVE ALSO HAD SEVERAL INCIDENTS WHERE I WAS TRAVELING DOWN THE EXPRESSWAY AND MY CAR TURNED OFF ON ME. I HAD TO SHIFT MY CAR INTO NEUTRAL AND RESTART IT TO CONTINUE GOING. I WAS FORTUNATE NOT TO HAVE AN ACCIDENT. NHTSA ID Number: 10578158.

415. On May 14, 2014, New GM became aware of a complaint filed with NHTSA regarding a 2004 Chevrolet Impala incident that occurred on April 5, 2013 and was reported that:

> CHEVY IMPALA 2004 LS- THE VEHICLE IS STOPPING COMPLETELY WHILE DRIVING OR SITTING AT INTERSECTION. THERE IS NO WARNING, NO MESSAGE, IT JUST DIES. THE STEERING GOES WHEN THIS HAPPENS SO I CANNOT EVEN GET OFF THE ROAD. THEN THERE ARE TIMES THAT THE CAR WILL NOT START AT ALL AND I HAVE BEEN STRANDED. EVENTUALLY AFTER ABOUT 20 MINUTES THE CAR WILL START- I HAVE ALREADY REPLACED THE STARTER BUT THE PROBLEM STILL EXISTS. I HAVE HAD THE CAR CHECKED OUT AT 2 DIFFERENT SHOPS (FIRESTONE) AND THEY CANNOT FIND THE PROBLEM. THERE ARE NO CODES COMING UP. THEY ARE COMPLETELY PERPLEXED. CHEVY STATES THEIR MECHANICS ARE BETTER. ALSO THE CLUSTER PANEL IS GONE AND CHEVY IS AWARE OF THE PROBLEM BUT THEY ONLY RECALLED CERTAIN MODELS AND DID NOT INCLUDE THE IMPALAS. I HAVE 2 ESTIMATES REGARDING FIXING THIS PROBLEM BUT THE QUOTES ARE $500.00. I DO NOT FEEL THAT I SHOULD HAVE TO PAY FOR THIS WHEN CHEVY KNEW THEY HAD THIS PROBLEM WITH CLUSTER PANELS AND OMITTED THE IMPALAS IN THEIR RECALL. SO, TO RECAP: THE CAR DIES IN TRAFFIC (ALMOST HIT TWICE), I DO NOT KNOW HOW MUCH GAS I HAVE, HOW FAST I AM GOING, OR IF THE CAR IS OVERHEATING. IN DEALING WITH CHEVY I WAS TOLD TO TAKE THE CAR TO A CHEVY DEALERSHIP. THEY GAVE ME A PLACE THAT IS 2 1/2 HOURS HOUSE AWAY FROM MY HOME. I WAS ALSO TOLD THAT I WOULD HAVE THE HONOR OF PAYING FOR THE DIAGNOSTICS. IN RESEARCHING THIS PROBLEM, I HAVE PULLED UP SEVERAL COMPLAINTS FROM OTHER CHEVY IMPALA 2004 OWNERS THAT ARE EXPERIENCING THE SAME MULTIPLE PROBLEMS. I ALSO

> NOTICED THAT MOST OF THE COMPLAINTS ARE STATING THAT THE SAME ISSUES OCCURRED AT APPROX. THE SAME MILEAGE AS MINE. I HAVE DISCUSSED THIS WITH CHEVY CUSTOMER SERVICE AND BASICALLY THAT WAS IGNORED. THIS CAR IS HAZARDOUS TO DRIVE AND POTENTIALLY WILL CAUSE BODILY HARM. DEALING WITH CHEVY IS POINTLESS. ALL THEY CAN THINK OF IS HOW MUCH MONEY THEIR DEFECTS WILL BRING IN. *TR NHTSA ID Number: 10512006.

416. New GM has publicly admitted that it was aware of at least seven (7) crashes, eight (8) injuries, and three (3) deaths linked to this serious safety defect before deciding to finally implement a recall. However, in reality, the number of reports and complaints is much higher.

417. Moreover, notwithstanding years of notice and knowledge of the defect, on top of numerous complaints and reports from consumers, including reports of crashes, injuries, and deaths, New GM delayed and did not implement a recall involving this defect until July of 2014.

418. New GM replicated the "knee to key" report in 2012 causing inadvertent key rotation and a running stall. New GM recalled all of the CTS and SRX and gave out new keys to those that did not have "hole" keys, and two key rings so the fob could be kept on one, and the ignition key on another. New GM's supposed recall fix does not address the defect or the safety risks that it poses, including insufficient amount of torque to resist rotation from the "run" to "accessory" position under reasonably foreseeable conditions, and puts the burden on drivers to alter their behavior and carry their ignition keys separately from their other keys, and even from their remote fob. The real answer must include the replacement of all the switches with ones that have sufficient torque to resist foreseeable rotational forces. The consequences of an unwanted rotation from the "run" to "accessory" position are the same in all these cars: loss of power

(stalling), loss of power steering, loss of power brakes after one or two depressions of the brake pedal, and suppression of seat belt pretensioners and airbag deployments.

419. In addition, New GM is not addressing the other design issues that create safety risks in connection with this defect. New GM is not altering the algorithm that prevents the airbags from deploying when the ignition leaves the "run" position, even when the vehicle is moving. And New GM is not altering the placement of the ignition in an area where the driver's knees may inadvertently cause the ignition to move out of the "run" position. Moreover, notwithstanding years of notice and knowledge of the defect, on top of numerous complaints and reports from consumers, including reports of crashes, injuries, and deaths, New GM delayed and did not implement a recall involving this defect until July of 2014.

6. Yet another ignition switch recall is made on September 4, 2014.

420. On September 4, 2014, New GM recalled 46,873 MY 2011-2013 Chevrolet Caprice and 2008-2009 Pontiac G8 vehicles for yet another ignition switch defect (NHTSA Recall Number 14-V-510).

421. New GM explains that, in these Defective Ignition Switch Vehicles, "there is a risk, under certain conditions, that some drivers may bump the ignition key with their knee and unintentionally move the key away from the 'run' position." New GM admits that, when this happens, "engine power, and power braking will be affected, increasing the risk of a crash." Moreover, "[t]he timing of the key movement out of the 'run' position, relative to the activation of the sending algorithm of the crash event, may result in the airbags not deploying, increasing the potential for occupant injury in certain kinds of crashes."[64]

[64] New GM's Part 573 Safety Recall Report, Sept. 4, 2014.

422. This recall is directly related to the other ignition switch recalls and involves the same safety risks and dangers. The defect poses a serious and dangerous safety risk because the key in the ignition switch can rotate and consequently cause the ignition to switch from the "on" or "run" position to the "off" or "accessory" position, which causes the loss of engine power, stalling, loss of speed control, loss of power steering, loss of power braking, and increases the risk of a crash. Moreover, as with the ignition switch torque defect, if a crash occurs, the airbags may not deploy.

423. According to New GM, in late June 2014, "GM Holden began investigating potential operator knee-to-key interference in Holden-produced vehicles consistent with Safety's learning from" earlier ignition switch recalls, NHTSA recall nos. 14V-346 and 14V-355.[65]

424. New GM "analyzed vehicle test results, warranty data, TREAD data, NHTSA Vehicle Owner Questionnaires, and other data."[66] This belated review, concerning vehicles that were sold as long as six years earlier, led to the August 27, 2014 decision to conduct a safety recall.[67]

425. Once again, a review of NHTSA's website shows that New GM was long on notice of ignition switch issues in the vehicles subject to the September 4 recall.

426. For example, on February 10, 2010, New GM became aware of an incident involving a 2009 Pontiac G8 that occurred on November 23, 2009, and again on January 26, 2010, in which the following was reported to NHTSA:

> FIRST OCCURRED ON 11/23/2009. ON THE INTERSTATE IT LOSES ALL POWER, ENGINE SHUTS DOWN, IGNITION STOPS, POWER STEERING STOPS, BRAKES FAIL - COMPLETE VEHICLE STOPPAGE AND FULL OPERATING

[65] *Id.*

[66] *Id.*

[67] *Id.*

> SYSTEMS SHUT DOWN WITHOUT WARNING AT 70 MPH, TWICE! SECOND OCCURRENCE WAS 1/26/2010.

8. On May 22, 2013, New GM became aware of an incident involving a 2008 Pontiac G8 that occurred on May 18, 2013, in which the following was reported:

> THE CONTACT OWNS A 2008 PONTIAC G8. THE CONTACT STATED THAT WHILE DRIVING 50 MPH, THE VEHICLE STALLED WITHOUT WARNING. THE FAILURE RECURRED TWICE. THE VEHICLE WAS TOWED TO THE DEALER FOR DIAGNOSIS, BUT THE DEALER WAS UNABLE TO DUPLICATE THE PROBLEM. THE VEHICLE WAS NOT REPAIRED. THE MANUFACTURER WAS NOT NOTIFIED. THE APPROXIMATE FAILURE MILEAGE WAS 60,000.

427. Consistent with its pattern in the June and July recalls, New GM's proposed remedy is to provide these Defective Ignition Switch Vehicle owners with a "revised key blade and housing assembly, in which the blade has been indexed by 90 degrees."[68] Until the remedy is provided, New GM asserts, "it is very important that drivers adjust their seat and steering column to allow clearance between their knee and the ignition key."[69] New GM sent its recall notice to NHTSA one week later, on September 4, 2014.

428. New GM's supposed fix does not address the defect or the safety risks that the defect poses, including the apparent insufficient torque to resist rotation from the "run" to the "accessory" position under reasonably foreseeable driving conditions, and puts the burden on drivers to alter their behavior and carry their ignition keys separately from their other keys, and even from their remote fob. The real answer must include the replacement of all the switches with ones that have sufficient torque to resist foreseeable rotational forces.

429. In addition, New GM is not addressing the other design issues that create safety risks in connection with this defect. New GM is not altering the algorithm that prevents the

[68] New GM's Part 573 Safety Recall Report, Sept. 4, 2014.

[69] *Id.*

airbags from deploying when the ignition leaves the "run" position, even when the vehicle is moving. And New GM is not altering the placement of the ignition in an area where the driver's knee may inadvertently cause the ignition to move out of the "run" position.

430. The September 4 recall is, like the earlier defective ignition switch recalls, too little and too late.

7. The ignition switch recalls are inadequate and poorly conducted.

431. New GM sent its first recall notices to the owners of vehicles with defective ignition switches in late February and early March of 2014. New GM's recall letter minimized the risk of the ignition switch defect, indicating that ignition problems would occur only "under certain circumstances." New GM's recall notification emphasized that the risk of power failure increased if the "key ring is carrying added weight . . . or your vehicle experiences rough road conditions."

432. To repair the Defective Ignition Switch Vehicles, New GM is replacing the defective ignition switch with a new, presumably improved, ignition switch. At the time it announced the recall of these Defective Ignition Switch Vehicles, however, New GM did not have replacement switches ready. New GM CEO Mary Barra told Congress that New GM would start replacing ignition switches beginning in April of 2014.

433. New GM later revised its timeline, notifying NHTSA that all replacement switches would be ready by October 4, 2014.

434. New GM's repair of the defective switches has proceeded painfully slowly. As of August 5, 2014, New GM had repaired only 683,196 of the 2.1 million Defective Ignition Switch Vehicles.

435. On September 8, 2014, Ms. Barra told CNBC radio that the repair process was "substantially complete." Nonetheless, at that time, New GM had repaired only 1 million vehicles.

436. Meanwhile, dealerships across the country have struggled to implement New GM's repair process. One dealership in Kalamazoo, Michigan, hired a "recall concierge" simply to deal with the myriad issues raised by the recall repair process.

437. Although New GM has touted to courts around the country that it is offering to provide any concerned driver with a temporary loaner vehicle while he or she awaits a replacement part (for some over five months and counting), GM's recall letter failed to inform vehicle owners whether temporary loaner vehicles would be made available while they awaited replacement parts. The letter also provided no time frame in which repairs would be completed.

438. To add insult to injury, the New GM recall is fraught with problems for consumers. Many consumers are unable to obtain a loaner vehicle despite New GM's promise to provide them with one pending repair. When individuals have been fortunate enough to obtain a loaner, they often experience problems associated with the loaner program. Even worse, many consumers continue to experience safety problems with the Defective Ignition Switch Vehicles, even after the ignition switch has been replaced pursuant to the recall.

a. New GM failed to alert drivers of recalled vehicles to the possibility of obtaining a loaner vehicle, and when consumers are aware, they often find that loaner vehicles are not available.

439. One common problem consumers have faced and continue to face is the difficulty, if not impossibility, of obtaining a rental or loaner vehicle while awaiting the replacement part for their Defective Ignition Switch Vehicle pursuant to the recall. Yet since it announced the recall, New GM has represented to the government and courts across the country

that it is offering consumers temporary loaner vehicles, free of charge, while those consumers wait for their Defective Ignition Switch Vehicle to be repaired.

440. New GM did not make this information easily accessible for consumers. Shortly after the recall was announced, for example, New GM published a website at gmignitionupdate.com. The front page of that website does not inform consumers that they are eligible to obtain a temporary replacement vehicle.

441. Indeed, consumers must click on the Frequently Asked Questions page to learn about New GM's offer. Even there, the information is not included in a section entitled, "What will GM do?" Neither is it included in a section entitled, "What should you do if you have an affected vehicle?"

442. To learn that New GM is offering temporary loaner vehicles, a class member must click on a section under the heading, "Parts Availability & Repair Timing." A subsection entitled, "Who is eligible for a rental vehicle?" states that "[a]ny affected customer who is concerned about operating their vehicle may request courtesy transportation. Dealership service management is empowered to place the customer into a rental or loaner vehicle until parts are available to repair the customer's vehicle."

443. Numerous owners and/or lessees of Defective Ignition Switch Vehicles were unaware that New GM was offering temporary loaner vehicles. As a result, many class members driving one of the Defective Ignition Switch Vehicles and who are rightfully fearful of continuing to drive their vehicles in light of the now-disclosed safety defect are denied an alternate vehicle pre-repair. They either are forced to drive their unsafe Defective Ignition Switch Vehicles out of necessity, and fear every time they sit behind the wheel they could be involved in an accident that will injure them or an innocent bystander, or to park their vehicles

while awaiting the replacement part for their vehicles and seek alternative means of transportation.

444. Upon information and belief, New GM also did not widely distribute its temporary loaner vehicle guarantee to dealerships across the country. Many dealerships do not know and have not been informed about New GM's promise to provide rental/loaner vehicles to owners of vehicles awaiting the ignition switch replacement part.

445. Further, licensed New GM dealerships aware of the loaner program quickly exhausted their supply of loaner vehicles early into the recall. Numerous dealerships then refused interested consumers. Because New GM's ignition repair website only states that "[d]ealership service management" is empowered to provide a temporary loaner vehicle, many such class members reasonably believed that their sole avenue for relief was foreclosed when their dealership refused.

446. Even where class members have inquired directly with New GM for provision of a temporary loaner vehicle, numerous Class members have been refused.

447. Such refusals not only violate New GM's representations but also cause Class members substantial inconvenience and expense, such as:

a. Class members who cannot perform their jobs because they are denied a loaner/rental, despite repeated requests to both the dealership and the New GM hotline; and

b. Class members who are denied a rental/loaner vehicle because they have only property loss or property damage insurance coverage on their Defective Ignition Switch Vehicle rather than full coverage.

448. Further, even when a loaner vehicle is provided, consumers experience varied and numerous problems with the program. Among the problems encountered:

a. Class members incur substantially increased gasoline expenses with their loaner vehicles because the loaner is far less fuel efficient than the Defective Ignition Switch Vehicle;

b. Class members incur substantially increased monthly insurance premium—up to hundreds more per month—than they pay for their Defective Ignition Switch Vehicle because the loaner vehicle is newer and more expensive; and

c. Class members are threatened with charges for the loaner vehicle if they do not pick up their Defective Ignition Switch Vehicle immediately when it is repaired. Class members have experienced these threats even when their Defective Ignition Switch Vehicle sat idle for months at a dealership awaiting repair and the dealership provided no notice that it would repair the vehicle until the repair was complete.

b. The repair is inadequate and/or results in new vehicle defects.

449. Yet another common problem with the recall that plaintiffs are experiencing is the replacement part is not remedying the safety defect. Numerous class members report repeated stalls and shut downs ***after*** their vehicles are purportedly repaired pursuant to the recall. Indeed, the most common complaint is that the vehicle continues to have unintended stalls while driving, the very safety defect the recall is intended to correct. What is more, dealerships and New GM have been known to accuse vehicle owners who report stalls and shut downs following their ignition switch being replaced of lying.

450. Yet from its inception, New GM has known that simply replacing the ignition switches on the Defective Ignition Switch Vehicles is not a solution to the potential for the key to inadvertently turn from the "run" to the "accessory/off" position in these vehicles. The necessary modifications New GM is undertaking with respect to the Defective Ignition Switch

Vehicles' ignition switches and keys are insufficient to make the Defective Ignition Switch Vehicles safe or to restore their value.

451. New GM's recall fails to address the design defect that causes the key fob/chain to hang too low on the steering column. During testing of the Defective Ignition Switch Vehicles, Old GM and New GM engineers repeatedly observed that the Defective Ignition Switch Vehicle's ignition switch could be moved to the "accessory/off" position when a driver touched the ignition key with his or her knee during ordinary and foreseeable driving conditions. New GM's recall repairs fail to address such occurrences. New GM's recall is thus inadequate to remedy the defective product.

452. Further, New GM's recall fails to address the defective airbag system, which disables the airbag immediately when the engine shuts off. The loss of airbags is a serious safety condition, especially because it can happen when the Defective Ignition Switch Vehicle is traveling at highway speeds.

453. Following replacement of the ignition switch pursuant to the recall, problems occurring with the Defective Ignition Switch Vehicles include, but are not limited to: (i) stalls and shut down on roads and highways; (ii) the ignition key does not fully turn to the "off" position and, instead, becomes stuck in the "accessory" position; (iii) the ignition key cannot be removed when the engine is off; (iv) power steering fails; and (v) cars are returned following replacement of the ignition switch with new parts in non-working order that were in working order prior to the "repair," such as airbag light remaining on, horn not working, broken door locking mechanism, and locking steering wheel.

454. Among the specific problems experienced in connection with the recall are:

a. Accidents in Defective Ignition Switch Vehicles as a result of unintended shut downs or stalls, ***after*** the ignition switch has been replaced pursuant to the recall;

b. Class members have been threatened with charges for leaving Defective Ignition Switch Vehicles at the dealership once the replacement part is installed pursuant to the recall, even in circumstances where the Defective Ignition Switch Vehicle has been at the dealership for months awaiting the repair and the dealership did not provide timely notice of the repair's completion;

c. Class members have been charged the costs of a replacement battery when their Defective Ignition Switch Vehicle's battery dies on the dealership lot while waiting for months for the ignition switch replacement parts;

d. Class members' Defective Ignition Switch Vehicles, following replacement of the ignition switch pursuant to the recall, often are returned without the ability to turn the ignition key to the "off" position and, instead, the key becomes stuck in the "accessory" position, and/or the driver is unable to remove the key at all; and

e. When Defective Ignition Switch Vehicles are returned after months of storage at the dealership (pursuant to New GM's instruction to the dealerships to store the vehicles while they await repair), new damages have appeared on the vehicle and/or additional mileage has appeared on the odometer.

c. The recall is untimely.

455. At the time it announced the first ignition switch recalls, New GM acknowledged that it was not prepared to begin replacing defective ignition switches with presumably non-defective switches.

456. New GM informed NHTSA that it would complete 100% of the ignition switch replacements on or before October 4, 2014. New GM has not met that deadline.

457. The recall is delayed even further because even the replacement ignition switches are sometimes defective. Various news outlets have reported on New GM's delivery of faulty replacement switches. The DETROIT NEWS reported on July 9, 2014, that New GM notified dealerships that it had delivered 542 ignition switch kits with faulty tabs. Those switches, some of which were delivered to a dealership in New York, were sent back to New GM.

458. The recall causes continuing problems to the class members, including:

a. Class members must wait months for Defective Ignition Switch Vehicles to be repaired and, while the Defective Ignition Switch Vehicle sits on the dealership's lot, the Vehicle's registration expires;

b. Class members have experienced unintended stalls and power failures in Defective Ignition Switch Vehicles while they await repair of their vehicle and were refused a loaner vehicle in the interim, or did not know loaner vehicles were available;

c. Class members have been involved in accidents when they experienced an unintended stall in the Defective Ignition Switch Vehicle while waiting for replacement parts and repair; and

d. Class members who have only their Defective Ignition Switch Vehicle face daily inconveniences and additional expenses to obtain alternate transportation, but refuse to drive their Defective Ignition Switch Vehicle.

459. These delays have real and significant consequences for members of the Class. As one illustrative example of the worst, yet entirely foreseeable, outcome of this common problem known to New GM, on September 27, 2014, the NEW YORK TIMES reported that Laura Gass, a 27-year-old owner of a 2006 Saturn Ion, was killed just days after she received her recall notice. That notice informed her that replacement parts were not yet

available. The notice also did not inform Ms. Gass that she was eligible to obtain a loaner vehicle should she not wish to drive her defective Saturn. Ms. Gass needed transportation, and was unaware that New GM was prepared to provide temporary transportation to replace her defective automobile. As a result, she continued to drive her defective Ion, a turn of events that had disastrous consequences. On March 18, 2014, the ignition switch in Ms. Gass's Saturn slipped to the "accessory" or "off" position, the power to the vehicle failed, and she was unable to control the vehicle as it collided with a truck on the interstate. Ms. Gass was killed, but the tragedy should have been prevented.

d. The repair of the other ignition switch defects.

460. The repair of the vehicles recalled for ignition switch-related problems in June and July 2014—the Camaro recall, the ignition key slot recall, and the unintended key rotation recall—is also proceeding in a problematic fashion.

461. Owners of these vehicles—more than 10 million—have been notified that their vehicle is defective, but no replacement parts are available. New GM has not provided a timeline within which it will repair these vehicles.

462. Further, because New GM claims that the defect afflicting these vehicles is distinct from the ignition switch defect affecting the 2.1 million vehicles in its initial recall of Defective Ignition Switch Vehicles, it has offered owners significantly less safe alternatives. New GM has not offered loaner vehicles to owners of these ten million vehicles. It has simply advised them to remove everything from the key chain.

463. Of course, the recall notice for each of these 10 million vehicles notes the possibility that the vehicle may experience a moving stall and/or power failure by traveling across a bumpy roadway or when a driver's knee inadvertently contacts the ignition key.

464. What is more, New GM's proposed repair of these vehicles is wholly inadequate. New GM will modify the ignition key for all the affected vehicles so that the key is less susceptible to movement. New GM's proposed remedy, however, does nothing to prevent one from impacting the ignition key with one's knee during ordinary and foreseeable driving conditions. It does nothing to ensure that the airbag system is not disabled if and when the ignition switch moves into the "accessory" or "off" position. And it does not address the fact that many of the affected vehicles contain ignition switches with inadequate "detent plungers."

465. New GM's proposed repairs are an attempt to rid itself of safety problems on the cheap. Indeed, New GM is not offering temporary rental vehicles to those affected customers driving the vehicles recalled in June and early July. Nor will GM reimburse owners for any previous repairs aimed at preventing inadvertent power failure in these subject vehicles.

466. According to New GM spokesperson Alan Adler, and despite the fact that the June and July recalls are aimed at safety problems that are substantially similar, if not identical, to those present in the February and March ignition switch recalls, the recall of more than 10 million vehicles in June and July was to remedy "key issues," not because the vehicles contain bad ignition switches.

467. This statement is belied by the facts on the ground. Many Class members have experienced power failures and engine stalls, and many individuals have been in accidents attributable to such failures. Court supervision and involvement is required in order to force New GM to provide its customers with a repair that will truly make the Defective Ignition Switch Vehicles safe for ordinary and foreseeable driving conditions.

G. Other Safety and Important Defects Affecting Numerous GM-branded Vehicles

468. As if the plethora of recalls for ignition switch defects was not enough to taint New GM's brand and put the lie to New GM's repeated statements that it values safety and

reliability above all else, New GM has been forced to issue scores of other recalls this year involving myriad serious safety defects in a wide range of GM-branded vehicles—many of which defects were known to New GM for years.

469. Moreover, New GM's ongoing and systemic devaluation of safety issues has given rise to a host of new Defective Ignition Switch Vehicles created by New GM.

470. Many (but by no means all) of the serious defects revealed in New GM's never-ending series of recalls are discussed below.

1. Other safety defects affecting the ignition in GM-branded vehicles.

a. Ignition lock cylinder defect in vehicles also affected by the ignition switch defect that gave rise to the first recall of 2.1 million defective ignition switch vehicles.

471. On April 9, 2014, New GM recalled 2,191,014 GM-branded vehicles with faulty ignition lock cylinders.[70] Though the vehicles are the same as those affected by the ignition switch torque defect,[71] the lock cylinder defect is distinct.

472. In these vehicles, faulty ignition lock cylinders can allow removal of the ignition key while the engine is not in the "off" position. If the ignition key is removed when the ignition is not in the "off" position, unintended vehicle motion may occur. That could cause a crash and injury to the vehicle's occupants or pedestrians. Some of the vehicles with faulty ignition lock cylinders may fail to conform to Federal Motor Vehicle Safety Standard number 114, "*Theft Prevention and Rollaway Prevention*."[72]

473. According to New GM's Chronology that it submitted to NHTSA on April 23, 2014, the ignition lock cylinder defect arose out of New GM's notorious recalls for defective

[70] New GM Letter to NHTSA dated April 9, 2014.

[71] Namely, MY 2005-2010 Chevrolet Cobalts, 2006-2011 Chevrolet HHRs, 2007-2010 Pontiac G5s, 2003-2007 Saturn Ions, and 2007-2010 Saturn Skys. *See id.*

[72] New GM Notice to NHTSA dated April 9, 2014, at 1.

ignition switch systems in the Chevrolet Cobalt, Chevrolet HHR, Pontiac G5, Pontiac Solstice, Saturn ION, and Saturn Sky vehicles. Those three recalls occurred in February and March of 2014.[73]

474. In late February or March 2014, New GM personnel participating in the ignition switch recalls observed that the keys could sometimes be removed from the ignition cylinders when the ignition was not in the "off" position. This led to further investigation.

475. After investigation, New GM's findings were presented at a Decision Committee meeting on April 3, 2014. New GM noted several hundred instances of potential key pullout issues in vehicles covered by the previous ignition switch recalls, and specifically listed 139 instances identified from records relating to customer and dealer reports to GM call centers, 479 instances identified from warranty repair data, one legal claim, and six instances identified from NHTSA VOQ information. New GM investigators also identified 16 roll-away instances associated with the key pullout issue from records relating to customer and dealer reports to GM call centers and legal claims information.

476. New GM noted that excessive wear to ignition tumblers and keys may be the cause of the key pullout issue. New GM also considered the possibility that some vehicles may have experienced key pullout issues at the time they were manufactured, based on information that included the following: (a) a majority of instances of key pullouts that had been identified in the recall population were in early-year Saturn Ion and Chevrolet Cobalt vehicles, and in addition, repair order data indicated vehicles within that population had experienced a repair potentially related to key pullout issues as early as 47 days from the date on which the vehicle was put into service; and (b) an engineering inquiry known within New GM as a Problem

[73] *See* Attachment B to New GM's letter to NHTSA dated April 23, 2014 ("Chronology").

Resolution related to key pullout issues was initiated in June 2005, which resulted in an engineering work order to modify the ignition cylinder going forward.

477. A majority of the key pullout instances identified involved 2003-2004 model year Saturn Ion and 2005 model year Chevrolet Cobalt vehicles. An April 3 New GM PowerPoint identified 358 instances of key pullouts involving those vehicles.

478. In addition, with respect to early-year Saturn Ion and Chevrolet Cobalt vehicles, the April 3 PowerPoint materials discussed the number of days that elapsed between the "In Service Date" of those vehicles (the date they first hit the road) and the "Repair Date." The April 3 PowerPoint stated that, with respect to the 2003 model year Saturn Ion, a vehicle was reported as experiencing a potential key pullout repair as early as 47 days from its "In Service Date;" with respect to the 2004 model year Saturn Ion, a vehicle was reported as experiencing a potential key pullout repair as early as 106 days from its "In Service Date;" with respect to the 2005 model year Chevrolet Cobalt, a vehicle was reported as experiencing a potential key pullout repair as early as 173 days from its "In Service Date;" and with respect to the 2006 model year Chevrolet Cobalt, a vehicle was reported as experiencing a potential key pullout repair as early as 169 days from its "In Service Date." The length of time between the "In Service Date" and the "Repair Date" suggested that these vehicles were defective at the time of manufacture.

479. The PowerPoint at the April 3 Decision Committee meeting also discussed a Problem Resolution that was initiated in June 2005 which related to key pullout issues in the Chevrolet Cobalt (PRTS N 183836). According to PRTS N 183836: "Tolerance stack up condition permits key to be removed from lock cylinder while driving." The "Description of Root Cause Investigation Progress and Verification" stated, "[a]s noted a tolerance stack up exists in between the internal components of the cylinder." According to a "Summary," "A

tolerance stack up condition exists between components internal to the cylinder which will allow some keys to be removed." Problem Resolution identified the following "Solution": "A change to the sidebar of the ignition cylinder will occur to eliminate the stack-up conditions that exist in the cylinder."

480. In response to PRTS N 183836, New GM issued an engineering work order to "[c]hange shape of ignition cylinder sidebar top from flat to crowned."

481. According to the work order: "Profile and overall height of ignition cylinder sidebar [will be] changed in order to assist in preventing key pullout on certain keycodes. Profile of sidebar to be domed as opposed to flat and overall height to be increased by 0.23mm."

482. According to PRTS N 183836, this "solution fix[ed] the problem" going forward. An entry in Problem Resolution made on March 2, 2007 stated: "There were no incidents of the key coming out of the ignition cylinder in the run position during a review of thirty vehicles…." A "Summary" in Problem Resolution stated: "Because there were no incidents of the key coming out of the ignition cylinder in the run position during a review of thirty vehicles[,] this PRTS issue should be closed." PRTS N 183836 was the only PRTS discussed at the April 3, 2014, Decision Committee meeting, although it is not the only engineering or field report relating to potential key pullout issues.

483. This data led the Decision Committee to conclude that 2003-2004 model year Saturn Ion vehicles and 2005 and some 2006 model year Chevrolet Cobalt vehicles failed to conform to FMVSS 114. In addition, the Decision Committee concluded that a defect related to motor vehicle safety existed, and decided to recall all vehicles covered by the first, second, and third ignition switch torque recalls to prevent unintended vehicle motion potentially caused by key pullout issues that could result in a vehicle crash and occupant or pedestrian injuries. For

vehicles that were built with a defective ignition cylinder that have not previously had the ignition cylinder replaced with a redesigned part, the recall called for dealers to replace the ignition cylinder and provide two new ignition/door keys for each vehicle.

b. Ignition lock cylinder defect affecting over 200,000 additional GM-branded vehicles.

484. On August 7, 2014, New GM recalled 202,155 MY 2002-2004 Saturn Vue vehicles.[74] In the affected vehicles, the ignition key can be removed when the vehicle is not in the "off" position.[75] If this happens, the vehicle can roll away, increasing the risk for a crash and occupant or pedestrian injuries.[76]

485. Following New GM's April 9, 2014 recall announcement regarding ignition switch defects, New GM reviewed field and warranty data for potential instances of ignition cylinders that permit the operator to remove the ignition key when the key is not in the "off" position in other vehicles outside of those already recalled.[77] New GM identified 152 reports of vehicle roll away and/or ignition keys being removed when the key is not in the "off" position in the 2002-2004 MY Saturn Vue vehicles.[78]

486. After reviewing this data with NHTSA on June 17, 2014, July 7, 2014, and July 24, 2014, GM instituted a safety recall on July 31, 2014.[79]

[74] *See* August 7, 2014 Letter from New GM to NHTSA.

2. Defects affecting the occupant safety restraint system in GM-branded vehicles.

a. Safety defects of the airbag systems of GM-branded vehicles.

(1) Wiring harness defect.

487. On March 17, 2014, New GM recalled nearly 1.2 million model year 2008-2013 Buick Enclave, 2009-2013 Chevrolet Traverse, 2008-2013 GMC Acadia, and 2008-2010 Saturn Outlook vehicles for a dangerous defect involving airbags and seatbelt pretensioners.

488. The affected vehicles were sold with defective wiring harnesses. Increased resistance in the wiring harnesses of driver and passenger seat-mounted, side-impact airbag in the affected vehicles may cause the side impact airbags, front center airbags, and seat belt pretensioners to not deploy in a crash. The vehicles' failure to deploy airbags and pretensioners in a crash increases the risk of injury and death to the drivers and front-seat passengers.

489. Once again, New GM knew of the dangerous airbag defect long before it took anything approaching the requisite remedial action.

490. As the wiring harness connectors in the side impact airbags corrode or loosen over time, resistance will increase. The airbag sensing system will interpret this increase in resistance as a fault, which then triggers illumination of the "SERVICE AIR BAG" message on the vehicle's dashboard. This message may be intermittent at first and the airbags and pretensioners will still deploy. But over time, the resistance can build to the point where the SIABs, pretensioners, and front center airbags will not deploy in the event of a collision.[80]

491. The problem apparently arose when Old GM made the change from using gold-plated terminals to connect its wire harnesses to cheaper tin terminals in 2007.

[80] *See* New GM Notice to NHTSA dated March 17, 2014, at 1.

492. In June 2008, Old GM noticed increased warranty claims for airbag service on certain of its vehicles and determined it was due to increased resistance in airbag wiring. After analysis of the tin connectors in September 2008, Old GM determined that corrosion and wear to the connectors was causing the increased resistance in the airbag wiring. It released a technical service bulletin on November 25, 2008, for 2008-2009 Buick Enclave, 2009 Chevy Traverse, 2008-2009 GMC Acadia, and 2008-2009 Saturn Outlook models, instructing dealers to repair the defect by using Nyogel grease, securing the connectors, and adding slack to the line. Old GM also began the transition back to gold-plated terminals in certain vehicles. At that point, Old GM suspended all investigation into the defective airbag wiring and took no further action.[81]

493. In November 2009, New GM learned of similar reports of increased airbag service messages in 2010 Chevy Malibu and 2010 Pontiac G6 vehicles. After investigation, New GM concluded that corrosion and wear in the same tin connector was the root of the airbag problems in the Malibu and G6 models.[82]

494. In January 2010, after review of the Malibu and G6 airbag connector issues, New GM concluded that ignoring the service airbag message could increase the resistance such that a side impact airbag might not deploy in a side impact collision. On May 11, 2010, New GM issued a Customer Satisfaction Bulletin for the Malibu and G6 models and instructed dealers to secure both front seat-mounted, side-impact airbag wire harnesses and, if necessary, reroute the wire harness.[83]

495. From February to May 2010, New GM revisited the data on vehicles with faulty harness wiring issues, and noted another spike in the volume of the airbag service warranty

[81] *See* New GM Notification Campaign No. 14V-118 dated March 31, 2014, at 1-2.

[82] *Id.* at 2.

[83] *Id.*

claims. This led New GM to conclude that the November 2008 bulletin was "not entirely effective in correcting the [wiring defect present in the vehicles]." On November 23, 2010, New GM issued another Customer Satisfaction Bulletin for certain 2008 Buick Enclave, 2008 Saturn Outlook, and 2008 GMC Acadia models built from October 2007 to March 2008, instructing dealers to secure side impact airbag harnesses and re-route or replace the side impact airbag connectors.[84]

496. New GM issued a revised Customer Service Bulletin on February 3, 2011, requiring replacement of the front seat-mounted side-impact airbag connectors in the same faulty vehicles mentioned in the November 2010 bulletin. In July 2011, New GM again replaced its connector, this time with a Tyco-manufactured connector featuring a silver-sealed terminal.[85]

497. But in 2012, New GM noticed another spike in the volume of warranty claims relating to side impact airbag connectors in vehicles built in the second half of 2011. After further analysis of the Tyco connectors, it discovered that inadequate crimping of the connector terminal was causing increased system resistance. In response, New GM issued an internal bulletin for 2011-2012 Buick Enclave, Chevy Traverse, and GMC Acadia vehicles, recommending dealers repair affected vehicles by replacing the original connector with a new sealed connector.[86]

498. The defect was still uncured, however, because in 2013 New GM again noted an increase in service repairs and buyback activity due to illuminated airbag service lights. On October 4, 2013, New GM opened an investigation into airbag connector issues in 2011-2013

[84] *See id.* at 3.

[85] *See id.*

[86] *See id.* at 4.

Buick Enclave, Chevy Traverse, and GMC Acadia models. The investigation revealed an increase in warranty claims for vehicles built in late 2011 and early 2012.[87]

499. On February 10, 2014, New GM concluded that corrosion and crimping issues were again the root cause of the airbag problems.[88]

500. New GM initially planned to issue a less-urgent Customer Satisfaction Program to address the airbag flaw in the 2010-2013 vehicles. But it wasn't until a call with NHTSA on March 14, 2014, that New GM finally issued a full-blown safety recall on the vehicles with the faulty harness wiring—years after it first learned of the defective airbag connectors, after four investigations into the defect, and after issuing at least six service bulletins on the topic. The recall as first approved covered only 912,000 vehicles, but on March 16, 2014, it was increased to cover approximately 1.2 million vehicles.[89]

501. On March 17, 2014, New GM issued a recall for 1,176,407 vehicles potentially afflicted with the defective airbag system. The recall instructs dealers to remove driver and passenger SIAB connectors and splice and solder the wires together.[90]

(2) Driver-side airbag shorting-bar defect.

502. On June 5, 2014, New GM issued a safety recall of 38,636 MY 2012 Chevrolet Cruze, 2012 Chevrolet Camaro, 2012 Chevrolet Sonic, and 2012 Buick Verano vehicles with a driver's airbag shorting bar defect.

503. In the affected vehicles, the driver side frontal airbag has a shorting bar which may intermittently contact the airbag terminals. If the bar and terminals are contacting each other at the time of a crash, the airbag will not deploy, increasing the driver's risk of injury. New

[87] *See id.*

[88] *See id.* at 5.

[89] *See id*.

[90] *See id*.

GM admits awareness of one crash with an injury where the relevant diagnostic trouble code was found at the time the vehicle was repaired. New GM is aware of other crashes involving these vehicles where airbags did not deploy but claims not to know if they were related to this defect.

504. New GM knew about the driver's airbag shorting bar defect in 2012. In fact, New GM conducted two previous recalls in connection with the shorting bar defect condition involving 7,116 vehicles—one on October 31, 2012, and one on January 24, 2013.[91] Yet it would take New GM nearly two years to finally order a broader recall.

505. On May 31, 2013, after New GM's two incomplete recalls, NHTSA opened an investigation into reports of allegations of the non-deployment of air bags. New GM responded to this investigation on September 13, 2013.

506. On November 1, 2013, NHTSA questioned New GM about: (i) the exclusion of 390 vehicles which met the criteria for the two previous safety recalls; (ii) the 30-day in-service cutoff used for the recall population of one previous recall; and (iii) twelve additional build days which, as of the June 2013 data pull in the investigation, had an elevated warranty rate. In response to NHTSA's concerns, New GM added additional vehicles to the recall.

507. After announcement of the initial ignition switch torque defect in February and March of 2014, New GM re-examined its records relating to the driver's airbag shorting defect. This review finally prompted New GM to expand the recall population on May 29, 2014—***long after the problem should have been remedied.***

(3) Driver-side airbag inflator defect.

508. On June 25, 2014, New GM recalled 29,019 MY 2013-2014 Chevrolet Cruze vehicles with a driver-side airbag inflator defect.

[91] *See* New GM's Letters to NHTSA dated 10/31/2012 and 1/24/2013, respectively.

509. In the affected vehicles, the driver's front airbag inflator may have been manufactured with an incorrect part. In the event of a crash necessitating deployment of the driver-side airbag, the airbag's inflator may rupture and the airbag may not inflate. The rupture could cause metal fragments to strike and injure the vehicle's occupants. Additionally, if the airbag does not inflate, the driver will be at increased risk of injury.[92]

510. New GM was named in a lawsuit on or about May 1, 2014 involving a 2013 Chevrolet Cruze and an improperly deployed driver-side airbag that caused an injury to the driver.[93] The lawsuit prompted an inspection of "the case vehicle," the assignment of a New GM Product Investigations engineer, and discussions with NHTSA.[94]

511. Meanwhile, the airbag supplier, Takata Corporation/TK Holdings Inc., conducted its own analysis. New GM removed airbags with "build dates near the build date of the case vehicle," and sent them to Takata.[95] Subsequently, on June 20, 2014, Takata informed New GM it had "discovered [the] root cause" of the driver-side airbag defect through analysis of one of the airbags sent by New GM.[96]

512. Shortly thereafter, on June 23, 2014, New GM decided to conduct a safety recall.[97]

(4) Roof-rail airbag defect.

513. On June 18, 2014, New GM recalled 16,932 MY 2011 Cadillac CTS vehicles with a roof-rail airbag defect.

---

[92] *See* New GM's Letter to NHTSA dated June 25, 2014.

[93] *Id.*

[94] *Id.*

[95] *Id.*

[96] *Id.*

[97] *Id.*

514. In the affected vehicles, vibrations from the drive shaft may cause the vehicle's roll over sensor to command the roof rail airbags to deploy. If the roof rail airbags deploy unexpectedly, there is an increased risk of crash and injury to the occupants.[98]

515. According to New GM, the defect is caused by a loss of grease from the center constant velocity joint; the loss of grease causes vibrations of the propeller shaft that are transferred to the roll over sensor in the vehicle floor above the shaft. The vibrations can cause the deployment of the roof rail airbags.[99]

516. On October 28, 2010, a new supplier began shipping propeller shafts for MY 2011 Cadillac CTS vehicles; these propeller shafts used a metal gasket from the constant velocity joint (as opposed to the liquid sealing system used by the previous supplier).[100] ***This new metal gasket design was not validated or approved by New GM***.[101]

517. On June 27, 2011, a Problem Resolution Tracking System (PRTS) was opened concerning this defect. The PRTS resulted in the "purge" of the metal gasket design.[102] Then, on August 1, 2011, New GM issued an Engineering Work Order banning the metal gasket design, and mandating the use of the liquid sealing system. Yet New GM "closed the investigation without action in October 2012."[103]

518. Inexplicably, New GM waited until June of 2014 before finally recalling the affected vehicles.

---

[98] *See* June 18, 2014 New GM Letter to NHTSA.

[99] *Id.*

[100] *Id.*

[101] *Id.*

[102] *Id.*

[103] *Id.*

(5) Passenger-side airbag defect.

519. On May 16, 2014, GM recalled 1,953 MY 2015 Cadillac Escalade and Escalade ESV vehicles with a passenger-side airbag defect.

520. The affected vehicles do not conform to Federal Motor Vehicle Safety Standard number 208, "Occupant Crash Protection." In these vehicles, the airbag module is secured to a chute adhered to the backside of the instrument panel with an insufficiently heated infrared weld. As a result, the front passenger-side airbag will only partially deploy in the event of crash, and this will increase the risk of occupant injury.[104]

521. On April 28, 2014, during product validation testing of the "Platinum" Escalade (a planned interim 2015 model), the passenger-side front airbag did not properly deploy.[105] New GM then obtained information from the supplier Johnson Controls Inc. concerning the portion of the Escalade instrument panel through which the frontal airbag deploys.[106] In particular, New GM requested information on chute weld integrity.[107]

522. On May 13, 2014, Johnson Controls informed New GM engineering that it had modified its infrared weld process on April 2, 2014 and "corrected" that process on April 29, 2014. New GM claims that it was unaware of the changes until May 13, 2014.[108]

523. On May 14, 2014, the Decision Committee decided to conduct a "noncompliance recall." On May 16, 2014, GM obtained a list of suspected serial numbers from Johnson Controls, which GM then matched to VINs through records obtained from the scanning process

[104] *See* May 16, 2014 Letter from New GM to NHTSA.

[105] *See* May 27, 2014 Letter from New GM to NHTSA.

[106] *Id.*

[107] *Id.*

[108] *Id.*

used during instrument panel sub-assembly.[109] A recall notice was issued on May 16, 2014 for 1,953 vehicles, each of which will have the Johnson Controls part replaced.[110]

524. Subsequently, GM discovered errors in the scanning process, and decided to expand the recall population to include any VINs that could have received parts bearing the suspect Johnson Controls serial numbers.[111] GM therefore issued a second recall notice on May 27, 2014. With respect to this second set of 885 vehicles, they will be inspected to see if they were made with Johnson Controls parts bearing suspect serial numbers. If they are, the part will be replaced.[112]

(6) Sport seat side-impact airbag defect.

525. On June 18, 2014, New GM issued a safety recall for 712 MY 2014 Chevrolet Corvette vehicles with a sport seat side-impact airbag defect.

526. The affected vehicles do not meet a Technical Working Group Side Airbag Injury Assessment Reference Value specifications for protecting unbelted, out-of-position young children from injury. In a crash necessitating side impact airbag deployment, an unbelted, out-of-position three-year-old child may be at an increased risk of neck injury.

(7) Passenger-side airbag inflator defect.

527. On June 5, 2014, New GM recalled 61 MY 2013 Chevrolet Spark and 2013 Buick Encore vehicles with a passenger side airbag inflator defect.

---

[109] *Id.*

[110] *Id.*

[111] *Id.*

[112] *Id.*

528. In the affected vehicles, because of an improper weld, the front passenger airbag end cap could separate from the airbag inflator. This can prevent the airbag from deploying properly, and creates an increased risk of injury to the front passenger.[113]

529. New GM was alerted to this issue on July 10, 2013, when a customer brought an affected vehicle into a dealership with "an airbag readiness light 'ON' condition."[114] After replacing the side frontal airbag, the dealer shipped the original airbag to New GM for warranty analysis.

530. In September 2013, New GM "noted" the "weld condition of the end cap." New GM then sent the airbag to the airbag supplier, S&T Motive, who sent it on to the inflator supplier, ARC Automotive Inc., for "root cause" analysis.[115] S&T and ARC did not conclude their analysis until April 2014.[116]

531. Based upon the information provided by S&T and ARC, in May 2014 New GM Engineering linked the defect to inflators produced on December 17, 2012. ARC records show that on that date, an inflator end cap separated during testing, but that ARC nonetheless shipped quarantined inflators to S&T where they were used in passenger side frontal airbags beginning on December 29, 2012.[117]

532. On May 29, 2014—nearly one year after being presented with a faulty airbag—New GM's Safety Field Action Committee finally decided to conduct a safety recall.[118]

---

[113] *See* June 5, 2014 Letter from New GM to NHTSA.

[114] *Id.*

[115] *Id.*

[116] *Id.*

[117] *Id.*

[118] *Id.*

(8) Front passenger airbag defect.

533. On March 17, 2014, New GM issued a noncompliance recall of 303,013 MY 2009-2014 GMC Savana vehicles with a passenger-side instrument panel defect.[119]

534. In the affected vehicles, in certain frontal impact collisions below the airbag deployment threshold, the panel covering the airbag may not sufficiently absorb the impact of the collision. These vehicles therefore do not meet the requirements of Federal Motor Vehicle Safety Standard number 201, "Occupant Protection in Interior Impact."[120]

535. The defect apparently arose in early 2009, when the passenger-side airbag housing was changed from steel to plastic.[121] Inexplicably, New GM did not act to remedy this defect until March of 2014.

b. Safety defects of the seat belt systems in GM-branded vehicles.

(1) Seat belt connector cable defect.

536. On May 20, 2014, New GM issued a safety recall for nearly 1.4 million model year 2009-2014 Buick Enclave, 2009-2014 Chevrolet Traverse, 2009-2014 GMC Acadia, and 2009-2010 Saturn Outlook vehicles with a dangerous safety belt defect.

537. In the affected vehicles, "[t]he flexible steel cable that connects the safety belt to the vehicle at the outside of the front outside of the front outboard seating positions can fatigue and separate over time as a result of occupant movement into the seat. In a crash, a separated cable could increase the risk of injury to the occupant."[122]

[119] *See* March 31, 2014 Letter from New GM to NHTSA.

[120] *Id.*

[121] *Id.*

[122] *See* New GM Notice to NHTSA dated May 19, 2014, at 1.

538. New GM waited more than two years after learning about this defect before disclosing it or remedying it.[123] This delay is consistent with New GM's long period of concealment of the other defects as set forth above.

539. New GM first learned of the seat belt defect no later than February 10, 2012, when a dealer reported that a seat belt buckle separated from the anchor at the attaching cable in a 2010 GMC Acadia.[124] On March 7, 2012, after notification and analysis of the returned part, the supplier determined the problem was caused by fatigue of the cable.[125]

540. On April 20, 2012, New GM received another part exhibiting the defect from a dealership.[126] New GM also did a warranty analysis that turned up three additional occurrences of similar complaints.[127] But New GM did not order a field review until June 4, 2012.[128] The review, on June 11, 2012, covered just 68 vehicles, and turned up no cable damage.[129]

541. New GM received another part exhibiting the defect on August 28, 2013, from GM Canada Product Investigations.[130] After further testing in October 2013, New GM duplicated the defect condition, determining that, in some seat positions, the sleeve can present the buckle in a manner that can subject the cable to bending during customer entry into the vehicle.[131] New GM duplicated the condition again in a second vehicle in November 2013.[132] And then just a month later, on December 18, 2013, New GM received another part exhibiting

[123] *See* New GM Notice to NHTSA dated May 30, 2014, at 1-3.

[124] *Id.* at 1.

[125] *Id.* at 2.

[126] *Id.*

[127] *Id.*

[128] *Id.*

[129] *Id.*

[130] *Id.*

[131] *Id.*

[132] *Id.*

the condition from GM Canada Product Investigations.[133] But still New GM did not issue a safety recall.

542. Further testing between February and April 2014 confirmed the defect resulted from fatigue of the cable.[134] This was the same root cause New GM identified as early as March 7, 2012. Finally, on April 14, 2014, these findings were turned over to New GM Product Investigations and assigned an investigation number.[135]

543. On May 19, 2014, New GM decided to conduct a recall of the affected vehicles.[136]

(2) Seat belt retractor defect.

544. On June 11, 2014, New GM recalled 28,789 MY 2004-2011 Saab 9-3 Convertible vehicles with a seat belt retractor defect.

545. In the affected vehicles, the driver's side front seat belt retractor may break, causing the seat belt webbing spooled out by the user not to retract.[137] In the event of a crash, a seat belt that has not retracted may not properly restrain the seat occupant, increasing the risk of injury to the driver.[138]

546. By September of 2009 New GM was aware of an issue with seat belt retractors in MY 2004 Saab 9-3 vehicles; at that time, NHTSA informed New GM that it received 5 Vehicle Owner Questionnaires "alleging that the driver seat belt will no longer retract on 2004 Saab 0-3

[133] *Id.*

[134] *Id.*

[135] *Id.*

[136] New GM Notice to NHTSA dated May 19, 2014, at 1.

[137] *See* New GM's June 11, 2013 Letter to NHTSA.

[138] *See id.*

vehicles built after September 30, 2003."[139] In December 2009-January 2010, New GM conducted a survey "of customers who had a retractor replaced to determine how many were due" to a break in the Automatic Tensioning System that causes "webbing spooled out by the user not to retract."[140]

547. On February 9, 2010, New GM issued a recall for the driver side retractor, but only in certain MY 2004 Saab 9-3 sedans—some 14,126 vehicles.[141] New GM would wait another four years before attempting to address the full scope of the seatbelt retractor defect in Saab 9-3 vehicles.

548. New GM finally opened an investigation into the seat belt retractor defect in other Saab 9-3 vehicles in February of this year, and that was "in response to NHTSA Vehicle Owner Questionnaires claiming issues with the driver side front seat belt retractor" in the affected vehicles.[142] As a result, New GM eventually recalled 28,789 MY 2004-2011 Saab 9-3 convertible vehicles on June 11, 2014.

(3) Frontal lap-belt pretensioner defect.

549. On August 7, 2014, New GM recalled 48,059 MY 2013 Cadillac ATS and 2013 Buick Encore vehicles with a defect in the front lap-belt pretensioners.[143]

550. In the affected vehicles, the driver and passenger lap-belt pretensioner cables may not lock in a retracted position; that allows the seat belts to extend when pulled upon.[144] If the

[139] *See* New GM's February 9, 2010 Letter to NHTSA.

[140] *Id.*

[141] *Id.*

[142] *See* New GM's June 11, 2013 Letter to NHTSA.

[143] *See* August 7, 2014 Letter from New GM to NHTSA.

[144] *Id.*

seat belts do not remain locked in the retracted position, the seat occupant may not be adequately restrained in a crash, increasing the risk of injury.[145]

551. In July 2012, GM Korea learned that the lap-belt pretensioner cable and seat belt webbing slipped out after being retracted.[146] Several months later, New GM changed the rivet position on the pretensioner bracket and the design of the pretension mounting bolt.[147] This change was made after New GM started production on the 2013 MY Buick Encore.[148]

552. In October 2012, New GM testing on a pre-production 2014 MY Cadillac CTS revealed that the driver side front seat belt anchor pretensioner cables retracted upon deployment to pull in the lap-belt webbing, as intended, but did not lock in that position; that allowed the retracted webbing to return ("pay out") to its original position under loading, which was not intended.[149]

553. On November 13, 2012, New GM modified the design of the lap-belt pretensioner for the Cadillac CTS, Cadillac ATS, and Cadillac ELR vehicles to include a modified bolt, relocation of a rivet in the cam housing to reposition the locking cam, and a change in torque of the lap-belt pretensioner bolt to seat.[150] These changes were implemented in the 2014 MY Cadillac CTS and Cadillac ELR, but not in the 2013 MY Cadillac ATS.[151]

554. Despite making these adjustments to later MY vehicles only, New GM did not launch an investigation into the performance of the lap-belt pretensioners in the 2013 MY Buick

[145] *Id.*

[146] *See* August 21, 2014 Letter from New GM to NHTSA.

[147] *Id.*

[148] *Id.*

[149] *Id.*

[150] *Id.*

[151] *Id.*

Encore and Cadillac ATS until mid-April, 2013.[152] New GM claims that during this year-long investigation period it found no issues potentially relating to the pay out of the lap-belt pretensioners.[153]

555. Nonetheless, New GM decided to issue a safety recall for the affected vehicles on July 31, 2014.[154] It later expanded the recall by 55 additional vehicles, to a total population of 48,114, on August 19, 2014.[155]

3. Safety defects affecting seats in GM-branded vehicles.

556. On July 22, 2014, New GM issued a safety recall of 414,333 MY 2010-2012 Chevrolet Equinox, MY 2011-2012 Chevrolet Camaro, MY 2010-2012 Cadillac SRX, MY 2010-2012 GMC Terrain, MY 2011-2012 Buick Regal, and MY 2011-2012 Buick LaCrosse vehicles with a power height adjustable seats defect.[156]

557. In the affected vehicles, the bolt that secures the height adjuster in the driver and front passenger seats may become loose or fall out. If the bolt falls out, the seat will drop suddenly to the lowest vertical position. The sudden drop can affect the driver's ability to safely operate the vehicle, and can increase the risk of injury to the driver and the front-seat passenger if there is an accident. New GM admits to knowledge of at least one crash caused by this defect.[157]

---

[152] *Id.*

[153] *Id.*

[154] *Id.*

[155] *Id.*

[156] *See* July 22, 2014 Letter from New GM to NHTSA.

[157] *Id.*

558. New GM was aware of this defect by July 10, 2013 when the crash occurred, and by July 22, 2013, New GM was aware that the crash was caused when the bolt on the height adjuster fell out.[158]

559. By September 5, 2013, New GM was aware of 27 cases of loose or missing height adjuster bolts in Camaro vehicles.[159] Yet New GM waited until July 15, 2014 before it made the decision to conduct a safety recall.

4. Safety defects affecting the brakes in GM-branded vehicles.

a. Brake light defect.

560. On May 14, 2014, New GM issued a safety recall of approximately 2.4 million model year 2004-2012 Chevrolet Malibu, 2004-2007 Malibu Maxx, 2005-2010 Pontiac G6, and 2007-2010 Saturn Aura vehicles with a dangerous brake light defect.

561. In the affected vehicles, the brake lamps may fail to illuminate when the brakes are applied or illuminate when the brakes are not engaged; the same defect can disable cruise control, traction control, electronic stability control, and panic brake assist operation, thereby increasing the risk of collisions and injuries.[160]

562. Once again, New GM knew of the dangerous brake light defect for years before it took anything approaching the requisite remedial action. In fact, although the brake light defect has caused at least 13 crashes since 2008, New GM did not recall all 2.4 million vehicles with the defect until May 2014.

563. According to New GM, the brake defect originates in the Body Control Module connection system. "Increased resistance can develop in the [Body Control Module] connection

---

[158] *Id.*

[159] *Id.*

[160] *See* New GM Notification Campaign No. 14V-252 dated May 28, 2014, at 1.

system and result in voltage fluctuations or intermittency in the Brake Apply Sensor (BAS) circuit that can cause service brakes lamp malfunction."[161] The result is brake lamps that may illuminate when the brakes are not being applied and may not illuminate when the brakes are being applied.[162]

564. The same defect can also cause the vehicle to get stuck in cruise control if it is engaged, or cause cruise control to not engage, and may also disable the traction control, electronic stability control, and panic-braking assist features.[163]

565. New GM now acknowledges that the brake light defect "may increase the risk of a crash."[164]

566. As early as September 2008, NHTSA opened an investigation for MY 2005-2007 Pontiac G6 vehicles involving allegations that the brake lights may turn on when the driver does not depress the brake pedal and may ***not*** turn on when the driver ***does*** depress the brake pedal.[165]

567. During its investigation of the brake light defect in 2008, Old GM found elevated warranty claims for the brake light defect for MY 2005 and 2006 vehicles built in January 2005, and found "fretting corrosion in the [Body Control Module] C2 connector was the root cause" of the problem.[166] Old GM and its part supplier Delphi decided that applying dielectric grease to the [Body Control Module] C2 connector would be "an effective countermeasure to the fretting

[161] *Id.*

[162] *Id.*

[163] *Id.*

[164] *Id.*

[165] *Id.* at 2.

[166] *Id.*

corrosion."[167] Beginning in November of 2008, the Company began applying dielectric grease in its vehicle assembly plants.[168]

568. On December 4, 2008, Old GM issued a Technical Service Bulletin recommending the application of dielectric grease to the Body Control Module C2 connector for the MY 2005-2009 Pontiac G6, 2004-2007 Chevrolet Malibu/Malibu Maxx, 2008 Malibu Classic, and 2007-2009 Saturn Aura vehicles.[169] One month later, in January 2009, Old GM recalled only a small subset of the vehicles with the brake light defect—8,000 MY 2005-2006 Pontiac G6 vehicles built during the month of January 2005.[170]

569. Not surprisingly, the brake light problem was far from resolved.

570. In October 2010, New GM released an updated Technical Service Bulletin regarding "intermittent brake lamp malfunctions," and added MY 2008-2009 Chevrolet Malibu/Malibu Maxx vehicles to the list of vehicles for which it recommended the application of dielectric grease to the Body Control Module C2 connector.[171]

571. In September of 2011, New GM received an information request from Canadian authorities regarding brake light defect complaints in vehicles that had not yet been recalled. Then, in June 2012, NHTSA provided New GM with additional complaints "that were outside of the build dates for the brake lamp malfunctions on the Pontiac G6" vehicles that had been recalled.[172]

---

[167] *Id.*

[168] *Id* at 3.

[169] *Id.* at 2.

[170] *Id.*

[171] *Id.*

[172] *Id.*

572. In February of 2013, NHTSA opened a "Recall Query" in the face of 324 complaints "that the brake lights do not operate properly" in Pontiac G6, Malibu, and Aura vehicles that had not yet been recalled.[173]

573. In response, New GM asserts that it "investigated these occurrences looking for root causes that could be additional contributors to the previously identified fretting corrosion," but that it continued to believe that "fretting corrosion in the [Body Control Module] C2 connector" was the "root cause" of the brake light defect.[174]

574. In June of 2013, NHTSA upgraded its "Recall Query" concerning brake light problems to an "Engineering Analysis."[175]

575. In August 2013, New GM found an elevated warranty rate for Body Control module C2 connectors in vehicles built *after* Old GM had begun applying dielectric grease to Body Control Module C2 connectors at its assembly plants in November of 2008.[176] In November of 2013, New GM concluded that "the amount of dielectric grease applied in the assembly plant starting November 2008 was insufficient…."[177]

576. Finally, in March of 2014, "[New] GM engineering teams began conducting analysis and physical testing to measure the effectiveness of potential countermeasures to address fretting corrosion. As a result, New GM determined that additional remedies were needed to address fretting corrosion."[178]

577. On May 7, 2014, New GM finally decided to conduct a safety recall.

[177] *Id.*

[178] *Id.* at 4.

578. According to New GM, "Dealers are to attach the wiring harness to the [Body Control Module] CM with a spacer, apply dielectric lubricant to both the [Body Control Module] CR and harness connector, and on the BAS and harness connector, and relearn the brake pedal home position."[179]

579. New GM sat on and concealed its knowledge of the brake light defect for years, and did not even consider available countermeasures (other than the application of grease that had proven ineffective) until March of this year.

b. Brake booster pump defect.

580. On March 17, 2014, New GM issued a safety recall of 63,903 MY 2013-2014 Cadillac XTS vehicles with a brake booster pump defect.

581. In the affected vehicles, a cavity plug on the brake boost pump connector may dislodge and allow corrosion of the brake booster pump relay connector. This can have an adverse impact on the vehicle's brakes and increase the risk of collision. This same defect can also cause a fire in the vehicle resulting from the electrical shore in the relay connector.

582. In June of 2013, New GM learned that a fire occurred in a 2013 Cadillac XTS vehicle while it was being transported between car dealerships. Upon investigation, New GM determined that the fire originated near the brake booster pump relay connector, but could not determine the "root cause" of the fire.

583. A second vehicle fire in a 2013 Cadillac XTS occurred in September of 2013. In November 2013, the same team of New GM investigators examined the second vehicle, but, again, could not determine the "root cause" of the fire.

[179] *Id.*

584. In December 2013, New GM identified two warranty claims submitted by dealers related to complaints by customers about vibrations in the braking system of their vehicles. The New GM team investigating the two prior 2013 Cadillac XTS fires inspected these parts and discovered the relay connector in both vehicles had melted.

585. In January 2014, New GM determined that pressure in the relay connector increased when the brake booster pump vent hose was obstructed or pinched. Further testing revealed that pressure from an obstructed vent hose could force out the cavity plugs in the relay connector, and in the absence of the plugs, water, and other contaminants can enter and corrode the relay connector, causing a short and leading to a fire or melting.

586. On March 11, 2014, New GM issued a safety recall for the affected vehicles.

c. Hydraulic boost assist defect.

587. On May 13, 2014, New GM recalled 140,067 model year 2014 Chevrolet Malibu vehicles with a hydraulic brake boost assist defect.[180]

588. In the affected vehicles, the "hydraulic boost assist" may be disabled; when that happens, slowing or stopping the vehicle requires harder brake pedal force, and the vehicle will travel a greater distance before stopping. Therefore, these vehicles do not comply with Federal Motor Vehicle Safety Standard number 135, "Light Vehicle Brake Systems," and are at increased risk of collision.[181]

d. Brake rotor defect.

589. On May 7, 2014, New GM recalled 8,208 MY 2014 Chevrolet Malibu and Buick LaCrosse vehicles with a brake rotor defect.

[180] *See* May 13, 2014 Letter from New GM to NHTSA.

[181] *Id.*

590. In the affected vehicles, New GM may have accidentally installed rear brake rotors on the front brakes. The rear rotors are thinner than the front rotors, and the use of rear rotors in the front of the vehicle may result in a front brake pad detaching from the caliper. The detachment of a break pad from the caliper can cause a sudden reduction in braking which lengthens the distance required to stop the vehicle and increases the risk of a crash.

e. Reduced brake performance defect.

591. On July 28, 2014, New GM recalled 1,968 MY 2009-2010 Chevrolet Aveo and 2009 Pontiac G3 vehicles.[182] Affected vehicles may contain brake fluid which does not protect against corrosion of the valves inside the anti-lock brake system module, affecting the closing motion of the valves.[183] If the anti-lock brake system valve corrodes it may result in longer brake pedal travel or reduced performance, increasing the risk of a vehicle crash.[184]

592. New GM was aware of this defect as far back as August 2012, when it initiated a customer satisfaction campaign.[185] The campaign commenced in November 2012, and New GM estimates that, to date, approximately 34% of Chevrolet Aveo and Pontiac G3 vehicles included in the customer satisfaction campaign are not yet repaired.[186] On July 19, 2014, New GM decided to conduct a safety recall for vehicles that had been included in the customer satisfaction program but had not had the service repair performed.[187]

[182] *See* July 28, 2014 Letter from New GM to NHTSA.

[185] *Id.*

[186] *Id.*

[187] *Id.*

f. Parking brake defect.

593. On September 20, 2014, GM recalled more than 221,000 MY 2014-15 Chevrolet Impala and 2013-15 model Cadillac XTS vehicles because of a parking-brake defect.

594. In the affected vehicles, the brake pads can stay partly engaged, which can lead to "excessive brake heat that may result in a fire," according to documents posted on the NHTSA website.

595. NHTSA said the fire risk stemmed from the rear brakes generating "significant heat, smoke and sparks." The agency also warned that drivers of the Affected Vehicles might experience "poor vehicle acceleration, undesired deceleration, excessive brake heat and premature wear to some brake components."

5. Safety defects affecting the steering in GM-branded vehicles.

a. Sudden power-steering failure defect.

596. Between 2003 and 2010, over 1.3 million GM-branded vehicles in the United States were sold with a safety defect that causes the vehicle's electric power steering ("power steering") to suddenly fail during ordinary driving conditions and revert back to manual steering, requiring greater effort by the driver to steer the vehicle and increasing the risk of collisions and injuries.

597. The affected vehicles are MY 2004-2006 and 2008-2009 Chevrolet Malibu, 2004-2006 Chevrolet Malibu Maxx, 2009-2010 Chevrolet HHR, 2010 Chevrolet Cobalt, 2005-2006 and 2008-2009 Pontiac G6, 2004-2007 Saturn Ion, and 2008-2009 Saturn Aura vehicles.

598. As with the ignition switch defects and many of the other defects, New GM was aware of the power steering defect long before it took anything approaching full remedial action.

599. When the power steering fails, a message appears on the vehicle's dashboard, and a chime sounds to inform the driver. Although steering control can be maintained through manual steering, greater driver effort is required, and the risk of an accident is increased.

600. In 2010, New GM first recalled Chevy Cobalt and Pontiac G5 models for these power steering issues, yet it did *not* recall the many other vehicles that had the very same power steering defect.

601. Documents released by NHTSA show that New GM waited years to recall nearly 335,000 Saturn Ions for power-steering failure—despite receiving nearly 4,800 consumer complaints and more than 30,000 claims for warranty repairs. That translates to a complaint rate of 14.3 incidents per thousand vehicles and a warranty claim rate of 9.1 percent. By way of comparison, NHTSA has described as "high" a complaint rate of 250 complaints per 100,000 vehicles.[188] Here, the rate translates to 1,430 complaints per 100,000 vehicles.

602. In response to the consumer complaints, in September 2011, NHTSA opened an investigation into the power-steering defect in Saturn Ions.

603. NHTSA database records show complaints from Ion owners as early as June 2004, with the first injury reported in May 2007.

604. NHTSA has linked approximately 12 crashes and two injuries to the power-steering defect in the Ions.

605. In September 2011, after NHTSA began to make inquiries about the safety of the Saturn Ion, GM acknowledged that it had received almost 3,500 customer reports claiming a sudden loss of power steering in 2004-2007 Ion vehicles.

[188] *See* https://www-odi.nhtsa.dot.gov/cars/problems/defect/-results.cfm?action_number=EA06002&SearchType= QuickSearch&summary=true.

606. The following month, New GM engineer Terry Woychowski informed current CEO Mary Barra—then head of product development—that there was a serious power-steering issue in Saturn Ions, and that it may be the same power steering issue that plagued the Chevy Cobalt and Pontiac G5. Ms. Barra was also informed of the ongoing NHTSA investigation. At the time, NHTSA reportedly came close to concluding that Saturn Ions should have been included in New GM's 2010 steering recall of Cobalt and G5 vehicles.

607. Instead of recalling the Saturn Ion, GM sent dealers a service bulletin in May of 2012 identifying complaints about the steering system in the vehicle.

608. By the time GM finally recalled the Saturn Ion—four years later, in March 2014—NHTSA had received more than 1,200 complaints about the vehicle's power steering. Similar complaints resulted in over 30,000 warranty claims with GM.

609. After announcing the March 31, 2014 recall, Jeff Boyer, New GM's Vice President of Global Vehicle Safety, acknowledged that New GM recalled some of these same vehicle models previously for the ***same issue***, but that New GM "did not do enough."

610. According to an analysis by the NEW YORK TIMES published on April 20, 2014, New GM has "repeatedly used technical service bulletins to dealers and sometimes car owners as stopgap safety measures instead of ordering a timely recall."

611. Former NHTSA head Joan Claybrook echoed this conclusion, stating, "There's no question that service bulletins have been used where recalls should have been."

612. NHTSA has recently criticized New GM for issuing service bulletins on at least four additional occasions in which a recall would have been more appropriate and in which New GM later, in fact, recalled the subject vehicles.

613. These inappropriate uses of service bulletins prompted Frank Borris, the top defect investigator for NHTSA, to write to New GM's product investigations director, Carmen Benavides, in July 2013, complaining that "GM is slow to communicate, slow to act, and, at times, requires additional effort . . . that we do not feel is necessary with some of [GM's] peers."

614. Mr. Borris' correspondence was circulated widely among New GM's top executives. Upon information and belief, the following employees received a copy: John Calabrese and Alicia Boler-Davis, two vice presidents for product safety; Michael Robinson, vice president of regulatory affairs; engineer Jim Federico; Gay Kent, director of product investigations who had been involved in safety issues with the Cobalt since 2006; and William Kemp, an in-house product liability lawyer.

b. Power steering hose clamp defect.

615. On June 18, 2014, New GM issued a safety recall of 57,192 MY 2015 Chevrolet Silverado 2500/3500 HD and 2015 GMC Sierra 2500/3500 HD vehicles with a power steering hose clamp defect.

616. In the affected vehicles, the power steering hose clamp may disconnect from the power steering pump or gear, causing a loss of power steering fluid. A loss of power steering fluid can result in a loss of power steering assist and power brake assist, increasing the risk of a crash.

c. Power steering control module defect.

617. On July 22, 2014, New GM recalled 57,242 MY 2014 Chevrolet Impala vehicles with a Power Steering Control Module defect.

618. Drivers of the affected vehicles may experience reduced or no power steering assist at start-up or while driving due to a poor electrical ground connection to the Power Steering Control Module. If power steering is lost, the vehicle will revert to manual steering

mode. Manual steering requires greater driver effort and increases the risk of accident. New GM acknowledges one crash related to this condition.

619. On May 17, 2013, New GM received a report of a 2014 Impala losing communication with the Power Steering Control Module. On or about May 24, 2013, New GM determined the root cause was a poor electrical connection at the Power Steering Control Module grounding stud wheelhouse assembly.

620. But New GM's initial efforts to implement new procedures and fix the issue were unsuccessful. In January 2014, New GM reviewed warranty data and discovered 72 claims related to loss of assist or the Service Power Steering message after implementation of New GM's process improvements.

621. Then, on February 25, 2014, New GM received notice of a crash involving a 2014 Impala that was built in 2013. The crash occurred when the Impala lost its power steering, and crashed into another vehicle as a result.

622. In response, New GM monitored field and warranty data related to this defect and, as of June 24, 2014, it identified 253 warranty claims related to loss of power steering assist or Service Power Steering messages.

623. On July 15, 2014, New GM finally issued a safety recall for the vehicles, having been unsuccessful in its efforts to minimize and conceal the defect.

d. Lower control arm ball joint defect.

624. On July 18, 2014, New GM issued a safety recall of 1,919 MY 2014-2015 Chevrolet Spark vehicles with a lower control arm ball joint defect.

625. The affected vehicles were assembled with a lower control arm bolt not fastened to specification. This can cause the separation of the lower control arm from the steering

knuckle while the vehicle is being driven, and result in the loss of steering control. The loss of steering control in turn creates a risk of accident.[189]

e. Steering tie-rod defect.

626. On May 13, 2014, New GM issued a safety recall of 477 MY 2014 Chevrolet Silverado, 2014 GMC Sierra, and 2015 Chevrolet Tahoe vehicles with a steering tie-rod defect.

627. In the affected vehicles, the tie-rod threaded attachment may not be properly tightened to the steering gear rack. An improperly tightened tie-rod attachment may allow the tie-rod to separate from the steering rack and greatly increases the risk of a vehicle crash.[190]

f. Joint fastener torque defect.

628. On June 30, 2014, New GM issued a safety recall of 106 MY 2014 Chevrolet Camaro, 2014 Chevrolet Impala, 2014 Buick Regal, and 2014 Cadillac XTS vehicles with a joint fastener torque defect.

629. In the affected vehicles, joint fasteners were not properly torqued to specification at the assembly plant. As a result of improper torque, the fasteners may "back out" and cause a "loss of steering," increasing the risk of a crash.[191]

630. New GM claims that it was alerted to the problem by a warranty claim filed on December 23, 2013, at a California dealership for a Chevrolet Impala built at New GM's Oshawa car assembly plant in Ontario, Canada. Yet the Oshawa plant was not informed of the issue until March 4, 2014.[192]

631. Between March 4 and March 14, 2014, the Oshawa plant conducted a "root cause" investigation and concluded that the problem was caused by an improperly fastened

[189] *See* July 18, 2014 Letter from New GM to NHTSA.

[190] *See* May 27, 2014 Letter from New GM to NHTSA.

[191] *See* July 2, 2014 Letter from New GM to NHTSA.

[192] *Id.*

"Superhold" joint. Though the Impala was electronically flagged for failing to meet the requisite torque level, the employee in charge of correcting the torque level failed to do so.[193]

632. On or about March 14, 2014, New GM learned of two more warranty claims concerning improperly fastened Superhold joints. Both of the vehicles were approved by the same employee who had approved the corrective action for the joint involved in the December 23, 2013 warranty claim. The two additional vehicles were also flagged for corrective action, but the employee failed to correct the problem.[194]

633. On March 20, 2014, New GM concluded the derelict employee had approved 112 vehicles after they were flagged for corrective action to the Superhold joint.[195]

634. Yet New GM waited until June 25, 2014 before deciding to conduct a safety recall.

6. Safety defects affecting the powertrain in GM-branded vehicles.

a. Transmission shift cable defect affecting 1.1 million Chevrolet and Pontiac vehicles.

635. On May 19, 2014, New GM issued a safety recall for more than 1.1 million MY 2007-2008 Chevrolet Saturn, 2004-2008 Chevrolet Malibu, 2004-2007 Chevrolet Malibu Maxx, and 2005-2008 Pontiac G6 vehicles with dangerously defective transmission shift cables.

636. In the affected vehicles, the shift cable may fracture at any time, preventing the driver from switching gears or placing the transmission in the "park" position. According to New GM, "[i]f the driver cannot place the vehicle in park, and exits the vehicle without applying the park brake, the vehicle could roll away and a crash could occur without prior warning."[196]

---

[193] *Id.*

[194] *Id.*

[195] *Id.*

[196] *See* New GM letter to NHTSA Re: NHTSA Campaign No. 14V-224 dated May 22, 2014, at 1.

637. Yet again, New GM knew of the shift cable defect long before it issued the recent recall of more than 1.1 million vehicles with the defect.

638. In May of 2011, NHTSA informed New GM that it had opened an investigation into failed transmission cables in 2007 model year Saturn Aura vehicles. In response, New GM noted "a cable failure model in which a tear to the conduit jacket could allow moisture to corrode the interior steel wires, resulting in degradation of shift cable performance, and eventually, a possible shift cable failure."[197]

639. Upon reviewing these findings, New GM's Executive Field Action Committee conducted a "special coverage field action for the 2007-2008 MY Saturn Aura vehicles equipped with 4 speed transmissions and built with Leggett & Platt cables." New GM apparently chose that cut-off date because, on November 1, 2007, Kongsberg Automotive replaced Leggett & Platt as the cable provider.[198]

640. New GM did not recall any of the vehicles with the shift cable defect at this time, and limited its "special coverage field action" to the 2007-2008 Aura vehicles even though "the same or similar Leggett & Platt cables were used on … Pontiac G6 and Chevrolet Malibu (MMX380) vehicles."

641. In March 2012, NHTSA sent New GM an Engineering Assessment request to investigate transmission shift cable failures in 2007-2008 MY Aura, Pontiac G6, and Chevrolet Malibu.[199]

642. In responding to the Engineering Assessment request, New GM for the first time "noticed elevated warranty rates in vehicles built with Kongsberg shift cables." Similar to their

[197] *Id.* at 2.

[198] *Id.*

[199] *Id.*

predecessor vehicles built with Leggett & Platt shift cables, in the vehicles built with Kongsberg shift cables "the tabs on the transmission shift cable end may fracture and separate without warning, resulting in failure of the transmission shift cable and possible unintended vehicle movement."[200]

643. On September 13, 2012, the Decision Committee decided to conduct a safety recall. This initial recall was limited to 2008-2010 MY Saturn Aura, Pontiac G6, and Chevrolet Malibu vehicles with 4-speed transmission built with Kongsberg shifter cables, as well as 2007-2008 MY Saturn Aura and 2005-2007 MY Pontiac G6 vehicles with 4-speed transmissions which may have been serviced with Kongsberg shift cables.[201]

644. But the shift cable problem was far from resolved.

645. In March of 2013, NHTSA sent New GM a second Engineering Assessment concerning allegations of failure of the transmission shift cables on all 2007-2008 MY Saturn Aura, Chevrolet Malibu, and Pontiac G6 vehicles.[202]

646. New GM continued its standard process of "investigation" and delay. But by May 9, 2014, New GM was forced to concede that "the same cable failure mode found with the Saturn Aura 4-speed transmission" was present in a wide population of vehicles.[203]

647. Finally, on May 19, 2014, New GM decided to conduct a safety recall of more than 1.1 million vehicles with the shift cable defect.

b. Transmission shift cable defect affecting Cadillac vehicles.

648. On June 18, 2014, New GM issued a safety recall of 90,750 MY 2013-2014 Cadillac ATS and 2014 Cadillac CTS vehicles with a transmission shift cable defect.

---

[200] *Id.*

[201] *Id.*

[202] *Id.*

[203] *Id.*

649. In the affected vehicles, the transmission shift cable may detach from either the bracket on the transmission shifter or the bracket on the transmission. If the cable detaches while the vehicle is being driven, the transmission gear selection may not match the indicated gear and the vehicle may move in an unintended or unexpected direction, increasing the risk of a crash. Furthermore, when the driver goes to stop and park the vehicle, the transmission may not be in "PARK" even though the driver has selected the "PARK" position. If the vehicle is not in the "PARK" position, there is a risk the vehicle will roll away as the driver and other occupants exit the vehicle or anytime thereafter. A vehicle rollaway causes a risk of injury to exiting occupants and bystanders.

650. On March 20, 2014, a New GM dealership contacted an assembly plant about a detached transmission shift cable. The assembly plant investigated and discovered one additional detached shift cable in the plant.

651. New GM assigned a product investigation engineer was assigned, and from March 24 to June 2, 2014, New GM examined warranty claims and plant assembly procedures and performed vehicle inspections. Based on these findings, New GM issued a safety recall on June 11, 2014.

c. Transmission oil cooler line defect.

652. On March 31, 2014, New GM issued a safety recall of 489,936 MY 2014 Chevy Silverado, 2014 GMC Sierra, 2014 GMC Yukon, 2014 GMC Yukon XL, 2015 Chevy Tahoe, and 2015 Chevy Suburban vehicles with a transmission oil cooler line defect.

653. In the affected vehicles, the transmission oil cooler lines may not be securely seated in the fitting. This can cause transmission oil to leak from the fitting, where it can contact a hot surface and cause a vehicle fire.

654. On September 4, 2013, a New GM assembly plant in Silao, Mexico experienced two instances in which a transmission oil cooler line became disconnected from the thermal bypass valve in 2014 pick-up trucks on the K2XX platform during pressure tests. As a result, New GM required the supplier of the transmission oil cooler lines and thermal bypass valve assembly (collectively the "transmission oil cooler assembly") for these vehicles to issue a Quality Alert for its facility concerning the transmission oil cooler assemblies. The supplier sorted the over 3,000 TOC assemblies at its facility, performed manual pull checks and visual inspections, and found no defects.

655. New GM also conducted manual pull checks and visual inspections on the transmission oil cooler assemblies in the two New GM assembly plants responsible for the K2XX platform at the time (Silao, Mexico and Fort Wayne, Indiana), and identified no defects.

656. On September 19, 2013, the supplier provided New GM with a plan to ensure that the transmission oil cooler lines were properly connected to the thermal bypass valve going forward. In addition to continuing its individual pull tests to verify that these connections were secure, the supplier planned to add a manual alignment feature to the three machines that it used to connect the transmission oil cooler lines to the thermal bypass valve boxes. The supplier completed these upgrades on October 28, 2013.

657. On January 2, 2014, New GM's Product Investigations, Field Performance Assessment, and K2XX program teams received an investigator's report concerning a 2014 Chevrolet Silverado that caught fire during a test drive from a dealer in Gulfport, Mississippi on December 16, 2013. New GM's on-site investigation of the vehicle revealed that a transmission oil cooler line had disconnected from the thermal bypass valve box. The build date for this vehicle was October 10, 2013, and the build date for the transmission oil cooler assembly was

September 28, 2013, prior to the supplier's October 28, 2013 completion of its machinery upgrades.

658. On January 3, 2014, New GM issued a Quality Alert to its assembly plants for K2XX vehicles, advising them to manually inspect the transmission oil cooler assemblies from the supplier to ensure that the transmission oil cooler lines were securely connected. New GM also informed the supplier of the Mississippi event.

659. On January 15, 2014, New GM learned that a 2014 Chevrolet Silverado had recently caught fire while being driven by a dealer salesperson. New GM's investigation of the incident determined that one of the vehicle's transmission oil cooler lines was disconnected from the thermal bypass valve box. The vehicle was built on November 12, 2013.

660. On January 29, after completing its investigation, New GM followed up with its K2XX assembly plants, and found no additional cases involving disconnected transmission oil cooler lines after the January 3 Quality Alert.

661. On January 31, 2014, a team from New GM traveled to the supplier's facility to work with the supplier on its thermal valve assembly process. By February 27, 2014, the supplier added pressure transducers to the machine fixtures used to connect the transmission oil cooler lines to the thermal bypass valve boxes to directly monitor the delivery of air pressure to the pull-test apparatus.

662. On March 23, 2014, a 2015 GMC Yukon caught fire during a test drive from a dealership in Anaheim, California. On March 24, 2014, New GM formed a team to investigate the incident; the team was dispatched to Anaheim that afternoon. On the morning of March 25, 2014, the New GM team examined the vehicle in Anaheim and determined that the incident was caused by a transmission oil cooler line that was disconnected from the thermal bypass valve

box. The assembly plants for K2XX vehicles were placed on hold and instructed to inspect all transmission oil cooler assemblies in stock, as well as those in completed vehicles. A team from New GM also traveled to the supplier on March 25, 2014, to further evaluate the assembly process.

663. On March 26, 2014, New GM personnel along with personnel from the supplier examined the transmission oil cooler assembly from the Anaheim vehicle. The group concluded that a transmission oil cooler line had not been properly connected to the thermal bypass valve box. The build date for the thermal valve assembly in the Anaheim vehicle was determined to be January 16, 2014, after the supplier's October 28, 2013 machinery upgrades, but before its February 27, 2014 process changes.

664. On March 27, 2014, the Product Investigator assigned to this matter received a list of warranty claims relating to transmission fluid leaks in K2XX vehicles, which he had requested on March 24. From that list, he identified five warranty claims, ranging from August 30, 2013, to November 20, 2013, that potentially involved insecure connections of transmission oil cooler lines to the thermal bypass valve box, none of which resulted in a fire. All five vehicles were built before the supplier completed its machinery upgrades on October 28, 2013.

665. Also on March 27, 2014, following discussions with New GM, the supplier began using an assurance cap in connecting the transmission oil cooler lines to the thermal bypass valve boxes to ensure that the transmission oil cooler lines are properly secured.

666. On March 28, 2014, New GM decided to initiate a recall of vehicles built on the K2XX platform so that they can be inspected to ensure that the transmission oil cooler lines are properly secured to the thermal bypass valve box.

d. Transfer case control module software defect.

667. On June 26, 2014, New GM issued a safety recall of 392,459 MY 2014-2015 Chevrolet Silverado, 2015 Chevrolet Tahoe, 2015 Chevrolet Suburban, 2014-2015 GMC Sierra, 2015 GMC Yukon, and 2015 GMC Yukon XL vehicles with a transfer case control module software defect.

668. In the affected vehicles, the transfer case may electronically switch to neutral without input from the driver. If the transfer case switches to neutral while the vehicle is parked and the parking brake is not in use, the vehicle may roll away and cause injury to bystanders. If the transfer case switches to neutral while the vehicle is being driven, the vehicle will lose drive power, increasing the risk of a crash.

669. New GM first observed this defect on February 14, 2014, when a 2015 model year development vehicle, under slight acceleration at approximately 70 mph, shifted into a partial neutral position without operator input. When the vehicle shifted into neutral, the driver lost power, could not shift out of neutral, and was forced to stop driving. Once the vehicle stopped, the transfer case was in a complete neutral state and could not be moved out of neutral.

670. On or about February 17, 2014, New GM contacted Magna International Inc., the supplier of the transfer case and the Transfer Case Control Module ("TCCM") hardware and software, to investigate the incident. Magna took the suspect TCCM for testing.

671. From mid-February through mid-March, Magna continued to conduct testing. On March 18, Magna provided its first report to New GM but at that time, Magna had not fully identified the root cause.

672. On March 27, Magna provided an updated report that identified three scenarios that could cause a transfer case to transfer to neutral.

673. Between late March and April, New GM engineers continued to meet with Magna to identify additional conditions that would cause the unwanted transfer to neutral. New GM engineers also analyzed warranty information to identify claims for similar unwanted transfer conditions.

674. Two warranty claims for unwanted transfers were identified that appeared to match the conditions exhibited on February 14, 2014. Those warranty claims were submitted on March 3 and March 18, 2014. On April 23, 2014, a Product Investigation engineer was assigned. A Problem Resolution case was initiated on May 20, 2014.

675. The issue was presented to Open Investigation Review on June 16, 2014, and on June 18, 2014, New GM decided to conduct a safety recall.

e. Acceleration-lag defect.

676. On April 24, 2014, New GM issued a safety recall of 50,571 MY 2013 Cadillac SRX vehicles with an acceleration-lag defect.

677. In the affected vehicles, there may be a three to four-second lag in acceleration due to faulty transmission control module programming. That can increase the risk of a crash.

678. On October 24, 2013, New GM's transmission calibration group learned of an incident involving hesitation in a company owned vehicle. New GM obtained the vehicle to investigate and recorded one possible event showing a one second hesitation.

679. In early December 2013, New GM identified additional reports of hesitation from the New GM company-owned vehicle driver fleet, as well as NHTSA VOQs involving complaints of transmission hesitation in the 2013 SRX vehicles.

680. In mid-February 2014, the transmission calibration team obtained additional company vehicles and repurchased customer vehicles that were reported to have transmission hesitation in order to install data loggers and attempt to reproduce the defect. On February 20,

2014, and February 27, 2014, New GM captured two longer hesitation events consistent with customer reports.

681. In response to the investigation, New GM issued a safety recall for the affected vehicles on April 17, 2014.

f. Transmission turbine shaft fracture defect.

682. On June 11, 2014, New GM recalled 21,567 MY 2012 Chevrolet Sonic vehicles equipped with a 6 Speed Automatic Transmission and a 1.8L Four Cylinder Engine suffering from a turbine shaft fracture defect.

683. In the affected vehicles, the transmission turbine shaft may fracture. If the transmission turbine shaft fracture occurs during vehicle operation in first or second gear, the vehicle will not upshift to the third through sixth gears, limiting the vehicle's speed. If the fracture occurs during operation in third through sixth gear, the vehicle will coast until it slows enough to downshift to first or second gear, increasing the risk of a crash.[204]

684. The turbine shafts at issue were made by Sundram Fasteners Ltd.[205] In November 2013, New GM learned of two broken turbine shafts in the affected vehicles when transmissions were returned to New GM's Warranty Parts Center. New GM sent the shafts to Sundram, but Sundram did not identify any "non-conformities."[206] But "[s]ubsequent investigation by GM identified a quality issue" with the Sundram turbine shafts.[207]

685. By late January 2014, 5 or 6 more transmissions "were returned to the WPC for the same concern." That prompted a warranty search for related claims by New GM's "Quality Reliability Durability (QRD) lead for Gears and Shafts and Validation Engineer for Global Front

[204] *See* June 11, 2014 Letter from New GM to NHTSA.

[205] *Id.*

[206] *Id.*

[207] *Id.*

Wheel 6 Speed Transmission…." That search revealed "a clear increase in incidents for 2012 Sonic built with 6T30 turbine shaft[s] during late February to June of 2012."[208]

686. In March of 2014, New GM engineers found that turbine shafts made "in the suspect window were found to have a sharp corner and not a smooth radius in the spline." Testing done in April of 2014 apparently showed a lower life expectancy for "shafts with sharp corners" as opposed to "shafts with smooth radii."[209]

687. On June 4, 2014, New GM "decided to conduct a safety recall," and New GM did so on June 11, 2014.[210]

g. Automatic transmission shift cable adjuster.

688. On February 20, 2014, New GM issued a noncompliance recall of 352 MY 2014 Buick Enclave, Buick LaCrosse, Buick Regal, Buick Verano, Chevrolet Cruze, Chevrolet Impala, Chevrolet Malibu, Chevrolet Traverse, and GMC Acadia vehicles with defective automatic transmission shift cable adjusters.[211]

689. In the affected vehicles, one end of the transmission shift cable adjuster body has four legs that snap over a ball stud on the transmission shift lever. One or more of these legs may have been fractured during installation. If any of the legs are fractured, the transmission shift cable adjuster may disengage from the transmission shift lever. When that happens, the driver may be unable to shift gears, and the indicated gear position may not be accurate. If the adjuster is disengaged when the driver attempts to stop and park the vehicle, the driver may be able to shift the lever to the "PARK" position but the vehicle transmission may not be in the

[208] *Id.*

[209] *Id.*

[210] *Id.*

[211] *See* February 20, 2014 Letter from New GM to NHTSA.

"PARK" gear position. That creates the risk that the vehicle will roll away as the driver and other occupants exit the vehicle, or anytime thereafter.[212]

690. These vehicles may not conform with Federal Motor Vehicle Safety Standard 102 for Transmission Shift Lever Sequence Starter Interlock and Transmission Braking Effect, or Federal Motor Vehicle Safety Standard 114 for Theft Protection and Rollaway Prevention.

7. Other serious defects affecting GM-branded vehicles.

a. Power management mode software defect.

691. On January 13, 2014, New GM issued a safety recall of 324,970 MY 2014 Chevy Silverado and GMC Sierra Vehicles with a Power Management Mode software defect.[213]

692. In the affected vehicles, the exhaust components can overheat, melt nearby plastic parts, and cause an engine fire. GM acknowledges that the Power Management Mode software defect is responsible for at least six fires in the affected vehicles.[214]

b. Light control module defect.

693. On May 16, 2014, New GM issued a safety recall of 217,578 model year 2004-2008 Chevrolet Aveo vehicles with a light control module defect.[215]

694. In the vehicles, heat generated within the daytime running lamp module in the center console in the instrument panel may melt the module and cause a vehicle fire.[216] New GM first became aware of this issue when two Suzuki Forenza vehicles suffered interior fires in

[212] *Id.*

[213] *See* New GM Letter to NHTSA dated January 23, 2014.

[214] *Id.*

[215] *See* May 30, 2014 Letter from New GM to NHTSA.

[216] *Id.*

March of 2012; an investigation conducted by GM North America found evidence that the fires emanated from the connection of the wiring at the module.[217]

695. New GM took no remedial action at this time.

696. Then in May of 2012, New GM conducted a TREAD data and NHTSA VOQ search for "thermal issues" related. The search uncovered 13 customer claims and two VOQs "that implied the DRL as the source of the issue."[218]

697. Finally, on May 16, 2014, New GM decided to conduct a safety recall.

698. New GM does not provide adequate explanation for why it took more than two years for it to remedy the problem it was aware of by March of 2012.

699. On May 16, 2014, GM recalled 218,214 MY 2004-2008 Chevrolet Aveo (subcompact) and 2004-2008 Chevrolet Optra (subcompact) vehicles. In these vehicles, heat generated within the light control module in the center console in the instrument panel may melt the module and cause a vehicle fire.

c. Electrical short in driver's door module defect.

700. On June 30, 2014, New GM issued a safety recall of 181,984 model year 2005-2007 Chevrolet Trailblazer, 2006 Chevrolet Trailblazer EXT, 2005-2007 Buick Rainier, 2005-2007 GMC Envoy, 2006 GMC Envoy XL, 2005-2007 Isuzu Ascender, and 2005-2007 Saab 9-7x vehicles with a defect that can cause an electrical short in the driver's door module.[219]

701. In the affected vehicles, an electrical short in the driver's door module may occur that can disable the power door lock and window switches and overheat the module. The overheated module can then cause a fire in the affected vehicles.

---

[217] *Id.*

[218] *Id.*

[219] *See* July 2, 2014 Letter from New GM to NHTSA.

702. The defect apparently arose from an earlier "repair" provided by New GM for certain vehicles which consisted of applying a "protective coating" to the modules. The "repair" allowed fluids to enter the driver's door module, and a short could result.[220]

703. New GM finally identified this issue, and issued a safety recall on June 30, 2014.

d. Front axle shaft defect.

704. On March 28, 2014, New GM issued a safety recall of 174,046 model year 2013-2014 Chevrolet Cruze vehicles with dangerous front axle shaft defect.[221]

705. In the affected vehicles, the right front axle shaft may fracture and separate. If this happens while the vehicle is being driven, the vehicle will lose power and coast to a halt. If a vehicle with a fractured shaft is parked and the parking brake is not applied, the vehicle may move unexpectedly and cause accident and injury.[222]

706. New GM admits to knowledge of "several dozen" half-shaft fractures through its warranty data.[223]

707. The several dozen instances could have been prevented. Indeed, in September of 2013, New GM conducted a safety recall of model year 2013-2014 Chevrolet Cruze vehicles, but limited the recall to (i) vehicles built between January 24, 2013-August 1, 2013 and (ii) had manual transmission.[224] New GM did so even though both manual and automatic Cruze vehicles used "half shafts containing tubular bars manufactured by GM's second-tier supplier, Korea Delphi Automotive Systems Corporation."[225]

---

[220] *Id.*

[221] *See* March 28, 2014 Letter from New GM to NHTSA.

[222] *Id.*

[223] "GM recalls 172,000 Chevrolet Cruze Sedans over front axle half-shaft," *Bloomberg*, March 31, 2014.

[224] *See* April 11, 2014 Letter from New GM to NHTSA.

[225] *Id.*

708. The 2013 recall was inadequate. By February of 2014, New GM was aware of at least 47 claims of fractured tubular bars in model year 2013-2014 Cruze vehicles with automatic transmission. New GM also learned that some of the manual Cruze vehicles that were "repaired" in the 2013 recall had ***subsequently*** suffered fractured half shafts. Finally, New GM learned of fractured half-shaft in Cruze vehicles that were built ***after*** the August 1, 2013 build-date cutoff for the 2013 recall.[226]

709. Finally, on March 26, 2014, New GM issued a safety recall that included (i) broader "build-date" coverage; (ii) both manual and automatic Cruze vehicles, and (iii) some manual Cruze vehicles that had been improperly repaired in the 2013 recall.

e. Seat hook weld defect.

710. On July 22, 2014, New GM recalled 124,007 model year 2014 Chevrolet SS, 2014 Chevrolet Caprice, 2014 Chevrolet Caprice PPC, 2014 Chevrolet Silverado 1500, 2015 Chevrolet Silverado 2500/3500 HD, 2013-2014 Buick Encore, 2013-2014 Cadillac ATS, 2014 Cadillac CTS, 2014 Cadillac ELR, 2014 GMC Sierra 1500, and 2015 GMC Sierra 2500/3500 HD vehicles with a seat hook weld defect.[227]

711. In the affected vehicles, as the result of an incomplete weld on the seat hook bracket assembly, in a "high load" situation, "the hook may separate from the seat track, increasing the risk of occupant injury in a crash."[228]

f. Front turn signal bulb defect.

712. On July 21, 2014, New GM recalled 120,426 model year 2013 Chevrolet Malibu and 2011-2013 Buick Regal vehicles with a front turn signal bulb defect.

---

[226] *Id.*

[227] *See* July 22, 2014 Letter from New GM to NHTSA.

[228] *Id.*

713. In the affected vehicles, the driver will see a rapidly flashing turn signal arrow in the instrument cluster if both bulbs in one turn signal are burned out; but if only one bulb on either side burns out, there will be no signal to the driver. The failure to properly warn the driver that a turn signal is inoperable increases the risk of accident.

714. New GM first learned of the defect on September 6, 2012, when it conducted a read-across review on turn signal bulb outage and discovered that when one of the two front turn signal bulbs on either side burns out, there was no indication to the driver, and that the remaining functioning bulb did not likely meet the photometric requirements for turn signal lamps under Federal Motor Vehicle Safety Standards. On September 26, 2012, New GM confirmed these vehicles did not comply with federal standards.

715. However, New GM attempted to categorize this noncompliance as "inconsequential as it relate[s] to motor vehicle safety" by submitting a petition for exemption from the notification and remedy requirements of the Motor Vehicle Safety Act on October 25, 2012. On July 15, 2014, New GM's petition was denied, and the company was forced to issue a recall.

g. Low-beam headlight defect.

716. On May 14, 2014, New GM issued a safety recall of 103,158 MY 2005-2007 Chevrolet Corvette vehicles with a low-beam headlight defect.

717. In the affected vehicles, the underhood bussed electrical center housing can expand and cause the headlamp low beam relay control circuit wire to bend. When the wire is repeatedly bent, it can fracture and cause a loss of low-beam headlamp illumination. The loss of illumination decreases the driver's visibility and the vehicle's conspicuity to other motorists, increasing the risk of a crash.

718. In May of 2013, prompted by 30 reports from drivers of the affected vehicles, NHTSA opened a preliminary evaluation of allegations of simultaneous loss of both low-beam headlights without warning in the affected vehicles. The preliminary investigation looked at the low-beam headlights and all associated components, including but not limited to, switches, fuses and fuse box, and wiring and connectors. New GM did not respond to the preliminary evaluation until June 27, 2013.

719. On August 23, 2013, NHTSA upgraded the preliminary evaluation to an engineering analysis and expanded the vehicle scope to include MY 2005-2013 Chevrolet Corvette vehicles. NHTSA provided New GM with Vehicle Owners' Questionnaires related to customer complaints of loss of low-beam headlamps.

720. On January 14, 2014, New GM responded to the engineering analysis and had ongoing discussions with NHTSA through February 2014 regarding the Corvette vehicle.

721. But New GM did nothing further until May 1, 2014, when it finally reviewed and analyzed warranty data and other records accumulated since NHTSA's August 2013 data request. At this time NHTSA also provided New GM additional Vehicle Owners' Questionnaires received since January 2014. After New GM analyzed the data received by model year for the affected vehicles, it presented its findings to the Field Performance Evaluation Review Committee on May 5, 2014, and on May 7, 2014, New GM decided to conduct a safety recall to remedy the low-beam headlight defect.

h. Radio chime defect.

722. On June 5, 2014, New GM issued a noncompliance recall of 57,512 MY 2014 Chevrolet Silverado LD, 2015 Chevrolet Silverado HD, 2015 Chevrolet Suburban, 2015 Chevrolet Tahoe, 2014 GMC Sierra LD, and 2015 GMC Sierra HD vehicles with a radio chime defect.

723. In the affected vehicles, the radios may become inoperative; when that happens, there is no audible chime to notify the driver if the door is opened with the key in the ignition and no audible seat belt warning indicating that the seat belts are not buckled. These vehicles fail to comply with the requirements of FMVSS numbers 114, "Theft Protection and Rollaway Prevention," and 208, "Occupant Crash Protection." Without an audible indicator, the driver may not be aware that the driver's door is open while the key is in the ignition, and that creates a risk of a vehicle rollaway. Additionally, there will be no reminder that the driver's or front seat passenger's seat belt is not buckled, which increases the risk of injury in a crash.

724. New GM ordered a vehicle stop-shipment on April 28, 2014. From April 30, 2014, through May 6, 2014, affected base radios were re-flashed with updated software at assembly plants, and on May 21, 2014, a service bulletin was issued with instructions to update the software in the affected vehicles.

725. But New GM's efforts did not comply with the FMVSS, as it learned on May 28, 2014, after consulting its regulatory engineers. New GM issued a noncompliance recall on May 29, 2014.

i. Fuel gauge defect.

726. On April 29, 2014, New GM issued a safety recall of 51,460 MY 2014 Chevrolet Traverse, GMC Acadia, and Buick Enclave vehicles with a fuel gauge defect.

727. In the affected vehicles, the engine control module software may cause inaccurate fuel gauge readings. An inaccurate fuel gauge may result in the vehicle unexpectedly running out of fuel and stalling, and thereby increases the risk of accident.

728. In July 2013, New GM began producing the 2014 MY Buick Enclave, Chevrolet Traverse, and GMC Acadia vehicles with a revised software calibration to better predict fuel

levels. The revised calibration takes into account actions such as refueling events, sloshing of fuel during operation, and consumption rates to better predict fuel level readings.

729. But in August 2013, New GM received feedback from rental fleet customers regarding errors in gauge readings predominantly at the "full" end of the range. Many rental customers complained they were charged a fuel surcharge for vehicles that had been refueled but were still reading less than full. In response, on September 23, 2013, New GM switched back to using the 2013 MY fuel gauge software and calibration in new productions and issued a service bulletin to address the issue in vehicles already out in the market.

730. On November 19, 2013, New GM was put on notice of a quality concern regarding inaccurate fuel gauge readings and warranty claims indicating "running out of fuel." It conducted further searches and, as of December 6, 2013, discovered approximately 1,000 complaints of inaccurate fuel gauge readings, with the majority of these reading less than full, and 62 related to running out fuel.

731. On January 9, 2014, New GM proposed only a customer satisfaction field action. NHTSA took the matter under consideration to provide additional feedback, and returned with information supporting a safety recall in lieu of a customer satisfaction field action.

732. Hence, New GM finally decided to recall the affected vehicles on April 22, 2014.

j. Windshield wiper system defect.

733. On May 14, 2014, New GM recalled 19,225 MY 2014 Cadillac CTS vehicles with a windshield wiper system defect.

734. In the affected vehicles, a defect leaves the windshield wiper system prone to failure; though the windshield wipers systems are particularly prone to failure after a vehicle jump start occurs while the wipers are on and restricted by snow and ice, "an unstable voltage in

the vehicle can reproduce this condition without an external jump start." Inoperative windshield wipers can decrease the driver's visibility and increase the risk of a crash.[229]

735. On January 17, 2014, New GM received a warranty claim and an inoperative wiper module from an affected vehicle. The supplier, BOSCH, examined the module and determined that the MOSFET (metal-oxide-semiconductor field-effect transistor) "Trench 4" was damaged. (A "Trench" is a design style of a MOSFET). New GM engineering and BOSCH then investigated possible causes of MOSFET damage from the part manufacturing through the vehicle assembly processes.[230]

736. On February 26, 2014, BOSCH began using MOSFET Trench 3 instead of Trench 4.

737. On April 15, 2014, "GM was able to reproduce electrical overstress inputs that could create a damaged MOSFET failure in a vehicle with restricted wipers during a jumpstart. GM tested the MOSFET Trench 3 for electrical overstress and they did not exhibit the same failure." BOSCH then "duplicated the MOSFET [Trench] electrical overstress condition on a bench without a vehicle jumpstart."[231]

738. On May 7, 2014, New GM decided to conduct a safety recall, and the recall notice was issued on May 14, 2014.

k. Console bin door latch defect.

739. On August 7, 2014, New GM issued a safety recall of 14,940 MY 2014-2015 Chevrolet Impala vehicles with a console bin door latch defect.[232]

---

[229] *See* May 28, 2014 Letter to NHTSA.

[230] *Id.*

[231] *Id.*

[232] *See* August 7, 2014 Letter from New GM to NHTSA.

740. In the affected vehicles, the inertia latch on the front console bin compartment door may not engage in the event of a rear collision and the front console compartment door may open, increasing the risk of occupant injury.[233] These vehicles fail to comply with the requirements of FMVSS No. 201, "Occupant Protection In Interior Impact."[234]

l. Driver door wiring splice defect.

741. On June 11, 2014, New GM recalled 14,765 MY 2014 Buick LaCrosse vehicles with a driver door wiring splice defect.

742. In the affected vehicles, a wiring splice in the driver's door may corrode and break, resulting in the absence of an audible chime to notify the driver if the door is opened while the key is in the ignition. Additionally, the Retained Accessory Power module may stay active for ten minutes allowing the operation of the passenger windows, rear windows, and sunroof. As such, these vehicles fail to comply with the requirements of FMVSS numbers 114, "Theft Protection and Rollaway Prevention," and 118, "Power-Operated Window, Partition, and Roof Panel Systems." Without an audible indicator, the driver may not be aware that the driver's door is open while the key is in the ignition, increasing the risk of a vehicle rollaway. If the passenger windows, rear windows, and sunroof can function when the vehicle is turned off and the driver is not in the vehicle, there is an increased risk of injury if an unsupervised occupant operates the power closures.

743. New GM first learned of this defect on August 21, 2013, when a test fleet vehicle reported an inoperable driver window swift. New GM added the issue to Problem Resolution.

744. But New GM did not perform a warranty analysis until nearly eight months later in April 2014. The warranty analysis identified additional claims for this condition for harnesses

[233] *Id.*

[234] *Id.*

produced July 2013 through September 2013. On April 21, 2014, the issue was reviewed and a New GM engineer identified "two FMVSS standards, 114 and 118, that may be impacted."

745. A Product Investigations Engineer was assigned to investigate further. On May 8, 2014, a review of TREAD data and additional warranty files revealed additional related claims.

746. New GM finally issued a safety recall on June 4, 2014.

m. Overloaded feed defect.

747. On July 2, 2014, New GM recalled 9,371 MY 2007-2011 Chevrolet Silverado and 2007-2011 GMC Sierra HD vehicles with an overloaded feed defect.

748. In the affected vehicles, an overload in the feed may cause the underhood fusible link to melt due to electrical overload, resulting in potential smoke or flames that could damage the electrical center cover and/or the nearby wiring harness conduit.

749. Sometime prior to January 2012, New GM received reports of four underhood fires resulting from an auxiliary battery fusible link wire melting, opening circuit, and contacting surrounding components. On January 19, 2012, New GM initiated a Customer Satisfaction Program to close a product investigation into the reported fires. New GM states a design change had already been implemented into production in June 2011.

750. More than two years later, on May 5, 2014, the Engineering Analysis department requested that Product Investigations conduct an investigation to confirm the complete population was included in the Customer Satisfaction Program and that the remedy was effective. From May 20 to May 23, 2014, data was reviewed from a recent pull of New GM reports and warranty. The investigation revealed that while all identified vehicles reported to have an incident were included in the original investigation and vehicle population, two vehicles involved in the Customer Satisfaction Program experienced incidents, including one fire,

subsequent to the Customer Satisfaction Program. Both of these vehicles had not had the repair performed.

751. After review during an Open Investigation Review on June 23, 2014, and on June 25, 2014, New GM issued a safety recall for vehicles not yet repaired under the Customer Satisfaction Program.

n. Windshield wiper module assembly defect.

752. On June 26, 2014, New GM recalled 4,794 MY 2013-2014 Chevrolet Caprice and 2014 Chevrolet SS vehicles with a windshield wiper module assembly defect.

753. In the affected vehicles, the motor gear teeth may become stripped and the wipers inoperable. Inoperable wipers increase the risk of accident in inclement conditions.

754. After noting an increase in warranty claims, New GM requested that dealers return parts related to wiper motor warranty claims on February 14, 2014.

755. Nearly three months later, on May 1, 2014, New GM held a meeting with the supplier of the wiper motor and learned that the supplier had used unauthorized grease in the motors built from January 15, 2013 to August 5, 2013. The supplier changed back to the authorized grease after a July 24, 2013 lot test revealed the gear teeth stripping. New GM claims that, prior to May 1, 2014, it was unaware of the grease changes or the gear stripping condition.

756. A root cause investigation between May 7, 2014, and June 3, 2014, conducted by the supplier with New GM Engineering participation, determined the source of the problem was the unauthorized grease and its improper application to the wiper motor gear teeth.

757. On June 19, 2014, New GM decided to conduct a safety recall.

o. Engine block heater power cord insulation defect.

758. On July 2, 2014, New GM issued a safety recall of 2,990 MY 2013-2014 Chevrolet Cruze, 2012-2014 Chevrolet Sonic, 2013-2014 Buick Encore, and 2013-2014 Buick Verano vehicles with an engine block heater power cord insulation defect.

759. In the affected vehicles the insulation on the engine block heater cord can be damaged, exposing the wires. Exposed wires increase the risk of electrical shock and personal injury if the cord is handled while plugged in.

p. Rear shock absorber defect.

760. On June 27, 2014, New GM issued a safety recall of 1,939 MY 2014 Chevrolet Corvette vehicles with a rear shock absorber defect.

761. In the affected vehicles, an insufficient weld in the rear shocks can cause the shock absorber tube to separate from the shock absorber bracket. That separation may cause a sudden change in vehicle handling behavior that can startle drivers and increase the risk of a crash.[235]

q. Electronic stability control defect.

762. On March 26, 2014, New GM issued a safety recall for 656 MY 2014 Cadillac ELR vehicles with an electronic stability control defect.

763. In the affected vehicles, the electronic stability control system software may inhibit certain diagnostics and fail to alert the driver that the electronic stability control system is partially or fully disabled. Therefore, these vehicles fail to conform to FMVSS number 126, "Electronic Stability Control Systems." A driver who is not alerted to an electronic stability

[235] *See* June 26, 2014 Letter from New GM to NHTSA.

control system malfunction may continue driving with a disabled system. That may result in the loss of directional control, greatly increasing the risk of a crash.[236]

r. Unsecured floor mat defect.

764. On June 18, 2014, New GM issued a safety recall of 184 MY 2014 Chevrolet Silverado LD and 2014 GMC Sierra LD vehicles with an unsecured floor mat defect.

765. The affected vehicles built with the optional vinyl flooring option and equipped with the optional All-Weather Floor Mats do not have the retention features necessary to properly secure the floor mat on the driver's side. The driver's floor mat can shift such that it interferes with the accelerator pedal, and thus increases the risk of a crash.[237]

766. On January 20, 2014, a New GM dealership informed New GM marketing that vehicles in affected class of vehicles have no floor mat retention features. Accordingly, New GM should not have permitted that combination of options (the vinyl floor and All-Weather Floor Mats). On January 22, 2014, New GM revised its systems to prevent vehicles being ordered with that combination.[238]

767. New GM waited another month before cancelling all orders for the vinyl flooring and All-Weather Floor Mats on February 24, 2014. Then, on February 25, 2014, New GM instructed its Accessory Distribution Centers not to ship All-Weather Floor Mats to vehicles with the vinyl flooring option.[239] New GM informed dealerships with affected vehicles, and advised them to remove and destroy any floor mats installed in the vehicles. New GM also issued an

[236] *See* March 26, 2014 Letter from New GM to NHTSA.

[237] *See* June 18, 2014 Letter from New GM to NHTSA.

[238] *Id.*

[239] *Id.*

Engineering Work Order to restrict orders for All-Weather Floor Mats to vehicles with the carpet floor covering option.[240]

768. Inexplicably, though New GM presented this issue to the Field Performance Evaluation group on February 25, 2014, it was not until June 11, 2014 that New GM decided to conduct a safety recall.[241]

s. Fuse block defect.

769. On May 23, 2014, New GM issued a safety recall of 58 MY 2015 Chevrolet Silverado HD and GMC Sierra HD vehicles with a fuse block defect.

770. In the affected vehicles, the retention clips that attach the fuse block to the vehicle body can become loose allowing the fuse block to move out of position. When this occurs, exposed conductors in the fuse block may contact the mounting studs or other metallic components, which in turn causes a "short to ground" event. That can result in an arcing condition, igniting nearby combustible materials and starting an engine fire.[242]

771. New GM became aware of this issue by January 30, 2014, when the fuse block became disconnected and resulted in the fiber wheel liner catching fire during testing of an affected vehicle at the Flint Assembly Plant. New GM put a hold on all vehicles with suspect fuse block, and assigned an internal investigator to the issue.[243]

772. On February 3, 2014, New GM issued a Stop Delivery Order on all of the vehicles with the suspect fuse block and informed NHTSA of the issue. At the time, New GM

[240] *Id.*

[241] *Id.*

[242] *See* May 30, 2014 Letter from New GM to NHTSA.

[243] *Id.*

claims, only one of the affected vehicles had been sold; New GM contacted that customer and repaired the sold vehicle.[244]

773. New GM issued a Service Update Bulletin (SUB 14034) for all unsold vehicles with the defective fuse blocks, and provided its dealership with repair kits in February of 2014.[245] New GM revised the repair after it discovered a susceptibility to corrosion during a March 2014 durability test—but only used the enhanced kit for the vehicles that had not already been repaired by May of 2014.[246]

774. On May 7, 2014, New GM found that there were 58 affected vehicles that had not been repaired. Inexplicably, 20 of the 58 vehicles had been sold—even though New GM had known about the defect prior to the sales.[247]

775. On May 19, 2014, New GM decided to conduct a safety recall of all 58 affected vehicles.[248]

t. Diesel transfer pump defect.

776. On April 24, 2014, New GM issued a safety recall of 51 MY 2015 GMC Sierra HD and 2015 Chevrolet Silverado HD vehicles.

777. In the affected vehicles, the fuel pipe tube nuts on both sides of the diesel fuel transfer pump may not be tightened to the properly torque. That can result in a diesel fuel leak, which can cause a vehicle fire.[249]

---

[249] *See* April 24, 2014 Letter from New GM to NHTSA.

u. Rear suspension toe adjuster link defect.

778. On September 17, 2014, New GM issued a safety recall for 290,241 MY 2010-2015 Cadillac SRX and 2011-2012 Saab 9-4x vehicles with a rear suspension toe adjuster link defect that can cause vehicles to sway or wander on the road.[250]

779. According to New GM, in the affected vehicles, "the jam nut in the rear suspension toe adjuster link may not be torqued to the proper specification. A loose toe adjuster link can cause the vehicle to sway or wander at highway speed, activate the vehicle's electronic stability control system, and cause excessive wear to the threads in the link….If the threads in the link become worn, the link may separate."[251] If the link separates, that "would create sudden vehicle instability, increasing the risk of a crash."[252]

780. Once again, New GM should have picked up on this defect years earlier. In fact, in 2011, New GM conducted a safety recall of Cadillac CTS vehicles with a similar rear suspension toe adjuster link defect.[253]

781. New GM claims that, ever since 2011, it had been "monitor[ing] warranty data associated with the suspension systems in Cadillac SRX vehicles, which utilized similar rear suspension components" to the Cadillac CTS vehicles that were recalled in 2011.[254] "As of July 2014, [New] GM had received 83 warranty claims, 14 TREAD reports, and two NHTSA VOQs relating to the rear suspension system on 2010 through 2012 MY Cadillac SRX vehicles."[255]

---

[250] *See* New GM's Sept. 17, 2014 Part 573 Safety Report.

[251] *Id.*

[252] *Id.*

[253] *Id.*

[254] *Id.*

[255] *Id.*

782. Between July 14 and early September 2014, GM "determined that the rear suspension adjuster link jam nuts in some 2010-2015 MY Cadillac SRX vehicles may not have been torqued to the proper specification"[256]—***just as in the case of the Cadillac CTS vehicles that had been recalled several years earlier.***

783. Finally, on September 10, 2014, New GM decided to conduct a safety recall of the Cadillac SRX vehicles.

784. New GM offers no explanation as to why it took so long to finally expand the recall to cover vehicles sharing the same components and the same defects with vehicles that had been recalled several years earlier.

v. Hood latch defect

785. On September 23, 2014, New GM recalled 89,294 MY 2013-2015 Chevrolet Spark vehicles with a hood latch defect.[257]

786. According to New GM, the affected vehicles "were manufactured with a secondary hood latch that may prematurely corrode at the latch pivot causing the striker to get stuck out of position and preventing the striker from properly engaging the hood latch."[258] If this happens, "the vehicle's hood may open unexpectedly," and that will "likely" impair the driver's vision and increase the risk of a collision.[259]

787. In November 2013, the secondary hood latch in the affected vehicles "failed a 10-year component level corrosion test." By February 2014, New GM determined that "the anti-

[256] *Id.*

[257] *See* New GM's September 23, 2014 Part 573 Safety Recall Report.

[258] *Id.*

[259] *Id.*

corrosion coating applied to the secondary hood latch was deficient and did not meet" the company's requirements.[260]

788. New GM commenced a search for the "root cause" of the defect from March 24 through September 18, 2014. New GM found that, in the earlier MY Chevrolet Sparks, "all secondary hood latches were coated with an 'ED' coat (electro deposition of zinc phosphate) rather than the required 'MFC-A' coat (e.g., a phosphate and oil based corrosion protection coat)." As of July 31, 2014, MFC-A coating was used for the Sparks.[261]

789. New GM's investigation found 10 warranty cases in the U.S. for premature corrosion of the hood latches.[262]

790. On September 18, 2014, New GM decided to conduct a safety recall.

w. Electrical short defect.

791. On October 2, 2014, New GM announced a recall of 117,652 MY 2013-2014 Chevrolet Tahoe, 2013-2014 Chevrolet Suburban, 2013-2014 GMC Yukon, 2013-2014 GMC Yukon, 2013-2014 Cadillac Escalade, 2013-2014 Cadillac CTS, 2014 Chevrolet Traverse, 2014 GMC Acadia, 2014 Buick Enclave, 2014 Chevrolet Express, 2014 GMC Savana, 2014 Chevrolet Silverado, and 2014 GMC Sierra vehicles with a defect that can cause an electrical short.[263]

792. In the affected vehicles, due to a defect in the chassis control module, metal slivers can cause an electrical short that results in the vehicle stalling or not starting.[264] This creates a serious risk of accident.

---

[261] *Id.*

[262] *Id.*

[263] *See "GM recalls 117,651 vehicles for potential electrical short issue*," Reuters (Oct. 2, 2014).

[264] *Id.*

793. As of this writing, New GM has not yet released further information about this defect or the recall.

H. New GM's Deception Recalls Has Harmed Plaintiffs and the Class

794. New GM was well aware that vehicle recalls, especially untimely ones, can taint its brand image and the value of GM vehicles. In its 2010 Form 10-K submitted to the SEC, New GM admitted that "Product recalls can harm our reputation and cause us to lose customers, particularly if those recalls cause consumers to question the safety or reliability of our products. Any costs incurred or lost sales caused by future product recalls could materially adversely affect our business."[265]

795. Unfortunately for owners of GM-branded vehicles, New GM was correct. It is difficult to find a brand whose reputation has taken as great a beating as has the New GM brand starting in February 2014 when the first ignition switch recall occurred.

796. In fact, the public outcry has been significant in response to the ongoing revelations of the massive number of defects New GM concealed, and the massive number of defective vehicles New GM has sold. The following are illustrative examples of the almost constant beating the New GM brand has taken ever since the first ignition switch recall was announced on July 13, 2014.

797. After the announcement the first ignition switch recall the media was highly critical of GM. For example, a CBS February 27, 2014, news report headlined:

By AIMEE PICCHI / MONEYWATCH / February 27, 2014, 1:42 PM

Did GM wait too long to issue its recall?

[265] General Motors 2010 Form 10-K, p. 31, available at https:llwww.sec.gov/Archives/edgar/data/1467858/000119312510078119/dlOk.htm#toc85733 4.

798. The CBS report had a video link:[266]

13 deaths now linked to GM faulty ignition switches, recall expanded

799. On March 13, 2014 a CNN report was entitled:

Feds demand answers from GM on recall defect

By **Mike M. Ahlers, CNN**

updated 7:51 AM EDT, Thu March 13, 2014

800. On March 16, 2014, Reuters reported as follows:

Owners of recalled GM cars feel angry, vindicated

(Reuters) – As details emerge about how General Motors Co dealt with faulty ignition switches in some of its models, car owners are increasingly angry after learning that the automaker knowingly allowed them to drive defective vehicles.

Saturn Ion owner Nancy Bowman of Washington, Michigan, said she is outraged that GM allowed her to drive a "death trap." She said her car had so many ignition problems she was afraid to resell it to an innocent buyer.

She bought the 2004 model car new and still drives it after extensive repairs and multiple run-ins with a Saturn dealer she called dismissive.

[266] http://www.cbsnews.com/news/did-general-motors-wait-too-long -to-issue-its-recall/.

"Five times the car died right out from under me after hitting a bump in the road," she wrote in a 2013 posting on a complaint website, arfc.org, that says it sends information to the National Highway Traffic Safety Administration (NHTSA).

Every time I brought it in they said it was an isolated incident. Couldn't find the problem, so they acted like I was an idiot.

801. On March 24, 2014, the NEW YORK TIMES issued an article entitled:

BUSINESS DAY

General Motors Misled Grieving Families on a Lethal Flaw

By HILARY STOUT, BILL VLASIC, DANIELLE IVORY and REBECCA R. RUIZ MARCH 24, 2014

802. It contained a troublesome account of GM's conduct:

It was nearly five years ago that any doubts were laid to rest among engineers at General Motors about a dangerous and faulty ignition switch. At a meeting on May 15, 2009, they learned that data in the black boxes of Chevrolet Cobalts confirmed a potentially fatal defect existed in hundreds of thousands of cars.

But in the months and years that followed, as a trove of internal documents and studies mounted, G.M. told the families of accident victims and other customers that it did not have enough evidence of any defect in their cars, interviews, letters and legal documents show. Last month, G.M. recalled 1.6 million Cobalts and other small cars, saying that if the switch was bumped or weighed down it could shut off the engine's power and disable air bags.

In one case, G.M. threatened to come after the family of an accident victim for reimbursement of legal fees if the family did not withdraw its lawsuit. In another instance, it dismissed a family with a terse, formulaic letter, saying there was no basis for claims.

* * *

Since the engineers' meeting in May 2009, at least 23 fatal crashes have involved the recalled models, resulting in 26 deaths. G.M. reported the accidents to the government under a system called Early Warning Reporting, which requires automakers to disclose claims they receive blaming vehicle defects for serious injuries or deaths.

A New York Times review of 19 of those accidents – where victims were identified through interviews with survivors, family members, lawyers and law enforcement officials – found that G.M.

pushed back against families in at least two of the accidents, and reached settlements that required the victims to keep the discussions confidential.

* * *

In other instances, G.M. ignored repeated calls, families said. "We did call G.M.," said Leslie Dueno, whose 18-year-old son, Christopher Hamberg, was killed on June 12, 2009 – not quite a month after the critical May 15 meeting of G.M. engineers about the ignition data – driving his 2007 Cobalt home before dawn in Houston. He lost control at 45 miles per hour and hit a curb, then a tree, the police report said. "Nobody ever called me. They never followed up. Ever."

Last month's recalls of the Cobalt and five other models encompassed model years 2003 through 2007. G.M. faces numerous investigations, including one by the Justice Department looking into the company's disclosures in its 2009 bankruptcy filing as well as what it told regulators.

"We are conducting an unsparing, comprehensive review of the circumstances leading to the ignition switch recall," G.M. said in a statement on Monday. "As part of that review we are examining previous claims and our response to them. If anything changes as a result of our review, we will promptly bring that to the attention of regulators."

G.M. has said it has evidence of 12 deaths tied to the switch problem, but it has declined to give details other than to say that they all occurred in 2009 or earlier. It says it has no conclusive evidence of more recent deaths tied to the switch.

* * *

It was unclear how many of the 26 deaths since the 2009 meeting were related to the faulty ignition, but some appeared to fit patterns that reflected the problem, such as an inexplicable loss of control or air bags that did not deploy. In some cases, the drivers had put themselves at risk, including having high blood-alcohol levels or texting.

Still, by the time Benjamin Hair, 20, crashed into a tree in Charlottesville, Va., on Dec. 13, 2009, while driving a Pontiac G5 home, G.M. had conducted five internal studies about the ignition problem, its records indicate.

…

Consumer complaints and claims came to the company in a variety of ways – through lawsuits, calls, letters and emails, warranty claims, or insurance claims. G.M.'s legal staff was the recipient of lawsuits, insurance information, accident reports and any other litigation-related paperwork. But warranty claims and customer calls were routed through the sales and service division – a vast bureaucracy that occupies most of one tower at G.M.'s headquarters in Detroit. Because the legal staff reports to the chief executive, and the sales department to the head of G.M. North America, it is unclear whether they share information related to a specific car, like the Cobalt.

803. NPR ran a story on March 31, 2014:

news : business

Timeline: A History Of GM's Ignition Switch Defect

by TANYA BASU

March 31, 2014 4:33 PM ET

804. The NPR story raised questions about GM's candor:

NPR looked into the timeline of events that led to the recall. It's long and winding, and it presents many questions about how GM handled the situation: How long did the company know of the problem? Why did the company not inform federal safety officials of the problem sooner? Why weren't recalls done sooner? And did GM continue to manufacture models knowing of the defect?

805. On May 11, 2014, the CHICAGO TRIBUNE ran an article entitled:

GM ranked worst automaker by U.S. suppliers: survey

DETROIT (Reuters) – General Motors Co, already locked in a public relations crisis because of a deadly ignition defect that has triggered the recall of 2.6 million vehicles, has a new perception problem on its hands.

The U.S. company is now considered the worst big automaker to deal with, according to a new survey of top suppliers to the car industry in the United States.

Those so-called "Tier 1" suppliers say GM is now their least favorite big customer, according to the rankings, less popular even than Chrysler, the unit of Fiat Chrysler Automobiles FIA.MI, which since 2008 had consistently earned that dubious distinction.

Suppliers gave GM low marks on all kinds of key measures, including its overall trustworthiness, its communication skills, and its protection of intellectual property.

806. On May 25, 2014, an article reported on a 2.4 million vehicle recall:

> # When Will GM's Recall Mess End?
>
> **General Motors** (NYSE: GM) on Tuesday said it is recalling about 2.4 million additional vehicles in four separate recalls for a variety of problems, including faulty seat belts and gearshift troubles.
>
> This announcement came on the heels of another set of GM recalls, announced last Thursday, covering 2.7 million vehicles. Including the four recalls announced on Tuesday, GM has issued a total of 30 recalls in the U.S. so far in 2014, encompassing about 13.8 million vehicles.
>
> That's a stupendous number.[267]

807. On May 26, 2014, the NEW YORK TIMES ran an article:

> BUSINESS DAY
>
> ***13 Deaths, Untold Heartache, From G.M. Defect***
>
> By REBECCA R. RUIZ, DANIELLE IVORY and HILARY STOUT MAY 26, 2014

808. The article once again pointed blame at GM:

> BEN WHEELER, Tex. – For most of the last decade, Candice Anderson has carried unspeakable guilt over the death of her boyfriend. He was killed in 2004 in a car accident here, and she was at the wheel. At one point, Ms. Anderson, who had a trace of Xanax in her blood, even faced a manslaughter charge. She was 21.
>
> All these years, Ms. Anderson – now engaged and a mother – has been a devoted visitor to his grave. She tidies it every season, sweeping away leaves and setting down blue daisies with gold glitter for his birthday, miniature lit trees for Christmas, stones with etched sayings for the anniversary of their accident.
>
> "It's torn me up," Ms. Anderson said of the death of Gene Mikale Erickson. "I've always wondered, was it really my fault?"

[267] http://www.fool.com/investing/general/2014/05/25/when-will-gms-recall-mess-end.aspx.

> Last week, she learned it was not.
>
> * * *
>
> Inside G.M., the nation's largest automaker, some of the 13 victims appear on charts and graphs with a date and a single word: "fatal."

809. News of GM's misconduct and of the recalls made the front page of every major newspaper and was the lead story on every major television news program in the country.

810. The congressional hearings where GM executives were subject to harsh questioning and criticism were widely reported in every type of media.

811. In June 2014 GM recalled another 8.2 million vehicles and again these recalls received widespread attention in the press. The stories often included charts and graphs depicting the ever-growing list of vehicles recalled:

> **GM to recall 8.2 million more vehicles over ignition-switch defect**
>
> *POSTED AT 3:21 PM ON JUNE 30, 2014*
>
> The recall blues continue at GM, as does the scope of their previously hidden ignition-switch defect. The world's largest automaker added 8.45 million more vehicles to its list, with some models going back to 1997. This puts GM over the 28-million mark for cars recalled on a global basis in 2014, and over 26 million domestic.[268]

812. The coverage did not simply die down as often happens. On July 15, 2014, the NEW YORK TIMES ran an article entitled, "Documents Show General Motors Kept Silent on Fatal Crashes."

813. By August 2, 2014, the press was reporting that New GM used vehicles were losing value:

[268] http://hotair.com/archives/2014/06/30/gm-to-recall-8-2-million-more-vehicles-over-ignition-switch-defect-8-45-million-overall/.

THE DALLAS MORNING NEWS

August 2, 2014 Saturday
1 Edition

SECTION: BRIEFING; Pg. 10

LENGTH: 80 words

HEADLINE: GM vehicles' resale values are taking a hit as safety recalls mount

BODY:

Although General Motors' sales remained solid in the midst of its recent record recalls, some vehicles experienced significant drops in their resale values.

In an analysis of more than 11 million used cars for sale between March and June of this year, iSeeCars.com found that the resale values of the main vehicles in GM's recalls dropped 14 percent from the same period last year.

814. An August 5, 2014 article also reported that used GM vehicles were suffering loss in value due to the recalls:[269]

AUTOS GM

Used GM cars affected by recall getting hurt in the marketplace

by Doron Levin @FortuneMagazine AUGUST 5, 2014, 2:25 PM EDT

Ignition recall caused resale values to take a hit—some Pontiac, Saturn and Chevy models were most affected.

General Motors Co. GM -0.41% has been fortunate to avoid a collapse of new-vehicle sales since the ignition-switch safety crisis blew up in January, engulfing the automaker in litigation, a federal criminal probe and Congressional inquiries.

Used GM vehicles – models affected by the recall – meanwhile have taken a substantial hit in value, according to a study by iSeeCars.com, an online search engine. GM's new-vehicles sales

[269] Doron Levin, FORTUNE MAGAZINE, August 5, 2014.

are up 3.5% in the U.S. through July in a market that has risen 5% in terms of unit sales.

(Holders of GM stock have gotten whacked as well since January, the value of shares falling nearly 18%, compared with a S&P 500 Index that has risen 4% during the period.)

The operators of the search engine said they created an algorithm to determine the market value of six GM cars affected by the recall, based on asking prices of used vehicles on dealer lots from March to June 2013, compared to a year later. The change in value also was compared to the dropping value of all used cars in the U.S., which has been occurring for the past few months. The sample size was 11 million cars.

The average price of the recalled GM models dropped 14% from March to June 2014, compared to a year earlier and adjusted for inflation. The drop in value of all similar models was 6.7% during the same period.

Phong Ly, chief executive and co-founder of iSeeCars.com said "recalls are playing a role in motivating sellers to sell their used cars and at a lower price point than they otherwise would." His company provides free information to car shoppers and sells sales leads to dealers.

815. The crisis that affected the GM Brand was so significant that GM stock has been battered. A September 22, 2014 report observed:[270]

GM Falls Deeper Into The Abyss

Sep. 22, 2014 7:55 AM ET | About: General Motors Company (GM)

Summary

- GM has been in a rut since the ignition switch recalls.
- More and more, GM is coming off as a perpetually troubled business.
- We continue to avoid General Motors stock.

[270] *See* http://seekingalpha.com/article/2511545-gm-falls-deeper-into-the-abyss.

> We previously wrote about GM (NYSE:GM) and placed a $31 price target on it here. Our basic argument was that GM was going to have trouble presenting itself into the mainstream as a reputable brand to buy after the ignition switch recall.
>
> Late Sunday, it was announced that GM was recalling 222,500 vehicles due to brake pad malfunction. This number towers over the amount of normal recalls that come during the course of business. It's also involving vehicles that were made from 2013 to 2015, a clear indicator that these vehicles (manufactured by the post-bankruptcy GM) should have had a renewed focus of safety on them from the beginning.

816. The impact on the value of GM-brand is also evidenced by the decline in GM's stock price which hit a 52 week low on October 10, 2014.

817. New GM's unprecedented concealment of a large number of serious defects, and its irresponsible approach to safety, quality, and reliability issues, has caused damage to Plaintiffs and the Class.

818. A vehicle made by a reputable manufacturer of safe, high quality, and reliable vehicles who stands behind its vehicles after they are sold is worth more than an otherwise similar vehicle made by a disreputable manufacturer known for selling defective vehicles and for concealing and failing to remedy serious defects after the vehicles are sold.

819. A vehicle purchased or leased under the reasonable assumption that it is safe and reliable is worth more than a vehicle of questionable safety, quality, and reliability due to the manufacturer's recent history of concealing serious defects from consumers and regulators.

820. Purchasers and lessees of GM-branded vehicles after the July 10, 2009 inception of New GM paid more for the vehicles than they would have had New GM disclosed the many defects it had a duty to disclose in GM-branded vehicles, and disclosed that GM's culture and business model was such that it did not produce safe, high quality, and reliable vehicles. Because New GM concealed the defects and the fact that it was a disreputable brand that valued

cost-cutting over safety, Plaintiffs and the Class did not receive the benefit of their bargain. And the value of all their vehicles has diminished as the result of New GM's deceptive conduct.

821. On information and belief, an estimate of the diminished value in class vehicles not subject to the ignition switch recall is illustrated by way of example as follows for a few Model Year 2013 vehicles:

GMC	Terrain	September Diminished Value: $1,052
GMC	Sierra 1500	September Diminished Value: $325
Buick	Lacrosse	September Diminished Value: $954
Chevrolet	Suburban	September Diminished Value: $854
Cadillac	CTS	September Diminished Value: $867
Cadillac	XTS	September Diminished Value: $1,722

822. Another example is the diminished value of illustrative 2011 models:

GMC	Terrain	September Diminished Value: $891
Buick	Lacrosse	September Diminished Value: $1,017

823. GM-branded vehicles not involved in the ignition switch recall experienced declines in value when the ignition switch recalls occurred due to the impact on the perception of buyers concerning New GM's promises of safety and reliability. As news of New GM's culture of deceit grew, so did diminished value. The following estimates are examples:

	Diminished Value as of 03/2014	Diminished Value as of 09/2014
2008 Cadillac STS	$249	$1,243
2008 GMC Acadia	$730	$1,011
2010 GMC Terrain	$403	$912

824. GM vehicles subject to the ignition switch recall also have suffered diminished value by way of example:

	Diminished Value as of 03/2014	Diminished Value as of 09/2014
2008 Cobalt	$256	$357
2008 HHR	$162	$477
2009 Sky	$173	$429

825. If New GM had timely disclosed the many defects as required by the TREAD Act, the law of fraudulent concealment, and consumer laws set forth below, Class members' vehicles would be considerably more valuable than they are now and/or Class members would have paid less than they did. Because of New GM's now highly publicized campaign of deception, and its belated, piecemeal and ever-expanding recalls, so much stigma has attached to the New GM brand that no rational consumer would pay what otherwise would have been fair market value for the Affected Vehicles.

V. TOLLING OF THE STATUTES OF LIMITATION

A. Discovery Rule Tolling

826. Within the time period of any applicable statutes of limitation, Plaintiffs and the other Class members could not have discovered through the exercise of reasonable diligence that New GM was concealing scores of defects and misrepresenting the Company's true position on safety issues.

827. Plaintiffs and the other Class members did not discover, and did not know of facts that would have caused a reasonable person to suspect, that New GM did not report information within its knowledge to federal authorities (including NHTSA), its dealerships or consumers, nor would a reasonable and diligent investigation have disclosed that New GM had information in its

possession about the existence and dangerousness of numerous defects and opted to conceal that information until shortly before this action was filed, and nor would such an investigation have disclosed that New GM valued cost-cutting over safety and actively discouraged its personnel from uncovering or raising safety issues.

828. All applicable statutes of limitation have been tolled by operation of the discovery rule.

B. Fraudulent Concealment Tolling

829. All applicable statutes of limitation have also been tolled by New GM's knowing and active fraudulent concealment and denial of the facts alleged herein throughout the time period relevant to this action.

830. Instead of disclosing the myriad safety defects and disregard of safety of which it was aware, New GM falsely represented that its vehicles were safe, reliable, and of high quality, and that it was a reputable manufacturer that stood behind GM-branded vehicles after they were sold.

C. Estoppel

831. New GM was under a continuous duty to disclose to Plaintiffs and the other Class members the true character, quality, and nature of the Defective Ignition Switch Vehicles.

832. New GM knowingly, affirmatively, and actively concealed the true nature, quality, and character of the Defective Ignition Switch Vehicles from consumers.

833. New GM was also under a continuous duty to disclose to Plaintiffs and the Class that scores of other defects plagued GM-branded vehicles, and that it systematically devalued safety.

834. Based on the foregoing, New GM is estopped from relying on any statutes of limitations in defense of this action.

VI. CHOICE OF LAW ALLEGATIONS

835. Plaintiffs allege that Michigan law applies nationwide to Plaintiffs' claims for fraudulent concealment, unjust enrichment, breach of the implied warranty of merchantability, and the Magnuson-Moss Warranty Act based in part on the following allegations.

836. New GM is headquartered in Detroit, Michigan.

837. New GM does substantial business in Michigan, with a significant portion of the proposed Nationwide Class located in Michigan.

838. On information and belief, Michigan hosts a significant number of New GM's U.S. operations.

839. In addition, the conduct that forms the basis for each and every Class members' claims against New GM emanated from New GM's headquarters in Detroit, Michigan.

840. New GM personnel responsible for customer communications are located at GM's Michigan headquarters, and the core decision not to disclose the array of defects to consumers was made and implemented from there.

841. The Red X team, an engineering team whose purpose is to find the cause of an engineering design defect, is located in Detroit, Michigan.

842. Some or all of the marketing campaigns falsely promoting New GM cars as safe and reliable were conceived and designed in Michigan.

843. New GM personnel responsible for managing New GM's customer service division are located at the New GM Michigan headquarters. The "Customer Assistance Centers" directs customers to call the following numbers: 1-800-222-1020 (Chevrolet), 1-800-521-7300 (Buick), 1-800-462-8782 (GMC), 1-800-458-8006 (Cadillac), 1-800-762-2737 (Pontiac), 1-800-732-5493 (HUMMER), and 1-800-553-6000 (Saturn), which are landlines in Detroit, Michigan. Customers are directed to send correspondence to GM Company, P.O. Box 33170,

Detroit, MI 48232-5170. In addition, personnel from New GM in Detroit, Michigan, also communicate via e-mail with customers concerned about the ignition switch and other safety defects.

844. Many of the key Michigan personnel with knowledge of the array of defects remained in their same positions once New GM took over Old GM. For example, the Design Research Engineer who was responsible for the rollout of the defective ignition switch in 2003 was Ray DeGiorgio. Mr. DeGiorgio continued to serve as an engineer at New GM until April 2014.

845. GM's presence is more substantial in Michigan than any other state.

VII. CLASS ALLEGATIONS

A. The Nationwide Class

846. Under Rules 23(a), 23(b)(2), and/or 23(b)(3) of the Federal Rules of Civil Procedure, Plaintiffs bring this action on behalf of themselves and a Class initially defined as follows for claims under Michigan law (the "Nationwide Class"):

> All persons in the United States who purchased or leased a GM-branded vehicle between July 11, 2009 and July 3, 2014 (the "Affected Vehicles") and who (i) still own or lease an Affected Vehicle, (ii) sold an Affected Vehicle on or after February 14, 2014, and/or (iii) purchased or leased an Affected Vehicle that was declared a total loss after an accident on or after February 14, 2014.

847. Excluded from the Nationwide Class are New GM, its employees, co-conspirators, officers, directors, legal representatives, heirs, successors and wholly or partly owned subsidiaries or affiliates of New GM, New GM Dealers; Class Counsel and their employees; and the judicial officers and their immediate family members and associated court staff assigned to this case, and all persons within the third degree of relationship to any such persons.

848. The following vehicles, if sold or leased between July 11, 2009 and July 3, 2014, are among the Affected Vehicles for the Nationwide Class (in addition to Old GM vehicles sold as used during that same time period):

849. Under Rules 23(a), 23(b)(2), and 23(b)(3) of the Federal Rules of Civil Procedure, Plaintiffs New Bedford Auto Sales and Nettleton Auto Sales bring this action on behalf of

themselves and a Dealer Class initially defined as follows for claims under Michigan law (the "Nationwide Dealer Class"):

> All non-GM car dealerships in the United States that, on or after February 14, 2014, have sold or leased an Affected Vehicle or retained an Affected Vehicle in their inventory, when such Affected Vehicle was purchased by the dealership between July 11, 2009 and July 3, 2014.

850. Under Rules 23(a), (b)(2) and/or 23(b)(3) of the Federal Rules of Civil Procedure, Plaintiffs bring this action on behalf of themselves and a Subclass initially defined as follows (the Nationwide Ignition Switch Defect Subclass):

> All persons in the United States who either (i) own or lease a Defective Ignition Switch Vehicle that was sold or leased as a new vehicle by New GM between July 11, 2009 and July 3, 2014, (ii) sold such a vehicle on or after February 14, 2014, and/or (iii) purchased or leased a Defective Ignition Switch Vehicle that was declared a total loss after an accident on or after February 14, 2014.

851. The following vehicles are included in the Nationwide Ignition Switch Defect Subclass if they were sold or leased as a new vehicle between July 11, 2009 and July 3, 2014:

RECALL	VEHICLES AFFECTED
Ignition Switch Torque Performance:	· 2009-2010 Chevy Cobalt
	· 2009-2011 Chevy HHR
	· 2009-2010 Pontiac G5
	· 2009-2010 Pontiac Solstice
	· 2009-2010 Saturn Sky
Ignition Cylinder:	· 2009-2010 Chevy Cobalt
	· 2009-2011 Chevy HHR
	· 2009-2010 Pontiac G5
	· 2009-2010 Pontiac Solstice
	· 2009-2010 Saturn Sky
Key FOB/Ignition Switch Placement:	· 2010-2014 Chevy Camaro

RECALL	VEHICLES AFFECTED
Ignition Switch/Weighted Key Ring/Key Hole Replacement:	· 2009 Buick LaCrosse
	· 2009-2011 Buick Lucerne
	· 2009-2011 Cadillac DTS
	· 2009-2014 Chevy Impala
	2011-2013 Chevy Caprice
	2009 Pontiac G8

B. State Law Classes

852. Plaintiffs allege claims, under the laws of each state and the District of Columbia, for the following Statewide Classes:

> All persons who purchased or leased a GM-branded vehicle between July 11, 2009 and July 3, 2014 (the "Affected Vehicles") and (i) who still own or lease an Affected Vehicle, (ii) who sold an Affected Vehicle on or after February 14, 2014, and/or (iii) purchased or leased an Affected Vehicle that was declared a total loss after an accident on or after February 14, 2014.

853. Plaintiffs also allege claims, under the laws of each state and the District of Columbia, for the following Statewide Ignition Switch Defect Subclasses:

> All persons who either (i) own or lease a Defective Ignition Switch Vehicle that was sold or leased as a new vehicle by New GM between July 11, 2009 and July 3, 2014, (ii) sold such a vehicle on or after February 14, 2014, and/or (iii) purchased or leased a Defective Ignition Switch Vehicle that was declared a total loss after an accident on or after February 14, 2014.

854. Excluded from each of the Classes and Subclasses are New GM, its employees, co-conspirators, officers, directors, legal representatives, heirs, successors and wholly or partly owned subsidiaries or affiliates of New GM; New GM Dealers; Class Counsel and their employees; and the judicial officers and their immediate family members and associated court staff assigned to this case, and all persons within the third degree of relationship to any such persons.

C. The Classes and Subclasses Meet Rule 23 Requirements

855. Plaintiffs are informed and believe that there are over 10 million Affected Vehicles nationwide and hundreds-of-thousands of the Affected Vehicles in each state, and over 2 million Defective Ignition Switch Vehicles owned or leased by members of the National Ignition Switch Defect Subclass. Individual joinder of all Class members is impracticable.

856. The Class can be readily identified using registration records, sales records, production records, and other information kept by New GM or third parties in the usual course of business and within their control.

857. Questions of law and fact are common to each of the Classes and Subclasses and predominate over questions affecting only individual members, including the following:

a. Whether numerous GM-branded vehicles suffer from serious defects;

b. Whether New GM was aware of many or all of the defects, and concealed the defects from regulators, Plaintiffs, and the Class;

c. Whether New GM misrepresented to Affected Vehicle purchasers that GM-branded vehicles are safe, reliable, and of high quality;

d. Whether New GM misrepresented itself as a reputable manufacturer that values safety and stands behind its vehicles after they are sold;

e. Whether New GM actively encouraged the concealment of known defects from regulators and consumers;

f. Whether New GM engaged in fraudulent concealment;

g. Whether New GM engaged in unfair, deceptive, unlawful, and/or fraudulent acts or practices in trade or commerce by failing to disclose that many GM-branded vehicles had serious defects;

h. Whether New GM violated various state consumer protection statutes;

i. Whether the Defective Ignition Switch Vehicles were unfit for the ordinary purposes for which they were used, in violation of the implied warranty of merchantability;

j. Whether New GM's unlawful, unfair, fraudulent, and/or deceptive practices harmed Plaintiffs and the members of the Class;

k. Whether New GM has been unjustly enriched;

l. Whether Plaintiffs and the members of the Class are entitled to equitable and/or injunctive relief;

m. What aggregate amounts of statutory penalties, as available under the laws of Michigan and other States, are sufficient to punish and deter New GM and to vindicate statutory and public policy, and how such penalties should most equitably be distributed among Class members; and

n. Whether any or all applicable limitations periods are tolled by acts of fraudulent concealment.

858. Plaintiffs' claims are typical of the claims of the Class members, and arise from the same course of conduct by New GM. The relief Plaintiffs seek is typical of the relief sought for the absent Class members.

859. Plaintiffs will fairly and adequately represent and protect the interests of all absent Class members. Plaintiffs are represented by counsel competent and experienced in product liability, consumer protection, and class action litigation.

860. A class action is superior to other available methods for the fair and efficient adjudication of this controversy, since joinder of all the individual Class members is impracticable. Because the damages suffered by each individual Class member may be

relatively small, the expense and burden of individual litigation would make it very difficult or impossible for individual Class members to redress the wrongs done to each of them individually, and the burden imposed on the judicial system would be enormous. Rule 23 provides the Court with authority and flexibility to maximize the benefits of the class mechanism and reduce management challenges. The Court may, on motion of Plaintiffs or on its own determination, utilize the processes of Rule 23(C)(4) and/or (C)(5) certify common questions of fact or law and to designate subclasses.

861. The prosecution of separate actions by the individual Class members would create a risk of inconsistent or varying adjudications for individual Class members, which would establish incompatible standards of conduct for New GM. The conduct of this action as a class action presents far fewer management difficulties, conserves judicial resources and the parties' resources, and protects the rights of each Class member.

862. Plaintiffs are not aware of any obstacles likely to be encountered in the management of this action that would preclude its maintenance as a class action. Plaintiffs anticipate providing appropriate notice to be approved by the Court after discovery into the size and nature of the Class.

863. Absent a class action, most Class members would likely find the cost of litigating their claims prohibitively high and would therefore have no effective remedy at law. Because of the relatively small size of the individual Class members' claims, it is likely that only a few Class members could afford to seek legal redress for Defendant's misconduct. Absent a class action, Class members will continue to incur damages, and Defendant's misconduct will continue without remedy.

VIII. CLAIMS FOR RELIEF

A. Nationwide Class Claims

COUNT I

FRAUDULENT CONCEALMENT
(BY NATIONWIDE AND NATIONWIDE DEALER CLASSES)

864. Plaintiffs and the Class incorporate by reference each preceding and following paragraph as though fully set forth at length herein.

865. This claim is brought on behalf of the Nationwide and Nationwide Dealer Classes, under Michigan law or alternatively, under the law of all states because there is no material difference in the law of fraudulent concealment.

866. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

867. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

868. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

869. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

870. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Nationwide and Nationwide Dealer Classes. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Nationwide and Nationwide Dealer Classes. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

871. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Nationwide and Nationwide Dealer Classes.

872. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Nationwide and Nationwide Dealer Classes and conceal material information regarding defects that exist in GM-branded vehicles.

873. Plaintiffs and the Nationwide Class and Nationwide Dealer Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Nationwide and Nationwide Dealer Classes' actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Nationwide and Nationwide Dealer Classes.

874. Because of the concealment and/or suppression of the facts, Plaintiffs and the Nationwide and Nationwide Dealer Classes sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that

existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

875. The value of all Nationwide and Nationwide Dealer Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

876. Accordingly, New GM is liable to the Nationwide and Nationwide Dealer Classes for their damages in an amount to be proven at trial.

877. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Nationwide and Nationwide Dealer Classes' rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT II

UNJUST ENRICHMENT
(BY NATIONWIDE AND NATIONWIDE DEALER CLASSES)

878. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

879. This claim for unjust enrichment is brought on behalf of the Nationwide Dealer classes under Michigan law. If Michigan law does not apply, it is brought in the alternative under the laws of the states where Plaintiffs and Class members reside.

880. New GM has received and retained a benefit from the Plaintiffs and inequity has resulted.

881. New GM was benefitted from selling defective cars for more than they were worth, at a profit, and Plaintiffs have overpaid for the cars and been forced to pay other costs.

882. It is inequitable for New GM to retain these benefits.

883. As a result of New GM's conduct, the amount of its unjust enrichment should be disgorged, in an amount according to proof.

COUNT III

VIOLATION OF THE MAGNUSON-MOSS WARRANTY ACT
15 U.S.C. § 2301, *et seq.*

884. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

885. Plaintiffs bring this Count on behalf of members of the Nationwide Ignition Switch Defect Subclass who are residents of the following States: Alaska, Arkansas, California, Colorado, Delaware, District of Columbia, Hawaii, Indiana, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Texas, Utah, Virginia, West Virginia and Wyoming (the "Class," for the purposes of this Count).

886. This Court has jurisdiction to decide claims brought under 15 U.S.C. § 2301 by virtue of 28 U.S.C. § 1332 (a)-(d).

887. The Defective Ignition Switch Vehicles are "consumer products" within the meaning of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(1).

888. Plaintiffs are "consumers" within the meaning of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(3). They are consumers because they are persons entitled under applicable state law to enforce against the warrantor the obligations of its implied warranties.

889. New GM is a "supplier" and "warrantor" within the meaning of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(4)-(5).

890. 15 U.S.C. § 2310(d)(1) provides a cause of action for any consumer who is damaged by the failure of a warrantor to comply with an implied warranty.

891. New GM provided Plaintiffs and the other Class members with an implied warranty of merchantability in connection with the purchase or lease of their vehicles that is an "implied warranty" within the meaning of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(7). As a part of the implied warranty of merchantability, New GM warranted that the Defective Ignition Switch Vehicles were fit for their ordinary purpose as safe passenger motor vehicles, would pass without objection in the trade as designed, manufactured, and marketed, and were adequately contained, packaged, and labeled.

892. New GM breached its implied warranties, as described in more detail above, and is therefore liable to Plaintiffs and the Class pursuant to 15 U.S.C. § 2310(d)(1). Without limitation, the Defective Ignition Switch Vehicles share common design defects in that they are equipped with defective ignition switch systems that can suddenly fail during normal operation, leaving occupants of the Defective Ignition Switch Vehicles vulnerable to crashes, serious injury, and death. New GM has admitted that the Defective Ignition Switch Vehicles are defective in issuing its recalls, but the recalls are woefully insufficient to address each of the defects.

893. In its capacity as a warrantor, New GM had knowledge of the inherent defects in the Defective Ignition Switch Vehicles. Any effort by New GM to limit the implied warranties

in a manner that would exclude coverage of the Defective Ignition Switch Vehicles is unconscionable, and any such effort to disclaim, or otherwise limit, liability for the Defective Ignition Switch Vehicles is null and void.

894. Any limitations New GM might seek to impose on its warranties are procedurally unconscionable. There was unequal bargaining power between New GM and Plaintiffs and the other Class members, as, at the time of purchase and lease, Plaintiffs and the other Class members had no other options for purchasing warranty coverage other than directly from New GM.

895. Any limitations New GM might seek to impose on its warranties are substantively unconscionable. New GM knew that the Defective Ignition Switch Vehicles were defective and would continue to pose safety risks after the warranties purportedly expired. New GM failed to disclose these defects to Plaintiffs and the other Class members. Thus, New GM's enforcement of the durational limitations on those warranties is harsh and shocks the conscience.

896. Plaintiffs and each of the other Class members have had sufficient direct dealings with either New GM or its agents (dealerships) to establish privity of contract between New GM, on the one hand, and Plaintiffs and each of the other Class members, on the other hand. Nonetheless, privity is not required here because Plaintiffs and each of the other Class members are intended third-party beneficiaries of contracts between New GM and its dealers, and specifically, of New GM's implied warranties. The dealers were not intended to be the ultimate consumers of the Defective Ignition Switch Vehicles and have no rights under the warranty agreements provided with the Defective Ignition Switch Vehicles; the warranty agreements were designed for and intended to benefit consumers. Finally, privity is also not required because the

Defective Ignition Switch Vehicles are dangerous instrumentalities due to the aforementioned defects and nonconformities.

897. Pursuant to 15 U.S.C. § 2310(e), Plaintiffs are entitled to bring this class action and are not required to give New GM notice and an opportunity to cure until such time as the Court determines the representative capacity of Plaintiffs pursuant to Rule 23 of the Federal Rules of Civil Procedure.

898. Plaintiffs and the other Class members would suffer economic hardship if they returned their Defective Ignition Switch Vehicles but did not receive the return of all payments made by them. Because New GM is refusing to acknowledge any revocation of acceptance and return immediately any payments made, Plaintiffs and the other Class members have not re-accepted their Defective Ignition Switch Vehicles by retaining them.

899. The amount in controversy of Plaintiffs' individual claims meets or exceeds the sum of $25. The amount in controversy of this action exceeds the sum of $50,000, exclusive of interest and costs, computed on the basis of all claims to be determined in this lawsuit. Plaintiffs, individually and on behalf of the other Class members, seek all damages permitted by law, including diminution in value of their vehicles, in an amount to be proven at trial. In addition, pursuant to 15 U.S.C. § 2310(d)(2), Plaintiffs and the other Class members are entitled to recover a sum equal to the aggregate amount of costs and expenses (including attorneys' fees based on actual time expended) determined by the Court to have reasonably been incurred by Plaintiffs and the other Class members in connection with the commencement and prosecution of this action.

900. Further, Plaintiffs and the Class are also entitled to equitable relief under 15 U.S.C. § 2310(d)(1). Based on New GM's continuing failures to fix the known dangerous

defects, Plaintiffs seek a declaration that New GM has not adequately implemented its recall commitments and requirements and general commitments to fix its failed processes, and injunctive relief in the form of judicial supervision over the recall process is warranted. Plaintiffs also seek the establishment of the New GM-funded program for Plaintiffs and Class members to recover out of pocket costs incurred in attempting to rectify the Ignition Switch Defects in their vehicles.

COUNT IV

BREACH OF IMPLIED WARRANTY

901. Plaintiffs reallege and incorporate by reference all paragraphs as if full set forth herein.

902. Plaintiffs bring this Count on behalf of the Nationwide Ignition Switch Defect Subclass under Michigan law.

903. New GM was a merchant with respect to motor vehicles within the meaning of MICH. COMP. LAWS § 440.2314(1).

904. Under MICH. COMP. LAWS § 440.2314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

905. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

906. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent

by Plaintiffs and the Nationwide Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

907. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Nationwide Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

COUNT V

NEGLIGENCE

(On Behalf of the Arkansas, Louisiana, Maryland, and Ohio State Ignition Switch Defect Subclasses)

908. Plaintiffs bring this Count on behalf of members of the Ignition Switch Defect Subclass who reside in Arkansas, Louisiana, Maryland, and Ohio ("Negligence Subclasses").

909. New GM has designed, manufactured, sold, or otherwise placed in the stream of commerce Defective Ignition Switch Vehicles, as set forth above.

910. New GM had a duty to design and manufacture a product that would be safe for its intended and foreseeable uses and users, including the use to which its products were put by Plaintiffs and the other members of the Negligence Subclasses. New GM breached its duties to Plaintiffs and the other members of the Negligence Subclasses because they were negligent in the design, development, manufacture, and testing of the Defective Ignition Switch Vehicles, and New GM is responsible for this negligence.

911. New GM was negligent in the design, development, manufacture, and testing of the Defective Ignition Switch Vehicles because they knew, or in the exercise of reasonable care should have known, that the vehicles equipped with defective ignition systems pose an unreasonable risk of death or serious bodily injury to Plaintiffs and the other members of the

Negligence Subclasses, passengers, other motorists, pedestrians, and the public at large, because they are susceptible to incidents in which brakes, power steering, and airbags are all rendered inoperable.

912. Whereupon Plaintiffs, individually and on behalf of the other members of the Negligence Subclasses, respectfully rely upon the **RESTATEMENT (SECOND) OF TORTS** § 395.

913. New GM further breached its duties to Plaintiffs and the other members of the Negligence Subclasses by supplying directly or through a third person defective vehicles to be used by such foreseeable persons as Plaintiffs and the other members of the Negligence Subclasses when:

a. Old GM and New GM knew or had reason to know that the vehicles were dangerous or likely to be dangerous for the use for which they were supplied; and

b. Old GM and New GM failed to exercise reasonable care to inform customers of the dangerous condition or of the facts under which the vehicles are likely to be dangerous.

914. New GM had a continuing duty to warn and instruct the intended and foreseeable users of its vehicles, including Plaintiffs and the other members of the Negligence Subclasses, of the defective condition of the vehicles and the high degree of risk attendant to using the vehicles. Plaintiffs and the other members of the Negligence Subclasses were entitled to know that the vehicles, in their ordinary operation, were not reasonably safe for their intended and ordinary purposes and uses.

915. New GM knew or should have known of the defects described herein, New GM breached its duty to Plaintiffs and the other members of the Negligence Subclasses because it

failed to warn and instruct the intended and foreseeable users of its vehicles of the defective condition of the Vehicles and the high degree of risk attendant to using the vehicles.

916. As a direct and proximate result of New GM's negligence, Plaintiffs and the other members of the Negligence Subclasses suffered damages.

B. State Class Claims

917. The following state law class claims are asserted in addition to the Nationwide Classes.

ALABAMA

COUNT I

VIOLATION OF ALABAMA DECEPTIVE TRADE PRACTICES ACT

(ALA. CODE § 8-19-1, *et seq.*)

918. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

919. This claim is brought solely on behalf of Nationwide Class members who are Alabama residents (the "Alabama Class").

920. Plaintiffs and the Alabama Class are "consumers" within the meaning of ALA. CODE § 8-19-3(2).

921. Plaintiffs, the Alabama Class, and New GM are "persons" within the meaning of ALA. CODE § 8-19-3(5).

922. The Affected Vehicles are "goods" within the meaning of ALA. CODE § 8-19-3(3).

923. New GM was and is engaged in "trade or commerce" within the meaning of ALA. CODE § 8-19-3(8).

924. The Alabama Deceptive Trade Practices Act ("Alabama DTPA") declares several specific actions to be unlawful, including: "(5) Representing that goods or services have

sponsorship, approval, characteristics, ingredients, uses, benefits, or qualities that they do not have," "(7) Representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another," and "(27) Engaging in any other unconscionable, false, misleading, or deceptive act or practice in the conduct of trade or commerce." ALA. CODE § 8-19-5. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Alabama DTPA, including: representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; advertising Affected Vehicles with the intent not to sell or lease them as advertised; representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not; and engaging in any other unconscionable, false, misleading, or deceptive act or practice in the conduct of trade or commerce.

925. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

926. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

927. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

928. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

929. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Alabama DTPA.

930. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

931. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

932. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Alabama Class.

933. New GM knew or should have known that its conduct violated the Alabama DTPA.

934. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

935. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

936. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

937. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Alabama Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

938. Plaintiffs and the Alabama Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

939. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

940. As a direct and proximate result of New GM's violations of the Alabama DTPA, Plaintiffs and the Alabama Class have suffered injury-in-fact and/or actual damage.

941. Pursuant to ALA. CODE § 8-19-10, Plaintiffs and the Alabama Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $100 for each Plaintiff and each Alabama Class member.

942. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the ALA. CODE § 8-19-1, *et seq.*

943. On October 8, 2014, certain Plaintiffs sent a letter complying with ALA. CODE § 8-19-10(e). Plaintiffs presently do not claim relief under the Alabama DTPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Alabama Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

944. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

945. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Alabama residents (the "Alabama Class").

946. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

947. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

948. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

949. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

950. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Alabama Class. These omitted and concealed facts were material because

they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Alabama Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

951. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Alabama Class.

952. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Alabama Class and conceal material information regarding defects that exist in GM-branded vehicles.

953. Plaintiffs and the Alabama Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Alabama Class.

954. Because of the concealment and/or suppression of the facts, Plaintiffs and the Alabama Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

955. The value of all Alabama Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has

greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

956. Accordingly, New GM is liable to the Alabama Class for their damages in an amount to be proven at trial.

957. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Alabama Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

ALASKA

COUNT I

VIOLATION OF THE ALASKA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT

(ALASKA STAT. ANN. § 45.50.471, *et seq.*)

958. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

959. This claim is brought only on behalf of Nationwide Class members who are Alaska residents (the "Alaska Class").

960. The Alaska Unfair Trade Practices And Consumer Protection Act ("Alaska CPA") declares unfair methods of competition and unfair or deceptive acts or practices in the conduct of trade or commerce unlawful, including: "(4) representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person

does not have;" "(6) representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;" "(8) advertising goods or services with intent not to sell them as advertised;" or "(12) using or employing deception, fraud, false pretense, false promise, misrepresentation, or knowingly concealing, suppressing, or omitting a material fact with intent that others rely upon the concealment, suppression or omission in connection with the sale or advertisement of goods or services whether or not a person has in fact been misled, deceived or damaged." ALASKA STAT. ANN. § 45.50.471.

961. New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles in violation of the Alaska CPA. New GM also engaged in unlawful trade practices by representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that the Affected Vehicles are of a particular standard and quality when they are not; advertising the Affected Vehicles with the intent not to sell them as advertised; and omitting material facts in describing the Affected Vehicles.

962. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

963. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

964. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

965. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair or deceptive business practices in violation of the Alaska CPA.

966. In the course of GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

967. GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

968. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Alaska Class.

969. New GM knew or should have known that its conduct violated the Alaska CPA.

970. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

971. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

972. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

973. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Alaska Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

974. Plaintiffs and the Alaska Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or

leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

975. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

976. As a direct and proximate result of New GM's violations of the Alaska CPA, Plaintiffs and the Alaska Class have suffered injury-in-fact and/or actual damage.

977. Pursuant to ALASKA STAT. ANN. § 45.50. 535(b)(1), Plaintiffs and the Alaska Class seek monetary relief against New GM measured as the greater of (a) three times the actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $500 for each Plaintiff and each Alaska Class member.

978. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Alaska CPA.

979. On October 8, 2014, certain Plaintiffs sent a letter complying with ALASKA STAT. ANN. § 45.50. 535(b)(1). Plaintiffs presently do not claim injunctive relief under the Alaska CPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all injunctive relief to which Plaintiffs and the Alaska Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

980. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

981. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Alaska residents (the "Alaska Class").

982. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

983. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

984. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

985. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

986. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Alaska Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Alaska Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

987. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Alaska Class.

988. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Alaska Class and conceal material information regarding defects that exist in GM-branded vehicles.

989. Plaintiffs and the Alaska Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Alaska Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Alaska Class.

990. Because of the concealment and/or suppression of the facts, Plaintiffs and the Alaska Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

991. The value of all Alaska Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

992. Accordingly, New GM is liable to the Alaska Class for their damages in an amount to be proven at trial.

993. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Alaska Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(ALASKA STAT. § 45.02.314)

994. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

995. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Alaska residents who are members of the Ignition Switch Defect Subclass (the "Alaska Ignition Switch Defect Subclass").

996. New GM was a merchant with respect to motor vehicles within the meaning of ALASKA STAT. § 45.02.104(a).

997. Under ALASKA STAT. § 45.02.314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

998. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems

that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

999. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Alaska Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recalls and the allegations of vehicle defects became public.

1000. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Alaska Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

ARIZONA

COUNT I

VIOLATIONS OF THE CONSUMER FRAUD ACT

(ARIZONA REV. STAT. § 44-1521, *et seq.*)

1001. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1002. This claim is brought only on behalf of Class members who are Arizona residents (the "Arizona Class").

1003. New GM, Plaintiffs, and the Arizona Class are "persons" within the meaning of the Arizona Consumer Fraud Act ("Arizona CFA"), ARIZ. REV. STAT. § 44-1521(6).

1004. The Affected Vehicles are "merchandise" within the meaning of ARIZ. REV. STAT. § 44-1521(5).

1005. The Arizona CFA provides that "[t]he act, use or employment by any person of any deception, deceptive act or practice, fraud, . . . misrepresentation, or concealment,

suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale . . of any merchandise whether or not any person has in fact been misled, deceived or damaged thereby, is declared to be an unlawful practice." ARIZ. REV. STAT. § 44-1522(A).

1006. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1007. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1008. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1009. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1010. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Arizona CFA.

1011. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1012. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1013. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Arizona Class.

1014. New GM knew or should have known that its conduct violated the Arizona CFA.

1015. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1016. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1017. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1018. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Arizona Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1019. Plaintiffs and the Arizona Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1020. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1021. The recalls and repairs instituted by New GM have not been adequate.

1022. As a direct and proximate result of New GM's violations of the Arizona CFA, Plaintiffs and the Arizona Class have suffered injury-in-fact and/or actual damage.

1023. Plaintiffs and the Arizona Class seek monetary relief against New GM in an amount to be determined at trial. Plaintiffs and the Arizona Class also seek punitive damages because New GM engaged in aggravated and outrageous conduct with an evil mind.

1024. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Arizona CFA.

COUNT II

FRAUD BY CONCEALMENT

1025. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1026. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Class members who are Arizona residents (the "Arizona Class").

1027. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

1028. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1029. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1030. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1031. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Arizona Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Arizona Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1032. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Arizona Class.

1033. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Arizona Class and conceal material information regarding defects that exist in GM-branded vehicles.

1034. Plaintiffs and the Arizona Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts.

Plaintiffs' and the Arizona Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Arizona Class.

1035. Because of the concealment and/or suppression of the facts, Plaintiffs and the Arizona Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1036. The value of all Arizona Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1037. Accordingly, New GM is liable to the Arizona Class for their damages in an amount to be proven at trial.

1038. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Arizona Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

ARKANSAS

COUNT I

VIOLATIONS OF THE DECEPTIVE TRADE PRACTICE ACT

(ARK. CODE ANN. § 4-88-101, *et seq*.)

1039. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1040. This claim is brought only on behalf of Class members who are Arkansas residents (the "Arkansas Class").

1041. New GM, Plaintiffs, and the Arkansas Class are "persons" within the meaning of Arkansas Deceptive Trade Practices Act ("Arkansas DTPA"), ARK. CODE ANN. § 4-88-102(5).

1042. The Affected Vehicles are "goods" within the meaning of ARK. CODE ANN. § 4-88-102(4).

1043. The Arkansas DTPA prohibits "[d]eceptive and unconscionable trade practices," which include, but are not limited to, a list of enumerated items, including "[e]ngaging in any other unconscionable, false, or deceptive act or practice in business, commerce, or trade[.]" ARK. CODE ANN. § 4-88-107(a)(10). The Arkansas DTPA also prohibits the following when utilized in connection with the sale or advertisement of any goods: "(1) The act, use, or employment by any person of any deception, fraud, or false pretense; or (2) The concealment, suppression, or omission of any material fact with intent that others rely upon the concealment, suppression, or omission." ARK. CODE ANN. § 4-88-108. New GM violated the Arkansas DTPA and engaged in deceptive and unconscionable trade practices by, among other things, systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles and otherwise engaging in activities with a tendency or capacity to deceive.

1044. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1045. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1046. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1047. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1048. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1049. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold,

New GM engaged in deceptive and unconscionable business practices in violation of the Arkansas DTPA.

1050. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1051. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1052. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Arkansas Class.

1053. New GM knew or should have known that its conduct violated the Arkansas DTPA.

1054. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1055. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1056. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1057. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Arkansas Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1058. Plaintiffs and the Arkansas Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1059. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1060. As a direct and proximate result of New GM's violations of the Arkansas DTPA, Plaintiffs and the Arkansas Class have suffered injury-in-fact and/or actual damage.

1061. Plaintiffs and the Arkansas Class seek monetary relief against New GM in an amount to be determined at trial. Plaintiffs and the Arkansas Class also seek punitive damages because New GM acted wantonly in causing the injury or with such a conscious indifference to the consequences that malice may be inferred.

1062. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Arkansas DTPA.

COUNT II

FRAUD BY CONCEALMENT

1063. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1064. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Class members who are Arkansas residents (the "Arkansas Class").

1065. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1066. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1067. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1068. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands

behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1069. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Arkansas Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Arkansas Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1070. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Arkansas Class.

1071. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Arkansas Class and conceal material information regarding defects that exist in GM-branded vehicles.

1072. Plaintiffs and the Arkansas Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Arkansas Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Arkansas Class.

1073. Because of the concealment and/or suppression of the facts, Plaintiffs and the Arkansas Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of

GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1074. The value of all Arkansas Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1075. Accordingly, New GM is liable to the Arkansas Class for their damages in an amount to be proven at trial.

1076. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Arkansas Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(ARK. CODE ANN. § 4-2-314)

1077. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1078. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only

on behalf of Ignition Switch Defect Subclass members who are Arkansas residents (the "Arkansas Ignition Switch Defect Subclass").

1079. New GM was a merchant with respect to motor vehicles within the meaning of ARK. CODE ANN. § 4-2-104(1).

1080. Under ARK. CODE ANN. § 4-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1081. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1082. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Arkansas Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1083. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Arkansas Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

CALIFORNIA

COUNT I

VIOLATIONS OF THE CONSUMER LEGAL REMEDIES ACT

(CAL. CIV. CODE § 1750, *et seq*.)

1084. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1085. This claim is brought only on behalf of Nationwide Class members who are California residents.

1086. New GM is a "person" under CAL. CIV. CODE § 1761(c).

1087. Plaintiffs and the California Class are "consumers," as defined by CAL. CIVIL CODE § 1761(d), who purchased or leased one or more Affected Vehicles.

1088. The California Legal Remedies Act ("CLRA") prohibits "unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or which results in the sale or lease of goods or services to any consumer[.]" CAL. CIV. CODE § 1770(a). New GM has engaged in unfair or deceptive acts or practices that violated CAL. CIV. CODE § 1750, *et seq*., as described above and below, by among other things, representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; advertising Affected Vehicles with the intent not to sell or lease them as advertised; and representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not.

1089. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful

trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1090. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1091. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1092. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1093. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the CLRA.

1094. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed

above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1095. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1096. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the California Class.

1097. New GM knew or should have known that its conduct violated the CLRA.

1098. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1099. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1100. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed,

the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1101. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the California Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1102. Plaintiffs and the California Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1103. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1104. As a direct and proximate result of New GM's violations of the CLRA, Plaintiffs and the California Class have suffered injury-in-fact and/or actual damage.

1105. Under CAL. CIV. CODE § 1780(a), Plaintiffs and the California Class seek monetary relief against New GM measured as the diminution of the value of their vehicles caused by New GM's violations of the CLRA as alleged herein.

1106. Under CAL. CIV. CODE § 1780(b), Plaintiffs seek an additional award against New GM of up to $5,000 for each California Class member who qualifies as a "senior citizen" or "disabled person" under the CLRA. New GM knew or should have known that its conduct was directed to one or more California Class members who are senior citizens or disabled persons. New GM's conduct caused one or more of these senior citizens or disabled persons to suffer a substantial loss of property set aside for retirement or for personal or family care and maintenance, or assets essential to the health or welfare of the senior citizen or disabled person. One or more California Class members who are senior citizens or disabled persons are substantially more vulnerable to New GM's conduct because of age, poor health or infirmity, impaired understanding, restricted mobility, or disability, and each of them suffered substantial physical, emotional, or economic damage resulting from New GM's conduct.

1107. Plaintiffs also seek punitive damages against New GM because it carried out reprehensible conduct with willful and conscious disregard of the rights and safety of others, subjecting Plaintiffs and the California Class to potential cruel and unjust hardship as a result. New GM intentionally and willfully deceived Plaintiffs on life-or-death matters, and concealed material facts that only New GM knew. New GM's unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages under CAL. CIV. CODE § 3294.

1108. Plaintiffs further seek an order enjoining New GM's unfair or deceptive acts or practices, restitution, punitive damages, costs of court, attorneys' fees under CAL. CIV. CODE § 1780(e), and any other just and proper relief available under the CLRA.

1109. Certain Plaintiffs have sent a letter complying with CAL. CIV. CODE § 1780(b).

COUNT II

VIOLATION OF THE CALIFORNIA UNFAIR COMPETITION LAW

(CAL. BUS. & PROF. CODE § 17200, *et seq.*)

1110. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1111. This claim is brought only on behalf of Nationwide Class members who are California residents (the "California Class").

1112. California Business and Professions Code § 17200 prohibits any "unlawful, unfair, or fraudulent business act or practices." New GM has engaged in unlawful, fraudulent, and unfair business acts and practices in violation of the UCL.

1113. New GM violated the unlawful prong of § 17200 by the following:

a. violations of the CLRA, CAL. CIV. CODE § 1750, *et seq.*, as set forth in Count I by the acts and practices set forth in this Complaint.

b. violation of the common-law claim of negligent failure to recall, in that New GM knew or should have known that the Defective Ignition Switch Vehicles, and many other vehicles suffering myriad other defects, were dangerous and/or were likely to be dangerous when used in a reasonably foreseeable manner; New GM became aware of the attendant risks after the Defective Ignition Switch Vehicles and other defective vehicles were sold; continued to gain information further corroborating the ignition switch defects and many other defects; and failed to adequately recall the Defective Ignition Switch Vehicles and many other vehicles in a timely manner, which failure was a substantial factor in causing Plaintiffs and the Class harm, including diminished value and out-of-pocket costs.

c. violation of the National Traffic and Motor Vehicle Safety Act of 1996, codified at 49 U.S.C. §§ 30101-30170, and its regulations. Federal Motor Vehicle Safety Standard ("FMVSS") 573 governs a motor vehicle manufacturer's responsibility to notify NHTSA of a motor vehicle defect within five days of determining that the defect is safety

> related. *See* 49 C.F.R. § 573.6. New GM violated these reporting requirements by failing to report the myriad defects discussed herein within the required time, and failing to timely recall all impacted vehicles.

1114. New GM also violated the unfair and fraudulent prong of section 17200 by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, information that was material to a reasonable consumer.

1115. New GM also violated the unfair prong of section 17200 because the acts and practices set forth in the Complaint, including systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, offend established public policy, and also because the harm New GM caused consumers greatly outweighs any benefits associated with those practices. New GM's conduct has also impaired competition within the automotive vehicles market and has prevented Plaintiffs and the California Class from making fully informed decisions about whether to lease, purchase and/or retain the Affected Vehicles.

1116. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1117. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1118. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1119. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unlawful, unfair, or fraudulent business act or practices in violation of the UCL.

1120. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1121. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1122. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the California Class.

1123. New GM knew or should have known that its conduct violated the UCL.

1124. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1125. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1126. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1127. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the California Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1128. Plaintiffs and the California Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1129. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. Its unlawful acts and practices complained of herein affect the public interest.

1130. As a direct and proximate result of New GM's violations of the UCL, Plaintiffs and the California Class have suffered injury-in-fact and/or actual damage.

1131. Plaintiffs request that this Court enter such orders or judgments as may be necessary, including a declaratory judgment that New GM has violated the UCL; an order enjoining New GM from continuing its unfair, unlawful, and/or deceptive practices; an order supervising the recalls; an order and judgment restoring to the California Class members any money lost as the result of New GM's unfair, unlawful, and deceptive trade practices, including restitution and disgorgement of any profits New GM received as a result of its unfair, unlawful, and/or deceptive practices, as provided in CAL. BUS. & PROF. CODE § 17203, CAL CIV. PROC. § 384 and CAL. CIV. CODE § 3345; and for such other relief as may be just and proper.

COUNT III

FRAUD BY CONCEALMENT

1132. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1133. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are California residents (the "California Class").

1134. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

1135. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1136. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1137. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1138. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the California Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the California Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1139. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the California Class.

1140. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the California Class and conceal material information regarding defects that exist in GM-branded vehicles.

1141. Plaintiffs and the California Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the California Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the California Class.

1142. Because of the concealment and/or suppression of the facts, Plaintiffs and the California Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1143. The value of all California Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1144. Accordingly, New GM is liable to the California Class for their damages in an amount to be proven at trial.

1145. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the California Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT IV

VIOLATION OF SONG-BEVERLY CONSUMER WARRANTY ACT FOR BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(CAL. CIV. CODE §§ 1791.1 & 1792)

1146. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1147. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of California residents who are members of the Ignition Switch Defect Subclass (the "California Ignition Switch Defect Subclass").

1148. Plaintiffs and California Ignition Switch Defect Subclass members are "buyers" within the meaning of CAL. CIV. CODE § 1791(b).

1149. The Defective Ignition Switch Vehicles are "consumer goods" within the meaning of CIV. CODE § 1791(a).

1150. New GM was a "manufacturer" of the Defective Ignition Switch Vehicles within the meaning of CAL. CIV. CODE § 1791(j).

1151. New GM impliedly warranted to Plaintiffs and the California Ignition Switch Defect Subclass that its Defective Ignition Switch Vehicles were "merchantable" within the meaning of CAL. CIV. CODE §§ 1791.1(a) & 1792; however, the Defective Ignition Switch

Vehicles do not have the quality that a buyer would reasonably expect, and were therefore not merchantable.

1152. CAL. CIV. CODE § 1791.1(a) states:

> "Implied warranty of merchantability" or "implied warranty that goods are merchantable" means that the consumer goods meet each of the following:
>
> (1) Pass without objection in the trade under the contract description.
>
> (2) Are fit for the ordinary purposes for which such goods are used.
>
> (3) Are adequately contained, packaged, and labeled.
>
> (4) Conform to the promises or affirmations of fact made on the container or label.

1153. The Defective Ignition Switch Vehicles would not pass without objection in the automotive trade because of the ignition switch defects that cause the Defective Ignition Switch Vehicles to inadvertently shut down during ordinary driving conditions, leading to an unreasonable likelihood of accident and an unreasonable likelihood that such accidents will cause serious bodily harm or death to vehicle occupants.

1154. Because of the ignition switch defects, the Defective Ignition Switch Vehicles are not safe to drive and thus not fit for ordinary purposes.

1155. The Defective Ignition Switch Vehicles are not adequately labeled because the labeling fails to disclose the ignition switch defects and does not advise Class members to avoid attaching anything to their vehicle key rings. New GM failed to warn about the dangerous safety defects in the Defective Ignition Switch Vehicles.

1156. New GM breached the implied warranty of merchantability by selling Defective Ignition Switch Vehicles containing defects leading to the sudden and unintended shut down of

the vehicles during ordinary driving conditions. These defects have deprived Plaintiffs and the California Ignition Switch Defect Subclass of the benefit of their bargain and have caused the Defective Ignition Switch Vehicles to depreciate in value.

1157. Notice of breach is not required because Plaintiffs and California Ignition Switch Defect Subclass members did not purchase their automobiles directly from New GM.

1158. As a direct and proximate result New GM's breach of its duties under California's Lemon Law, Plaintiffs and California Ignition Switch Defect Subclass members received goods whose dangerous condition substantially impairs their value. Plaintiffs and the California Ignition Switch Defect Subclass have been damaged by the diminished value of New GM's products, the product's malfunctioning, and the nonuse of their Defective Ignition Switch Vehicles.

1159. Under CAL. CIV. CODE §§ 1791.1(d) & 1794, Plaintiffs and California Ignition Switch Defect Subclass members are entitled to damages and other legal and equitable relief including, at their election, the purchase price of their Defective Ignition Switch Vehicles, or the overpayment or diminution in value of their Defective Ignition Switch Vehicles.

1160. Under CAL. CIV. CODE § 1794, Plaintiffs and California Ignition Switch Defect Subclass members are entitled to costs and attorneys' fees.

COUNT V

NEGLIGENT FAILURE TO RECALL

1161. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1162. This claim is brought only on behalf of California residents who are members of the Ignition Switch Defect Subclass (the "California Ignition Switch Defect Subclass").

1163. New GM manufactured, distributed, and sold Defective Ignition Switch Vehicles.

1164. New GM knew or reasonably should have known that the Defective Ignition Switch Vehicles were dangerous and/or were likely to be dangerous when used in a reasonably foreseeable manner.

1165. New GM either knew of the ignition switch defects before the vehicles were sold, or became aware of the ignition switch defects and their attendant risks after the vehicles were sold.

1166. New GM continued to gain information further corroborating the ignition switch defects and their risks from its inception until this year.

1167. New GM failed to adequately recall the Defective Ignition Switch Vehicles in a timely manner.

1168. Purchasers of the Defective Ignition Switch Vehicles, including the California Ignition Switch Defect Subclass, were harmed by New GM's failure to adequately recall all the Defective Ignition Switch Vehicles in a timely manner and have suffered damages, including, without limitation, damage to other components of the Defective Ignition Switch Vehicles caused by the Ignition Switch Defects, the diminished value of the Defective Ignition Switch Vehicles, the cost of modification of the defective ignition switch systems, and the costs associated with the loss of use of the Defective Ignition Switch Vehicles.

1169. New GM's failure to timely and adequately recall the Defective Ignition Switch Vehicles was a substantial factor in causing the purchasers' harm, including that of Plaintiffs and the California Ignition Switch Defect Subclass.

COLORADO

COUNT I

VIOLATIONS OF THE COLORADO CONSUMER PROTECTION ACT

(COL. REV. STAT. § 6-1-101, *et seq.*)

1170. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1171. This claim is brought only on behalf of Nationwide Class members who are Colorado residents (the "Colorado Class").

1172. New GM is a "person" under § 6-1-102(6) of the Colorado Consumer Protection Act ("Colorado CPA"), COL. REV. STAT. § 6-1-101, *et seq*.

1173. Plaintiffs and Colorado Class members are "consumers" for purposes of COL. REV. STAT § 6-1-113(1)(a) who purchased or leased one or more Affected Vehicles.

1174. The Colorado CPA prohibits deceptive trade practices in the course of a person's business. New GM engaged in deceptive trade practices prohibited by the Colorado CPA, including: (1) knowingly making a false representation as to the characteristics, uses, and benefits of the Affected Vehicles that had the capacity or tendency to deceive Colorado Class members; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade even though New GM knew or should have known they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; and (4) failing to disclose material information concerning the Affected Vehicles that was known to New GM at the time of advertisement or sale with the intent to induce Colorado Class members to purchase, lease or retain the Affected Vehicles.

1175. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise

engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1176. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1177. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1178. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1179. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1180. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself

as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Colorado CPA.

1181. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1182. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1183. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Colorado Class.

1184. New GM knew or should have known that its conduct violated the Colorado CPA.

1185. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1186. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1187. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1188. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Colorado Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1189. Plaintiffs and the Colorado Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1190. Plaintiffs and Colorado Class members risk irreparable injury as a result of New GM's act and omissions in violation of the Colorado CPA, and these violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1191. As a direct and proximate result of New GM's violations of the Colorado CPA, Plaintiffs and the Colorado Class have suffered injury-in-fact and/or actual damage.

1192. Pursuant to COLO. REV. STAT. § 6-1-113, Plaintiffs individually and on behalf of the Colorado Class, seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and discretionary trebling of such damages, or (b) statutory damages in the amount of $500 for each Plaintiff and each Colorado Class member.

1193. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under the Colorado CPA.

COUNT II

FRAUD BY CONCEALMENT

1194. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1195. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Colorado residents (the "Colorado Class").

1196. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1197. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1198. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1199. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1200. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Colorado Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Colorado Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1201. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Colorado Class.

1202. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Colorado Class and conceal material information regarding defects that exist in GM-branded vehicles.

1203. Plaintiffs and the Colorado Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Colorado Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Colorado Class.

1204. Because of the concealment and/or suppression of the facts, Plaintiffs and the Colorado Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1205. The value of all Colorado Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1206. Accordingly, New GM is liable to the Colorado Class for their damages in an amount to be proven at trial.

1207. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Colorado Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(COL. REV. STAT. § 4-2-314)

1208. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1209. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Colorado residents who are members of the Ignition Switch Defect Subclass (the "Colorado Ignition Switch Defect Subclass").

1210. New GM was a merchant with respect to motor vehicles.

1211. Under COL. REV. STAT. § 4-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1212. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1213. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Colorado Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1214. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Colorado Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

CONNECTICUT

COUNT I

VIOLATION OF CONNECTICUT UNLAWFUL TRADE PRACTICES ACT

(CONN. GEN. STAT. § 42-110A, *et seq*.)

1215. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1216. This claim is brought only on behalf of Class members who are Connecticut residents (the "Connecticut Class").

1217. The Connecticut Unfair Trade Practices Act ("Connecticut UTPA") provides: "No person shall engage in unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." CONN. GEN. STAT. § 42-110b(a).

1218. New GM is a "person" within the meaning of CONN. GEN. STAT. § 42-110a(3). New GM is in "trade" or "commerce" within the meaning of CONN. GEN. STAT. § 42-110a(4).

1219. New GM participated in deceptive trade practices that violated the Connecticut UTPA as described herein. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1220. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1221. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1222. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1223. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Connecticut UTPA.

1224. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles

were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1225. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1226. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Connecticut Class.

1227. New GM knew or should have known that its conduct violated the Connecticut UTPA.

1228. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1229. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1230. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed,

the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1231. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Connecticut Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1232. Plaintiffs and the Connecticut Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1233. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1234. As a direct and proximate result of New GM's violations of the Connecticut UTPA, Plaintiffs and the Connecticut Class have suffered injury-in-fact and/or actual damage.

1235. Plaintiffs and the Class are entitled to recover their actual damages, punitive damages, and attorneys' fees pursuant to CONN. GEN. STAT. § 42-110g.

1236. New GM acted with a reckless indifference to another's rights or wanton or intentional violation to another's rights and otherwise engaged in conduct amounting to a particularly aggravated, deliberate disregard of the rights and safety of others.

COUNT II

FRAUDULENT CONCEALMENT

1237. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1238. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Class members who are Connecticut residents (the "Connecticut Class").

1239. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1240. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1241. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1242. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1243. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Connecticut Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Connecticut Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1244. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Connecticut Class.

1245. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Connecticut Class and conceal material information regarding defects that exist in GM-branded vehicles.

1246. Plaintiffs and the Connecticut Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Connecticut Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Connecticut Class.

1247. Because of the concealment and/or suppression of the facts, Plaintiffs and the Connecticut Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded

vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1248. The value of all Connecticut Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1249. Accordingly, New GM is liable to the Connecticut Class for their damages in an amount to be proven at trial.

1250. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Connecticut Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

DELAWARE

COUNT I

VIOLATION OF THE DELAWARE CONSUMER FRAUD ACT

(6 DEL. CODE § 2513, *et seq*.)

1251. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1252. This claim is brought only on behalf of Nationwide Class members who are Delaware residents (the "Delaware Class").

1253. New GM is a "person" within the meaning of 6 DEL. CODE § 2511(7).

1254. The Delaware Consumer Fraud Act ("Delaware CFA") prohibits the "act, use or employment by any person of any deception, fraud, false pretense, false promise, misrepresentation, or the concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale, lease or advertisement of any merchandise, whether or not any person has in fact been misled, deceived or damaged thereby." 6 DEL. CODE § 2513(a).

1255. New GM participated in deceptive trade practices that violated the Delaware CFA as described herein. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1256. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1257. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1258. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1259. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Delaware CFA.

1260. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1261. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1262. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Delaware Class.

1263. New GM knew or should have known that its conduct violated the Delaware CFA.

1264. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1265. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1266. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1267. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Delaware Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1268. Plaintiffs and the Delaware Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been

aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1269. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1270. As a direct and proximate result of New GM's violations of the Delaware CFA, Plaintiffs and the Delaware Class have suffered injury-in-fact and/or actual damage.

1271. Plaintiffs seek damages under the Delaware CFA for injury resulting from the direct and natural consequences of New GM's unlawful conduct. *See, e.g.*, *Stephenson v. Capano Dev., Inc.*, 462 A.2d 1069, 1077 (Del. 1983). Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under the Delaware CFA.

1272. New GM engaged in gross, oppressive or aggravated conduct justifying the imposition of punitive damages.

COUNT II

VIOLATION OF THE DELAWARE DECEPTIVE TRADE PRACTICES ACT

(6 DEL. CODE § 2532, *et seq.*)

1273. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1274. This claim is brought only on behalf of Nationwide Class members who are Delaware residents (the "Delaware Class").

1275. New GM is a "person" within the meaning of 6 DEL. CODE § 2531(5).

1276. Delaware's Deceptive Trade Practices Act ("Delaware DTPA") prohibits a person from engaging in a "deceptive trade practice," which includes: "(5) Represent[ing] that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have, or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have"; "(7) Represent[ing] that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another"; "(9) Advertis[ing] goods or services with intent not to sell them as advertised"; or "(12) Engag[ing] in any other conduct which similarly creates a likelihood of confusion or of misunderstanding."

1277. New GM engaged in deceptive trade practices in violation of the Delaware DTPA by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles as described above. New GM also engaged in deceptive trade practices in violation of the Delaware DTPA by representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that the Affected Vehicles are of a particular standard and quality when they are not; advertising the Affected Vehicles with the intent not to sell them as advertised; and otherwise engaging in conduct likely to deceive.

1278. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1279. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1280. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1281. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Delaware DTPA.

1282. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1283. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1284. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Delaware Class.

1285. New GM knew or should have known that its conduct violated the Delaware DTPA.

1286. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1287. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1288. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1289. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Delaware Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1290. Plaintiffs and the Delaware Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1291. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1292. As a direct and proximate result of New GM's violations of the Delaware DTPA, Plaintiffs and the Delaware Class have suffered injury-in-fact and/or actual damage.

1293. Plaintiff seeks injunctive relief and, if awarded damages under Delaware common law or Delaware DTPA Act, treble damages pursuant to 6 DEL. CODE § 2533(c).

1294. New GM engaged in gross, oppressive or aggravated conduct justifying the imposition of punitive damages.

COUNT III

FRAUD BY CONCEALMENT

1295. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1296. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Delaware residents (the "Delaware Class").

1297. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1298. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1299. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1300. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1301. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Delaware Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Delaware Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1302. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Delaware Class.

1303. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Delaware Class and conceal material information regarding defects that exist in GM-branded vehicles.

1304. Plaintiffs and the Delaware Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Delaware Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Delaware Class.

1305. Because of the concealment and/or suppression of the facts, Plaintiffs and the Delaware Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1306. The value of all Delaware Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1307. Accordingly, New GM is liable to the Delaware Class for their damages in an amount to be proven at trial.

1308. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Delaware Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT IV

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(6 DEL. CODE § 2-314)

1309. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1310. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Delaware residents who are members of the Ignition Switch Defect Subclass (the "Delaware Ignition Switch Defect Subclass").

1311. New GM was a merchant with respect to motor vehicles within the meaning of 6 DEL. CODE § 2-104(1).

1312. Under 6 DEL. CODE § 2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1313. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1314. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Delaware Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1315. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Delaware Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

DISTRICT OF COLUMBIA

COUNT I

VIOLATION OF THE CONSUMER PROTECTION PROCEDURES ACT

(D.C. CODE § 28-3901, *et seq*.)

1316. Plaintiffs reallege and incorporate by reference all paragraphs as if fully set forth herein.

1317. This claim is brought only on behalf of Nationwide Class members who are District of Columbia residents (the "District of Columbia Class").

1318. New GM is a "person" under the Consumer Protection Procedures Act ("District of Columbia CPPA"), D.C. CODE § 28-3901(a)(1).

1319. Class members are "consumers," as defined by D.C. CODE § 28-3901(1)(2), who purchased or leased one or more Affected Vehicles.

1320. New GM's actions as set forth herein constitute "trade practices" under D.C. CODE § 28-3901.

1321. New GM participated in unfair or deceptive acts or practices that violated the District of Columbia CPPA. By systematically devaluing safety and concealing a plethora of

defects in GM-branded vehicles, New GM engaged in unfair or deceptive practices prohibited by the District of Columbia CPPA, D.C. CODE § 28-3901, *et seq.*, including: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; (4) representing that the subject of a transaction involving the Affected Vehicles has been supplied in accordance with a previous representation when it has not; (5) misrepresenting as to a material fact which has a tendency to mislead; and (6) failing to state a material fact when such failure tends to mislead.

1322. In the course of its business in trade or commerce, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1323. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1324. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1325. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1326. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the District of Columbia CCPA.

1327. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1328. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1329. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the District of Columbia Class.

1330. New GM knew or should have known that its conduct violated the District of Columbia CPPA.

1331. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1332. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1333. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1334. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the District of Columbia Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise

comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1335. Plaintiffs and the District of Columbia Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1336. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1337. As a direct and proximate result of New GM's violations of the District of Columbia CPPA, Plaintiffs and the District of Columbia Class have suffered injury-in-fact and/or actual damage.

1338. Plaintiff and the District of Columbia Class are entitled to recover treble damages or $1,500, whichever is greater, punitive damages, reasonable attorneys' fees, and any other relief the Court deems proper, under D.C. CODE § 28-3901.

1339. Plaintiffs seek punitive damages against New GM because New GM's conduct evidences malice and/or egregious conduct. New GM maliciously and egregiously misrepresented the safety and reliability of the Affected Vehicles, deceived Class members on life-or-death matters, and concealed material facts that only it knew, all to avoid the expense and public relations nightmare of correcting deadly flaws in vehicles and repeatedly promised Class

members that all vehicles were safe. New GM's unlawful conduct constitutes malice warranting punitive damages.

COUNT II

FRAUD BY CONCEALMENT

1340. Plaintiffs reallege and incorporate by reference all paragraphs as if fully set forth herein.

1341. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are District of Columbia residents (the "District of Columbia Class").

1342. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1343. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1344. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1345. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1346. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the District of Columbia Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the District of Columbia Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1347. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the District of Columbia Class.

1348. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the District of Columbia Class and conceal material information regarding defects that exist in GM-branded vehicles.

1349. Plaintiffs and the District of Columbia Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the District of Columbia Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the District of Columbia Class.

1350. Because of the concealment and/or suppression of the facts, Plaintiffs and the District of Columbia Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have

paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1351. The value of all District of Columbia Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1352. Accordingly, New GM is liable to the District of Columbia Class for their damages in an amount to be proven at trial.

1353. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the District of Columbia Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(D.C. CODE § 28:2-314)

1354. Plaintiffs reallege and incorporate by reference all paragraphs as if fully set forth herein.

1355. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of District of Columbia residents who are members of the Ignition Switch Defect Subclass (the "D.C. Ignition Switch Defect Subclass").

1356. New GM was a merchant with respect to motor vehicles within the meaning of D.C. CODE § 28:2-104(1).

1357. Under D.C. CODE § 28:2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1358. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1359. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the D.C. Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recalls and the allegations of vehicle defects became public.

1360. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the D.C. Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

FLORIDA

COUNT I

VIOLATION OF FLORIDA'S UNFAIR & DECEPTIVE TRADE PRACTICES ACT

(FLA. STAT. § 501.201, *et seq.*)

1361. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1362. This claim is brought only on behalf of Nationwide Class members who are Florida residents (the "Florida Class").

1363. Plaintiffs are "consumers" within the meaning of Florida Unfair and Deceptive Trade Practices Act ("FUDTPA"), FLA. STAT. § 501.203(7).

1364. New GM engaged in "trade or commerce" within the meaning of FLA. STAT. § 501.203(8).

1365. FUDTPA prohibits "[u]nfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce …" FLA. STAT. § 501.204(1). New GM participated in unfair and deceptive trade practices that violated the FUDTPA as described herein.

1366. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1367. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1368. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1369. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1370. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair, unconscionable, and deceptive business practices in violation of the FUDTPA.

1371. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1372. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1373. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Florida Class.

1374. New GM knew or should have known that its conduct violated the FUDTPA.

1375. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1376. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1377. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1378. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Florida Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable

vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1379. Plaintiffs and the Florida Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1380. Plaintiffs and Florida Class members risk irreparable injury as a result of New GM's act and omissions in violation of the FUDTPA, and these violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1381. As a direct and proximate result of New GM's violations of the FUDTPA, Plaintiffs and the Florida Class have suffered injury-in-fact and/or actual damage.

1382. Plaintiffs and the Florida Class are entitled to recover their actual damages under FLA. STAT. § 501.211(2) and attorneys' fees under FLA. STAT. § 501.2105(1).

1383. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under the FUDTPA.

COUNT II

FRAUD BY CONCEALMENT

1384. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1385. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Florida residents (the "Florida Class").

1386. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1387. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1388. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1389. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1390. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Florida Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Florida Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1391. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Florida Class.

1392. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Florida Class and conceal material information regarding defects that exist in GM-branded vehicles.

1393. Plaintiffs and the Florida Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Florida Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Florida Class.

1394. Because of the concealment and/or suppression of the facts, Plaintiffs and the Florida Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1395. The value of all Florida Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1396. Accordingly, New GM is liable to the Florida Class for their damages in an amount to be proven at trial.

1397. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Florida Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

GEORGIA

COUNT I

VIOLATION OF GEORGIA'S FAIR BUSINESS PRACTICES ACT

(GA. CODE ANN. § 10-1-390, *et seq*.)

1398. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1399. This claim is brought only on behalf of Nationwide Class members who are Georgia residents (the "Georgia Class").

1400. The Georgia Fair Business Practices Act ("Georgia FBPA") declares "[u]nfair or deceptive acts or practices in the conduct of consumer transactions and consumer acts or practices in trade or commerce" to be unlawful, GA. CODE. ANN. § 10-1-393(a), including but not limited to "representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have," "[r]epresenting that goods or services are of a particular standard, quality, or grade … if they are of another," and "[a]dvertising goods or services with intent not to sell them as advertised," GA. CODE. ANN. § 10-1-393(b).

1401. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in unfair or deceptive practices prohibited by the FBPA, including: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; and (3) advertising the Affected Vehicles with the intent not to sell them as advertised. New GM participated in unfair or deceptive acts or practices that violated the Georgia FBPA.

1402. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1403. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1404. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM -branded vehicles. New GM concealed this information as well.

1405. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1406. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Georgia FBPA.

1407. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1408. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1409. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Georgia Class.

1410. New GM knew or should have known that its conduct violated the Georgia FBPA.

1411. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1412. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1413. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1414. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Georgia Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1415. Plaintiffs and the Georgia Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the

many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1416. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1417. As a direct and proximate result of New GM's violations of the Georgia FBPA, Plaintiffs and the Georgia Class have suffered injury-in-fact and/or actual damage.

1418. Plaintiff and the Georgia Class are entitled to recover damages and exemplary damages (for intentional violations) per GA. CODE. ANN § 10-1-399(a).

1419. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Georgia FBPA per GA. CODE. ANN § 10-1-399.

1420. On October 8, 2014, certain Plaintiffs sent a letter complying with GA. CODE. ANN § 10-1-399(b). Plaintiffs presently do not claim relief under the Georgia FBPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Georgia Class are entitled.

COUNT II

VIOLATION OF GEORGIA'S UNIFORM DECEPTIVE TRADE PRACTICES ACT

(GA. CODE ANN. § 10-1-370, *et seq.*)

1421. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1422. This claim is brought only on behalf of Nationwide Class members who are Georgia residents (the "Georgia Class").

1423. New GM, Plaintiffs, and the Georgia Class are "persons' within the meaning of Georgia Uniform Deceptive Trade Practices Act ("Georgia UDTPA"), GA. CODE. ANN § 10-1-371(5).

1424. The Georgia UDTPA prohibits "deceptive trade practices," which include the "misrepresentation of standard or quality of goods or services," and "engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding." GA. CODE. ANN § 10-1-372(a). By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive trade practices prohibited by the Georgia UDTPA.

1425. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1426. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1427. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1428. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1429. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Georgia UDTPA.

1430. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1431. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1432. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Georgia Class.

1433. New GM knew or should have known that its conduct violated the Georgia UDTPA.

1434. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1435. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1436. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1437. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Georgia Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1438. Plaintiffs and the Georgia Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1439. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1440. As a direct and proximate result of New GM's violations of the Georgia UDTPA, Plaintiffs and the Georgia Class have suffered injury-in-fact and/or actual damage.

1441. Plaintiffs seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Georgia UDTPA per GA. CODE. ANN § 10-1-373.

COUNT III

FRAUD BY CONCEALMENT

1442. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1443. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Georgia residents (the "Georgia Class").

1444. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1445. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1446. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1447. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1448. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Georgia Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Georgia Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1449. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Georgia Class.

1450. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Georgia Class and conceal material information regarding defects that exist in GM-branded vehicles.

1451. Plaintiffs and the Georgia Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Georgia Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Georgia Class.

1452. Because of the concealment and/or suppression of the facts, Plaintiffs and the Georgia Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1453. The value of all Georgia Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1454. Accordingly, New GM is liable to the Georgia Class for their damages in an amount to be proven at trial.

1455. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Georgia Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

HAWAII

COUNT I

UNFAIR AND DECEPTIVE ACTS IN VIOLATION OF HAWAII LAW

(HAW. REV. STAT. § 480, *et seq.*)

1456. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1457. This claim is brought only on behalf of Nationwide Class members who are Hawaii residents (the "Hawaii Class").

1458. New GM is a "person" under HAW. REV. STAT. § 480-1.

1459. Class members are "consumer[s]" as defined by HAW. REV. STAT. § 480-1, who purchased or leased one or more Affected Vehicles.

1460. New GM's acts or practices as set forth above occurred in the conduct of trade or commerce.

1461. The Hawaii Act § 480-2(a) prohibits "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce…." By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in unfair and deceptive trade practices prohibited by the Hawaii Act.

1462. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise

engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1463. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1464. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1465. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1466. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Hawaii Act.

1467. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1468. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1469. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Hawaii Class.

1470. New GM knew or should have known that its conduct violated the Hawaii Act.

1471. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1472. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1473. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1474. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Hawaii Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1475. Plaintiffs and the Hawaii Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1476. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1477. As a direct and proximate result of New GM's violations of the Hawaii Act, Plaintiffs and the Hawaii Class have suffered injury-in-fact and/or actual damage.

1478. Pursuant to HAW. REV. STAT. § 480-13, Plaintiffs and the Hawaii Class seek monetary relief against New GM measured as the greater of (a) $1,000 and (b) threefold actual damages in an amount to be determined at trial.

1479. Under HAW. REV. STAT. § 480-13.5, Plaintiffs seek an additional award against New GM of up to $10,000 for each violation directed at a Hawaiian elder. New GM knew or should have known that its conduct was directed to one or more Class members who are elders. New GM's conduct caused one or more of these elders to suffer a substantial loss of property set aside for retirement or for personal or family care and maintenance, or assets essential to the health or welfare of the elder. One or more Hawaii Class members who are elders are substantially more vulnerable to New GM's conduct because of age, poor health or infirmity, impaired understanding, restricted mobility, or disability, and each of them suffered substantial physical, emotional, or economic damage resulting from New GM's conduct.

COUNT II

FRAUD BY CONCEALMENT

1480. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1481. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Hawaii residents (the "Hawaii Class").

1482. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1483. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1484. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1485. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1486. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Hawaii Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Hawaii Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1487. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Hawaii Class.

1488. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Hawaii Class and conceal material information regarding defects that exist in GM-branded vehicles.

1489. Plaintiffs and the Hawaii Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts.

Plaintiffs' and the Hawaii Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Hawaii Class.

1490. Because of the concealment and/or suppression of the facts, Plaintiffs and the Hawaii Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1491. The value of all Hawaii Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1492. Accordingly, New GM is liable to the Hawaii Class for their damages in an amount to be proven at trial.

1493. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Hawaii Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(HAW. REV. STAT. § 490:2-314)

1494. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1495. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Hawaii residents who are members of the Ignition Switch Defect Subclass (the "Hawaii Ignition Switch Defect Subclass").

1496. New GM was a merchant with respect to motor vehicles within the meaning of HAW. REV. STAT. § 490:2-104(1).

1497. Under HAW. REV. STAT. § 490:2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1498. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1499. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Hawaii Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1500. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Hawaii Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

IDAHO

COUNT I

VIOLATION OF THE IDAHO CONSUMER PROTECTION ACT

(IDAHO CIV. CODE § 48-601, *et seq.*)

1501. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1502. This claim is brought only on behalf of Class members who are Idaho residents (the "Idaho Class").

1503. New GM is a "person" under the Idaho Consumer Protection Act ("Idaho CPA"), IDAHO CIV. CODE § 48-602(1).

1504. New GM's acts or practices as set forth above occurred in the conduct of "trade" or "commerce" under IDAHO CIV. CODE § 48-602(2).

1505. New GM participated in misleading, false, or deceptive acts that violated the Idaho CPA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Idaho CPA, including: (1) representing that the Affected Vehicles have characteristics, uses, and benefits which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; (4) engaging in acts or practices which are otherwise misleading, false, or deceptive to the consumer; and (5) engaging in any unconscionable method, act or practice in the conduct of trade or commerce. *See* IDAHO CIV. CODE § 48-603.

1506. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1507. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1508. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1509. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1510. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself

as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Idaho CPA.

1511. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1512. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1513. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Idaho Class.

1514. New GM knew or should have known that its conduct violated the Idaho CPA.

1515. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1516. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1517. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1518. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Idaho Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1519. Plaintiffs and the Idaho Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1520. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1521. As a direct and proximate result of New GM's violations of the Idaho CPA, Plaintiffs and the Idaho Class have suffered injury-in-fact and/or actual damage.

1522. Pursuant to IDAHO CODE § 48-608, Plaintiffs and the Idaho Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $1,000 for each Plaintiff and each Idaho Class member.

1523. Plaintiffs also seek an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under the Idaho CPA.

1524. Plaintiffs and Idaho Class members also seek punitive damages against New GM because New GM's conduct evidences an extreme deviation from reasonable standards. New GM flagrantly, maliciously, and fraudulently misrepresented the safety and reliability of the Affected Vehicles, deceived Class members on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting a deadly flaw in vehicles it repeatedly promised Class members were safe. New GM's unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

COUNT II

FRAUD BY CONCEALMENT

1525. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1526. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Idaho residents (the "Idaho Class").

1527. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1528. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1529. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1530. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1531. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Idaho Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Idaho Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1532. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Idaho Class.

1533. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Idaho Class and conceal material information regarding defects that exist in GM-branded vehicles.

1534. Plaintiffs and the Idaho Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Idaho Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Idaho Class.

1535. Because of the concealment and/or suppression of the facts, Plaintiffs and the Idaho Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1536. The value of all Idaho Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1537. Accordingly, New GM is liable to the Idaho Class for their damages in an amount to be proven at trial.

1538. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Idaho Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

ILLINOIS

COUNT I

VIOLATION OF ILLINOIS CONSUMER FRAUD AND DECEPTIVE BUSINESS PRACTICES ACT

(815 ILCS 505/1, *et seq*. and 720 ILCS 295/1A)

1539. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1540. This claim is brought only on behalf of Nationwide Class members who are Illinois residents (the "Illinois Class").

1541. New GM is a "person" as that term is defined in 815 ILCS 505/1(c).

1542. Plaintiff and the Illinois Class are "consumers" as that term is defined in 815 ILCS 505/1(e).

1543. The Illinois Consumer Fraud and Deceptive Business Practices Act ("Illinois CFA") prohibits "unfair or deceptive acts or practices, including but not limited to the use or employment of any deception, fraud, false pretense, false promise, misrepresentation or the concealment, suppression or omission of any material fact, with intent that others rely upon the concealment, suppression or omission of such material fact . . . in the conduct of trade or commerce . . . whether any person has in fact been misled, deceived or damaged thereby." 815 ILCS 505/2.

1544. New GM participated in misleading, false, or deceptive acts that violated the Illinois CFA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Illinois CFA.

1545. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1546. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1547. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1548. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1549. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Illinois CFA.

1550. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1551. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1552. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Illinois Class.

1553. New GM knew or should have known that its conduct violated the Illinois CFA.

1554. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1555. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1556. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1557. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Illinois Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1558. Plaintiffs and the Illinois Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1559. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1560. As a direct and proximate result of New GM's violations of the Illinois CFA, Plaintiffs and the Illinois Class have suffered injury-in-fact and/or actual damage.

1561. Pursuant to 815 ILCS 505/10a(a), Plaintiffs and the Illinois Class seek monetary relief against New GM in the amount of actual damages, as well as punitive damages because New GM acted with fraud and/or malice and/or was grossly negligent.

1562. Plaintiffs also seek an order enjoining New GM's unfair and/or deceptive acts or practices, punitive damages, and attorneys' fees, and any other just and proper relief available under 815 ILCS § 505/1 *et seq*.

COUNT II

FRAUD BY CONCEALMENT

1563. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1564. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Illinois residents (the "Illinois Class").

1565. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1566. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1567. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1568. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1569. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Illinois Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Illinois Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1570. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Illinois Class.

1571. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Illinois Class and conceal material information regarding defects that exist in GM-branded vehicles.

1572. Plaintiffs and the Illinois Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts.

Plaintiffs' and the Illinois Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Illinois Class.

1573. Because of the concealment and/or suppression of the facts, Plaintiffs and the Illinois Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1574. The value of all Illinois Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1575. Accordingly, New GM is liable to the Illinois Class for their damages in an amount to be proven at trial.

1576. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Illinois Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

INDIANA

COUNT I

VIOLATION OF THE INDIANA DECEPTIVE CONSUMER SALES ACT

(IND. CODE § 24-5-0.5-3)

1577. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1578. This claim is brought only on behalf of Nationwide Class members who are Indiana residents (the "Indiana Class").

1579. New GM is a "person" within the meaning of IND. CODE § 24-5-0.5-2(2) and a "supplier" within the meaning of IND. CODE § 24-5-.05-2(a)(3).

1580. Plaintiffs' and Indiana Class members' purchases of the Affected Vehicles are "consumer transactions" within the meaning of IND. CODE § 24-5-.05-2(a)(1).

1581. Indiana's Deceptive Consumer Sales Act ("Indiana DCSA") prohibits a person from engaging in a "deceptive trade practice," which includes representing: "(1) That such subject of a consumer transaction has sponsorship, approval, performance, characteristics, accessories, uses, or benefits that they do not have, or that a person has a sponsorship, approval, status, affiliation, or connection it does not have; (2) That such subject of a consumer transaction is of a particular standard, quality, grade, style or model, if it is not and if the supplier knows or should reasonably know that it is not; … (7) That the supplier has a sponsorship, approval or affiliation in such consumer transaction that the supplier does not have, and which the supplier knows or should reasonably know that the supplier does not have; … (b) Any representations on or within a product or its packaging or in advertising or promotional materials which would constitute a deceptive act shall be the deceptive act both of the supplier who places such a representation thereon or therein, or who authored such materials, and such suppliers who shall

state orally or in writing that such representation is true if such other supplier shall know or have reason to know that such representation was false."

1582. New GM participated in misleading, false, or deceptive acts that violated the Indiana DCSA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Indiana DCSA. New GM also engaged in unlawful trade practices by: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard and quality when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; and (4) otherwise engaging in conduct likely to deceive.

1583. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1584. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1585. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other

serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1586. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1587. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1588. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Indiana DCSA.

1589. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1590. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1591. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Indiana Class.

1592. New GM knew or should have known that its conduct violated the Indiana DCSA.

1593. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1594. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1595. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1596. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Indiana Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable

vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1597. Plaintiffs and the Indiana Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1598. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1599. As a direct and proximate result of New GM's violations of the Indiana DCSA, Plaintiffs and the Indiana Class have suffered injury-in-fact and/or actual damage.

1600. Pursuant to IND. CODE § 24-5-0.5-4, Plaintiffs and the Indiana Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $500 for each Plaintiff and each Indiana Class member, including treble damages up to $1,000 for New GM's willfully deceptive acts.

1601. Plaintiff also seeks punitive damages based on the outrageousness and recklessness of the New GM's conduct and New GM's high net worth.

1602. On October 8, 2014, certain Plaintiffs sent a letter complying with IND. CODE § 24-5-0.5-5(a). Plaintiffs presently do not claim relief under the Indiana DCSA for "curable" acts until and unless New GM fails to remedy its unlawful conduct within the requisite time

period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Indiana Class are entitled. Plaintiffs presently seek full relief for New GM's "incurable" acts.

COUNT II

FRAUD BY CONCEALMENT

1603. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1604. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Indiana residents (the "Indiana Class").

1605. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1606. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1607. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1608. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1609. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Indiana Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Indiana Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1610. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Indiana Class.

1611. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Indiana Class and conceal material information regarding defects that exist in GM-branded vehicles.

1612. Plaintiffs and the Indiana Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Indiana Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Indiana Class.

1613. Because of the concealment and/or suppression of the facts, Plaintiffs and the Indiana Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1614. The value of all Indiana Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1615. Accordingly, New GM is liable to the Indiana Class for their damages in an amount to be proven at trial.

1616. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Indiana Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(IND. CODE § 26-1-2-314)

1617. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1618. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Indiana residents who are members of the Ignition Switch Defect Subclass (the "Indiana Ignition Switch Defect Subclass").

1619. New GM was a merchant with respect to motor vehicles within the meaning of IND. CODE § 26-1-2-104(1).

1620. Under IND. CODE § 26-1-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1621. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1622. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Indiana Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1623. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Indiana Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

IOWA

COUNT I

VIOLATIONS OF THE PRIVATE RIGHT OF ACTION FOR CONSUMER FRAUDS ACT

(IOWA CODE § 714H.1, *et seq.*)

1624. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1625. This claim is brought only on behalf of Nationwide Class members who are Iowa residents (the "Iowa Class").

1626. New GM is "person" under IOWA CODE § 714H.2(7).

1627. Plaintiff and the Iowa Class are "consumers," as defined by IOWA CODE § 714H.2(3), who purchased or leased one or more Affected Vehicles.

1628. The Iowa Private Right of Action for Consumer Frauds Act ("Iowa CFA") prohibits any "practice or act the person knows or reasonably should know is an unfair practice, deception, fraud, false pretense, or false promise, or the misrepresentation, concealment, suppression, or omission of a material fact, with the intent that others rely upon the unfair practice, deception, fraud, false pretense, false promise, misrepresentation, concealment, suppression, or omission in connection with the advertisement, sale, or lease of consumer merchandise." IOWA CODE § 714H.3. New GM participated in misleading, false, or deceptive acts that violated the Iowa CFA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Iowa CFA.

1629. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1630. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1631. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1632. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1633. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1634. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Iowa CFA.

1635. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1636. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1637. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Iowa Class.

1638. New GM knew or should have known that its conduct violated the Iowa CFA.

1639. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1640. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1641. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1642. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Iowa Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1643. Plaintiffs and the Iowa Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1644. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1645. As a direct and proximate result of New GM's violations of the Iowa CFA, Plaintiffs and the Iowa Class have suffered injury-in-fact and/or actual damage.

1646. Pursuant to IOWA CODE § 714H.5, Plaintiffs seek an order enjoining New GM's unfair and/or deceptive acts or practices; actual damages; in addition to an award of actual damages, statutory damages up to three times the amount of actual damages awarded as a result of New GM's willful and wanton disregard for the rights or safety of others; attorneys' fees; and such other equitable relief as the Court deems necessary to protect the public from further violations of the Iowa CFA.

COUNT II

FRAUD BY CONCEALMENT

1647. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1648. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Iowa residents (the "Iowa Class").

1649. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1650. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1651. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1652. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1653. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Iowa Class. These omitted and concealed facts were material because they

directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Iowa Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1654. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Iowa Class.

1655. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Iowa Class and conceal material information regarding defects that exist in GM-branded vehicles.

1656. Plaintiffs and the Iowa Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Iowa Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Iowa Class.

1657. Because of the concealment and/or suppression of the facts, Plaintiffs and the Iowa Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1658. The value of all Iowa Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has

greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1659. Accordingly, New GM is liable to the Iowa Class for their damages in an amount to be proven at trial.

1660. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Iowa Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

KANSAS

COUNT I

VIOLATIONS OF THE KANSAS CONSUMER PROTECTION ACT

(KAN. STAT. ANN. § 50-623, *et seq*.)

1661. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1662. This claim is brought only on behalf of Nationwide Class members who are Kansas residents (the "Kansas Class").

1663. New GM is a "supplier" under the Kansas Consumer Protection Act ("Kansas CPA"), KAN. STAT. ANN. § 50-624(l).

1664. Kansas Class members are "consumers," within the meaning of KAN. STAT. ANN. § 50-624(b), who purchased or leased one or more Affected Vehicles.

1665. The sale of the Affected Vehicles to the Kansas Class members was a "consumer transaction" within the meaning of KAN. STAT. ANN. § 50-624(c).

1666. The Kansas CPA states "[n]o supplier shall engage in any deceptive act or practice in connection with a consumer transaction," KAN. STAT. ANN. § 50-626(a), and that deceptive acts or practices include: (1) knowingly making representations or with reason to know that "(A) Property or services have sponsorship, approval, accessories, characteristics, ingredients, uses, benefits or quantities that they do not have;" and "(D) property or services are of particular standard, quality, grade, style or model, if they are of another which differs materially from the representation;" "(2) the willful use, in any oral or written representation, of exaggeration, falsehood, innuendo or ambiguity as to a material fact;" and "(3) the willful failure to state a material fact, or the willful concealment, suppression or omission of a material fact." The Kansas CPA also provides that "[n]o supplier shall engage in any unconscionable act or practice in connection with a consumer transaction." KAN. STAT. ANN. § 50-627(a).

1667. New GM participated in misleading, false, or deceptive acts that violated the Kansas CPA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Kansas CPA. New GM also engaged in unlawful trade practices by: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard and quality when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; (4) willfully using, in any oral or written representation, of exaggeration, falsehood, innuendo or ambiguity as to a material fact; (5) willfully failing to state a material fact, or the willfully concealing, suppressing or omitting a material fact; and (6) otherwise engaging in an unconscionable act or practice in connection with a consumer transaction.

1668. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1669. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1670. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1671. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1672. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1673. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Kansas CPA.

1674. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1675. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1676. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Kansas Class.

1677. New GM knew or should have known that its conduct violated the Kansas CPA.

1678. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1679. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1680. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1681. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Kansas Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1682. Plaintiffs and the Kansas Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1683. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1684. As a direct and proximate result of New GM's violations of the Kansas CPA, Plaintiffs and the Kansas Class have suffered injury-in-fact and/or actual damage.

1685. Pursuant to KAN. STAT. ANN. § 50-634, Plaintiffs and the Kansas Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $10,000 for each Plaintiff and each Kansas Class member

1686. Plaintiff also seeks an order enjoining New GM's unfair, unlawful, and/or deceptive practices, declaratory relief, attorneys' fees, and any other just and proper relief available under KAN. STAT. ANN § 50-623 *et seq*.

COUNT II

FRAUD BY CONCEALMENT

1687. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1688. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Kansas residents (the "Kansas Class").

1689. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1690. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1691. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1692. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1693. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Kansas Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Kansas Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1694. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Kansas Class.

1695. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Kansas Class and conceal material information regarding defects that exist in GM-branded vehicles.

1696. Plaintiffs and the Kansas Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Kansas Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Kansas Class.

1697. Because of the concealment and/or suppression of the facts, Plaintiffs and the Kansas Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1698. The value of all Kansas Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1699. Accordingly, New GM is liable to the Kansas Class for their damages in an amount to be proven at trial.

1700. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Kansas Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(KAN. STAT. ANN. § 84-2-314)

1701. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1702. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Kansas residents who are members of the Ignition Switch Defect Subclass (the "Kansas Ignition Switch Defect Subclass").

1703. New GM was a merchant with respect to motor vehicles within the meaning of KAN. STAT. ANN. § 84-2-104(1).

1704. Under KAN. STAT. ANN. § 84-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1705. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1706. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Kansas Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1707. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Kansas Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

KENTUCKY

COUNT I

VIOLATION OF THE KENTUCKY CONSUMER PROTECTION ACT

(KY. REV. STAT. § 367.110, *et seq.*)

1708. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1709. This claim is brought only on behalf of Nationwide Class members who are Kentucky residents (the "Kentucky Class").

1710. New GM, Plaintiffs, and the Kentucky Class are "persons" within the meaning of the KY. REV. STAT. § 367.110(1).

1711. New GM engaged in "trade" or "commerce" within the meaning of KY. REV. STAT. § 367.110(2).

1712. The Kentucky Consumer Protection Act ("Kentucky CPA") makes unlawful "[u]nfair, false, misleading, or deceptive acts or practices in the conduct of any trade or commerce …." KY. REV. STAT. § 367.170(1). Old GM and New GM both participated in misleading, false, or deceptive acts that violated the Kentucky CPA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Kentucky CPA.

1713. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful

trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1714. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1715. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1716. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1717. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Kentucky CPA.

1718. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed

above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1719. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1720. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Kentucky Class.

1721. New GM knew or should have known that its conduct violated the Kentucky CPA.

1722. New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1723. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1724. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1725. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Kentucky Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1726. Plaintiffs and the Kentucky Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1727. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1728. As a direct and proximate result of New GM's violations of the Kentucky CPA, Plaintiffs and the Kentucky Class have suffered injury-in-fact and/or actual damage.

1729. Pursuant to KY. REV. STAT. ANN. § 367.220, Plaintiffs and the Kentucky Class seek to recover actual damages in an amount to be determined at trial; an order enjoining

New GM's unfair, unlawful, and/or deceptive practices; declaratory relief; attorneys' fees; and any other just and proper relief available under KY. REV. STAT. ANN. § 367.220.

COUNT II

FRAUD BY CONCEALMENT

1730. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1731. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Kentucky residents (the "Kentucky Class").

1732. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1733. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1734. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1735. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1736. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Kentucky Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Kentucky Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1737. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Kentucky Class.

1738. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Kentucky Class and conceal material information regarding defects that exist in GM-branded vehicles.

1739. Plaintiffs and the Kentucky Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Kentucky Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Kentucky Class.

1740. Because of the concealment and/or suppression of the facts, Plaintiffs and the Kentucky Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1741. The value of all Kentucky Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1742. Accordingly, New GM is liable to the Kentucky Class for their damages in an amount to be proven at trial.

1743. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Kentucky Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

LOUISIANA

COUNT I

VIOLATION OF THE LOUISIANA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION LAW

(LA. REV. STAT. § 51:1401, *et seq.*)

1744. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1745. This claim is brought only on behalf of Nationwide Class members who are Louisiana residents (the "Louisiana Class").

1746. New GM, Plaintiffs, and the Louisiana Class are "persons" within the meaning of the LA. REV. STAT. § 51:1402(8).

1747. Plaintiffs and the Louisiana Class are "consumers" within the meaning of LA. REV. STAT. § 51:1402(1).

1748. New GM engaged in "trade" or "commerce" within the meaning of LA. REV. STAT. § 51:1402(9).

1749. The Louisiana Unfair Trade Practices and Consumer Protection Law ("Louisiana CPL") makes unlawful "deceptive acts or practices in the conduct of any trade or commerce." LA. REV. STAT. § 51:1405(A). New GM both participated in misleading, false, or deceptive acts that violated the Louisiana CPL. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Louisiana CPL.

1750. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1751. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1752. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1753. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1754. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Louisiana CPL.

1755. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1756. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1757. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Louisiana Class.

1758. New GM knew or should have known that its conduct violated the Louisiana CPL.

1759. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1760. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1761. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1762. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Louisiana Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1763. Plaintiffs and the Louisiana Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1764. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1765. As a direct and proximate result of New GM's violations of the Louisiana CPL, Plaintiffs and the Louisiana Class have suffered injury-in-fact and/or actual damage.

1766. Pursuant to LA. REV. STAT. § 51:1409, Plaintiffs and the Louisiana Class seek to recover actual damages in an amount to be determined at trial; treble damages for New GM's knowing violations of the Louisiana CPL; an order enjoining New GM's unfair, unlawful, and/or deceptive practices; declaratory relief; attorneys' fees; and any other just and proper relief available under LA. REV. STAT. § 51:1409.

COUNT II

FRAUD BY CONCEALMENT

1767. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1768. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Louisiana residents (the "Louisiana Class").

1769. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1770. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1771. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1772. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1773. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Louisiana Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Louisiana Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1774. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Louisiana Class.

1775. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Louisiana Class and conceal material information regarding defects that exist in GM-branded vehicles.

1776. Plaintiffs and the Louisiana Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Louisiana Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Louisiana Class.

1777. Because of the concealment and/or suppression of the facts, Plaintiffs and the Louisiana Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1778. The value of all Louisiana Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1779. Accordingly, New GM is liable to the Louisiana Class for their damages in an amount to be proven at trial.

1780. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Louisiana Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY/ WARRANTY AGAINST REDHIBITORY DEFECTS

(LA. CIV. CODE ART. 2520, 2524)

1781. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1782. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Louisiana residents who are members of the Ignition Switch Defect Subclass (the "Louisiana Ignition Switch Defect Subclass").

1783. At the time Plaintiffs and the Louisiana Class acquired their Defective Ignition Switch Vehicles, those vehicles had a redhibitory defect within the meaning of LA. CIV. CODE ART. 2520, in that (a) the defective ignition switches rendered the use of the Defective Ignition Switch Vehicles so inconvenient that Plaintiffs either would not have purchased the Defective Ignition Switch Vehicles had they known of the defect, or, because the defective ignition switches so diminished the usefulness and/or value of the Defective Ignition Switch Vehicles such that it must be presumed that the Plaintiffs would have purchased the Defective Ignition Switch Vehicles, but for a lesser price.

1784. No notice of the defect is required under LA. CIV. CODE ART. 2520, since New GM had knowledge of a redhibitory defect in the Defective Ignition Switch Vehicles at the time they were sold to Plaintiffs and the Louisiana Ignition Switch Defect Subclass.

1785. Under LA. CIV. CODE ART. 2524, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition, or fit for ordinary use, was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1786. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1787. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Louisiana Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1788. As a direct and proximate result of New GM's sale of vehicles with redhibitory defects, and in violation of the implied warranty that the Defective Ignition Switch Vehicles were fit for ordinary use, Plaintiffs and the Louisiana Class are entitled to either rescission or damages in an amount to be proven at trial.

MAINE

COUNT I

VIOLATION OF MAINE UNFAIR TRADE PRACTICES ACT

(ME. REV. STAT. ANN. TIT. 5 § 205-A, *et seq*.)

1789. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1790. This claim is brought only on behalf of Nationwide Class members who are Maine residents (the "Maine Class").

1791. New GM, Plaintiffs, and the Maine Class are "persons" within the meaning of ME. REV. STAT. ANN. TIT. § 206(2).

1792. New GM is engaged in "trade" or "commerce" within the meaning of ME. REV. STAT. ANN. TIT. § 206(3).

1793. The Maine Unfair Trade Practices Act ("Maine UTPA") makes unlawful "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce…." ME. REV. STAT. ANN. TIT. 5 § 207. In the course of New GM's business, New GM engaged in unfair or deceptive acts or practices by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles. New GM participated in misleading, false, or deceptive acts that violated the Maine UTPA.

1794. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1795. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1796. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1797. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1798. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Maine UTPA.

1799. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1800. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1801. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Maine Class.

1802. New GM knew or should have known that its conduct violated the Maine UTPA.

1803. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1804. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1805. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1806. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Maine Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1807. Plaintiffs and the Maine Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1808. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1809. As a direct and proximate result of New GM's violations of the Maine UTPA, Plaintiffs and the Maine Class have suffered injury-in-fact and/or actual damage.

1810. Pursuant to ME. REV. STAT. ANN. TIT. 5 § 213, Plaintiffs and the Maine Class seek an order enjoining New GM's unfair and/or deceptive acts or practices, damages, punitive damages, and attorneys' fees, costs, and any other just and proper relief available under the Maine UTPA.

1811. On October 8, 2014, certain Plaintiffs sent a letter complying with ME. REV. STAT. ANN. TIT. 5, § 213(1-A). Plaintiffs presently do not claim relief under the Maine UTPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period,

after which Plaintiffs seek all damages and relief to which Plaintiffs and the Maine Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

1812. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1813. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Maine residents (the "Maine Class").

1814. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1815. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1816. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1817. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1818. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Maine Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Maine Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1819. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Maine Class.

1820. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Maine Class and conceal material information regarding defects that exist in GM-branded vehicles.

1821. Plaintiffs and the Maine Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Maine Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Maine Class.

1822. Because of the concealment and/or suppression of the facts, Plaintiffs and the Maine Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1823. The value of all Maine Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1824. Accordingly, New GM is liable to the Maine Class for their damages in an amount to be proven at trial.

1825. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Maine Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(ME. REV. STAT. ANN. TIT. 11 § 2-314)

1826. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1827. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Maine residents who are members of the Ignition Switch Defect Subclass (the "Maine Ignition Switch Defect Subclass").

1828. New GM was a merchant with respect to motor vehicles within the meaning of ME. REV. STAT. ANN. TIT. 11 § 2-104(1).

1829. Under ME. REV. STAT. ANN. TIT. 11 § 2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1830. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1831. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Maine Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1832. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Maine Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MARYLAND

COUNT I

VIOLATIONS OF THE MARYLAND CONSUMER PROTECTION ACT

(MD. CODE COM. LAW § 13-101, *et seq.*)

1833. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1834. This claim is brought only on behalf of Nationwide Class members who are Maryland residents.

1835. New GM, Plaintiffs, and the Maryland Class are "persons" within the meaning of MD. CODE COM. LAW § 13-101(h).

1836. The Maryland Consumer Protection Act ("Maryland CPA") provides that a person may not engage in any unfair or deceptive trade practice in the sale of any consumer good. MD. COM. LAW CODE § 13-303. New GM participated in misleading, false, or deceptive acts that violated the Maryland CPA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Maryland CPA.

1837. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1838. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1839. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1840. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1841. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1842. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Maryland CPA.

1843. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1844. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1845. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Maryland Class.

1846. New GM knew or should have known that its conduct violated the Maryland CPA.

1847. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1848. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1849. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1850. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Maryland Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1851. Plaintiffs and the Maryland Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1852. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1853. As a direct and proximate result of New GM's violations of the Maryland CPA, Plaintiffs and the Maryland Class have suffered injury-in-fact and/or actual damage.

1854. Pursuant to MD. CODE COM. LAW § 13-408, Plaintiffs and the Maryland Class seek actual damages, attorneys' fees, and any other just and proper relief available under the Maryland CPA.

COUNT II

FRAUD BY CONCEALMENT

1855. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1856. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Maryland residents.

1857. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1858. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1859. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1860. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1861. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Maryland Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Maryland Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1862. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Maryland Class.

1863. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Maryland Class and conceal material information regarding defects that exist in GM-branded vehicles.

1864. Plaintiffs and the Maryland Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Maryland Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Maryland Class.

1865. Because of the concealment and/or suppression of the facts, Plaintiffs and the Maryland Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1866. The value of all Maryland Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1867. Accordingly, New GM is liable to the Maryland Class for their damages in an amount to be proven at trial.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(MD. CODE COM. LAW § 2-314)

1868. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1869. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Maryland residents who are members of the Ignition Switch Defect Subclass (the "Maryland Ignition Switch Defect Subclass").

1870. New GM was a merchant with respect to motor vehicles within the meaning of MD. COM. LAW § 2-104(1).

1871. Under MD. COM. LAW § 2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1872. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1873. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Maryland Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1874. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Maryland Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MASSACHUSETTS

COUNT I

DECEPTIVE ACTS OR PRACTICES PROHIBITED BY MASSACHUSETTS LAW

(MASS. GEN. LAWS CH. 93A, § 1, *et seq.*)

1875. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1876. This claim is brought only on behalf of Nationwide Class members who are Massachusetts residents (the "Massachusetts Class").

1877. New GM, Plaintiffs, and the Massachusetts Class are "persons" within the meaning of MASS. GEN. LAWS ch. 93A, § 1(a).

1878. New GM engaged in "trade" or "commerce" within the meaning of MASS. GEN. LAWS ch. 93A, § 1(b).

1879. Massachusetts law (the "Massachusetts Act") prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce." MASS. GEN. LAWS ch. 93A, § 2. New GM both participated in misleading, false, or deceptive acts that violated the Massachusetts Act. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Massachusetts Act.

1880. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or

concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1881. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1882. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1883. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1884. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Massachusetts Act.

1885. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed

above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1886. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1887. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Massachusetts Class.

1888. New GM knew or should have known that its conduct violated the Massachusetts Act.

1889. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1890. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1891. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1892. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Massachusetts Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1893. Plaintiffs and the Massachusetts Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1894. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1895. As a direct and proximate result of New GM's violations of the Massachusetts Act, Plaintiffs and the Massachusetts Class have suffered injury-in-fact and/or actual damage.

1896. Pursuant to MASS. GEN. LAWS ch. 93A, § 9, Plaintiffs and the Massachusetts Class seek monetary relief against New GM measured as the greater of (a) actual damages in an

amount to be determined at trial and (b) statutory damages in the amount of $25 for each Plaintiff and each Massachusetts Class member. Because New GM's conduct was committed willfully and knowingly, Plaintiffs are entitled to recover, for each Plaintiff and each Massachusetts Class member, up to three times actual damages, but no less than two times actual damages.

1897. Plaintiffs also seek an order enjoining New GM's unfair and/or deceptive acts or practices, punitive damages, and attorneys' fees, costs, and any other just and proper relief available under the Massachusetts Act.

1898. On October 8, 2014, certain Plaintiffs sent a letter complying with MASS. GEN. LAWS ch. 93A, § 9(3). Plaintiffs presently do not claim relief under the Massachusetts Act until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Massachusetts Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

1899. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1900. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Massachusetts residents (the "Massachusetts Class").

1901. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1902. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1903. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1904. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1905. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Massachusetts Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Massachusetts Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1906. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Massachusetts Class.

1907. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Massachusetts Class and conceal material information regarding defects that exist in GM-branded vehicles.

1908. Plaintiffs and the Massachusetts Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Massachusetts Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Massachusetts Class.

1909. Because of the concealment and/or suppression of the facts, Plaintiffs and the Massachusetts Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1910. The value of all Massachusetts Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1911. Accordingly, New GM is liable to the Massachusetts Class for their damages in an amount to be proven at trial.

1912. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Massachusetts Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(ALM GL. CH. 106, § 2-314)

1913. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1914. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Massachusetts residents who are members of the Ignition Switch Defect Subclass (the "Massachusetts Ignition Switch Defect Subclass").

1915. New GM was a merchant with respect to motor vehicles within the meaning of ALM GL CH. 106, § 2-104(1).

1916. Under ALM GL CH. 106, § 2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1917. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1918. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Massachusetts Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1919. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Massachusetts Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MICHIGAN

COUNT I

VIOLATION OF THE MICHIGAN CONSUMER PROTECTION ACT

(MICH. COMP. LAWS § 445.903, *et seq.*)

1920. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1921. This claim is brought only on behalf of Nationwide Class members who are Michigan residents (the "Michigan Class").

1922. Plaintiffs and the Michigan Class members were "person[s]" within the meaning of the MICH. COMP. LAWS § 445.902(1)(d).

1923. At all relevant times hereto, New GM was a "person" engaged in "trade or commerce" within the meaning of the MICH. COMP. LAWS § 445.902(1)(d) and (g).

1924. The Michigan Consumer Protection Act ("Michigan CPA") prohibits "[u]nfair, unconscionable, or deceptive methods, acts, or practices in the conduct of trade or commerce . . ." MICH. COMP. LAWS § 445.903(1). New GM engaged in unfair, unconscionable, or deceptive methods, acts or practices prohibited by the Michigan CPA, including: "(c) Representing that

goods or services have . . . characteristics . . . that they do not have . . . .;" "(e) Representing that goods or services are of a particular standard . . . if they are of another;" "(i) Making false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions;" "(s) Failing to reveal a material fact, the omission of which tends to mislead or deceive the consumer, and which fact could not reasonably be known by the consumer;" "(bb) Making a representation of fact or statement of fact material to the transaction such that a person reasonably believes the represented or suggested state of affairs to be other than it actually is;" and "(cc) Failing to reveal facts that are material to the transaction in light of representations of fact made in a positive manner." MICH. COMP. LAWS § 445.903(1). By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM participated in unfair, deceptive, and unconscionable acts that violated the Michigan CPA.

1925. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1926. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1927. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1928. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1929. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair, unconscionable, and deceptive business practices in violation of the Michigan CPA.

1930. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1931. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1932. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Michigan Class.

1933. New GM knew or should have known that its conduct violated the Michigan CPA.

1934. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1935. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1936. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1937. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Michigan Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable

vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1938. Plaintiffs and the Michigan Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1939. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1940. As a direct and proximate result of New GM's violations of the Michigan CPA, Plaintiffs and the Michigan Class have suffered injury-in-fact and/or actual damage.

1941. Plaintiffs seek injunctive relief to enjoin New GM from continuing its unfair and deceptive acts; monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $250 for Plaintiffs and each Michigan Class member; reasonable attorneys' fees; and any other just and proper relief available under MICH. COMP. LAWS § 445.911.

1942. Plaintiffs also seek punitive damages against New GM because it carried out despicable conduct with willful and conscious disregard of the rights and safety of others. New GM intentionally and willfully misrepresented the safety and reliability of the Affected Vehicles, deceived Plaintiffs and Michigan Class members on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations

nightmare of correcting a deadly flaw in vehicles it repeatedly promised Plaintiffs and Michigan Class members were safe. New GM's unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

COUNT II

FRAUD BY CONCEALMENT

1943. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1944. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Michigan residents (the "Michigan Class").

1945. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

1946. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

1947. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

1948. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

1949. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Michigan Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Michigan Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

1950. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Michigan Class.

1951. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Michigan Class and conceal material information regarding defects that exist in GM-branded vehicles.

1952. Plaintiffs and the Michigan Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Michigan Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Michigan Class.

1953. Because of the concealment and/or suppression of the facts, Plaintiffs and the Michigan Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less

for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

1954. The value of all Michigan Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

1955. Accordingly, New GM is liable to the Michigan Class for their damages in an amount to be proven at trial.

1956. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Michigan Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(MICH. COMP. LAWS § 440.2314)

1957. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1958. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Michigan residents who are members of the Ignition Switch Defect Subclass (the "Michigan Ignition Switch Defect Subclass").

1959. New GM was a merchant with respect to motor vehicles within the meaning of MICH. COMP. LAWS § 440.2314(1).

1960. Under MICH. COMP. LAWS § 440.2314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

1961. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

1962. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Michigan Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

1963. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Michigan Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MINNESOTA

COUNT I

VIOLATION OF MINNESOTA PREVENTION OF CONSUMER FRAUD ACT

(MINN. STAT. § 325F.68, *et seq*.)

1964. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1965. This claim is brought only on behalf of Nationwide Class members who are Minnesota residents (the "Minnesota Class").

1966. The Affected Vehicles constitute "merchandise" within the meaning of MINN. STAT. § 325F.68(2).

1967. The Minnesota Prevention of Consumer Fraud Act ("Minnesota CFA") prohibits "[t]he act, use, or employment by any person of any fraud, false pretense, false promise, misrepresentation, misleading statement or deceptive practice, with the intent that others rely thereon in connection with the sale of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby . . ." MINN. STAT. § 325F.69(1). New GM participated in misleading, false, or deceptive acts that violated the Minnesota CFA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Minnesota CFA.

1968. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1969. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful

trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1970. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1971. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1972. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1973. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Minnesota CFA.

1974. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed

above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1975. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1976. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Minnesota Class.

1977. New GM knew or should have known that its conduct violated the Minnesota CFA.

1978. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

1979. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

1980. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

1981. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Minnesota Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

1982. Plaintiffs and the Minnesota Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

1983. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

1984. As a direct and proximate result of New GM's violations of the Minnesota CFA, Plaintiffs and the Minnesota Class have suffered injury-in-fact and/or actual damage.

1985. Pursuant to MINN. STAT. § 8.31(3a), Plaintiffs and the Minnesota Class seek actual damages, attorneys' fees, and any other just and proper relief available under the Minnesota CFA.

1986. Plaintiffs also seek punitive damages under MINN. STAT. § 549.20(1)(a) give the clear and convincing evidence that New GM's acts show deliberate disregard for the rights or safety of others.

COUNT II

VIOLATION OF MINNESOTA UNIFORM DECEPTIVE TRADE PRACTICES ACT

(MINN. STAT. § 325D.43-48, *et seq*.)

1987. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

1988. This claim is brought only on behalf of Nationwide Class members who are Minnesota residents (the "Minnesota Class").

1989. The Minnesota Deceptive Trade Practices Act ("Minnesota DTPA") prohibits deceptive trade practices, which occur when a person "(5) represents that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that the person does not have;" "(7) represents that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;" and "(9) advertises goods or services with intent not to sell them as advertised." MINN. STAT. § 325D.44. In the course of the New GM's business, it systematically devalued safety and concealed a plethora of defects in GM-branded vehicles and engaged in deceptive practices by representing that Affected Vehicles have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that

they do not have; representing that Affected Vehicles are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another; and advertising Affected Vehicles with intent not to sell them as advertised. New GM participated in misleading, false, or deceptive acts that violated the Minnesota DTPA. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Minnesota DTPA.

1990. New GM's actions as set forth above occurred in the conduct of trade or commerce.

1991. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

1992. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

1993. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

1994. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

1995. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Minnesota DTPA.

1996. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

1997. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

1998. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Minnesota Class.

1999. New GM knew or should have known that its conduct violated the Minnesota DTPA.

2000. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2001. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2002. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2003. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Minnesota Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2004. Plaintiffs and the Minnesota Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been

aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2005. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2006. As a direct and proximate result of New GM's violations of the Minnesota DTPA, Plaintiffs and the Minnesota Class have suffered injury-in-fact and/or actual damage.

2007. Pursuant to MINN. STAT. § 8.31(3a) and 325D.45, Plaintiffs and the Minnesota Class seek actual damages, attorneys' fees, and any other just and proper relief available under the Minnesota DTPA.

2008. Plaintiffs also seek punitive damages under MINN. STAT. § 549.20(1)(a) give the clear and convincing evidence that New GM's acts show deliberate disregard for the rights or safety of others.

COUNT III

FRAUD BY CONCEALMENT

2009. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2010. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Minnesota residents (the "Minnesota Class").

2011. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2012. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2013. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2014. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2015. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Minnesota Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Minnesota Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2016. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Minnesota Class.

2017. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Minnesota Class and conceal material information regarding defects that exist in GM-branded vehicles.

2018. Plaintiffs and the Minnesota Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Minnesota Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Minnesota Class.

2019. Because of the concealment and/or suppression of the facts, Plaintiffs and the Minnesota Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2020. The value of all Minnesota Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2021. Accordingly, New GM is liable to the Minnesota Class for their damages in an amount to be proven at trial.

2022. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Minnesota Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT IV

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(MINN. STAT. § 336.2-314)

2023. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2024. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Minnesota residents who are members of the Ignition Switch Defect Subclass (the "Minnesota Ignition Switch Defect Subclass").

2025. New GM was a merchant with respect to motor vehicles within the meaning of MINN. STAT. § 336.2-104(1).

2026. Under MINN. STAT. § 336.2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2027. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2028. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Minnesota Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2029. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Minnesota Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MISSISSIPPI

COUNT I

VIOLATION OF MISSISSIPPI CONSUMER PROTECTION ACT

(MISS. CODE. ANN. § 75-24-1, *et seq.*)

2030. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2031. This claim is brought only on behalf of Nationwide Class members who are Mississippi residents (the "Mississippi Class").

2032. The Mississippi Consumer Protection Act ("Mississippi CPA") prohibits "unfair or deceptive trade practices in or affecting commerce." MISS. CODE. ANN. § 75-24-5(1). Unfair or deceptive practices include, but are not limited to, "(e) Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have or that a person has a sponsorship, approval, status, affiliation, or connection that he does not have;" "(g) Representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another;" and "(i) Advertising goods or services with intent not to sell them as advertised." New GM participated

in deceptive trade practices that violated the Mississippi CPA as described herein, including representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard and quality when they are not; and advertising Affected Vehicles with the intent not to sell them as advertised.

2033. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2034. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2035. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2036. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2037. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Mississippi CPA.

2038. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2039. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2040. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Mississippi Class.

2041. New GM knew or should have known that its conduct violated the Mississippi CPA.

2042. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2043. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2044. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2045. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Mississippi Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2046. Plaintiffs and the Mississippi Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2047. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2048. As a direct and proximate result of New GM's violations of the Mississippi CPA, Plaintiffs and the Mississippi Class have suffered injury-in-fact and/or actual damage.

2049. Plaintiffs' actual damages in an amount to be determined at trial any other just and proper relief available under the Mississippi CPA.

COUNT II

FRAUD BY CONCEALMENT

2050. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2051. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Mississippi residents (the "Mississippi Class").

2052. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2053. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2054. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2055. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2056. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Mississippi Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Mississippi Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2057. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Mississippi Class.

2058. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Mississippi Class and conceal material information regarding defects that exist in GM-branded vehicles.

2059. Plaintiffs and the Mississippi Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Mississippi Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Mississippi Class.

2060. Because of the concealment and/or suppression of the facts, Plaintiffs and the Mississippi Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2061. The value of all Mississippi Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2062. Accordingly, New GM is liable to the Mississippi Class for their damages in an amount to be proven at trial.

2063. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Mississippi Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(MISS. CODE ANN. § 75-2-314)

2064. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2065. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Mississippi residents who are members of the Ignition Switch Defect Subclass (the "Mississippi Ignition Switch Defect Subclass").

2066. New GM was a merchant with respect to motor vehicles within the meaning of MISS. CODE ANN. § 75-2-104(1).

2067. Under MISS. CODE ANN. § 75-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2068. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2069. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Mississippi Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2070. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Mississippi Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MISSOURI

COUNT I

VIOLATION OF MISSOURI MERCHANDISING PRACTICES ACT

(MO. REV. STAT. § 407.010, *et seq.*)

2071. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2072. This claim is brought only on behalf of Nationwide Class members who are Missouri residents (the "Missouri Class").

2073. New GM, Plaintiffs and the Missouri Class are "persons" within the meaning of MO. REV. STAT. § 407.010(5).

2074. New GM engaged in "trade" or "commerce" in the State of Missouri within the meaning of MO. REV. STAT. § 407.010(7).

2075. The Missouri Merchandising Practices Act ("Missouri MPA") makes unlawful the "act, use or employment by any person of any deception, fraud, false pretense, misrepresentation, unfair practice, or the concealment, suppression, or omission of any material fact in connection with the sale or advertisement of any merchandise." MO. REV. STAT. § 407.020.

2076. In the course of its business, New GM systematically devalued safety and, omitted, suppressed, and concealed a plethora of defects in GM-branded vehicles as described herein. By failing to disclose these defects or facts about the defects described herein known to it or that were available to New GM upon reasonable inquiry, New GM deprived consumers of

all material facts about the safety and functionality of their vehicle. By failing to release material facts about the defect, New GM curtailed or reduced the ability of consumers to take notice of material facts about their vehicle, and/or it affirmatively operated to hide or keep those facts from consumers. 15 MO. CODE OF SERV. REG. § 60-9.110. Moreover, New GM has otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, unfair practices, and/or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2077. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but suppressed and/or concealed all of that information until recently.

2078. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM omitted, suppressed, and/or concealed this information as well.

2079. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have

recalled the vehicles years ago. Failure to do so has been part of New GM's method, act, use, and/or practice to hide, keep, curtail, and/or reduce consumers' access to material facts.

2080. By failing to disclose and by actively concealing, suppressing, or omitting the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and/or deceptive business practices and concealed, suppressed, and/or omitted material facts from consumers in connection with the purchase of their vehicles—all in violation of the Missouri MPA.

2081. In the course of New GM's business, it willfully failed to disclose and actively concealed, suppressed, and omitted the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2082. New GM's unfair or deceptive acts or practices, including these concealments, omissions, and suppressions of material facts, had a tendency or capacity to mislead, tended to create a false impression in consumers, and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2083. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Missouri Class, including without limitation by failing to disclose the defects in light of circumstances under which the omitted facts were necessary in order to correct the assumptions, inferences or representations being made by New GM about the safety or reliability of its vehicles. Consequently, the failure to

disclose such facts amounts to misleading statements pursuant to 15 MO. CODE OF SERV. REG. § 60-9.090.

2084. Because New GM knew or believed that its statements regarding safety and reliability of its vehicles were not in accord with the facts and/or had no reasonable basis for such statements in light of its knowledge of these defects, New GM engaged in fraudulent misrepresentations pursuant to 15 MO. CODE OF SERV. REG. 60-9.100.

2085. New GM's conduct as described herein is unethical, oppressive, or unscrupulous and/or it presented a risk of substantial injury to consumers whose vehicles were prone to fail at times and under circumstances that could have resulted in death. Such acts are unfair practices in violation of 15 MO. CODE OF SERV. REG. 60-8.020.

2086. New GM knew or should have known that its conduct violated the Missouri MPA.

2087. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false, misleading, and/or half-truths in violation of the Missouri MPA.

2088. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully

withholding material facts from Plaintiffs that contradicted these representations.

2089. Because New GM fraudulently concealed the many defects in GM-branded vehicles, and committed these other unlawful acts in violation of the Missouri MPA, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2090. New GM's systemic devaluation of safety and its misleading statements, deception, and/or concealment, suppression, or omission of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Missouri Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2091. Plaintiffs and the Missouri Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2092. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2093. As a direct and proximate result of New GM's violations of the Missouri MPA, Plaintiffs and the Missouri Class have suffered injury-in-fact and/or actual damage.

2094. New GM is liable to Plaintiffs and the Missouri Class for damages in amounts to be proven at trial, including attorneys' fees, costs, and punitive damages, as well as injunctive relief enjoining New GM's unfair and deceptive practices, and any other just and proper relief under MO. REV. STAT. § 407.025.

COUNT II

FRAUD BY CONCEALMENT

2095. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2096. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Missouri residents (the "Missouri Class").

2097. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

2098. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2099. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2100. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2101. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Missouri Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Missouri Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2102. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Missouri Class.

2103. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Missouri Class and conceal material information regarding defects that exist in GM-branded vehicles.

2104. Plaintiffs and the Missouri Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Missouri Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Missouri Class.

2105. Because of the concealment and/or suppression of the facts, Plaintiffs and the Missouri Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less

for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2106. The value of all Missouri Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2107. Accordingly, New GM is liable to the Missouri Class for their damages in an amount to be proven at trial.

2108. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Missouri Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(MO. REV. STAT. § 400.2-314)

2109. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2110. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Missouri residents who are members of the Ignition Switch Defect Subclass (the "Missouri Ignition Switch Defect Subclass").

2111. New GM was a merchant with respect to motor vehicles within the meaning of MO. REV. STAT. § 400.2-314(1).

2112. Under MO. REV. STAT. § 400.2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2113. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2114. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Missouri Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2115. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Missouri Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

MONTANA

COUNT I

VIOLATION OF MONTANA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT OF 1973

(MONT. CODE ANN. § 30-14-101, *et seq.*)

2116. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2117. This claim is brought only on behalf of Nationwide Class members who are Montana residents (the "Montana Class").

2118. New GM, Plaintiffs and the Montana Class are "persons" within the meaning of MONT. CODE ANN. § 30-14-102(6).

2119. Montana Class members are "consumer[s]" under MONT. CODE ANN. § 30-14-102(1).

2120. The sale or lease of the Affected Vehicles to Montana Class members occurred within "trade and commerce" within the meaning of MONT. CODE ANN. § 30-14-102(8), and New GM committed deceptive and unfair acts in the conduct of "trade and commerce" as defined in that statutory section.

2121. The Montana Unfair Trade Practices and Consumer Protection Act ("Montana CPA") makes unlawful any "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." MONT. CODE ANN. § 30-14-103. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in unfair and deceptive acts or practices in violation of the Montana CPA.

2122. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise

engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2123. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2124. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2125. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2126. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Montana CPA.

2127. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2128. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2129. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Montana Class.

2130. New GM knew or should have known that its conduct violated the Montana CPA.

2131. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2132. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2133. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2134. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Montana Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2135. Plaintiffs and the Montana Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2136. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2137. As a direct and proximate result of New GM's violations of the Montana CPA, Plaintiffs and the Montana Class have suffered injury-in-fact and/or actual damage.

2138. Because the New GM's unlawful methods, acts, and practices have caused Montana Class members to suffer an ascertainable loss of money and property, the Montana

Class seeks from New GM actual damages or $500, whichever is greater, discretionary treble damages, reasonable attorneys' fees, an order enjoining New GM's unfair, unlawful, and/or deceptive practices, and any other relief the Court considers necessary or proper, under MONT. CODE ANN. § 30-14-133.

COUNT II

FRAUD BY CONCEALMENT

2139. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2140. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Montana residents (the "Montana Class").

2141. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

2142. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2143. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2144. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2145. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Montana Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Montana Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2146. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Montana Class.

2147. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Montana Class and conceal material information regarding defects that exist in GM-branded vehicles.

2148. Plaintiffs and the Montana Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Montana Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Montana Class.

2149. Because of the concealment and/or suppression of the facts, Plaintiffs and the Montana Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less

for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2150. The value of all Montana Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2151. Accordingly, New GM is liable to the Montana Class for their damages in an amount to be proven at trial.

2152. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Montana Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY (MONT. CODE § 30-2-314)

2153. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2154. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Montana residents who are members of the Ignition Switch Defect Subclass (the "Montana Ignition Switch Defect Subclass").

2155. New GM was a merchant with respect to motor vehicles under MONT. CODE § 30-2-104(1) .

2156. Under MONT. CODE § 30-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2157. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2158. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Montana Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2159. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Montana Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEBRASKA

COUNT I

VIOLATION OF THE NEBRASKA CONSUMER PROTECTION ACT

(NEB. REV. STAT. § 59-1601, *et seq.*)

2160. Plaintiff incorporates by reference all preceding and succeeding paragraphs as if set forth fully herein.

2161. This claim is brought only on behalf of Nationwide Class members who are Nebraska residents (the "Nebraska Class").

2162. New GM, Plaintiffs and Nebraska Class members are "person[s]" under the Nebraska Consumer Protection Act ("Nebraska CPA"), NEB. REV. STAT. § 59-1601(1).

2163. New GM's actions as set forth herein occurred in the conduct of trade or commerce as defined under NEB. REV. STAT. § 59-1601(2).

2164. The Nebraska CPA prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce." NEB. REV. STAT. § 59-1602. The conduct New GM as set forth herein constitutes unfair or deceptive acts or practices.

2165. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2166. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2167. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from

finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2168. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2169. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Nebraska CPA.

2170. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2171. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2172. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Nebraska Class.

2173. New GM knew or should have known that its conduct violated the Nebraska CPA.

2174. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2175. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2176. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2177. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Nebraska Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2178. Plaintiffs and the Nebraska Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been

aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2179. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2180. As a direct and proximate result of New GM's violations of the Nebraska CPA, Plaintiffs and the Nebraska Class have suffered injury-in-fact and/or actual damage.

2181. Because New GM's conduct caused injury to Class members' property through violations of the Nebraska CPA, the Nebraska Class seeks recovery of actual damages, as well as enhanced damages up to $1,000, an order enjoining New GM's unfair or deceptive acts and practices, costs of Court, reasonable attorneys' fees, and any other just and proper relief available under NEB. REV. STAT. § 59-1609.

COUNT II

FRAUD BY CONCEALMENT

2182. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2183. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Nebraska residents (the "Nebraska Class").

2184. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2185. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2186. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2187. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2188. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Nebraska Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Nebraska Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2189. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Nebraska Class.

2190. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Nebraska Class and conceal material information regarding defects that exist in GM-branded vehicles.

2191. Plaintiffs and the Nebraska Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Nebraska Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Nebraska Class.

2192. Because of the concealment and/or suppression of the facts, Plaintiffs and the Nebraska Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2193. The value of all Nebraska Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2194. Accordingly, New GM is liable to the Nebraska Class for their damages in an amount to be proven at trial.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(NEB. REV. STAT. NEB. § 2-314)

2195. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2196. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Nebraska residents who are members of the Ignition Switch Defect Subclass (the "Nebraska Ignition Switch Defect Subclass").

2197. New GM was a merchant with respect to motor vehicles within the meaning of NEB. REV. STAT. § 2-104(1).

2198. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under NEB. REV. STAT. § 2-314.

2199. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2200. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Nebraska Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2201. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Nebraska Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEVADA

COUNT I

VIOLATION OF THE NEVADA DECEPTIVE TRADE PRACTICES ACT

(NEV. REV. STAT. § 598.0903, *et seq*.)

2202. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2203. This claim is brought only on behalf of Nationwide Class members who are Nevada residents (the "Nevada Class").

2204. The Nevada Deceptive Trade Practices Act ("Nevada DTPA"), NEV. REV. STAT. § 598.0903, *et seq.* prohibits deceptive trade practices. NEV. REV. STAT. § 598.0915 provides that a person engages in a "deceptive trade practice" if, in the course of business or occupation, the person: "5. Knowingly makes a false representation as to the characteristics, ingredients, uses, benefits, alterations or quantities of goods or services for sale or lease or a false representation as to the sponsorship, approval, status, affiliation or connection of a person therewith"; "7. Represents that goods or services for sale or lease are of a particular standard, quality or grade, or that such goods are of a particular style or model, if he or she knows or should know that they are of another standard, quality, grade, style or model"; "9. Advertises goods or services with intent not to sell or lease them as advertised"; or "15. Knowingly makes any other false representation in a transaction."

2205. New GM engaged in deceptive trade practices that violated the Nevada DTPA, including: knowingly representing that Affected Vehicles have uses and benefits which they do

not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; advertising Affected Vehicles with the intent not to sell or lease them as advertised; representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not; and knowingly making other false representations in a transaction.

2206. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2207. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2208. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2209. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2210. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2211. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Nevada DTPA.

2212. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2213. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2214. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Nevada Class.

2215. New GM knew or should have known that its conduct violated the Nevada DTPA.

2216. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2217. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2218. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2219. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Nevada Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2220. Plaintiffs and the Nevada Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or

leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2221. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2222. As a direct and proximate result of New GM's violations of the Nevada DTPA, Plaintiffs and the Nevada Class have suffered injury-in-fact and/or actual damage.

2223. Accordingly, Plaintiffs and the Nevada Class seek their actual damages, punitive damages, an order enjoining New GM's deceptive acts or practices, costs of Court, attorney's fees, and all other appropriate and available remedies under the Nevada Deceptive Trade Practices Act. NEV. REV. STAT. § 41.600.

COUNT II

FRAUD BY CONCEALMENT

2224. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2225. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Nevada residents (the "Nevada Class").

2226. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2227. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2228. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2229. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2230. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Nevada Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Nevada Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2231. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Nevada Class.

2232. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Nevada Class and conceal material information regarding defects that exist in GM-branded vehicles.

2233. Plaintiffs and the Nevada Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts.

Plaintiffs' and the Nevada Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Nevada Class.

2234. Because of the concealment and/or suppression of the facts, Plaintiffs and the Nevada Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2235. The value of all Nevada Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2236. Accordingly, New GM is liable to the Nevada Class for their damages in an amount to be proven at trial.

2237. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Nevada Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(NEV. REV. STAT. § 104.2314)

2238. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2239. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Nevada residents who are members of the Ignition Switch Defect Subclass (the "Nevada Ignition Switch Defect Subclass").

2240. New GM was a merchant with respect to motor vehicles within the meaning of NEV. REV. STAT. § 104.2104(1).

2241. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2242. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2243. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Nevada Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2244. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Nevada Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEW HAMPSHIRE

COUNT I

VIOLATION OF N.H. CONSUMER PROTECTION ACT

(N.H. REV. STAT. ANN. § 358-A:1, *et seq*.)

2245. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2246. This claim is brought only on behalf of Nationwide Class members who are New Hampshire residents (the "New Hampshire Class").

2247. Plaintiffs, the New Hampshire Class, and New GM are "persons" under the New Hampshire Consumer Protection Act ("New Hampshire CPA"), N.H. REV. STAT. § 358-A:1.

2248. New GM's actions as set forth herein occurred in the conduct of trade or commerce as defined under N.H. REV. STAT. § 358-A:1.

2249. The New Hampshire CPA prohibits a person, in the conduct of any trade or commerce, from using "any unfair or deceptive act or practice," including "but … not limited to, the following: . . . (V) Representing that goods or services have … characteristics, … uses, benefits, or quantities that they do not have;" "(VII) Representing that goods or services are of a particular standard, quality, or grade, … if they are of another;" and "(IX) Advertising goods or services with intent not to sell them as advertised." N.H. REV. STAT. § 358-A:2.

2250. New GM participated in unfair or deceptive acts or practices that violated the New Hampshire CPA as described above and below. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive

business practices prohibited by the CPA, including representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; advertising Affected Vehicles with the intent not to sell or lease them as advertised; representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not; and engaging in other unconscionable, false, misleading, or deceptive acts or practices in the conduct of trade or commerce.

2251. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2252. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2253. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the

existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2254. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2255. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the New Hampshire CPA.

2256. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2257. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2258. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the New Hampshire Class.

2259. New GM knew or should have known that its conduct violated the New Hampshire CPA.

2260. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2261. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2262. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2263. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the New Hampshire Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2264. Plaintiffs and the New Hampshire Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been

aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2265. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2266. As a direct and proximate result of New GM's violations of the New Hampshire CPA, Plaintiffs and the New Hampshire Class have suffered injury-in-fact and/or actual damage.

2267. Because New GM's willful conduct caused injury to New Hampshire Class members' property through violations of the New Hampshire CPA, the New Hampshire Class seeks recovery of actual damages or $1,000, whichever is greater, treble damages, costs and reasonable attorneys' fees, an order enjoining New GM's unfair and/or deceptive acts and practices, and any other just and proper relief under N.H. REV. STAT. § 358-A:10.

COUNT II

FRAUD BY CONCEALMENT

2268. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2269. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are New Hampshire residents (the "New Hampshire Class").

2270. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2271. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2272. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2273. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2274. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the New Hampshire Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the New Hampshire Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2275. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the New Hampshire Class.

2276. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the New Hampshire Class and conceal material information regarding defects that exist in GM-branded vehicles.

2277. Plaintiffs and the New Hampshire Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the New Hampshire Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the New Hampshire Class.

2278. Because of the concealment and/or suppression of the facts, Plaintiffs and the New Hampshire Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2279. The value of all New Hampshire Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2280. Accordingly, New GM is liable to the New Hampshire Class for their damages in an amount to be proven at trial.

2281. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the New Hampshire Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(N.H. REV. STAT. ANN. § 382-A:2-314)

2282. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2283. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of New Hampshire residents who are members of the Ignition Switch Defect Subclass (the "New Hampshire Ignition Switch Defect Subclass").

2284. New GM was a merchant with respect to motor vehicles within the meaning of N.H. REV. STAT. ANN. § 382-A:2-104(1).

2285. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under N.H. REV. STAT. ANN. § 382-A:2-314.

2286. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2287. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the New Hampshire Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2288. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the New Hampshire Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEW JERSEY

COUNT I

VIOLATION OF NEW JERSEY CONSUMER FRAUD ACT

(N.J. STAT. ANN. § 56:8-1, *et seq.*)

2289. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2290. This claim is brought only on behalf of Nationwide Class members who are New Jersey residents (the "New Jersey Class").

2291. Plaintiffs, the New Jersey Class, and New GM are or were "persons" within the meaning of N.J. STAT. ANN. § 56:8-1(d).

2292. New GM engaged in "sales" of "merchandise" within the meaning of N.J. STAT. ANN. § 56:8-1(c), (d).

2293. The New Jersey Consumer Fraud Act ("New Jersey CFA") makes unlawful "[t]he act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, misrepresentation, or the knowing concealment, suppression or omission of any material fact with the intent that others rely upon such concealment,

suppression or omission, in connection with the sale or advertisement of any merchandise or real estate, or with the subsequent performance of such person as aforesaid, whether or not any person has in fact been misled, deceived or damaged thereby…" N.J. STAT. ANN. § 56:8-2. New GM engaged in unconscionable or deceptive acts or practices that violated the New Jersey CFA as described above and below, and did so with the intent that Class members rely upon their acts, concealment, suppression or omissions.

2294. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2295. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2296. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2297. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2298. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the New Jersey CFA.

2299. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2300. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2301. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the New Jersey Class.

2302. New GM knew or should have known that its conduct violated the New Jersey CFA.

2303. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2304. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2305. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2306. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the New Jersey Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2307. Plaintiffs and the New Jersey Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2308. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2309. As a direct and proximate result of New GM's violations of the New Jersey CFA, Plaintiffs and the New Jersey Class have suffered injury-in-fact and/or actual damage.

2310. Plaintiffs and the New Jersey Class are entitled to recover legal and/or equitable relief including an order enjoining New GM's unlawful conduct, treble damages, costs and reasonable attorneys' fees pursuant to N.J. STAT. ANN. § 56:8-19, and any other just and appropriate relief.

COUNT II

FRAUD BY CONCEALMENT

2311. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2312. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are New Jersey residents (the "New Jersey Class").

2313. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2314. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2315. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2316. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2317. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the New Jersey Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the New Jersey Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2318. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the New Jersey Class.

2319. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the New Jersey Class and conceal material information regarding defects that exist in GM-branded vehicles.

2320. Plaintiffs and the New Jersey Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts.

Plaintiffs' and the New Jersey Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the New Jersey Class.

2321. Because of the concealment and/or suppression of the facts, Plaintiffs and the New Jersey Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2322. The value of all New Jersey Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2323. Accordingly, New GM is liable to the New Jersey Class for their damages in an amount to be proven at trial.

2324. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the New Jersey Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(N.J. STAT. ANN. § 12A:2-314)

2325. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2326. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of New Jersey residents who are members of the Ignition Switch Defect Subclass (the "New Jersey Ignition Switch Defect Subclass").

2327. New GM was a merchant with respect to motor vehicles within the meaning of N.J. STAT. ANN. § 12A:2-104(1).

2328. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under N.J. STAT. ANN. § 12A:2-104(1).

2329. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2330. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the New Jersey Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2331. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the New Jersey Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEW MEXICO

COUNT I

VIOLATIONS OF THE NEW MEXICO UNFAIR TRADE PRACTICES ACT

(N.M. STAT. ANN. §§ 57-12-1, *et seq.*)

2332. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2333. This claim is brought only on behalf of Nationwide Class members who are New Mexico residents (the "New Mexico Class").

2334. New GM, Plaintiffs and New Mexico Class members are or were "person[s]" under the New Mexico Unfair Trade Practices Act ("New Mexico UTPA"), N.M. STAT. ANN. § 57-12-2.

2335. New GM's actions as set forth herein occurred in the conduct of trade or commerce as defined under N.M. STAT. ANN. § 57-12-2.

2336. The New Mexico UTPA makes unlawful "a false or misleading oral or written statement, visual description or other representation of any kind knowingly made in connection with the sale, lease, rental or loan of goods or services … by a person in the regular course of the person's trade or commerce, that may, tends to or does deceive or mislead any person," including but not limited to "failing to state a material fact if doing so deceives or tends to deceive." N.M. STAT. ANN. § 57-12-2(D). New GM's acts and omissions described herein constitute unfair or deceptive acts or practices under N.M. STAT. ANN. § 57-12-2(D). In addition, New GM's actions constitute unconscionable actions under N.M. STAT. ANN. § 57-12-2(E), since they took

advantage of the lack of knowledge, ability, experience, and capacity of the New Mexico Class members to a grossly unfair degree.

2337. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2338. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2339. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2340. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2341. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the New Mexico UTPA.

2342. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2343. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2344. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the New Mexico Class.

2345. New GM knew or should have known that its conduct violated the New Mexico UTPA.

2346. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2347. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that

this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2348. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2349. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the New Mexico Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2350. Plaintiffs and the New Mexico Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2351. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2352. As a direct and proximate result of New GM's violations of the New Mexico UTPA, Plaintiffs and the New Mexico Class have suffered injury-in-fact and/or actual damage.

2353. New Mexico Class members seek punitive damages against New GM because New GM's conduct was malicious, willful, reckless, wanton, fraudulent and in bad faith. New GM fraudulently and willfully misrepresented the safety and reliability of GM-branded vehicles, deceived New Mexico Class members on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting the myriad flaws in the GM-branded vehicles that New GM repeatedly promised New Mexico Class members were safe. Because New GM's conduct was malicious, willful, reckless, wanton, fraudulent and in bad faith, it warrants punitive damages.

2354. Because New GM's unconscionable, willful conduct caused actual harm to New Mexico Class members, the New Mexico Class seeks recovery of actual damages or $100, whichever is greater, discretionary treble damages, punitive damages, and reasonable attorneys' fees and costs, as well as all other proper and just relief available under N.M. STAT. ANN. § 57-12-10.

COUNT II

FRAUD BY CONCEALMENT

2355. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2356. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are New Mexico residents (the "New Mexico Class").

2357. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2358. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2359. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2360. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2361. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the New Mexico Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the New Mexico Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2362. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the New Mexico Class.

2363. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the New Mexico Class and conceal material information regarding defects that exist in GM-branded vehicles.

2364. Plaintiffs and the New Mexico Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the New Mexico Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the New Mexico Class.

2365. Because of the concealment and/or suppression of the facts, Plaintiffs and the New Mexico Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2366. The value of all New Mexico Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to

purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2367. Accordingly, New GM is liable to the New Mexico Class for their damages in an amount to be proven at trial.

2368. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the New Mexico Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(N.M. STAT. ANN. § 55-2-314)

2369. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2370. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of New Mexico residents who are members of the Ignition Switch Defect Subclass (the "New Mexico Ignition Switch Defect Subclass").

2371. New GM was a merchant with respect to motor vehicles within the meaning of N.M. STAT. ANN. § 55-2-104(1).

2372. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under N.M. STAT. ANN. § 55-2-314.

2373. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2374. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the New Mexico Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2375. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the New Mexico Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NEW YORK

COUNT I

DECEPTIVE ACTS OR PRACTICES

(N.Y. GEN. BUS. LAW § 349 and 350)

2376. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2377. This claim is brought only on behalf of Class members who are New York residents (the "New York Class").

2378. Plaintiffs and New York Class members are "persons" within the meaning of New York General Business Law ("New York GBL"), N.Y. GEN. BUS. LAW § 349(h).

2379. New GM is a "person," "firm," "corporation," or "association" within the meaning of N.Y. GEN. BUS. LAW § 349.

2380. The New York GBL makes unlawful "[d]eceptive acts or practices in the conduct of any business, trade or commerce." N.Y. GEN. BUS. LAW § 349. New GM's conduct, as described above and below, constitutes "deceptive acts or practices" within the meaning of the New York GBL. Furthermore, New GM's deceptive acts and practices, which were intended to mislead consumers who were in the process of purchasing and/or leasing the Affected Vehicles, was conduct directed at consumers.

2381. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2382. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2383. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2384. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2385. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2386. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the New York GBL.

2387. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2388. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2389. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the New York Class.

2390. New GM knew or should have known that its conduct violated the New York GBL.

2391. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2392. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2393. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2394. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the New York Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2395. Plaintiffs and the New York Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2396. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2397. As a direct and proximate result of New GM's violations of the New York GBL, Plaintiffs and the New York Class have suffered injury-in-fact and/or actual damage.

2398. New York Class members seek punitive damages against New GM because New GM's conduct was egregious. New GM misrepresented the safety and reliability of millions of GM-branded vehicles, concealed myriad defects in millions of GM-branded vehicles and the systemic safety issues plaguing the company, deceived Class members on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting the serious flaw in its culture and in millions of GM-branded vehicles. New GM's egregious conduct warrants punitive damages.

2399. Because New GM's willful and knowing conduct caused injury to Class members, the New York Class seeks recovery of actual damages or $50, whichever is greater, discretionary treble damages up to $1,000, punitive damages, reasonable attorneys' fees and costs, an order enjoining New GM's deceptive conduct, and any other just and proper relief available under N.Y. GEN. BUS. LAW § 349.

COUNT II

FRAUD BY CONCEALMENT

2400. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2401. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Class members who are New York residents (the "New York Class").

2402. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2403. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2404. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2405. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2406. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the New York Class. These omitted and concealed facts were material because

they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the New York Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2407. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the New York Class.

2408. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the New York Class and conceal material information regarding defects that exist in GM-branded vehicles.

2409. Plaintiffs and the New York Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the New York Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the New York Class.

2410. Because of the concealment and/or suppression of the facts, Plaintiffs and the New York Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2411. The value of all New York Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2412. Accordingly, New GM is liable to the New York Class for their damages in an amount to be proven at trial.

2413. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the New York Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(N.Y. U.C.C. § 2-314)

2414. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2415. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of New York residents who are members of the Ignition Switch Defect Subclass (the "New York Ignition Switch Defect Subclass").

2416. New GM was a merchant with respect to motor vehicles within the meaning of N.Y. U.C.C. § 2-104(1).

2417. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under N.Y. U.C.C. § 2-314.

2418. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2419. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the New York Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2420. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the New York Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

COUNT IV

VIOLATION OF NEW YORK'S FALSE ADVERTISING ACT

(N.Y. GEN. BUS. LAW § 350)

2421. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2422. This claim is brought only on behalf of Class members who are New York residents (the "New York Class").

2423. New GM was and is engaged in the "conduct of business, trade or commerce" within the meaning of N.Y. GEN. BUS. LAW § 350.

2424. N.Y. GEN. BUS. LAW § 350 makes unlawful "[f]alse advertising in the conduct of any business, trade or commerce." False advertising includes "advertising, including labeling, of a commodity . . . if such advertising is misleading in a material respect," taking into account "the extent to which the advertising fails to reveal facts material in light of … representations [made] with respect to the commodity …." N.Y. GEN. BUS. LAW § 350-a.

2425. New GM caused to be made or disseminated through New York, through advertising, marketing and other publications, statements that were untrue or misleading, and that were known, or which by the exercise of reasonable care should have been known to New GM, to be untrue and misleading to consumers and the New York Class.

2426. New GM has violated § 350 because the misrepresentations and omissions regarding the defects, and New GM's systemic devaluation of safety, as set forth above, were material and likely to deceive a reasonable consumer.

2427. New York Class members have suffered an injury, including the loss of money or property, as a result of New GM's false advertising. In purchasing or leasing their vehicles, New York Plaintiffs and the New York Class relied on the misrepresentations and/or omissions of New GM with respect to the safety and reliability of the Affected Vehicles. New GM's representations were false and/or misleading because the concealed defects and safety issues seriously undermine the value of the Affected Vehicles. Had Plaintiffs and the New York Class known this, they would not have purchased or leased their Affected Vehicles and/or paid as much for them.

2428. Pursuant to N.Y. GEN. BUS. LAW § 350 e, the New York Class seeks monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $500 each for New York Class member. Because New GM's conduct was committed willfully and knowingly, New York members are entitled to recover three times actual damages, up to $10,000, for each New York Class member.

2429. The New York Class also seeks an order enjoining New GM's unfair, unlawful, and/or deceptive practices, attorneys' fees, and any other just and proper relief available under General Business Law §§ 349–350.

NORTH CAROLINA

COUNT I

VIOLATION OF NORTH CAROLINA'S UNFAIR AND DECEPTIVE ACTS AND PRACTICES ACT

(N.C. GEN. STAT. § 75-1.1, *et seq.*)

2430. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2431. This claim is brought only on behalf of Nationwide Class members who are North Carolina residents (the "North Carolina Class").

2432. New GM engaged in "commerce" within the meaning of N.C. GEN. STAT. § 75-1.1(b).

2433. The North Carolina Act broadly prohibits "unfair or deceptive acts or practices in or affecting commerce." N.C. GEN. STAT. § 75-1.1(a). As alleged above and below, New GM willfully committed unfair or deceptive acts or practices in violation of the North Carolina Act.

2434. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2435. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2436. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2437. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2438. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold,

New GM engaged in unfair and deceptive business practices in violation of the North Carolina Act.

2439. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2440. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2441. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the North Carolina Class.

2442. New GM knew or should have known that its conduct violated the North Carolina Act.

2443. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2444. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2445. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2446. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the North Carolina Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2447. Plaintiffs and the North Carolina Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2448. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2449. As a direct and proximate result of New GM's violations of the North Carolina Act, Plaintiffs and the North Carolina Class have suffered injury-in-fact and/or actual damage.

2450. North Carolina Class members seek punitive damages against New GM because New GM's conduct was malicious, willful, reckless, wanton, fraudulent and in bad faith. New GM fraudulently and willfully misrepresented the safety and reliability of GM-branded vehicles, deceived North Carolina Class members on life-or-death matters, and concealed material facts that only they knew, all to avoid the expense and public relations nightmare of correcting the myriad flaws in the GM-branded vehicles it repeatedly promised Class members were safe. Because New GM's conduct was malicious, willful, reckless, wanton, fraudulent and in bad faith, it warrants punitive damages.

2451. Plaintiffs seek an order for treble their actual damages, an order enjoining New GM's unlawful acts, costs of Court, attorney's fees, and any other just and proper relief available under the North Carolina Act, N.C. GEN. STAT. § 75-16.

COUNT II

FRAUD BY CONCEALMENT

2452. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2453. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are North Carolina residents (the "North Carolina Class").

2454. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2455. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2456. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2457. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2458. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the North Carolina Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the North Carolina Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2459. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the North Carolina Class.

2460. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the North Carolina Class and conceal material information regarding defects that exist in GM-branded vehicles.

2461. Plaintiffs and the North Carolina Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed

facts. Plaintiffs' and the North Carolina Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the North Carolina Class.

2462. Because of the concealment and/or suppression of the facts, Plaintiffs and the North Carolina Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2463. The value of all North Carolina Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2464. Accordingly, New GM is liable to the North Carolina Class for their damages in an amount to be proven at trial.

2465. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the North Carolina Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(N.C. GEN. STAT. § 25-2-314)

2466. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2467. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of North Carolina residents who are members of the Ignition Switch Defect Subclass (the "North Carolina Ignition Switch Defect Subclass").

2468. New GM was a merchant with respect to motor vehicles within the meaning of N.C. GEN. STAT. § 25-2-104(1).

2469. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles under N.C. GEN. STAT. § 25-2-314.

2470. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2471. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the North Carolina Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2472. As a direct and proximate result of New GM's breach of the warranty of merchantability, Plaintiffs and the North Carolina Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

NORTH DAKOTA

COUNT I

VIOLATION OF THE NORTH DAKOTA CONSUMER FRAUD ACT

(N.D. CENT. CODE § 51-15-02)

2473. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2474. This claim is brought only on behalf of Nationwide Class members who are North Dakota residents (the "North Dakota Class").

2475. Plaintiffs, the North Dakota Class members, and New GM are "persons" within the meaning of N.D. CENT. CODE § 51-15-02(4).

2476. New GM engaged in the "sale" of "merchandise" within the meaning of N.D. CENT. CODE § 51-15-02(3), (5).

2477. The North Dakota Consumer Fraud Act ("North Dakota CFA") makes unlawful "[t]he act, use, or employment by any person of any deceptive act or practice, fraud, false pretense, false promise, or misrepresentation, with the intent that others rely thereon in connection with the sale or advertisement of any merchandise…." N.D. CENT. CODE § 51-15-02. As set forth above and below, New GM committed deceptive acts or practices, with the intent that Class members rely thereon in connection with their purchase or lease of the Affected Vehicles.

2478. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise

engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2479. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2480. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2481. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2482. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the North Dakota CFA.

2483. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2484. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2485. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the North Dakota Class.

2486. New GM knew or should have known that its conduct violated the North Dakota CFA.

2487. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2488. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully

withholding material facts from Plaintiffs that contradicted these representations.

2489. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2490. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the North Dakota Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2491. Plaintiffs and the North Dakota Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2492. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2493. As a direct and proximate result of New GM's violations of the North Dakota CFA, Plaintiffs and the North Dakota Class have suffered injury-in-fact and/or actual damage.

2494. North Dakota Class members seek punitive damages against New GM because New GM's conduct was egregious. New GM misrepresented the safety and reliability of millions of GM-branded vehicles, concealed myriad defects in millions of GM-branded vehicles and the systemic safety issues plaguing the company, deceived North Dakota Class members on life-or-death matters, and concealed material facts that only New GM knew, all to avoid the expense and public relations nightmare of correcting the serious flaw in its culture and in millions of GM-branded vehicles. New GM's egregious conduct warrants punitive damages.

2495. Further, New GM knowingly committed the conduct described above, and thus, under N.D. CENT. CODE § 51-15-09, New GM is liable to Plaintiffs and the North Dakota Class for treble damages in amounts to be proven at trial, as well as attorneys' fees, costs, and disbursements. Plaintiffs further seek an order enjoining New GM's unfair and/or deceptive acts or practices, and other just and proper available relief under the North Dakota CFA.

COUNT II

FRAUD BY CONCEALMENT

2496. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2497. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are North Dakota residents (the "North Dakota Class").

2498. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

2499. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2500. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2501. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2502. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the North Dakota Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the North Dakota Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2503. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the North Dakota Class.

2504. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the North Dakota Class and conceal material information regarding defects that exist in GM-branded vehicles.

2505. Plaintiffs and the North Dakota Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed

facts. Plaintiffs' and the North Dakota Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the North Dakota Class.

2506. Because of the concealment and/or suppression of the facts, Plaintiffs and the North Dakota Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2507. The value of all North Dakota Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2508. Accordingly, New GM is liable to the North Dakota Class for their damages in an amount to be proven at trial.

2509. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the North Dakota Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(N.D. CENT. CODE § 41-02-31)

2510. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2511. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of North Dakota residents who are members of the Ignition Switch Defect Subclass (the "North Dakota Ignition Switch Defect Subclass").

2512. New GM was a merchant with respect to motor vehicles.

2513. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2514. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2515. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the North Dakota Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2516. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the North Dakota Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

OHIO

COUNT I

VIOLATION OF OHIO CONSUMER SALES PRACTICES ACT

(OHIO REV. CODE ANN. § 1345.01, *et seq.*)

2517. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2518. This claim is brought only on behalf of Nationwide Class members who are Ohio residents (the "Ohio Class").

2519. New GM is a "supplier" as that term is defined in OHIO REV. CODE § 1345.01(C).

2520. Plaintiffs and the Ohio Class are "consumers" as that term is defined in OHIO REV. CODE § 1345.01(D), and their purchases and leases of the Affected Vehicles are "consumer transactions" within the meaning of OHIO REV. CODE § 1345.01(A).

2521. The Ohio Consumer Sales Practices Act ("Ohio CSPA"), OHIO REV. CODE § 1345.02, broadly prohibits unfair or deceptive acts or practices in connection with a consumer transaction. Specifically, and without limitation of the broad prohibition, the Act prohibits suppliers from representing (i) that goods have characteristics or uses or benefits which they do not have; (ii) that their goods are of a particular quality or grade they are not; and (iii) the subject of a consumer transaction has been supplied in accordance with a previous representation, if it has not. *Id.* New GM's conduct as alleged above and below constitutes unfair and/or deceptive consumer sales practices in violation of OHIO REV. CODE § 1345.02.

2522. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the Ohio CSPA, including: representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not; and engaging in other unfair or deceptive acts or practices.

2523. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2524. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2525. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2526. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from

finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2527. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2528. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Ohio CSPA.

2529. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2530. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2531. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Ohio Class.

2532. New GM knew or should have known that its conduct violated the Ohio CSPA.

2533. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2534. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2535. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2536. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Ohio Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2537. Plaintiffs and the Ohio Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the

many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2538. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2539. As a direct and proximate result of New GM's violations of the Ohio CSPA, Plaintiffs and the Ohio Class have suffered injury-in-fact and/or actual damage.

2540. Ohio Class members seek punitive damages against New GM because New GM's conduct was egregious. New GM misrepresented the safety and reliability of millions of GM-branded vehicles, concealed myriad defects in millions of GM-branded vehicles and the systemic safety issues plaguing New GM, deceived Class members on life-or-death matters, and concealed material facts that only New GM knew, all to avoid the expense and public relations nightmare of correcting the serious flaw in its culture and in millions of GM-branded vehicles. New GM's egregious conduct warrants punitive damages.

2541. Plaintiffs and the Ohio Class specifically do not allege herein a claim for violation of OHIO REV. CODE § 1345.72.

2542. New GM was on notice pursuant to OHIO REV. CODE § 1345.09(B) that its actions constituted unfair, deceptive, and unconscionable practices by, for example, *Mason v. Mercedes-Benz USA, LLC*, 2005 Ohio App. LEXIS 3911, at *33 (S.D. Ohio Aug. 18, 2005), and *Lilly v. Hewlett-Packard Co.*, 2006 U.S. Dist. LEXIS 22114, at *17-18 (S.D. Ohio Apr. 21, 2006). Further, New GM's conduct as alleged above constitutes an act or practice previously declared to

be deceptive or unconscionable by rule adopted under division (B)(2) of section 1345.05 and previously determined by Ohio courts to violate Ohio's Consumer Sales Practices Act and was committed after the decisions containing these determinations were made available for public inspection under division (A)(3) of O.R.C. § 1345.05. The applicable rule and Ohio court opinions include, but are not limited to: OAC 109:4-3-16; *Mason v. Mercedes-Benz USA, LLC*, 2005 Ohio 4296 (Ohio Ct. App. 2005); *Khouri v. Lewis*, Cuyahoga Common Pleas No. 342098 (2001); *State ex rel. Montgomery v. Canterbury*, Franklin App. No. 98CVH054085 (2000); and *Fribourg v. Vandemark* (July 26, 1999), Clermont App. No CA99-02-017, unreported (PIF # 10001874).

2543. As a result of the foregoing wrongful conduct of New GM, Plaintiffs and the Ohio Class have been damaged in an amount to be proven at trial, and seek all just and proper remedies, including, but not limited to, actual and statutory damages, an order enjoining New GM's deceptive and unfair conduct, treble damages, court costs and reasonable attorneys' fees, pursuant to OHIO REV. CODE § 1345.09, *et seq*.

COUNT II

FRAUD BY CONCEALMENT

2544. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2545. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Ohio residents (the "Ohio Class").

2546. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2547. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2548. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2549. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2550. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Ohio Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Ohio Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2551. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Ohio Class.

2552. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Ohio Class and conceal material information regarding defects that exist in GM-branded vehicles.

2553. Plaintiffs and the Ohio Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Ohio Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Ohio Class.

2554. Because of the concealment and/or suppression of the facts, Plaintiffs and the Ohio Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2555. The value of all Ohio Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2556. Accordingly, New GM is liable to the Ohio Class for their damages in an amount to be proven at trial.

2557. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Ohio Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

IMPLIED WARRANTY IN TORT

2558. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2559. Plaintiffs bring this claim only on behalf of Ohio residents who are members of the Ignition Switch Defect Subclass (the "Ohio Ignition Switch Defect Subclass").

2560. The Defective Ignition Switch Vehicles contained a design defect, namely, a faulty ignition system that fails under reasonably foreseeable use, resulting in stalling, loss of brakes, power steering, and airbags, among other safety issues, as detailed herein more fully.

2561. The design, manufacturing, and/or assembly defects existed at the time the Defective Ignition Switch Vehicles containing the defective ignition systems left the possession or control of New GM.

2562. Based upon the dangerous product defects, New GM failed to meet the expectations of a reasonable consumer. The Defective Ignition Switch Vehicles failed their ordinary, intended use because the ignition systems in the vehicles do not function as a reasonable consumer would expect. Moreover, the defect presents a serious danger to Plaintiffs and the other members of the Ohio Ignition Defect Subclass that cannot be eliminated without significant cost.

2563. The design defects in the vehicles were the direct and proximate cause of economic damages to Plaintiffs, as well as damages incurred or to be incurred by each of the other Ohio Ignition Switch Defect Subclass members.

OKLAHOMA

COUNT I

VIOLATION OF OKLAHOMA CONSUMER PROTECTION ACT

(OKLA. STAT. TIT. 15 § 751, *et seq.*)

2564. Plaintiffs reallege and incorporate by reference each paragraph as if set forth fully herein.

2565. This claim is brought only on behalf of Nationwide Class members who are Oklahoma residents (the "Oklahoma Class").

2566. Plaintiffs and Oklahoma Class members are "persons" under the Oklahoma Consumer Protection Act ("Oklahoma CPA"), OKLA. STAT. TIT. 15 § 752.

2567. New GM is a "person," "corporation," or "association" within the meaning of OKLA. STAT. TIT. 15 § 15-751(1).

2568. The sale or lease of the Affected Vehicles to the Oklahoma Class members was a "consumer transaction" within the meaning of OKLA. STAT. TIT. 15 § 752, and New GM's actions as set forth herein occurred in the conduct of trade or commerce.

2569. The Oklahoma CPA declares unlawful, *inter alia*, the following acts or practices when committed in the course of business: "mak[ing] a false or misleading representation, knowingly or with reason to know, as to the characteristics …, uses, [or] benefits, of the subject of a consumer transaction," or making a false representation, "knowingly or with reason to know, that the subject of a consumer transaction is of a particular standard, style or model, if it is of another or "[a]dvertis[ing], knowingly or with reason to know, the subject of a consumer

transaction with intent not to sell it as advertised;" and otherwise committing "an unfair or deceptive trade practice." *See* OKLA. STAT. TIT. 15, § 753.

2570. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in unfair and deceptive business practices prohibited by the Oklahoma CPA, including: representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard, quality, and grade when they are not; and advertising Affected Vehicles with the intent not to sell or lease them as advertised; misrepresenting, omitting and engaging in other practices that have deceived or could reasonably be expected to deceive or mislead; and engaging in practices which offend established public policy or are immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.

2571. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2572. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2573. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2574. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2575. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive trade practices in violation of the Oklahoma CPA.

2576. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2577. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2578. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Oklahoma Class.

2579. New GM knew or should have known that its conduct violated the Oklahoma CPA.

2580. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2581. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2582. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2583. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Oklahoma Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2584. Plaintiffs and the Oklahoma Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2585. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2586. As a direct and proximate result of New GM's violations of the Oklahoma CPA, Plaintiffs and the Oklahoma Class have suffered injury-in-fact and/or actual damage.

2587. Oklahoma Class members seek punitive damages against New GM because New GM's conduct was egregious. New GM misrepresented the safety and reliability of millions of GM-branded vehicles, concealed myriad defects in millions of GM-branded vehicles and the systemic safety issues plaguing New GM, deceived Oklahoma Class members on life-or-death matters, and concealed material facts that only it knew, all to avoid the expense and public relations nightmare of correcting the serious flaw in its culture and in millions of GM-branded vehicles. New GM's egregious conduct warrants punitive damages.

2588. New GM's conduct as alleged herein was unconscionable because (1) New GM, knowingly or with reason to know, took advantage of consumers reasonably unable to protect their interests because of their age, physical infirmity, ignorance, illiteracy, inability to understand the language of an agreement or similar factor; (2) at the time the consumer transaction was entered into, New GM knew or had reason to know that price grossly exceeded

the price at which similar vehicles were readily obtainable in similar transactions by like consumers; and (3) New GM knew or had reason to know that the transaction New GM induced the consumer to enter into was excessively one-sided in favor of New GM.

2589. Because New GM's unconscionable conduct caused injury to Oklahoma Class members, the Oklahoma Class seeks recovery of actual damages, discretionary penalties up to $2,000 per violation, and reasonable attorneys' fees, under OKLA. STAT. TIT. 15 § 761.1. The Oklahoma Class further seeks an order enjoining New GM's unfair and/or deceptive acts or practices, and any other just and proper relief available under the Oklahoma CPA.

COUNT II

FRAUD BY CONCEALMENT

2590. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2591. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Oklahoma residents (the "Oklahoma Class").

2592. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2593. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2594. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2595. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2596. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Oklahoma Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Oklahoma Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2597. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Oklahoma Class.

2598. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Oklahoma Class and conceal material information regarding defects that exist in GM-branded vehicles.

2599. Plaintiffs and the Oklahoma Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Oklahoma Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Oklahoma Class.

2600. Because of the concealment and/or suppression of the facts, Plaintiffs and the Oklahoma Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2601. The value of all Oklahoma Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2602. Accordingly, New GM is liable to the Oklahoma Class for their damages in an amount to be proven at trial.

2603. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Oklahoma Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(12A OKLA. STAT. ANN. § 2-314)

2604. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2605. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Oklahoma residents who are members of the Ignition Switch Defect Subclass (the "Oklahoma Ignition Switch Defect Subclass").

2606. New GM was a merchant with respect to motor vehicles.

2607. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transactions when Plaintiffs purchased their Defective Ignition Switch Vehicles.

2608. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2609. New GM was provided notice of these issues by numerous complaints filed against it, internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Oklahoma Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2610. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Oklahoma Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

OREGON

COUNT I

VIOLATION OF THE OREGON UNLAWFUL TRADE PRACTICES ACT

(OR. REV. STAT. §§ 646.605, *et seq.*)

2611. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2612. This claim is brought only on behalf of Nationwide Class members who are Oregon residents (the "Oregon Class").

2613. New GM is a person within the meaning of OR. REV. STAT. § 646.605(4).

2614. The Affected Vehicles at issue are "goods" obtained primarily for personal family or household purposes within the meaning of OR. REV. STAT. § 646.605(6).

2615. The Oregon Unfair Trade Practices Act ("Oregon UTPA") prohibits a person from, in the course of the person's business, doing any of the following: "(e) Represent[ing] that … goods … have … characteristics … uses, benefits, … or qualities that they do not have; (g) Represent[ing] that … goods … are of a particular standard [or] quality … if they are of another; (i) Advertis[ing] … goods or services with intent not to provide them as advertised;" and "(u) engag[ing] in any other unfair or deceptive conduct in trade or commerce." OR. REV. STAT. § 646.608(1).

2616. New GM engaged in unlawful trade practices, including representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard and quality when they are not;

advertising Affected Vehicles with the intent not to sell them as advertised; and engaging in other unfair or deceptive acts.

2617. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2618. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2619. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2620. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2621. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2622. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Oregon UTPA.

2623. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2624. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2625. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Oregon Class.

2626. New GM knew or should have known that its conduct violated the Oregon UTPA.

2627. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2628. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles, and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2629. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2630. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Oregon Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2631. Plaintiffs and the Oregon Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2632. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2633. As a direct and proximate result of New GM's violations of the Oregon UTPA, Plaintiffs and the Oregon Class have suffered injury-in-fact and/or actual damage.

2634. Plaintiffs and the Oregon Class are entitled to recover the greater of actual damages or $200 pursuant to OR. REV. STAT. § 646.638(1). Plaintiffs and the Oregon Class are also entitled to punitive damages because New GM engaged in conduct amounting to a particularly aggravated, deliberate disregard of the rights of others.

COUNT II

FRAUD BY CONCEALMENT

2635. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2636. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Oregon residents (the "Oregon Class").

2637. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2638. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2639. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2640. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false

representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2641. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Oregon Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2642. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Oregon Class.

2643. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Oregon Class and conceal material information regarding defects that exist in GM-branded vehicles.

2644. Plaintiffs and the Oregon Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Oregon Class.

2645. Because of the concealment and/or suppression of the facts, Plaintiffs and the Oregon Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate

policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2646. The value of all Oregon Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2647. Accordingly, New GM is liable to the Oregon Class for their damages in an amount to be proven at trial.

2648. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Oregon Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

PENNSYLVANIA

COUNT I

VIOLATION OF THE PENNSYLVANIA UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION LAW

(73 P.S. § 201-1, *et seq*.)

2649. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2650. This claim is brought only on behalf of Nationwide Class members who are Pennsylvania residents (the "Pennsylvania Class").

2651. Plaintiffs purchased or leased their Affected Vehicles primarily for personal, family or household purposes within the meaning of 73 P.S. § 201-9.2.

2652. All of the acts complained of herein were perpetrated by New GM in the course of trade or commerce within the meaning of 73 P.S. § 201-2(3).

2653. The Pennsylvania Unfair Trade Practices and Consumer Protection Law ("Pennsylvania CPL") prohibits unfair or deceptive acts or practices, including: (i) "Representing that goods or services have … characteristics, …. Benefits or qualities that they do not have;" (ii) "Representing that goods or services are of a particular standard, quality or grade … if they are of another;:" (iii) "Advertising goods or services with intent not to sell them as advertised;" and (iv) "Engaging in any other fraudulent or deceptive conduct which creates a likelihood of confusion or misunderstanding." 73 P.S. § 201-2(4).

2654. New GM engaged in unlawful trade practices, including representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; representing that Affected Vehicles are of a particular standard and quality when they are not; advertising Affected Vehicles with the intent not to sell them as advertised; and engaging in any other fraudulent or deceptive conduct which creates a likelihood of confusion or of misunderstanding.

2655. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or

concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2656. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2657. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2658. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2659. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Pennsylvania CPL.

2660. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed

above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2661. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2662. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Pennsylvania Class.

2663. New GM knew or should have known that its conduct violated the Pennsylvania CPL.

2664. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2665. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2666. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2667. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Pennsylvania Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2668. Plaintiffs and the Pennsylvania Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2669. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2670. As a direct and proximate result of New GM's violations of the Pennsylvania CPL, Plaintiffs and the Pennsylvania Class have suffered injury-in-fact and/or actual damage.

2671. New GM is liable to Plaintiffs and the Pennsylvania Class for treble their actual damages or $100, whichever is greater, and attorneys' fees and costs. 73 P.S. § 201-9.2(a).

Plaintiffs and the Pennsylvania Class are also entitled to an award of punitive damages given that New GM's conduct was malicious, wanton, willful, oppressive, or exhibited a reckless indifference to the rights of others.

COUNT II

FRAUD BY CONCEALMENT

2672. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2673. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Pennsylvania residents (the "Pennsylvania Class").

2674. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2675. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2676. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2677. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2678. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Pennsylvania Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Pennsylvania Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2679. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Pennsylvania Class.

2680. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Pennsylvania Class and conceal material information regarding defects that exist in GM-branded vehicles.

2681. Plaintiffs and the Pennsylvania Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Pennsylvania Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Pennsylvania Class.

2682. Because of the concealment and/or suppression of the facts, Plaintiffs and the Pennsylvania Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded

vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2683. The value of all Pennsylvania Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2684. Accordingly, New GM is liable to the Pennsylvania Class for their damages in an amount to be proven at trial.

2685. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Pennsylvania Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(13 PA. CONS. STAT. ANN. § 2314)

2686. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2687. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Pennsylvania residents who are members of the Ignition Switch Defect Subclass (the "Pennsylvania Ignition Switch Defect Subclass").

2688. New GM is s a merchant with respect to motor vehicles.

2689. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law when New GM sold the Defective Ignition Switch Vehicles to Plaintiffs and the Pennsylvania Ignition Switch Defect Subclass.

2690. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended stalling to occur during ordinary driving conditions; when the vehicles stall, the power brakes and power steering become inoperable and the vehicles' airbags will not deploy,

2691. New GM was provided notice of these issues by numerous complaints filed against it, by its own internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Pennsylvania Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2692. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Pennsylvania Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

RHODE ISLAND

COUNT I

VIOLATION OF THE RHODE ISLAND UNFAIR TRADE PRACTICES AND CONSUMER PROTECTION ACT

(R.I. GEN. LAWS § 6-13.1, *et seq*.)

2693. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2694. This claim is brought only on behalf of Nationwide Class members who are Rhode Island residents (the "Rhode Island Class").

2695. Plaintiffs are persons who purchased or leased one or more Affected Vehicles primarily for personal, family, or household purposes within the meaning of R.I. GEN. LAWS § 6-13.1-5.2(a).

2696. Rhode Island's Unfair Trade Practices and Consumer Protection Act ("Rhode Island CPA") prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce" including: "(v) Representing that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities that they do not have"; "(vii) Representing that goods or services are of a particular standard, quality, or grade …, if they are of another"; "(ix) Advertising goods or services with intent not to sell them as advertised"; "(xii) Engaging in any other conduct that similarly creates a likelihood of confusion or of misunderstanding"; "(xiii) Engaging in any act or practice that is unfair or deceptive to the consumer"; and "(xiv) Using any other methods, acts or practices which mislead or deceive members of the public in a material respect." R.I. GEN. LAWS § 6-13.1-1(6).

2697. New GM engaged in unlawful trade practices, including: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2)

representing that the Affected Vehicles are of a particular standard and quality when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; and (4) otherwise engaging in conduct that is unfair or deceptive and likely to deceive.

2698. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2699. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2700. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2701. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2702. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2703. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Rhode Island CPA.

2704. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2705. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2706. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Rhode Island Class.

2707. New GM knew or should have known that its conduct violated the Rhode Island CPA.

2708. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2709. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2710. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2711. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Rhode Island Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2712. Plaintiffs and the Rhode Island Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2713. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2714. As a direct and proximate result of New GM's violations of the Rhode Island CPA, Plaintiffs and the Rhode Island Class have suffered injury-in-fact and/or actual damage.

2715. Plaintiffs and the Rhode Island Class are entitled to recover the greater of actual damages or $200 pursuant to R.I. GEN. LAWS § 6-13.1-5.2(a). Plaintiffs also seek punitive damages in the discretion of the Court because of New GM's egregious disregard of consumer and public safety and its long-running concealment of the serious safety defects and their tragic consequences.

COUNT II

FRAUD BY CONCEALMENT

2716. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2717. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Rhode Island residents (the "Rhode Island Class").

2718. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2719. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2720. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2721. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2722. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Rhode Island Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Rhode Island Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2723. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Rhode Island Class.

2724. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Rhode Island Class and conceal material information regarding defects that exist in GM-branded vehicles.

2725. Plaintiffs and the Rhode Island Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Rhode Island Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Rhode Island Class.

2726. Because of the concealment and/or suppression of the facts, Plaintiffs and the Rhode Island Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2727. The value of all Rhode Island Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2728. Accordingly, New GM is liable to the Rhode Island Class for their damages in an amount to be proven at trial.

2729. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Rhode Island Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(R.I. GEN. LAWS § 6A-2-314)

2730. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2731. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Rhode Island residents who are members of the Ignition Switch Defect Subclass (the "Rhode Island Ignition Switch Defect Subclass").

2732. New GM was a merchant with respect to motor vehicles.

2733. A warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law when Plaintiffs and the Class purchased their Defective Ignition Switch Vehicles.

2734. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended stalling to occur during ordinary driving conditions; when the vehicles stall, the power brakes and power steering become inoperable and the vehicles' airbags will not deploy.

2735. New GM was provided notice of these issues by numerous complaints filed against it, by its own internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Rhode Island Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2736. As a direct and proximate result of New GM's breach of the warranties of merchantability, Plaintiffs and the Rhode Island Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

SOUTH CAROLINA

COUNT I

VIOLATIONS OF THE SOUTH CAROLINA UNFAIR TRADE PRACTICES ACT

(S.C. CODE ANN. § 39-5-10, *et seq.*)

2737. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2738. This claim is brought only on behalf of Nationwide Class members who are South Carolina residents (the "South Carolina Class").

2739. New GM is a "person" under S.C. CODE ANN. § 39-5-10.

2740. The South Carolina Unfair Trade Practices Act ("South Carolina UTPA") prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce . . . ." S.C. CODE ANN. § 39-5-20(a). New GM engaged in unfair and deceptive acts or practices and violated the South Carolina UTPA by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles.

2741. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2742. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2743. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2744. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2745. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2746. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the South Carolina UTPA.

2747. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2748. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2749. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the South Carolina Class.

2750. New GM knew or should have known that its conduct violated the South Carolina UTPA.

2751. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2752. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier

regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiff; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles, while purposefully withholding material facts from Plaintiffs and the Class that contradicted these representations.

2753. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2754. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the South Carolina Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2755. Plaintiffs and the South Carolina Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2756. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2757. As a direct and proximate result of New GM's violations of the South Carolina UTPA, Plaintiffs and the South Carolina Class have suffered injury-in-fact and/or actual damage.

2758. Pursuant to S.C. CODE ANN. § 39-5-140(a), Plaintiffs seek monetary relief against New GM to recover for their economic losses. Because New GM's actions were willful and knowing, Plaintiffs' damages should be trebled. *Id.*

2759. Plaintiffs further allege that New GM's malicious and deliberate conduct warrants an assessment of punitive damages because New GM carried out despicable conduct with willful and conscious disregard of the rights and safety of others, subjecting Plaintiffs and the Class to cruel and unjust hardship as a result. New GM's intentionally and willfully misrepresented the safety and reliability of the Affected Vehicles, deceived Plaintiffs on life-or-death matters, and concealed material facts that only New GM knew, all to avoid the expense and public relations nightmare of correcting a deadly flaw in vehicles New GM repeatedly promised Plaintiffs was safe. New GM's unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

2760. Plaintiffs further seek an order enjoining New GM's unfair or deceptive acts or practices.

COUNT II

VIOLATIONS OF THE SOUTH CAROLINA REGULATION OF MANUFACTURERS, DISTRIBUTORS, AND DEALERS ACT

(S.C. CODE ANN. § 56-15-10, *et seq.*)

2761. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2762. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are South Carolina residents (the "South Carolina Class").

2763. New GM was a "manufacturer" as set forth in S.C. CODE ANN. § 56-15-10, as it was engaged in the business of manufacturing or assembling new and unused motor vehicles.

2764. New GM committed unfair or deceptive acts or practices that violated the South Carolina Regulation of Manufacturers, Distributors, and Dealers Act ("Dealers Act"), S.C. CODE ANN. § 56-15-30.

2765. New GM engaged in actions which were arbitrary, in bad faith, unconscionable, and which caused damage to Plaintiffs, the South Carolina Class, and to the public.

2766. New GM's bad faith and unconscionable actions include, but are not limited to: (1) representing that Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have, (2) representing that Affected Vehicles are of a particular standard, quality, and grade when they are not, (3) advertising Affected Vehicles with the intent not to sell them as advertised, (4) representing that a transaction involving Affected Vehicles confers or involves rights, remedies, and obligations which it does not, and (5) representing that the subject of a transaction involving Affected Vehicles has been supplied in accordance with a previous representation when it has not.

2767. New GM resorted to and used false and misleading advertisements in connection with its business. As alleged above, New GM made numerous material statements about the safety and reliability of the Affected Vehicles that were either false or misleading. Each of these statements contributed to the deceptive context of New GM's unlawful advertising and representations as a whole.

2768. Pursuant to S.C. CODE ANN. § 56-15-110(2), Plaintiffs bring this action on behalf of themselves and the South Carolina Class, as the action is one of common or general interest to many persons and the parties are too numerous to bring them all before the court.

2769. Plaintiffs and the South Carolina Class are entitled to double their actual damages, the cost of the suit, attorney's fees pursuant to S.C. CODE ANN. § 56-15-110. Plaintiffs also seek injunctive relief under S.C. CODE ANN. § 56-15-110. Plaintiffs also seek treble damages because New GM acted maliciously.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(S.C. CODE § 36-2-314)

2770. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2771. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of South Carolina residents who are members of the Ignition Switch Defect Subclass (the "South Carolina Ignition Switch Defect Subclass").

2772. New GM was a merchant with respect to motor vehicles under S.C. CODE § 36-2-314.

2773. Under S.C. CODE § 36-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law when Plaintiffs and the Class purchased the vehicles.

2774. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended stalling to occur during ordinary driving conditions; when the vehicles stall, the power brakes and power steering become inoperable and the vehicles' airbags will not deploy.

2775. New GM was provided notice of these issues by numerous complaints filed against it, its own internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the South Carolina Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

2776. As a direct and proximate result of New GM's breach of the warranty of merchantability, Plaintiffs and the South Carolina Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

COUNT IV

FRAUD BY CONCEALMENT

2777. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2778. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are South Carolina residents (the "South Carolina Class").

2779. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2780. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2781. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2782. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2783. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the South Carolina Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the South Carolina Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2784. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the South Carolina Class.

2785. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the South Carolina Class and conceal material information regarding defects that exist in GM-branded vehicles.

2786. Plaintiffs and the South Carolina Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the South Carolina Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the South Carolina Class.

2787. Because of the concealment and/or suppression of the facts, Plaintiffs and the South Carolina Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2788. The value of all South Carolina Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2789. Accordingly, New GM is liable to the South Carolina Class for their damages in an amount to be proven at trial.

2790. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the South Carolina Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

SOUTH DAKOTA

COUNT I

VIOLATION OF THE SOUTH DAKOTA DECEPTIVE TRADE PRACTICES AND CONSUMER PROTECTION LAW

(S.D. CODIFIED LAWS § 37-24-6)

2791. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2792. This claim is brought only on behalf of Nationwide Class members who are South Dakota residents (the "South Dakota Class").

2793. The South Dakota Deceptive Trade Practices and Consumer Protection Law ("South Dakota CPL") prohibits deceptive acts or practices, which are defined for relevant purposes to include "[k]nowingly and intentionally act, use, or employ any deceptive act or practice, fraud, false pretense, false promises, or misrepresentation or to conceal, suppress, or omit any material fact in connection with the sale or advertisement of any merchandise, regardless of whether any person has in fact been misled, deceived, or damaged thereby [.]" S.D. CODIFIED LAWS § 37-24-6(1). The conduct of New GM as set forth herein constitutes deceptive acts or practices, fraud, false promises, misrepresentation, concealment, suppression and omission of material facts in violation of S.D. Codified Laws § 37-24-6 and 37-24-31, including, but not limited to, New GM's misrepresentations and omissions regarding the safety

and reliability of the Affected Vehicles, and New GM's misrepresentations concerning a host of other defects and safety issues.

2794. New GM's actions as set forth above occurred in the conduct of trade or commerce.

2795. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2796. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2797. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2798. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2799. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the South Dakota CPL.

2800. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2801. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2802. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the South Dakota Class.

2803. New GM knew or should have known that its conduct violated the South Dakota CPL.

2804. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2805. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2806. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2807. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the South Dakota Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2808. Plaintiffs and the South Dakota Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2809. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2810. As a direct and proximate result of New GM's violations of the South Dakota CPL, Plaintiffs and the South Dakota Class have suffered injury-in-fact and/or actual damage.

2811. Under S.D. CODIFIED LAWS § 37-24-31, Plaintiffs and the South Dakota Class are entitled to a recovery of their actual damages suffered as a result of New GM's acts and practices.

COUNT II

FRAUD BY CONCEALMENT

2812. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2813. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are South Dakota residents (the "South Dakota Class").

2814. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2815. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2816. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2817. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2818. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the South Dakota Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the South Dakota Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2819. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the South Dakota Class.

2820. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the South Dakota Class and conceal material information regarding defects that exist in GM-branded vehicles.

2821. Plaintiffs and the South Dakota Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed

facts. Plaintiffs' and the South Dakota Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the South Dakota Class.

2822. Because of the concealment and/or suppression of the facts, Plaintiffs and the South Dakota Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2823. The value of all South Dakota Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2824. Accordingly, New GM is liable to the South Dakota Class for their damages in an amount to be proven at trial.

2825. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the South Dakota Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(S.D. CODIFIED LAWS § 57A-2-314)

2826. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2827. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of South Dakota residents who are members of the Ignition Switch Defect Subclass (the "South Dakota Ignition Switch Defect Subclass").

2828.. New GM was a merchant with respect to motor vehicles.

2829. South Dakota law imposed a warranty that the Defective Ignition Switch Vehicles were merchantable when Plaintiffs and the South Dakota Ignition Switch Defect Subclass purchased their Defective Ignition Switch Vehicles.

2830. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2831. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the South Dakota Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

TENNESSEE

COUNT I

VIOLATION OF TENNESSEE CONSUMER PROTECTION ACT

(TENN. CODE ANN. § 47-18-101, *et seq*.)

2832. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2833. This claim is brought only on behalf of Nationwide Class members who are Tennessee residents (the "Tennessee Class").

2834. Plaintiffs and the Tennessee Class are "natural persons" and "consumers" within the meaning of TENN. CODE ANN. § 47-18-103(2).

2835. New GM is a "person" within the meaning of TENN. CODE ANN. § 47-18-103(2) (the "Act").

2836. New GM's conduct complained of herein affected "trade," "commerce" or "consumer transactions" within the meaning of TENN. CODE ANN. § 47-18-103(19).

2837. The Tennessee Consumer Protection Act ("Tennessee CPA") prohibits "[u]nfair or deceptive acts or practices affecting the conduct of any trade or commerce," including but not limited to: "Representing that goods or services have … characteristics, [or] … benefits … that they do not have…;" "Representing that goods or services are of a particular standard, quality or grade… if they are of another;" and "Advertising goods or services with intent not to sell them as advertised." TENN. CODE ANN. § 47-18-104. New GM violated the Tennessee CPA by engaging in unfair or deceptive acts, including representing that Affected Vehicles have characteristics or benefits that they did not have; representing that Affected Vehicles are of a particular standard, quality, or grade when they are of another; and advertising Affected Vehicles with intent not to sell them as advertised.

2838. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2839. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2840. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2841. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2842. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself

as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Tennessee CPA.

2843. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2844. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2845. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Tennessee Class.

2846. New GM knew or should have known that its conduct violated the Tennessee CPA.

2847. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2848. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2849. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2850. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Tennessee Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2851. Plaintiffs and the Tennessee Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2852. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2853. As a direct and proximate result of New GM's violations of the Tennessee CPA, Plaintiffs and the Tennessee Class have suffered injury-in-fact and/or actual damage.

2854. Pursuant to TENN. CODE § 47-18-109(a), Plaintiffs and the Tennessee Class seek monetary relief against New GM measured as actual damages in an amount to be determined at trial, treble damages as a result of New GM's willful or knowing violations, and any other just and proper relief available under the Tennessee CPA.

COUNT II

FRAUD BY CONCEALMENT

2855. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2856. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Tennessee residents (the "Tennessee Class").

2857. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2858. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2859. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2860. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2861. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Tennessee Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Tennessee Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2862. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Tennessee Class.

2863. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Tennessee Class and conceal material information regarding defects that exist in GM-branded vehicles.

2864. Plaintiffs and the Tennessee Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Tennessee Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Tennessee Class.

2865. Because of the concealment and/or suppression of the facts, Plaintiffs and the Tennessee Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded

vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2866. The value of all Tennessee Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2867. Accordingly, New GM is liable to the Tennessee Class for their damages in an amount to be proven at trial.

2868. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Tennessee Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

TEXAS

COUNT I

VIOLATIONS OF THE TEXAS DECEPTIVE TRADE PRACTICES – CONSUMER PROTECTION ACT

(TEX. BUS. & COM. CODE §§ 17.41, *et seq.*)

2869. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2870. This claim is brought only on behalf of Nationwide Class members who are Texas residents (the "Texas Class").

2871. Plaintiffs and the Texas Class are individuals, partnerships and corporations with assets of less than $25 million (or are controlled by corporations or entities with less than $25 million in assets). *See* TEX. BUS. & COM. CODE § 17.41.

2872. The Texas Deceptive Trade Practices-Consumer Protection Act ("Texas DTPA") prohibits "[f]alse, misleading, or deceptive acts or practices in the conduct of any trade or commerce," TEX. BUS. & COM. CODE § 17.46(a), and an "unconscionable action or course of action," which means "an act or practice which, to a consumer's detriment, takes advantage of the lack of knowledge, ability, experience, or capacity of the consumer to a grossly unfair degree." TEX. BUS. & COM. CODE § 17.45(5); TEX. BUS. & COM. CODE § 17.50(a)(3). New GM has committed false, misleading, unconscionable, and deceptive acts or practices in the conduct of trade or commerce.

2873. New GM also violated the Texas DTPA by: (1) representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; and (4) failing to disclose information concerning the Affected Vehicles with the intent to induce consumers to purchase or lease the Affected Vehicles.

2874. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2875. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2876. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2877. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2878. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive and unconscionable business practices in violation of the Texas DTPA.

2879. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles

were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2880. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2881. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Texas Class.

2882. New GM knew or should have known that its conduct violated the Texas DTPA.

2883. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2884. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2885. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to

those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2886. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Texas Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2887. Plaintiffs and the Texas Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2888. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2889. As a direct and proximate result of New GM's violations of the Texas DTPA, Plaintiffs and the Texas Class have suffered injury-in-fact and/or actual damage.

2890. Pursuant to TEX. BUS. & COM. CODE § 17.50(a)(1) and (b), Plaintiffs and the Texas Class seek monetary relief against New GM measured as actual damages in an amount to be determined at trial, treble damages for New GM's knowing violations of the Texas DTPA, and any other just and proper relief available under the Texas DTPA.

2891. For those Class members who wish to rescind their purchases, they are entitled under TEX. BUS. & COM. CODE § 17.50(b)(4) to rescission and other relief necessary to restore any money or property that was acquired from them based on violations of the Texas DTPA.

2892. Plaintiffs and the Class also seek court costs and attorneys' fees under § 17.50(d) of the Texas DTPA.

2893. On October 8, 2014, certain Plaintiffs sent a letter complying with TEX. BUS. & COM. CODE § 17.505(a). Plaintiffs presently do not claim relief for damages under the Texas DTPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Texas Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

2894. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2895. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2896. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2897. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2898. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands

behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2899. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Texas Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Texas Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2900. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Texas Class.

2901. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Texas Class and conceal material information regarding defects that exist in GM-branded vehicles.

2902. Plaintiffs and the Texas Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Texas Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Texas Class.

2903. Because of the concealment and/or suppression of the facts, Plaintiffs and the Texas Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-

branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2904. The value of all Texas Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2905. Accordingly, New GM is liable to the Texas Class for their damages in an amount to be proven at trial.

2906. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Texas Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(TEX. BUS. & COM. CODE § 2.314)

2907. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2908. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only

on behalf of Texas residents who are members of the Ignition Switch Defect Subclass (the "Texas Ignition Switch Defect Subclass").

2909. New GM was a merchant with respect to motor vehicles under TEX. BUS. & COM. CODE § 2.104.

2910. Under TEX. BUS. & COM. CODE § 2.314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law in the transaction in which Plaintiffs and the Texas Ignition Switch Defect Subclass purchased their Defective Ignition Switch Vehicles.

2911. New GM impliedly warranted that the vehicles were of good and merchantable quality and fit, and safe for their ordinary intended use – transporting the driver and passengers in reasonable safety during normal operation, and without unduly endangering them or members of the public.

2912. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2913. As a direct and proximate result of New GM's breach of the implied warranty of merchantability, Plaintiffs and the Texas Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

UTAH

COUNT I

VIOLATION OF UTAH CONSUMER SALES PRACTICES ACT

(UTAH CODE ANN. § 13-11-1, *et seq.*)

2914. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2915. This claim is brought only on behalf of Nationwide Class members who are Utah residents (the "Utah Class").

2916. New GM is a "supplier" under the Utah Consumer Sales Practices Act ("Utah CSPA"), UTAH CODE ANN. § 13-11-3.

2917. Utah Class members are "persons" under UTAH CODE ANN. § 13-11-3.

2918. The sale of the Affected Vehicles to the Utah Class members was a "consumer transaction" within the meaning of UTAH CODE ANN. § 13-11-3.

2919. The Utah CSPA makes unlawful any "deceptive act or practice by a supplier in connection with a consumer transaction" under UTAH CODE ANN. § 13-11-4. Specifically, "a supplier commits a deceptive act or practice if the supplier knowingly or intentionally: (a) indicates that the subject of a consumer transaction has sponsorship, approval, performance characteristics, accessories, uses, or benefits, if it has not" or "(b) indicates that the subject of a consumer transaction is of a particular standard, quality, grade, style, or model, if it is not." UTAH CODE ANN. § 13-11-4. "An unconscionable act or practice by a supplier in connection with a consumer transaction" also violates the Utah CSPA. UTAH CODE ANN. § 13-11-5.

2920. New GM committed deceptive acts or practices in the conduct of trade or commerce, by, among other things, engaging in unconscionable acts, representing that the Affected Vehicles have characteristics, uses, benefits, and qualities which they do not have; and

representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not

2921. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2922. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2923. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2924. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2925. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Utah CSPA.

2926. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2927. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2928. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Utah Class.

2929. New GM knew or should have known that its conduct violated the Utah CSPA.

2930. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2931. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2932. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2933. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Utah Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2934. Plaintiffs and the Utah Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2935. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2936. As a direct and proximate result of New GM's violations of the Utah CSPA, Plaintiffs and the Utah Class have suffered injury-in-fact and/or actual damage.

2937. Pursuant to UTAH CODE ANN. § 13-11-4, Plaintiffs and the Utah Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $2,000 for each Plaintiff and each Utah Class member, reasonable attorneys' fees, and any other just and proper relief available under the Utah CSPA.

COUNT II

FRAUD BY CONCEALMENT

2938. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2939. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Utah residents (the "Utah Class").

2940. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2941. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2942. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2943. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands

behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2944. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Utah Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Utah Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2945. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Utah Class.

2946. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Utah Class and conceal material information regarding defects that exist in GM-branded vehicles.

2947. Plaintiffs and the Utah Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Utah Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Utah Class.

2948. Because of the concealment and/or suppression of the facts, Plaintiffs and the Utah Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-

branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2949. The value of all Utah Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2950. Accordingly, New GM is liable to the Utah Class members for their damages in an amount to be proven at trial.

2951. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Utah Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(UTAH CODE ANN. § 70A-2-314)

2952. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2953. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only

on behalf of Utah residents who are members of the Ignition Switch Defect Subclass (the "Utah Ignition Switch Defect Subclass").

2954. New GM was at all relevant times a merchant with respect to motor vehicles.

2955. New GM impliedly warranted that its vehicles were of good and merchantable quality and fit, and safe for their ordinary intended use – transporting the driver and passengers in reasonable safety during normal operation, and without unduly endangering them or members of the public.

2956. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

2957. As a direct and proximate result of the New GM's breach of the implied warranty of merchantability, Plaintiffs and the Utah Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

VERMONT

COUNT I

VIOLATION OF VERMONT CONSUMER FRAUD ACT

(VT. STAT. ANN. TIT. 9, § 2451 *et seq.*)

2958. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2959. This claim is brought only on behalf of Nationwide Class members who are Vermont residents (the "Vermont Class").

2960. New GM is a seller within the meaning of VT. STAT. ANN. TIT. 9, § 2451(a)(c).

2961. The Vermont Consumer Fraud Act ("Vermont CFA") makes unlawful "[u]nfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce.…" VT. STAT. ANN. TIT. 9, § 2453(a). New GM engaged in unfair and deceptive acts or practices in trade or commerce in violation of the Vermont CFA by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles.

2962. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2963. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

2964. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

2965. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

2966. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Vermont CFA.

2967. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

2968. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

2969. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Vermont Class.

2970. New GM knew or should have known that its conduct violated the Vermont CFA.

2971. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

2972. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

2973. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

2974. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Vermont Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

2975. Plaintiffs and the Vermont Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

2976. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

2977. As a direct and proximate result of New GM's violations of the Vermont CFA, Plaintiffs and the Vermont Class have suffered injury-in-fact and/or actual damage.

2978. Plaintiffs and the Vermont Class are entitled to recover "appropriate equitable relief" and "the amount of [their] damages, or the consideration or the value of the consideration given by [them], reasonable attorney's fees, and exemplary damages not exceeding three times the value of the consideration given by [them]" pursuant to VT. STAT. ANN. TIT. 9, § 2461(b).

COUNT II

FRAUD BY CONCEALMENT

2979. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2980. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Vermont residents (the "Vermont Class").

2981. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

2982. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

2983. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

2984. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

2985. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Vermont Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Vermont Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

2986. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Vermont Class.

2987. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Vermont Class and conceal material information regarding defects that exist in GM-branded vehicles.

2988. Plaintiffs and the Vermont Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Vermont Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Vermont Class.

2989. Because of the concealment and/or suppression of the facts, Plaintiffs and the Vermont Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

2990. The value of all Vermont Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

2991. Accordingly, New GM is liable to the Vermont Class for their damages in an amount to be proven at trial.

2992. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Vermont Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

VIRGINIA

COUNT I

VIOLATION OF VIRGINIA CONSUMER PROTECTION ACT

(VA. CODE ANN. 15 §§ 59.1-196, *et seq.*)

2993. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

2994. This claim is brought only on behalf of Nationwide Class members who are Virginia residents (the "Virginia Class").

2995. New GM is a "supplier" under VA. CODE ANN. § 59.1-198.

2996. The sale of the Affected Vehicles to the Class members was a "consumer transaction" within the meaning of VA. CODE ANN. § 59.1-198.

2997. The Virginia Consumer Protection Act ("Virginia CPA") lists prohibited "practices" which include: "5. Misrepresenting that good or services have certain characteristics;" "6. Misrepresenting that goods or services are of a particular standard, quality, grade style, or model;" "8. Advertising goods or services with intent not to sell them as advertised, or with intent not to sell at the price or upon the terms advertised;" "9. Making false or misleading statements of fact concerning the reasons for, existence of, or amounts of price reductions;" and "14. Using any other deception, fraud, or misrepresentation in connection with a consumer transaction." VA. CODE ANN. § 59.1-200. New GM violated the Virginia CPA by misrepresenting that Affected Vehicles had certain quantities, characteristics, ingredients, uses, or benefits; misrepresenting that Affected Vehicles were of a particular standard, quality, grade, style, or model when they were another; advertising Affected Vehicles with intent not to sell them as advertised; and otherwise "using any other deception, fraud, false pretense, false promise, or misrepresentation in connection with a consumer transaction.

2998. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

2999. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

3000. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

3001. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

3002. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself

as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Virginia CPA.

3003. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

3004. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

3005. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Virginia Class.

3006. New GM knew or should have known that its conduct violated the Virginia CPA.

3007. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

3008. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the

> ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

3009. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

3010. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Virginia Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

3011. Plaintiffs and the Virginia Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

3012. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

3013. As a direct and proximate result of New GM's violations of the Virginia CPA, Plaintiffs and the Virginia Class have suffered injury-in-fact and/or actual damage.

3014. Pursuant to VA. CODE ANN. § 59.1-204, Plaintiffs and the Virginia Class seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $500 for each Plaintiff and each Virginia Class member. Because New GM's conduct was committed willfully and knowingly, Plaintiffs are entitled to recover, for each Plaintiff and each Virginia Class member, the greater of (a) three times actual damages or (b) $1,000.

3015. Plaintiffs also seek an order enjoining New GM's unfair and/or deceptive acts or practices, punitive damages, and attorneys' fees, and any other just and proper relief available under General Business Law § 59.1-204, *et seq*.

COUNT II

FRAUD BY CONCEALMENT

3016. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3017. In the event the Court declines to certify a Nationwide Class under Michigan law, this claims is brought only on behalf of Nationwide Class members who are Virginia residents (the "Virginia Class").

3018. New GM concealed and suppressed material facts concerning the quality of its vehicles and the New GM brand.

3019. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

3020. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

3021. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

3022. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Virginia Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Virginia Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

3023. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Virginia Class.

3024. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Virginia Class and conceal material information regarding defects that exist in GM-branded vehicles.

3025. Plaintiffs and the Virginia Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Virginia Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Virginia Class.

3026. Because of the concealment and/or suppression of the facts, Plaintiffs and the Virginia Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

3027. The value of all Virginia Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

3028. Accordingly, New GM is liable to the Virginia Class for their damages in an amount to be proven at trial.

3029. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Virginia Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(VA. CODE ANN. § 8.2-314)

3030. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3031. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Virginia residents who are members of the Ignition Switch Defect Subclass (the "Virginia Ignition Switch Defect Subclass").

3032. New GM was at all relevant times a merchant with respect to motor vehicles.

3033. New GM impliedly warranted that its vehicles were of good and merchantable quality and fit, and safe for their ordinary intended use—transporting the driver and passengers in reasonable safety during normal operation, and without unduly endangering them or members of the public.

3034. These vehicles, when sold and at all times thereafter, were not merchantable and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

3035. As a direct and proximate result of the New GM's breach of the implied warranty of merchantability, Plaintiffs and the Virginia Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

WASHINGTON

COUNT I

VIOLATION OF THE CONSUMER PROTECTION ACT

(REV. CODE WASH. ANN. §§ 19.86.010, *et seq.*)

3036. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3037. This claim is brought only on behalf of Nationwide Class members who are Washington residents (the "Washington Class").

3038. New GM committed the acts complained of herein in the course of "trade" or "commerce" within the meaning of WASH. REV. CODE. WASH. ANN. § 19.96.010.

3039. The Washington Consumer Protection Act ("Washington CPA") broadly prohibits "[u]nfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." WASH. REV. CODE. WASH. ANN. § 19.96.010. New GM engaged in unfair and deceptive acts and practices and violated the Washington CPA by systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles.

3040. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

3041. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports,

investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

3042. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

3043. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

3044. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the Washington CPA.

3045. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

3046. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-

branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

3047. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Washington Class.

3048. New GM knew or should have known that its conduct violated the Washington CPA.

3049. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

3050. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

3051. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

3052. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Washington Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

3053. Plaintiffs and the Washington Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

3054. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

3055. As a direct and proximate result of New GM's violations of the Washington Act, Plaintiffs and the Washington Class have suffered injury-in-fact and/or actual damage.

3056. New GM is liable to Plaintiffs and the Class for damages in amounts to be proven at trial, including attorneys' fees, costs, and treble damages, as well as any other remedies the Court may deem appropriate under REV. CODE. WASH. ANN. § 19.86.090.

COUNT II

FRAUD BY CONCEALMENT

3057. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3058. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Washington residents (the "Washington Class").

3059. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

3060. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

3061. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

3062. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

3063. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Washington Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Washington Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

3064. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Washington Class.

3065. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Washington Class and conceal material information regarding defects that exist in GM-branded vehicles.

3066. Plaintiffs and the Washington Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Washington Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Washington Class.

3067. Because of the concealment and/or suppression of the facts, Plaintiffs and the Washington Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

3068. The value of all Washington Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the New GM brand and made any reasonable consumer reluctant to

purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

3069. Accordingly, New GM is liable to the Washington Class for their damages in an amount to be proven at trial.

3070. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Washington Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

WEST VIRGINIA

COUNT I

VIOLATIONS OF THE CONSUMER CREDIT AND PROTECTION ACT

(W. VA. CODE § 46A-1-101, *et seq.*)

3071. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3072. This claim is brought only on behalf of Nationwide Class members who are West Virginia residents (the "West Virginia Class").

3073. New GM is a "person" under W.VA. CODE § 46A-1-102(31).

3074. Plaintiff and the West Virginia Class are "consumers," as defined by W.VA. CODE §§ and 46A-1-102(12) and 46A-6-102(2), who purchased or leased one or more Affected Vehicles.

3075. New GM engaged in trade or commerce as defined by W. VA. CODE § 46A-6-102(6).

3076. The West Virginia Consumer Credit and Protection Act ("West Virginia CCPA") prohibits "unfair or deceptive acts or practices in the conduct of any trade or commerce …." W. VA. CODE § 46A-6-104. Without limitation, "unfair or deceptive" acts or practices include:

> (I) Advertising goods or services with intent not to sell them as advertised;
>
> (K) Making false or misleading statements of fact concerning the reasons for, existence of or amounts of price reductions;
>
> (L) Engaging in any other conduct which similarly creates a likelihood of confusion or of misunderstanding;
>
> (M) The act, use or employment by any person of any deception, fraud, false pretense, false promise or misrepresentation, or the concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any goods or services, whether or not any person has in fact been misled, deceived or damaged thereby;
>
> (N) Advertising, printing, displaying, publishing, distributing or broadcasting, or causing to be advertised, printed, displayed, published, distributed or broadcast in any manner, any statement or representation with regard to the sale of goods or the extension of consumer credit including the rates, terms or conditions for the sale of such goods or the extension of such credit, which is false, misleading or deceptive or which omits to state material information which is necessary to make the statements therein not false, misleading or deceptive;

W. VA. CODE § 46A-6-102(7).

3077. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in deceptive business practices prohibited by the West Virginia CCPA, including: (1) representing that the Affected Vehicles have characteristics, uses,

benefits, and qualities which they do not have; (2) representing that the Affected Vehicles are of a particular standard, quality, and grade when they are not; (3) advertising the Affected Vehicles with the intent not to sell them as advertised; (4) representing that a transaction involving the Affected Vehicles confers or involves rights, remedies, and obligations which it does not; and (5) representing that the subject of a transaction involving the Affected Vehicles has been supplied in accordance with a previous representation when it has not.

3078. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

3079. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

3080. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

3081. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

3082. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in unfair and deceptive business practices in violation of the West Virginia CCPA.

3083. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

3084. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the New GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

3085. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the West Virginia Class.

3086. New GM knew or should have known that its conduct violated the West Virginia Act.

3087. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

3088. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

3089. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

3090. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the West Virginia Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

3091. Plaintiffs and the West Virginia Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have

purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

3092. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

3093. As a direct and proximate result of New GM's violations of the West Virginia CCPA, Plaintiffs and the West Virginia Class have suffered injury-in-fact and/or actual damage.

3094. Pursuant to W. VA. CODE § 46A-1-106, Plaintiffs seek monetary relief against New GM measured as the greater of (a) actual damages in an amount to be determined at trial and (b) statutory damages in the amount of $200 per violation of the West Virginia CCPA for each Plaintiff and each member of the West Virginia Class they seek to represent.

3095. Plaintiffs also seek punitive damages against New GM because New GM carried out despicable conduct with willful and conscious disregard of the rights and safety of others, subjecting Plaintiffs to cruel and unjust hardship as a result. New GM intentionally and willfully misrepresented the safety and reliability of the Affected Vehicles, deceived Plaintiffs on life-or-death matters, and concealed material facts that only New GM knew, all to avoid the expense and public relations nightmare of correcting a deadly flaw in the vehicles New GM repeatedly promised Plaintiffs were safe. New GM's unlawful conduct constitutes malice, oppression, and fraud warranting punitive damages.

3096. Plaintiffs further seek an order enjoining New GM's unfair or deceptive acts or practices, restitution, punitive damages, costs of Court, attorney's fees under W. VA. CODE § 46A-5-101, *et seq.*, and any other just and proper relief available under the West Virginia CCPA.

3097. On October 8, 2014, certain Plaintiffs sent a letter complying with W. VA. CODE § 46A-6-106(b). Plaintiffs presently do not claim relief under the West Virginia CCPA until and unless New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the West Virginia Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

3098. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3099. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are West Virginia residents (the "West Virginia Class").

3100. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

3101. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

3102. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

3103. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

3104. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the West Virginia Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the West Virginia Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

3105. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the West Virginia Class.

3106. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the West Virginia Class and conceal material information regarding defects that exist in GM-branded vehicles.

3107. Plaintiffs and the West Virginia Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the West Virginia Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the West Virginia Class.

3108. Because of the concealment and/or suppression of the facts, Plaintiffs and the West Virginia Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded

vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

3109. The value of all West Virginia Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

3110. Accordingly, New GM is liable to the West Virginia Class for their damages in an amount to be proven at trial.

3111. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the West Virginia Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF IMPLIED WARRANTY OF MERCHANTABILITY

(W. VA. CODE § 46-2-314)

3112. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3113. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of West Virginia residents who are members of the Ignition Switch Defect Subclass (the "West Virginia Ignition Switch Defect Subclass").

3114. New GM was at all relevant times a seller of motor vehicles under W. VA. CODE § 46-2-314, and was also a "merchant" as the term is used in W. VA. CODE § 46A-6-107 and § 46-2-314.

3115. Under W. VA. CODE § 46-2-314, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied by law when Plaintiffs and the Class purchased their Defective Ignition Switch Vehicles.

3116. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

3117. New GM was provided notice of these issues by numerous complaints filed against it, its own internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the West Virginia Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

3118. As a direct and proximate result of New GM's breach of the warranty of merchantability, Plaintiffs and the West Virginia Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

WISCONSIN

COUNT I

VIOLATIONS OF THE WISCONSIN DECEPTIVE TRADE PRACTICES ACT

(WIS. STAT. § 110.18)

3119. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3120. This claim is brought only on behalf of Nationwide Class members who are Wisconsin residents (the "Wisconsin Class").

3121. New GM is a "person, firm, corporation or association" within the meaning of WIS. STAT. § 100.18(1).

3122. Plaintiffs and Wisconsin Class members are members of "the public" within the meaning of WIS. STAT. § 100.18(1). Plaintiffs and Wisconsin Class members purchased or leased one or more Affected Vehicles.

3123. The Wisconsin Deceptive Trade Practices Act ("Wisconsin DTPA") prohibits a "representation or statement of fact which is untrue, deceptive or misleading." WIS. STAT. § 100.18(1). By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles, New GM engaged in unfair and deceptive acts and practices and violated the Wisconsin DTPA.

3124. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or

concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

3125. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

3126. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

3127. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

3128. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Wisconsin DTPA.

3129. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles

were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

3130. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

3131. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Wisconsin Class.

3132. New GM knew or should have known that its conduct violated the Wisconsin DTPA.

3133. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

3134. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

3135. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed,

the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

3136. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Wisconsin Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

3137. Plaintiffs and the Wisconsin Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

3138. New GM' violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

3139. As a direct and proximate result of New GM's violations of the Wisconsin DTPA, Plaintiffs and the Wisconsin Class have suffered injury-in-fact and/or actual damage.

3140. Plaintiffs and the Wisconsin Class are entitled to damages and other relief provided for under WIS. STAT. § 110.18(11)(b)(2). Because New GM's conduct was committed knowingly and/or intentionally, Plaintiffs` and the Wisconsin Class are entitled to treble damages.

3141. Plaintiffs and the Wisconsin Class also seek court costs and attorneys' fees under WIS. STAT. § 110.18(11)(b)(2).

COUNT II

FRAUD BY CONCEALMENT

3142. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3143. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Nationwide Class members who are Wisconsin residents (the "Wisconsin Class").

3144. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

3145. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

3146. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

3147. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

3148. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Wisconsin Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Wisconsin Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

3149. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Wisconsin Class.

3150. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Wisconsin Class and conceal material information regarding defects that exist in GM-branded vehicles.

3151. Plaintiffs and the Wisconsin Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Wisconsin Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Wisconsin Class.

3152. Because of the concealment and/or suppression of the facts, Plaintiffs and the Wisconsin Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less

for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

3153. 3154. Accordingly, New GM is liable to the Wisconsin Class for their damages in an amount to be proven at trial.

3155. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Wisconsin Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

WYOMING

COUNT I

VIOLATION OF THE WYOMING CONSUMER PROTECTION ACT

(WYO. STAT. §§ 40-12-105 *et seq.*)

3156. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3157. This claim is brought only on behalf of Nationwide Class members who are Wyoming residents (the "Wyoming Class").

3158. Plaintiffs, Wyoming Class members, and New GM are "persons" within the meaning of WYO. STAT. § 40-12-102(a)(i).

3159. The sales of the Affected Vehicles to Plaintiffs and the Wyoming Class were "consumer transactions" within the meaning of WYO. STAT. § 40-12-105.

3160. Under the Wyoming Consumer Protection Act ("Wyoming CPA"), a person engages in a deceptive trade practice when, in the course of its business and in connection with a consumer transaction it knowingly: "(iii) Represents that merchandise is of a particular standard, grade, style or model, if it is not"; "(v) Represents that merchandise has been supplied in accordance with a previous representation, if it has not…"; "(viii) Represents that a consumer transaction involves a warranty, a disclaimer of warranties, particular warranty terms, or other rights, remedies or obligations if the representation is false"; "(x) Advertises merchandise with intent not to sell it as advertised"; or "(xv) Engages in unfair or deceptive acts or practices." WYO. STAT. § 45-12-105.

3161. By systematically devaluing safety and concealing a plethora of defects in GM-branded vehicles as described above, New GM violated the Wyoming CPA. New GM engaged in deceptive trade practices, including (among other things) representing that the Affected Vehicles are of a particular standard and grade, which they are not; advertising the Affected Vehicles with the intent not to sell them as advertised; and overall engaging in unfair and deceptive acts or practices.

3162. In the course of its business, New GM systematically devalued safety and concealed a plethora of defects in GM-branded vehicles as described herein and otherwise engaged in activities with a tendency or capacity to deceive. New GM also engaged in unlawful trade practices by employing deception, deceptive acts or practices, fraud, misrepresentations, or concealment, suppression or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale of the Affected Vehicles.

3163. From the date of its inception on July 10, 2009, New GM knew of many serious defects affecting many models and years of GM-branded vehicles, both because of the knowledge of Old GM personnel who remained at New GM and continuous reports, investigations, and notifications from regulatory authorities. New GM became aware of other serious defects and systemic safety issues years ago, but concealed all of that information until recently.

3164. New GM was also aware that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured and the failure to disclose and remedy defects in all GM-branded vehicles. New GM concealed this information as well.

3165. According to one report from the Center for Auto Safety, some 2,004 deaths and injuries are connected with recently recalled GM-branded vehicles, and New GM should have recalled the vehicles years ago.

3166. By failing to disclose and by actively concealing the many defects in GM-branded vehicles, by marketing its vehicles as safe, reliable, and of high quality, and by presenting itself as a reputable manufacturer that valued safety and stood behind its vehicles after they were sold, New GM engaged in deceptive business practices in violation of the Wyoming CPA.

3167. In the course of New GM's business, it willfully failed to disclose and actively concealed the dangerous risk posed by the many safety issues and serious defects discussed above. New GM compounded the deception by repeatedly asserting that the Affected Vehicles were safe, reliable, and of high quality, and by claiming to be a reputable manufacturer that valued safety and stood behind its vehicles once they are on the road.

3168. New GM's unfair or deceptive acts or practices were likely to and did in fact deceive reasonable consumers, including Plaintiffs, about the true safety and reliability of GM-branded vehicles, the quality of the GM brand, the devaluing of safety at New GM, and the true value of the Affected Vehicles.

3169. New GM intentionally and knowingly misrepresented material facts regarding the Affected Vehicles with an intent to mislead Plaintiffs and the Wyoming Class.

3170. New GM knew or should have known that its conduct violated the Wyoming CPA.

3171. As alleged above, New GM made material statements about the safety and reliability of the Affected Vehicles that were either false or misleading.

3172. New GM owed Plaintiffs a duty to disclose the true safety and reliability of the Affected Vehicles and the devaluing of safety at New GM, because New GM:

a. Possessed exclusive knowledge that it valued cost-cutting over safety, selected parts from the cheapest supplier regardless of quality, and actively discouraged employees from finding and flagging known safety defects, and that this approach would necessarily cause the existence of more defects in the vehicles it designed and manufactured;

b. Intentionally concealed the foregoing from Plaintiffs; and/or

c. Made incomplete representations about the safety and reliability of the Affected Vehicles generally, and the ignition switch in particular, while purposefully withholding material facts from Plaintiffs that contradicted these representations.

3173. Because New GM fraudulently concealed the many defects in GM-branded vehicles, resulting in a raft of negative publicity once the defects finally began to be disclosed, the value of the Affected Vehicles has greatly diminished. In light of the stigma attached to

those vehicles by New GM's conduct, they are now worth significantly less than they otherwise would be.

3174. New GM's systemic devaluation of safety and its concealment of a plethora of defects in GM-branded vehicles were material to Plaintiffs and the Wyoming Class. A vehicle made by a reputable manufacturer of safe vehicles is worth more than an otherwise comparable vehicle made by a disreputable manufacturer of unsafe vehicles that conceals defects rather than promptly remedies them.

3175. Plaintiffs and the Wyoming Class suffered ascertainable loss caused by New GM's misrepresentations and its failure to disclose material information. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's misconduct.

3176. New GM's violations present a continuing risk to Plaintiffs as well as to the general public. New GM's unlawful acts and practices complained of herein affect the public interest.

3177. As a direct and proximate result of New GM's violations of the Wyoming CPA, Plaintiffs and the Wyoming Class have suffered injury-in-fact and/or actual damage.

3178. Pursuant to WYO. STAT. § 40-12-108(a), Plaintiffs and the Wyoming Class seek monetary relief against New GM measured as actual damages in an amount to be determined at trial, in addition to any other just and proper relief available under the Wyoming CPA.

3179. On October 8, 2014, certain Plaintiffs sent a letter complying with WYO. STAT. §§ 45-12-109. Plaintiffs presently do not claim relief under the Wyoming CPA until and unless

New GM fails to remedy its unlawful conduct within the requisite time period, after which Plaintiffs seek all damages and relief to which Plaintiffs and the Wyoming Class are entitled.

COUNT II

FRAUD BY CONCEALMENT

3180. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3181. In the event the Court declines to certify a Nationwide Class under Michigan law, this claim is brought only on behalf of Natiownwide Class members who are Wyoming residents (the "Wyoming Class").

3182. New GM concealed and suppressed material facts concerning the quality of its vehicles and the GM brand.

3183. New GM concealed and suppressed material facts concerning the culture of New GM—a culture characterized by an emphasis on cost-cutting, the studious avoidance of safety issues, and a shoddy design process.

3184. New GM concealed and suppressed material facts concerning the many serious defects plaguing GM-branded vehicles, and that it valued cost-cutting over safety and took steps to ensure that its employees did not reveal known safety defects to regulators or consumers.

3185. New GM did so in order to boost confidence in its vehicles and falsely assure purchasers and lessors of its vehicles that New GM was a reputable manufacturer that stands behind its vehicles after they are sold and that its vehicles are safe and reliable. The false representations were material to consumers, both because they concerned the quality and safety of the Affected Vehicles and because they played a significant role in the value of the vehicles.

3186. New GM had a duty to disclose the many defects in GM-branded vehicles because they were known and/or accessible only to New GM who had superior knowledge and

access to the facts, and New GM knew the facts were not known to or reasonably discoverable by Plaintiffs and the Wyoming Class. These omitted and concealed facts were material because they directly impact the value of the Affected Vehicles purchased or leased by Plaintiffs and the Wyoming Class. Whether a manufacturer's products are safe and reliable, and whether that manufacturer stands behind its products, are material concerns to a consumer.

3187. New GM actively concealed and/or suppressed these material facts, in whole or in part, to protect its profits and avoid recalls that would hurt the brand's image and cost New GM money, and it did so at the expense of Plaintiffs and the Wyoming Class.

3188. On information and belief, New GM has still not made full and adequate disclosure and continues to defraud Plaintiffs and the Wyoming Class and conceal material information regarding defects that exist in GM-branded vehicles.

3189. Plaintiffs and the Wyoming Class were unaware of these omitted material facts and would not have acted as they did if they had known of the concealed and/or suppressed facts. Plaintiffs' and the Wyoming Class's actions were justified. New GM was in exclusive control of the material facts and such facts were not known to the public, Plaintiffs, or the Wyoming Class.

3190. Because of the concealment and/or suppression of the facts, Plaintiffs and the Wyoming Class sustained damage because they own vehicles that diminished in value as a result of New GM's concealment of, and failure to timely disclose, the serious defects in millions of GM-branded vehicles and the serious safety and quality issues engendered by New GM's corporate policies. Had they been aware of the many defects that existed in GM-branded vehicles, and the company's callous disregard for safety, Plaintiffs either would have paid less for their vehicles or would not have purchased or leased them at all. Plaintiffs did not receive the benefit of their bargain as a result of New GM's fraudulent concealment.

3191. The value of all Wyoming Class members' vehicles has diminished as a result of New GM's fraudulent concealment of the many defects and its systemic safety issues which has greatly tarnished the GM brand and made any reasonable consumer reluctant to purchase any of the Affected Vehicles, let alone pay what otherwise would have been fair market value for the vehicles.

3192. Accordingly, New GM is liable to the Wyoming Class for their damages in an amount to be proven at trial.

3193. New GM's acts were done maliciously, oppressively, deliberately, with intent to defraud, and in reckless disregard of Plaintiffs' and the Wyoming Class's rights and well-being to enrich New GM. New GM's conduct warrants an assessment of punitive damages in an amount sufficient to deter such conduct in the future, which amount is to be determined according to proof.

COUNT III

BREACH OF THE IMPLIED WARRANTY OF MERCHANTABILITY

(WYO. STAT. §§ 34.1-2-314)

3194. Plaintiffs reallege and incorporate by reference all paragraphs as though fully set forth herein.

3195. In the event the Court declines to certify a Nationwide Ignition Switch Defect Subclass under the Magnuson-Moss Warranty Act or Michigan law, this claim is brought only on behalf of Wyoming residents who are members of the Ignition Switch Defect Subclass (the "Wyoming Ignition Switch Defect Subclass").

3196. New GM was at all relevant times a merchant with respect to motor vehicles.

3197. Under Wyoming law, a warranty that the Defective Ignition Switch Vehicles were in merchantable condition was implied when Class members purchased their Defective Ignition Switch Vehicles.

3198. These vehicles, when sold and at all times thereafter, were not in merchantable condition and are not fit for the ordinary purpose for which cars are used. Specifically, the Defective Ignition Switch Vehicles are inherently defective in that there are defects in the ignition switch systems that permit sudden unintended shutdown to occur, with the attendant shut down of power steering and power brakes and the nondeployment of airbags in the event of a collision.

3199. New GM was provided notice of these issues by numerous complaints filed against it, its own internal investigations, and by numerous individual letters and communications sent by Plaintiffs and the Wyoming Ignition Switch Defect Subclass before or within a reasonable amount of time after New GM issued the recall and the allegations of vehicle defects became public.

3200. As a direct and proximate result of New GM's breach of the warranty of merchantability, Plaintiffs and the Wyoming Ignition Switch Defect Subclass have been damaged in an amount to be proven at trial.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs, individually and on behalf all others similarly situated, respectfully request that this Court enter a judgment against New GM and in favor of Plaintiffs and the Classes and Subclasses, and grant the following relief:

A. Determine that this action may be maintained as a class action and certify it as such under Rule 23(b)(2) and/or 23(b)(3), or alternatively certify all issues and claims that are

appropriately certified; and designate and appoint Plaintiffs as Class Representatives and Plaintiffs' chosen counsel as Class Counsel;

B. Declare, adjudge, and decree the conduct of New GM as alleged herein to be unlawful, unfair, and/or deceptive and otherwise in violation of law, enjoin any such future conduct, and issue an injunction under which the Court will monitor New GM's response to problems with the recalls and efforts to improve its safety processes, and will establish by Court decree and administration under Court supervision a program funded by New GM under which claims can be made and paid for Ignition Switch Defect Subclass members' out-of-pocket expenses and costs;

C. Award Plaintiffs and Class members actual, compensatory damages or, in the alternative, statutory damages, as proven at trial;

D. Award Plaintiffs and the Class members exemplary damages in such amount as proven;

E. Award damages and other remedies, including but not limited to statutory penalties, as allowed by the consumer laws of the various states;

F. Award Plaintiffs and the Class members their reasonable attorneys' fees, costs, and pre-judgment and post-judgment interest;

G. Award Plaintiffs and Class members restitution and/or disgorgement of New GM's ill-gotten gains relating to the conduct described in this Complaint; and

H. Award Plaintiffs and the Class members such other further and different relief as the case may require or as determined to be just, equitable, and proper by this Court.

IX. JURY TRIAL DEMAND

Plaintiffs request a trial by jury on the legal claims, as set forth herein.

IN RE:

GENERAL MOTORS LLC IGNITION SWITCH LITIGATION

This Document Relates to All Actions

14-MD-2543 (JMF)

DECLARATION OF MARC KOPPELMAN RE: VENUE

----------x

I, Marc Koppelman, hereby declare and state as follows:

1. I have personal knowledge of the facts stated herein and, if necessary, could competently testify thereto.

2. I am a Plaintiff in the above-entitled action.

3. Pursuant to Cal. Civ. Code § 1780(d), I make this declaration in support of the Class Action Complaint and the claim therein for relief under Cal. Civ. Code § 1780(a).

4. This action for relief under Cal. Civ. Code § 1780(a) has been properly commenced in this Court pursuant to the Court's direction that new plaintiffs can file directly in the MDL without first filing in the district in which they reside; hence, I am filing this action as if it had been filed in the Central District of California, in a county that is a proper place for trial of this action because Defendant does business there and throughout the State of California.

5. The Complaint filed in this matter contains causes of action for violations of the Consumers Legal Remedies Act against General Motors, LLC ("GM"), a Delaware limited liability company doing business nationwide, including California.

6. I own a 2010 Chevy HHR which I purchased used at a Chevrolet dealership in Glen Burnie, Maryland on March 17, 2012.

7. I declare under penalty of perjury under the laws of the State of California that the foregoing Declaration is true and correct, and was executed by me in the city of Torrance, California, on October 14, 2014.

COUNSEL FOR THE PARTIES ARE LISTED IN THE SIGNATURE BLOCK

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11**
MOTORS LIQUIDATION COMPANY, *et al.*, f/k/a General Motors Corp., *et al.*	:	**Case No.: 09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

AGREED AND DISPUTED STIPULATIONS OF FACT PURSUANT TO THE COURT'S SUPPLEMENTAL SCHEDULING ORDER, DATED JULY 11, 2014

Counsel for the Identified Parties[1] hereby provide, pursuant to the Supplemental Scheduling Order, their agreed-upon[2] and disputed Stipulations of Fact relating to the Four Threshold Issues,[3] as defined in the Supplemental Scheduling Order.

Upon consent of all of the Counsel for the Identified Parties, or upon approval by the Court after good cause shown, any party (a) may seek to amend or modify these agreed-upon factual stipulations, or (b) may use documents, testimony or other evidence that is not specifically referenced in these stipulations including documents produced after the date of these stipulations. It should also be noted that while Counsel for the Identified Parties agreed to the accuracy of the factual stipulations set forth below, in certain instances, they could not agree that such factual stipulations are relevant and/or are admissible evidence for the Court's

---

1 As defined in the *Supplemental Scheduling Order Regarding (I) Motion Of General Motors LLC Pursuant To 11 U.S.C. §§ 105 And 363 To Enforce The Court's July 5, 2009 Sale Order And Injunction, (II) Objection Filed By Certain Plaintiffs In Respect Thereto, And (III) Adversary Proceeding No. 14-01929*, which was entered by the Court on July 11, 2014 ("**Supplemental Scheduling Order**").

2 Each of the Counsel for the Identified Parties reserves the right to rely on any of the stipulations of fact agreed upon by Counsel for the Identified Parties in support of any of the Four Threshold Issues.

3 For the avoidance of doubt, the issue of whether a claim asserted in the Ignition Switch Actions is timely and/or meritorious against the Old GM bankruptcy estate (and/or the GUC Trust) is not a Threshold Issue.

determination of the Four Threshold Issues. The parties have reserved their relevance and/or other evidentiary objections (including hearsay, privilege or other types of admissibility objections) to such factual stipulations. After a party understands how such factual stipulations will be asserted by another party in its pleadings and/or briefs relating to the Four Threshold Issues, it may ask the Court for an evidentiary ruling as to its admissibility prior to the oral argument on the Four Threshold Issues. Any party's failure to object to the use of such factual stipulations with respect to the Court's determination of the Four Threshold Issues shall not be deemed a waiver on relevance and/or other evidentiary objections (including hearsay, privilege or other types of admissibility objections) with respect to the use of such factual stipulations (including without limitation the documents or testimony which support such factual stipulations) for any other purpose in any proceeding before the Bankruptcy Court, the Court in MDL 2543, any other court or tribunal, or otherwise.

Counsel for the Identified Parties agree that each may refer to the following categories of documents and/or pleadings in connection with the Court's determination of the Four Threshold Issues. All such documents speak for themselves.

a. All pleadings, briefs, declarations, affidavits, orders, decisions, evidence admitted by the Bankruptcy Court, reports filed by the GUC Trust, and deposition and hearing transcripts in adversary proceedings or contested matters arising under, in, or related to the Old GM bankruptcy case, including without limitation, appeals of any decisions emanating from the Bankruptcy Court.

b. All filings with the Securities and Exchange Commission by Old GM, New GM and the GUC Trust.

c. All press releases issued by Old GM, New GM and the GUC Trust.

d. The GUC Trust Agreement, and any amendments thereto.

e. The complaints (and any amendments thereof) filed in the Ignition Switch Actions, and any pleadings filed with the United States District Court for the

Southern District of New York, 14-MD-2543 (JMF); 14-MC-2543 ("**MDL Court**").

f. Information contained on Bloomberg Financial with respect to the share price and trading volume of the GUC Trust Units, New GM stock and warrants.

Counsel for the Identified Parties also agree on the following definitions[4] for each of their Stipulations of Fact:

a. "**Ignition Switch**" shall mean an ignition switch designed and/or sold by Old GM in the Subject Vehicles that may unintentionally move out of the "run" position, resulting in a partial loss of electrical power and turning off the engine. (Consent Order, In re TQ14-001, NHTSA Recall No. 14V-047 (Dep't of Transp., Nat'l Highway Safety Admin. Dated May 16, 2014 ("**Consent Order**") at 2, ¶¶5; Part 573 Defect Notice filed by New GM with the National Highway Traffic Safety Administration ("**NHTSA**"), dated February 7, 2014.).

b. "**Subject Vehicles**" are (1) 2005-2007 Chevrolet Cobalt and Pontiac G5, 2003-2007 Saturn Ion, 2006-2007 Chevrolet HHR, 2005-2006 Pontiac Pursuit (Canada), 2006-2007 Pontiac Solstice and 2007 Saturn Sky vehicles; and (2) 2008-2010 Pontiac Solstice and G5; 2008-2010 Saturn Sky; 2008-2010 Chevrolet Cobalt; and 2008-2011 Chevrolet HHR vehicles -- certain of the vehicles in this second category may have been repaired using a defective Ignition Switch that had been sold to dealers or aftermarket wholesalers. Statements about the Ignition Switch apply to the Subject Vehicles listed in the second category only to the extent that the Subject Vehicles were actually repaired using a defective Ignition Switch. (Part 573 Defect Notices filed by New GM with the NHTSA, dated February 7, 2014, February 24, 2014, and March 28, 2014, hereinafter "**Feb. 7 Notice**", "**Feb. 24 Notice**", and "**March 28 Notice**").

Attached to this document are (a) New GM's agreed-upon factual stipulations, and disputed factual stipulations (Exhibit "A"), (b) Designated Counsel/Groman Plaintiffs agreed-upon factual stipulations and Designated Counsel's disputed factual stipulations (Exhibit "B"), (C) Groman Plaintiffs' disputed factual stipulations (Exhibit "C"), and (D) the GUC Trust/Unitholders agreed-upon factual stipulations and disputed factual stipulations (Exhibit "D").

---

[4] The definitions in these stipulations of fact are agreed to for the sole purpose of the Four Threshold Issues identified by the Bankruptcy Court in its Supplemental Scheduling Order. Counsel for the Identified Parties do not stipulate to the definitions set forth in these stipulations for any other purpose in either the Bankruptcy Court, in MDL 2543, or otherwise.

GENERAL MOTORS LLC'S AGREED-UPON STIPULATIONS OF FACT IN CONNECTION WITH THE FOUR THRESHOLD ISSUES IDENTIFIED IN THIS COURT'S JULY 11, 2014 SUPPLEMENTAL SCHEDULING ORDER[1]

Pursuant to this Court's *Supplemental Scheduling Order, Dated July 11, 2014, Regarding (i) the Motion of General Motors LLC Pursuant to 11 U.S.C. §§ 105 and 363 to Enforce the Court's July 5, 2009 Sale Order and Injunction, (ii) the Objection Filed by Certain Plaintiffs in Respect Thereto, and (iii) Adversary Proceeding No. 14-01929* (the "**Supplemental Scheduling Order**"), General Motors LLC ("**New GM**"), hereby submits the following agreed-upon stipulations of fact concerning the Four Threshold Issues.

In addition, annexed hereto as Exhibit "1" are New GM's proposed stipulation of fact that have not been agreed to by the other Counsel for the Identified Parties, and annexed hereto as Exhibit "2" are New GM's responses to proposed stipulation of fact identified by other Counsel for the Identified Parties that have not been agreed to by New GM.

[1] Unless otherwise indicated, capitalized terms not defined herein shall have the meanings ascribed to them in the Supplemental Scheduling Order (as defined herein).

AGREED-UPON STIPULATIONS OF FACT

1. In March 2009, the U.S. Government gave Old GM sixty days to submit a viable restructuring plan or, otherwise, Old GM would be forced to liquidate.

2. On June 1, 2009 ("**Petition Date**"), General Motors Corporation ("**Old GM**") and three of its direct and indirect subsidiaries, Saturn, LLC, n/k/a MLCS, LLC ("**MLCS**"), Saturn Distribution Corporation, n/k/a MLCS Distribution Corporation ("**MLCS Distribution**"), and Chevrolet-Saturn of Harlem Inc., n/k/a MLC of Harlem, Inc. ("**MLCS Harlem**" and collectively with Old GM, MLCS, and MLCS Distribution, the "**Debtors**") commenced cases under chapter 11 of title 11 of the United States Code in the United States Bankruptcy Court for the Southern District of New York (the "**Bankruptcy Court**" or "**Court**").

3. Frederick Henderson, former CEO of Old GM, testified as follows: "The U.S. Treasury, in late December 2008, provided the necessary financing to temporarily sustain Old GM's operations. The U.S. Treasury, however, provided such financing on the express condition that Old GM develop a business plan that would fundamentally transform Old GM (operationally and financially) into a viable and profitable American OEM capable of meeting the competitive and environmental challenges of the 21st century. Thereafter, in March 2009, the U.S. Treasury indicated that, if Old GM was unable to complete an effective out-of-court restructuring, it should consider a new, more aggressive viability plan under an expedited Court-supervised process to avoid erosion of asset value. After exploring numerous options, including seeking potential sources of financing (both public and private) and strategic alliances, it became evident that, in light of the ongoing economic crisis, Old GM would not be able to achieve an effective out-of-court restructuring, and the only viable option was the 363 Transaction." *Affidavit of*

Frederick A. Henderson Pursuant to Local Bankruptcy Rule 1007-2 ("**Henderson Affidavit**") (Dkt. No. 21), ¶¶ 13-14.

4. This Court found in its Sale Decision, "[a]t the time that the U.S. Treasury first extended credit to GM, there was absolutely no other source of financing available. No party other than Treasury conveyed its willingness to loan funds to [Old] GM and thereby enable it to continue operating." *Decision on Debtors' Motion for Approval of (1) Sale of Assets to Vehicle Acquisition Holdings LLC; (2) Assumption and Assignment of Related Executory Contracts; and (3) Entry into UAW Retiree Settlement Agreement* ("**Sale Decision**") (Dkt. No. 2967) Sale Decision, p. 8.

5. In a prior proceeding related to Old GM's bankruptcy, the Court found that, "it was the intent and structure of the 363 Sale, as agreed on by the [U.S. Treasury] and Old GM, that the New GM would start business with as few legacy liabilities as possible, and that presumptively, liabilities would be left behind and not assumed." *See In re Motors Liquidation Co.*, 09-50026 REG, 2012 WL 1339496, at *3 (Bankr. S.D.N.Y. Apr. 17, 2012) *aff'd*, 500 B.R. 333 (S.D.N.Y. 2013) ("**Castillo Decision**").

6. This Court previously found in *Castillo* as follows:

> Auto Task Force member Harry Wilson . . ., under cross-examination by objectors to the 363 Sale, testified that "[o]ur thinking [as] a commercial buyer of the assets that will constitute [New GM] was to assess what *[l]iabilities were commercially necessary* for the success of [New GM]." He later said "we're focused on *which assets and which liabilities we needed for the success of New GM.*" And again: "We focused on which assets we wanted to buy and *which liabilities were necessary for the* commercial success of New GM. In short, by the end of the 363 Sale hearing it was clear not only to Old GM and Treasury, but also to the Court and to the public, that the goal of the 363 Sale was to pass on to Old GM's purchaser—what thereafter became New GM—only those liabilities that were commercially necessary to the success of New GM.

See Castillo Decision, at *4.

7. On the Petition Date, Old GM filed the Sale Motion with the Bankruptcy Court. *See* Sale Motion.[2]

8. Vehicle Acquisition Holdings LLC (n/k/a New GM), the purchaser under the Sale Agreement,[3] was not the movant under the Sale Motion. *Id.*

9. Vehicle Acquisition Holdings LLC was a United States Treasury-sponsored Delaware limited liability company formed on May 29, 2009. Sale Agreement, at 1.

10. At the time the Sale Motion was filed, Old GM was in possession of all of its books and records.

11. As of June 30, 2009, none of the Named Plaintiffs[4] in the Ignition Switch Actions had filed any court pleadings or otherwise commenced litigation (*i.e.*, asserting a claim or seeking a remedy based on economic loss, warranty, Lemon Law, *etc.*) against Old GM with respect to the defective Ignition Switch in a Subject Vehicle. Annexed hereto as Exhibit "3" is a list of all Named Plaintiffs known to New GM as of the date hereof.

12. As of June 30, 2009, none of the Named Plaintiffs in the Ignition Switch Actions had commenced litigation against Vehicle Acquisition Holdings LLC with respect to their Subject Vehicles.

13. AP Services, LLC ("**APS**") was retained by Old GM to provide interim management and restructuring services. *See Motion Of The Debtors Pursuant To 11 U.S.C. § 363*

---

2 The full title of the Sale Motion is *Debtors' Motion Pursuant to 11 U.S.C. §§ 105, 363(b), (f), (k), and (m), and 35 and Fed. R. Bankr. P. 2002, 6004, and 6006, to (I) Approve (A) the Sale Pursuant to the Master Sale and Purchase Agreement with Vehicle Acquisition Holdings LLC, a U.S. Treasury-Sponsored Purchaser, Free and Clear of Liens, Claims, Encumbrances, and Other Interests; (B) the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases; and (C) Other Relief; and (II) Schedule Sale Approval Hearing* ("**Sale Motion**") (Dkt. No. 92).

3 The full title of the Sale Agreement is *Amended and Restated Master Sale and Purchase Agreement By and Among General Motors Corporation, Saturn LLC, Saturn Distribution Corporation and Chevrolet-Saturn of Harlem, Inc., as Sellers and NGMCO, Inc., as Purchaser* (as amended, "**Sale Agreement**") (Dkt. No. 2968-1).

4 "**Named Plaintiffs**" shall mean all of the plaintiffs named in the Ignition Switch Actions that are designated as a putative class representative or are listed as an individual plaintiff therein.

For An Order Authorizing The Debtors To Employ And Retain AP Services, LLC As Crisis Managers And To Designate Albert A. Koch As Chief Restructuring Officer, Nunc Pro Tunc To The Petition Date, dated June 12, 2009 ("**APS Application**") (Dkt. No. 952).

14. The tasks assigned to APS by Old GM included overseeing "the administration of the Debtors' bankruptcy case, including compliance with bankruptcy court reporting requirements and the discharge of obligations of the Debtors pursuant to the Bankruptcy Code." *Id.* at 6.

15. Albert Koch, vice chairman and managing director of AlixPartners LLP in June 2009, testified as follows: "Other members of the AlixPartners' team have been involved in assisting with preparations for the 363 sale, developing operating plans to acquire select U.S. locations of Delphi, contract review protocol, identifying dealers whose contracts would be transitioned to wind down agreements. assisting with the mechanics of preparing for a bankruptcy filing, working with the Treasurer's office to improve cash forecasting and other tasks that assisted Company employees to prepare for and execute the restructuring." *Declaration of Albert Koch* ("**Koch Declaration**") (Dkt. No. 435), at 4.

16. Old GM's bankruptcy counsel (Weil Gotshal & Manges ("**WGM**")), was retained to, among other things, (i) "prepare on behalf of the Debtors, as debtors in possession, all necessary motions, applications, answers, orders, reports, and other papers in connection with the administration of the Debtors' estates," (ii) "take all necessary action in connection with the" Sale Motion, and (iii) "perform all other necessary legal services in connection with the prosecution of these chapter 11 cases." *See Application of the Debtors Pursuant to 11 U.S.C. §§ 327(a) and 328 (a) and Fed. R. Bankr. P. 2014(a) for Authority to Employ Weil, Gotshal &*

Manges LLP as Attorneys for the Debtors, Nunc Pro Tunc to the Commencement Date, dated June 12, 2009 ("**WGM Retention Application**") (Dkt. No. 949), ¶ 8.

17. Vehicle Acquisition Holdings LLC did not decide which parties would receive direct mail notice of the Sale Motion or how notice would be provided.

18. In 2009, Old GM had a contract with R. L. Polk and Company that allowed it to obtain, for vehicle recall notification purposes, vehicle owner name and address information.

19. Old GM requested of the Bankruptcy Court that direct mail notice of the Sale Motion and the relief requested therein be served on the categories of individuals and entities listed on Exhibit "4" annexed hereto. *See* Sale Procedures Order, ¶ 9.[5]

20. No direct mail notice of the Sale Motion and the relief requested therein was sent (a) to the Ignition Switch Plaintiffs in their capacity as owners of Subject Vehicles, or (b) as a general matter, to a category of "owners of Old GM vehicles".

21. There are owners of Old GM vehicles that did receive direct mail notice of the Sale Motion because they were in another category of entities who did receive direct mail notice of the Sale Motion (*i.e.*, as an equity security holder, contract counterparty, vendor, *etc.*), or someone may have otherwise given them the direct mail notice of the Sale Motion.

22. Old GM requested of the Bankruptcy Court, and the Bankruptcy Court approved, that notice of the relief requested in the Sale Motion be published, by June 5, 2009, or as soon as practicable thereafter (i) once in (a) the global edition of *The Wall Street Journal*, (b) the national edition of *The New York Times*, (c) the global edition of *The Financial Times*, (d) the national edition of *USA Today*, (e) *Detroit Free Press/Detroit News*, (f) *Le Journal de Montreal*, (g)

---

5 The full title of the Sale Procedures Order is *Order Pursuant to 11 U.S.C. §§ 105, 363, and 365 and Fed. R. Bankr. P. 2002, 6004, and 6006 (I) Approving Procedures for Sale of Debtors' Assets Pursuant to Master Sale and Purchase Agreement with Vehicle Acquisition Holdings LLC, a U.S. Treasury-Sponsored Purchaser; (II) Scheduling Bid Deadline and Sale Hearing Date; (III) Establishing Assumption and Assignment Procedures; and (IV) Fixing Notice Procedures and Approving Form of Notice* ("**Sale Procedures Order**") (Dkt. No. 274).

Montreal Gazette, (h) *The Globe and Mail*, and (i) *The National Post*, and (ii) on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com (the "**Publication Notice**"). *See* Sale Motion, at 25; Sale Procedures Order, at 8.

23. The Publication Notice did occur on or before June 11, 2009 in each newspaper identified in the preceding paragraph. The Garden City Group posted the notice of the Sale Motion on its public website as required by the Sale Procedures Order. *See Certificate of Publication*, filed by The Garden City Group ("**Cert. of Publication**") (Dkt. No. 2757); Sale Procedures Order, at 8.

24. The Sale Procedures Order was not appealed.

25. Neither the direct mail notice nor the Publication Notice sent in connection with the Sale Motion discussed the Ignition Switch or most liabilities or potential liabilities of Old GM.

26. Under the Sale Agreement, either Old GM or Vehicles Acquisition Holdings LLC, the purchaser sponsored by the U.S. Treasury, could terminate the Sale Agreement if certain deadlines were not met. Sale Agreement, § 8.1.

27. Under the Sale Agreement, either the sellers or purchaser could terminate the Sale Agreement if the Bankruptcy Court did not enter an order approving the sale by July 10, 2009. Sale Agreement, § 8.1.

28. No qualified party other than Vehicle Acquisition Holdings LLC sought to purchase the assets of Old GM. *See* Sale Decision, at 15, 39; Sale Order and Injunction, at 5.[6]

---

[6] The full title of the Sale Order and Injunction is *Order (I) Authorizing Sale of Assets Pursuant to Amended and Restated Master Sale and Purchase Agreement with NGMCO, Inc., a U.S. Treasury-Sponsored Purchaser; (II) Authorizing Assumption and Assignment of Certain Executory Contracts and Unexpired Leases in Connection with the Sale; and (III) Granting Related Relief* ("**Sale Order and Injunction**") (Dkt. No. 2968).

29. The Court found in its Sale Decision and Sale Order and Injunction that, if the Sale Agreement was terminated and the 363 Sale to Vehicle Acquisition Holdings LLC had not taken place, Old GM would have liquidated its assets. *See* Sale Decision, at 23; Sale Order and Injunction, at 5.

30. The Court found in its Sale Decision and Sale Order and Injunction that, if the Sale Agreement was terminated and the 363 Sale to Vehicle Acquisition Holdings LLC had not taken place, Old GM would not have been able to continue in business. *See* Sale Order and Injunction, at 5.

31. Numerous objections and responses to the Sale Motion were filed with the Bankruptcy Court. *See* Omnibus Reply.[7]

32. Among the objections to the Sale Motion were objections filed by (i) The Personal Injury Claimants[8] and entities and/or groups (as described in paragraph 36 below); (ii) the Ad Hoc Committee of Consumer Victims; (iii) the States' Attorneys General; and (iv) the Official Committee of Unsecured Creditors ("**Creditors Committee**").

33. The Creditors Committee was comprised of 15 members, including workers, suppliers, dealers, tort creditors, and other unsecured creditors of Old GM. *See Appointment of Committee of Unsecured Creditors* ("**Appt. of Creditors Committee**") (Dkt. No. 356).

34. The Creditors Committee is statutorily charged with representing the interests of all unsecured creditors.

---

[7] The full title of the Omnibus Reply is *Debtors to Objections to Debtors' Motion Pursuant to 11 U.S.C. §§ 105, 363(b), (f), (k), and (m) and 365 and Fed. R. Bankr. P. 2002, 6004, and 6006, to Approve (A) the Sale Pursuant to the Master Sale and Purchase Agreement with Vehicle Acquisition Holdings LLC, A U.S. Treasury-Sponsored Purchaser, Free and Clear of Liens, Claims, Encumbrances, and Other Interests; (B) the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases; and (C) Other Relief* ("**Omnibus Reply**") (Dkt. No. 2645).

[8] The Personal Injury Claimants were Callan Campbell, Kevin Junso, *et al.*, Edwin Agosto, Kevin Chadwick, *et al.*, and Joseph Berlingieri.

35. Three of the Creditors Committee's members (Genoveva Bermudez, Mark Buttita, and Kevin Schoenl) were tort claimants or representatives of tort claimants. *See id.*; Creditors Committee, at 5.

36. The following entities and/or groups, among others, filed an objection to the Sale Motion, and described themselves in their objection as follows:

a. **The Center for Auto Safety** says that it is a non-profit consumer advocacy organization that, among other things, works for strong federal safety standards to protect drivers and passengers. The Center states that it was founded in 1970 to provide consumers a voice for auto safety and quality in Washington, DC, and to help "lemon" owners fight back across the country. The Center claims to advocate for auto safety before the Department of Transportation and in the courts.

b. **Consumer Action** says that it is a national non-profit education and advocacy organization serving more than 9,000 community-based organizations with training, educational modules, and multi-lingual consumer publications since 1971. Consumer Action claims to serve consumers nationwide by advancing consumer rights in the fields of credit, banking, housing, privacy, insurance, and utilities.

c. **Consumers for Auto Reliability and Safety ("CARS")** states that it is a national, award-winning non-profit auto safety and consumer advocacy organization dedicated to preventing motor vehicle-related fatalities, injuries, and economic losses. CARS claims to have worked to enact legislation to protect the public and successfully petitioned the National Highway Traffic Safety Administration for promulgation of regulations to improve protections for consumers.

d. **National Association of Consumer Advocates ("NACA")** is a non-profit association of attorneys and advocates who claims that its primary focus is the protection and representation of consumers. NACA's stated mission is to promote justice for all consumers by maintaining a forum for communication, networking, and information sharing among consumer advocates across the country, particularly regarding legal issues, and by serving as a voice for its members and consumers in the ongoing struggle to curb unfair or abusive business practices that affect consumers.

e. **Public Citizen**, a consumer advocacy organization, that claims to be nonpartisan. It is a non-profit group founded in 1971 with members

> nationwide. Public Citizen claims to advocate before Congress, administrative agencies, and the courts for strong and effective health and safety regulation, and also claims to have a long history of advocacy on matters related to auto safety. In addition, through litigation and lobbying, Public Citizen states that it works to preserve consumers' access to state-law remedies for injuries caused by consumer products, such as state product liability laws.

Objection to the Sale Motion filed by Personal Injury Claimants and Consumer Advocacy Groups (Dkt. No. 2041), at 4-5.

37. The Center for Auto Safety, Consumer Action, Consumers for Auto Reliability and Safety, National Association of Consumer Advocates, and Public Citizen claimed to be non-profit organizations that work to protect consumers, including consumers who would be affected by Old GM's bankruptcy case. *See id.* at 4.

38. The Ad Hoc Committee of Consumer Victims claimed to represent more than 300 members who each had product liability tort claims involving personal injuries against Old GM. *See* Objection to the Sale Motion filed by the Ad Hoc Committee of Consumer Victims (Dkt. No. 1997), at 2.

39. Counsel for the entities or groups identified in paragraph 36 above, the Ad Hoc Committee of Consumer Victims, the States' Attorneys General, and the Creditors Committee all appeared at and at least certain of them participated in the Sale Hearing. *See* Transcript of 363 Sale Hearing held on June 30, 2009; Transcript of 363 Sale Hearing held on July 1, 2009; Transcript of 363 Sale Hearing held on July 2, 2009.

40. Arguments were raised in connection with the Sale Motion by, among others, the consumer advocacy groups, the Ad Hoc Committee of Consumer Victims, the States' Attorneys General and/or the Creditors Committee. *See* Objection to the Sale Motion filed by the Ad Hoc Committee of Consumer Victims; Objections to the Sale Motion filed by the States Attorneys

General (Dkt. No. 1928 and 2043); Objection to the Sale Motion filed by Personal Injury Claimants and Consumer Advocacy Groups; Objection to the Sale Motion filed by the Official Committee of Unsecured Creditors (Dkt. No. 2362).

41. The States' Attorneys General raised arguments against the 363 Sale. *See* Objections to the Sale Motion filed by the States Attorneys General, at 10-14.

42. After the Petition Date, representatives of Old GM, the U.S. Treasury, the Creditors Committee, and the States Attorneys General negotiated various provisions of the Sale Agreement. As a result of these negotiations, Old GM and the U.S. Treasury agreed on certain modifications to the Sale Agreement. As stated by counsel for the Attorneys General: "We have worked very hard since the beginning of the case with debtors' counsel initially, with Treasury counsel, almost everybody in this room at some point or another, it feels like. And I think a great number of improvements have been made in this agreement over that time period. The first was the assumption of the future product liability claims. Obviously, we -- you know, in a perfect world, we would not be distinguishing between those two categories, but certainly that's better than none of them. And it certainly goes a ways to addressing issues that were raised by the state Attorney Generals." Sale Hearing Transcript, July 2, 2009, 194. Counsel for the Attorneys General stated further: "We also wanted to be sure that lemon laws were covered under the notion of warranty claims, but they did not specifically refer to state lemon laws, and that coverage is being picked up." *Id.* at 196. This Court also found as follows: "Significantly also, the AG concerns resulted in one change in the game plan—assumption of liabilities under Lemon Laws—but no others, and the Lemon Laws change was made *expressly*." *Castillo* Decision, at *13.

43. This Court further found that, around this same time, "[t]he AGs urged in argument before the Court that New GM take on liabilities broader than those that would be undertaken under the Sale Agreement as initially proposed—including implied warranties, additional express warranties, statutory warranties, and obligations under Lemon Laws." *Castillo* Decision, at *5. The U.S. Treasury and Old GM declined to amend the Sale Agreement to assume these types of liabilities (except for Lemon Laws, as defined the Sale Agreement). *See id.*

44. The Personal Injury Claimants and the consumer advocacy groups argued at the 363 Sale hearing, *inter alia*, that New GM should assume broader warranty-related claims and that New GM should not be shielded from successor liability claims. *See* Transcript of 363 Sale Hearing held on July 1, 2009, at 295-324.

45. The Ad Hoc Committee of Consumer Victims objected to the 363 Sale, arguing, among other things, that, "knowing that it is seeking an order which would eliminate tort claims, GM has continued to advertise and sell GM vehicles without advising unwitting consumers that it is seeking to bar future claims for injuries arising from defects in vehicles sold before the closing." *See* Objection to the Sale Motion filed by the Ad Hoc Committee of Consumer Victims, at ¶ 38.

46. In another objection, it was argued: "GM's attempt to enjoin successor liability claims against the Purchaser must be denied because it violates applicable law, notice, and due process requirements." Objection to the Sale Motion filed by Personal Injury Claimants and Consumer Advocacy Groups, ¶ 18; *see also id.* ("A sale of GM's assets 'free and clear' of future tort and product liability claims violates due process because people who have not yet suffered injury from defects in GM vehicles do not know that they will be injured in the future cannot be

given meaningful notice of that their rights are being adjudicated or a meaningful opportunity to be heard.").

47. Representatives from the U.S. Treasury declined to make further changes to the Sale Agreement with respect to Assumed Liabilities and Retained Liabilities (as such terms are defined in the Sale Agreement). *See Castillo Decision*, *5-7.

48. The hearing on the Sale Motion took place before the Bankruptcy Court on June 30, 2009, July 1, 2009 and July 2, 2009.

49. Old GM presented evidence to the Court in connection with the hearing on the Sale Motion.

50. According to the Court's Sale Decision, if Old GM liquidated its assets in 2009, unsecured creditors would have received nothing from the Old GM bankruptcy estate. *See* Sale Decision, at 3.

51. As of March 31, 2009, Old GM had consolidated reported global assets and liabilities of approximately $82,290,000,000 and $172,810,000,000, respectively. *See* Henderson Affidavit, ¶ 101; Sale Decision, at 5.

52. According to the Court's Sale Decision, as of the Petition Date, if Old GM liquidated its assets, its liquidation asset value would be less than 10% of $82 billion. Sale Decision, at 5.

53. According to the Court's Sale Decision, the consideration transferred by New GM to Old GM under the Sale Agreement as of the closing date of the 363 Sale was estimated to be worth not less than $45 billion, plus the value of equity interests in New GM. Sale Decision, at 18.

54. No specific contingent liabilities were identified in the Sale Motion or in any trial exhibits used during the Sale Hearing. *See generally* Sale Motion; Transcript of 363 Sale Hearing held on June 30, 2009; Transcript of 363 Sale Hearing held on July 1, 2009; Transcript of 363 Sale Hearing held on July 2, 2009.

55. Objectors to the 363 Sale presented evidence at the Sale Hearing that the book value of certain contingent liabilities was approximately $934 million. *See* Sale Decision, at 21; Transcript of Sale Hearing, June 30, 2009, at 157-159.

56. On July 10, 2009, each of the Debtors consummated a sale of substantially all of its assets in a transaction under Section 363 of the Bankruptcy Code (the "**363 Sale**") to an acquisition vehicle, NGMCO, Inc. (as successor in interest to Vehicle Acquisition Holdings LLC), pursuant to the Sale Agreement, and (ii) the Sale Order and Injunction. Following the 363 Sale, Old GM changed its name to Motors Liquidation Company ("**MLC**") and the acquisition vehicle later became New GM.

57. The New GM Common Stock and both series of New GM Warrants (collectively, the "New GM Securities") are currently listed on the New York Stock Exchange.

58. New GM and the Debtors further agreed that New GM would provide additional consideration if the aggregate amount of allowed general unsecured claims against the Debtors exceed $35 billion. (*See* Sale Agreement, § 3.2(c)). In that event, New GM will be required to issue additional shares of New GM Common Stock for the benefit of the GUC Trust's beneficiaries. (*See id.*). The number of additional shares of New GM Common Stock to be issued will be equal to the number of such shares, rounded up to the next whole share, calculated by multiplying (i) 30 million shares (adjusted to take into account any stock dividend, stock split, combination of shares, recapitalization, merger, consolidation, reorganization or similar

transaction with respect to such New GM Common Stock from and after the closing of the 363 Sale and before issuance of additional shares) and (ii) a fraction, (A) the numerator of which is the amount by which allowed general unsecured claims exceed $35 billion (such excess amount being capped at $7 billion) and (B) the denominator of which is $7 billion."[9] (*See* Motors Liquidation Company GUC Trust Quarterly GUC Trust Reports as of September 30, 2013 at 6).

59. At the time the 363 Sale was approved, Old GM had not filed its schedules of assets and liabilities with the Court.

60. At the time the 363 Sale was approved, there was no deadline or bar date for general unsecured creditors to file proofs of claim.

61. The Plaintiffs in the Ignition Switch Actions are not parties under the Sale Agreement.

62. The Personal Injury Claimants objected to and appealed the Sale Order and Injunction. *See Campbell v. Motors Liquidation Co. (In re Motors Liquidation Co.)*, 428 B.R. 43 (S.D.N.Y. 2010) (Buchwald, J.).

63. The Sale Order and Injunction was upheld on appeal by two different District Court Judges. *See id.*; *Parker v. Motors Liquidation Co. (In re Motors Liquidation Co.)*, 430 B.R. 65 (S.D.N.Y. 2010) (Sweet, J.).

64. While the appellants in *Campbell* originally sought to appeal the Sale Order and Injunction to the Court of Appeals for the Second Circuit, that appeal was subsequently withdrawn by the parties to the appeal pursuant to a stipulation so-ordered on September 23,

---

9 *See* Second Amendment to Sale Agreement, Section 2(r) (amending Section 3.2(c) of the Sale Agreement) ("Sellers may, at any time, seek an Order of the Bankruptcy Court ... estimating the aggregate allowed general unsecured claims against Sellers' estates ... [and if] the Bankruptcy Court makes a finding that the estimated allowed general unsecured claims against Sellers' estates exceed $35,000,000,000, then Purchaser will ... issue additional shares of Common Stock ...."). While the Sale Agreement initially provided for the issuance of up to 10,000,000 additional shares, this number has subsequently been adjusted for the three-for-one split of New GM Common Stock. (*See* Disclosure Statement for Debtors' Amended Joint Chapter 11 Plan, at 16-17 n.2 (Dkt. No. 8023).

2010. In addition, while the appellant in *Parker* originally sought to appeal the Sale Order and Injunction to the Court of Appeals for the Second Circuit, that appeal was subsequently dismissed by the Court of Appeals for the Second Circuit on July 28, 2011 on equitable mootness grounds for appellant's failure to seek a stay of the Sale Order and Injunction. *See Parker v. Motors Liquidation Company*, Case No. 10-4882-bk (2d Cir. July 28, 2011). There were no further appeals of the Sale Order and Injunction.

65. On December 15, 2011 (the "Dissolution Date"), as required by the Plan, MLC filed its certificate of dissolution. (*See* Form 10-K Annual Report for Motors Liquidation Company GUC Trust for the Fiscal Year Ended March 31, 2014, filed May 22, 2014 ("GUC Trust 2014 Form 10-K") at 3). Pursuant to an *Assignment and Assumption Agreement (GUC Trust)*, dated that same day, Old GM assigned to the GUC Trust certain assets and agreements, and the GUC Trust assumed certain obligations of Old GM. *See* Assignment and Assumption Agreement (GUC Trust), § 1.

66. All of the Ignition Switch Actions include vehicles and/or parts designed and manufactured by Old GM.

67. None of the Ignition Switch Actions seek repairs of Old GM vehicles under the Glove Box Warranty.

68. None of the claims asserted in the Ignition Switch Actions constitute claims under Lemon Laws as defined by the Sale Agreement (as contrasted with state law definitions of lemon laws).

Exhibit 1

EXHIBIT "1"

NEW GM'S PROPOSED STIPULATIONS OF FACT NOT AGREED TO BY OTHER COUNSEL FOR THE IDENTIFIED PARTIES

1. On the Petition Date, Old GM's general ledger, and other corporate books and records listing Old GM's liabilities, did not list any Plaintiffs in the Ignition Switch Actions as having a claim or liability owed to them by Old GM relating to the defective Ignition Switches in the Subject Vehicles.

2. New GM did not sell a vehicle with a defective Ignition Switch, nor did it sell defective Ignition Switches to be used as repair parts.

3. After the expiration of the Bar Date established by the Bankruptcy Court for general unsecured creditors to file claims against the Debtors (*i.e.*, November 30, 2009), certain claimants filed late proofs of claim in the Debtors' bankruptcy case, and some of those claims became allowed claims against the Debtors.

4. As of June 30, 2009, none of the Named Plaintiffs in the Ignition Switch Actions had filed any court pleadings or otherwise commenced litigation (*i.e.*, asserting a claim or seeking a remedy based on economic loss, warranty, Lemon Law, *etc.*) against Old GM with respect to their Subject Vehicle.

5. In 2009, approximately 75 million Old GM vehicles were in use in the United States.

6. Old GM's noticing agent, the Garden City Group ("GCG"), provided direct mail notice of the 363 Sale to approximately 4 million persons and entities in June 2009. See Certificate of Service, filed by The Garden City Group ("Sale Motion Notice") (Dkt. No. 973).

Exhibit 2

EXHIBIT "2"

NEW GM'S RESPONSES TO PROPOSED STIPULATIONS OF FACT BY OTHER COUNSEL FOR THE IDENTIFIED PARTIES NOT AGREED TO BY NEW GM

A. New GM's Responses to Designated Counsel's Proposed Facts To Which New GM Does Not Stipulate

1. On November 19, 2004, Old GM personnel opened a Problem Resolution Tracking System report to address a complaint at a press event that a Subject Vehicle could be "keyed off with knee while driving. This was the first of six reports opened between 2004 and 2009 in connection with moving stalls in the Cobalt." (V.R. at 63). As part of the November 19, 2004 Problem Resolution Tracking System investigation, Old GM engineers suggested solutions to address the complaint that the ignition could be "keyed off with knee while driving," and presented them to the Current Production Improvement Team. (V.R. at 64-68).

NEW GM RESPONSE: The Stipulation is incomplete. The Valukas Report also says: "As a critical decision point, the problem described in the November 19, 2004 PRTS was assigned a severity level of 3 - on a scale of 1 (most severe) to 4 (least severe)." (V.R. at 63). The Valukas Report describes the severity levels as follows: "After identifying the issue, the originator of a PRTS selects a severity level for the problem. The severity level is a significant factor in the priority given to a PRTS report, with more severe issues addressed more urgently. The originator selects the severity level from a drop-down menu that includes brief descriptions of four options, which, during the relevant time period, were:

Code 1: Possibly Safety *I* Regulatory Issues *I* Walk Home *I* No Build
Code 2: Major Issues- an issue that would cause the customer to immediately return the vehicle to the dealership or cause excessive cost or labor impact at the assembly plant

Code 3: Moderate Issues - fix on the next trip to dealership or cause moderate cost or labor impact at the assembly plant

Code 4: Annoyance / Continuous Improvement" (V.R. at 41-42).

2. As Old GM's Program Engineering Manager for the Chevrolet Cobalt when it was launched, Gary Altman would have been present at Current Production Improvement Team and Vehicle and Process Integration Review meetings in which possible solutions were presented to address reports that drivers had inadvertently turned off the ignition switch in Cobalt vehicles by hitting their knees against the key or key fob. (V.R. at 63-67).

NEW GM RESPONSE: This is not a fact and is speculation. It is also not supported by the Valukas Report. The Report does not state that Gary Altman attended or possibly attended meetings.

3. A May 2007 case evaluation, by Old GM's outside counsel, of an accident in a 2004 Saturn Ion in which the airbag failed to deploy despite the fact that the vehicle went off the road, traveled through a brush line and struck a tree head on, resulting in one fatality and one severe injury, was deemed "unusual." "In discussing the technical issues in the case, outside counsel explained that, given the severity of the impact, the airbag non-deployment 'must be' attributable to power loss." (V.R. at 124-125).

NEW GM RESPONSE: The reference in the response which relates to what "outside counsel explained" should not have been cited because of the attorney client/work-product privileges.

4. A January 2008 second evaluation by Old GM outside counsel of a non-deployment case involving a Subject Vehicle hitting a tree concluded that "[t]he impact with the tree was clearly severe enough to warrant deployment of the vehicle's airbags. As a result, from a technical standpoint, there is a potential problem with the non-deployment, which was originally attributed to a pre-collision power loss." While outside counsel and Old GM Field Performance Assessment Engineer Manuel Peace thought the non-deployment event was not caused by a power loss, outside counsel concluded that "it was likely 'that a jury will find that the vehicle was defective' [and] GM eventually settled the case in 2008." (V.R. at 129-30).

NEW GM RESPONSE: The reference in the response which relates to what "outside counsel concluded" should not have been cited because of the attorney client/work-product privileges. The stipulation is also incomplete. The Valukas Report also states: "After further analysis of the accident sequence and information in the SDM download it appears that the non-deployment was not caused by a power loss but by some error in the SDM which caused it to misinterpret this significant crash as a non-deployment event." (V.R. at 129-30).

5. In March 2009, Old GM CEO Rick Wagoner had a "back-up" slide of a slide deck that included a reference to the Cobalt's inadvertent shut-off issue, that was presented at a meeting of the Vehicle Program Review team. That slide, in a 72-page slide presentation, described a proposed change in the Cobalt's key design from a slot to a hole. The slide deck was found in the data collected from Wagoner's computer from March 2009. (V.R. at 245).

NEW GM RESPONSE: The Stipulation is incomplete. The Valukas Report goes on to state as follows: "The back-up slide focused solely on warranty cost reduction and did not characterize the matter as a safety issue or mention airbag non-deployment, accidents or fatalities. Wagoner does not recollect reviewing any part of the slide deck." (V.R. at 245). After going through the background of the slide deck and investigating whether

Wagoner was informed of its contents, the Valukas Report states as follows: "There is no forensic evidence that Wagoner reviewed any specific slide within the presentation. As noted, Wagoner does not recollect viewing the presentation or the back-up slides; about three weeks later, on March 29, 2009, Wagoner agreed to resign as CEO at the request of the U.S. government's Auto Task Force. Contemporaneous e-mails he exchanged with the person who provided the summary notes of the meeting do not mention the Cobalt issue or any other specific topic." (V.R. at 247).

6. In furtherance of Old GM's admitted culture of avoiding responsibility, an Old GM 2008 Q1 Interior Technical Learning Symposium presentation provided examples of comments and phrases employees should avoid using in reports:

i. "This is a lawsuit waiting to happen . . ." ; "unbelievable engineering screw up . . . "; "this is a safety and security issue . . ."; "scary for the customer . . . "; "kids and wife panicking over the situation . . . "; "i believe the wheels are too soft and weak and could cause serious problems. . ."; "dangerous . . . Almost cause accident."

ii. The Old GM Symposium presentation also stated that documents used for reports and presentations should only concern engineering results, facts, and judgments. Some examples of words or phrases that are to be avoided are: ***always*** (emphasis in original), annihilate, apocalyptic, bad, Band- Aid, big time, brakes like an "X" car, cataclysmic, catastrophic, Challenger, chaotic, Cobain, condemns, Corvair-like, crippling, critical, dangerous, deathtrap, debilitating, decapitating, ***defect*** (emphasis in original), defective, detonate, disemboweling, enfeebling, evil, eviscerated, explode, failed, failure, flawed, genocide, ghastly, grenadelike, grisly, gruesome, Hindenburg, Hobbling, Horrific, impaling, inferno, Kevorkianesque, lacerating, life –threatening, maiming, malicious, mangling, maniacal, mutilating, ***never*** (emphasis in original), potentially-disfiguring, powder keg, problem, rolling sarcophagus (tomb or coffin), safety, safety related, serious, spontaneous combustion, startling, suffocating, suicidal, terrifying, Titanic, tomblike, unstable, widow-maker, words or phrases with biblical connotation, you're toast.

NEW GM RESPONSE: This is an exhibit to the NHTSA Consent Order. The Stipulation is incomplete. The presentation also states:

> "In a corporation the size of GM, writing is in many cases the only way to communicate globally because of time changes, number of people involved, etc.
>
> • Write "smart."
>
> -Be factual, not fantastic, in your writing.

• When identifying product risks, make sure they are addressed and closed out.

• Our writing must always be based only on fact, without judgmental adjectives and speculation.

• Understand that there really aren't any secrets in this company.

- For anything you say or do, ask yourself how you would react if it was reported in a major newspaper or on television.

• Don't be cute or clever.

-The words you choose could be taken out of context to

suggest you meant something much worse than what was intended.

-This may be especially easy to do in an e-mail, when there might be a temptation to use a casual tone to describe a potentially serious safety risk."

In addition, the lead in to the list set forth in (i) is: "Examples of comments that do not help identify and solve problems."

Also, the lead in to (ii) is as follows: "Documents used for reports and presentations should contain only engineering results, facts, and judgments. These documents should not contain speculations, opinions, vague non descriptive words, or words with emotional connotations. Some examples of words or phrases that are to be avoided are . . . ."

The Valukas Report also states: "Leadership at GM has tried to counter this culture with clear messages that employees should raise issues. 'Winning With Integrity' (the code of conduct) instructs employees to raise problems (although it does not explicitly reference vehicle safety) and ensure they receive proper attention, and to conduct themselves with the highest ethical standards." (V.R. at 255). The Valukas Report goes on to state that the author of the presentation used the phrases and words "as an attempt at humor," and that "[t]he employee who presented the training was later told by a lawyer who saw a version of this training to remove the slide listing words never to be used." (V.R. at 254 and n. 1156).

7. "In addition to being trained on how to write, a number of GM employees reported that they did not take notes at all critical safety meetings because they believed GM lawyers did not want such notes taken." (V.R. at 254).

NEW GM RESPONSE: The Stipulation is incomplete. The Valukas Report also states: "No witness was able to identify a lawyer who gave such an instruction, no lawyer

reported having given such an instruction, and we have found no documents ore-mails reflecting such an instruction."

B. New GM's Responses to Groman Plaintiffs' Proposed Facts To Which New GM Does Not Stipulate[10]

1. During his employment, William Kemp reported to the General Counsel of GM North America. (V.R. at 104).

NEW GM RESPONSE: This assertion is vague. The Valukas Report discusses this person's role at the time the Report was written, and not for the entire time during the person's career as the stipulation suggests.

2. During his employment, Larry Buonomo reported to the General Counsel of GM North America. (V.R. at 104).

NEW GM RESPONSE: This assertion is vague. The Valukas Report discusses this person's role at the time the Report was written, and not for the entire time during the person's career as the stipulation suggests.

3. When the ignition switch is turned to Accessory or Off, a Subject Vehicle would lose power brakes. (V.R. at 25).

NEW GM RESPONSE: The loss of power brakes under these circumstances would not happen immediately. This is a matter of engineering and has been confirmed by New GM engineers.

4. In 2003, Old GM became aware of Saturn customer complaints about intermittent engine stalls while driving. (V.R. at 54).

NEW GM RESPONSE: This assertion is incomplete. The Valukas Report goes on to state: "Witnesses recalled that the vast majority of claims concerning the Ion involved

[10] In the evening on Thursday, August 7, 2014 – the night before the agreed upon stipulations of fact were due to be delivered to the Court and hours after New GM received a list of proposed stipulations of fact not agreed to and which New GM herein responds, the Groman Plaintiffs sent the other Counsel for the Identified Parties (including New GM) an additional 87 proposed stipulations of fact that have not been agreed to. Until that time, New GM believed that all of the other Counsel for the Identified Parties (including the Groman Plaintiffs) had already delivered their disputed stipulations of fact. New GM has not had an appropriate opportunity to respond to the Groman Plaintiffs' new list of disputed stipulated facts.

complaints of 'no crank/no start' problems, which arose from electrical, rather than mechanical, problems with the Ignition Switch." (V.R. at 54).

5. In October 2003, a Field Performance Report, 3101/2003/US, lists 65 Ion stalls and states: "Customers comment of intermittent stall while driving. In most cases, there are no trouble codes associated with the stall. " This Field Performance Report lists a vehicle with 15 miles as the youngest vehicle affected. (V.R. at 54-55).

NEW GM RESPONSE: This assertion is incomplete. Some of the stalls were due to "heavy key chains." (V.R. at 54). In addition, the October 2003 Field Performance Report "was canceled in January 2004 for the purported reason that a different report already resolved the issue." (V.R. at 55)

6. Before 2008, a handful of Old GM engineers other than Raymond DeGiorgio also received information describing the change to the Ignition Switch for the model year 2008 Chevrolet Cobalt, including four engineers who received a June 30, 2006 email from Delphi to DeGiorgio stating that the detent plunger had been changed "to increase torque forces to be within specification." (V.R. 102).

NEW GM RESPONSE: This assertion is incomplete. The Valukas Report goes on to states that these engineers were "in other departments" and "were not involved in the investigations that ensued in the coming years, nor did they hold a position, like DeGiorgio's, with responsibility for the Ignition Switch." (V.R. at 102 n.417).

7. When first told of the Ignition Switch Defect in or about March 2005, Steven Oakley formed the view that the Ignition Switch Defect was a safety issue. (V.R. at 76).

NEW GM RESPONSE: This assertion is unsupported. The Valukas Report goes on to state that "Gary Altman, the PEM for the Cobalt program team, and other engineers told him [Oakley] it was not (safety issue), and he deferred to them. (V.R. at 76). This portion of the Valukas Report discusses Oakley's review of an event wherein the driver's knee contacted the key fob. The problem did not occur when the fob was removed from the key. Oakley assigned the incident with the lowest rating (4) "annoyance or continuous improvement." (V.R. at 76).

8. In or about November 15, 2004, one individual was killed and another was severely injured in a crash involving a 2004 Saturn Ion where the airbags did not deploy. (V.R. at 124). Manuel Peace, an Old GM engineer who assisted Old GM's legal department in evaluating cases, did a case evaluation for this incident. (V.R. 124). In his case evaluation, Peace stated he had never seen a situation like this where the airbags did not deploy, and that the best explanation for why the airbags did not deploy was that the vehicle lost power. (V.R. at 125)

NEW GM RESPONSE: This assertion is incomplete. The Valukas Report notes that neither individual was wearing their seatbelts at the time of the accident. In addition, the Report states that "Peace , however, had not determined precisely how the vehicle lost power.... Peace does not recall the case or what he did to investigate it." (V.R. at 125).

9. At some point between 2007 and the commencement of Old GM's bankruptcy case, John Sprague and the Field Performance Assessment team observed a pattern of airbag non-deployments in Cobalts and Ions. (V.R. at 9, 118-19, 134).

NEW GM RESPONSE: This assertion is unsupported. The Valukas Report does not say that John Sprague or anyone else noticed a "pattern of airbag non-deployments," but instead that the FPA team in 2009 " had not realized that the observed pattern of non-deployments could have been caused by a change in power mode signal that disabled airbag sensors." (V.R. at 134-135).

10. At the time John Sprague and Brian Everest met with Continental, Sprague and Everest knew that the rotation of the ignition switch from Run to Accessory or Off could cause the Sensing and Diagnostic Module to receive a power mode message of Accessory or Off. (V.R. at 135).

NEW GM RESPONSE: This assertion is unsupported. The Valukas Report does not state that Sprague and Everest knew. (V.R. at 135).

11. At or about the time of the meeting with Continental in May 2009, Brian Everest and John Sprague had spoken with members of Old GM's Product Investigations group about the non-deployment of airbags in Cobalts. (V.R. at 135).

NEW GM RESPONSE: This assertion is unsupported and incomplete. The Valukas Report states that: "Before receiving the Continental report, Everest and Sprague explained, the FPA team had not realized that the observed pattern of Cobalt non-deployments could have been caused by a change of power mode signal that disabled airbag sensors." It goes on to state that Sprague gathered further information, and the engineers first focused their attention on the vehicles electric system. It was in this context that Sprague and Everest spoke to the engineering team about the non-deployment issue.

12. Joseph Taylor, an Old GM Program Quality Manager who administered the Captured Test Fleet program for the Chevrolet Cobalt drove a 2005 Cobalt test vehicle and personally experienced moving stalls with the Cobalt. (V.R. at 58).

NEW GM RESPONSE: This assertion is incomplete. The Valukas Report goes on to state that Taylor did not recall any Capture Test Fleet ("CTF") "reports of Ignition Switch or stalling issues for the Cobalt, either during the initial 2004 CTF or in subsequent model years." (V.R. at 58.) It further states that Taylor did not report the stalling instances in his CTF Reports "because he did not regard them as significant." "Taylor, like many other GM engineers, did not regard stalling as a safety issue." (V.R. at 59).

INDIVIDUALS AND ENTITIES WHO RECEIVED
DIRECT MAIL NOTICE OF THE 363 SALE

(i) the attorneys for the U.S. Treasury,
(ii) the attorneys for Export Development Canada,
(iii) the attorneys for the agent under the Debtors' pre-petition secured term loan agreement,
(iv) the attorneys for the agent under the Debtors' pre-petition amended and restated secured revolving credit agreement,
(v) the attorneys for the statutory committee of unsecured creditors appointed in the Debtors' chapter 11 cases (the "Creditors Committee") (if no statutory committee of unsecured creditors has been appointed, the holders of the fifty largest unsecured claims against the Debtors on a consolidated basis),
(vi) the attorneys for the UAW,
(vii) the attorneys for the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers—Communications Workers of America,
(viii) the United States Department of Labor,
(ix) the attorneys for the National Automobile Dealers Association,
(x) the attorneys for the ad hoc bondholders committee,
(xi) any party who, in the past three years, expressed in writing to the Debtors an interest in the Purchased Assets and who the Debtors and their representatives reasonably and in good faith determine potentially have the financial wherewithal to effectuate the transaction contemplated in the MPA,
(xii) non-Debtor parties to the Assumable Executory Contracts,
(xiii) all parties who are known to have asserted any lien, claim, encumbrance, or interest in or on the Purchased Assets,
(xiv) the Securities and Exchange Commission,
(xv) the Internal Revenue Service,
(xvi) all applicable state attorneys general, local environmental enforcement agencies, and local regulatory authorities,
(xvii) all applicable state and local taxing authorities,
(xviii) the Federal Trade Commission,
(xix) all applicable state attorneys general,
(xx) United States Attorney General/Antitrust Division of the Department of Justice,
(xxi) the U.S. Environmental Protection Agency and similar state agencies,
(xxii) the United States Attorney's Office,
(xxiii) all dealers with current agreements for the sale or leasing of GM brand vehicles,
(xxiv) the Office of the United States Trustee for the Southern District of New York,
(xxv) all entities that requested notice in these chapter 11 cases under Bankruptcy Rule 2002,
(xxvi) all other known creditors, and
(xxvii) all equity security holders of the Debtors of record as of May 27, 2009.

MOTORS LIQUIDATION COMPANY, *et al.*, f/k/a General Motors Corp., *et al.*	:	**Case No.: 09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

CERTAIN PLAINTIFFS, THROUGH DESIGNATED COUNSEL, AND THE *GROMAN* PLAINTIFFS' AGREED-UPON STIPULATIONS OF FACT IN CONNECTION WITH THE FOUR THRESHOLD ISSUES IDENTIFIED IN THIS COURT'S JULY 11, 2014 SUPPLEMENTAL SCHEDULING ORDER[1]

Pursuant to this Court's *Supplemental Scheduling Order, Dated July 11, 2014, Regarding (i) the Motion of General Motors LLC Pursuant to 11 U.S.C. §§ 105 and 363 to Enforce the Court's July 5, 2009 Sale Order and Injunction, (ii) the Objection Filed by Certain Plaintiffs in Respect Thereto, and (iii) Adversary Proceeding No. 14-01929* (the "**Supplemental Scheduling Order**"), Certain Plaintiffs, through Designated Counsel, and the *Groman* Plaintiffs (hereinafter "**Plaintiffs**") hereby submit the following agreed-upon stipulations of fact concerning the Four Threshold Issues.[2]

In addition, annexed hereto as Exhibit "A" are Certain Plaintiffs' proposed stipulations of fact that have not been agreed to by New GM.

---

[1] Unless otherwise indicated, capitalized terms not defined herein shall have the meanings ascribed to them in the Supplemental Scheduling Order (as defined herein).

[2] Plaintiffs reserve the right to rely on any of the stipulations of fact agreed upon by Counsel for the Identified Parties.

AGREED-UPON STIPULATIONS OF FACT

1. When the Ignition Switch is turned to the "Accessory" or "Off" position in the Subject Vehicles, power to a part called the Sensing Diagnostic Module is lost. The Sensing Diagnostic Module determines when and whether airbags should deploy. When the Sensing Diagnostic Module is powered down, the airbags will not deploy. If the Sensing Diagnostic Module loses power during a crash, the Sensing Diagnostic Module's crash sensing protection would continue (and airbags could still deploy) for approximately 150 milliseconds after the power loss. But if the Sensing Diagnostic Module loses power prior to the crash, then the Sensing Diagnostic Module would power down and would not trigger airbag deployment. (V.R. at 28-29).[3]

2. According to New GM, the Subject Vehicles were recalled in 2014 (the "**Ignition Switch Recall**").

3. In connection with the Ignition Switch Recall, New GM stated that:

> There is a risk, under certain conditions, that your ignition switch may move out of the "run" position, resulting in a partial loss of electrical power and turning off the engine . . . If the ignition switch is not in the run position, the airbags may not deploy if the vehicle is involved in a crash, increasing the risk of injury or fatality.

(General Motors, Ignition Recall Safety Information Frequently Asked Questions (2014), *available at* http://gmignitionupdate.com/faq.html#L (last visited May 23, 2014)).

[3] "V.R." refers to Anton R. Valukas, Report to Board of Directors of General Motors Company Regarding Ignition Recalls, dated May 29, 2014, which can be found at http://www.nhtsa.gov/staticfiles/nvs/pdf/Valukas-report-on-gm-redacted.pdf.

4. In 2003, Thomas Gottschalk, Old GM's[4] former general counsel, stated to members of Old GM's legal department in a memorandum that "[i]f you as an attorney are aware of any threatened, on-going, or past violation of a federal, state or local law or regulation . . . it is your responsibility to respond appropriately." (V.R. at 109).

5. Gottschalk's memorandum also discussed what to do if one's superiors had concluded that appropriate action had been taken in response to a perceived problem, but the more junior lawyer disagreed. If they believed that the conclusion was wrong, the more junior lawyer should continue to seek an appropriate resolution. Gottschalk said it was the duty of the more junior lawyers to bring the situation to the attention of their supervisors or their supervisors' supervisors, as necessary. If the more junior lawyers believed that their supervisor had not addressed the issue appropriately or if the more junior lawyer felt that bringing it to the attention of their supervisors would be futile, the more junior lawyers were told to pursue it higher in the organization – if necessary, to the General Counsel. (V.R. at 109-110).

6. In a February 19, 2004 report concerning the model year 2004 Saturn Ion, Old GM employee Onassis Matthews stated: "The location of the ignition key was in the general location where my knee would rest (I am 6'3" tall, not many places to put my knee). On several occasions, I inadvertently turn [sic] the ignition key off with my knee while driving down the road. For a tall person, the location of the ignition key should be moved to a place that will not be inadvertently switched to the off position." (V.R. at 57).

7. In an April 15, 2004 report concerning the model year 2004 Saturn Ion, Old GM employee Raymond P. Smith reported experiencing a one-time inadvertent shut-off, and

[4] **"Old GM"** means Motors Liquidation Company, formerly known as General Motors Corporation.

that "I thought that my knee had inadvertently turned the key to the off position." (V.R. at 57).

8. In 2004, an engineer in Old GM's High Performance Vehicle Operations Group reported that the driver repeatedly experienced a moving stall during a track test of the Chevrolet Cobalt SS when the driver's knee slightly grazed the key fob.

9. An Old GM 2005 Problem Resolution Tracking System report states, in part: "Customer concern is that the vehicle ignition will turn off while driving." http://democrats.energycommerce.house.gov/sites/default/files/documents/GM-PRTS-Chevrolet-Cobalt-March-2005.pdf.

10. In December 2005, Old GM issued Service Bulletin 05-02-35-007 (the "**December 2005 Service Bulletin**") to its dealers, with the subject reference "Information on Inadvertent Turning Off of Key Cylinder, Loss of Electrical System and No DTCs ("**Diagnostic Trouble Codes**")" for the 2005-2006 Chevrolet Cobalt, 2006 Chevrolet HHR, 2003-2006 Saturn Ion, and 2006 Pontiac Solstice vehicles. (Apr. 1 Cong. Hr'g, Doc. 12).[5]

A. The December 2005 Service Bulletin stated that the concern about inadvertently turning off the ignition "is more likely to occur if the driver is short and has a large and/or heavy key chain" and that, when a customer brought his or her vehicle in for service, he or she "should be advised of this potential and should take steps to prevent it – such as removing unessential items from their key chain."

---

[5] The hearing transcript can be found at *The GM Ignition Switch Recall: Why Did It Take So Long?: Hearing Before the Subcommittee on Oversight and Investigations of the H. Comm. on Energy and Commerce*, 2014 WL 1317290 (2014). The hearing transcript and the documents released by Congress in connection with the hearing can be found at http://energycommerce.house.gov/hearing/%E2%80%pC-gm-ignition-switch-recall-why-did-it-take-so-long%E2%80%9D. (last visited July 24, 2014). Citation to "Doc. ___" refer to the documents produced by New GM to Congress in connection with the hearings regarding the Ignition Switch Recall before the House Energy and Commerce Committee on April 1, 2014.

B. The December 2005 Service Bulletin also stated that "there is potential for the driver to inadvertently turn off the ignition due to low ignition key cylinder torque/effort."

C. Old GM did not issue any public statements related to the December 2005 Service Bulletin. (Apr. 1 Cong. Hr'g at 35).

D. The December 2005 Service Bulletin did not describe the issue as involving a "stall." (V.R. at 93).

E. Prior to this time, Steven Oakley, [6] an Old GM brand quality manager, had written a service bulletin request form that used the term "stall." (V.R. at 92).

11. In October 2006, Old GM updated the December 2005 Service Bulletin (hereinafter referred to, with that update, as the "**October 2006 Service Bulletin**") to include additional vehicle models and model years – namely, the 2007 Saturn Ion, 2007 Saturn Sky, the 2007 Chevrolet HHR, the 2007 Pontiac Solstice, and the 2007 Pontiac G5. (Feb. 7 Notice; Feb. 24 Notice).

A. The October 2006 Service Bulletin stated:

> There is potential for the driver to inadvertently turn off the ignition due to low ignition key cylinder torque/effort. The concern is more likely to occur if the driver is short and has a large and/or heavy key chain. In these cases, this condition was documented and the driver's knee would contact the key chain while the vehicle was turning and the steering column was adjusted all the way down. This is more likely to happen to a person who is short, as they will have the seat positioned closer to the steering column. In cases that fit this profile, question the customer thoroughly to determine if this may [sic] the cause. The customer should be advised of this potential and should take steps to prevent it – such as removing unessential items from their key chain.

---

[6] Oakley is discussed infra at ¶ 15,S.

B. The October 2006 Service Bulletin did not describe the issue as involving a "stall."

12. When Gary Altman, Old GM's Program Engineering Manager for the Chevrolet Cobalt, was asked at a deposition whether "it would be true that if it was a safety recall, the dealership and the consumers would be more aware of the issue than if it were a technical service bulletin," Altman replied: "I'm sure it is. It has to go through NHTSA. It goes through the public announcement, the record, and I'm pretty concerned—or pretty sure that every customer would be contacted." (Altman Dep. 54:3-11).

13. "In 2006, one Better Business Bureau arbitrator decision mandated that Old GM repurchase a Cobalt from a customer who complained of intermittent stalling." (V.R. 89, fn. 378).

14. Certain Old GM Personnel and New GM Personnel, as they relate to the Ignition Switch, are as follows:

A. Alan Adler was Old GM's manager for safety communications in the Fall of 2006. (V.R. at 57-58).

i. On October 24, 2006, a crash occurred in which a 2005 Cobalt left the road and struck a telephone box and two trees, leaving two passengers dead and the driver severely injured. The crash first came to Old GM's attention on November 15, 2006, through a TV reporter's inquiry. Adler e-mailed Dwayne Davidson, Senior Manager for TREAD Reporting at Old GM, and others, copying Old GM employees Gay Kent, Jaclyn Palmer, Brian Everest, and Douglas Wachtel, with the subject line "2005 Cobalt Air Bags – Fatal Crash; Alleged Non-Deployment," asking whether anyone knew about the accident and other airbag incidents involving the Cobalt (the "**November 2006 Adler E-mail**"). Certain recipients

responded to the e-mail and provided available data on Cobalt frontal airbag claims. (V.R. at 114).

ii. Adler was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 140).

B. Gary Altman was Old GM's Program Engineering Manager for the Chevrolet Cobalt when it was launched. (V.R. at 57-58). As of June 2013 he had worked at Old GM and then New GM for approximately 35 years. (Altman Dep. 6:12-15).

i. "Around the time of the Cobalt launch, two reports surfaced of moving stalls caused by a driver bumping the key fob or chain with his knee. First, at a summer or fall 2004 press event associated with the launch of the Cobalt in Santa Barbara, California, a journalist informed Doug Parks, the Cobalt Chief Engineer, that while adjusting his seat in the Cobalt he was driving, the journalist had turned off the car by hitting his knee against the key fob or chain. Parks asked Gary Altman, the Program Engineering Manager, to follow up on the complaint by trying to replicate the incident and to determine a fix." (V.R. at 59-60). "After the Cobalt press event, Altman and another GM engineer test drove a Cobalt at the Milford Proving Grounds and replicated the incident described by the journalist." (V.R. at 60).

ii. The entity within Old GM responsible for opening and reviewing the November 2004 Problem Resolution Tracking System was a Current Production Improvement Team. (V.R. at 63-64). The Current Production Improvement Team included a cross-section of business people and engineers, along with the Program Engineering Manager that was responsible for the vehicle. (V.R. at 64). It was chaired by the Vehicle Line Director, who was the business lead for the vehicle program and reported directly to the Vehicle Line Executive, who at the time was Lori Queen. (V.R. at 64).

iii. An Old GM November 19, 2004 Problem Resolution Tracking System was closed with no action on March 9, 2005. (V.R. at 60). There were multiple reasons given for closing the November 2004 Problem Resolution Tracking System investigation and, ultimately, certain Old GM personnel concluded that none of the solutions represents an acceptable business case. (*Id.*; Doc. 8, at GMHEC000001735; V.R. at 69). The phrase "none of the solutions represents an acceptable business case" was a standard phrase by certain Old GM personnel for closing a Problem Resolution Tracking System investigation without action. (V.R. at 69). Here, according to certain Old GM personnel, the proposed changes were not implemented because none of them were guaranteed to resolve the problem completely. (*Id.*).

iv. In May 2005, Steven Oakley opened a Field Performance Report to investigate a complaint by Jack Weber, an Old GM engineer who reported turning off a Chevrolet Cobalt SS with his knee while "heel-toe downshifting." (V.R. at 76).

v. Altman has testified, *inter alia*, that:

a) movement of the ignition key from the "Run" position to the "Accessory" position in the 2005 Chevrolet Cobalt can be dangerous in certain situations. (Altman Dep. 12:5-10, 23-25; 23:23-24:2).

b) when the ignition key moves from the "Run" position to the "Accessory" position in the 2005 Chevrolet Cobalt, the engine stalls and power steering stops working. (Altman Dep. 10:14-22).

vi. In February 2009, Old GM engineer Joseph Manson copied Altman on an e-mail which, among other things, stated that the issue with respect to the Cobalt key (keyed off with knee while driving) "has been around since man first lumbered out of [the] sea and stood on two feet." (V.R. at 132-33).

vii. Altman was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.*, V.R. at 222).

C. Kathy Anderson was an Old GM Field Performance Assessment engineer who was assigned to gather information and assess technical issues in lawsuits and claims not in litigation. (V.R. at 105-106). Field Performance Assessment engineers conduct their own technical assessments, which might include reviewing police reports and medical records, interviewing witnesses, inspecting vehicles, and analyzing Sensing Diagnostic Module data. (V.R. at 106). Oftentimes, Field Performance Assessment engineers share their technical assessments with product litigation staff attorneys and outside counsel, assist in responding to plaintiffs' discovery requests, and may testify as experts or 30(b)(6) witnesses. "FPA engineers' technical assessments are the lawyers' primary source of technical information for the early case evaluations, and are a critical factor in the evaluation of settlement decisions." (V.R. at 106).

i. In 2006, Anderson investigated two fatal crashes: the July 4, 2004 fatal crash of a 2004 Saturn Ion (the "**July 2004 Fatal Crash**") and the July 29, 2005 fatal crash of a 2005 Chevrolet Cobalt (the "**July 2005 Fatal Crash**"). (V.R. at 110, 112). In the July 2004 Fatal Crash, a vehicle occupant died after her 2004 Saturn Ion left the road at high speed, went over a low curb, braked, and then struck a large utility pole head on. The airbag did not deploy. (V.R. at 112). In the July 2005 Fatal Crash, the airbags did not deploy. (V.R. at 110).

ii. "Settlements of between $100,000 and $1.5 million (a limit which was eventually increased to $2 million) required approval at a committee known as the "Roundtable." The Roundtable Committee met weekly, and was led by the Litigation Practice Area Manager, and all product litigation staff attorneys were invited to attend. Settlement offers between $2 and $5 million required approval of a group called the Settlement Review

Committee, which met monthly, and was chaired by the head of global litigation. Members of the Settlement Review Committee included both the GC of GM North America and Kemp. When a case was before the Roundtable or the Settlement Review Committee, the responsible product litigation staff attorney would present his/her case." (V.R. at 106-108).

iii. FPA engineers Manuel Peace, Kathy Anderson, and Douglas Brown of the Old GM Legal Staff were assigned to the July 2004 Fatal Crash and the July 2005 Fatal Crash. (V.R. at 110). Anderson and the other investigators identified the July 2004 Fatal Crash as one in which there should have been an airbag deployment, and that the deployment likely would have saved the occupant's life. (V.R. at 112-113).

iv. Anderson was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 141).

D. Douglas Brown was in-house counsel at Old GM. (V.R. at 110). In late 2005 and 2006, Cobalt and Ion airbag non-deployment cases began to reach the Old GM Legal Staff, including Brown. (V.R. at 103 & n.419).

i. Brown was assigned to the July 2004 Fatal Crash and the July 2005 Fatal Crash. (*Id.*; V.R. at 124-126).

ii. On October 3, 2006, Brown presented the July 2004 Fatal Crash to a Roundtable meeting, and reported that despite extensive analysis, the engineers have no solid technical explanation. The engineers agree that 1) the airbags should have deployed; 2) the Sensing Diagnostic Module did not record the crash event, for unknown reasons; and 3) it is reasonably likely that deployment of the driver airbag would have prevented death in this accident. The Roundtable granted settlement authority and Old GM settled the case. (V.R. at 113).

iii. On November 15, 2006, Jaclyn Palmer forwarded to Brown an e-mail sent by Alan Adler that referred to the October 26, 2006 fatal crash of a 2005 Cobalt in which the airbag did not deploy. In the November 2006 Adler e-mail, Adler asked if anyone knew about the accident. (V.R. at 114).

iv. Brown was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

E. Eric Buddrius was an engineer in Old GM's Product Investigations unit. The Product Investigations unit at Old GM was the primary unit charged with investigating and resolving significant engineering problems, including both customer satisfaction and safety problems. (V.R. at 86). The Old GM Product Investigations group would present its findings at one or more weekly Information Status Review meetings attended by the Field Performance Evaluation Director, the Product Investigations Director, and representatives from the Legal Department, Customer Care and After Sales, Field Performance Evaluation, and Product Investigation. (V.R. at 290).

i. Witnesses have inconsistent recollections as to whether the Product Investigations group became involved in the Cobalt airbag non-deployment issues at this stage. One witness, Brian Everest, reported that in April 2007, the Field Performance Assessment group transitioned the Cobalt airbag matter to the Product Investigations unit, where it was assumed by Buddrius. Documents in Buddrius's files indicate that he was working on the issue, and a May 4, 2007 Investigation Status Review Presentation Planning Worksheet states that Buddrius was scheduled to present on an issue described as "Cobalt/Ion Airbag (NHTSA discussion item)." Buddrius has no recollection of involvement. (V.R. at 119-120).

ii. Continental manufactured the Sensing Diagnostic Module for the Chevrolet Cobalt. (V.R. at 29).

iii. According to Brian Everest, on May 15, 2009, Buddrius attended a meeting with Continental along with his colleagues John Sprague, Brian Everest, Lisa Stacey, James Churchwell, William Hohnstadt, John Dolan, and Legal Staff Attorney Jaclyn Palmer, to discuss Continental's findings regarding a Cobalt crash (hereinafter, the "**May 2009 Continental Meeting**"). Continental provided a report regarding a September 13, 2008 accident involving a 2006 Chevrolet Cobalt (the "**Continental Report**").

iv. The Continental Report stated that the Sensing Diagnostic Module did not deploy the airbag because the algorithms were disabled at the start of the event. The report identified two possible causes for the disabled algorithm: (a) the vehicle experienced "loss of battery" or (b) the Sensing Diagnostic Module received a power mode status of "Off" from the body control module (BCM). (V.R. at 134).

v. Buddrius was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 153 n.685).

F. William K. Chase worked for Old GM and then New GM from 1984 through 2009. (Chase Dep. 7:2-3, 6:24-7:3). In 2005, Chase worked as a warranty engineer in the warranty engineering department at Old GM, where he was responsible for trying to reduce warranty costs for vehicles produced in Lordstown, Ohio, where the Cobalt and the Pontiac G5 were produced. (Chase Dep. 7:16-8:2, 20:14-18). Old GM's warranty system contained reports of incidents that included dealer comments on incidents, if the dealer had chosen to enter a comment. (Chase Dep. 12:23-13:3). Those reports were organized by labor code, included the

VIN, dealer name, the amount charged against the claim, any comments, any customer codes, and any trouble codes the dealer might have entered. (Chase Dep. 8:3-8).

i. According to Chase, he first learned of a problem with the 2005 Cobalt in 2005 from Steve Oakley, the Cobalt brand quality manager at the time. (Chase Dep. 7:7-14). Oakley brought the issue to Chase's attention by submitting a Problem Resolution Tracking System report (PRTS No. N182276) on May 16, 2005 and asked Chase to estimate the warranty impact. (Chase Dep. 8:3-8).

ii. Pursuant to a PRTS initiated in February 2009, a design change was implemented to change the ignition key design for 2010 Chevrolet Cobalt vehicles from a slot to a hole. (Feb. 7 Notice; Feb. 24 Notice; Chase Dep. 31:20-32:11).

iii. Chase was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

G. James Churchwell was an Old GM engineer. (V.R. at 135, 150 n.666). According to Everest, Churchwell attended the May 2009 Continental Meeting. (V.R. at 134-135).

i. Churchwell was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 153).

H. Dwayne Davidson was Old GM's Senior Manager for TREAD Reporting. (V.R. at 113-114, 117). Davidson received the November 2006 Adler E-mail. (V.R. at 114). Davidson thereafter conducted a search of Old GM's TREAD database that yielded over 700 records of field reports and complaints, which he offered to summarize. (V.R. at 114 n.477).

i. In February 2007, Wisconsin State Patrol Trooper Keith Young wrote a Collision Analysis & Reconstruction Report about a fatal crash in October 2006 of a 2005

Chevrolet Cobalt (the "**Wisconsin Report**"). Davidson stated that, in 2007, he obtained a copy of the Wisconsin Report. The Wisconsin Report stated that it appears likely that the vehicle's key turned to Accessory as a result of the low key cylinder torque/effort and connected this to the failure of the airbags to deploy. Davidson stated he obtained the Wisconsin Report from someone at Old GM Legal in 2007 and that he provided the Wisconsin Report to NHTSA in 2007 in connection with GM's quarterly death and injury report. None of the GM lawyers and engineers interviewed in connection with the Valukas Report who were working on Cobalt matters recall being aware of the Wisconsin Report until 2014. (V.R. at 116-118).

ii. Davidson was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 159).

I. Raymond DeGiorgio was an Old GM Design Release Engineer.[7] (V.R. at 37). A Design Release Engineer is responsible for a particular component or part in a vehicle. (V.R. at 37 n.114). He had worked at Old GM as a Design Release Engineer since 1991, focusing on vehicle switches. DeGiorgio was the project or lead design engineer for the Ignition Switch used in the 2003 Saturn Ion and 2005 Chevrolet Cobalt. (DeGiorgio Dep. 11:6-10; 13:7-10, 18-19). Additionally, he was the lead design engineer for an ignition switch that replaced the Ignition Switch. (DeGiorgio Dep. 11:11-15; 21:5-9). He took over responsibility as Design Release Engineeer for the Ignition Switch between October 1999 and March 2001. (V.R. at 6, 37, 212).

i. On March 22, 2001, DeGiorgio "finalized" the specification for the Ignition Switch, a designation that signaled to the supplier that additional changes to the switch

---

[7] Old GM's Design Release Engineers had responsibility for working with Old GM's suppliers to develop specific vehicle components for use in particular Old GM vehicles - their "design" responsibilities - and to ensure that those components satisfied Old GM's requirements and specifications before ultimately approving the part for use in an Old GM vehicle – "releasing" the part.

were not anticipated and memorialized accepted agreements related to the specification at that point in time. (V.R. at 38). The supplier for the Ignition Switch was Delphi Mechatronics ("**Delphi**"). The initial specification for the Ignition Switch included a "TARGET" force displacement curve specifying 20 Newton-centimeters ("**N-cm**") as the torque needed to turn the ignition from "Run" to "Accessory." (V.R. at 36). By March 2001, based on DeGiorgio's finalization of the torque requirement, the torque necessary to move the Ignition Switch from Run to Accessory was, pursuant to the specification, required to fall somewhere between 15 N-cm and 25 N-cm. (V.R. at 39). In September 2001, DeGiorgio corresponded with representatives of Koyo Steering Systems North America ("**Koyo**"), the supplier of the Ion steering column into which Delphi's switch was installed. In his correspondence, DeGiorgio stated he recently learned that 10 of 12 prototype switches from Delphi failed to meet engineering requirements, and the failure is significant, adding that DeGiorgio himself must ensure this new design meets engineering requirements. (V.R. at 44). According to DeGiorgio, the "engineering requirements" and failures he referenced in this e-mail were electrical requirements and not failures related to the Ignition Switch torque. (V.R. at 44-45).

ii. At the same time that DeGiorgio was dealing with electrical problems with the Ignition Switch, Delphi was also conducting tests on the mechanical requirements, including the torque required to turn the Ignition Switch. (V.R. at 45). In February 2002, Delphi personnel informed DeGiorgio that the accessory detent was at 9.5 N-cm, which was below DeGiorgio's requested target based on TALC samples, and advised DeGiorgio that the torque could be increased, but there were risks that changes would trigger other issues. These risks included cracking of the rotors, premature wear-out of the detent, and impact on the electrical functions (particularly the printed circuit board). (V.R. at 46-47).

iii. DeGiorgio approved production of the Ignition Switch, although it did not meet the Specification. (V.R. at 38-40, 50, 52). The Ignition Switch was installed in Saturn Ion and Chevrolet Cobalt vehicles. (*See, e.g.*, V.R. at 53).

iv. Problems with the Ignition Switch were brought to DeGiorgio's attention in 2003, 2004, and 2005. (V.R. at 53). These included at least one complaint that the Ignition Switch in a customer's vehicle had insufficient torque and caused that vehicle to shut off while driving. (V.R. at 77). In 2005, DeGiorgio received torque test results from Old GM's review of the Ignition Switch turning from the "Run" to the "Accessory" position in certain Chevrolet Cobalt vehicles. (DeGiorgio Dep. 58:4-19). DeGiorgio discussed changes to the Ignition Switch used in the Chevrolet Cobalt with John Hendler and later proposed changes to the Cobalt VAPIR Team. (2014 House Panel Report, e-mail from Raymond DeGiorgio to Andrew C. Brenz, dated Nov. 22, 2004 (GMHEC000330211-14)).

v. In 2006, DeGiorgio approved a change in the Ignition Switch that increased the torque required to turn the key, but there was no change to the part number. (V.R. at 9-10, 39). NHTSA was not informed of the change to the Ignition Switch. (Apr. 1 Cong. Hr'g at 75).

vi. On or about August 14, 2007, Old GM entered into a Warranty Settlement Agreement with Delphi (as a debtor in bankruptcy) where the estimated warranty costs could exceed $1 million (the "**Delphi Settlement**"). The Delphi Settlement identified 49 issues that were resolved as part of the settlement, including something labelled "ignition switch failure" on the model year 2003-04 Saturn Ion and model year 2005-06 Chevrolet Cobalt.

vii. DeGiorgio was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 179).

J. John Dolan was an electrical engineer for Old GM and, according to Everest, attended the May 2009 Continental Meeting. (V.R. at 134, 165).

i. Dolan was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 174 n.793).

K. Brian Everest, an engineer, was an Old GM Field Performance Assessment Supervisor. (V.R. at 114, 118-119). John Sprague an Old GM Field Performance Assessment Engineer stated that he generally remembers sharing his Excel spreadsheet listing the various Cobalt accidents and non-deployments with Everest, but he does not remember sharing the spreadsheet at any formal meeting. (V.R. at 119). Everest attended the May 2009 Continental Meeting. (V.R. at 134). At some point after that time, Everest investigated how the Cobalt's Body Control Module, the part responsible for controlling the engine, could send a power mode status of "Off" to the Sensing Diagnostic Module. (V.R. at 135).

i. Everest was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 153).

L. Michael Gruskin was an attorney for Old GM and then for New GM. (V.R. at 110). At some point in time, he headed GM's product litigation team. (V.R. at 105, 110). In addition, Gruskin chaired the Settlement Review Committee and the Roundtable[8] from September 2007 to March 2012. (V.R. at 107). During the time Gruskin chaired the Roundtable (which generally met on a weekly basis), the Roundtable reviewed the following crashes. First, in September 2007, the Roundtable reviewed a crash involving a person who sustained severe injuries after his 2005 Saturn Ion ran into the rear of an illegally parked tractor trailer on June 26, 2005 (the "**June 2005 Non-Fatal Crash**"). The presentation made at the

[8] The Roundtable is discussed *supra* at ¶15,C, ii.

Roundtable indicated that the Sensing Diagnostic Module data was incomplete and inaccurate, as a probable result of power loss during the crash. Second, in July 2008 the Roundtable reviewed a December 29, 2006 crash of a 2005 Chevrolet Cobalt which caused serious injuries and in which neither Old GM nor outside counsel had an explanation for why the airbag did not deploy. According to the Sensing Diagnostic Module data, the ignition was in the Run position at the time of the accident.

i. Gruskin was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

M. Victor Hakim was an Old GM employee, who, as of June 11, 2013, had been with Old GM and then New GM for 43 years. (Hakim Dep. 6:23-7:1). Hakim testified at his deposition that there was a summary Excel spreadsheet from the Old GM Company Vehicle Evaluation Program, which contained comments from drivers of Ion vehicles. (Hakim Dep. 155:9-15). The Old GM Company Vehicle Evaluation Program spreadsheet included a January 9, 2004 statement from one driver of a Saturn Ion that the Ignition Switch was positioned too low on the steering column, that the keys hit his knee while driving, that the Ignition Switch should be raised on the steering column at least one inch, that this was a basic design flaw, and that it should be corrected if Old GM wanted repeat sales. (Hakim Dep. 155:23-24; 156:22-157:5).

i. Hakim was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 145).

N. William Hohnstadt was an Old GM sensing performance engineer. (V.R. at 134). On July 16, 2007, Hohnstadt received Sensing Diagnostic Module data from Continental relating to a Cobalt crash in which the airbags did not deploy. The report concluded that the vehicle's Sensing Diagnostic Module had experienced loss of battery prior to the non-

deployment. (V.R. at 126, 127 n.543). According to one witness, Hohnstadt attended the May 2009 Continental Meeting. (V.R. at 134).

i. Hohnstadt was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

O. William J. Kemp was Old GM's Counsel for Engineering Organization, and was a member of Old GM's Settlement Review Committee. (V.R. at 104). He was an Old GM senior attorney who worked closely with the engineering groups and who had shared responsibility for safety issues in the legal department. (V.R. at 85). Kemp sat on the Settlement Review Committee, whose purpose was to determine whether and at what price to settle product liability lawsuits. "A reason for that assignment is to ensure that information from lawsuits finds its way into GM's safety function, that is, to the engineers who make safety decisions." (V.R. at 105, 108).

i. In the late spring of 2004, certain Old GM employees, including Gay Kent, discussed engine stalling with NHSTA. (V.R. at 72). On June 3, 2004, during the meeting with NHTSA, Old GM personnel presented their perspective on engine stalls—specifically, that those occurring on acceleration required more rigorous review. GM also represented to NHTSA that in assessing a given stall, it considered severity, incident rate, and warning to the driver. Kemp's notes related to this meeting indicate NHTSA told Old GM that, in a case where the number of failures was "inordinately high," the factors considered by Old GM to assess the problem should be considered but did not necessarily "immunize" a manufacturer from conducting a safety recall. (V.R. at 73-74).

ii. In or around June 2005, Kemp was informed of an article to be published in the Cleveland Plain Dealer that criticized Old GM's response to engine stall in the

Cobalt. Kemp suggested that Old GM should give the columnist a videotape demonstration showing the remoteness of this risk. Elizabeth Zatina, another Old GM attorney, responded that she was not optimistic we can come up with something compelling. Kemp replied that they can't stand hearing, after the article is published, that they didn't do enough to defend a brand new launch. (V.R. at 85-86).

iii. Kemp was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (V.R. at 151).

P. Gay Kent was Old GM's Director of Product Investigations. In or around 2005, Old GM Product Investigations Manager Douglas Wachtel assigned Old GM Product Investigations employee Elizabeth Kiihr to investigate the Cobalt Ignition Switch shut-off. (V.R. at 86). In addition, Wachtel and Gay Kent obtained a Cobalt and drove around Old GM's property in Warren, Michigan. Kent had a long and heavy key chain and was able to knock the Ignition Switch from "Run" to "Accessory" by moving her leg so that her jeans caused friction against the fob. Wachtel could reproduce the phenomenon more easily, but still only by contacting the key chain rather than hitting bumps in the road. (V.R. at 87).

i. On March 29, 2007, a group of Old GM engineers, including Gay Kent and Brian Everest, attended a Quarterly Review meeting at NHTSA headquarters. During that meeting, or during a break, NHTSA officials told the Old GM representatives that they had observed a number of airbag non-deployments in Cobalt and Ion vehicles. NHTSA made no formal request and did not ask Old GM to report back to it about the non-deployment issue.

ii. Kent was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

Q. Elizabeth Kiihr was an engineer in Old GM's Product Investigations unit.

i. Kiihr was assigned in or around 2005 to investigate the Cobalt Ignition Switch shut-off. (V.R. at 86).

ii. Kiihr created a file in 2005 that contained customer complaints and a copy of a February 2005 "Preliminary Information" on engine stalls in the Cobalt. (V.R. at 66, 156). The file contained, among other things: (a) several TREAD data reports regarding the Cobalt; (b) PowerPoint presentations, including presentations from an Investigation Status Review meeting in 2005 and a Vehicle and Progress Integration Review ("**VAPIR**")[9] meeting in 2005; (c) a cost estimate for changing the design of the key; and (d) a copy of a Product Investigation Bulletin titled "Engine Stalls, Loss of Electrical Systems, and No DTCs." (V.R. at 164).

iii. Kiihr was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

R. Alberto Manzor was an Old GM engineer.

i. Manzor became involved in the investigation of the Cobalt ignition switch in the spring of 2005. Manzor claims that he said, at the time, that the Cobalt ignition switch issue was incorrectly categorized as a moderate issue and should have been classified as a safety issue. (V.R. at 83). There was no documentary evidence of Manzor making such a statement. Manzor claims that he said that he discussed his safety concerns about the Cobalt, including the potential for airbag non-deployment, with Doug Parks, Gary Altman, and an Old GM safety engineer, Naveen Ramachandrarappa Nagapola, but these employees either do not recall or else deny the conversation took place. (V.R. at 83-84). On June 17, 2005, Manzor

---

[9] VAPIR (Vehicle and Process Integration Review), by design, includes a cross-section of Vehicle System Engineers because they are supposed to be able to recognize whether an issue impacts other functions within the vehicle. (V.R. at 66).

conducted testing on the Cobalt Ignition Switch, and the proposed GMT 191 Ignition Switch, at Old GM's Milford Proving Ground, to evaluate how the Ignition Switches performed using a key with a slotted key head versus a key head with a hole. (V.R. at 81). According to Manzor, these experiments demonstrated that changing the key head design and replacing the Ignition Switch had the potential to address the torque problem. They also demonstrated that the rotational torque required to move the key out of "Run" was 10 N-cm. This was below the specification of 15 to 25 N-cm. (V.R. at 82). However, neither Parks nor Manzor compared the test results to the actual specification.

ii. Following the tests, Manzor took steps to expedite the key-head design change of the ignition key. Later, in June 2005, the Old GM Vehicle and Process Integration Review Committee approved a service fix for existing customers—a plug that could be inserted into keys when customers came to the dealer reporting problems – and a change to the key for production in the future (a change that was not implemented). On July 12, 2005, another Preliminary Information was issued, stating (only for the 2005 Cobalt and 2005 Pontiac Pursuit) that a fix was available (the key insert). Certain Old GM engineers still regarded the key head design change as only a temporary solution – or, as one engineer described it, a "band-aid." (V.R. at 82-83).

iii. Manzor was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

S. Steven Oakley was a brand quality manager for Old GM in 2005 and had been continuously employed by Old GM since 1990. (Oakley Dep. 7:1-6, 18-20).

i. In or around March 2005, Oakley first became aware of an issue with the Ignition Switch. (Oakley Dep. 12:8-14, 16-19, 22-23; 14:9-22; *see also* V.R. at 86, 92).

Around that time, Oakley drafted a service bulletin request form describing the engine-cut-off problems as a stall, but the Technical Service Bulletin issued in December 2005 did not use that language. (V.R. at 76). Oakley has stated, at times, that he was reluctant to push hard on safety issues because of his perception that his predecessor had been pushed out of his job for doing just that. In this particular event, Oakley stated that his initial concern that the Ignition Switch presented a safety issue was alleviated after discussions with the engineers. (V.R. at 93).

ii. Oakley received a customer demand that Old GM repurchase the customer's Cobalt in May 2005 because the Ignition Switch shut off during normal driving with no apparent contact between the driver's knee and the key chain or fob. (V.R. at 76). Oakley forwarded this information internally at Old GM, stating that the customer reported that the ignition switch goes to the off position too easily shutting the car off. (V.R. at 76 n.309). Oakley told Old GM employee Joseph Joshua, to whom he forwarded the customer demand, that

> the field rep will swap the parts if we want them to. He is concerned that this will not correct the condition, as he feels several stock cars at the dealership have about the same level of effort for the switch. They would like to have a column sent to them that we have some kind of confidence is better than what they are taking out. Again, if you just want a swap out we can do this, but without the ability to measure the effort, I have a hard time persuading them this will actually fix the car.

(V.R. at 77).

iii. One of the people the e-mail was forwarded to was DeGiorgio, who does not remember receiving this e-mail. (V.R. at 77).

iv. Oakley was a Transferred Employee (as such term defined is defined in the Sale Agreement), after the 363 Sale.

T. Jaclyn C. Palmer was an Old GM product liability attorney and attended Roundtable meetings. (V.R. at 108). Palmer, described as an "airbag lawyer," received the

November 2006 Adler E-mail and forwarded it to Doug Brown, another Old GM airbag lawyer, so that he could be prepared for any potential claims related to the 2005 crash involving a Cobalt in which the airbag failed to deploy. (V.R. at 114, n.477). Palmer attended the May 2009 Continental Meeting. (V.R. at 135).

i. Palmer was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 140-141).

ii. Doug Parks was Old GM's Vehicle Chief Engineer for the Chevrolet Cobalt leading up to its launch. V.R. at 57-58). In late 2004, Parks asked Altman to follow up on a complaint that the driver had turned off a Cobalt by hitting his knee against the key fob (V.R. at 59-60). Altman was able to replicate the incident. (V.R. at 60). On May 4, 2005, Parks sent an e-mail to various Old GM personnel including Altman, regarding "GMX 001: Inadvertent Ign turn-off," writing, "for service, can we come up with a 'plug' to go into the key that centers the ring through the middle of the key and not the edge/slot? This appears to me to be the only real, quick solution." (Doc. 12).

iii. Parks was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

U. Manuel Peace was an Old GM Field Performance Assessment Engineer. He investigated at least three crashes in Saturn Ion or Chevrolet Cobalt vehicles, including the July 2004 Fatal Crash, the June 2005 Non-Fatal Crash, and the July 2005 Fatal Crash. (V.R. at 110, 112, 124, 126). Peace and Kathy Anderson were assigned to investigate the July 2004 Fatal Crash and the July 2005 Fatal Crash. Peace and the other Old GM investigators identified the July 2004 Fatal Crash as a crash in which there should have been an airbag deployment and that

it was reasonably likely that the deployment of the driver airbag would have prevented the occupant's death in this accident. (V.R. at 111-113).

i. In 2007, Old GM's Legal Staff was made aware of the June 2005 Non-Fatal Crash. (V.R. at 125-126). Manuel Peace and John Sprague were the Old GM Field Performance Assessment investigators and Doug Brown was the Old GM lawyer assigned to the June 2005 Non-Fatal Crash. (V.R. at 126). The investigation proceeded to a Roundtable presentation on September 18, 2007. (*Id.*).

ii. Peace was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

V. Craig St. Pierre worked for a company called Ortech, the supplier of the Chevrolet Cobalt ignition cylinder, as a supplier resident engineer for approximately five years. During this time, he maintained a desk at Old GM. (St. Pierre Dep. 7:10-13; 8:3-13; 10:1-18). During the launch of the Chevrolet Cobalt, St. Pierre learned that there was a problem with the ignition key turning from the "Run" to the "Accessory" position under normal operating conditions. He was made aware of this problem so that he could communicate back to Ortech. (St. Pierre Dep. 8:22-25; 10:1-8).

i. By September 13, 2005, St. Pierre and Trush determined that the detent effort in the Ignition Switch in the Cobalt was too low. (St. Pierre Dep. 14:11-15:3).

ii. In September 2005, regarding the Ignition Switch problem, St. Pierre stated in a Problem Resolution Tracking System Report that the detent efforts on Ignition Switch are too low allowing the key to be cycled to off position inadvertently. Changes to the key can be made to reduce the moment which can be applied to key by key ring/keys. This will assist in limiting the issue but will not completely eliminate it. Changes to the switch will not be

forthcoming from electrical group until model year 2007. (2005 PRTS, originated May 17, 2005, at GMHEC0000001748).

iii. David Kepczynski was an Old GM engineering group manager. In 2006, Kepczynski recommended closing the 2005 PRTS without action because the business case was not accepted by the program team. Kepczynski also stated that a service fix was already available and in the field. (2005 PRTS, originated May 17, 2005, at GMHEC000001750-1751).

W. Keith Schultz was Manager of Internal Investigations in Old GM's Product Investigations unit at or around March, 2007. (V.R. at 118).

i. After Old GM personnel returned from a March 29, 2007 meeting with NHTSA, in which NHTSA officials had told the Old GM representatives that they had observed airbag non-deployments in the Cobalt and Ion vehicles, Everest and John Sprague, an Old GM Field Performance Assessment airbag engineer, compiled information on Cobalt and Ion NISMs (as defined in paragraph 15, X) and lawsuits. Dwayne Davidson pulled the TREAD data for similar instances. (V.R. at 118). Sprague began compiling an Excel spreadsheet listing the various Cobalt accidents and non-deployments to look for trends, but he did not remember sharing the spreadsheet at any formal meeting. (V.R. at 118-119). Schultz sent an e-mail to Brian Everest and John Sprague on May 3, 2007, stating that they were planning to have a brief discussion on the Cobalt/Ion Air Bag non-deployment issue tomorrow as part of their bi-weekly Investigation Status Review and that they were both welcome to join for this discussion and that it may be helpful if at least one of them can. (V.R. at 119 n. 500).

ii. Schultz was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

X. John Sprague was an Old GM Field Performance Assessment Engineer. His job was to support Old GM's products liability defense team. (V.R. at 9). According to Everest, in 2007, Sprague was asked by Schultz to compile information on Cobalt and Ion not-in-suit matters and lawsuits. (V.R. at 118). Sprague investigated the June 2005 Non-Fatal Crash. (V.R. at 126). According to Everest, he also attended the May 2009 Continental Meeting. (V.R. at 134).

i. After the meeting with Continental in May 2009, Sprague collected information regarding power mode status, added it to his spreadsheet, and discovered that the power mode status was recorded as Off or Accessory in a number of accidents. (V.R. 135)

ii. Sprague was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 141).

Y. Lisa Stacey was an Old GM Field Performance Assessment engineer. (V.R. at 132). In late 2008 or early 2009, Old GM Field Performance Assessment engineers learned about a September 13, 2008 Cobalt crash in Stevensville, Michigan, which resulted in two deaths (the "**September 2008 Fatal Crash**"). After the September 2008 Fatal Crash was reported to an ESIS[10] employee, Old GM opened a "rumor file." (V.R. at 132). "Rumor files" were an informal tracking system by which ESIS investigators or other Old GM legal staff would start files on cases that were not formally involved in litigation but potentially could lead to litigation. (V.R. at 122). Rumor files were noted by some as being hard to track, difficult to access, and not easily searchable. Stacey reviewed the publicly available information, examined the vehicle, and visited the crash scene. She thought that this was an incident where an airbag deployment would have been expected. Old GM acquired the vehicle involved in the September

[10] ESIS acted as a claims administrator for Old GM and conducts field investigations and processes NISM claims. They maintained offices at Old GM and worked with Old GM's Legal Staff.

2008 Fatal Crash and provided the vehicle's Sensing Diagnostic Module to its supplier, Continental, for further analysis. (V.R. at 132). Stacey also attended the May 2009 Continental Meeting.

i. Stacey was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

Z. David Trush was the Old GM design engineer for the ignition cylinder and key of the 2005 Chevrolet Cobalt. (Trush Dep. 11:1-3). In 2004, Trush first learned of a concern that the Saturn Ion's key could move from the "Run" position to the "Accessory" position after receiving a call from an Old GM employee. (Trush 20:11-16; 21:10-17). Trush did not recall the specifics of the conversation.

i. At some point, Trush became aware of an incident occurring in the Fall of 2004 involving a Chevrolet Cobalt in which, while driving the vehicle, the driver's knee bumped the key in such a manner as to turn off the ignition. (Trush Dep. 32:22-33:9).

ii. Trush testified that, as of February 2009, he had feedback from the Lordstown, Ohio, plant that assembled the Chevrolet Cobalt that, while installing the steering column in a vehicle, the workers at the plant were inadvertently hitting the ignition key and moving the key to different positions. (Trush Dep. 108:20-111-21).

iii. Trush was a Transferred Employee (as such term is defined in the Sale Agreement), after the 363 Sale.

AA. Douglas Wachtel was a manager in Old GM's Product Investigations unit.

i. Wachtel was copied on the November 2006 Adler E-mail. (V.R. at 114). In his e-mail response to Adler, Wachtel reviewed existing field actions involving the Cobalt and recommended that Old GM acquire Event Data Recorder data. (V.R. at 114 n.477).

Wachtel was sent an e-mail from an Old GM employee, Christopher Janik, that contained a summary of the two Cobalt frontal airbag non-deployment claims in the NHTSA database. (*Id.*).

ii. In March-April 2007, Old GM's technical bulletin group proposed publishing a revised version of the December 2005 Service Bulletin that would change the subject line to include the word "stalls." The proposed title was: "Information on Inadvertent Turning off of Key Cylinder, Loss of Electrical System, Hesitation, Stalls and No DTCs Set." (V.R. at 120).

iii. On April 24, 2007, Wachtel (then Old GM Senior Manager – Internal Investigation, Product Investigations) provided his approval to add the word "stall" to the symptoms section of the bulletin. Wachtel later forwarded this e-mail chain to Gay Kent.

iv. Old GM had no record of publication of the 2007 Technical Service Bulletin. (*See, e.g.,* V.R. at 145).

v. Kemp instructed Wachtel to open a 2011 Product Investigation into the ignition switch issue, and Wachtel assigned the investigation to Brian Stouffer. (V.R. at 145)

vi. During this investigation, Stouffer was given material regarding the 2005 Cobalt moving stall and quickly located the December 2005 Service Bulletin. (V.R. at 145).

vii. Wachtel was a Transferred Employee (as such term is defined on the Sale Agreement), after the 363 Sale. (*See, e.g.,* V.R. at 145).

BB. In February 2007, ESIS Claims Administrator Kristy Gibb received a copy of Wisconsin State Trooper Keith Young's "Collision Analysis & Reconstruction Report." (V.R. at 112).

CC. In September 2006, Dykema Gossett, LLP, an Old GM outside law firm, sent to Old GM's legal staff a case evaluation regarding the July 2004 Fatal Crash. (V.R. at 112).

DD. In May 2007, Hartline, Dacus, Berger & Dryer, LLP (**"Hartline Dacus"**) submitted to Old GM an evaluation of an airbag non-deployment crash involving the November 2004 Fatal Crash that said that Old GM's FPA engineer did not determine precisely how the vehicle lost power. (V.R. at 124-125). In January 2008, Hartline Dacus submitted its second evaluation of the November 2004 Fatal Crash to Old GM. (V.R. at 129-130).

EE. The Captured Test Fleet was a group of early production cars driven by Old GM employees who were charged with identifying problems before launch. (V.R. at 58).

FF. Captured Test Fleet reports were organized by the Old GM Quality Group and spreadsheets were sent to the chief engineer, the Program Engineering Manager, and the program team, and were discussed at weekly team meetings. (V.R. at 300).

15. Old GM collected data from unspecified vehicles equipped with the OnStar Advanced Automated Crash Notification during the time period of May 2005-2006. (*See A Study of US Crash Statistics From Automated Crash Notification Data* by M.K. Verma, R.C. Lange and D.C. McGarry, General Motors Corp., ESV paper number 07-0058-0, available at *http://www-nrd.nhtsa.dot.gov/pdf/esv/esv20/07-0058-O.pdf*). During that time period, there were 1,045 recorded frontal crashes with frontal airbag deployment in the unspecified Advance Automated Crash Notification equipped vehicles. In addition, there were 356 cases of 'non-deployment' in unspecified Advanced Automated Crash Notification equipped vehicles where the predetermined thresholds for Advanced Automated Crash Notification in frontal impact were

reached or exceeded. The study does not indicate whether data was collected from any of the Subject Vehicles. (*Id.*).

16. According to Bill Merrill (an Old GM Red X North America Manager whom Old GM Product Investigations engineer Brian Stouffer emailed to request assistance from the Red X team to examine changes on the Cobalt between 2007 and 2008 model years), at his March 18, 2014 interview – "if an [Old GM] employee tried to raise a safety issue five years ago, the employee would get pushback." (V.R. at 187, 252).

17. Old GM employee Andrew Brenz or Alberto Manzor described a GM phenomenon of avoiding responsibility, as the "'GM Salute,' a crossing of the arms and pointing outward towards others, indicating that the responsibility belongs to someone else, not me." (V.R. at 255).

18. New GM CEO Mary Barra "described a phenomenon known as the 'GM Nod.'" In one part of the Report, Barra described the nod as "when everyone nods in agreement to a proposed plan of action, but then leaves the room with no intention to follow through, and the nod is an empty gesture." (V.R. at 256). In another part of the Report, it is described as "when everyone nods in agreement to a proposed plan of action, but then leaves the room and does nothing." (V.R. at 2).

19. Barra stated that problems occurred during a prior vehicle launch as a result of engineers being unwilling to identify issues out of concern that it would delay the launch. (V.R. at 252).

20. Barra testified that a cost-benefit analysis on a safety issue or a safety defect is not acceptable. (Apr. 1 Cong. Hr'g, at 32).

21. New GM informed NHTSA in July 2014 that, in 2003, GM learned of a customer complaint of intermittent vehicle shut offs in a MY 2003 Grand Am from a Michigan dealership. Despite multiple attempts, the dealership could not duplicate the condition. GM's Brand Quality Manager for the Grand Am personally visited the dealership and requested that the customer demonstrate the problem. The customer had an excess key ring and mass (containing approximately 50 keys and a set of brass knuckles), and was able to recreate the shut off upon driving over a speed bump at approximately 30-35 mph.

22. On January 7, 2003, GM opened Problem Resolution Tracking System 0084/2003. On May 22, 2003, GM issued a voicemail to dealerships describing the condition and identifying the relevant population of vehicles as 1999 through 2003 MY Chevrolet Malibu, Oldsmobile Alero, and Pontiac Grand Am. The notice directed dealers to pay attention to the key size and mass of the customer's key ring in order to better diagnose the customer's complaint. On July 24, 2003, Engineering Work Order (EWO) 211722 was initiated to increase the detent plunger force on the ignition switch replacing P/N 22688239 with P/N 22737173. This was a running change made in 2004 to the Malibu, Grand Am and the Alero. The production and service stock disposition for P/N 22688239 was designated "use," so it is possible that P/N 22688239 was used to service vehicles. New GM informed NHTSA in July 2014 that, on March 17, 2004, EWO 317693 was initiated to increase the detent plunger force on the ignition switch on the Grand Prix in order to maintain commonality between the Grand Prix and the Malibu, Grand Am and the Alero. The old Grand Prix part number, P/N10310896, was not changed to a new part number when the detent plunger force was changed, rather P/N 10310896 remained the part number for the new ignition switch. The service stock disposition was designated "use," so it is possible that the old switch was used to service vehicles.

23. Chris Johnson was General Counsel of GM North America from October 15, 2001 until October 31, 2008.

24. On September 1, 2006, Robert Osborne succeeded Thomas Gottschalk as Old GM's General Counsel and maintained that position until July 2009.

25. Michael Robinson was General Counsel of GM North America from November 1, 2008 until September 30, 2009.

26. From 2001 through early July 2009, the General Counsel of GM North America for Old GM reported to Old GM's General Counsel.

27. Prior to the 363 Sale, Old GM initiated at least eight vehicle recalls in 2009 that were unrelated to the Ignition Switch Defect. *See* Recalls 09V036000; 09V073000; 09V080000; 09V116000; 09V153000; 09V154000; 09V155000; 09V172000.

Exhibit A

EXHIBIT A

CERTAIN PLAINTIFFS' PROPOSED STIPULATIONS OF FACT NOT AGREED TO BY NEW GM

1. On November 19, 2004, Old GM personnel opened a Problem Resolution Tracking System report to address a complaint at a press event that a Subject Vehicle could be "keyed off with knee while driving. This was the first of six reports opened between 2004 and 2009 in connection with moving stalls in the Cobalt." (V.R. at 63). As part of the November 19, 2004 Problem Resolution Tracking System investigation, Old GM engineers suggested solutions to address the complaint that the ignition could be "keyed off with knee while driving," and presented them to the Current Production Improvement Team. (V.R. at 64-68).

2. As Old GM's Program Engineering Manager for the Chevrolet Cobalt when it was launched, Gary Altman would have been present at Current Production Improvement Team and Vehicle and Process Integration Review meetings in which possible solutions were presented to address reports that drivers had inadvertently turned off the ignition switch in Cobalt vehicles by hitting their knees against the key or key fob. (V.R. at 63-67).

3. A May 2007 case evaluation, by Old GM's outside counsel, of an accident in a 2004 Saturn Ion in which the airbag failed to deploy despite the fact that the vehicle went off the road, traveled through a brush line and struck a tree head on, resulting in one fatality and one severe injury, was deemed "unusual." "In discussing the technical issues in the case, outside counsel explained that, given the severity of the impact, the airbag non-deployment 'must be' attributable to power loss." (V.R. at 124-125).

4. A January 2008 second evaluation by Old GM outside counsel of a non-deployment case involving a Subject Vehicle hitting a tree concluded that "[t]he impact with the

tree was clearly severe enough to warrant deployment of the vehicle's airbags. As a result, from a technical standpoint, there is a potential problem with the non-deployment, which was originally attributed to a pre-collision power loss." While outside counsel and Old GM Field Performance Assessment Engineer Manuel Peace thought the non-deployment event was not caused by a power loss, outside counsel concluded that "it was likely 'that a jury will find that the vehicle was defective' [and] GM eventually settled the case in 2008." (V.R. at 129-30).

5. In March 2009, Old GM CEO Rick Wagoner had a "back-up" slide of a slide deck that included a reference to the Cobalt's inadvertent shut-off issue, that was presented at a meeting of the Vehicle Program Review team. That slide, in a 72-page slide presentation, described a proposed change in the Cobalt's key design from a slot to a hole. The slide deck was found in the data collected from Wagoner's computer from March 2009. (V.R. at 245).

6. In furtherance of Old GM's admitted culture of avoiding responsibility, an Old GM 2008 Q1 Interior Technical Learning Symposium presentation provided examples of comments and phrases employees should avoid using in reports:

i. "This is a lawsuit waiting to happen . . ." ; "Unbelievable Engineering screw up . . . "; "This is a safety and security issue . . ."; "Scary for the customer . . . "; "Kids and wife panicking over the situation . . . "; "I believe the wheels are too soft and weak and could cause serious problems. . ."; "Dangerous . . . almost cause accident."

ii. The presentation also stated that documents used for reports and presentations should only concern engineering results, facts, and judgments. Some examples of words or phrases that are to be avoided are: ***always*** (emphasis in original), annihilate, apocalyptic, bad, Band-Aid, big time, brakes like an "X" car, cataclysmic, catastrophic, Challenger, chaotic, Cobain, condemns, Corvair-like, crippling, critical, dangerous, deathtrap,

debilitating, decapitating, ***defect*** (emphasis in original), defective, detonate, disemboweling, enfeebling, evil, eviscerated, explode, failed, failure, flawed, genocide, ghastly, grenadelike, grisly, gruesome, Hindenburg, Hobbling, Horrific, impaling, inferno, Kevorkianesque, lacerating, life-threatening, maiming, malicious, mangling, maniacal, mutilating, ***never*** (emphasis in original), potentially-disfiguring, powder keg, problem, rolling sarcophagus (tomb or coffin), safety, safety related, serious, spontaneous combustion, startling, suffocating, suicidal, terrifying, Titanic, tomblike, unstable, widow-maker, words or phrases with biblical connotation, you're toast.

7. "In addition to being trained on how to write, a number of GM employees reported that they did not take notes at all critical safety meetings because they believed GM lawyers did not want such notes taken." (V.R. at 254).

8. Between the years 2003 and 2012, consumers raised 133 warranty claims with GM dealers about 2003-2007 Ion vehicles, 2005-2007 Cobalt vehicles, 2006-2007 HHR vehicles, a 2006 Solstice, and two 2007 G5 vehicles, that unexpectedly stalled or turned off when going over bumps or when the key was struck. (Supplemental Memorandum, dated April 1, 2014, U.S. House of Representatives Committee on Energy and Commerce Democratic Staff, at 1-2, which can be found at:

http://democrats.energycommerce.house.gov/sites/default/files/documents/Supplemental-Memo-GM-Warranty-Claims-2014-4-1.pdf.

Exhibit C

Groman Plaintiffs' Disputed Stipulated Facts

1. From at least 2001 through early July 2009, the Old GM "lawyers in charge of safety issues … reported to the General Counsel of GM North America." (V.R. at 104).

2. From at least 2001 through early July 2009, the Old GM "lawyers in charge of product liability litigation reported to the General Counsel of GM North America." (V.R. at 104).

3. During his employment, William Kemp reported to the General Counsel of GM North America. (V.R. at 104).

4. During his employment, Larry Buonomo reported to the General Counsel of GM North America. (V.R. at 104).

5. As of the date of the filing of Old GM's bankruptcy case, Michael Robinson was aware of and possessed information that drivers of Subject Vehicles had experienced moving stalls while driving Subject Vehicles.

6. As of the date of the filing of Old GM's bankruptcy case, Michael Robinson was aware of and possessed information that some or all of the moving stalls were related to a defective Ignition Switch.

7. Before commencement of Old GM's bankruptcy case, William Kemp provided information about moving stalls experienced in Subject Vehicles to Chris Johnson.

8. Before commencement of Old GM's bankruptcy case, William Kemp provided information about moving stalls experienced in Subject Vehicles to Michael Robinson.

9. Before commencement of Old GM's bankruptcy case, William Kemp provided information about the defective Ignition Switches to Chris Johnson.

10. Before commencement of Old GM's bankruptcy case, William Kemp provided information about the defective Ignition Switches to Michael Robinson.

11. Before commencement of Old GM's bankruptcy case, Larry Buonomo was an Old GM lawyer in charge of product liability litigation.

12. Before commencement of Old GM's bankruptcy case, Larry Buonomo provided information about moving stalls experienced in Subject Vehicles to Chris Johnson.

13. Before commencement of Old GM's bankruptcy case, Larry Buonomo provided information about moving stalls experienced in Subject Vehicles to Michael Robinson.

14. Before commencement of Old GM's bankruptcy case, Larry Buonomo provided information about the defective Ignition Switches to Chris Johnson.

15. Before commencement of Old GM's bankruptcy case, Larry Buonomo provided information about the defective Ignition Switches to Michael Robinson.

16. Before commencement of Old GM's bankruptcy case, Chris Johnson provided information about moving stalls experienced in Subject Vehicles to Robert Osborne.

17. Before commencement of Old GM's bankruptcy case, Chris Johnson provided information about moving stalls experienced in Subject Vehicles to Thomas Gottschalk.

18. Before commencement of Old GM's bankruptcy case, Chris Johnson provided information about the defective Ignition Switches to Robert Osborne.

19. Before commencement of Old GM's bankruptcy case, Chris Johnson provided information about the defective Ignition Switches to Thomas Gottschalk.

20. Before commencement of Old GM's bankruptcy case, Michael Robinson provided information about moving stalls experienced in Subject Vehicles to Robert Osborne.

21. Before commencement of Old GM's bankruptcy case, Michael Robinson provided information about the defective Ignition Switches to Robert Osborne.

22. During the pendency of Old GM's bankruptcy case, Robert Osborne provided information about moving stalls experienced in Subject Vehicles to Michael Millikin.

23. During the pendency of Old GM's bankruptcy case, Robert Osborne provided information about the defective Ignition Switches to Michael Millikin.

24. The Delphi Settlement's reference to the phrase "ignition switch failure" is the defective Ignition Switch.

25. Larry Buonomo was involved in or participated in some manner in the Delphi Settlement.

26. Larry Buonomo received information that the phrase "ignition switch failure," which is mentioned on the chart attached to the Delphi Settlement, refers or relates to the defective Ignition Switch.

27. Larry Buonomo provided information regarding the "ignition switch failure" mentioned on the chart attached to the Delphi Settlement to Chris Johnson.

28. William Kemp was involved in or participated in some manner in the Delphi Settlement.

29. William Kemp received information that the phrase "ignition switch failure," which is mentioned on the chart attached to the Delphi Settlement, refers or relates to the defective Ignition Switch.

30. William Kemp provided information regarding the "ignition switch failure" mentioned on the chart attached to the Delphi Settlement to Chris Johnson.

31. Chris Johnson was involved in or participated in some manner in the Delphi Settlement.

32. Chris Johnson received information that the phrase "ignition switch failure," which is mentioned on the chart attached to the Delphi Settlement, refers or relates to the defective Ignition Switch.

33. Chris Johnson provided information regarding the "ignition switch failure" mentioned on the chart attached to the Delphi Settlement to Robert Osborne.

34. Robert Osborne was involved in or participated in some manner in the Delphi Settlement.

35. Robert Osborne received information that the "ignition switch failure" mentioned on the chart attached to the Delphi Settlement refers or relates to the defective Ignition Switch.

36. Robert Osborne provided information regarding the "ignition switch failure" mentioned on the chart attached to the Delphi Settlement to Frederick "Fritz" Henderson.

37. Frederick "Fritz" Henderson was involved in or participated in some manner in the Delphi Settlement.

38. Frederick "Fritz" Henderson received information that the phrase "ignition switch failure," which is mentioned on the chart attached to the Delphi Settlement, refers or relates to the defective Ignition Switch.

39. Before commencement of Old GM's bankruptcy case, the following Old GM officers, managers, or employees (among others named) were aware of the defective Ignition Switch:

    (a) Rick Wagoner;
    (b) Thomas G. Stephens;
    (c) John Calabrese;
    (d) Alicia Boler-Davis;
    (e) Jim Frederico;
    (f) Terry Woychowski;
    (g) Each GM employee fired by New GM in connection with the subject matter of the Valukas Report.

40. Before commencement of Old GM's bankruptcy case, the following Old GM officers, managers, or employees (among others named) were aware of the liabilities or potential legal exposure to Old GM arising from or related to the defective Ignition Switch:

    (a) Rick Wagoner;
    (b) Thomas G. Stephens;

(c) John Calabrese;
(d) Alicia Boler-Davis;
(e) Jim Frederico;
(f) Terry Woychowski;
(g) Each GM employee fired by New GM in connection with the subject matter of the Valukas Report.

41. Both Old GM and New GM implemented internal controls and compliance procedures designed to ensure compliance with the reporting and other legal requirements of the Safety Act and TREAD Act.

42. Senior compliance officers at Old GM had final authority to report safety issues to NHTSA.

43. Old GM's senior compliance officers were senior executives within various departments of Old GM, including the general counsel's office.

44. Before entry of the Sale Order, Old GM disclosed the defective Ignition Switch or related potential claims to the U.S. Government.

45. Before entry of the Sale Order, Old GM did not disclose the defective Ignition Switch or related potential claims to the U.S. Government.

46. Before entry of the Sale Order, Old GM and the U.S. Government had discussions or other communications concerning whether potential claims arising from the defective Ignition Switch should be retained liabilities of Old GM or assumed liabilities of New GM.

47. Before entry of the Sale Order, Old GM and the U.S. Government had no discussions or other communications concerning whether potential claims arising from the defective Ignition Switch should be retained liabilities of Old GM or assumed liabilities of New GM.

48. Before entry of the Sale Order, Old GM and the U.S. Government reached no agreement concerning whether potential claims arising from the defective Ignition Switch should be retained liabilities of Old GM.

49. Prior to the commencement of Old GM's bankruptcy case, Old GM employees who participated in a Company Vehicle Evaluation Program ("**CVEP**") with respect to the Subject Vehicles submitted incident reports to Old GM that reflected that the Old GM employees experienced moving stalls and/or accidents where the keys moved into the 'Accessory' or 'Off' position.

50. Prior to the commencement of Old GM's bankruptcy case, Old GM employees who participated in a CVEP with respect to the Subject Vehicles submitted incident reports to Old GM that reflected that the airbags did not deploy in frontal collisions.

51. Prior to the commencement of Old GM's bankruptcy case, Old GM received warranty reports from dealers concerning Subject Vehicles in the CVEP that that the driver experienced moving stalls and/or accidents where the keys moved into the 'Accessory' or 'Off' position.

52. Prior to the commencement of Old GM's bankruptcy case, Old GM received warranty reports from dealers concerning Subject Vehicles in the CVEP that that the driver experienced a frontal collision where the airbag did not deploy.

53. NHTSA sent nineteen "death inquiries" to GM regarding crashes of Subject Vehicles. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

54. A "death inquiry" that an automaker receives from NHTSA requests further information regarding data reported by the automaker in an EWR. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

55. NHTSA sent "death inquiries" to GM regarding the fatal crashes of Benjamin Hair and Amy Kosilla, who each were driving Subject Vehicles. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

56. In response to these "death inquiries," GM did not explain to NHTSA the cause of the crashes. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

57. At the time of those death inquiries, GM was aware that the accident at issue involved a moving stall and airbag non-deployment.

58. In connection with NHTSA's death inquiry for the 2006 Wisconsin Fatal Crash, GM told NHTSA that it did not have sufficient reliable information to accurately assess the cause of the incident. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

59. At the time of the death inquiry for the 2006 Wisconsin Fatal Crash, GM was aware that the accident at issue involved a moving stall and airbag non-deployment.

60. In connection with NHTSA's death inquiry of a 2009 crash of an Subject Vehicle in Tennessee, GM told NHTSA that it had not looked into the circumstances of the crash. Ruiz, Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

61. At the time GM told NHTSA that it had not looked into the circumstances of the 2009 crash in Tennessee, GM had already in fact conducted a review of that crash. Ruiz,

Rebecca R. and Ivory, Danielle, *Documents Show General Motors Kept Silent on Fatal Crashes*, New York Times, July 15, 2014.

62. At the time of the death inquiry for the 2009 crash in Tennessee, GM was aware that the accident at issue involved a moving stall and airbag non-deployment.

63. In each of the six lawsuits involving non-deployment of airbags in Subject Vehicles prior to commencement of Old GM's bankruptcy case, Old GM's legal department was aware that accident related to a moving stall.

64. At all times between 2000 through commencement of Old GM's bankruptcy case, Old GM submitted Early Warning Reports ("**EWR**") to NHTSA pursuant to 49 CFR § 579.21(b)(1).

65. According to EWRs submitted to NHTSA before commencement of Old GM's bankruptcy case, Old GM had received information about at least 503 accidents in which it was alleged or proved that the death or injury reported in the EWR was caused by a possible defect in Subject Vehicles.

66. These accidents reported in Old GM's EWRs before commencement of Old GM's bankruptcy case include at least:

    a. 317 claims relating to a Chevrolet Cobalt;
    b. 98 claims relating to a Saturn Ion;
    c. 54 claims relating to a Chevrolet HHR;
    d. 19 claims relating to a Pontiac Solstice;
    e. 10 claims relating to a Pontiac G5; and
    f. 5 claims relating to a Saturn Sky.

67. Before commencement of Old GM's bankruptcy case, the EWR data was accessible by Old GM.

68. Old GM did not disclose to the Bankruptcy Court any of, or only a few of, the 503 or more accidents identified in the EWR data referenced in paragraph 66 hereof or any claims arising therefrom.

69. Subsequent to the 363 Sale, New GM submitted EWRs to NHTSA concerning Subject Vehicles.

70. Had Old GM conducted a recall of the Subject Vehicles before commencement of Old GM's bankruptcy case, the recall would have cost Old GM several hundred million dollars or more [or, alternatively, $_____. (NOTE: GM to suggest amount)].

71. At some point between 2007 and the commencement of Old GM's bankruptcy case, John Sprague hypothesized that the defective Ignition Switch caused the airbag non-deployments in some or all of the Subject Vehicles. (V.R. at 9)

72. Raymond DeGiorgio was granted authority under Old GM's chain of authority and/or policies and procedures to approve a change to the ignition switch. (V.R. at 101).

73. At all times between 2001 and 2008, under Old GM's chain of authority and/or policies and procedures, Raymond DeGiorgio was authorized to approve or disapprove the inclusion and use of an ignition switch in a new vehicle. (V.R. at 101).

74. When the ignition switch is turned to Accessory or Off, a Subject Vehicle would lose power brakes. (V.R. at 25).

75. In 2003, Old GM became aware of Saturn customer complaints about intermittent engine stalls while driving. (V.R. at 54).

76. In October 2003, a Field Performance Report, 3101/2003/US, lists 65 Ion stalls and states: "Customers comment of intermittent stall while driving. In most cases, there are no trouble codes associated with the stall." This Field Performance Report lists a vehicle with 15 miles as the youngest vehicle affected. (V.R. at 54-55).

77. Before 2008, a handful of Old GM engineers other than Raymond DeGiorgio also received information describing the change to the Ignition Switch for the model year 2008 Chevrolet Cobalt, including four engineers who received a June 30, 2006 email from Delphi to DeGiorgio stating that the detent plunger had been changed "to increase torque forces to be within specification." (V.R. at 102).

78. When first told of the defective Ignition Switch in or about March 2005, Steven Oakley formed the view that the defective Ignition Switch was a safety issue. (V.R. at 76).

79. In or about November 15, 2004, one individual was killed and another was severely injured in a crash involving a 2004 Saturn Ion where the airbags did not deploy. (V.R. at 124). Manuel Peace, an Old GM engineer who assisted Old GM's legal department in evaluating cases, did a case evaluation for this incident. (V.R. at 124). In his case evaluation, Peace stated he had never seen a situation like this where the airbags did not deploy, and that the best explanation for why the airbags did not deploy was that the vehicle lost power. (V.R. at 125)

80. At some point between 2007 and the commencement of Old GM's bankruptcy case, John Sprague and the Field Performance Assessment team observed a pattern of airbag non-deployments in Cobalts and Ions. (V.R. at 9, 118-19, 134).

81. At the time John Sprague and Brian Everest met with Continental, Sprague and Everest knew that the rotation of the ignition switch from Run to Accessory or Off could cause the Sensing and Diagnostic Module to receive a power mode message of Accessory or Off. (V.R. at 135).

82. At or about the time of the meeting with Continental in May 2009, Brian Everest and John Sprague had spoken with members of Old GM's Product Investigations group about the non-deployment of airbags in Cobalts. (V.R. at 135).

83. Joseph Taylor, an Old GM Program Quality Manager who administered the Captured Test Fleet program for the Chevrolet Cobalt drove a 2005 Cobalt test vehicle and personally experienced moving stalls with the Cobalt. (V.R. at 58).

In re: **MOTORS LIQUIDATION COMPANY, *et al.*, f/k/a General Motors Corp., *et al.*,** **Debtors.**	Chapter 11 Case No. 09-50026 (REG) (Jointly Administered)

AGREED UPON AND DISPUTED STIPULATIONS OF FACT REGARDING THE EQUITABLE MOOTNESS THRESHOLD ISSUE[1]

Pursuant to this Court's *Supplemental Scheduling Order, Dated July 11, 2014, Regarding (i) the Motion of General Motors LLC Pursuant to 11 U.S.C. §§ 105 and 363 to Enforce the Court's July 5, 2009 Sale Order and Injunction, (ii) the Objection Filed by Certain Plaintiffs in Respect Thereto, and (iii) Adversary Proceeding No. 14-01929* (the "July Scheduling Order"), Wilmington Trust Company, as trustee for and trust administrator of the Motors Liquidation Company GUC Trust (the "GUC Trust"), and certain unaffiliated holders of beneficial units of

[1] Unless otherwise indicated, capitalized terms not defined herein shall have the meanings ascribed to them in the July Scheduling Order (as defined herein).

the Motors Liquidation Company GUC Trust (each, a "Unitholder" and collectively, the "Unitholders") hereby submit the following agreed upon stipulations of fact concerning the Equitable Mootness Threshold Issue (the "Equitable Mootness Stipulations").

In addition, annexed hereto as Attachment 1 is the GUC Trust's and the Unitholders' proposed stipulations of fact that have not been agreed to by the other Counsel for the Identified Parties.

THE GENERAL MOTORS CORPORATION BANKRUPTCY

1. On June 1, 2009, General Motors Corporation ("Old GM") and three of its direct and indirect subsidiaries, Saturn, LLC, n/k/a MLCS, LLC ("MLCS"), Saturn Distribution Corporation, n/k/a MLCS Distribution Corporation ("MLCS Distribution"), and Chevrolet-Saturn of Harlem Inc., n/k/a MLC of Harlem, Inc. ("MLCS Harlem" and collectively with Old GM, MLCS, and MLCS Distribution, the "Debtors") commenced cases under chapter 11 of title 11 of the United States Code in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court").

2. On July 10, 2009, each of the Debtors consummated a sale of substantially all of its assets in a transaction under Section 363 of the Bankruptcy Code (the "363 Sale") to an acquisition vehicle, NGMCO, Inc., pursuant to (i) that certain Amended and Restated Master Sale and Purchase Agreement, dated June 26, 2009, among the Debtors and New GM (as amended, the "Sale Agreement"), and (ii) an order of the Bankruptcy Court, dated July 5, 2009 (the "Sale Order"). Following the 363 Sale, Old GM changed its name to Motors Liquidation Company ("MLC") and the acquisition vehicle later became General Motors LLC ("New GM").

3. The consideration provided by New GM to the Debtors under the Sale Agreement was set forth in the Sale Decision as follows:

"Old GM is to receive consideration estimated to be worth approximately $45 billion, plus the value of equity interests that it will receive in New GM. It will come in the following forms:

i. a credit bid by the U.S. Treasury and EDC, who will credit bid the majority of the indebtedness outstanding under their DIP facility and the Treasury Prepetition Loan;

ii. the assumption by New GM of approximately $6.7 billion of indebtedness under the DIP facilities, plus an additional $1.175 billion to be advanced by the U.S. Treasury under a new DIP facility (the 'Wind Down Facility') whose proceeds will be used by Old GM to wind down its affairs;

iii. the surrender of the warrant that had been issued by Old GM to Treasury in connection with the Treasury Prepetition Loan;

iv. 10% of the post-closing outstanding shares of New GM [(the "New GM Common Stock")], plus an additional 2% if the estimated amount of allowed prepetition general unsecured claims against Old GM exceeds $35 billion;

v. two warrants, each to purchase 7.5% of the post-closing outstanding shares of New GM, with an exercise price based on a $15 billion equity valuation and a $30 billion equity valuation, respectively [(the two series of warrants, the "New GM Warrants")]; and

vi. the assumption of liabilities, including those noted [in the Sale Decision]." Sale Decision, at 18-19.

4. The New GM Common Stock and both series of New GM Warrants (collectively, the "New GM Securities") are currently listed on the New York Stock Exchange.

5. New GM and the Debtors further agreed that New GM would provide additional consideration if the aggregate amount of allowed general unsecured claims against the Debtors exceed $35 billion. (*See* Sale Agreement, § 3.2(c)). In that event, New GM will be required to issue additional shares of New GM Common Stock for the benefit of the GUC Trust's beneficiaries. (*See id.*). The number of additional shares of New GM Common Stock to be issued will be equal to the number of such shares, rounded up to the next whole share, calculated by multiplying (i) 30 million shares (adjusted to take into account any stock dividend, stock split, combination of shares, recapitalization, merger, consolidation, reorganization or similar transaction with respect to such New GM Common Stock from and after the closing of the 363 Sale and before issuance of additional shares) and (ii) a fraction, (A) the numerator of which is the amount by which allowed general unsecured claims exceed $35 billion (such excess amount being capped at $7 billion) and (B) the denominator of which is $7 billion."[2] (*See* Motors Liquidation Company GUC Trust Quarterly GUC Trust Reports as of September 30, 2013 at 6).

6. On September 16, 2009, the Bankruptcy Court entered its *Order Pursuant to Section 502(b)(9) of the Bankruptcy Code and Bankruptcy Rule 3003(c)(3) Establishing the Deadline for Filing Proofs of Claim (Including Claims Under Section 503(b)(9) of the Bankruptcy Code) and Procedures Relating Thereto and Approving the Form and Manner of Notice Thereof* (the "Bar Date Order"). (Dkt. No. 4079).

---

[2] *See* Second Amendment to Sale Agreement, Section 2(r) (amending Section 3.2(c) of the Sale Agreement) ("Sellers may, at any time, seek an Order of the Bankruptcy Court ... estimating the aggregate allowed general unsecured claims against Sellers' estates ... [and if] the Bankruptcy Court makes a finding that the estimated allowed general unsecured claims against Sellers' estates exceed $35,000,000,000, then Purchaser will ... issue additional shares of Common Stock ...."). While the Sale Agreement initially provided for the issuance of up to 10,000,000 additional shares, this number has subsequently been adjusted for the three-for-one split of New GM Common Stock. (*See Disclosure Statement for Debtors' Amended Joint Chapter 11 Plan* at 17-18 n.2). (Dkt. No. 8023).

7. Pursuant to the Bar Date Order, the Bankruptcy Court established November 30, 2009 as the deadline for each person or entity to file a proof of claim against any of the Debtors (the "Bar Date"), and approved the form and manner of notice of the Bar Date. (Bar Date Order at 2 ¶(a)).

THE PLAN

8. On August 31, 2010, the Debtors filed the *Debtors' Joint Chapter 11 Plan* with the Bankruptcy Court. (Dkt. No. 6829). On March 18, 2011, the Debtors filed the *Debtors' Second Amended Joint Chapter 11 Plan* with the Bankruptcy Court (the "Plan"). (Dkt. No. 9836). The Plan is a plan of liquidation.

9. On December 8, 2010, the Debtors filed the *Disclosure Statement for Debtors' Amended Joint Chapter 11 Plan* with the Bankruptcy Court (the "Disclosure Statement"). (Dkt. No. 8023).

10. On December 8, 2010, the Bankruptcy Court entered an *Order Granting Motion (I) Approving Notice of Disclosure Statement Hearing; (II) Approving Disclosure Statement; (III) Establishing a Record Date; (IV) Establishing Notice and Objection Procedures for Confirmation of the Plan; (V) Approving Notice Packages and Procedures for Distribution Thereof; (VI) Approving the Forms of Ballots and Establishing Procedures for Voting on the Plan; and (VII) Approving the Form of Notices to Non-Voting Classes Under the Plan.* (Dkt. No. 8043).

11. The Plan, as described in the Disclosure Statement designates six (6) distinct classes of claims or equity interests: Class 1 – secured claims; Class 2 – priority non-tax claims; Class 3 – general unsecured claims; Class 4 – property environmental claims; Class 5 – asbestos personal injury claims; and, Class 6 – equity interests in MLC. (Disclosure Statement at 4-8).

12. The aggregate amount of General Unsecured Claims filed against the Debtors on or before the Bar Date, as well as the General Unsecured Claims listed on the Debtors' schedules was approximately $270 billion. (Disclosure Statement at 57).

13. The Plan provides for the GUC Trust to be established on the Effective Date (as defined below) under the terms of the Plan and Confirmation Order (as defined below) and the Motors Liquidation Company GUC Trust Agreement dated as of March 30, 2011 (as amended, the "GUC Trust Agreement").

14. Under the terms of the Plan, for each $1,000 in amount of allowed general unsecured claims against the Debtors that existed as of the date the Plan became effective (together with the disputed general unsecured claims asserted against the Debtors that are subsequently allowed, the "Allowed General Unsecured Claims"), the holders of such claims were entitled to receive (upon delivery of any information required by the GUC Trust) approximately 3.80 shares of New GM Common Stock, and approximately 3.46 warrants of each series of New GM Warrants, exclusive of any securities received, or to be received, in respect of GUC Trust Units (as defined below). (*See* Plan § 6.2; GUC Trust Agreement at Ex. A-1). The holders of Allowed General Unsecured Claims were also entitled to receive one unit of beneficial interest in the GUC Trust (a "GUC Trust Unit") for each $1,000 in amount of Allowed General Unsecured Claims. (*Id.*). Under the terms of the Plan, holders of disputed general unsecured claims against the Debtors were entitled to receive subsequent distributions of New GM Securities and GUC Trust Units in respect of such claims only if and to the extent that their disputed general unsecured claims were subsequently allowed. (*See* Plan § 7.4).

15. On March 29, 2011, the Bankruptcy Court entered its *Findings of Fact, Conclusions of Law, and Order Pursuant to Sections 1129(a) and (b) of the Bankruptcy Code*

and Rule 3020 of the Federal Rules of Bankruptcy Procedure Confirming Debtors' Second Amended Joint Plan (the "Confirmation Order"). (Dkt. No. 9941).

16. The Plan became effective on March 31, 2011 (the "Effective Date"). (Dkt No. 10056).

17. The Plan provided that on the Effective Date, the Plan would be deemed to be substantially consummated. (Plan §12.2).

18. The Plan has been substantially consummated. *See In re Motors Liquidation Co.*, 462 B.R. 494, 501 n. 36 (Bankr. S.D.N.Y. 2012) ("[T]he Plan already has been substantially consummated").

19. On December 15, 2011 (the "Dissolution Date"), as required by the Plan, MLC was dissolved. (*See* Form 10-K Annual Report for Motors Liquidation Company GUC Trust for the Fiscal Year Ended March 31, 2014, filed May 22, 2014 ("GUC Trust 2014 Form 10-K") at 3).

20. Prior to the confirmation of the Plan by the Bankruptcy Court, certain general unsecured claims were traded.

21. As of the Effective Date, there were approximately: (a) $29.771 billion in Allowed General Unsecured Claims (the "Initial Allowed General Unsecured Claims") (*see* GUC Trust 2014 Form 10-K at 6); (b) $8.154 billion in disputed general unsecured claims, which did not include potential Term Loan Avoidance Action Claims (defined below) (*id.* at 7); and (c) potentially $1.5 billion in additional general unsecured claims (the "Term Loan Avoidance Action Claims," and together with the disputed general unsecured claims, the "Disputed General Unsecured Claims") as a result of an avoidance action styled *Official Committee of Unsecured Creditors of Motors Liquidation Co. v. JP Morgan Chase Bank, N.A. et al.*, Adv. Pro. No 09-00504 (Bankr. S.D.N.Y. July 31, 2009) (the "JPM Action").

22. The plaintiff in the JPM Action seeks to recover approximately $1.5 billion in payments made by Old GM to JPMorgan Chase Bank, N.A., on behalf of a consortium of prepetition lenders (the "JPM Action Defendants").

23. On the Dissolution Date, the right to prosecute the JPM Action was transferred to a trust established under the Plan for the purpose of holding and prosecuting the JPM Action (the "Avoidance Action Trust"). The Avoidance Action Trust is separate from the GUC Trust. The JPM Action is now being prosecuted by the Avoidance Action Trust and is currently on appeal to the Second Circuit. Wilmington Trust Company acts as Trustee for each of the Avoidance Action Trust and the GUC Trust.

24. The Bankruptcy Court rendered a decision in the JPM Action. *Official Committee of Unsecured Creditors of Motors Liquidation Co. v. JP Morgan Chase Bank, N.A. et al.*, 486 B.R. 596 (Bankr. S.D.N.Y. 2013).

25. The Second Circuit certified a question of law to the Delaware Supreme Court in the JPM Action. *Official Committee of Unsecured Creditors of Motors Liquidation Co. v. JP Morgan Chase Bank, N.A. et al.*, Case No. 13-2187-bk (2d Cir. June 17, 2014).

26. If the plaintiff is successful in the JPM Action, and any subsequent ancillary proceedings, and any JPM Defendant(s) actually disgorges funds to the Avoidance Action Trust in connection therewith, any such JPM Action Defendant will be treated as an allowed general unsecured creditor of MLC with Term Loan Avoidance Action Claims equaling the amount that they actually disgorge to the Avoidance Action Trust (which, in the aggregate, could be up to $1.5 billion, exclusive of prejudgment interest). The beneficiaries of any amounts ultimately disgorged by the JPM Action Defendants is a matter of dispute, as both the lenders that provided MLC with debtor-in-possession financing (the "DIP Lenders"), and the Committee, on behalf of holders of Allowed General Unsecured Claims, are each claiming an exclusive right to such

proceeds. Although the Bankruptcy Court granted summary judgment in favor of the Committee, finding that the holders of Allowed General Unsecured Claims were the proper beneficiaries of the Avoidance Action Trust (and thus the proceeds of the JPM Action), the United States District Court for the Southern District of New York (the "District Court") vacated the Bankruptcy Court's decision and order for want of subject matter jurisdiction. The District Court specifically found that the issue regarding the identity of the proper beneficiaries of the Avoidance Action Trust was not and would not be ripe for adjudication unless and until the JPM Action were decided in favor of the Avoidance Action Trust. In the event that it is determined that the holders of Allowed General Unsecured Claims are entitled to the proceeds (if any) of the JPM Action, then such proceeds (if any) will be contributed to the Avoidance Action Trust, for distribution to the holders of Allowed General Unsecured Claims (following the reimbursement of certain fees and expenses to the DIP Lenders).

27. If the defendants are successful in the JPM Action (including with respect to any appeals), $1.5 billion of Disputed General Unsecured Claims will be eliminated from Old GM's bankruptcy estate, and certain of the New GM Securities that have been reserved will be available for distribution. As of the Effective Date, the total aggregate amount of general unsecured claims, both allowed and disputed, asserted against the Debtors, including potential Term Loan Avoidance Action Claims, was approximately $39.426 billion. (*See* April 21, 2011 Form 8-K of the Motors Liquidation GUC Trust at 4).

The GUC Trust

28. The GUC Trust was formed on March 30, 2011 as a statutory trust under the Delaware Statutory Trust Act. (*See* GUC Trust Agreement at 13, Article II, § 2.1). The GUC Trust is, among other things, responsible for implementing the Plan, including distributing New GM Securities and GUC Trust Units to holders of Allowed General Unsecured Claims in

satisfaction of their claims, resolving Disputed General Unsecured Claims that were outstanding as of the Effective Date, distributing New GM Securities and GUC Trust Units in satisfaction of such Disputed General Unsecured Claims that are subsequently allowed, and resolving remaining disputed administrative expense claims, priority tax claims, priority non-tax claims and secured claims against the Debtors. (*See id.* at 3, Background § G).

29. The "GUC Trust Beneficiaries" are as defined in the GUC Trust Agreement in Background § F.

30. As of the Effective Date, the corpus of the GUC Trust consisted of approximately $52.7 million in cash contributed by the Debtors to fund the administrative fees and expenses (including certain tax obligations) incurred by the GUC Trust in administering its duties pursuant to the Plan and the GUC Trust Agreement (the "Administrative Fund"). (*See* GUC Trust 2014 Form 10-K at 3). The cash comprising the Administrative Fund was obtained by MLC from the DIP Lenders and is subject to a lien held by the DIP Lenders, with any excess funds remaining in the Administrative Fund required to be returned to the DIP Lenders, according to the GUC Trust 2014 Form 10-K, after (i) the satisfaction in full of all Wind Down Costs and other liabilities of the GUC Trust (subject to the terms of the GUC Trust Agreement), and (ii) the winding up of the GUC Trust's affairs. (*Id.*). The Administrative Fund cannot be used to make distributions to holders of Allowed General Unsecured Claims. (*Id.*).

31. Pursuant to the Plan, on the Dissolution Date, MLC transferred to the GUC Trust (i) record ownership of all of its then remaining New GM Securities, which consisted of 30,967,561 shares of New GM Common Stock, 28,152,186 New GM Series A Warrants and 28,152,186 New GM Series B Warrants, (ii) approximately $2.0 million designated for certain public reporting costs, and (iii) approximately $1.4 million designated for reimbursing the indenture trustees and the fiscal and paying agents under the Debtors' prepetition debt issuances

for costs associated with, among other things, administering distributions to registered holders of the Debtors' prepetition debt issuances. (*See* GUC Trust 2014 Form 10-K at 4).

32. Under the terms of the GUC Trust Agreement, the GUC Trust Administrator is authorized to determine whether the GUC Trust may be entitled to receive a distribution of additional New GM Common Stock as a result of the aggregate amount of Allowed General Unsecured Claims exceeding $35 billion, and, if the GUC Trust is so entitled, to request the issuance of such additional shares by New GM to the GUC Trust. (*See* GUC Trust Agreement, § 2.3(d)).

33. Each GUC Trust Unit represents "the contingent right to receive, on a *pro rata* basis, the excess assets of the GUC Trust, including additional New GM Securities (if and to the extent such New GM Securities are not required for satisfaction of the Resolved Allowed Claims), Dividend Cash associated with such additional New GM Securities and Other Administrative Cash, if any, available for distribution in respect of the GUC Trust Units, either through a periodic distribution as provided for under the GUC Trust Agreement, or upon the dissolution of the GUC Trust, in each case subject to the terms and conditions of the GUC Trust Agreement and the Plan." (GUC Trust 2014 Form 10-K at 5-6).

GUC TRUST DISTRIBUTIONS

34. On April 21, 2011, and as supplemented by a distribution completed on or around May 26, 2011, an initial distribution (the "Initial Distribution") of more than 75% of the New GM Securities then held by the GUC Trust was made to the holders of Initial Allowed General Unsecured Claims. (*See* April 21, 2011 Form 8-K of the Motors Liquidation GUC Trust at 2).[3]

[3] Prior to December 15, 2011, the date on which all remaining New GM Securities held by MLC were transferred by MLC to the GUC Trust, the GUC Trust either requisitioned New GM Securities from MLC and itself made the

[Footnote continued on next page]

35. According to the GUC Trust 2014 Form 10-K, the New GM Securities that were not distributed in the Initial Distribution were the New GM Securities that would be necessary to pay the holders of Disputed General Unsecured Claims that become Allowed General Unsecured Claims (the "Resolved Allowed Claims"), New GM Securities associated with holders of Allowed General Unsecured Claims that had not provided sufficient information to the GUC Trust to permit distribution ("Information Deficient Claims"), and those New GM Securities that were otherwise set aside from distribution ("Set Aside Securities") for the purposes of funding then-current or projected liquidation and administrative costs and other liabilities of the GUC Trust (including income taxes). The distributable assets currently held by the GUC Trust are set forth in the GUC Trust 2014 Form 10-K.

36. The GUC Trust Agreement sets forth provisions relating to when distributions should be made.

37. According to the GUC Trust Agreement, "[a]s promptly as practicable following the beginning of each calendar quarter, beginning with the second calendar quarter, the GUC Trust Administrator, with the approval of the GUC Trust Monitor, shall deliver to each holder, if any, of a Disputed General Unsecured Claim or other Claim that has become a Resolved Allowed General Unsecured Claim during the prior calendar quarter (or, in the case of the second calendar quarter, since the Initial Distribution Record Date) a distribution consisting of . . . the pro rata amount of GUC Trust Distributable Assets that the holder of such Resolved Allowed General Unsecured Claim would have received had such Resolved Allowed General Unsecured Claim been an Initial Allowed General Unsecured Claim," and "a number of Units"

[Footnote continued from previous page]
distribution of the New GM Securities, or requested that MLC make the distributions to the accounts of allowed claim holders designated by the GUC Trust. After December 15, 2011, all distributions of New GM Securities were made directly by the GUC Trust.

as provided in the GUC Trust Agreement." (*See* GUC Trust Agreement, Article V, §5.3(a); *see also* GUC Trust 2014 Form 10-K at 6)).

38. The GUC Trust made quarterly distributions on July 28, 2011, October 28, 2011, January 13, 2012, April 27, 2012, August 3, 2012, November 5, 2012, February 8, 2013, May 10, 2013, August 9, 2013, October 31, 2013 and May 9, 2014, each in respect of Disputed General Unsecured Claims that were resolved in the immediately preceding fiscal quarter. (GUC Trust 2014 Form 10-K at 6).

39. On October 21, 2013, the Bankruptcy Court entered an order (the "Nova Scotia Order") approving a settlement agreement (the "Nova Scotia Settlement") relating to claims arising from the 8.375% guaranteed notes due December 7, 2015 and the 8.875% guaranteed notes due July 10, 2023, in each case issued in 2003 by General Motors Nova Scotia Finance Company (the "Nova Scotia Claims"). (GUC Trust 2014 Form 10-K at 12). Pursuant to the Settlement Agreement, the Nova Scotia Claims were reduced and allowed in an aggregate amount of $1.55 billion. As a result, on or about December 2, 2013, in accordance with the Nova Scotia Settlement and the Nova Scotia Order, the GUC Trust made a distribution solely to holders of the allowed Nova Scotia Claims, consisting of, in the aggregate, 6,174,015 shares of New GM Common Stock, 5,612,741 New GM Series A Warrants, 5,612,741 New GM Series B Warrants, and 1,550,000 GUC Trust Units. (*Id.*).

40. In addition, on or about December 23, 2013, in accordance with the Nova Scotia Settlement and the Nova Scotia Order, the GUC Trust made a special distribution of Excess GUC Trust Distributable Assets to all holders of GUC Trust Units, consisting of 6,735,070 shares of New GM Common Stock, 6,122,789 New GM Series A Warrants, and 6,122,789 New GM Series B Warrants. (*Id.*).

41. The following table details the New GM Securities that have been distributed to holders of Allowed General Unsecured Claims by the GUC Trust:

	Shares of New GM Common Stock	A Warrants	B Warrants
April 21, 2011 Distribution:	113,194,172	102,903,821	102,903,821
July 28, 2011 Distribution:	3,342,831	3,038,936	3,038,936
October 28, 2011 Distribution:	2,468,218	2,243,834	2,243,834
January 13, 2012 Distribution:	188,180	171,074	171,074
April 27, 2012 Distribution:	450,555	409,612	409,612
August 3, 2012 Distribution:	484,553	440,510	440,510
November 2, 2012 Distribution:	116,508	105,910	105,910
February 8, 2013 Distribution:	42,151	38,325	38,325
May 10, 2013 Distribution:	115,029	104,570	104,570
August 9, 2013 Distribution:	221,014	200,924	200,924
October 31, 2013 Distribution:	42,122	38,293	38,293
December 2, 2013 Nova Scotia Settlement Distribution:	6,174,015	5,612,741	5,612,741
May 9, 2014 Distribution:	43,310	39,371	39,371

Available at https://www.mlcguctrust.com/FAQDocuments.aspx.

42. As of March 31, 2014, the GUC Trust has distributed (or was obligated to distribute), in the aggregate, 134,106,321 shares of New GM Common Stock, 121,914,975 of each series of New GM Warrants and 31,853,702 GUC Trust Units in respect of Allowed General Unsecured Claims aggregating approximately $31.854 billion. (GUC Trust 2014 Form 10-K at 6).

CLAIMS AGAINST THE GUC TRUST AND GUC TRUST ASSETS

43. According to the GUC Trust, Allowed General Unsecured Claims, as of March 31, 2014, totaled approximately $31.854 billion.

44. As of March 31, 2014, the Maximum Amount (as such term is defined in and calculated in accordance with the GUC Trust Agreement) of Disputed General Unsecured Claims (inclusive of the potential Term Loan Avoidance Action Claims) totaled approximately $1.579 billion. (GUC Trust 2014 Form 10-K at 51). In the event such claims become Allowed General Unsecured Claims, the GUC Trust will distribute to the holders of such claims their pro rata distribution of New GM Securities.

45. According to the GUC Trust, the GUC Trust's aggregate holdings of New GM Securities (*i.e.*, New GM Common Stock and New GM Warrants), at fair value, as of March 31, 2014, was $1.1 billion. The $1.1 billion includes certain assets that have been reserved or set aside to fund the GUC Trust's potential costs of liquidation and potential tax liabilities. Specifically, New GM Securities aggregating $51.6 million (excluding related dividend cash) have been reserved, or set aside, for projected GUC Trust fees, costs and expenses to be incurred beyond 2014 (including $3.5 million for projected dividend taxes), and $536.3 million (excluding related dividend cash) of New GM Securities have been reserved, or set aside, for potential taxes on distribution. As a result, as of March 31, 2014, the number of New GM Securities included in the GUC Trust's aggregate holdings of New GM Securities, includes an aggregate of 8,072,042 shares of New GM Common Stock, 7,338,194 New GM Series A Warrants, and 7,338,194 New GM Series B Warrants, which have been so reserved or set aside.

46. According to the GUC Trust, with respect to distributable assets, as of March 31, 2014, the GUC Trust held remaining distributable assets (which, for the avoidance of doubt, excluded Set Aside Securities and New GM Securities associated with the Information Deficient

Claims) of 7,138,543 shares of New GM Common Stock, 6,489,475 of each series of New GM Warrants, and $2,141,564 of dividend cash, which have all been set aside in respect of current Disputed General Unsecured Claims (including the potential Term Loan Avoidance Action Claims), and will be distributed to the holders of such claims in the event that they become Resolved Allowed Claims. (*Id.* at 31).

TRADING OF GUC TRUST UNITS

47. Pursuant to a No Action Letter received from the United States Securities and Exchange Commission ("SEC") on May 23, 2012 (the "No Action Letter"), the GUC Trust Units are transferable in accordance with the procedures of the Depository Trust Company ("DTC") and its direct and indirect participants.

48. While the No Action Letter allows for the transferability of GUC Trust Units in accordance with DTC procedures, the GUC Trust may not encourage the transfer of the GUC Trust Units it has distributed pursuant to the GUC Trust Agreement, and may not take any actions to facilitate or promote a trading market in the GUC Trust Units.

49. Beginning April 28, 2011, and quarterly thereafter, the GUC Trust has made public securities filings that reflected the then-current amount of outstanding Disputed General Unsecured Claims. With each public filing, the GUC Trust adjusted the then-current amount of outstanding Allowed General Unsecured Claims and outstanding Disputed General Unsecured Claims to reflect the resolution of the Disputed General Unsecured Claims.

50. The GUC Trust has also filed quarterly reports (the "GUC Trust Reports") with the Bankruptcy Court which reflected the then-current amount of Allowed General Unsecured Claims and Disputed General Unsecured Claims.

51. As of June 14, 2012, the GUC Trust Units became freely tradable OTC, and are quoted on Bloomberg Finance, L.P.

52. Each of the GUC Trust Reports published by the GUC Trust set forth the then current aggregate amount of Allowed General Unsecured Claims and the Maximum Amount (as such term is defined in and calculated in accordance with the GUC Trust Agreement) of all Disputed General Unsecured Claims, adjusted to reflect the disposition of Disputed General Unsecured Claims to date. The Maximum Amount of Allowed General Unsecured Claims, as reflected in the quarterly GUC Trust Reports, has continually gone down over time.

53. The March 31, 2014 GUC Trust Report indicates that the total aggregate amount of claims (allowed and disputed) is $33,433,130. (March 31, 2014 GUC Trust Report, Ex. A).

54. Counsel for the Identified Parties may refer to reports by Bloomberg Finance, L.P. for information relating to trading volume of the GUC Trust Units and the daily prices of GUC Trust Units.

THE PLAN'S STATEMENTS REGARDING GUC TRUST BENEFICIARIES

55. Pursuant to the Plan, the GUC Trust Agreement provides in relevant part: "No provision of the Plan, the Confirmation Order or this Trust Agreement, and no mere enumeration herein of the rights or privileges of any GUC Trust Beneficiary, shall give rise to any liability of such GUC Trust Beneficiary solely in its capacity as such, whether such liability is asserted by any Debtor, by creditors or employees of any Debtor, or by any other Person. GUC Trust Beneficiaries are deemed to receive the GUC Trust Distributable Assets in accordance with the provisions of the Plan, the Confirmation Order and this Trust Agreement in exchange for their Allowed General Unsecured Claims or on account of their Units, as applicable, without further obligation or liability of any kind, subject to the provisions of this Trust Agreement." (GUC Trust Agreement, § 3.2).

NEW GM'S RECALLS

56. On February 7, 2014, New GM sent a letter (the "February 7 Letter") to the National Highway Traffic Safety Administration ("NHTSA") indicating that New GM, through its Executive Field Action Decision Committee, decided "to conduct a safety related recall for certain 2005-2007 model year Chevrolet Cobalt and 2007 model year Pontiac G5 vehicles." An attachment to the February 7 Letter indicates that 619,122 vehicles were potentially involved in the recall.

57. On February 25, 2014, New GM sent another letter to NHTSA (the "February 25 Letter"). The February 25 Letter indicates that on February 24, 2014, New GM, through its Executive Field Action Decision Committee, decided "to conduct a safety recall" for 2003-2007 model years Saturn Ion, 2006-2007 model years Chevrolet HHR, 2006-2007 model years Pontiac Solstice, and 2007 model year Saturn Sky vehicles (collectively with the recall described in the February 7 Letter, the "Ignition Switch Recall"). An attachment to the February 25 Letter reflects that 748,024 vehicles were potentially involved in this recall.

58. On February 25, 2014, New GM publicly announced that it was expanding the Ignition Switch Recall to include the 2003-2007 model years Saturn Ion, 2006-2007 model years Chevrolet HHR, 2006-2007 model years Pontiac Solstice, and 2007 model year Saturn Sky vehicles.

59. On March 28, 2014, New GM sent a letter to NHTSA indicating that on March 20, 2014, New GM, acting through its Executive Field Action Decision Committee, decided "to conduct a safety related recall" of "Ignition & Start Switches manufactured in Mexico by: Delphi Packard Electrical/Electronic Architecture" (the "March 28 Letter"). The March 28 Letter explains that

> [New GM] has decided that a defect which relates to motor vehicle safety exists in GM Parts and ACDelco Ignition & Start Switch service part number 10392423,

> and the following Ignition & Start Switch Housing Kits that contain or may contain part number 10392423: GM Parts and ACDelco service part numbers 10392737, 15857948, 15854953, 15896640, and 25846762. [New GM] records indicate these service parts may have been installed during repairs in some 2008-2010 MY Chevrolet Cobalt, 2008-2011 MY Chevrolet HHR, 2008-2010 MY Pontiac Solstice, 2008-2010 MY Pontiac G5, and 2008-2010 MY Saturn Sky vehicles.

60. The March 28 Letter also states that "[t]he ignition switch torque performance on vehicles repaired with GM Parts and ACDelco Ignition & Start Switch part number 10392423 or assemblies that contain part number 10392423 may not meet General Motors' specification."

61. The March 28 Letter further states that on March 27, 2014, New GM acting through its Executive Field Action Decision Committee, decided that "to provide a comprehensive remedy, GM will replace the ignition switch on all 2008-2010 MY Chevrolet Cobalt, 2008-2011 MY Chevrolet HHR, 2008-2010 MY Pontiac Solstice, 2008-2010 MY Pontiac G5, and 2008-2010 MY Saturn Sky vehicles in order to replace all potentially suspect service parts."

62. Through an attachment to the March 28 Letter, New GM reported that 823,788 vehicles were potentially involved in this recall.

63. On March 28, 2014, New GM issued a press release stating that it would "replace the ignition switch in all model years of its Chevrolet Cobalt, HHR, Pontiac G5, Solstice, and Saturn Ion and Sky" in the U.S. since faulty ignition switches may have been used to repair the vehicles (the "March 28 Announcement"). (*See* http://media.gm.com/media/us/en/gm/news.detail.html/content/Pages/news/us/en/2014/mar/0328-ignition-service.html).

64. In its March 28 Announcement, New GM explained that "[a]bout 95,000 faulty switches were sold to dealers and aftermarket wholesalers," of which "about 90,000 were used to repair older vehicles that were repaired before they were recalled in February," and that "[b]ecause it is not feasible to track down all the parts, the company is taking the extraordinary

step of recalling 824,000 more vehicles in the U.S. to ensure that every car has a current ignition switch."

65. On April 10, 2014, New GM filed a Form 8-K with the SEC. According to the press release attached thereto as Exhibit 99.1, New GM added "ignition lock cylinders to its safety recall of 2.2 million older model cars in the United States." The press release states that the cars covered by this recall were 2003-2007 model years Saturn Ion, 2005-2010 model years Chevrolet Cobalt, 2006-2010 model years Pontiac Solstice, 2007-2010 model years Pontiac G5, 2007-2010 model years Saturn Sky, and 2006-2011 model years Chevrolet HHR, and that "the cylinders can allow removal of the ignition key while the engine is running, leading to a possible rollaway, crash and occupant or pedestrian injuries."

66. On March 17, 2014, New GM filed a Form 8-K with the SEC regarding three safety recalls involving approximately 1.5 million vehicles (collectively, the "March 17 Recall"). The March 17, 2014 press release attached thereto as Exhibit 99.1 states that the three recalls cover:

(a) 303,000 2009-2014 model years Chevrolet Express and GMC Savana vehicles with gross vehicle weight under 10,000 pounds, which New GM stated "do not comply with a head impact requirement for unrestrained occupants, requiring a rework of the passenger instrument panel material;"

(b) 63,900 2013-2014 model years Cadillac XTS full-size sedans, in which pressure created by a brake booster pump can "lead to the dislodging of a plug in the brake booster pump relay, allowing corrosive elements to enter the connector and form a low-resistance short that could lead to overheating, melting of plastic components and a possible engine compartment fire;" and

(c) 1.18 million 2008-2013 model years Buick Enclave and GMC Acadia, 2009-2013 model years Chevrolet Traverse, and 2008-2010 model years Saturn Outlook vehicles to correct for "the non-deployment of the side impact restraints, which include driver and passenger seat-mounted side air bags, front center air bag (if equipped), and the seat belt pretensioners."

GM Redoubles Safety Efforts, Announces New Recalls, Mar. 17, 2014.[4]

67. On April 1, 2014, New GM filed a Form 8-K with the SEC regarding a safety recall of approximately 1.3 million vehicles "for the correction of electric power steering assist conditions" (the "Power Steering Assist Recall"). The March 31, 2014 press release attached thereto as Exhibit 99.1 describes a potential "sudden loss of electric power steering assist" occurring in the recalled vehicles, which include:

a. Chevrolet Malibu: All model year 2004 and 2005, and some model year 2006 and model year 2008 and 2009 vehicles;

b. Chevrolet Malibu Maxx: All model year 2004 and 2005, and some 2006 model year;

c. Chevrolet HHR (Non-Turbo): Some model year 2009 and 2010 vehicles;

d. Chevrolet Cobalt: Some model year 2010 vehicles;

e. Saturn Aura: Some model year 2008 and 2009 vehicles;

f. Saturn ION: All model year 2004 to 2007 vehicles;

g. Pontiac G6: All model year 2005, and some model year 2006 and model year 2008 and 2009 vehicles; and

h. Service parts installed into certain vehicles before May 31, 2010 under a previous safety recall.

GM Recalls Older Model Vehicles to Fix Power Steering, Mar. 31, 2014.

68. In its March 31, 2014 press release, New GM states that the 2004-2007 model years Saturn Ion, the 2009-2010 model years Chevrolet HHR, and the 2010 model year Chevrolet Cobalt "are included in previously announced recalls for ignition switches that may

[4] *Available at* http://media.gm.com/media/us/en/gm (last visited June 2, 2014).

not meet GM specification for torque performance" and that "[r]epairs for the ignition switch and power steering assist may require separate dealership visits depending on parts availability." (*Id.*).

69. On May 15, 2014, New GM filed a Form 8-K with the SEC concerning five additional safety recalls involving approximately 2.7 million vehicles (collectively, the "May 15 Recall"). According to New GM's May 15, 2014 press release attached thereto as Exhibit 99.1, the "largest recall" among the May 15 Recall involves 2,440,524 2004-2012 model years Chevrolet Malibu, 2004-2007 model years Chevrolet Malibu Maxx, 2005-2010 model years Pontiac G6 and 2007-2010 model years Saturn Aura vehicles in the U.S. to "modify the brake lamp wiring harness." The "[a]ffected vehicles could have a corrosion develop in the wiring harness for the body control module" and the "condition could result in brake lamps failing to illuminate when the brakes are applied," "brake lamps illuminating when the brakes are not engaged," and the disabling of "cruise control, traction control, electronic stability control, and panic braking assist operation." *GM Announces Five Safety Recalls*, May 15, 2014.[5]

70. The May 15 Recall also includes the recall of more than 111,889 2005-2007 model years Chevrolet Corvettes "for [a] potential loss of low-beam headlamp operation" that "could reduce the driver's visibility, increasing the risk of a crash." (*Id.*).

71. The remaining recalls announced through the May 15 Recall cover:

(a) 140,067 2014 model year Chevrolet Malibu vehicles due to the "disabling of hydraulic brake boost that can require greater pedal efforts;"

(b) 19,225 2013-2014 model years Cadillac CTS vehicles "for a condition in which the windshield wiper system may become inoperable after a vehicle jump start with wipers active and restricted, such as by ice and snow," causing a "[p]otential lack of visibility [that] could increase the risk of a crash;" and

---

[5] *Available at* http://media.gm.com/media/us/en/gm (last visited June 2, 2014).

(c) 477 2014 model year Chevrolet Silverado and GMC Sierra vehicles and 2015 model year Chevrolet Tahoe vehicles, in which an "attachment to the steering gear rack . . . may not be tightened to specification," potentially leading a "crash [to] occur without warning."

(*Id.*).

72. On May 20, 2014, New GM filed a Form 8-K with the SEC concerning four new safety recalls involving approximately 2.42 million vehicles (the "May 20 Recall"). The May 20, 2014 press release attached thereto as Exhibit 99.1 indicates that the May 20 Recall covers:

(a) 1,339,355 2009-2014 model years Buick Enclave, Chevrolet Traverse, and GMC Acadia vehicles and 2009-2010 model years Saturn Outlook vehicles "because front safety lap belt cables can fatigue and separate over time" and during a crash, "a separated cable could increase the risk of injury to front seat passengers;"

(b) 1,075,102 "previous generation" 4-speed automatic transmission and 2004-2008 model years Chevrolet Malibu and 2005-2008 model years Pontiac G6 vehicles "because of a shift cable that could wear out over time," potentially preventing the driver from "select[ing] a different gear, remov[ing] the key from the ignition, or plac[ing] the transmission in park;"

(c) 1,402 2015 model year Cadillac Escalades and Escalade ESV vehicles "because an insufficiently heated plastic weld that attaches the passenger side air bag to the instrument panel assembly could result in a partial deployment of the air bag in the event of a crash," leading New GM to stop sale of all 2015 Escalade and Escalade ESV vehicles and to contact customers who had taken delivery of these vehicles to instruct them "to not let occupants sit in the front passenger seat until the vehicle has been serviced;" and

(d) 58 2015 model year Chevrolet Silverado HD and GMC Sierra HD vehicles "because retention clips attaching the generator fuse block to the vehicle body can become loose and lead to a potential fire."

GM Recalls 2.42 Million Vehicles in Four U.S. Recalls, May 16, 2014.[6]

73. On June 16, 2014, New GM filed a Form 8-K with the SEC "regarding safety recalls of certain models primarily to rework or replace the ignition keys on approximately 3.16

---

[6] *Available at* http://media.gm.com/media/us/en/gm (last visited June 2, 2014).

million U.S. cars from the 2000 to 2014 model years" (collectively, the "June 16 Recall"). According to New GM's June 16, 2014 press release attached thereto as Exhibit 99.1, the June 16 Recall involves 2005-2009 model years Buick Lacrosse, 2006-2014 model years Chevrolet Impala, 2000-2005 model years Cadillac Deville, 2004-2011 model years Cadillac DTS, 2006-2011 model years Buick Lucerne, 2004-2005 model years Buick Regal LS & GS, and 2006-2008 model years Chevy Monte Carlo vehicles.

74. In an interview dated June 26, 2014 with Matt Lauer of the Today Show, Mary Barra, Chief Executive Officer of New GM, was asked whether New GM would be issuing additional recalls. Ms. Barra responded: "It's—it's possible."

75. On June 30, 2014, New GM filed a Form 8-K with the SEC concerning additional safety recalls covering approximately 7.6 million vehicles in the U.S. (collectively, the "June 30 Recall"). According to New GM's June 30, 2014 press release attached thereto as Exhibit 99.1, the June 30 Recall involves about 7.6 million vehicles from the 1997 to 2014 model years and relates to "inadvertent ignition key rotation." (*Id.*).

76. On July 23, 2014, New GM announced six additional safety recalls covering a total of 717,949 vehicles in the U.S. (collectively, the "July 23 Recall"). According to New GM's July 23, 2014 press release, the recalls cover vehicles from model years 2010 through 2015 and pertain to safety-related defects in those vehicles' front turn signals, front-turn signal bulbs, roof-rail air bags, electric power steering, power height adjustable seats, lower control arm bolts, and incomplete welds on seat hook bracket assemblies.

77. The Ignition Switch Recall, the March 17 Recall, the Power Steering Assist Recall, the May 15 Recall, the May 20 Recall, the June 16 Recall, the June 30 Recall, and the July 23 Recall are among the recalls that New GM has issued since January 1, 2014, but they are not the only recalls New GM has announced since that time. According to New GM, 25,484,746

vehicles in the U.S. from model years 1997-2015 have been recalled since January 13, 2014 to date. *See* GM Q1 and Q2 2014 North American Recalls Including Exports.[7]

Attachment 1

ATTACHMENT 1

THE GUC TRUST'S AND UNITHOLDERS' PROPOSED STIPULATIONS OF FACT NOT AGREED TO BY OTHER COUNSEL FOR THE IDENTIFIED PARTIES

1. As of August 8, 2014, New GM has not confirmed that there will not be additional recalls of vehicles relating to the Ignition Switch.

2. As of March 31, 2014, the sum of (i) Allowed General Unsecured Claims (approximately $31.854 billion, as reported in paragraph 45 of the Equitable Mootness Stipulations) and (ii) the Maximum Amount (as such term is defined in and calculated in accordance with the GUC Trust Agreement) of Disputed General Unsecured Claims that could become Resolved Allowed Claims (approximately $1.579 billion, as reported in paragraph 46 of the Equitable Mootness Stipulations) totaled approximately $33.433 billion.

3. Based on closing prices of New GM Securities, as reported by Bloomberg Finance, L.P., as of July 16, 2014, the total value of GUC Trust assets set aside for distribution in respect of current Disputed General Unsecured Claims (including the potential Term Loan Avoidance Action Claims) is approximately $576,905,901.

4. While certain late claims have been allowed in the Old GM bankruptcy case, less than 1% (0.093%) of total allowed claims as of the Bar Date were allowed subsequent to the Bar Date but before the Effective Date, and less than 1% (0.147%) of total allowed claims as of the Bar Date were allowed subsequent to the Bar Date and after the Effective Date.

5. As reported by Bloomberg Finance L.P., as of July 14, 2014, approximately 96 million GUC Trust Units have been bought and sold since June 14, 2012.

6. As reported by Bloomberg Finance L.P., as of July 14, 2014, the aggregate trading value of the GUC Trust Units that have traded since June 14, 2012 (based on daily closing prices) totals approximately $1.993 billion.

7. On August 8, 2014, New GM announced five new safety recalls of 269,001 model years 2002-2004, 2009-2010, and 2013-2015 vehicles (collectively, the "August 8 Recall"). *GM Announces Recalls*, Aug. 8, 2014.[8] Among the vehicles recalled through the August 8 Recall are 202,115 model years 2002-2004 Saturn VUEs "because the ignition key can possibly be removed when the vehicle is not in the off position." According to New GM, New GM has recalled 25,754,356 vehicles in the U.S. from model years 1997-2015 since January 13, 2014 to date. *See* GM 2014 Year-to-Date North American Recalls Including Exports.[9]

Attorneys for Debtors
and Debtors in Possession

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
GENERAL MOTORS CORP., *et al.*,	:	**09-_____ (___)**
Debtors.	:	**(Jointly Administered)**

DEBTORS' MOTION PURSUANT TO 11 U.S.C. §§ 105, 363(b), (f), (k), AND (m), AND 365 AND FED. R. BANKR. P. 2002, 6004, AND 6006, TO (I) APPROVE (A) THE SALE PURSUANT TO THE MASTER SALE AND PURCHASE AGREEMENT WITH VEHICLE ACQUISITION HOLDINGS LLC, A U.S. TREASURY-SPONSORED PURCHASER, FREE AND CLEAR OF LIENS, CLAIMS, ENCUMBRANCES, AND OTHER INTERESTS; (B) THE ASSUMPTION AND ASSIGNMENT OF CERTAIN EXECUTORY CONTRACTS AND UNEXPIRED LEASES; AND (C) OTHER RELIEF; AND (II) SCHEDULE SALE APPROVAL HEARING

TO THE HONORABLE UNITED STATES BANKRUPTCY JUDGE:

General Motors Corporation ("GM") and certain of its subsidiaries, as debtors in possession in the above-captioned chapter 11 cases (collectively, the "Debtors" or the "Company"), respectfully represent:

Overview

1. By this Motion, the Company seeks entry of two orders. First, the Company requests entry of an order (the "Sale Procedures Order"), pursuant to 11 U.S.C.

§§ 105(a) and 363 and Fed. R. Bankr. P. 2002 and 6004, (i) authorizing and approving certain proposed procedures to govern the sale process and provide for the submission of any competing bids for substantially all the Debtors' assets and the form and manner of notices of (a) the hearing to consider authorization and approval of the sale, (b) the assumption and assignment of executory contracts and unexpired leases of personal property and of nonresidential real property (collectively, the "Leases") pursuant to 11 U.S.C. § 365, and (c) the approval of the UAW Retiree Settlement Agreement,[1] and (ii) setting a hearing to consider the sale on June 30, 2009. Second, subject to the terms of the Sale Procedures Order and the entry of an order (the "Sale Order"), pursuant to 11 U.S.C. §§ 105, 363(b), (f), and (m), and 365 and Fed. R. Bankr. P. 6004 and 6006, authorizing and approving, among other things, (i) the sale of the Debtors' assets pursuant to the proposed Master Sale and Purchase Agreement and related agreements (the "MPA") among the Debtors (the "Sellers") and Vehicle Acquisition Holdings LLC (the "Purchaser"), a purchaser sponsored by the United States Department of the Treasury (the "U.S. Treasury"), free and clear of liens, claims, encumbrances, and other interests (the "363 Transaction"), (ii) the assumption and assignment of certain executory contracts and Leases, and (iii) the approval of UAW Retiree Settlement Agreement.

2. The instant Motion requests approval of a sale transaction that embodies the objective of the Debtors to implement the only available means to preserve and maximize the value, viability, and continuation of the Company's business and, by extension, preserve and provide jobs for the Company's employees and others and

[1] Capitalized terms not otherwise defined herein have the meanings ascribed thereto in the MPA and/or the Affidavit of Frederick A. Henderson Pursuant to Local Bankruptcy Rule 1007-2, filed contemporaneously herewith.

enhance the interests of its economic stakeholders through a sale that is made possible only because it also is a critical element of the program adopted by the United States Government to preserve the domestic automotive industry. The result of the sale will be the continuation of the business represented by the assets to be sold that will make the Purchaser (sometimes referred to as "New GM") a lynchpin of the domestic automotive industry so this nation once again can assume its place as the domicile of one of the leading automotive manufacturers in the world. The proposed sale is the only viable alternative that will permit the realization of the going concern value of the assets to be sold and effect the transformation of the Purchased Assets to be the foundation for an efficient, productive, and economically viable business that will be competitive and a source of pride and employment for hundreds of thousands of workers. At the same time, it will avoid systemic failure in the automotive industry and other sectors of the economy as well as offer hope for thousands of other businesses and their employees that supply or otherwise are dependent upon the Company, together with the countless communities in which those businesses and their employees are located.

3. These chapter 11 cases are the result of the economic collapse and liquidity crisis that began to surface during the end of 2007 and exploded in 2008 that materially and adversely affected the Debtors' business. Prior to the commencement of these chapter 11 cases, the exigent economic circumstances compelled the Company to seek financial assistance from the federal government in order to sustain its operations and avoid a potentially fatal systemic failure, a failure that would have prejudiced not only the Company itself, but also other entities and hundreds of thousands of persons employed by them in the automotive industry.

4. As GM's largest secured creditor, the United States Government has dedicated substantial time and effort negotiating with the Company to preserve the going concern value of the GM enterprise to achieve the objectives noted above in the national interest. The transaction for which this Motion seeks approval is the result of those efforts.

5. The success of an automotive manufacturing company depends on the ultimate retail sale of the vehicles it manufactures. Consumers must have confidence in GM's products, i.e., that a new GM will exist in the future so that it can stand behind its products. It is in this context that the timing of the transformation of the assets, in connection with the approval of the sale, becomes critical.

6. To instill confidence on the part of consumers, employees, suppliers, and other stakeholders that a New GM – one that is viable and competitive – will quickly emerge from bankruptcy, the proposed sale of substantially all of the Company's assets to the Purchaser under 11 U.S.C. § 363 must be expeditiously pursued and approved. Implementation of the sale will best serve the interests of the Company's economic stakeholders, as the only other alternative will result in little or no recoveries from the Company's assets as well as severe economic consequences for the domestic automotive industry and the nation.

7. New GM, to be established under the 363 Transaction, will be a new, reshaped business that is not entangled by financial and operating distress or bankruptcy and that (a) will be competitive and profitable, both here and abroad, (b) will demonstrate to consumers the existence of a viable business that manufactures competitive and attractive products, (c) satisfies the goals of the U.S. Government, and

(d) has the full backing of the U.S. Treasury, the Government of Canada and the Government of Ontario, through Export Development Canada ("EDC"), Canada's export trading agency, and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (the "UAW"). Importantly, the 363 Transaction will restore confidence on the part of consumers that they can purchase a GM vehicle without concerns regarding residual value, replacement parts, warranty obligations, and maintenance. Employees, suppliers, dealers, and communities will be able to depend on New GM as an economically viable and competitive enterprise.

8. It is imperative that the 363 Transaction be expeditiously approved. Any delay in the consideration of this Motion will result in continuing and increasing revenue erosion and further loss of market share to other domestic and foreign manufacturers that are not suffering aggravated financial distress. Absent prompt confirmation that the sale has been approved and that the transfer of the assets will be implemented, it is highly probable that GM will have to liquidate. There are no realistic alternatives available. There are no merger partners, acquirers, or investors willing and able to acquire GM's business. Other than the U.S. Treasury and EDC, there are no lenders willing and able to finance the Company's continued operations. Similarly, there are no lenders willing and able to finance the Company in a prolonged chapter 11 case. Even if funding were available for an extended bankruptcy case, many consumers would not consider purchasing a vehicle from a manufacturer whose future is uncertain and that is entangled in the vagaries and vicissitudes of the bankruptcy process. Even a short delay would have a serious and immediate detrimental impact on the Company's supply

chain, dealers, hundreds of thousands of employees of such suppliers and dealers, as well as upon GM's competitors that purchase parts from such suppliers.

9. Uncertainty as to the Company's future must be eliminated now if the Company's failure and systemic consequences are to be avoided . A lengthy chapter 11 case for the Debtors is not an option. No debtor in possession financing is available in the absence of the 363 Transaction. No entity – other than the U.S. Treasury – has the wherewithal or the inclination to provide such financing. Moreover, even if such an entity should suddenly surface, it would be unable to provide the U.S. Treasury with adequate protection for the U.S. Treasury's currently outstanding approximate $19.7 billion secured claim.

10. The U.S. Treasury, now GM's largest secured creditor and the sponsor of the Purchaser under the 363 Transaction, became a secured creditor in order to serve the national interest in preserving the Company's business. The U.S. Government fully supports the 363 Transaction in order to assist in stabilizing the economy and preserving the basic domestic automotive industry and its jobs. The U.S. Treasury is willing and able to take the necessary steps to transform and maintain the viability of the Company's business via the proposed 363 Transaction. However, it is only willing to continue providing such financial assistance if the bankruptcy process serves the goal of preserving the going concern value of the assets by concluding the sale expeditiously. It is unwilling to make an open-ended commitment of billions of taxpayer dollars to support a traditional chapter 11 case – or to sponsor the purchase of what may be left of the Company at the end of such a case. The Debtors, in the exercise of sound business judgment, and the U.S. Treasury have concluded that the 363 Transaction is the only

means of preserving value and continuing the transformed business for the benefit of all economic stakeholders and in the national interest.

11. The 363 Transaction is consistent with President Obama's remarks on the American automotive industry in that it "is our best chance to make sure that the cars of the future are built where they've always been built – in Detroit and across the Midwest – to make America's auto industry in the 21st century what it was in the 20th century – unsurpassed around the world." Barack H. Obama, U.S. President, Remarks on the American Automotive Industry at 7 (Mar. 30, 2009) [hereinafter *Presidential Remarks*].

Historical Background

12. On the date hereof (the "Commencement Date"), the Debtors each commenced with this Court a voluntary case under chapter 11 of title 11, United States Code (the "Bankruptcy Code"). The Debtors are authorized to continue to operate their businesses and manage their properties as debtors in possession pursuant to sections 1107(a) and 1108 of the Bankruptcy Code. No trustee, examiner, or statutory creditors' committee has been appointed in these chapter 11 cases.

13. Contemporaneously herewith, the Debtors have filed a motion requesting joint administration of the chapter 11 cases pursuant to Rule 1015(b) of the Federal Rules of Bankruptcy Procedure (the "Bankruptcy Rules").

14. The facts and circumstances that resulted in the commencement of these chapter 11 cases are set forth in the Affidavit of Frederick A. Henderson, the President and Chief Executive Officer of GM, pursuant to Local Bankruptcy Rule 1007-2

(the "First Day Affidavit" or "Henderson Affidavit"), filed contemporaneously with this Motion, and are incorporated herein as if fully and at length set forth.

The Master Sale and Purchase Agreement

15. Subject to approval and the submission of any higher or better offers, the Sellers have reached an agreement with the Purchaser (together with the Sellers, the "Parties")[2] as embodied in the proposed MPA. The MPA is the result of extensive, arm's-length negotiations among the parties. It is an essential part of the program adopted by the U.S. Treasury to revitalize the U.S. automotive industry.

16. The 363 Transaction, as embodied in the MPA, contemplates that substantially all of the Sellers' assets, including substantially all of the equity interests of their directly-held subsidiaries and joint ventures (other than certain excluded entities) (the "Purchased Assets"), will be sold and transferred to the Purchaser, and that certain liabilities of the Sellers (the "Assumed Liabilities") will be assumed by the Purchaser. Any assets excluded from the sale will be administered in the chapter 11 cases, and sufficient cash is to be made available to GM to fund the wind-down or other disposition of the Sellers' assets.

17. Pursuant to a Transition Services Agreement to be entered into at or prior to the Closing, from and after the Closing, the Purchaser or one or more of its subsidiaries will provide the Sellers and their respective subsidiaries with certain

[2] The proposed MPA, substantially in the form annexed hereto as Exhibit "A," is without schedules and exhibits. The Debtors will file with the Bankruptcy Court a copy of the MPA with all schedules and exhibits thereto (excluding certain commercially sensitive information) and make the same available for review, free of charge, on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http:/www.gmcourtdocs.com. Copies of the MPA with all schedules and exhibits thereto (excluding certain commercially sensitive information) may also be obtained from the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., by contacting them by (i) regular mail at 105 Maxess Road, Melville, New York 11747, or (ii) telephone for U.S. and international callers at 703-286-6401.

transition services and support functions, as reasonably required by the Sellers to (i) wind down and liquidate under the Bankruptcy Code and (ii) operate in chapter 11 prior to liquidation.

18. The purchase price for the Purchased Assets is equal to the sum of

- a section 363(k)[3] credit bid in an amount equal to (i) the amount of Indebtedness of Parent and its Subsidiaries owed to the Purchaser as of the Closing pursuant to the UST Credit Facilities and the DIP Facility, *less* (ii) approximately $7.7 billion of indebtedness under the DIP Facility;

- the UST Warrant;

- the issuance by the Purchaser to GM of 10% of the Common Stock of the Purchaser as of the Closing);

- Warrants to purchase up to 15% of the shares of common stock of the Purchaser, with the initial exercise prices for equal amounts of the warrants based on $15 billion and $30 billion equity values of the Purchaser. The warrants will be exercisable through the seventh and tenth anniversaries of issuance, respectively, and GM can elect partial and cashless exercises; and

- the assumption by the Purchaser of the Assumed Liabilities.

In addition, in the event the Bankruptcy Court determines that the estimated amount of allowed prepetition general unsecured claims against the Debtors exceeds $35 billion, then the Purchaser will issue an additional 2% of the outstanding common stock of the Purchaser as of the Closing.

---

[3] Section 363(k) of the Bankruptcy Code provides:

> At a sale under subsection (b) of this section of property that is subject to a lien that secures an allowed claim, unless the court for cause orders otherwise the holder of such claim may bid at such sale, and, if the holder of such claim purchases such property, such holder may offset such claim against the purchase price of such property.

11 U.S.C. § 363(k).

19. The MPA requires the Sellers to use their reasonable efforts to enter into Participation Agreements that would modify the Sellers' Continuing Brand Dealer Agreements with certain dealers associated with Continuing Brands. Each Continuing Brand Dealer Agreement, as modified by the Participation Agreement, would constitute an Assumable Executory Contract under the MPA. All dealers associated with Continuing Brands who are not offered the opportunity, or who are extended an opportunity but decline, to enter into a Participation Agreement, will be given the opportunity to enter into short-term deferred voluntary termination agreements (the "Deferred Termination Agreements").

20. The MPA requires the Sellers to use their reasonable best efforts to enter into Deferred Termination Agreements with (i) all dealers associated with Continuing Brands who were not offered the opportunity (or who were extended the opportunity and declined) to enter into a Participation Agreement and (ii) all dealers associated with Discontinued Brands. Each Deferred Termination Agreement will be an Assumable Executory Contract under the MPA. In the absence of a Deferred Termination Agreement with the applicable counterparty, the dealer agreements will constitute Rejectable Executory Contracts under the MPA.

21. After the Closing, the Purchaser would have responsibility for the administration, management, and payment of all liabilities arising under express written emission and limited warranties delivered in connection with the sale of new vehicles or parts manufactured or sold by the Sellers at or prior to the Closing or the Purchaser after the Closing.

22. Substantially all the executory contracts associated with direct suppliers are likely to be assumed by the Sellers and assigned to the Purchaser at or following the Closing.

23. Any payments that are made to the Debtors' creditors in connection with the 363 Transaction (other than payments of Cure Amounts in connection with the assumption and assignment of Assumable Executory Contracts) will be voluntarily made by New GM.

24. Effective as of the Closing Date, the Purchaser will make an offer of employment to all of the Sellers' non-unionized employees and unionized employees represented by the UAW (including those on an approved leave of absence).

25. The U.S. Treasury and EDC will provide a debtor in possession credit facility to the Sellers in order to fund operations pending the sale of the Purchased Assets. Notably, EDC has agreed to participate in the DIP financing to assure the long-term viability of GM's North American enterprise. The Debtors have filed a separate motion seeking approval of the DIP financing.

26. Finally, as part of the 363 Transaction, the Purchaser and the UAW have reached a resolution addressing the ongoing provision of certain employee and retiree benefits. Under the UAW Retiree Settlement Agreement, the Purchaser has agreed to provide, among other things: (i) shares of common stock of the Purchaser representing 17.5% of the Purchaser's total outstanding common stock, (ii) a note of the Purchaser in the principal amount of $2.5 billion, (iii) shares of cumulative perpetual preferred stock of the Purchaser in the amount of $6.5 billion, (iv) warrants to acquire 2.5% of the Purchaser's equity, and (v) the assets held in a voluntary employees'

beneficiary association trust sponsored by the Sellers and to be transferred to the Purchaser as part of the 363 Transaction, in each case to a new voluntary employees' beneficiary association sponsored by an employees beneficiary association (the "New VEBA"), which will have the obligation to fund certain retiree benefits for the Debtors' retirees and surviving spouses represented by the UAW (the "UAW-Represented Retirees").

27. In connection with the foregoing, the UAW has agreed to be the authorized representative for UAW-Represented Retirees for purposes of section 1114 of the Bankruptcy Code and will enter into the UAW Retiree Settlement Agreement effective upon the Closing of the 363 Transaction. The class representatives, on behalf of the class members, by and through class counsel in certain class actions previously filed against GM on behalf of UAW-Represented Retirees regarding health care benefits (the "Class Representatives") have acknowledged and confirmed the UAW Retiree Settlement Agreement. As part of the 363 Transaction, the Purchaser also will assume modified and duly ratified collective bargaining agreements entered into by and between the Debtors and the UAW (the "UAW CBA Assignment").

28. In addition, GM, the UAW, and the Class Representatives have entered into an agreement, dated May 29, 2009 (the "UAW Claims Agreement"), pursuant to which the UAW and the Class Representatives have agreed, subject to the consummation of the 363 Transaction and the UAW Retiree Settlement Agreement becoming effective following approval by the Court, to take further actions to release claims against GM and its subsidiaries, and their employees, officers, directors, and agents, relating to retiree medical benefits pursuant to the Settlement Agreement, dated

February 21, 2008, between the Company and the UAW, the Memorandum of Understanding Post-Retirement Medical Care, dated September 26, 2007, between the Company and the UAW ("MOU"), and the Agreement between the UAW and General Motors Corporation, dated September 26, 2007 (effective October 15, 2007); *provided* that such claims may be reinstated if the rights or benefits of the UAW-Represented Retirees under the UAW Retiree Settlement Agreement are adversely impacted by reason of any reversal or modification of the Court's approval of the 363 Transaction or the UAW Retiree Settlement Agreement. Accordingly, the Debtors seek approval of the UAW Retiree Settlement Agreement and the assumption by GM of the UAW Claims Agreement, in each case as an agreement with the UAW, as the authorized representative of the UAW-Represented Retirees.

29. The Debtors have proposed the UAW Special Retiree Notice (as defined below) for individual retirees covered by the UAW Retiree Settlement Agreement and, with respect to such retirees, seek approval of the UAW Retiree Settlement Agreement to afford them an opportunity to be heard.

The 363 Transaction Is the Only Option

30. There is no viable alternative to the 363 Transaction. In light of the substantial secured indebtedness of the Company totaling approximately $27 billion, the only entity that has the wherewithal and is qualified to acquire the Purchased Assets to assure the continued operation of the business is the U.S. Treasury-sponsored Purchaser.

31. Since the onset of the economic collapse that has engulfed the world economy, General Motors has struggled to overcome the deteriorating worldwide

economic conditions and the credit crunch that has negatively affected the Company. As described in the Henderson Affidavit, the Company has expended significant time and effort exploring numerous operational, financing, and other transactional options regarding how to best transform its obligations and, if necessary, its operations to create a more efficient, productive, and viable business that would be competitive in the industry.

32. The financial and operational distress confronting the Company has been well publicized. It has been, and continues to be, the subject of substantial media attention. The decline in the value of GM's shares of common stock from $93.62 per share as of April 28, 2000 to $1.09 per share as of May 15, 2009, and the dramatic decrease in market capitalization of approximately $59.5 billion, is illustrative of the public market's appreciation of GM's distress. The basic elements of the 363 Transaction likewise have been widely reported. Notwithstanding, there have been no credible proposals to purchase or invest in any of the Company's assets or to purchase the Company's total business.

33. The 363 Transaction is the only realistic alternative for the Company to avoid liquidation of its assets that would severely undermine the automotive industry. The 363 Transaction preserves the value of the Purchased Assets and the benefits that result from the ongoing business operations. The Purchaser is the only entity capable of purchasing the Purchased Assets and closing the 363 Transaction.

Time Is of the Essence

34. The Debtors, their employees and creditors, and others that rely upon the Company's continuing business will suffer immediate and irreparable harm if the 363 Transaction is not approved on an expedited basis. The immediate

consummation of the 363 Transaction is necessary and appropriate to maximize the value of the Debtors' assets, particularly given the wasting nature of the Purchased Assets and an automotive business tainted with an unresolved bankruptcy case. The 363 Transaction must be approved and consummated speedily.

35. Any delay in the transfer of the Debtors' business and assets will have a substantial negative impact on the Company's revenue and market share. Time is of the essence because the value of the Purchased Assets is fragile and subject to substantial deterioration as consumers move to other bankruptcy-free brands. Even a short delay in the consummation of the 363 Transaction would have a detrimental impact on the Company's dealer networks, its suppliers, and their respective employees, as well as the confidence of the Company's customers and its own employees. In particular, the failure of one or more of its suppliers would have a serious effect not only on the Debtors' business, but also upon competitors that rely on the same suppliers. Thus, the unique circumstances related to the Purchased Assets necessitate the expedited approval of the 363 Transaction to avoid the permanent damage that would ensue from any delay.

36. Consumer Confidence. The success of the Company's business is dependent on the sale of cars and trucks. To survive as a viable business, and to achieve success in selling cars and trucks, consumers must have confidence in the manufacturer of the car or truck so that they can have confidence that they will receive value, reliability, warranty protection, and future servicing through an integrated dealer system.

37. The purchase or lease of a new car or truck represents the second largest expenditure of the typical American household. Not surprisingly, then, information compiled by, or at the direction of, the Company confirms that the mere

threat of a bankruptcy filing has depressed GM's sales and that, in an extended period of a bankruptcy case, the sales reductions and customer defections can be expected to be even more significant. Indeed, in the days following the announcement of the U.S. Treasury Loan Agreement, GM immediately began to suffer a sharp reduction in market share, while at the same time there was a corresponding increase in sales of vehicles manufactured by some of the Company's competitors, notwithstanding the absence of favorable financial reports applicable to those competitors.

38. Consumers have little confidence in purchasing a vehicle from a bankrupt original equipment manufacture ("OEM"). It is self-evident, then, that the longer it takes for New GM to begin operations, the more likely it will be that consumers will decline to purchase a car or truck from that entity. That, in turn, will make the Company's assets even less valuable in a sale – and may even eliminate a going concern sale as a viable alternative. The only recourse would then be a forced liquidation, which would be disastrous for all the Debtors' economic stakeholders.

39. Restoring consumer confidence in the Company's products and stability is a prerequisite to a successful future for New GM. The U.S. Treasury's willingness to sponsor the purchase of the Purchased Assets to retain a major domestic industry is expressly conditioned on the recognition that crucial time is passing and that any delay in the consummation of the 363 Transaction, and the attendant creation of New GM, will prolong consumer resistance to the Company's products. Such delay may be fatal not only to the Company, but also to countless parts suppliers, with consequent implications for the entire U.S. automotive industry. The 363 Transaction represents a window of opportunity to sell the Purchased Assets and thereby maximize value.

Elimination of any uncertainty as to future viability of New GM is the *sine qua non* of implementing the U.S. Government's objective to sustain a basic domestic automotive industry.

40. Suppliers and Dealers. An expeditious approval of the 363 Transaction is also necessary in order to address the tenuous financial condition of the numerous independent businesses that make up the Company's supply chain. The deepening crisis in the national economy and the automobile industry has not only affected General Motors, but also thousands of suppliers and vendors that supply products and material to General Motors. In light of the credit crisis and the precipitous decline in automobile sales, many suppliers are unable to access credit and are facing growing uncertainty about the prospects for their businesses. Thus, immediately following the commencement of chapter 11 cases by Chrysler LLC, six major suppliers were placed on watch by Standard & Poor's. *See* Liam Denning, Surveying Chrysler as Wheels Fall Off, Wall St. J. (May 1, 2009).

41. Consistent with industry practice, General Motors operates on a "just-in-time" inventory delivery system. Components and parts from suppliers typically are assembled onto vehicles within a few hours of the delivery of the parts to GM assembly facilities. To achieve the economies of scale required to compete in the automotive industry, General Motors, as well as its competitors in the industry, generally use a single supplier for specific parts for each vehicle line. As the Company frequently purchases all of its requirements for a particular part from one supplier, a sole-source supplier's ability to survive and make scheduled shipments is of material importance to each of General Motors' vehicle production lines.

42. Many of these suppliers are entirely dependent, and countless others are substantially dependent, on the Company for their survival, and many of them already are in severe financial distress. As recently observed in the Report to Congressional Committees prepared by the United States Government Accountability Office:

> More than 500,000 workers are employed by companies in the United States that manufacture parts and components used by automakers – both domestic automakers and transplants. According to the Motor and Equipment Manufacturers Association, many suppliers are in severe financial distress, with a number having filed for bankruptcy in 2008. Some members of our panel said that because many of these suppliers have relatively high costs and depend on the business of the Detroit 3, some of them may not have enough revenue to survive if one of the automakers were to cease production. This, in turn, could affect the automakers' ability to obtain parts needed to manufacture vehicles. *This dynamic has the potential to affect all automakers with production facilities in the United States, regardless of home country.*

U.S. Govt. Accountability Office, Report to Congressional Comm.: Auto Industry: Summary of Government Efforts and Automakers' Restructuring to Date at 6 (Apr. 2009) [hereinafter *GAO Report*].

43. The domestic automobile industry is interdependent, with an estimated 80% overlap in supplier networks. *See* Ford Motor Company Business Plan Submitted to the Senate Banking Committee at 2 (Dec. 2, 2008) ("Our industry is an interdependent one. We have 80 percent overlap in supplier networks."). Therefore, the collapse of GM would affect the other OEMs because it could impact the ability of shared suppliers to continue operations. *See generally GAO Report* at 33 ("according to the automakers and some panelists, the collapse of one or more of the domestic

automakers would affect the remaining automakers because, among other things, such a collapse could impact the ability of shared suppliers to continue operations").

44. Manifestly, any delay in the approval of the 363 Transaction would have a disastrous impact on the supply chain, as well as the employees of such suppliers, dealers, and their employees, and the other OEMs that obtain parts and other components from such suppliers. The domino effect is patent: the financial condition of suppliers would further deteriorate; more suppliers would need to cease operations and/or commence bankruptcy cases; the employees of such suppliers would lose their jobs; dealers would no longer have a continuous supply of service parts to maintain and repair vehicles; the employees of the dealers would lose their jobs; and other OEMs with production facilities in the United States would suffer as they would no longer to be able to obtain the necessary parts and components to maintain their manufacturing lines.

45. An expedited approval of the 363 Transaction, however, will avoid the occurrence of such potential systemic failure. Under the 363 Transaction, most supplier agreements will be assumed and assigned to the Purchaser, who will cure any existing defaults. In addition, the 363 Transaction will enable New GM, as an economically viable enterprise, to assist the ability of suppliers to remain in business with the attendant benefits to their employees and other parties in interest.

Extraordinary Provisions Under the Guidelines

46. The MPA contains the following provisions which may be considered "Extraordinary Provisions" under the Guidelines for the Conduct of Asset Sales established by the Bankruptcy Court on September 5, 2006 pursuant to General Order M-331):

- Deadlines that Effectively Limit Notice. The timeline proposed for the Sale Procedures Hearing and the Sale Hearing (each as hereinafter defined) may limit the notice period that may otherwise be afforded parties in interest under the Bankruptcy Code, the Bankruptcy Rules, and the Local Bankruptcy Rules for the Southern District of New York. Nevertheless, given the exigent circumstances described herein and in the Henderson Affidavit, as well as the fact that it has been widely known that the Company's assets and businesses have been available for sale and that the Debtors' precarious financial and operational condition have been widely reported in the media on a daily basis for the past few months, due process is not hindered as a result of the proposed shortening of the applicable notice periods.

- No Good Faith Deposit. The Purchaser has not furnished the Sellers with a good faith deposit in connection with the MPA. Inasmuch as the Purchaser is sponsored by the U.S. Treasury, which is also the Debtors' largest secured creditor and the lender under the DIP financing, and given the extensive prepetition negotiations and the substantial investment of time and resources by the U.S. Treasury, there is no need for a good faith deposit.

- Record Retention. Pursuant to the MPA, all books, records, documents and other materials used or held for use in connection with the ownership or operation of the Purchased Assets or Assumed Liabilities, except for those relating exclusively to the Excluded Assets or Retained Liabilities, constitute Purchased Assets that are required to be delivered to the Purchaser at or prior to the Closing. However, the Parties are required to preserve all books and records that they own immediately after the Closing relating to the Purchased Assets, the Assumed Liabilities, and the Sellers' operation of the business relating thereto prior to the Closing for a period of six (6) years following the Closing Date or for such a longer period as may be required by applicable Law, unless disposed of in good faith pursuant to a document retention policy. During such period, the Sellers will have reasonable access to examine and copy such books and records (subject to certain exceptions relating to attorney-client privilege), thereby enabling them to administer these chapter 11 cases in an orderly and efficient manner

- Sale of Avoidance Actions. The MPA contemplates the sale to the Purchaser of potential avoidance Claims relating to or in connection with any payments by or to, or other transfers or assignments by or to, any Purchased Subsidiary.

- Requested Findings as to Successor Liability. The MPA and the Sale Order contemplate entry of certain findings by the Court as to successor liability. The MPA contemplates the transfer of the Purchased Assets free and clear of all liens, claims, encumbrances, and interests. As such, the findings set forth in the Sale Order comply with applicable principles of sales free and clear of liens, claims, encumbrances, and interests pursuant to section 363(f) of the Bankruptcy Code. The notice to be provided via the Publication Notice is reasonably calculated to provide all parties in interest (including parties with contingent claims) with the

necessary information concerning the 363 Transaction, the Sale Hearing, and the Sale Order, including the requested finding as to successor liability, because providing notice to these parties by mail is not practicable.

- Relief from Bankruptcy Rule 6004(h). For the reasons set forth herein, the Debtors request relief from the ten-day stay imposed by Bankruptcy Rule 6004(h). Given the likelihood that the Debtors' assets will rapidly diminish in value if the 363 Transaction is not immediately approved and promptly consummated, legitimate reasons exist to warrant this Court's approval of an order waiving the requirements of Bankruptcy Rule 6004(h).

Jurisdiction

47. This Court has jurisdiction to consider this matter pursuant to 28 U.S.C. §§ 157 and 1334. This is a core proceeding pursuant to 28 U.S.C. § 157(b). Venue is proper before this Court pursuant to 28 U.S.C. §§ 1408 and 1409.

Relief Requested

48. The Debtors request entry of (i) the Sale Procedures Order, pursuant to sections 105(a) and 363 of the Bankruptcy Code and Bankruptcy Rules 2002 and 6004, authorizing and approving certain proposed procedures to govern the submission of competing bids for substantially all of the Sellers' assets and the form and manner of notices of (a) the date, time, and place of the hearing to consider the sale, (b) the assumption and assignment of executory contracts and Leases, and (c) the UAW Retiree Settlement Agreement; and (ii) the Sale Order, a copy of which is annexed hereto as Exhibit "B," pursuant to sections 105, 363(b), (f), (k), and (m), and 365 of the Bankruptcy Code and Bankruptcy Rules 6004 and 6006, authorizing and approving, among other things, the (i) sale of the Purchased Assets pursuant to the MPA free and clear of liens, claims, encumbrances, and other interests, including rights or claims based on any successor or transferee liability, (ii) assumption and assignment of certain

executory contracts and Leases, including the UAW CBA Assignment, and (iii) the UAW Retiree Settlement Agreement.

Proposed Sale Procedures and Notice

49. The sale of the Purchased Assets pursuant to the MPA is subject to higher or better offers. The MPA provides certain terms and procedures (collectively, the "Sale Procedures") to govern the submission of any competing offers based upon the MPA. The Sale Procedures are set forth in the MPA and in the proposed Sale Procedures Order, a copy of which is annexed hereto as Exhibit "C," and provide for the following:

- The hearing to consider the sale of the Purchased Assets (the "Sale Hearing") will be held before the Honorable Robert E. Gerber, United States Bankruptcy Judge, in Courtroom __ of the United States Bankruptcy Court for the Southern District of New York, One Bowling Green, New York, New York 10004-1408, on June 30, 2009, at __:__ _.m. (Eastern Time), or as soon thereafter as counsel may be heard;

- In order to participate in the sale process, a person interested in acquiring the Purchased Assets (a "Potential Bidder") must first deliver to the Debtors by the Bid Deadline (as hereinafter defined) (with a copy to the Purchaser): (i) an executed confidentiality agreement that is reasonably satisfactory to the Debtors; and (ii) the most current audited and latest unaudited financial statements (collectively, the "Financials") of the Potential Bidder, or, if the Potential Bidder is an entity formed for the purpose of purchasing the Purchased Assets, (x) Financials of the equity holder(s) of the Potential Bidder or such other form of financial disclosure acceptable to the Debtors, and (y) the written commitment acceptable to the Debtors of the equity holder(s) of the Potential Bidder to be responsible for the Potential Bidder's obligations in connection with purchasing the Purchased Assets;

- A "Qualified Bidder" is a Potential Bidder whose Financials (or the Financials of its equity holder(s), if applicable) demonstrate the financial capability to consummate the sale of the Purchased Assets and who the Debtors, in their discretion but after consulting with the UAW and any statutory committee of unsecured creditors appointed in these chapter 11 cases (the "Creditors Committee"), determine will be likely to consummate the sale of the Purchased Assets, if selected as the successful bidder, after taking into account all relevant legal, regulatory, and business considerations. Within two (2) days after the Debtors and the Purchaser timely receive from a Potential Bidder all the materials required in the preceding paragraph, the Debtors will determine, in consultation

with their advisors, the UAW, and the Creditors Committee, and will notify the Purchaser and the Potential Bidder in writing whether the Potential Bidder is a Qualified Bidder. The Purchaser is a Qualified Bidder and is not required to make a good faith deposit;

- If the Debtors, in their business judgment, determine that a Qualified Bidder that has submitted a written nonbinding expression of interest regarding the 363 Transaction is reasonably likely to make a bona fide offer that would result in greater value being received for the benefit of the Sellers' creditors than under the MPA, then the Debtors shall afford such Qualified Bidder reasonable due diligence, including the ability to access information from a confidential electronic data room concerning the Purchased Assets (the "Data Room");

- The deadline for submitting bids by a Qualified Bidder will be June 22, 2009, at 5:00 p.m. (Eastern Time) (the "Bid Deadline");

- Prior to the Bid Deadline, a Qualified Bidder that desires to make a bid will deliver (i) one written copy of its bid, and (ii) two copies of the MPA that has been marked to show amendments and modifications to the MPA, including price and terms, that are being proposed by the Qualified Bidder (a "Marked Agreement"), to: (a) the Debtors, (b) the attorneys for the Debtors, (c) the Purchaser, (d) the attorneys for the Purchaser, (e) EDC, (f) the UAW, (g) the attorneys for the UAW, and (h) the attorneys for the Creditors Committee;

- The Debtors and their advisors shall be entitled to due diligence from a Qualified Bidder, upon execution of a confidentiality agreement that is reasonably satisfactory to the Debtors. Each Qualified Bidder will comply with all reasonable requests for additional information and due diligence access by the Debtors or their advisors. Failure by a Qualified Bidder to fully comply with requests for additional information and due diligence access will be a basis for the Debtors to determine that a bid made by the Qualified Bidder is not a Qualified Bid;

- A bid must be a written irrevocable offer from a Qualified Bidder (i) stating that the Qualified Bidder offers to consummate the sale of the Purchased Assets pursuant to the Marked Agreement; (ii) confirming that the offer will remain open until the closing of the sale of the Purchased Assets to the Successful Bidder (as defined below); (iii) enclosing a copy of the proposed Marked Agreement; (iv) accompanied with a certified or bank check, or wire transfer, in the amount of $500 million to be held in escrow as a good faith deposit (a "Good Faith Deposit");

- A bid must provide that the Qualified Bidder (i) agrees to the assumption by the Debtors and assignment to such Qualified Bidder of any collective bargaining agreements entered into by and between the Debtors and the UAW with the exception of (a) the agreement to provide certain retiree medical benefits

specified in the Memorandum of Understanding Post-Retirement Medical Care, dated September 26, 2007, between the Company and the UAW, and (b) the Settlement Agreement, dated February 21, 2008, between the Company and the UAW; and (ii) will enter into the UAW Retiree Settlement Agreement;

- In addition to the foregoing requirements, a bid or bids must: (a) be on terms that are not materially more burdensome or conditional than the terms of the MPA; (b) not be conditioned on obtaining financing or the outcome of unperformed due diligence by the bidder; (c) not request or entitle the bidder to any breakup fee, expense reimbursement, or similar type of payment; and (d) fully disclose the identity of each entity that will be bidding for the Purchased Assets or otherwise participating in connection with such bid and the complete terms of any such participation.

- A bid received from a Qualified Bidder and that meets the requirements set forth in the preceding two paragraphs will be considered a "Qualified Bid" if the Debtors, the UAW, and the Creditors Committee reasonably believe that such bid would be consummated if selected as the Successful Bid. For all purposes hereof, the Purchaser's offer to acquire the Purchased Assets pursuant to the MPA shall constitute a Qualified Bid.

- If the Sellers receive any Qualified Bids, the Sellers shall have the right to select, and seek final approval of the Bankruptcy Court for, the highest or otherwise best Qualified Bid(s) from the Qualified Bidders, which will be determined by considering, among other things, the (i) identity of the Qualified Bidder, (ii) number, type, and nature of any changes to the MPA requested by the Qualified Bidder, (iii) extent to which the identity of the Bidder or such modifications are likely to delay closing of the sale of the Purchased Assets and Assumed Liabilities to the Qualified Bidder and the cost to the Sellers of such modifications or delay, (iv) extent to which the Qualified Bid covers less than or more than all the Purchased Assets and Assumed Liabilities, and (v) financial strength of the Qualified Bidder and the availability of committed financing for the Qualified Bidder that would enable the Qualified Bidder to purchase the Purchased Assets and assume the Assumed Liabilities. All other considerations being equal, the Sellers shall strongly favor Qualified Bids for all the Purchased Assets. The Qualified Bidder making the highest or best Qualified Bid (the "Successful Bid") will be designated as the "Successful Bidder"; the next highest or otherwise best offer after the Successful Bid will be designated the "Next Highest Bid."

- If, however, no Qualified Bid (other than the Purchaser's) is received by the Bid Deadline, the MPA shall be the highest or best Qualified Bid, i.e., the Successful Bid, and the Purchaser shall be the Successful Bidder, and, at the Sale Hearing, the Debtors will seek approval of and authority to consummate the 363 Transaction contemplated by the MPA.

- The Debtors shall notify the Bankruptcy Court of the Successful Bid at the Sale Hearing, at which certain findings will be sought from the Bankruptcy Court, including that consummation of the 363 Transaction contemplated by the Successful Bid will provide the highest or otherwise best value for the Purchased Assets and is in the best interests of the Sellers and the Debtors' estates. In the event that, for any reason, the Successful Bidder fails to close the 363 Transaction contemplated by its Successful Bid, then, without notice to any other party or further Court order, the Debtors shall be authorized to close with the Qualified Bidder that submitted the Next Highest Bid.

- Except as otherwise provided in this paragraph with respect to the Successful Bidder and the Next Highest Bidder, the Good Faith Deposits of all Qualified Bidders required to submit such a deposit under the Sale Procedures shall be returned upon or within one (1) business day after entry of the Sale Order. The Good Faith Deposit of the Successful Bidder shall be held until the closing of the 363 Transaction and applied in accordance with the Successful Bid. The Good Faith Deposit of the Next Highest Bidder shall be retained in escrow until 48 hours after the closing of the 363 Transaction. Pending the closing of the 363 Transaction, the Good Faith Deposit of the Successful Bidder and the Next Highest Bidder shall be maintained in an interest-bearing escrow account. If the closing does not occur, the disposition of the Good Faith Deposits shall be as provided in the Successful Bid and Next Highest Bid, as applicable.

- The Sellers are required to reimburse the Purchaser for the Purchaser's reasonable out-of-pocket costs and expenses in connection with the 363 Transaction in the event that the MPA is terminated because the Court approves an Alternative Transaction, among other reasons.

50. Under Bankruptcy Rule 2002(a) and (c) and Rule 9013-1(b) of the Local Bankruptcy Rules for the Southern District of New York, the Debtors are required to notify their creditors of the proposed sale of the Purchased Assets, including the terms and conditions of the Sale Procedures and the time set for filing objections. The Debtors request notice of this Motion and of the relief requested be deemed adequate and sufficient if:

- The Debtors (or their agent) serve, within three (3) days after entry of the Sale Procedures Order (the "Mailing Deadline"), by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a copy of the Sale Procedures Order upon: (i) the attorneys for the U.S. Treasury, (ii) the attorneys for Export Development Canada, (iii) the attorneys for the agent under the Debtors' prepetition secured term loan agreement, (iv) the attorneys for the agent

under the Debtors' prepetition amended and restated secured revolving credit agreement, (v) the attorneys for the Creditors Committee (if no statutory committee of unsecured creditors has been appointed, the holders of the fifty largest unsecured claims against the Debtors on a consolidated basis), (vi) the attorneys for the UAW, (vii) the attorneys for the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers—Communications Workers of America, (viii) the United States Department of Labor, (ix) the attorneys for the National Automobile Dealers Association, (x) the attorneys for the ad hoc bondholders committee, (xi) any party who, in the past three years, expressed in writing to the Debtors an interest in the Purchased Assets and who the Debtors and their representatives reasonably and in good faith determine potentially have the financial wherewithal to effectuate the transaction contemplated in the MPA, (xii) non-Debtor parties to the Assumable Executory Contracts, (xiii) all parties who are known to have asserted any lien, claim, encumbrance, or interest in or on the Purchased Assets, (xiv) the Securities and Exchange Commission, (xv) the Internal Revenue Service, (xvi) all applicable state attorneys general, local environmental enforcement agencies, and local regulatory authorities, (xvii) all applicable state and local taxing authorities, (xviii) the Federal Trade Commission, (ix) all applicable state attorneys general, (xx) United States Attorney General/Antitrust Division of the Department of Justice, (xxi) the U.S. Environmental Protection Agency and similar state agencies, (xxii) the United States Attorney's Office, (xxiii) all dealers with current agreements for the sale or leasing of GM brand vehicles, (xxiv) the Office of the United States Trustee for the Southern District of New York, and (xxv) all entities that requested notice in these chapter 11 cases under Bankruptcy Rule 2002; and

- On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a notice of the Sale Hearing (the "Sale Notice"), substantially in the form annexed hereto as Exhibit "D," upon (i) all other known creditors and (ii) all equity security holders of the Debtors of record as of May 27, 2009.

- On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a notice of the assumption and assignment of the Assumable Executory Contracts and the proposed cure amounts relating to the Assumable Executory Contracts (the "Assumption and Assignment Notice"), substantially in the form annexed hereto as Exhibit "E," upon the non-Debtor parties to the Assumable Executory Contracts.

- On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a notice of the 363 Transaction and the UAW Retiree Settlement, as well as a cover letter from the UAW describing the UAW Retiree Settlement Agreement and communicating the UAW's support of the 363 Transaction, including the UAW

Retiree Settlement Agreement (collectively, the "UAW Retiree Notice"), substantially in the form annexed hereto as Exhibit "F," upon (i) the UAW, (ii) the attorneys for the UAW, and (iii) all of the UAW-Represented Retirees. On the Mailing Deadline or as soon as practicable thereafter, the Debtors will cause the MPA, the Motion, the Sale Procedures Order, the UAW Retiree Notice, and the UAW Retiree Settlement Agreement, including all exhibits thereto (other than those containing commercially sensitive information), to be published on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http:/www.gmcourtdocs.com, in an area dedicated to retiree-related information (this website disclosure and the UAW Retiree Notice, collectively the "UAW Special Retiree Notice").

51. The Debtors also propose, pursuant to Bankruptcy Rule 2003(d) and 2002(*l*), that publication of the Sale Notice (the "Publication Notice"), substantially in the form annexed hereto as Exhibit "G," on the Mailing Deadline or as soon as practicable thereafter (i) once in (a) the global edition of *The Wall Street Journal*, (b) the national edition of *The New York Times*, (c) the global edition of *The Financial Times*, (d) the national edition of *USA Today*, (e) *Detroit Free Press/Detroit News*, (f) *Le Journal de Montreal*, (g) *Montreal Gazette*, (h) *The Globe and Mail*, and (i) *The National Post*, and (ii) on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com, be deemed proper notice to any other interested parties whose identities are unknown to the Debtors.

The Sale Procedures Should Be Approved

52. Good and sufficient cause exists to approve the Sale Procedures. The Sale Procedures are in the best interests of the Debtors and their economic stakeholders and other parties because they will enable the Company to realize the maximum value from the sale of the Purchased Assets. Additionally, the Sale Procedures include appropriate noticing procedures to ensure all parties in interest will receive adequate notice of all relevant information.

53. Expeditious Nature of Sale Procedures. The expeditious nature of the proposed Sale Procedures is reasonable and justified. As set forth above and in the Henderson Affidavit, GM's precarious financial and operational condition has been widely reported in all media on a daily basis for many months. Nevertheless, no significant offers for any of the Company's assets have been received other than that of the 363 Transaction. The Sale Procedures will provide an additional procedural safeguard and market check that will enable any potentially qualified interested parties with an opportunity to come forward and make a competitive bid.

54. Notice. The Debtors submit that the notice set forth in the Sale Procedures constitutes good and sufficient notice of the Sale Procedures, the Sale Hearing, the 363 Transaction, the UAW CBA Assignment, and the UAW Retiree Settlement Agreement, and that no other or further notice need be given.

55. The notice to be provided via the Publication Notice is reasonably calculated to provide all parties in interest (including parties with contingent claims) with the necessary information concerning the Sale Procedures (the "Sale Procedures Hearing"), the Sale Hearing, and the 363 Transaction. Providing notice to these parties by mail is not practicable. Accordingly, the proposed Publication Notice is appropriate and sufficient under the circumstances.

56. The UAW Special Retiree Notice is reasonably calculated to provide UAW-Represented Retirees with proper notice of the Sale Procedures, the Sale Hearing, and the 363 Transaction, including, but not limited to, the sale of the Purchased Assets free and clear of any lien, claim, encumbrance, or other interest the UAW or

UAW-Represented Retirees may have in the Purchased Assets, and of the UAW Retiree Settlement Agreement.

57. The Publication Notice, the Sale Notice, the Assumption and Assignment Notice, and the UAW Retiree Notice, and the UAW Special Retiree Notice, and the method of service described herein and provided in the Sale Procedures Order, fully comply with Bankruptcy Rule 2002 and constitute good and sufficient notice of the Sale Procedures, the Bid Deadline, the 363 Transaction, the assumption and assignment of executory contracts and Leases, the UAW Retiree Settlement Agreement, the relevant objection deadlines, the Sale Hearing, and all matters related thereto. Accordingly, the Company requests that the Court approve the form and manner of such notices substantially in the form of Exhibits "C" through "G," annexed hereto.

Sale of the Purchased Assets

58. In accordance with Bankruptcy Rule 6004(f)(1), sales of property rights outside the ordinary course of business may be by private sale or public auction. The Debtors have determined that a private sale of the Purchased Assets in accordance with the proposed Sale Procedures will enable them to obtain the highest or best offer for the Purchased Assets, thereby maximizing the value of their estates, and is in the best interests of the Debtors and their creditors and other stakeholders.

59. Section 363(b)(1) of the Bankruptcy Code provides, in pertinent part, that the "trustee, after notice and a hearing, may use, sell, or lease, other than in the ordinary course of business, property of the estate." 11 U.S.C. § 363(b)(1). To obtain court approval to sell property under section 363(b), the Debtors must show a legitimate business justification for the proposed action. *See Comm. of Equity Sec. Holders v. Lionel Corp.* (*In re Lionel Corp.*), 722 F.2d 1063, 1071 (2d Cir. 1983). As this Court has

stated, "[w]here the debtor articulates a reasonable basis for its business decisions (as distinct from a decision made arbitrarily or capriciously), courts will generally not entertain objections to the debtor's conduct." *Comm. of Asbestos-Related Litigants v. Johns-Manville Corp. (In re Johns-Manville Corp.)*, 60 B.R. 612, 616 (Bankr. S.D.N.Y. 1986).

60. As discussed more fully in the Debtors' Memorandum of Law in Support of the Motion (the "Memorandum of Law"), if a valid business justification exists, the applicable principle of law embeds the debtor's decision to sell property out of the ordinary course of business with a strong presumption that "'in making a business decision the directors of a corporation acted on an informed basis, in good faith and in the honest belief that the action taken was in the best interests of the company.'" *Official Comm. of Subordinated Bondholders v. Integrated Res., Inc. (In re Integrated Res., Inc.)*, 147 B.R. 650, 656 (S.D.N.Y. 1992) (quoting *Smith v. Van Gorkom*, 488 A.2d 858, 872 (Del. 1985)), *appeal dismissed*, 3 F.3d 49 (2d Cir. 1993). A section 363 sale should be approved if the Court is satisfied that the debtor has exercised sound business judgment; provided adequate notice; the purchaser has proceeded in good faith; and the purchase price is fair. The 363 Transaction satisfies each condition. *See In re Del. & Hudson Ry. Co.*, 124 B.R. 169, 176 (D. Del. 1991).

61. It is well established that a chapter 11 debtor may sell all or substantially all its assets pursuant to section 363(b) prior to confirmation of a chapter 11 plan, provided the court finds an articulated business reason for the proposed sale, such as exists in the cases at bar. *See Consumer News & Bus. Channel P'ship v. Fin. News Network Inc. (In re Fin. News Network Inc.)*, 980 F.2d 165, 169 (2d Cir. 1992) (in

considering sale outside plan of reorganization, "'a bankruptcy judge must not be shackled with unnecessarily rigid rules when exercising the undoubtedly broad administrative power granted him under the [Bankruptcy] Code'") (quoting *Lionel* at 1069); *see also Licensing By Paolo, Inc. v. Sinatra* (*In re Gucci*), 126 F.3d 380, 387 (2d Cir. 1997) ("A sale of a substantial part of a Chapter 11 estate . . . may be conducted if a good business reason exists to support it."); *Official Comm. of Unsecured Creditors of LTV Aerospace & Defense Co. v. LTV Corp.* (*In re Chateaugay Corp.*), 973 F.2d 141, 144 (2d Cir. 1992) (approval of subsidiary's sale of its assets before confirmation of plan was not abuse of discretion).

62. The 363 Transaction is the best and only way for the Company's assets to retain going concern value, provide employment opportunities, and create a viable domestic OEM in the interests of all stakeholders. New GM, which will emerge from the 363 Transaction, will have the ability to successfully compete with other OEMs both in this nation and abroad.

63. As the Company's largest secured creditor, the U.S. Treasury, and recently together with EDC, engaged in arm's-length negotiations with the Debtors in the formulation of the 363 Transaction and its financing. As a secured creditor and a financer, the U.S. Treasury together with EDC have set out a series of actions and conditions that the Company had to undertake before they would provide further financing. As set forth in the Henderson Affidavit, the Company explored various options in its attempt to achieve long-term viability. The Company determined that it is in the best interests of all economic stakeholders to pursue the 363 Transaction as the only viable means to accomplish the survival of an operating, economically sound

business. The U.S. Treasury and EDC, as the source of necessary and required financing, and the U.S. Treasury as the largest secured creditor, have concurred in the Company's business judgment.

64. No financing is available for any other transaction, inside or outside of bankruptcy. No party other than the U.S. Treasury and EDC is willing to provide the necessary debtor in possession financing. GM's financial situation is dire. Its survival during the past five months has been completely dependent on the financing it received from the U.S. Treasury. Without that support, the Company would not have had the money to continue operations. Without continued government support, the Company will be constrained to liquidate its assets at forced sales. In that context, it is critical to note that the proposed DIP financing is only available *if* there is an expedited 363 Transaction.

65. The creation of New GM will result in a formidable, essentially new, efficient, competitive domestic manufacturer in the automotive industry. The transition services structure is designed to ensure a seamless continuity of operations for the benefit of employees, customers, suppliers, and employees of suppliers. Thus, approval of the 363 Transaction pursuant to the Sale Procedures and the MPA is in the best interests of the Company, its economic stakeholders, and the national interest, as expressed by President Obama.

The 363 Transaction Must Be Free and Clear of Liens, Claims, Encumbrances, and Interests, Including Rights or Claims Based on Successor or Transferee Liability

66. It is appropriate that the Purchased Assets be sold free and clear of liens, claims, encumbrances, and interests, including rights or claims based on any successor or transferee liability, pursuant to sections 105(a) and 363(f) of the Bankruptcy

Code, except those liabilities assumed by Purchaser or a successful bidder, with any such liens, claims, encumbrances, or interests to attach to the net sale proceeds of the Purchased Assets. Section 363(f) of the Bankruptcy Code provides:

> The trustee may sell property under subsection (b) or (c) of this section free and clear of any interest in such property of an entity other than the estate, only if—
>
> (1) applicable nonbankruptcy law permits sale of such property free and clear of such interest;
>
> (2) such entity consents;
>
> (3) such interest is a lien and the price at which such property is to be sold is greater than the aggregate value of all liens on such property;
>
> (4) such interest is in bona fide dispute; or
>
> (5) such entity could be compelled, in a legal or equitable proceeding, to accept a money satisfaction of such interest.

11 U.S.C. § 363(f).

67. To facilitate the sale of the Purchased Assets and the resultant viable New GM, it is necessary to authorize the sale of the Purchased Assets free and clear of any and all liens, claims, encumbrances, or interests, including rights or claims based on any successor or transferee liability (other than the liabilities assumed by Purchaser or any other successful bidder), with any such liens, claims, encumbrances, or interests to transfer to and attach to the net proceeds of the sale with the same rights and priorities therein.

68. The liens, claims, encumbrances, and interests held by creditors whose claims do not constitute Assumed Liabilities may be satisfied by at least one of the five conditions set forth in section 363(f), and any such liens, claims, encumbrances, and

interests will be adequately protected by transfer to and attachment to the net proceeds of the sale of the Purchased Assets, subject to any claims and defenses the Debtors may possess with respect thereto. Each of the parties holding liens on the Purchased Assets could be compelled to accept a monetary satisfaction of such interests, satisfying section 363(f)(5) of the Bankruptcy Code. In addition, certain holders of liens have consented, or may be deemed to have consented, to the sale of the Purchased Assets, thereby satisfying section 363(f)(2) of the Bankruptcy Code. Thus, the sale of the Purchased Assets free and clear of liens, claims, encumbrances, and interests, including rights or claims based on any successor or transferee liability, except for the liabilities assumed by the Purchaser or any other successful bidder, will satisfy the statutory prerequisites of sections 105(a) and 363(f) of the Bankruptcy Code. Accordingly, the Purchased Assets should be transferred to Purchaser free and clear of all liens, claims, encumbrances, and interests, except for Assumed Liabilities, with such liens, claims, encumbrances, and interests to be transferred to and attach to the net sale proceeds of the Purchased Assets.

Assumption and Assignment of Certain
Executory Contracts and Unexpired Leases

69. The MPA establishes procedures for assuming and assigning executory contracts or Leases to the Purchaser. Specifically, the Purchaser has the right to designate as an "Assumable Executory Contract," any Executory Contract or Lease that it may want to assume, subject to the following procedures and the continuing review process (the "Assumption and Assignment Procedures") set forth below.

Determination of Assumable Executory Contracts

- The Sellers shall maintain a schedule (the "Schedule") of Executory Contracts and Leases that the Purchaser has designated as Assumable Executory

Contracts.[4] From the date of the MPA until thirty (30) days after the Closing Date (or a later date if mutually agreed upon by the Sellers and the Purchaser) (the "Executory Contract Designation Deadline"), the Purchaser may (i) designate any additional Executory Contracts or Leases as Assumable Executory Contracts and add such Assumable Executory Contracts to the Schedule or (ii) remove any Assumable Executory Contract from the Schedule, in which case the Executory Contract or Lease shall cease to be an Assumable Executory Contract. The right of the Purchaser to add or remove Executory Contracts and Leases from the Schedule is subject to certain exceptions.[5]

- For each Assumable Executory Contract, the Purchaser must determine, prior to the Executory Contract Designation Deadline, the date on which it seeks to have the assumption and assignment become effective, which date may be the Closing Date or a later date (the "Proposed Assumption Effective Date").

- In addition to the Schedule, the Sellers shall maintain a secure website (the "Contract Website") that the non-Debtor counterparty to an Assumable Executory Contract can access to find current information about the status of its respective Executory Contract or Lease. The Contract Website contains, for each Assumable Executory Contract, (i) an identification of each Assumable Executory Contract that the Purchaser has designated for assumption and assignment and the status of assumption and (ii) the Cure Amounts that must be paid to cure any prepetition defaults under such respective Assumable Executory Contract as of the Commencement Date. The information on the Contract Website shall be made available to the non-Debtor counterparty to the Assumable Executory Contract (the "Non-Debtor Counterparty"), but shall not otherwise be publicly available.

Procedures for Providing Notice of Assumption and Assignment

- Following the designation of an Executory Contract or Lease as an Assumable Executory Contract, the Debtors shall provide notice (the "Assumption and Assignment Notice") to the Non-Debtor Counterparty to the Assumable Executory Contract, substantially in the form annexed hereto as Exhibit "D," setting forth (i) instructions for accessing the information on the Contract Website relating to such Non-Debtor Counterparty's Assumable Executory Contract and (ii) the procedures for objecting to the proposed assumption and assignment of the Assumable Executory Contract.

[4] There are currently approximately 400,000 Assumable Executory Contracts on the Schedule.

[5] For example, if an Assumable Executory Contract has already been assumed and assigned, it cannot be removed from the Schedule.

Procedures for Filing Objections to Assumption and Assignment and Cure Amounts

- Objections, if any, to the proposed assumption and assignment of the Assumable Executory Contracts (the "Contract Objections") must be made in writing, filed with the Court, and served on the Objection Deadline Parties (as defined below) so as to be received no later than ten (10) days after the date of the Assumption and Assignment Notice (the "Contract Objection Deadline") and must specifically identify in the objection the grounds therefor. The "Objection Deadline Parties" are (i) the Debtors, c/o General Motors Corporation, 300 Renaissance Center, Detroit, Michigan 48265 (Attn: Lawrence S. Buonomo, Esq.); (ii) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (iii) the U.S. Treasury, 1500 Pennsylvania Avenue NW, Room 2312, Washington, D.C. 20220 (Attn: Matthew Feldman, Esq.); (iv) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (v) the attorneys for the Creditors Committee; (vi) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.); and (vii) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004.

- Unless a Contract Objection is filed and served before the Contract Objection Deadline, the Non-Debtor Counterparty shall be deemed to have consented to the assumption and assignment of its respective Assumable Executory Contract and the respective Cure Amount and shall be forever barred from objecting to the Cure Amount and from asserting any additional cure or other amounts against the Sellers, their estates, or the Purchaser.

Procedures for Resolving Objections

- If a timely Contract Objection is filed solely as to the Cure Amount (a "Cure Objection"), then the Assumable Executory Contract shall nevertheless be assumed and assigned to the Purchaser on the Assumption Effective Date, the Purchaser shall pay the undisputed portion of the Cure Amount on or as soon as reasonably practicable after the Assumption Effective Date, and the disputed portion of the Cure Amount shall be determined as follows and paid as soon as reasonably practicable following resolution of such disputed Cure Amount: To resolve the Cure Objection, the Debtors, the Purchaser, and the objecting Non-Debtor Counterparty may meet and confer in good faith to attempt to resolve any such objection without Court intervention. A call center has been established by the Debtors for this purpose. If the Debtors determine that the Cure Objection cannot be resolved without judicial intervention, then the Cure Amount will be determined as follows: (a) with

respect to Assumable Executory Contracts pursuant to which the non-Debtor counterparty has agreed to an alternative dispute resolution procedure, then, according to such procedure; and (b) with respect to all other Assumable Executory Contracts, by the Court at the discretion of the Debtors either at the Sale Hearing or such other date as determined by the Court.

- If a timely Contract Objection is filed that objects to the assumption and assignment on a basis other than the Cure Amount, the Debtors, the Purchaser, and the objecting Non-Debtor Counterparty shall meet and confer in good faith to attempt to resolve any such objection without Court intervention. If the Debtors determine that the objection cannot be resolved without judicial intervention, then, at the discretion of the Sellers and the Purchaser, the objection shall be determined by the Court at the Sale Hearing or such other date as determined by the Court. If the Court determines at such hearing that the Assumable Executory Contract should not be assumed and assigned, then such Executory Contract or Lease shall no longer be considered an Assumable Executory Contract.

- If the Debtors, the Purchaser, and the non-Debtor Counterparty resolve any Contract Objection, they shall enter into a written stipulation (the "Assumption Resolution Stipulation"), which stipulation is not required to be filed with or approved by the Court.

Effective Date of Assumption

- All Assumable Executory Contracts will be assumed and assigned to the Purchaser on the date (the "Assumption Effective Date") that is the later of (i) the Proposed Assumption Effective Date and (ii) the Assumption Resolution Date (as defined below). The "Assumption Resolution Date" shall be, (i) if no Contract Objection has been filed on or prior to the Contract Objection Deadline or the only Contract Objection that has been filed on or prior to the Contract Objection Deadline is a Cure Objection, the business day after the Contract Objection Deadline, or (ii) if a Contract Objection other than a Cure Objection has been filed on or prior to the Contract Objection Deadline, the date of the Assumption Resolution Stipulation or the date of a Court order authorizing the assumption and assignment to the Purchaser of the Assumable Executory Contract.

- Contingent upon the approval of the 363 Transaction and concurrently with the consummation of the 363 Transaction (without prejudice to the conditions set forth in the MPA), (i) the UAW Collective Bargaining Agreement shall be deemed to be an Assumable Executory Contract as to which the Assumption and Assignment Notice need not be sent and which will not be listed on the Schedule or the Contract Website (ii) the Debtors shall assume and assign the UAW Collective Bargaining Agreement to the Purchaser as of the Closing Date, and each non-Debtor party to the UAW Collective Bargaining

> Agreement shall be deemed to have consented to such assumption and assignment.

70. Section 365(a) of the Bankruptcy Code provides a debtor in possession "subject to the court's approval may assume or reject any executory contracts or unexpired leases of the debtor." 11 U.S.C. § 365(a). Upon finding that debtors have exercised their sound business judgment in determining to assume an executory contract or unexpired lease, courts will approve the assumption under section 365(a) of the Bankruptcy Code. *See Nostas Assocs. v. Costich (In re Klein Sleep Prods., Inc.)*, 78 F.3d 18, 25 (2d Cir. 1996); *Orion Pictures Corp. v. Showtime Networks, Inc. (In re Orion Pictures Corp.)*, 4 F.3d 1095, 1099 (2d Cir. 1993).

71. Section 365(b) of the Bankruptcy Code requires that a debtor in possession meet certain additional requirements to assume a lease:

> If there has been a default in an executory contract or unexpired lease of the debtor, the trustee may not assume such contract or lease unless, at the time of assumption of such contract or lease, the trustee—
>
> (A) cures, or provides adequate assurance that the trustee will promptly cure, such default;
>
> (B) compensates, or provides adequate assurance that the trustee will promptly compensate, a party other than the debtor to such contract or lease, for any actual pecuniary loss to such party resulting from such default; and
>
> (C) provides adequate assurance of future performance under such contract or lease.

11 U.S.C. § 365(b). This section does not apply to a default that is a breach of a provision relating to

> (A) the insolvency or financial condition of the debtor at any time before the closing of the case;

> (B) the commencement of a case under this title;
>
> (C) the appointment of or taking possession by a trustee in a case under this title or a custodian before such commencement; or
>
> (D) the satisfaction of any penalty rate or provision relating to a default arising from any failure by the debtor to perform nonmonetary obligations under the executory contract or unexpired lease.

Id. § 365(b)(2).

72. Section 365(b)(1) of the Bankruptcy Code requires that the Debtors cure, or provide adequate assurance that it will promptly cure, any outstanding defaults under the Assumable Executory Contracts in connection with the assumption and assignment of these agreements to Purchaser.

73. Pursuant to section 365(f)(2) of the Bankruptcy Code, a debtor in possession may assign an executory contract or Lease if

> (A) the trustee assumes such contract or lease in accordance with the provisions of this section; and
>
> (B) adequate assurance of future performance by the assignee of such contract or lease is provided, whether or not there has been a default in such contract or lease.

Id. § 365(f)(2).

74. The meaning of "adequate assurance of future performance" depends on the facts and circumstances of each case, but should be given "practical, pragmatic construction." *See Carlisle Homes, Inc. v. Arrari (In re Carlisle Homes, Inc.),* 103 B.R. 524, 538 (Bankr. D.N.J. 1989); *see also In re Natco Indus., Inc.*, 54 B.R. 436, 440 (Bankr. S.D.N.Y. 1985) (adequate assurance of future performance does not mean absolute assurance that debtor will thrive and pay rent).

75. Among other things, adequate assurance may be given by demonstrating the assignee's financial health and experience in managing the type of enterprise or property assigned. *See In re Bygaph, Inc.*, 56 B.R. 596, 605-06 (Bankr. S.D.N.Y. 1986) (adequate assurance of future performance is present when prospective assignee of lease has financial resources and expressed willingness to devote sufficient funding to business to give it strong likelihood of succeeding; chief determinant of adequate assurance is whether rent will be paid).

76. The financial credibility, willingness, and ability of the U.S. Treasury-sponsored Purchaser to perform under the Assumable Executory Contracts cannot be credibly disputed. The Sale Hearing will provide the Court and other interested parties the opportunity to evaluate the ability of the Purchaser or, indeed, any other successful bidder to provide adequate assurance of future performance under the Assumable Executory Contracts, as required by section 365(b)(1)(C) of the Bankruptcy Code.

77. The Assumption and Assignment Procedures are reasonably calculated to provide all counterparties to the Assumable Executory Contracts with proper notice of the potential assumption and assignment of their executory contracts or Leases, any cure costs relating thereto, and the deadline to object to cure amounts.

Unenforceability of Anti-Assignment Provisions

78. To assist in the assumption, assignment, and sale of the Assumable Executory Contracts, the Sale Order should provide that certain anti-assignment provisions shall not restrict, limit, or prohibit, the assumption, assignment, and sale of the Assumable Executory Contracts and are deemed and found to be unenforceable anti-assignment provisions within the meaning of section 365(f) of the Bankruptcy Code.

79. Section 365(f)(1) of the Bankruptcy Code permits a debtor to assign executory contracts and Leases free from such anti-assignment restrictions:

> [N]otwithstanding a provision in an executory contract or unexpired lease of the debtor, or in applicable law, that prohibits, restricts, or conditions the assignment of such contract or lease, the trustee may assign such contract or lease under paragraph (2) of this subsection.

11 U.S.C. § 365(f)(1).

80. Section 365(f) prohibits three distinct types of anti-assignment provisions that are not enforceable in the context of assignments effected under section 365 of the Bankruptcy Code: (i) provisions that "prohibit" the assignment of an executory contract or unexpired lease are unenforceable; (ii) provisions that seek to "restrict" the ability of a debtor to assume and assign an executory contract or unexpired lease are not given effect; and (iii) provisions that "condition" the ability of a debtor to assume and assign an executory contract or unexpired lease are unenforceable.

81. Section 365(f)(1), by operation of law, invalidates provisions that prohibit, restrict, or condition assignment of an executory contract or unexpired lease. *See, e.g., Coleman Oil Co., Inc. v. The Circle K Corp. (In re The Circle K Corp.),* 127 F.3d 904, 910-11 (9th Cir. 1997) ("no principle of bankruptcy or contract law precludes us from permitting the Debtors here to extend their leases in a manner contrary to the leases' terms, when to do so will effectuate the purposes of section 365").

82. Section 365(f)(3) goes beyond the scope of section 365(f)(1) by prohibiting enforcement of any clause creating a right to modify or terminate the contract or lease upon a proposed assumption or assignment thereof. 11 U.S.C. § 365(f)(3). *See, e.g., In re Jamesway Corp.*, 201 BR 73 (Bankr. S.D.N.Y. 1996) (section 365(f)(3) prohibits enforcement of any lease clause creating right to terminate lease because it is

being assumed or assigned, thereby indirectly barring assignment by debtor; all lease provisions, not merely those entitled anti-assignment clauses, are subject to court's scrutiny regarding anti-assignment effect).

83. Many courts have recognized that provisions that have the effect of restricting assignments cannot be enforced. *See In re Rickel Home Ctrs., Inc.*, 240 B.R. 826, 831 (D. Del. 1998) ("In interpreting Section 365(f), courts and commentators alike have construed the terms to not only render unenforceable lease provisions which prohibit assignment outright, but also lease provisions that are so restrictive that they constitute de facto anti-assignment provisions."), *aff'd*, 209 F.3d 291 (3d Cir.), *cert. denied*, 531 U.S. 873 (2000).

84. Similarly, in *In re Mr. Grocer, Inc.*, the court noted that:

> [the] case law interpreting § 365(f)(1) of the Bankruptcy Code establishes that the court does retain some discretion in determining that lease provisions, which are not themselves *ipso facto* anti-assignment clauses, may still be refused enforcement in a bankruptcy context in which there is no substantial economic detriment to the landlord shown, and in which enforcement would preclude the bankruptcy estate from realizing the intrinsic value of its assets.

77 B.R. 349, 354 (Bankr. D.N.H. 1987). Consequently, any anti-assignment provisions should not restrict, limit, or prohibit the assumption, assignment, and sale of the Assumable Executory Contracts and should be deemed and found to be unenforceable anti-assignment provisions within the meaning of section 365(f) of the Bankruptcy Code.

Good Faith Purchaser

85. The Purchaser has been and is acting in good faith and is entitled to the protections of a good faith purchaser *under* section 363(m) of the Bankruptcy Code.

86. Section 363(m) *of* the Bankruptcy Code provides:

> The reversal or modification on appeal of an authorization under subsection (b) or (c) of this section of a sale or lease of property does not affect the validity of a sale or lease under such authorization to an entity that purchased or leased such property in good faith, whether or not such entity knew of the pendency of the appeal, unless such authorization and such sale or lease were stayed pending appeal.

11 U.S.C. § 363(m).

87. The terms and provisions of the MPA were negotiated by the Sellers and the Purchaser at arm's length, without *collusion*, and in good faith. The MPA represents substantial value to the Debtors and provides for fair consideration for the Purchased Assets. Moreover, the Purchaser does not hold any interests in the Debtors. The Purchaser's sponsor is the holder of secured claims and will provide DIP financing for the Debtors' chapter 11 cases as well as financing of New GM. In addition, it will be the majority holder of equity interests in New GM. The Purchaser and its sponsor are not affiliated with the Debtors, their officers, or directors.

88. Accordingly, the *Purchaser* should be found to be acting in good faith and entitled to the protections afforded under section 363(m).

The Appointment of a Consumer Privacy Ombudsman Is Necessary

89. Section 363(b)(1) of the Bankruptcy Code provides that if the Debtors "in connection with offering a product or a service discloses to an individual a policy prohibiting the transfer of personally identifiable information about individuals [and] such policy is in effect on the date of the commencement of the case," then the Debtors "may not sell . . . personally identifiable information to any person unless" the sale is "consistent with such policy" or a "consumer privacy ombudsman" is appointed.

11 U.S.C. § 363(b)(1). The term "personally identifiable information," defined in section 101(41A) of the Bankruptcy Code, means private information about a debtor's customers that "if disclosed, will result in contacting or identifying [an] individual physically or electronically" (e.g., name, address, telephone number, social security number, credit card account number, birth date). *Id.* § 101(41A).

90. Section 332 of the Bankruptcy Code governs the appointment of a consumer privacy ombudsman and *provides* that the Court "shall order the United States trustee to appoint, not later than 5 days before the commencement of the [sale] hearing, 1 disinterested person . . . to serve as the consumer privacy ombudsman in the case and shall require that notice of such hearing be timely given to such ombudsman." *Id.* § 332(a). The consumer privacy ombudsman "may appear and be heard at [the sale] hearing and shall provide to the [C]ourt information to assist the [C]ourt in its consideration of the facts, circumstances, and conditions of the proposed sale . . . of personally identifiable information." *Id.* § 332(b).

91. The Debtors currently maintain certain privacy policies that govern the use of personally identifiable information in conducting their business operations. The 363 Transaction may contemplate *the* transfer of certain personally identifiable information to a third party who is not an affiliate of the Debtors in a manner that may not be consistent with certain aspects of their existing privacy policies.

92. For example, the Debtors' current U.S. online consumer privacy statement provides, in *pertinent* part:

> The information you share with us may be used by GM, our affiliates, our licensees, and dealers. . . . It may also be shared in connection with the sale, transfer or financing of a significant part of a GM business. *We will not share your*

> *personal information with third parties other than these, or with any third party for their independent use without your permission. . . .*

http://www.gm.com/privacy/ (emphasis added).

93. Inasmuch as the italicized language quoted above was added to GM's privacy policy so as to be effective May 1, 2009, the argument could be made that it should not be applied *retroactively* to personal data collected before that date. Therefore, to avoid any delay in consummating the 363 Transaction, the Debtors request that the Court direct the U.S. Trustee to promptly appoint a consumer privacy ombudsman in accordance with section 332 of the Bankruptcy Code.

Accompanying Memorandum of Law

94. The Debtors have contemporaneously filed the Memorandum of Law in support of the Motion, which sets forth in greater deal the ample authority that exists for the relief requested by this Motion and for the entry of the Sale Procedures Order and the Sale Order.

Request for Relief Under Bankruptcy Rules 6004(h) and 6006(d)

95. Bankruptcy Rule 6004(h) provides that an "order authorizing the use, sale, or lease of property other than cash collateral is stayed until the expiration of 10 days after entry of the order, unless the court orders otherwise." Fed. R. Bankr. P. 6004(h). Any order approving the sale of the Purchased Assets in accordance with the Sale Procedures must be effective immediately upon entry of such order by providing that the ten-day stay shall not apply. As described above, as well as in the accompanying Memorandum of Law and the Henderson Affidavit, absent a prompt approval and consummation of the 363 Transaction, the Purchased Assets will rapidly decline in value as wasting assets. Therefore, it is imperative that the Sale Order be effective immediately

to permit the 363 Transaction to close without any delay. The ten-day stay under Bankruptcy Rule 6004(h) should be waived.

96. Bankruptcy Rule 6006(d) provides that an order authorizing the assignment of an executory contract or unexpired lease under section 365(f) is stayed until the expiration of ten days after entry of the order, unless the court orders otherwise. Fed. R. Bankr. P. 6006(d). Any order approving the sale of the Purchased Assets, which includes approving the assumption and assignment of the Assumable Executory Contracts to the Purchaser and approving the UAW Retiree Settlement Agreement, must be effective immediately upon entry of such order by providing that the ten-day stay shall not apply. The exigent circumstances necessitating the prompt consummation of the 363 Transaction mandates that the Sale Order, the assumption and assignment of the Assumable Executory Contracts to the Purchaser, and the UAW Retiree Settlement Agreement be effective immediately upon entry. It is essential that the Sale Order be effective without any delay by providing that the ten-day stay under Bankruptcy Rule 6006(d) is waived.

Notice

97. Notice of this Motion has been provided to (i) the Office of the United States Trustee for the Southern District of New York, (ii) the attorneys for the U.S. Treasury, (iii) the attorneys for EDC, (iv) the attorneys for the agent under GM's prepetition secured term loan agreement, (v) the attorneys for the agent under GM's prepetition amended and restated secured revolving credit agreement, (vi) the holders of the fifty largest unsecured claims against the Debtors (on a consolidated basis), (vii) the attorneys for the UAW, (viii) the attorneys for the International Union of Electronic,

Electrical, Salaried, Machine and Furniture Workers—Communications Workers of America, (ix) the United States Department of Labor, (x) the attorneys for the National Automobile Dealers Association, and (xi) the attorneys for the ad hoc bondholders committee. In view of all the facts and circumstances, the proposed notice is sufficient and no other or further notice need be provided.

98. No previous request for the relief sought herein has been made by the Debtors to this or any other Court.

WHEREFORE the Debtors respectfully request entry of an order granting the relief requested herein and such other and further relief as is just.

Dated: New York, New York

EXHIBIT A

PROPOSED MASTER SALE AND PURCHASE AGREEMENT

Exhibit M

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
GENERAL MOTORS CORP., *et al.*,	:	**09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

ORDER PURSUANT TO 11 U.S.C. §§ 105, 363, AND 365 AND FED. R. BANKR. P. 2002, 6004, AND 6006 (I) APPROVING PROCEDURES FOR SALE OF DEBTORS' ASSETS PURSUANT TO MASTER SALE AND PURCHASE AGREEMENT WITH VEHICLE ACQUISITION HOLDINGS LLC, A U.S. TREASURY-SPONSORED PURCHASER; (II) SCHEDULING BID DEADLINE AND SALE HEARING DATE; (III) ESTABLISHING ASSUMPTION AND ASSIGNMENT PROCEDURES; AND (IV) FIXING NOTICE PROCEDURES AND APPROVING FORM OF NOTICE

Upon the motion, dated June 1, 2009 (the "Motion"),[1] of General Motors Corporation ("GM") and certain of its subsidiaries, as debtors in possession in the above-captioned chapter 11 cases (collectively, the "Debtors" or the "Company"),[2] pursuant to sections 105, 363, and 365 of title 11, United States Code (the "Bankruptcy Code") and Rules 2002, 6004, and 6006 of the Federal Rules of Bankruptcy Procedure (the "Bankruptcy Rules") for, among other things, entry of an order, (A) approving the proposed sale procedures annexed hereto as Exhibit "A" (the "Sale Procedures"); (B) scheduling a bid deadline and sale hearing date; (C) establishing procedures for assuming and assigning the Assumable Executory Contracts; and (D) fixing notice procedures and approving forms of notice; and upon any

[1] Capitalized terms used herein and not otherwise defined herein shall have the meanings ascribed to such terms in the Motion, the Sale Procedures, or the MPA, as applicable.

[2] The Debtors and their respective Tax ID numbers are as follows: General Motors Corporation, Tax ID No. 38-0572515; Saturn, LLC, Tax ID No. 38-2577506; Saturn Distribution Corporation, Tax ID No. 38-2755764; and Chevrolet-Saturn of Harlem, Inc., Tax ID No. 20-1426707.

objections to the Motion (the "Objections"); and the Court having jurisdiction to consider the Motion and the relief requested therein in accordance with 28 U.S.C. §§ 157 and 1334 and the Standing Order M-61 Referring to Bankruptcy Judges for the Southern District of New York of Any and All Proceedings Under Title 11, dated July 10, 1984 (Ward, Acting C.J.); and consideration of the Motion and the relief requested therein being a core proceeding pursuant to 28 U.S.C. § 157(b); and venue being proper before this Court pursuant to 28 U.S.C. §§ 1408 and 1409; and due and proper notice of the Motion having been provided to (i) the Office of the United States Trustee for the Southern District of New York, (ii) the attorneys for the United States Department of the Treasury (the "U.S. Treasury"), (iii) the attorneys for Export Development Canada ("EDC"), (iv) the attorneys for the agent under GM's prepetition secured term loan agreement, (v) the attorneys for the agent under GM's prepetition amended and restated secured revolving credit agreement, (vi) the holders of the fifty largest unsecured claims against the Debtors (on a consolidated basis), (vii) the attorneys for the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (the "UAW"), (viii) the attorneys for the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers—Communications Workers of America, (ix) the United States Department of Labor, (x) the attorneys for the National Automobile Dealers Association, and (xi) the attorneys for the ad hoc bondholders committee, and it appearing that no other or further notice need be provided; and a hearing having been held on June 1, 2009, to consider the relief requested in the Motion (the "Sale Procedures Hearing"); and upon the Affidavit of Frederick A. Henderson Pursuant to Local Bankruptcy Rule 1007-2 (the "Henderson Affidavit"), the record of the Sale Procedures Hearing, and all of the proceedings had before the Court; and the Court having reviewed the Motion and any Objections and found and determined that the relief sought in the Motion as provided herein is necessary to avoid immediate and irreparable harm to the Debtors

and their estates, as contemplated by Bankruptcy Rule 6003, and is in the best interests of the Debtors, their estates and creditors, and all parties in interest and that the legal and factual bases set forth in the Motion establish just cause for the relief granted herein; and after due deliberation and sufficient cause appearing therefor, it is

FOUND AND DETERMINED THAT:[3]

A. The Debtors have articulated good and sufficient reasons for this Court to grant the relief requested in the Motion regarding the sale process, including the Court's (i) approval of the Sale Procedures, (ii) approval of the Assumption and Assignment Procedures, (iii) approval of and authorization to serve the Sale Notice, the Assumption and Assignment Notice, and the Special UAW Retiree Notice (each as hereinafter defined), and (iv) approval of and authorization to publish the Publication Notice (the "Sale Procedures Relief").

B. The Debtors have articulated good and sufficient reasons for, and the best interests of their estates will be served by, this Court scheduling a subsequent hearing (the "Sale Hearing") to consider whether to grant the remainder of the relief requested in the Motion, including the approval of the sale of substantially all the assets (the "Purchased Assets") of the Sellers in accordance with either the (i) proposed Master Sale and Purchase Agreement, dated as of June 1, 2009, substantially in the form annexed to the Motion as Exhibit "A" (together with all exhibits and agreements attached thereto, the "MPA"),[4] by and among GM and its Debtor subsidiaries (collectively, the "Sellers") and Vehicle Acquisition Holdings LLC (the "Purchaser"), a purchaser sponsored by the U.S. Treasury, or (ii) such other Marked Agreement

[3] Findings of fact shall be construed as conclusions of law and conclusions of law shall be construed as findings of fact when appropriate. *See* Fed. R. Bankr. P. 7052.

[4] Copies of the Motion and the MPA (without certain commercially sensitive attachments) may be obtained by accessing the website established by the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com.

that may constitute the Successful Bid (the "Replacement Agreement"), free and clear of all liens, claims, encumbrances, and interests, including rights or claims based on any successor or transferee liability (with the same to attach to the proceeds therefrom) pursuant to section 363 of the Bankruptcy Code (the "363 Transaction").

C. The Purchased Assets are "wasting assets" that will not retain going concern value over an extended period of time. As such, the Debtors' estates will suffer immediate and irreparable harm if the relief requested in the Motion is not granted on an expedited basis consistent with the provisions set forth herein and in the MPA.

D. The notice of the Sale Hearing (the "Sale Notice"), substantially in the form annexed hereto as Exhibit "B," is reasonably calculated to provide parties in interest with proper notice of the proposed sale of the Purchased Assets, the Sale Procedures, the 363 Transaction, and the Sale Hearing.

E. Publication of the Publication Notice, substantially in the form annexed hereto as Exhibit "C," as set forth herein is reasonably calculated to provide all unknown creditors and parties not otherwise required to be served with a copy of the Sale Notice pursuant to this Order with proper notice of the proposed sale of the Purchased Assets, the Sale Procedures, the 363 Transaction, and the Sale Hearing.

F. The Assumption and Assignment Notice, substantially in the form annexed hereto as Exhibit "D," is reasonably calculated to provide all counterparties to the Assumable Executory Contracts with proper notice of the potential assumption and assignment of their respective executory contracts or Leases, any Cure Amounts relating thereto, and the Assumption and Assignment Procedures.

G. The UAW Special Retiree Notice (as defined below) including the Cover Letter to UAW-Represented Retirees describing the 363 Transaction and the UAW Retiree

Settlement Agreement and the notice (together, the "UAW Retiree Notice") to the retirees of the Debtors and of certain retirees of Delphi Corporation ("Delphi"), a former unit of GM, including certain retirees of former Delphi units and former GM units, and their respective surviving spouses, who are eligible to receive, now or in the future, Retiree Medical Benefits (as defined in the UAW-Retiree Settlement Agreement) (collectively, the "UAW-Represented Retirees"), copies of which are annexed hereto as Exhibit "E," are reasonably calculated to provide the UAW-Represented Retirees with proper notice of the 363 Transaction, the Sale Procedures, the Sale Hearing, and the UAW Retiree Settlement Agreement.

H. The Motion and this Order comply with all applicable provisions of the Bankruptcy Code, the Bankruptcy Rules, the Local Bankruptcy Rules, and the Guidelines for the Conduct of Asset Sales established by the Bankruptcy Court on September 5, 2006 pursuant to General Order M-331.

I. The 363 Transaction includes the transfer of "personally identifiable information" (as defined in section 101(41A) of the Bankruptcy Code). As such, the transfer of personally identifiable information shall not be effective until a Consumer Privacy Ombudsman is appointed and issues its findings and the Court has an opportunity to review the findings and issue any rulings that are appropriate.

J. Due, sufficient, and adequate notice of the relief requested in the Motion and granted herein has been given to parties in interest.

K. This Order constitutes a final order within the meaning of 28 U.S.C. § 158(a).

NOW THEREFORE, IT IS HEREBY ORDERED, ADJUDGED, AND DECREED THAT:

1. The Sale Procedures Relief requested in the Motion is granted as provided herein.

2. The Objections are overruled except as otherwise set forth herein.

3. The Sale Procedures, which are incorporated herein by reference, are approved and shall govern all bids and sale procedures relating to the Purchased Assets. The Debtors are authorized to take any and all actions necessary or appropriate to implement the Sale Procedures.

4. The deadline for submitting a Qualified Bid shall be June 22, 2009 (the "Bid Deadline"), as further described in the Sale Procedures.

5. The deadline for objecting to approval of the 363 Transaction, including the sale of the Purchased Assets free and clear of liens, claims, encumbrances, and interests, including rights or claims based on any successor or transferee liability (or for UAW-Represented Retirees to object to the UAW Retiree Settlement Agreement), shall be June 19, 2009, at 5:00 p.m. (Eastern Time) (the "Objection Deadline"), *provided, however*, that in the event the Sale Procedures result in a Successful Bidder other than the Purchaser, the deadline for objecting to the sale of the Purchased Assets to such Successful Bidder shall be at the Sale Hearing.

6. The Purchaser shall constitute a Qualified Bidder for all purposes and in all respects with respect to the Sale Procedures and is not required to make a Good Faith Deposit.

7. The Court shall conduct the Sale Hearing on June 30, 2009, at 9:45 a.m. (Eastern Time), at which time the Court will consider approval of the 363 Transaction to the Successful Bidder and approval of the UAW Retiree Settlement Agreement. In the event the Successful Bidder is not the Purchaser, non-Debtor parties to the Assumable Executory Contracts may raise objections to adequate assurance of future performance at the Sale Hearing.

8. The Debtors are authorized to conduct the 363 Transaction (or other similar transaction if the Successful Bidder is a party other than the Purchaser) without the necessity of complying with any state or local bulk transfer laws or requirements.

9. The notices described in subparagraphs (a)-(d) below are approved and shall be good and sufficient, and no other or further notice shall be required if given as follows:

(a) The Debtors (or their agent) serve, within three (3) days after entry of this Order (the "Mailing Deadline"), by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a copy of this Order upon: (i) the attorneys for the U.S. Treasury, (ii) the attorneys for Export Development Canada, (iii) the attorneys for the agent under the Debtors' prepetition secured term loan agreement, (iv) the attorneys for the agent under the Debtors' prepetition amended and restated secured revolving credit agreement (v) the attorneys for the statutory committee of unsecured creditors appointed in the Debtors' chapter 11 cases (the "Creditors Committee") (if no statutory committee of unsecured creditors has been appointed, the holders of the fifty largest unsecured claims against the Debtors on a consolidated basis), (vi) the attorneys for the UAW, (vii) the attorneys for the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers—Communications Workers of America; (viii) the United States Department of Labor; (ix) the attorneys for the National Automobile Dealers Association, (x) the attorneys for the ad hoc bondholders committee; (xi) any party who, in the past three years, expressed in writing to the Debtors an interest in the Purchased Assets and who the Debtors and their representatives reasonably and in good faith determine potentially have the financial wherewithal to effectuate the transaction contemplated in the MPA, (xii) non-Debtor parties to the Assumable Executory Contracts, (xiii) all parties who are known to have asserted any lien, claim, encumbrance, or interest in or on the Purchased Assets, (xiv) the Securities and Exchange Commission, (xv) the Internal Revenue Service, (xvi) all applicable state attorneys general, local environmental enforcement agencies, and local regulatory authorities, (xvii) all applicable state and local taxing authorities, (xviii) the Federal Trade Commission, (ixx) all applicable state attorneys general, (xx) United States Attorney General/Antitrust Division of the Department of Justice, (xxi) the U.S. Environmental Protection Agency and similar state agencies, (xxii) the United States Attorney's Office, (xxiii) all dealers with current agreements for the sale or leasing of GM brand vehicles, (xxiv) the Office of the United States Trustee for the Southern District of New York, and (xxv) all entities that requested notice in these chapter 11 cases under Bankruptcy Rule 2002; and

(b) On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to

provide notice, the Sale Notice, substantially in the form annexed hereto as Exhibit "B," upon (i) all other known creditors and (ii) all equity security holders of the Debtors of record as of May 27, 2009.

(c) On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a notice of the assumption and assignment of the Assumable Executory Contracts and the proposed cure amounts relating to the Assumable Executory Contracts (the "Assumption and Assignment Notice"), substantially in the form annexed hereto as Exhibit "C," upon the non-Debtor parties to the Assumable Executory Contracts.

(d) On or before the Mailing Deadline, the Debtors (or their agent) serve by first-class mail, postage prepaid, or other method reasonably calculated to provide notice, a notice of the 363 Transaction and the UAW Retiree Settlement, as well as a cover letter from the UAW describing the UAW Retiree Settlement Agreement and communicating the UAW's support of the 363 Transaction, including the UAW Retiree Settlement Agreement (collectively, the "UAW Retiree Notice"), substantially in the form annexed hereto as Exhibit "E," upon (i) the UAW, (ii) the attorneys for the UAW, and (iii) all of the UAW-Represented Retirees. On the Mailing Deadline or as soon as practicable thereafter, the Debtors will cause the MPA, the Motion, the Sale Procedures Order, the UAW Retiree Notice, and the UAW Retiree Settlement Agreement, including all exhibits thereto (other than those containing commercially sensitive information), to be published on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http:/www.gmcourtdocs.com, in an area dedicated to retiree-related information (this website disclosure and the UAW Retiree Notice, collectively the "UAW Special Retiree Notice").

(e) On the Mailing Deadline, or as soon as practicable thereafter, the Debtors shall cause the Publication Notice to be published (i) once in (a) the global edition of *The Wall Street Journal*, (b) the national edition of *The New York Times*, (c) the global edition of *The Financial Times*, (d) the national edition of *USA Today*, (e) *Detroit Free Press/Detroit News*, (f) *Le Journal de Montreal*, (g) *Montreal Gazette*, (h) *The Globe and Mail*, and (i) *The National Post*, and (ii) on the website of the Debtors' proposed claims and noticing agent, The Garden City Group, Inc., at http::/www.gmcourtdocs.com.

10. The following procedures (the "Assumption and Assignment Procedures") shall govern the assumption and assignment of the Assumable Executory Contracts in connection with the sale of the Purchased Assets to the Purchaser:[5]

Determination of Assumable Executory Contracts

- The Sellers shall maintain a schedule (the "Schedule") of Executory Contracts and Leases that the Purchaser has designated as Assumable Executory Contracts. From the date of the MPA until thirty (30) days after the Closing Date (or a later date if mutually agreed upon by the Sellers and the Purchaser) (the "Executory Contract Designation Deadline"), the Purchaser may (i) designate any additional Executory Contracts or Leases as Assumable Executory Contracts and add such Assumable Executory Contracts to the Schedule or (ii) remove any Assumable Executory Contract from the Schedule, in which case the Executory Contract or Lease shall cease to be an Assumable Executory Contract. The right of the Purchaser to add or remove Executory Contracts and Leases from the Schedule is subject to certain exceptions.[6]

- For each Assumable Executory Contract, the Purchaser must determine, prior to the Executory Contract Designation Deadline, the date on which it seeks to have the assumption and assignment become effective, which date may be the Closing or a later date (the "Proposed Assumption Effective Date").

- In addition to the Schedule, the Sellers shall maintain a secure website (the "Contract Website") that the non-Debtor counterparty to an Assumable Executory Contract can access to find current information about the status of its respective Executory Contract or Lease. The Contract Website contains, for each Assumable Executory Contract, (i) an identification of each Assumable Executory Contract that the Purchaser has designated for assumption and assignment and (ii) the Cure Amounts that must be paid to cure any prepetition defaults under such respective Assumable Executory Contract as of the Commencement Date. The information on the Contract Website shall be made available to the non-Debtor counterparty to the Assumable Executory Contract (the "Non-Debtor Counterparty"), but shall not otherwise be publicly available.

[5] If a party other than the Purchaser is the Successful Bidder, or if a transaction other than the 363 Transaction is consummated, then these Assumption and Assignment Procedures may be modified by further order of this Court.

[6] For example, if an Assumable Executory Contract has already been assumed and assigned, it cannot be removed from the Schedule.

Procedures for Providing Notice of Assumption and Assignment

- Following the designation of an Executory Contract or Lease as an Assumable Executory Contract, the Debtors shall provide notice (the "Assumption and Assignment Notice") to the Non-Debtor Counterparty to the Assumable Executory Contract, substantially in the form annexed hereto as Exhibit "D," setting forth (i) instructions for accessing the information on the Contract Website relating to such Non-Debtor Counterparty's Assumable Executory Contract and (ii) the procedures for objecting to the proposed assumption and assignment of the Assumable Executory Contract.

Procedures for Filing Objections to Assumption and Assignment and Cure Amounts

- Objections, if any, to the proposed assumption and assignment of the Assumable Executory Contracts (the "Contract Objections") must be made in writing, filed with the Court, and served on the Objection Deadline Parties (as defined below) so as to be received no later than ten (10) days after the date of the Assumption and Assignment Notice (the "Contract Objection Deadline") and must specifically identify in the objection the grounds therefor. The "Objection Deadline Parties" are (i) the Debtors, c/o General Motors Corporation, 30009 Van Dyke Avenue, Warren, Michigan 48090-9025 (Attn: Warren Command Center, Mailcode 480-206-114); (ii) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (iii) the U.S. Treasury, 1500 Pennsylvania Avenue NW, Room 2312, Washington, D.C. 20220 (Attn: Matthew Feldman, Esq.); (iv) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (v) the attorneys for the Creditors Committee; (vi) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.); and (vii) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004.

- Unless a Contract Objection is filed and served before the Contract Objection Deadline, the Non-Debtor Counterparty shall be deemed to have consented to the assumption and assignment of its respective Assumable Executory Contract and the respective Cure Amount and shall be forever barred from objecting to the Cure Amount and from asserting any additional cure or other amounts against the Sellers, their estates, or the Purchaser.

Procedures for Resolving Objections

- If a timely Contract Objection is filed solely as to the Cure Amount (a "Cure Objection"), then the Assumable Executory Contract shall nevertheless be assumed and assigned to the Purchaser on the Assumption Effective Date, the Purchaser shall pay the undisputed portion of the Cure Amount on or as soon as reasonably practicable after the Assumption Effective Date, and the disputed portion of the Cure Amount shall be determined as follows and paid as soon as reasonably practicable

following resolution of such disputed Cure Amount: To resolve the Cure Objection, the Debtors, the Purchaser, and the objecting Non-Debtor Counterparty may meet and confer in good faith to attempt to resolve any such objection without Court intervention. A call center has been established by the Debtors for this purpose. If the Debtors determine that the Cure Objection cannot be resolved without judicial intervention, then the Cure Amount will be determined as follows: (a) with respect to Assumable Executory Contracts pursuant to which the non-Debtor counterparty has agreed to an alternative dispute resolution procedure, then, according to such procedure; and (b) with respect to all other Assumable Executory Contracts, by the Court at the discretion of the Debtors either at the Sale Hearing or such other date as determined by the Court.

- If a timely Contract Objection is filed that objects to the assumption and assignment on a basis other than the Cure Amount, the Debtors, the Purchaser, and the objecting Non-Debtor Counterparty shall meet and confer in good faith to attempt to resolve any such objection without Court intervention. If the Debtors determine that the objection cannot be resolved without judicial intervention, then, at the discretion of the Sellers and the Purchaser, the objection shall be determined by the Court at the Sale Hearing or such other date as determined by the Court. If the Court determines at such hearing that the Assumable Executory Contract should not be assumed and assigned, then such Executory Contract or Lease shall no longer be considered an Assumable Executory Contract.

- If the Debtors, the Purchaser, and the non-Debtor Counterparty resolve any Contract Objection, they shall enter into a written stipulation (the "Assumption Resolution Stipulation"), which stipulation is not required to be filed with or approved by the Court.

Effective Date of Assumption

- All Assumable Executory Contracts will be assumed and assigned to the Purchaser on the date (the "Assumption Effective Date") that is the later of (i) the Proposed Assumption Effective Date and (ii) the Assumption Resolution Date (as defined below). The "Assumption Resolution Date" shall be, (i) if no Contract Objection has been filed on or prior to the Contract Objection Deadline or the only Contract Objection that has been filed on or prior to the Contract Objection Deadline is a Cure Objection, the business day after the Contract Objection Deadline, or (ii) if a Contract Objection other than a Cure Objection has been filed on or prior to the Contract Objection Deadline, the date of the Assumption Resolution Stipulation or the date of a Court order authorizing the assumption and assignment to the Purchaser of the Assumable Executory Contract.

- Contingent upon the approval of the 363 Transaction and concurrently with the consummation of the 363 Transaction (without prejudice to the conditions set forth in the MPA), (i) the UAW Collective Bargaining Agreement shall be deemed to be an Assumable Executory Contract as to which the Assumption and Assignment Notice need not be sent and which will not be listed on the Schedule or the Contract Website (ii) the Debtors shall assume and assign the UAW Collective Bargaining Agreement

to the Purchaser as of the Closing Date, and each non-Debtor party to the UAW Collective Bargaining Agreement shall be deemed to have consented to such assumption and assignment.

11. Except as otherwise provided in paragraph 10 hereof with respect to Assumable Executory Contracts, in order to be considered, an objection to the 363 Transaction (or for UAW-Represented Retirees, the UAW Retiree Settlement Agreement), must be filed with the Court and served upon the following so as to be received by the Objection Deadline: (i) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (ii) the Debtors, c/o General Motors Corporation, 300 Renaissance Center, Detroit, Michigan 48265 (Attn: Lawrence S. Buonomo, Esq.); (iii) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (iv) the U.S. Treasury, 1500 Pennsylvania Avenue NW, Room 2312, Washington, D.C. 20220 (Attn: Matthew Feldman, Esq.); (v) Vedder Price, P.C., attorneys for EDC, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.); (vi) the attorneys for the Creditors Committee; (vii) the UAW, 8000 East Jefferson Avenue, Detroit, Michigan 48214 (Attn: Daniel W. Sherrick, Esq.); (viii) Cleary Gottlieb Steen & Hamilton LLP, attorneys for the UAW, One Liberty Plaza, New York, New York 10006 (Attn: James L. Bromley, Esq.); (xi) Cohen, Weiss and Simon LLP, attorneys for the UAW, 330 W. 42nd Street, New York, New York 10036 (Attn: Babette Ceccotti, Esq.); (xii) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004; and (xiii) the U.S. Attorney's Office, S.D.N.Y., 86 Chambers Street, Third Floor, New York, New York 10007 (Attn: David S. Jones, Esq. and Matthew L. Schwartz, Esq.). Contract

Objections and Cure Objections must be filed and served in accordance with the procedure set forth in paragraph 10 herein.

12. The failure of any objecting person or entity to timely file its objection shall be a bar to the assertion, at the Sale Hearing or thereafter, of any objection to the Motion, to the consummation and performance of the 363 Transaction contemplated by the MPA or a Participation Agreement, if any (including the transfer free and clear of all liens, claims, encumbrances, and interests, including rights or claims based on any successor or transferee liability, of each of the Purchased Assets transferred as part of the 363 Transaction), the approval of the UAW Retiree Settlement Agreement, or the assumption and assignment of any Executory Contract or Lease.

13. The U.S. Trustee is directed to appoint a Consumer Privacy Ombudsman pursuant to sections 332 and 363(b)(1) of the Bankruptcy Code as soon as practicable.

14. Notwithstanding any possible applicability of Bankruptcy Rules 6004 or 6006, or otherwise, the terms and provisions of this Order shall be immediately effective and enforceable upon its entry.

15. The Court shall retain jurisdiction over any matter or dispute arising from or relating to this Order.

Dated: New York, York

United States Bankruptcy Judge

EXHIBIT A

SALE PROCEDURES

SALE PROCEDURES

By motion dated June 1, 2009 (the "Motion"), General Motors Corporation ("GM") and its debtor subsidiaries, as debtors in possession (collectively, the "Debtors" or the "Company"), sought, among other things, approval of the process and procedures through which it will determine the highest or otherwise best price for the purchase of substantially all the assets (the "Purchased Assets") of the Debtors (the "Sellers"). On June 2, 2009, the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court") entered an order (the "Sale Procedures Order"), which, among other things, authorized the Debtors to determine the highest or otherwise best price for the Purchased Assets through the process and procedures set forth below (the "Sale Procedures").

On June 30, 2009, as further described below, in the Motion, and in the Sale Procedures Order, the Bankruptcy Court shall conduct a hearing (the "Sale Hearing"), at which the Debtors shall seek entry of an order (the "Sale Order") authorizing and approving the sale of the Purchased Assets (the "363 Transaction") pursuant to either (i) that certain Master Sale and Purchase Agreement (the "MPA") between the Sellers and Vehicle Acquisition Holdings LLC (the "Purchaser"), a purchaser sponsored by the United States Department of the Treasury (the "U.S. Treasury"), substantially in the form annexed as Exhibit "A" to the Motion, or (ii) a different Successful Bid (as defined below).

Participation Requirements

In order to participate in the bidding process or otherwise be considered for any purpose hereunder, a person interested in purchasing the Purchased Assets (a "Potential Bidder") must first deliver the following materials to the Debtors (with a copy to the Purchaser):

(i) An executed confidentiality agreement in form and substance reasonably satisfactory to the Debtors; and

(ii) The most current audited and latest unaudited financial statements (collectively, the "Financials") of the Potential Bidder, or, if the Potential Bidder is an entity formed for the purpose of the 363 Transaction, (x) Financials of the equity holder(s) of the Potential Bidder or such other form of financial disclosure as is acceptable to the Debtors, and (y) a written commitment acceptable to the Debtors of the equity holder(s) of the Potential Bidder to be responsible for the Potential Bidder's obligations in connection with the 363 Transaction.

A "Qualified Bidder" is a Potential Bidder whose Financials (or the Financials of its equity holder(s), if applicable) demonstrate the financial capability to consummate the 363 Transaction, whose bid meets all of the Bid Requirements described below *and* that the Debtors, in their discretion but after consulting with the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (the "UAW"), and the statutory committee of unsecured creditors appointed in these chapter 11 cases (the "Creditors Committee") determine is likely to consummate the 363 Transaction, if selected as the Successful Bidder, after taking into account all relevant legal, regulatory, and business considerations. The Purchaser is a Qualified Bidder and is not required to make a Good Faith Deposit (as defined below).

Within two (2) business days after the Debtors and the Purchaser receive from a Potential Bidder all the materials required by subparagraphs (i) and (ii) above, the Debtors shall determine, in consultation with their advisors, the UAW, and the Creditors Committee, and shall notify the Purchaser and the Potential Bidder in writing, whether the Potential Bidder is a Qualified Bidder.

Obtaining Due Diligence Access

To obtain due diligence access or additional information regarding the Purchased Assets or the Sellers, a Qualified Bidder (other than the Purchaser) must first provide the Debtors with a written nonbinding expression of interest (the "Expression of Interest") regarding (i) the Qualified Bidder's proposed 363 Transaction, (ii) the purchase price range, (iii) the structure and financing of the 363 Transaction, (iv) any conditions to closing that it may wish to impose, and (v) the nature and extent of additional due diligence it may wish to conduct. If the Debtors, in their business judgment, determine that a Qualified Bidder that has submitted an Expression of Interest is reasonably likely to make a bona fide offer that would result in greater value being received for the benefit of the Sellers' estates than under the MPA (a "Qualifying Expression of Interest"), then the Debtors shall afford such Qualified Bidder reasonable due diligence, including the ability to access information from a confidential electronic data room concerning the Purchased Assets (the "Data Room").

Neither the Debtors nor any of their affiliates (or any of their respective representatives) are obligated to furnish any information relating to the Sellers, the Purchased Assets, and/or the 363 Transaction to any person except to the Purchaser or another Qualified Bidder who makes a Qualifying Expression of Interest. The Debtors shall give the Purchaser any confidential memoranda (the "Confidential Memoranda") containing information and financial data with respect to the Purchased Assets and access to all due diligence information provided to any other Qualified Bidder.

The Debtors shall coordinate all reasonable requests for additional information and due diligence access from Qualified Bidders. If the Debtors determine that due diligence material requested by a Qualified Bidder is reasonable and appropriate under the circumstances, but such material has not previously been provided to any other Qualified Bidder, the Debtors shall post such materials in the Data Room and provide notification of such posting by electronic transmission to the Qualified Bidders and not previously provided to the Purchaser.

Unless the Debtors determine otherwise, the availability of additional due diligence to a Qualified Bidder will cease after the Bid Deadline (as defined below).

Bid Deadline

The deadline for submitting bids by a Qualified Bidder shall be June 22, 2009, at 5:00 p.m. (Eastern Time) (the "Bid Deadline")

Prior to the Bid Deadline, a Qualified Bidder that desires to make a bid shall deliver (i) one written copy of its bid and (ii) two copies of the MPA that has been marked to show amendments and modifications to the MPA, including price and terms, that are being

proposed by the Qualified Bidder (a "Marked Agreement"), to (a) the Debtors, c/o General Motors Corporation, 300 Renaissance Center, Detroit, Michigan 48265 (Attn: Lawrence S. Buonomo, Esq.), (b) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (c) the U.S. Treasury, 1500 Pennsylvania Avenue NW, Room 2312, Washington, D.C. 20220 (Attn: Matthew Feldman, Esq.); (d) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (e) the attorneys for the Creditors Committee; (f) the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (the "UAW"), 8000 East Jefferson Avenue, Detroit, Michigan 48214 (Attn: Daniel W. Sherrick, Esq.); (g) Cleary Gottlieb Steen & Hamilton LLP, the attorneys for the UAW, One Liberty Plaza, New York, New York 10006 (Attn: James L. Bromely, Esq.); (h) Cohen, Weiss and Simon LLP, the attorneys for the UAW, 330 W. 42nd Street, New York, New York 10036 (Attn: Babette Ceccotti, Esq.); (i) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.)

Due Diligence from Bidders

The Debtors and their advisors shall be entitled to due diligence from a Qualified Bidder, upon execution of a confidentiality agreement that is reasonably satisfactory to the Debtors. Each Qualified Bidder shall comply with all reasonable requests for additional information and due diligence access by the Debtors or their advisors. Failure of a Qualified Bidder to fully comply with requests for additional information and due diligence access will be a basis for the Debtors to determine that a bid made by the Qualified Bidder is not a Qualified Bid.

Bid Requirements

A bid must be a written irrevocable offer from a Qualified Bidder (i) stating that the Qualified Bidder offers to consummate a 363 Transaction pursuant to the Marked Agreement, (ii) confirming that the offer shall remain open until the closing of a 363 Transaction to the Successful Bidder (as defined below), (iii) enclosing a copy of the Marked Agreement, and (iv) including a certified or bank check, or wire transfer, in the amount of $500 million to be held in escrow as a good-faith deposit (the "Good Faith Deposit").

In addition to the foregoing requirements, a bid or bids must:

(a) provide that the Qualified Bidder (i) agrees to the assumption by the Debtors and assignment to such Qualified Bidder of any collective bargaining agreements entered into by and between the Debtors and the UAW with the exception of (a) the agreement to provide certain retiree medical benefits specified in the Memorandum of Understanding Post-Retirement Medical Care, dated September 26, 2007, between the Company and the UAW; and (b) the Settlement Agreement, dated February 21, 2008, between the Company and the UAW, and (ii) will enter into the UAW Retiree Settlement Agreement;

(b) be on terms that are not materially more burdensome or conditional than the terms of the MPA;

(c) not be conditioned on obtaining financing or the outcome of unperformed due diligence by the bidder;

(d) not request or entitle the bidder to any breakup fee, expense reimbursement, or similar type of payment; and

(e) fully disclose the identity of each entity that will be bidding for the Purchased Assets or otherwise participating in connection with such bid, and the complete terms of any such participation.

A timely bid received from a Qualified Bidder and that meets the requirements set forth above (the "Bid Requirements") will be considered a Qualified Bid if the Debtors, in consultation with their advisors, the UAW, and the Creditors Committee, reasonably believe that such bid would be consummated if selected as the Successful Bid (as defined below). For all purposes hereof, the Purchaser's offer to acquire the Purchased Assets pursuant to the MPA shall constitute a Qualified Bid.

Acceptance of Qualified Bids

The Debtors shall present to the Bankruptcy Court at the Sale Hearing the Qualified Bid that the Debtors, in their business judgment, determine, in consultation with their advisors, the UAW, and the Creditors Committee, would provide the highest or best offer for the Purchased Assets and is in the best interests of the Debtors and their estates in the Debtors' chapter 11 cases (the "Successful Bid," and the bidder with respect thereto, the "Successful Bidder"). At the Sale Hearing, certain findings will be sought from the Bankruptcy Court, including that (i) the Successful Bidder was selected in accordance with these Bidding Procedures, and (ii) consummation of the 363 Transaction as contemplated by the Successful Bid will provide the highest or otherwise best value for the Purchased Assets and is in the best interests of the Sellers and their estates in these chapter 11 cases.

In the event that, for any reason, the Successful Bidder fails to close the 363 Transaction contemplated by its Successful Bid, then, without notice to any other party or further Bankruptcy Court order, the Debtors shall be authorized to close with the Qualified Bidder that submitted the bid that the Debtors in their business judgment determined, in consultation with their advisors, the UAW, and the Creditors Committee, would provide the next highest or otherwise best value for the Purchased Assets and is otherwise in the best interests of the Debtors after the Successful Bid (the "Next Highest Bidder").

Return of Good Faith Deposit

Except as otherwise provided in this paragraph with respect to the Successful Bidder and the Next Highest Bidder, the Good Faith Deposits of all Qualified Bidders required to submit such a deposit under the Bidding Procedures shall be returned upon or within one (1) business day after entry of the Sale Order. The Good Faith Deposit of the Successful Bidder required to submit such a deposit under the Bidding Procedures shall be held until the closing of

the 363 Transaction and applied in accordance with the Successful Bid. The Good Faith Deposit of the Next Highest Bidder shall be retained in escrow until 48 hours after the closing of the 363 Transaction. Pending the closing of the 363 Transaction, the Good Faith Deposit of the Successful Bidder and the Next Highest Bidder shall be maintained in an interest-bearing escrow account. If the closing does not occur, the disposition of Good Faith Deposits shall be as provided in the Successful Bid and Next Highest Bid, as applicable.

NOTICE OF SALE HEARING TO SELL SUBSTANTIALLY ALL OF DEBTORS' ASSETS PURSUANT TO MASTER SALE AND PURCHASE AGREEMENT WITH VEHICLE ACQUISITION HOLDINGS LLC, A U.S. TREASURY-SPONSORED PURCHASER

PLEASE TAKE NOTICE THAT upon the motion (the "Motion"), of General Motors Corporation ("GM") and its debtor subsidiaries, as debtors in possession (collectively, the "Debtors" or the "Company"), dated June 1, 2009, the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court") has issued an order dated June 2, 2009 (the "Sale Procedures Order"), among other things, (i) scheduling a hearing (the "Sale Hearing") to approve (a) the Master Sale and Purchase Agreement, dated as of June 1, 2009 (the "MPA"), by and among GM and its Debtor subsidiaries (collectively, the "Sellers") and Vehicle Acquisition Holdings LLC. (the "Purchaser"), a purchaser sponsored by the United States Department of the Treasury (the "U.S. Treasury"), with respect to the sale of substantially all the Debtors' assets (the "Purchased Assets") free and clear of all liens, claims, encumbrances, and other interests, and subject to higher or better offers (the "363 Transaction"); (b) the assumption, assignment, and sale to the Purchaser pursuant to the MPA of certain executory contracts and unexpired leases of personal property and nonresidential real property (the "Assumable Executory Contracts"); and (c) the settlement agreement (the "UAW Retiree Settlement Agreement"), between the Purchaser and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (the "UAW"); (ii) approving certain procedures for the submission and acceptance of any competing bids (the "Sale Procedures"); (iii) approving a procedure for the assumption, assignment, and sale to the Purchaser pursuant to the MPA of the Assumable Executory Contracts; (iv) approving the form and manner of notice of the Motion and the relief requested therein and of the Sale Hearing; and (v) setting a deadline for the filing of objections, if any, to the relief requested in the Motion.

A. THE MASTER SALE AND PURCHASE AGREEMENT

The total consideration under the MPA for the sale of the Purchased Assets is equal to the sum of (i) a credit bid in the amount of the outstanding indebtedness owed to the Purchaser as of the closing pursuant to certain secured loans extended by the U.S. Treasury and Export Development Canada, less approximately $8 billion (estimated to be approximately $48.3 billion at July 31, 2009); (ii) the surrender of a warrant to purchase GM shares previously issued to the U.S. Treasury in connection with the secured loans extended by the U.S. Treasury; (iii) the

issuance to GM of shares of common stock of the Purchaser representing approximately 10% of the common stock of the Purchaser as of the closing of the sale; (iv) the issuance to GM of warrants to purchase up to 15% of the shares of common stock of the Purchaser on a fully diluted basis, with one half exercisable at any time prior to the seventh anniversary of issuance at an initial exercise price based on a $15 billion equity value of the Purchaser and the other half exercisable at any time prior to the tenth anniversary of issuance at an initial exercise price based on a $30 billion equity value of the Purchaser (GM can elect partial and cashless exercises of the warrants); and (v) the assumption by the Purchaser of certain assumed liabilities, all as set forth more fully in the MPA, a copy of which is annexed to the Motion as Exhibit "A." In addition, if the aggregate amount of allowed general unsecured claims against the Debtors exceeds $35 billion, as estimated by an order of the Bankruptcy Court (which the Debtors may seek at any time), GM will receive an additional 2% of the common stock of the Purchaser as of the closing of the sale.

B. THE SALE HEARING

The Sale Hearing will be held before the Honorable Robert E. Gerber, United States Bankruptcy Judge, in Courtroom 621 of the United States Bankruptcy Court for the Southern District of New York, One Bowling Green, New York, New York 10004-1408, on June 30, 2009, at 9:45 a.m. (Eastern Time). The Sale Hearing may be adjourned without notice by an announcement of the adjourned date at the Sale Hearing.

RESPONSES OR OBJECTIONS, IF ANY, TO THE RELIEF SOUGHT IN THE MOTION SHALL BE FILED with the Clerk of the Bankruptcy Court and served upon: (a) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (b) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (c) the attorneys for the Creditors Committee; (d) Cleary Gottlieb Steen & Hamilton LLP, the attorneys for the UAW, One Liberty Plaza, New York, New York 10006 (Attn: James L. Bromley, Esq.); (e) Cohen, Weiss and Simon LLP, the attorneys for the UAW, 330 W. 42nd Street, New York, New York 10036 (Attn: Babette Ceccotti, Esq.); (f) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.); (g) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004; and (h) the U.S. Attorney's Office, S.D.N.Y., 86 Chambers Street, Third Floor, New York, New York 10007 (Attn: David S. Jones, Esq. and Matthew L. Schwartz, Esq.), **SO AS TO BE RECEIVED NO LATER THAN JUNE 19, 2009, AT 5:00 P.M. (EASTERN TIME) (the "Objection Deadline**").

The failure of any person or entity to file a response or objection on or before the Objection Deadline shall be deemed a consent to the 363 Transaction and the other relief requested in the Motion, and shall bar the assertion, at the Sale Hearing or thereafter, of any objection to the Sale Procedures, the Motion, the 363 Transaction, the approval of the UAW Retiree Settlement Agreement, and the Debtors' consummation of the 363 Transaction.

C. COPIES OF THE MOTION AND SALE PROCEDURES ORDER

This Notice provides only a partial summary of the relief sought in the Motion and the terms of the Sale Procedures Order. Copies of the Motion, the MPA (excluding certain commercially sensitive information), and Sale Procedures Order are available for inspection (i) by accessing (a) the website of the Bankruptcy Court at http://www.nysb.uscourts.gov, or (b) the website of the Debtors' claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com or (ii) by visiting the Office of the Clerk of the Bankruptcy Court, United States Bankruptcy Court, Southern District of New York, One Bowling Green, New York, New York 10004-1408. Copies also may be obtained by faxing a written request to the attorneys for the Debtors, Weil, Gotshal & Manges LLP (Attn: Russell Brooks, Esq.) at 212-310-8007.

Jones, Esq. and Matthew L. Schwartz, Esq.), **SO AS TO BE RECEIVED NO LATER THAN JUNE 19, 2009, AT 5:00 P.M. (EASTERN TIME) (the "Objection Deadline**").

The failure of any person or entity to file a response or objection on or before the Objection Deadline shall be deemed a consent to the 363 Transaction and the other relief requested in the Motion, and shall bar the assertion, at the Sale Hearing or thereafter, of any objection to the Sale Procedures, the Motion, the 363 Transaction, the approval of the UAW Retiree Settlement Agreement, and the Debtors' consummation of the 363 Transaction.

C. COPIES OF THE MOTION AND SALE PROCEDURES ORDER

This Notice provides only a partial summary of the relief sought in the Motion and the terms of the Sale Procedures Order. Copies of the Motion, the MPA (excluding certain commercially sensitive information), and Sale Procedures Order are available for inspection (i) by accessing (a) the website of the Bankruptcy Court at http://www.nysb.uscourts.gov, or (b) the website of the Debtors' claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com or (ii) by visiting the Office of the Clerk of the Bankruptcy Court, United States Bankruptcy Court, Southern District of New York, One Bowling Green, New York, New York 10004-1408. Copies also may be obtained by faxing a written request to the attorneys for the Debtors, Weil, Gotshal & Manges LLP (Attn: Russell Brooks, Esq.) at 212-310-8007.

FORM OF ASSUMPTION AND ASSIGNMENT NOTICE

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
GENERAL MOTORS CORP., *et al.*,	:	**09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

NOTICE OF (I) DEBTORS' INTENT TO ASSUME AND ASSIGN CERTAIN EXECUTORY CONTRACTS, UNEXPIRED LEASES OF PERSONAL PROPERTY, AND UNEXPIRED LEASES OF NONRESIDENTIAL REAL PROPERTY AND (II) CURE AMOUNTS RELATED THERETO

PLEASE TAKE NOTICE THAT:

1. By motion dated June 1, 2009 (the "Motion"), General Motors Corporation ("GM") and its debtor subsidiaries, as debtors in possession (collectively, the "Debtors" or the "Company"),[1] sought, among other things, authorization and approval of (a) the sale of substantially all the Debtors' assets pursuant to that certain Master Sale and Purchase Agreement and related agreements (the "MPA") among the Debtors (the "Sellers") and Vehicle Acquisition Holdings LLC (the "Purchaser"), a purchaser sponsored by the United States Department of the Treasury (the "U.S. Treasury") (the "363 Transaction"), free and clear of liens, claims, encumbrances, and interests, (b) certain proposed procedures to govern the sale process and provide for the submission of any competing bids for substantially all the Debtors' assets (the "Sale Procedures"), (c) the assumption and assignment of certain executory contracts (the "Contracts") and unexpired leases of personal property and of nonresidential real property (collectively, the "Leases") in connection with the 363 Transaction, (d) that certain settlement agreement between the Purchaser and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America ("UAW") to be executed at the closing of the 363 Transaction (the "UAW Retiree Settlement Agreement"), and (e) scheduling a final hearing for approval of the 363 Transaction (the "Sale Hearing").[2]

[1] The Debtors and their respective Tax ID numbers are as follows: General Motors Corporation, Tax ID No. 38-0572515; Saturn, LLC, Tax ID No. 38-2577506; Saturn Distribution Corporation, Tax ID No. 38-2755764; and Chevrolet-Saturn of Harlem, Inc., Tax ID No. 20-1426707.

[2] Copies of the Motion and the MPA (without certain commercially sensitive attachments) may be obtained by accessing the website established by the Debtors' claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com.

2. The MPA, which, together with certain ancillary agreements, contemplates a set of related transactions for the sale of substantially all the Debtors' assets, defined as the "Purchased Assets" in Section 2.2(a) of the MPA, including certain Contracts and Leases, subject to higher or better offers.

3. The MPA contemplates, and the proposed order approving the Motion (the "Sale Order"), if approved, shall authorize the assumption and assignment to the Purchaser of certain Contracts and Leases pursuant to section 365 of title 11, United States Code (the "Bankruptcy Code"). The Sellers maintain a schedule containing Contracts and Leases that the Debtors may assume and assign to the Purchaser (collectively, the "Assumable Executory Contracts"). You are receiving this Notice because you are a party to one or more of the Assumable Executory Contracts.

4. **THE SCHEDULE CONTAINS A LIST OF ASSUMABLE EXECUTORY CONTRACTS THAT MAY BE ASSUMED. THE PURCHASER RESERVES THE RIGHT UNDER THE MPA TO EXCLUDE ANY ASSUMABLE EXECUTORY CONTRACT FROM THE LIST OF ASSUMABLE EXECUTORY CONTRACTS TO BE ASSUMED AND ASSIGNED BY NO LATER THAN THE DESIGNATION DEADLINE DISCUSSED IN PARAGRAPH 10 BELOW.**

5. The Debtors maintain a secure website which contains information about your Assumable Executory Contracts, including amounts that the Debtors believe must be paid to cure all prepetition defaults under the respective contracts as of the Commencement Date in accordance with section 365(b) of the Bankruptcy Code (the "Cure Amounts"). In order to view the Cure Amount for the Assumable Executory Contract to which you are a party, you must log onto http://www.contractnotices.com (the "Contract Website"). To log on, please use the user name and password provided to you with this notice. The username and password will enable you to access the Cure Amount for the particular Assumable Executory Contract to which you are a party.

6. Please review the Cure Amount for your Assumable Executory Contract. In some instances, additional terms or conditions of assumption and assignment with respect to a particular Assumable Executory Contract is provided on the Contract Website.

7. Objections, if any, to the proposed assumption and assignment of the Assumable Executory Contracts (the "Contract Objections"), including objections to the Cure Amount, must be made in writing and filed with the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court") so as to be received **no later than ten (10) days after the date of this Notice** (the "Objection Deadline") by (i) the Debtors, c/o General Motors Corporation, Cadillac Building, 30009 Van Dyke Avenue, Warren, Michigan 48090-9025 (Attn: Warren Command Center, Mailcode 480-206-114); (ii) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (iii) the U.S. Treasury, 1500 Pennsylvania Avenue NW, Room 2312, Washington, D.C. 20220 (Attn: Matthew Feldman, Esq.); (iv) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (v) the attorneys for the Creditors Committee; (vi) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael

J. Edelman, Esq. and Michael L. Schein, Esq.); and (vii) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004.

8. If a timely Contract Objection is filed solely as to the Cure Amount (a "Cure Objection"), then the Assumable Executory Contract shall nevertheless be assumed and assigned to the Purchaser on the Assumption Effective Date (as hereinafter defined), the Purchaser shall pay the undisputed portion of the Cure Amount on or as soon as reasonably practicable after the Assumption Effective Date, and the disputed portion of the Cure Amount shall be determined as follows and paid as soon as reasonably practicable following resolution of such disputed Cure Amount: To resolve the Cure Objection, the Debtors, the Purchaser, and the objecting non-Debtor counterparty to the Assumable Executory Contract (the "Non-Debtor Counterparty") may meet and confer in good faith to attempt to resolve any such objection without Court intervention. The Call Center (as defined in paragraph 19) has been established by the Debtors for this purpose. If the Debtors determine that the Cure Objection cannot be resolved without judicial intervention, then the Cure Amount will be determined as follows: (a) with respect to Assumable Executory Contracts pursuant to which the non-Debtor counterparty has agreed to an alternative dispute resolution procedure, then, according to such procedure; and (b) with respect to all other Assumable Executory Contracts, by the Court at the discretion of the Debtors either at the Sale Hearing or such other date as determined by the Court.

9. If a timely Contract Objection is filed that objects to the assumption and assignment on a basis other than the Cure Amount, the Debtors, the Purchaser, and the objecting Non-Debtor Counterparty shall meet and confer in good faith to attempt to resolve any such objection without Court intervention. If the Debtors determine that the objection cannot be resolved without judicial intervention, then, at the discretion of the Sellers and the Purchaser, the objection shall be determined by the Court at the Sale Hearing or such other date as determined by the Court. If the Court determines at such hearing that the Assumable Executory Contract should not be assumed and assigned, then such Executory Contract or Lease shall no longer be considered an Assumable Executory Contract.

10. If the Debtors, the Purchaser, and the Non-Debtor Counterparty resolve any Contract Objection, they shall enter into a written stipulation (the "Assumption Resolution Stipulation"), which stipulation is not required to be filed with or approved by the Court.

11. If you agree with the respective Cure Amount(s) listed in the Contract Website with respect to your Assumable Executory Contract(s), and otherwise do not object to the Debtors' assumption and assignment of your Assumable Executory Contract, you are not required to take any further action.

12. Unless an Objection is filed and served before the Objection Deadline, you shall be deemed to have consented to the assumption and assignment of your Assumable Executory Contract and the Cure Amount(s) for your Assumable Executory Contract(s), and you shall be forever barred from objecting to the Cure Amount and from asserting any additional cure or other amounts against the Debtors, their estates, or the Purchaser.

13. Up to the date that is thirty (30) days following the closing of the 363 Transaction, or if such date is not a Business Day (as defined in the MPA), the next Business

Day, or such other later date as mutually agreed upon by the Purchaser and the Debtors (the "Designation Deadline"), the Purchaser may, in its sole discretion, subject to certain limitations specified in the MPA (applicable only as between the parties thereto), exclude any of the Assumable Executory Contracts by providing notice on the Contract Website. Upon such designation, the Contract or Lease referenced therein shall no longer be considered a Assumable Executory Contract, shall not be deemed to be, or to have been, assumed or assigned, and shall remain subject to assumption, rejection, or assignment by the Debtors. Until the Designation Deadline, the Purchaser also may, subject to certain limitations specified in the MPA (applicable only as between the parties thereto) designate additional Contracts or Leases as Assumable Executory Contracts to be assumed and assigned by providing notice to the affected Non-Debtor Counterparties. The Contract Website shall be updated from time to time to reflect the then current status of your contract as well as the proposed effective date (the "Proposed Assumption Effective Date"), if any, of the assumption and assignment of particular contracts.
'

14. The Debtors' decision to assume and assign the Assumable Executory Contracts is subject to Bankruptcy Court approval and consummation of the 363 Transaction, and, absent such consummation, each of the Assumable Executory Contracts will not be assumed or assigned to the Purchaser and shall in all respects be subject to further administration under the Bankruptcy Code. All Assumable Executory Contracts will be assumed and assigned to the Purchaser on the date (the "Assumption Effective Date") that is the later of (i) the Proposed Assumption Effective Date and (ii) the date following expiration of the Objection Deadline if no Contract Objection, other than to the Cure Amount, has been timely filed, or, if a Contract Objection, other than to the Cure Amount, has been filed the date of the Assumption Resolution Stipulation or the date of a Bankruptcy Court order authorizing the assumption and assignment to the Purchaser of the Assumable Executory Contract. Until the Assumption Effective Date, assumption and assignment thereof is subject to the Purchaser's rights to modify the designation of Assumable Executory Contracts as set forth in paragraph 13 above. Except as otherwise provided by the MPA, the Purchaser shall have no rights in and to a particular Assumable Executory Contract the Assumption Effective Date.

15. The inclusion of any document on the list of Assumable Executory Contracts shall not constitute or deemed to be a determination or admission by the Debtors or the Purchaser that such document is, in fact, an executory contract or Lease within the meaning of the Bankruptcy Code, and all rights with respect thereto are expressly reserved.

16. Any Contract Objection shall not constitute an objection to the relief generally requested in the Motion (e.g., the sale of the Purchased Assets by the Debtors to the Purchaser free and clear of liens, claims, encumbrances, and interests), and parties wishing to object to the relief generally requested in the Motion must file and serve a separate objection in accordance with the procedures approved and set forth in the order of the Bankruptcy Court approving the Sale Procedures.

17. If a party other than the Purchaser is determined to be the highest and best bidder for the assets to be sold pursuant to the 363 Transaction, you will receive a separate notice providing additional information regarding the treatment of your contract(s) or Lease(s); *provided, however*, that if the applicable Cure Amount has been established pursuant to the procedures set forth in this Notice, it shall not be subject to further dispute if the new purchaser seeks to acquire such contract or Lease.

18. This Notice is subject to the full terms and conditions of the Motion, the order of the Bankruptcy Court approving the Sale Procedures, and the Assumption and Assignment Procedures set forth in the order approving the Sale Procedures, which shall control in the event of any conflict. The Debtors encourage parties in interest to review such documents in their entirety and consult an attorney if they have questions or want advice.

19. If you have questions about the Assumable Executory Contracts or proposed Cure Amounts, you may call 1-888-409-2329 (in the United States) or 1-586-947-3000 (outside the United States) (the "Call Center").

EXHIBIT E

FORM OF UAW RETIREE NOTICE

A Message to UAW GM Retirees

Dear Brothers and Sisters,

As we all know, GM is engulfed in a severe crisis. GM's staggering losses during 2008 and 2009 have forced the company to file for bankruptcy. The Company has also been forced to rely on loans from the federal government in order to maintain its operations. In this environment, we are fighting every day to preserve and protect to the greatest extent possible our hard-won gains, particularly for the retirees, and surviving spouses of retirees, who helped build this industry with your years of loyal service.

Last December, after a lengthy process that included congressional hearings and petitioning the White House, the federal government granted GM a short-term emergency operating loan in order to avoid an immediate liquidation of the company at that time. As part of that loan, GM was required to submit a restructuring plan to the Treasury Department by February 17, 2009. On March 30, President Obama announced that the company's February 17 plan didn't go far enough in reducing costs and laying the groundwork for sustainability. He said GM would have to identify additional cost savings and debt reductions if GM were to receive additional financial support. The Treasury Department's auto task force also required deeper concessions from UAW members, retirees and other company stakeholders.

On May 28, GM announced that the Treasury Department would provide additional financial support in connection with a court-supervised restructuring of GM, in accordance with the terms of a broad restructuring agreement worked out between Treasury, GM, the UAW and representatives of GM's bondholders.

The agreement under which the Treasury Department will extend this new financial support includes a new schedule of contributions to the trust fund that will provide retiree medical benefits beginning in 2010. It also includes modifications to the collective bargaining agreement for active employees. The UAW active workforce ratified that agreement May 29. Based on these agreements, the United States government will provide a total of over $50 billion in financial support to allow GM to complete its restructuring.

GM's recent bankruptcy filing is part of the agreement reached with the Treasury Department. The goal of the bankruptcy filing is to allow for swift court approval of the restructuring so that the company can move forward to implement the agreements between the parties.

Proposed Sale

To complete the restructuring, a new company will be formed which will purchase the operating assets of GM. If approved by the Bankruptcy Court, the new company will enter into the agreements with the UAW covering both active and retired workers. The initial ownership of the new corporation will be allocated as follows:

- 72.5% -- United States and Canadian Governments
- 17.5% -- UAW Retiree Benefits Trust Fund

- 10% -- Bondholders

As part of the approval of the proposed sale, the Bankruptcy Court will also be asked to approve the new UAW Retiree Settlement Agreement, summarized below. As described more fully in Paragraph 6 of the attached document, if the court approves both the sale and the UAW Retiree Settlement Agreement, responsibility for providing retiree benefits for the duration of 2009, and for making the contributions to the VEBA, will shift to the new company (which will then own GM's operating assets).

Attached to this letter is a formal notice from the Bankruptcy Court regarding the proposed sale. As described in that notice, the Bankruptcy Court will soon hold a hearing to consider the proposed sale and the UAW Retiree Settlement Agreement.

Pension Plan Continues Without Change

The restructuring agreements provide that the new company will take over responsibility for the GM UAW pension plan. That plan will continue operations and pension benefits will be continued at their current level.

Retiree Medical Benefits

Retiree medical benefits were one of the most significant issues addressed in 2007 bargaining. The 2007 National UAW-GM Agreement established a new Trust Fund (called a "Voluntary Employees' Beneficiary Association" or "VEBA"), which is responsible for retiree medical benefits starting on January 1, 2010. The 2007 Agreement established a series of cash contributions by the Company to the VEBA, beginning on January 1, 2010.

In order for GM to receive the necessary government support -- which will allow the company to complete its restructuring and continue operations into the future -- we were required to support a series of changes to the retiree medical and VEBA agreements.

In this difficult situation, we were able to preserve the core medical benefits for retirees. These were hard fought issues and the changes described below are certainly painful. But if we had not agreed to support these changes, the U.S. Treasury would not have provided the additional support to GM. Without this critical government support, GM's near term future would be in serious peril and GM would face almost certain liquidation.

The following summarizes the principal features of the proposed agreement.

Existing Internal VEBA Assets Transferred in January 2010. Along with the new payment structure described below, in January 2010 the VEBA will receive the assets of an internal trust fund maintained at GM (called the "Internal VEBA"). The value of the assets in that fund is currently approximately $10 billion. GM had sought to use these assets to cover the cost of benefits prior to the January 1, 2010 implementation, which would have depleted these assets and diminished the cash balance in the new VEBA. We successfully resisted these efforts and

the new VEBA will therefore receive the full value of these Internal VEBA assets on January 1, 2010 as outlined in the 2007 agreement.

The assets in the Internal VEBA have been invested by GM on the VEBA's behalf since January 1, 2008. The value of these assets has been negatively impacted by conditions in the investment market during 2008 and so far in 2009. These assets will continue to be invested during the balance of 2009 and will be transferred to the new VEBA on January 1, 2010.

New $2.5 Billion Note. Under the new funding structure, the VEBA will receive a new Note, payable in cash, with a principal amount of $2.5 billion. Cash payments under the new Note (including accrued interest) will be $1.384 billion payable in each of 2013, 2015 and 2017.

New $6.5 Billion in Preferred Stock. The VEBA will also receive Preferred Stock in the new company with a face value of $6.5 billion. This Preferred Stock includes a 9% cash dividend payment structure, under which $585 million is payable annually for as long as the VEBA holds this stock. This dividend payment must be made before the new company can pay any dividends to the holders of its common stock. If the company delays payment of the dividends on the Preferred Stock, it will not be allowed to pay dividends to its common shareholders until it becomes current on the VEBA's Preferred Stock dividend obligations. While this preference over the common shareholders makes it likely the new company will consistently pay the preferred dividend, there is a risk that market conditions or other factors beyond the control of the UAW may result in the company delaying these preferred dividends for some period of time.

VEBA to own Significant GM Common Stock. Another requirement of the Treasury Department loans was that a portion of the value received by the VEBA be in the form of common stock. To meet that requirement, the VEBA will receive an initial allocation of 17.5% of the stock in the new company. The United States and Canadian Governments will receive 72.5% of the initial stock, and bondholders will receive 10%.

The VEBA will also have the right to designate a member of GM's Board of Directors, with UAW consent. The VEBA will be required to vote its GM shares in the same proportion as the votes of other shareholders.

The overall restructuring of GM will eliminate a tremendous portion of GM's other debt obligations. With a greatly improved balance sheet, as well as significant restructuring of business operations, there is a realistic prospect that the stock in the new company will represent significant value in the future. If and when that occurs, a significant portion of that value will be captured by the VEBA through this stock ownership.

Warrants. In addition to the direct ownership of the Preferred and Common Stock described above, the new VEBA will also receive a Warrant, which represents the right to an additional 2.5% of the Common Stock of the new company, with a strike price determined by an aggregate $75 billion equity value for the new company. This will allow the VEBA to realize additional value if the total value of the stock of the new company exceeds that value at any point prior to expiration of the new Warrant.

The new VEBA agreement includes mechanisms for the VEBA to sell the Common and Preferred Stock, as well as the new Warrants, to other parties under certain conditions.

Pension Pass Through Eliminated. One funding mechanism under the 2007 Agreement was called the "Pension Pass Through." Under that arrangement, the new VEBA was scheduled to impose an additional monthly contribution requirement, and the GM pension benefits were to increase by a corresponding amount. This mechanism has been eliminated and its value is instead reflected in the new Note and other instruments described above.

Mitigation VEBA Assets Transferred. Under the existing agreements, an independent VEBA is currently providing dental benefits and certain "mitigation" payments (i.e. covering a significant portion of the co-pays, deductibles and contributions that retirees would otherwise be required to pay under the 2005 agreement). Under the 2007 Agreement and the proposed new agreement, the assets in this existing independent VEBA (called the "Mitigation VEBA") will be transferred into the new VEBA on January 1, 2010. It is expected that the assets in the Mitigation VEBA will be approximately $700 million on January 1, 2010 but the actual balance will depend on investment performance and other factors during the balance of 2009. As explained below, the dental benefits currently provided by the Mitigation VEBA will be eliminated in accordance with the proposed new agreement.

VEBA Committee can adjust benefits beginning in 2010. As under the 2007 Agreement, the VEBA will be governed by an 11-member Committee, including 5 members appointed by the UAW and 6 Independent Members. Under the 2007 Agreement, that Committee had the authority, starting on January 1, 2012, to adjust benefits so that benefit levels can be kept consistent with the assets in the Trust. Under the proposed agreement, the Committee will be allowed to make necessary benefit adjustments beginning when the VEBA assumes responsibility on January 1, 2010.

Immediate Changes in Benefit Levels Required

Under the 2007 Agreement, GM remained responsible for providing retiree medical benefits through the end of 2009, with the new VEBA taking over responsibility on January 1, 2010. In the discussions over the last several weeks, the company sought an "early implementation" of this transition. Had we agreed to that approach, the assets of the VEBA would have been depleted to pay benefits for the remainder of 2009.

We succeeded in avoiding this depletion of the VEBA's assets during 2009. The new company will therefore continue to provide retiree medical benefits for the balance of 2009 until the new VEBA takes over responsibility. In exchange, however, the Treasury Department insisted that the benefits be immediately reduced to reflect GM's difficult financial situation. In order to maintain the support of the Government, therefore, we were required to agree to the following changes in benefits. These changes will be effective on July 1, 2009 (or later if court approval is delayed beyond that date).

Prescription Drug Co-Pays	Retail (34 day supply) • $10 Generic • $25 Brand Mail Order (90 day supply)

	• $20 Generic • $50 Brand
Catastrophic Plan for retirees and surviving spouses who fail to pay required monthly contributions	No longer offered. Retirees and surviving spouses currently in Catastrophic Plan will be given opportunity to join regular plan.
Coverage for Erectile Dysfunction (ED) medications (e.g. Viagra, Cialis, Levitra)	No longer offered, except in prior authorized cases of Pulmonary Arterial Hypertension
Coverage for the Proton Pump Inhibitor drug class (e.g. omeprazole, Prilosec, Zegerid, Nexium, Achiphex, Prevacid, Protonix)	No longer offered, except in prior authorized cases of Barrett's Esophagitis and Zoellinger-Ellison Syndrome
Vision Program	No longer offered
Dental Program	No longer offered
Emergency Room Co-Pay	$100 (waived if admitted)
Medicare Part B Special Benefit ($76.20 per month for retirees enrolled in Medicare)	No longer offered by health plan. This modification is not applicable to approximately 24,800 retirees and surviving spouses who retired or began receiving surviving spouse benefits before October 1979, and whose benefit is provided through the pension trust. The payments will continue for these pre-1979 retirees and surviving spouses.
"Low Income Retirees" (less than $8,000 annual pension and monthly basic benefit rate of less than $33.33)	Monthly contribution requirement of $11 (flat rate regardless of family status) In all other respects, these retirees and surviving spouses will be included in same plan as other retirees and surviving spouses.
Monthly Contribution Requirements (General Retirees)	No Change (currently $11/single and $23/ family)
Deductible and Co-Pay Requirements (General Retirees)	No Change (currently $164 annual deductible and $273 annual (single) out-of-pocket maximum)
Sponsored Dependents and Principally Supported Children	Consistent with changes made to the active medical program, the retiree medical program will not allow the designation of new "sponsored dependents" or "principally supported children." The provisions allowing new dependents to be added as a result of adoption or legal guardianship will continue in effect.

The Future Outlook

In the early years of the VEBA's existence, it is unlikely that the VEBA will be able to sell the stock in the new company. The new VEBA will therefore be required to use the $10 billion in immediate contributions from the Internal VEBA at GM, along with the assets of the Mitigation VEBA and the $585 million annual cash dividend payment on the Preferred Stock, to provide retiree medical benefits during 2010 and 2011. Because of the uncertainty regarding the long-term value of the stock, the Committee will likely be required to make further adjustments in the benefit levels for 2010 and 2011. The extent of those future adjustments will depend on many factors, including investment returns in the Internal and Mitigation VEBA's during the remaining months of 2009, and whether the dividends on the new $6.5 billion in Preferred Stock are delayed.

If the stock can be sold in 2012 or thereafter for significant value, the Committee will be able to take that new value into account and restore some or all of the benefits that are being reduced under these arrangements. In other words, if the current restructuring efforts are successful and the company returns to viability, the UAW retirees stand to reap the benefit of that recovery through the VEBA's significant stock ownership.

We urge your support for these proposed agreements. In these difficult circumstances, we believe they provide the best possible protection for your retiree benefits.

In solidarity,

Ron Gettelfinger	Cal Rapson**,** *Vice President*	Bill Payne
UAW President	*and Director, UAW GM Department*	*Counsel to the Class*

Important Notes

For further information about the proposed agreement and the process for court review of the proposed agreements and the proposed sale, please refer to the enclosed legal notice. Full and complete copies of the proposed retiree health agreement can be found on the website referred to in that notice.

If you support the proposed agreement, you do not need to take any action at this time. Information about the modified medical plan will be sent to you following court approval. If you wish to object to the proposed agreements, you must file a written objection as described in the enclosed legal notice.

Counsel to the Class Representatives participated in negotiation of the 2007 retiree medical agreements which were approved by the District Court for the Eastern District of Michigan on July 31, 2008. Although the Class Representatives are not formal parties to the new agreements described above, Counsel to the Class Representatives has reviewed the proposed agreements and is in full support of the efforts to obtain Bankruptcy Court approval of the new agreements. Counsel for the Class has entered an appearance in the Bankruptcy case and will be supporting approval of the proposed agreements.

Debtors.	:	**(Jointly Administered)**

NOTICE TO DEBTORS' RETIREES REPRESENTED BY THE INTERNATIONAL UNION, UNITED AUTOMOBILE, AEROSPACE AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA OF SALE OF DEBTORS' ASSETS AND APPROVAL OF UAW RETIREE SETTLEMENT AGREEMENT

PLEASE TAKE NOTICE THAT:

1. By motion dated June 1, 2009 (the "Motion"), General Motors Corporation ("GM") and its debtor subsidiaries, as debtors in possession (collectively, the "Debtors" or the "Company"),[1] have sought, among other things, authorization and approval of (a) the sale of substantially all the Debtors' assets pursuant to that certain Master Sale and Purchase Agreement and related agreements (the "MPA") among the Debtors (the "Sellers") and Vehicle Acquisition Holdings LLC (the "Purchaser"), a purchaser sponsored by the United States Department of the Treasury (the "U.S. Treasury") (the "363 Transaction"), free and clear of liens, claims, encumbrances, and other interests, (b) certain proposed procedures to govern the sale process and provide for the submission of any competing bids for substantially all the Debtors' assets (the "Sale Procedures"), (c) the assumption and assignment of certain executory contracts and unexpired leases of personal property and of nonresidential real property (collectively, the "Leases") in connection with the 363 Transaction, (d) that certain settlement agreement between the Purchaser and the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America ("UAW") consented to by representatives of members of the "Class" of the Debtors' retirees and surviving spouses represented by the UAW such representatives, the "Class Representatives") to be executed at the closing of the 363 Transaction (the "UAW Retiree Settlement Agreement"), and (e) scheduling a hearing for approval of the 363 Transaction and the UAW Retiree Settlement Agreement (the "Sale Hearing").[2]

[1] The Debtors and their respective Tax ID numbers are as follows: General Motors Corporation, Tax ID No. 38-0572515; Saturn, LLC, Tax ID No. 38-2577506; Saturn Distribution Corporation, Tax ID No. 38-2755764; and Chevrolet-Saturn of Harlem, Inc., Tax ID No. 20-1426707.

[2] Copies of the Motion and the MPA (without certain commercially sensitive attachments) may be obtained by accessing the website established by the Debtors' claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com.

2. The Sale Hearing is scheduled to be conducted on June 30, 2009 at 9:45 a.m. (Eastern Time) at the United States Bankruptcy Court for the Southern District of New York, Alexander Hamilton Custom House, One Bowling Green, Room 621, New York, New York 10004 (the "Bankruptcy Court"), before the Honorable Robert E. Gerber, United States Bankruptcy Judge, to consider the approval of the MPA or any higher or better offer by a Successful Bidder (as defined in the Sale Procedures) and approval of the UAW Retiree Settlement Agreement. If the Purchaser is the Successful Bidder, the Debtors anticipate seeking entry of an order approving the 363 Transaction substantially in the form of the order attached to the Motion as Exhibit "B" (the "Sale Order"). The Sale Hearing may be adjourned or rescheduled without notice by an announcement of the adjourned date at the Sale Hearing.

3. Coverage of Retiree Medical Benefits (as defined in the UAW Retiree Settlement Agreement) will continue to be provided to UAW-Represented Retirees (as defined in the Sale Procedures Order) and their eligible dependents without interruption by either GM or the Purchaser up until December 31, 2009, in accordance with the terms of agreements negotiated and agreed to by the UAW, which include certain benefit reductions to take effect on July 1, 2009 (or, if later, Bankruptcy Court approval, if needed).

4. Contingent upon the Bankruptcy Court's approval of the 363 Transaction, and concurrently with the sale of the Debtors' assets pursuant to the 363 Transaction, the Debtors will assume and assign to the Purchaser any collective bargaining agreements entered into by and between the Debtors and the UAW (the "UAW CBA Assignment"), with the exception of (a) the agreement to provide certain retiree medical benefits specified in the Memorandum of Understanding Post-Retirement Medical Care, dated September 26, 2007, between the Company and the UAW ("MOU"); and (b) the Settlement Agreement, dated February 21, 2008, between the Company and the UAW (the "2008 Settlement Agreement"), which was approved by the United States District Court for the Eastern District of Michigan in the class action styled *Int'l Union, UAW, et al. v. General Motors Corporation*, Civil Action No. 07-14074 (E.D. Mich. filed Sept. 9, 2007) (final order entered July 31, 2008).

5. The Purchaser has agreed, among other things, to enter into the proposed UAW Retiree Settlement Agreement, pursuant to which the Purchaser will make contributions to a voluntary employee beneficiary association trust (the "New VEBA") in respect of non-pension retiree benefits to the UAW-Represented Retirees on terms that differ from the terms of the MOU and the 2008 Settlement Agreement. Among other things, the UAW Retiree Settlement Agreement provides for the funding of the New VEBA with a combination of (i) shares of the Purchaser's common stock representing 17.5% of the aggregate common equity interest in the Purchaser; (ii) a promissory note of the Purchaser in the principal amount of $2.5 billion, payable in three equal cash installments on July 15 of 2013, 2015, and 2017; (iii) shares of the Purchaser's cumulative perpetual preferred stock in the amount of $6.5 billion, with a 9% dividend per annum, payable quarterly in cash; (iv) warrants to acquire newly issued shares of the Purchaser representing 2.5% of the Purchaser's common equity outstanding at December 31, 2009, issuable at any time prior to December 31, 2015; and (v) the assets held in the existing voluntary employee beneficiary association trust sponsored by the Sellers and to be transferred to the Purchaser, which at March 31, 2009 had a value of approximately $9.4 billion.

6. In addition, GM, the UAW, and the Class Representatives have entered into an agreement, dated May 29, 2009 (the "UAW Claims Agreement"), pursuant to which the UAW and Class Representatives agreed, subject to the consummation of the 363 Transaction and the UAW Retiree Settlement Agreement becoming effective following approval of the Bankruptcy Court, to take further actions to release claims against GM and its subsidiaries, and their employees, officers, directors, and agents, relating to retiree medical benefits pursuant to the MOU, Settlement Agreement, and UAW collective bargaining agreements, *provided* that such claims may be reinstated if the rights or benefits of the UAW-Represented Retirees under the UAW Retiree Settlement Agreement are adversely impacted by reason of any reversal or modification of the Bankruptcy Court's approval of the 363 Transaction or UAW Retiree Settlement Agreement.

7. The UAW is the authorized representative of the UAW-Represented Retirees for purposes of approval of the UAW Retiree Settlement Agreement pursuant to section 1114 of the United States Bankruptcy Code. At the Sale Hearing, the Debtors will request approval by the Bankruptcy Court of the UAW Retiree Settlement Agreement as an agreement with the UAW, as the authorized representative of the UAW-Represented Retirees.

8. A copy of the MPA (without certain commercially sensitive attachments) and the Motion (including the proposed Sale Order), the Sale Procedures Order as entered by the Bankruptcy Court (with the Sale Procedures attached), the UAW Retiree Notice, and the UAW Retiree Settlement Agreement, including all exhibits thereto, may be obtained (i) by accessing (a) the website of the Bankruptcy Court at http://www.nysb.uscourts.gov, or (b) the website of the Debtors' claims and noticing agent, The Garden City Group, Inc., at http://www.gmcourtdocs.com/ or (ii) by visiting the Office of the Clerk of the Bankruptcy Court, United States Bankruptcy Court, Southern District of New York, One Bowling Green, New York, New York 10004-1408. Copies also may be obtained by faxing a written request to the attorneys for the Debtors, Weil, Gotshal & Manges LLP (Attn: Russell Brooks, Esq.) at 212-310-8007.

9. **Responses or objections, if any, to the relief sought in the Motion, including the approval of the UAW Retiree Settlement Agreement, must be made in writing and filed with the Clerk of the Bankruptcy Court (at the address shown in paragraph 2 above), and served upon (a) Weil, Gotshal & Manges LLP, attorneys for the Debtors, 767 Fifth Avenue, New York, New York 10153 (Attn: Harvey R. Miller, Esq., Stephen Karotkin, Esq., and Joseph H. Smolinsky, Esq.); (b) Cadwalader, Wickersham & Taft LLP, attorneys for the Purchaser, One World Financial Center, New York, New York 10281 (Attn: John J. Rapisardi, Esq.); (c) the attorneys for the Creditors Committee; (d) Cleary Gottlieb Steen & Hamilton LLP, the attorneys for the UAW, One Liberty Plaza, New York, New York 10006 (Attn: James L. Bromley, Esq.); (e) Cohen, Weiss and Simon LLP, the attorneys for the UAW, 330 W. 42nd Street, New York, New York 10036 (Attn: Babette Ceccotti, Esq.); (f) Vedder Price, P.C., attorneys for Export Development Canada, 1633 Broadway, 47th Floor, New York, New York 10019 (Attn: Michael J. Edelman, Esq. and Michael L. Schein, Esq.); and (g) the Office of the United States Trustee for the Southern District of New York (Attn: Diana G. Adams, Esq.), 33 Whitehall Street, 21st Floor, New York, New York 10004., so as to be received no later than June 19, 2009, at 5:00 p.m. (Eastern Time) (the "Objection Deadline").**

10. The failure of any person or entity to file a response or objection on or before the Objection Deadline shall be deemed a consent to the 363 Transaction and the other relief requested in the Motion, including approval of the UAW Retiree Settlement Agreement, and shall bar the assertion, at the Sale Hearing or thereafter, of any objection to the Sale Procedures, the Motion, the 363 Transaction, and the UAW Retiree Settlement Agreement, and the Debtors' consummation of the 363 Transaction.

11. This Notice is subject to the full terms and conditions of the Motion, the Sale Procedures Order, the MPA, and the UAW Retiree Settlement Agreement, which shall control in the event of any conflict. The Debtors encourage parties in interest to review such documents in their entirety and consult an attorney if they have questions or want advice.

12. If you have questions about the 363 Transaction or the UAW Retiree Settlement Agreement, you may call 1-800-489-4646 (the "Call Center").

P R O C E E D I N G S

THE COURT: We have GM on for 9:45 and it's a little bit early. Let me ask if people are ready to go on GM. Is everybody who would want to be heard on that -- I think I need to hear, in addition to the debtors, from Ms. Sizemore -- or, Dr. Sizemore. I hope you're on the phone. Are you on the phone, Dr. Sizemore?

COURTCALL OPERATOR: She has no appearance for that matter, Your Honor.

THE COURT: Okay, I heard you but not very loudly, so I'm going to ask you to speak up.

Mr. Rutledge?

COURTCALL OPERATOR: Your Honor? Your Honor?

THE COURT: Are you Dr. Sizemore? Oh, you came personally, after all. All right, very well.

MR. RUTLEDGE: Your Honor, I'm Roger Rutledge. I'm here from the Western District of Tennessee. I have a motion for appearance pro hac vice before the Court and would hope that the Court would grant that.

THE COURT: Of course. Welcome.

MR. RUTLEDGE: Thank you, Your Honor.

THE COURT: And on behalf of the -- is it Deutsch litigants?

MS. PENA: Yes, Your Honor. Melissa Pena from the law firm Norris, McLaughlin & Marcus. I serve as local counsel for

Sanford Deutsch. I have with me, today, Mr. Barry Novack. He's an attorney in good standing with the State Bar of California. We just filed his pro hac papers today; I'd like to just move for his admission.

THE COURT: Of course. Welcome.

MR. NOVACK: Thank you.

THE COURT: Granted.

Okay, you know what, Patrick, could you turn off the blower, please?

Okay, folks, let's come on up, please, for the GM motion to enforce the 363 order. And then after everybody makes their formal appearances, I'll want everybody to sit down. I have some preliminary comments.

MR. RUTLEDGE: Does Your Honor want all the parties at counsel table that are responding or objecting to the motion of GM?

THE COURT: Yes, except only for the fact that if you're local counsel isn't going to be saying anything, it's optional for them. But I would like all of the counsel for Mr. Robley and the -- is it Deutsch? Forgive me.

MR. NOVACK: Deutsch, Your Honor.

THE COURT: Yes, the Beverly Deutsch family and also Dr. Sizemore to be up where they can be heard, although when you speak, I'm going to ask each of you individually to come to the main lectern, if you would, please. Okay.

Actually, I don't know if I need to make you folks repeat yourself. I have Mr. Rutledge, Mr. Novack and Dr. Sizemore, and for the debtor -- I'll take a formal appearance.

MR. KAROTKIN: For General Motors, LLC, Your Honor, Stephen Karotkin, Weil, Gotshal & Manges.

THE COURT: Okay, Mr. Karotkin. And with you?

MR. KAROTKIN: Is Mr. Bonomo (ph.) from General Motors, LLC. He's in-house counsel. And my colleague, Pablo Falabella, from my firm.

THE COURT: All right, very well. Okay, have seats everybody.

Folks, I want you to make your presentations as you see fit, starting with Mr. Karotkin. But when you do so, I want you to emphasize and focus on the particular questions and concerns that I'm going to identify for you now.

First, Mr. Rutledge, your -- the way you handled the commencement of the lawsuit, given your need to preserve your position and to tee it up for judicial determination was a text book example of the right way to do it in terms of acting responsibly. But I have some questions and concerns concerning your underlying motion -- or, your underlying objection. I want you to focus, vis-a-vis your notice position, in particular, as I want Mr. Karotkin to do when it's his turn, on the decision by Judge Cyr who -- of the First Circuit who, as we know, was a former bankruptcy judge because I think I need

to assume, for the sake of discussion, that Western is correct, but it says quite explicitly that that was a case in which notice by publication wasn't given, and that strikes me as a huge distinction.

I also need help from you, Mr. Rutledge, in focusing on the extent to which I can now hear argument on this when I ruled on the matter of notice when I issued the 363 order on the Fourth of July weekend last year because, unless I'm mistaken, there is an express finding on the matter of notice. And while I think that the facts could at least arguably be different if your client had already been known to Old GM or New GM, there is no basis in the record upon which I can make such a conclusion that either of the two GMs intentionally did not give you notice.

On the second issue, Mr. Rutledge, the successor liability issue, it seems to me that subject to your right to be heard, that you've got a res judicata problem, and that while I'd be amenable, I suppose, to your keeping your actions stayed as contrasted to dismissed until all appeals opportunities have been exhausted, I don't see how I can revisit the underlying issues in the second half of your brief for as long as my decision from last year and the district court affirments say what they say they do and remain good law.

Dr. Sizemore, I need help in understanding the legal bases for your position, either the underlying contention or

the need for further discovery. It's not as fleshed out as the one that Mr. Rutledge filed in this court. And I have some material difficulties in seeing how your lawsuit can proceed given what the documents say.

Now, apropos what the documents say, that ties into the third of the objections to the motion, yours, Mr. Novack. As a preliminary matter, I need help from both sides because, Mr. Novack and Mr. Karotkin, it appears to me that neither side quoted what I understand to be the relevant language in 2.389 which appears not in the first amendment which each of you quoted to me, but in the ARMSPA as it was in next to the sale order which seems to have different language in it than either side quoted. And what I would be tentatively inclined to base my ruling on would be the language in the ARMSPA as in next to the sale order in 2.389 that says, "accidents, incidents, or other distinct and discrete occurrences", which seems to me to be the key words that I've got to work off, rather than the "accidents or incidents first occurring language" that appears in the first amended MPA that each side quoted in its brief. Now, if I'm mistaken in that regard, don't be diplomatic, folks. Tell me so. But it seems to me that on the very unique facts that you have, Mr. Novack, I have to construe the ARMSPA in light of whatever the proper contractual language is, which I think is the one I just read.

And then I ask -- I need you folks to concentrate on

how a judge would construe the words "accidents, incidents, or other discrete occurrences" because those words seem to talk about what caused everything thereafter, in contrast to when the cause of action legally arose.

As my hesitancy in my articulating that suggests, I think the third issue was the closest of the three that I have here, but I want help from both sides on that. The two things that I need help from you the most on is that First Circuit decision in Western Auto Supply Company v. Savage Industries and the proper construction of the agreement.

Mr. Karotkin, you want to take a second, and then I'll hear from you first.

MR. KAROTKIN: Good morning, Your Honor. Stephen Karotkin, General Motors, LLC, for the moving party.

Your Honor, we believe that our motion and our pleadings and our responses are pretty much self-explanatory. As you know, there are six lawsuits involved. And just by way of quick background, only three responses were filed, to which you already alluded. R. J. Burn already has agreed to dismiss its lawsuit, and the other two respondents did not file any responsive pleadings.

I think that you've certainly put your finger on the issues that are relevant today with respect to the first item in Judge Cyr's decision, as you noted, and as we noted in our pleadings, there is certainly a very, very significant

distinction in that case as compared to the incident case where notice by publication was given; it was wide-spread. As Your Honor indicated, you expressly found that notice by publication was sufficient. There is no indication on the record or otherwise that General Motors, which is now MLC, had any actual notice of this claim. The lawsuit was not filed, I don't believe, until November 23rd, 2009, as indicated in Mr. Robley's pleading. And under the applicable law and rules, notice by publication was sufficient.

Moreover, Your Honor, as you surely know, the proposed financial difficulties of General Motors Corporation, the Chapter 11 filing, the sale that was going to take place before this Court at the end of June about a year ago was notorious and widespread in the papers. In addition to your finding that publication was sufficient and under those circumstances, as I think you've already indicated, we believe notice was sufficient. We believe notice complied with due process. The suggestion that we should have given notice to every single consumer who bought a General Motors vehicle is not supported by any authority that I'm aware of. It would have been virtually impossible to do, certainly in the context of the time frame we were dealing with. And again, we think the notice was more than adequate to comply with Mullane in due process.

I would also point out, and I think you indicated that

as well, that notwithstanding the issue of notice, the issue that has been raised by Robley with respect to selling free and clear of product liability claims was fully litigated at length in the three-day sale hearing before this Court. Your Honor ruled on the issue. Judge Gonzalez, as you indicated yourself, ruled on the issue. It was sustained by the Second Circuit, and as, again, you mentioned at the outset, we believe that that issue is res judicata. In addition to which it's --

THE COURT: Pause, please, Mr. Karotkin. I assume that New GM isn't prejudiced in any material way if that lawsuit remains stayed as contrasted to me ordering that it be dismissed until the time for all appeals has been exhausted?

MR. KAROTKIN: That's correct, and they have absolutely no objection to that.

THE COURT: All right, continue, please.

MR. KAROTKIN: And I think that, Your Honor, that really disposes with the Robley objection. With respect to Deutsch, again, you referred to the language that refers to "accidents, incidents or other distinct and discrete occurrences" that happened on or after the closing date. This clearly happened prior to the closing -- well prior to the closing. And again, as we mentioned in our pleadings, Your Honor, the fact that the cause of action may have arisen under -- I believe it was California law upon the death of the plaintiff in that action really is of no relevance. And we

think that the pure words of the contract dictate the result that this action must be dismissed as well.

THE COURT: Pause, please, because I didn't understand Mr. Novack to be arguing that we could ignore the contract, but I think that he was trying to argue that although the accident undisputedly took place before the closing, that the death was an incident. And because both sides were arguing different contractual language, I don't think you focused on "other distinct and discrete occurrence". Do you want to comment on whether the death can be regarded appropriately as an incident in contrast to an accident?

MR. KAROTKIN: I think, Your Honor, that the death, if it was the result of the accident, certainly was a byproduct of that, but it was not an accident or incident that occurred prior to the closing. And I think that it's very clear that whatever happened in the incident which gave rise to the cause of action -- or, the accident which gave rise to the cause of action clearly happened prior to the closing, as well as any distinct or discrete occurrences. All of that was the result of the accident, or allegedly the result of the accident that happened well prior to the closing, and I think that's the only logical interpretation of the purchase agreement and what was intended.

THE COURT: Okay, continue please.

MR. KAROTKIN: With respect to the Sizemore objection,

I think -- I think what Dr. Sizemore is saying is that she is entitled to discovery and should not be compelled to dismiss her lawsuit until General Motors, LLC has complied with discovery. Again, as we indicated in our pleadings, Your Honor, it's not a condition to your order or a violation of your order that General Motors be compelled to comply with discovery prior to or, as the condition to being dismissed from the lawsuit. To the extent that third party discovery is appropriate from General Motors, LLC, under the rules, under whatever procedures are appropriate in the non-bankruptcy court action brought by Dr. Sizemore, General Motors is obligated to comply with appropriate third-party discovery and will do so. It's my understanding that they already have furnished discovery to Dr. Sizemore, and all we are suggesting is that General Motors be dismissed and, again, to the extent that Dr. Sizemore believes she is entitled to discovery, that can proceed under the applicable rules of that non-bankruptcy court forum.

THE COURT: Well, if her action were dismissed, what would her basis for getting discovery to be. I'm a little puzzled by that. Saying that she has a right to discovery doesn't seem to make a whole lot of sense to me in light of what I understand you're looking for and what I would be -- or the variant, which is what I'm thinking about, which is staying that litigation until the matter of the underlying free and

clear order I issued either gets up to the Circuit or all appeals are dismissed. But I don't see how she has a valid lawsuit upon which to bring discovery or to seek it if I give you what you're looking for. Now, I assume she has a proof of claim in this court, and she can get third-party discovery against New GM to the extent that she can't get what she wants from Old GM, but I thought I heard you saying something different.

MR. KAROTKIN: Number one, we're not aware of Dr. Sizemore having filed a proof of claim against Old GM. We've checked the records, and there's no record of a proof of claim on file. If we are mistaken, I'm sure that Dr. Sizemore can correct me, but we have checked the docket and we don't see it.

Secondly, her lawsuit also was against -- or, is against a supplier. And to the extent that discovery would be appropriate as against General Motors, again, third-party discovery can proceed.

THE COURT: I'm with you now. Okay, continue.

MR. KAROTKIN: And Your Honor, unless you have other questions --

THE COURT: No. I'll give you a chance to comply and I'll give your opponents a chance to surreply.

MR. KAROTKIN: Okay, thank you, sir.

THE COURT: But let me hear next -- let me hear from Dr. Sizemore next, please.

DR. SIZEMORE: Thank you. I apologize; I'm a little nervous and I appreciate your patience.

He was incorrect in saying that the lawsuit is against a supplier. That's not correct. I believe I said in my objection that I was injured a little over two years ago, in January of '08, in a car accident; my airbag did not deploy. I felt I met the criteria for the bag to deploy. The Old General Motors Company sent a field investigator named Mr. John Ball (ph.) to inspect the vehicle. He promised me the details of the engineers' conclusions of his data. He inspected every aspect of the airbag.

I have been in conflict with General Motors, the Old and the New, for the details of that report since about March of '08. I wrote several letters to General Motors; they refused to respond to me at all. They said that a company named ESIS handled their product liability issues; I was to contact them. They've refused to give me the information. I contacted the Ohio Attorney General's Office because they have a consumer protection department. In doing that, they petitioned the information from the Old General Motors. The Old General Motors has supplied about this many pages of documents, but I have read every page that General Motors has supplied, and the information that I requested is not in those pages. When I received -- I received a crash data report from Mr. John Ball, some of the data that he collected is included

in here, as far as the deceleration event, the speed of my vehicle, the fact that the airbags were enabled at the time of my accident. But there's this hexidecimal fraction of this report that is computer gibberish to me and not understandable. So I asked for clarification of that and have never received it.

Also given to the Ohio Attorney General's Office was a report from an engineer named Mr. John Sprague (ph.). I contend that that report is fraudulent and it is not based on the information that John Ball obtained during the inspection because I was present during the inspection. And John Ball told me part of the information he had received: the speed of my vehicle, the impact, the reason that the airbags did not deploy. There's a picture that I was sent by General Motors in a collection of pictures that stated there was a class 2 malfunction. The explanation of that is not present in the material that was sent to the Ohio Attorney General and to me. And I was frustrated, and I told the Ohio Attorney General that what was missing in the report, and so they petitioned General Motors again, and General Motors, again, refused to respond -- the Old General Motors.

Also, I contacted federal representative Bob Latta's office. I have a message on my cell phone from that office that states that they contacted the new company, General Motors Company after the commencement of the bankruptcy. They said

they did not mention any of the issues of the bankruptcy and the fact that my accident occurred prior to the commencement, so it would not be their responsibility. Bankruptcy issues were never discussed. So what General Motors Company advised Federal Representative Latta's office to do was to contact Aesis, which claims to be General Motor's central claims unit. After all these -- and that was in August of '09. So I have August 18th as General Motors Company responding but never really providing any information.

So through frustration and through not knowing exactly how to proceed, I did file a claim against General Motors Corporation in civil court. And I was sent a letter by Ms. --

THE COURT: By that, you mean in Ohio?

DR. SIZEMORE: Yes.

THE COURT: Um-hum.

DR. SIZEMORE: Yes, where I purchased the vehicle.

THE COURT: Um-hum.

DR. SIZEMORE: For product liability. I was sent a letter by Brianna Benfield, who I understand works for the same firm that is present today, and she said in her letter that all actions against General Motors Corporation were void and that my action violated, I think, 362(a). I do have a copy of her letter. In her letter, she never offers me a proof of claim form and she never directs me to bankruptcy court. She just says that all claims are void, and if I didn't withdraw them,

then I would be in contempt of court. And I am basically a law-abiding citizen; I don't do things incorrectly intentionally. So I did withdraw them. And when I had a phone conversation with her, she explained to me that there was a new company called General Motors Company that had assumed responsibility. Whether that was correct or whether I misunderstood, I'm not sure. But she also said that my claim against ESISwas valid.

When I proceeded in civil court in Medina, Ohio, I had written to the judge that I claim to have a good heart but empty head and I understood that I could have possibly made some mistakes, but that I had made every honest attempt to gather the necessary information to not make those mistakes. Judge Kimbler was confused; I have a transcript of the hearing during -- on December 1st in Medina County, and he petitioned Mr. Popson, who was representing ESIS at the time, but ESIS told me that General Motors Company was paying him to represent Aesis. But Mr. Popson stated to the Court that ESIS was not the proper defendant because they did not manufacture the vehicle and they did not sell the vehicle to me. So according to Civil Rule 12(b)(6), I was dismissed. But I held the understanding that even an insurance company can be joined to civil litigation if it's appropriate or necessary. But that was disregarded.

THE COURT: Doctor, I want to interrupt you for a

second because I think you may be concerned that I'm going to take action against you for having violated the earlier injunction or anything like that, and I want to take that off the table both for you and the other two litigants who are here. I see the legal issue not as whether anybody is guilty of contempt or should be sanctioned or punished in any way but rather the extent to which the litigation should continue in light of what the sale order said and what the purchase agreement said.

So I'd like to ask you to turn to that. And I telegraphed some of the concerns that I have when I was commenting on the two lawyers who are representing their clients. And if you have anything to help me on that before they speak, I'd like you to do that, please.

DR. SIZEMORE: Okay, well, I appreciate your not wanting to punish me because that was one of the reasons that I came up here, because I don't feel that if I made a mistake, it was entirely my fault.

THE COURT: Of course, I understand that.

DR. SIZEMORE: So in all of this confusion, I filed an action for discovery in civil court because I wanted the details. My first question in the action for discovery -- which I believe I met all of the requirements of the revised code required -- was that General Motors Company provide me with the details of the bankruptcy and if there's anything that

I needed to know to prevent being here in bankruptcy court in New York or violating any bankruptcy laws at all. And then there were several others; I have the list of questions with me. They were simple questions; I've asked the lawyers for General Motors if that action for discovery violated any bankruptcy laws or issues. They have not provided me with that. So I was under the gun for the statute of limitations in January of this year to file. So without the needed information, I filed against the company because I had read newspaper articles, talked to different people, had some, what I believed was misleading and false information from both the Old company and the New company as to where the liability was supposed to be. And so I did put the company as the defendant and then John Does were listed. There were no other defendants except for them.

Mr. Popson -- and I believe he did this in order to invalidate my action for discovery and get out of answering the questions properly -- filed an answer. And when he filed a motion to dismiss my action for discovery, he said that I had enough sufficient information to file a claim. But that statement, in my opinion, is false because I didn't have sufficient information and I apparently made a mistake by putting the company down as a defendant. But Mr. Popson made -- he did answer the complaint, and then he gave me verbal instruction to serve discovery request upon him according to

Civil Rules 33 and 34, which I said, if General Motors Company is not a legitimate defendant, I don't feel that I can serve discovery requests through 33 and 34, so I did not. I said if you are willing to answer discovery request, then please answer my action for discovery.

Well, he invalidated that action for discovery completely, but I still maintain that that was legally executed and did not violate bankruptcy laws, and so I'm in the ninth district because General Motors Company failed to comply with Civil Rule (a)(1) requiring them twenty-eight days --

THE COURT: Pause, please, Dr. Sizemore. I don't want to cut you off, especially since you traveled so far, but you're getting a little bit afield. I need you to concentrate on the bankruptcy issues that are before me and what the purchase agreement says. So when I -- when you continue, which will be in just a moment, I want you to focus on that, please.

Before you do, though, I would also like you to help me -- I had always assumed that a DVM is a veterinarian.

DR. SIZEMORE: Yes.

THE COURT: And an RN is a nurse. Do you have legal training? I saw your pleading. It looked like either you had at one time gone to law school or somebody with legal training had helped you.

DR. SIZEMORE: No, I've done research independently. I am medically trained. I have -- my background is completely

medical --

THE COURT: Okay.

DR. SIZEMORE: -- for over thirty years.

THE COURT: Fair enough. Then, you want to continue, please, with bankruptcy doctrine, cases, statutes, as to why you should win. For the purposes of the issues that are before me, I don't have the power to decide whether or not you were injured by a GM vehicle or whether GM did anything wrong.

DR. SIZEMORE: I understand that, and in all honesty, I guess my position is that I am very unsure of any of the bankruptcy issues. I feel that General Motors owed me, as a consumer -- and they did -- the attorney who was standing here, I believe I did receive some notification in the mail that really didn't make a lot of sense to me as far as the bankruptcy that happened because I had an '04 vehicle, and I now have an '07 vehicle. But my -- if I made a mistake, it was unintentional, and I don't know how to plead because if I -- I can't deny that I made a mistake because there's a possibility that I did. But I can't --

THE COURT: Well, you don't have to plead guilty or not guilty like you would if you were in a criminal court. I would suggest to you that you let the two lawyers speak because the two of them have more directly addressed the bankruptcy issues that I need to deal with.

DR. SIZEMORE: Okay.

THE COURT: Thank you.

Okay, may I hear next from Mr. Rutledge, please?

MR. RUTLEDGE: Thank you, Your Honor. I'm Roger Rutledge from Memphis, Tennessee, and I appreciate the opportunity to be before the Court this morning. I know that this case has been unbelievable; it took me a while before I found out that there was a single web site devoted solely to documents filed in this case. And it's just an amazing case. I know that the Court was faced with a tremendous responsibility in those forty days from the day that the petition was filed until the transaction that consummated the sale order and that, really, I want to acknowledge that the Court stepped up to the plate and did what needed to be done for the sake of the whole country, and especially in the face of a looming disaster. And I would submit, Your Honor, that this morning, the disaster has been averted, that we have an opportunity to go back and deal with some of the things that, at that time, would have been considered to be less significant, and to hopefully do the right thing, which is why I'm here.

I represent Shane J. Robley, a young man, twenty-seven years old --

THE COURT: Who I sense is a paraplegic, and I'm very sensitive to the personal circumstances of your client.

MR. RUTLEDGE: Thank you, Your Honor. He is, indeed,

a paraplegic, and after -- he was driving a GMC Jimmy which, along with a Chevrolet Blazer, has the worst rollover tendency ever recorded by the National Highway Traffic Safety Administration. This accident is one that definitely was tragic; that's all we can say about it. And after it happened, for probably the six months that ensued after -- it was November of 2009, the end of November, he was, for sixty days, in the intensive care unit of the hospital. And then, in the succeeding months, he was under treatment and learning how to live in a wheelchair.

And so, we come up to June the 1st, and the notice by publication. And I would not differ with counsel for GM, but under normal circumstances, notice by publication reaches most people in a bankruptcy case. It's commonly used, and I certainly don't take issue with the general acceptance of the certificate of publication that the Court made at the time of the entry of the order. But I would submit, Your Honor, that under the test of Mullane v. Central Hanover Bank and Trust Company and other authority, that the notice in this case was not reasonably calculated to reach Shane J. Robley or people like Shane J. Robley.

I took the liberty, Your Honor, of reproducing from the record at www.motorsliquidation.com the actual publication notices. It was published one time in these publications, four of which came out in Canada. And I would just submit to Your

Honor that the small type and the language of the notice was simply insufficient to give a person in Shane J. Robley's situation any kind of understanding that his rights were going to be just affected but potentially extinguished by the procedure that was taking place in June of 2009.

Your Honor, this is -- frankly, the Court, in June of 2009, was faced with a hard case. And this case has the potential to be a classic illustration of the old axiom that hard cases make bad law. But we have the possibility, also, to go back and look at what has happened and make some good law in the aftermath. Certainly, at the time, it was a necessity to -- and this was all articulated in the ruling of the Court -- the exigencies of that -- or, the circumstances that the Court faced were so dire that to avoid potential liquidation of this huge company and all of the harm that would flow from that, it was appropriate to use the expedited procedure to solve the problem.

Similarly, it's appropriate at this stage, looking back on it, to say if we used an expedited procedure, and there were good reasons for doing that -- but if a man named Shane J. Robley was left out and was out in the cold, and if we live in a country that is ruled by procedural due process and that there was a problem there, that we can fix it. Now, the Court --

THE COURT: Pause, please, Mr. Rutledge.

MR. RUTLEDGE: -- the Court --

THE COURT: Pause, please. If GM knew back then that your client had already been injured and chose to use the publication route rather than a way that would get to him more directly, that kind of factual circumstance would have troubled me. But at the time of the sale hearing, am I right in my understanding that GM didn't know anything more about your client other than the fact that at one time, he had bought a GM vehicle?

MR. RUTLEDGE: I believe that is correct, Your Honor. At the time, Mr. Robley was, as I say, under medical care and had really not come to a full understanding of his position with regard to what had happened.

But just coming to the issue that counsel for GM made regarding the notice, he stated in argument that under the applicable rules, notice by publication was sufficient. Now, bankruptcy law makes it the responsibility of the party in bankruptcy, basically, the debtor-in-possession or the trustee, to see to it that adequate notice is given. It's not handled by the Court, as it was before 1978. So in this respect, the Court was really depending upon GM to do the job. As we heard this morning in argument by GM's counsel, they were depending upon the news media to do their job. They did one notice by publication in the newspaper and assumed that that was going to be picked up and everybody would know -- a product liability

would know that this hearing was going to take place in which he could possibly lose all his rights. I submit, Your Honor, that there is an analogous situation in which automobile manufacturers routinely contact owners of their vehicles, and that is the -- either the recall or the National Highway Traffic and Safety Administration issues orders from time to time directing companies to contact owners about a defect or a problem. And they routinely do it. Now, I submit, Your Honor, that in the case of notice in a bankruptcy proceeding, except for the haste that was called upon because of the particular circumstances facing the Court at that time, there was no excessive burden upon GM either financially or in terms of its capability of accomplishing such a feat to issue notice by mail. Failing that, at the very least, they could use the same type of notice that goes out in class action lawsuits, notice -- I mean, direct advertisements on the media, television, and something that came right out and said if you were injured in a GM vehicle, your rights could be terminated by this proceeding.

Now, I found it interesting that Dr. Sizemore received a letter from Brianna Benfield because, as we say in our filing, a letter -- we received a letter also. And I found it very interesting, also, that that letter did not enclose a proof of claim form or anything to try to give notice of where Dr. Sizemore stood or where Mr. Robley stood with regard to

these proceedings.

THE COURT: Pause, please. Did I understand you to say that you had a similar communication with her?

MR. RUTLEDGE: That is correct, Your Honor.

THE COURT: And she didn't tell you about the claims filing process either?

MR. RUTLEDGE: She did not, Your Honor.

THE COURT: And either by other means or otherwise, have you ultimately filed a proof of claim against Old GM on behalf of your client?

MR. RUTLEDGE: What I have done, Your Honor, is I contacted Ms. Benfield and I asked her if we could file a late filed proof of claim by consent. And I just received response to that last Friday.

THE COURT: And what did she say?

MR. RUTLEDGE: And she said no; she said that GM would not consent. So basically, we are here on behalf of Mr. Robley because this is his sole route of recourse, it appears, other than we will file and submit to the Court and seek the Court's consideration of a motion to allow a late filed proof of claim. Other than that, we have to do what we're doing today.

And Your Honor, what I -- I want to go down the list of the concerns that the Court has because they are the right concerns, and I want to address them. First, regarding the notice, in its response, GM states that the suggestion that the

analogous method of noticing a party, as I say, in the same method that is used in class action suits or in motor vehicle recalls, GM refers to -- calls that absurd, an absurd suggestion. But Your Honor, what is more absurd is to presume that those notices in those publications that ran one time would have reached those whose rights were being affected by GM's actions. So we would simply submit that under Mullane v. Central Hanover Bank and Trust and its Progeny, notice means that notice that is reasonably calculated to reach the person whose rights are being affected and gives that person an opportunity to be heard. This notice was published on June 9th, even though the order went into effect on June 1st. And it referred to the deadline for filing objections. We articulate all this; I'm not going to repeat what we've said in our filing, Your Honor. But essentially, less than twenty-one days expired between the time that the notice was filed and the closing took place. The -- Mr. Robley, if he had happened to have read one of those publications and happened to read that small print in that notice, Mr. Robley would have had exactly nineteen days to get ready for the hearing, and fewer than ten days to even file anything. So is that reasonable notice for a young man who's living in Tipton County, Tennessee? We would simply submit, Your Honor, that it's not. And the consequences of a failure to give adequate notice are well understood under the law. And that's where the case the Court asked about, the

decision of Judge Cyr's in the Savage v. Western Auto case comes into play. Because as the Court said, or noted there, not only was there no publication notice, but there was no other form of notice because of the timing of events in that case. But the sale order and the sale agreement purported to do exactly what was done in this case, that is to say, cut off product liability claims.

And there are two very important distinctions that are to be made when you're dealing with a product liability claim. Distinction number one is that it's in a whole different stream of legal development that comes down from the Macpherson v. the Buick Motor Car case. It's a strict liability. The rights of consumers under this branch of the law cannot be waived even by them, and as we've quoted from the restatement of Torts Third in our filing, the law just simply does not uphold the termination of rights in a product liability case.

Similarly, Section 363 of the Bankruptcy Act (sic) states that a sale can be approved if it's not contrary to non-bankruptcy law. Well, Your Honor, non-bankruptcy law in the State of New York, this concept of the exceptions to the general rule that you can pass assets free and clear of liens is actually more developed in the law of the State of New York and the law of the State of Delaware than any other state in the union, but it's a very common --

THE COURT: Well, pause, please, Mr. Rutledge, because

the arguments you're making have an amazing resemblance to those that were made by Mr. Jakubowski and perhaps others before me in June of '09. And he's a pretty good lawyer, too, and he made those points. And I ruled on them, and at least so far, that's been affirmed on appeal. Assuming, for the sake of argument, that under either Tennessee law or New York law or whatever law might ultimately be determined to apply to the underlying tort claim that there might otherwise be successor liability, don't we have a res judicata issue here?

MR. RUTLEDGE: Your Honor, we would have a res judicata -- I don't want to give the impression to the Court that I'm asking the Court to go back and rewrite the order that was entered in this case. It's not necessary to do that. The MPSA, the underlying agreement itself states that these claims will be passed -- or, kept by the Old GM, the claims for accidents preceding July 10th of 2009. Those claims would be passed to Old GM, and assets would be taken free and clear of those, and this is a direct quote from the MSPA, the master agreement, "to the extent permitted by law." So I'm simply -- I'm here asking the Court to uphold what has been done. The law does not permit, under the facts presented in Mr. Robley's case -- I'm not arguing -- I don't know who Mr. Jakubowski is; I've seen his name in the pleadings -- and frankly, Your Honor, I took from the Court's ruling the -- what was res judicata and what was not. Now, there's no question, the Court, in its

decision, has closely analyzed, A, whether a product liability claimant is a person with an interest in the case, and that's an interesting issue of itself; B, the Court did textual analysis of the Bankruptcy Code to determine what is the nature of an interest and whether the provisions of Section 363 would give the Court the authority to approve the agreement as it was written. And we take no exception to that; the authority is there. The question is whether we're going to follow the law or not. And we humbly submit that the agreement itself says "to the extent permitted by law", these claims would not pass to the New GM.

We simply say the law does not permit that to occur under the facts presented in Robley's case for two reasons. Number one, he did not receive adequate notice. What we're dealing with is something akin to a knowing and intelligent waiver of rights. Before you can do that, you have to know that there's an issue and what can take place and have an opportunity to be heard.

And then secondly, there is this confluence of two streams of law: one, product liability law, the other, commercial contract law. Most of what the Bankruptcy Code and the bankruptcy court deals with are claims that are rooted in commercial law. But product liability law is a different animal, and there are -- the authorities that we cite in our filing make it clear that it is to be accorded a different

treatment. Now, and under the facts of this case, there is no doubt that we have a continuation of the existing entity in a new form, that it is a de facto merger or consolidation because the Old GM disappears, and in its place is New GM. And it's very -- I found it interesting in preparing for this proceeding to note that the president -- and I think the Court refers to this as well in the proceedings -- the president -- of course, you know, the United States government, the Treasury was very deeply involved in the process -- the president, in talking about what the government wanted to have happen, says, or said, "What I am not talking about is a process where a company is simply broken up, sold off, and no longer exists." In other words, the vision, from the beginning, the vision that was built into all the proceedings was that there would be continuity, that the value wouldn't be lost, that the trademarks, the trade names, the product lines, and so forth would continue. The business would be done -- all the UAW and nonunion workers were taken over into New GM. And under those clear rules of law relating to the exceptions to the general rule that assets can be taken free and clear of claims, in the face -- under the law, it's not permitted extinguish Robley's cause of action under the facts presented here. And similarly, it's not permitted because it's a products liability claim. Even Robley could not waive that claim under the law as it exists today. So it's not a commercial law claim, it's not

like a contract claim or those matters having to do with rents and leases and the equity in the company and all those things that are -- basic pension claims that are dealt with in this case, this is a particularly different category of claims, and under the facts presented here, we submit that the Court has to take into consideration these differences.

Your Honor, the issues of res judicata might be pertinent if we were asking the Court to rewrite the order or rewrite the master agreement. We're not doing that. We're just saying under the facts in this particular case, if you apply them according to their very terms, that Mr. Robley's claim can lawfully be brought against the New GM and that it should not be dismissed, or he shouldn't be ordered to dismiss it. And so I can only say that if another lawyer stood here and made similar arguments, I can only say that in the ruling of the Court, there is no analysis of the exceptions to the general rule; there is no real finding that in a products liability matter, that the facts presented in this case having to do with product line and continuation and what I've just covered that there's no finding that those exceptions don't apply; let me put it that way. The facts clearly comport with the decisions we've cited in our filing that apply those exceptions under the facts presented in this particular case. So I'm, again, I'm not arguing for anybody but Shane J. Robley, but he is in the position in which without the finding of the

Court on this motion and objection which we've filed that would enable him to go forward in this case, he's without recourse. And that is simply unjust. And we're here seeking justice for Mr. Robley.

The Court has indicated that the Court would be amenable to a stay pending appeal, and I was going to ask for that if the Court is inclined to rule against our objection because this Court and the Second Circuit have both noted that there is a conflict among the circuits as to this issue of successor liability and the extent to which it can be extinguished. And so it is a matter of vital importance to Mr. Robley, and so I would ask the Court to give us a chance to do that, if we have to.

But I would submit, Your Honor, that this Court has the power to interpret its own orders; this Court has the power to rule further on particular facts and circumstances presented in a matter of such as we're hearing today. I would submit, Your Honor, that the contentions of GM that this particular issue regarding res judicata or concerning successor liability in a case like Mr. Robley's is res judicata on the record does not appear. In other words, what the record shows is the Court found that it had the power to approve that provision and approve the agreement with those provisions in it. And certainly, the drafters of that agreement did all they could to cover the waterfront; there's no question about that. So the

Court found that it has the power under Section 363 to do that, but Section 363 is not a federal preemption statute. In fact, there are cases that say that if you have federal preemption, it has to be expressed by Congress. And in fact, Section 363 defers to state law under subsection (f). So we don't have a situation where federal law trumps state law or anything of that sort. What we have is res judicata on the ability of this Court to enter an order under the facts presented back there in June and July -- as the Court said, 4th of July -- the Court had the power to go ahead and approve the sale. But just having the power doesn't mean it's right to do something that works an injustice. And that's why we're here today. It's an opportunity, really, in the case of this individual who has no other way to protect himself or to have recourse in the law to be able to proceed with his case.

And so Your Honor, we respectfully submit that Mr. Robley should be allowed to proceed with this case. I would only close by saying I did a little bit of math -- I'm not really good with these large numbers, but I determined that in the last quarterly report of GM before -- and the Court refers to this in its ruling -- before the bankruptcy filing that I think the amount of contingent liability for product liability claims was 974 million dollars, which is 1/75,000th of the value of the New GM. So we're talking about, even though it's of enormous importance to an individual like Shane J. Robley,

we're talking about an amount that is miniscule to GM and New GM, either Motors Liquidation or to GM, but it's miniscule in this case; let me put it that way. I feel a little bit like a mosquito on the back of an elephant. But I'm here. And Your Honor, that's not to minimize the importance of everything that has happened, but it is to say that the Court has an opportunity here to do justice, and we just ask the Court to take that opportunity and to rule -- rule in denial of the motion made by General Motors.

THE COURT: Thank you. Mr. Novack.

MR. NOVACK: Good morning, Your Honor. Barry Novack, N-O-V-A-C-K, appearing pro hac vice on behalf of Sanford Deutsch, personal representative of the estate of Beverly Deutsch.

Your Honor, I appreciate the fact that you pointed out that language from Section 2.3(a)(ix) because that is the very language that we incorporated in paragraph 3 of our third amended complaint which brings us here today. I'm not going to talk about what the New GM did not accept in terms of liability. I'm going to talk about what they agreed to accept because I think that brings this case into focus.

As I stated in my letter of February 9, 2010, which is attached as an exhibit, I believe it's Exhibit M or N to the motion, the section in question says that the New GM will "accept all liabilities to third parties for death, personal

injury, or other injury to persons or damage to property caused by motor vehicles designed for operation on public roadways which arise directly out of accidents, incidents, or other distinct and discrete occurrences that happen on or after the closing date and which arise from such motor vehicle's operation or performance." Paragraph 3 of the third amended complaint brought in the wrongful death action says, "the events giving rise to this cause of action stem from an automobile accident that occurred at or near Beverly Boulevard and Formosa Avenue, Los Angeles, California, and arise directly from a distinct and discrete occurrence that happened on August 2nd, 2009, namely the death of Beverly Deutsch from injuries sustained in the accident." It appears from the language where they accept liability for accidents, incidents, or other distinct and discrete occurrences that happened after the creation of New GM is to exclude any claims that were ripe and could have been brought prior to the creation of the New GM, and that they will accept all claims that arise after the creation of the New GM. While it is true that the accident involving Beverly Deutsch happened two years earlier, she was in a coma for a long period of time, she died from complications of the injuries she received, and died on August 2nd, 2009. The language that forms the order using the words "other distinct and discrete occurrences", we contend, without any definition of those words in the agreement and order, that

the death of Beverly Deutsch arising from injuries that preceded the creation of New GM, that death was a distinct and discrete occurrence. Those words, we believe, uniquely allow the heirs of Beverly Deutsch to bring a wrongful death action, a new action, a statutory action that did not exist prior to the creation of the New GM. So we're talking about a unique set of circumstances, and all we have to look at is the very language that was agreed to by the New GM, namely, was this an accident that happened afterwards? No. Was this an incident that happened afterwards? Perhaps. However, was this a distinct and discrete occurrence that happened afterwards? Yes. And because there is no definition of what a distinct and discrete occurrence is, if within the four corners of the agreement, we can bring our case into the category of cases that they have agreed to accept, then the language should be construed against them and in favor of my client and allow the wrongful death action that did not exist prior to the creation of the New GM to proceed. And that is all I have to say on the subject, Your Honor. Unless the Court has any questions?

THE COURT: No, but before you reply, Mr. Karotkin, I want to take a couple notes.

Thank you.

MR. NOVACK: Thank you.

THE COURT: Mr. Karotkin.

MR. KAROTKIN: Thank you, Your Honor. Stephen

Karotkin for General Motors, LLC.

Let me address Mr. Novat (sic) -- I'm sorry, Novat? -- Novack first, and I think there's actually a very simple answer, when you look at the language that Your Honor referred to and that was referred to by counsel. When he refers to a distinct and discrete occurrence, simply put, it is not a distinct and discrete occurrence independent of the accident or incident which took place prior to the closing. It merely flows from that. And for this to make any sense, it has to be a distinct and discrete occurrence independent, totally independent from what happened prior to the closing, which was when the accident occurred, and I think that that, Your Honor, is the only explanation of that language that makes sense and is very clear from the provisions of the MSPA.

Now, going back to Dr. Sizemore --

THE COURT: Is it, Mr. Karotkin? Or should I or any other judge conclude that when the extra words "other distinct and discrete occurrences" were added, they were added for some reason?

MR. KAROTKIN: No, I don't think so. They were added to cover, perhaps, something other than an accident or incident that occurred prior to the closing, but they certainly weren't added to cover something which arose directly from the event which occurred prior to the closing, Your Honor. That would not make any sense at all. You can't divorce what happened to

Ms. Deutsch from what occurred prior to the closing. It arose directly from that. It's not an independent or discrete occurrence.

May I proceed?

THE COURT: Yes, you may.

MR. KAROTKIN: With respect to Dr. Sizemore, I don't believe that Dr. Sizemore has raised anything to support a continuation of the lawsuit against General Motors, LLC. Whether or not -- and I believe this would be true for Mr. Robley as well -- I think they try to sort of cloud whether or not they have a right to file a proof of claim at this point or not, whether there is an independent basis to file a late proof of claim, but that's not the issue here today, and that can be addressed at another time.

The issue here today is whether or not they can continue the action as against New GM, and I think that the facts clearly demonstrate that Dr. Sizemore cannot do that. As I said, to the extent that Dr. Sizemore believes she was mislead, to the extent she believes that she received inconsistent information from people from my firm, which, Your Honor, we hope is not the case and we expect is not the case, again, that can be addressed by Your Honor in the context of whether or not Dr. Sizemore wishes to file a claim. I think, and I'm not sure, but I think that she did indicate or certainly did suggest that she did receive notice of the bar

date. And notwithstanding that, our files do not reflect that she filed a proof of claim.

With respect to Mr. Robley and Mr. Rutledge's argument, he acknowledged -- he acknowledged on the record that General Motors or MLC did not know about his claim at the time that notice was given of the sale hearing, or for that matter, at the time of the sale hearing. So under those circumstances, publication notices, as you found, Your Honor, was appropriate. Moreover, and again, I think that Your Honor indicated this again, all of the issues -- all of the issues that he would have raised in this court had he been given notice were squarely addressed by Your Honor. His suggestion that Your Honor did not consider issues of successor liability clearly is not the case. As you indicated, Mr. Jakubowski and others raised that issue with you; in fact, Mr. Jakubowski took it up to Judge Buchwald in the district court. And again, all of the issues that were raised here, all of the issues as to allegedly that this claim is just a miniscule part of the assets of New GM, were raised and rejected by Judge Buchwald. And all of those issues were raised again before Your Honor.

The first we heard that Mr. Rutledge or Mr. Robley received some correspondence from my office was when he was standing up here today. None of that is reflected in the pleadings. And again, Your Honor, to the extent that Mr. Robley believes he is entitled to file a late proof of claim, I

find it a bit curious that they haven't done anything yet. I find it a bit curious that in January of this year, he was advised of the fact that the assets had been sold. Again, nothing happened; he didn't make any effort to file a proof of claim. And basically what Mr. Rutledge is asking Your Honor to do is to rewrite -- to rewrite your sale order solely with respect to Mr. Robley. And we suggest, Your Honor, that that is completely, completely inappropriate.

I'm not sure I understand his request for a stay pending appeal; that can be addressed at a later time. I think Your Honor did indicate that you would hold things in abeyance --

THE COURT: Well, I understood him to be asking for the kind of relief that I had asked you about in your opening remarks.

MR. KAROTKIN: And again, as to the pending appeal, and to the extent that those are not final, again, we have no objection to that. But to the extent that he's seeking an independent stay-pending appeal with respect to whatever ruling Your Honor may make today, that's a different issue which we would like to address, if that's the case. And unless you have any questions, that's all I have to say.

THE COURT: No, thank you. Wait -- you have a request to confer.

MR. KAROTKIN: And again, I'd just like to point out

one other thing. In Section 2.3(b)(ix) of the MSPA, which is liabilities retained by Old GM, it specifically says "all product liabilities arising in whole or in part from any accidents, incidents, or other occurrences that happened prior to the closing date". And I think that's consistent with what I said before in the appropriate interpretation of the section dealing with assumed liabilities.

THE COURT: All right, very good.

MR. KAROTKIN: Thank you, sir.

THE COURT: Thank you.

Any surreply limited to remarks that were made in reply? Mr. Novack?

MR. NOVACK: Yes, Your Honor. With response to -- in response to what counsel just read, on page 6 of the motion, quoting from section --

THE COURT: The underlying motion, Mr. Novack?

MR. NOVACK: Yes, Your Honor.

THE COURT: Give me a moment, please. All right.

MR. NOVACK: Page 6, paragraph 46, it says, "except for the assumed liabilities expressly set forth in the MSPA, none of the purchaser" et cetera, et cetera "shall have any liability for any claim that arose prior to the closing date, relates to production of vehicles prior to the closing date, or otherwise is assertable against the debtor or is related to the purchased assets prior to the closing date.

THE COURT: Give me a moment, please. I'm sorry, where were you reading?

MR. NOVACK: Page 6 of your motion.

THE COURT: Did you say paragraph 46?

MR. NOVACK: It's -- they're quoting from paragraph 46 of the sale order, I believe.

THE COURT: Okay, continue please, Mr. Novack.

MR. NOVACK: Thank you, Your Honor. That language has to be looked at in conjunction with Section 2.3(a)(ix) because paragraph 46 deals with claims that arose before the creation of the New GM. Our claim for wrongful death did not arise it, we did not have an assertable claim, there is no cause of action for anticipatory wrongful death. So if you look at paragraph 46 and then look at the language in 2.3(a)(ix), we have a situation where Beverly Deutsch's death does fall within the appropriate framework to be brought following the creation of the New GM.

The use of the word "or" is interesting. Counsel argues that there has --

THE COURT: "Or" in 46 or "or" in 2.3(b)(ix)?

MR. NOVACK: In 2.3(a)(ix). GM argues that the occurrence has to be independent. Well, the language is "accident, incident, or". They're distinct and unique. And the word "occurrence". Occurrence is something which happens. We have an occurrence, something which happened after the New

GM was created. So in order to give meaning to this language, and I note that GM's counsel did not give the Court an example of what would constitute a distinct and discrete occurrence that happened afterwards. I'm giving the Court an example. Beverly Deutsch is an example of a discrete -- distinct and discrete occurrence that happened afterwards. Doesn't violate the language. In fact, it's in conformance with the language, and it's consistent with the intent of what types of claims should be covered by the New GM when you look in terms of what claims are not going to be covered. Claims that preexisted do not continue on. We have a totally new, independent claim that did not exist at law or in fact until after the New GM was created. That claim falls within the distinct and discrete occurrence section.

Had they merely said "accident", we would not have an accident, a new accident that occurred. They could have said "accident that happened afterwards", and that would cover somebody who was injured before and died afterwards. But they didn't do that. They expanded what they will accept. They will accept accidents that happened afterwards; we don't have that. They will accept incidents that happened afterwards; questionable, incident is not defined. And they will accept distinct and discrete occurrences that happened afterwards. We have such a situation. We don't have to twist words. We don't have to modify agreements, we don't have to look for

exceptions. We merely have to apply the very language upon which they have accepted liability, and Beverly Deutsch's case falls within the four corners of that language. Thank you, Your Honor.

THE COURT: All right, very good. Dr. Sizemore?

DR. SIZEMORE: I just want to impose one more time, and I thank you for your patience. I -- the only thing I've come to ask for is time. And I understand if there were any irregularities, I am completely agreeable to amend those irregularities. But I would ask for the time to be able to do that. I take responsibility for all of my own actions, but the only reason I elaborated on the activities that had happened during my proceedings was to persuade you that I don't think I'm the only one to blame for the irregularity that happened. So extending me the time is only because I just don't think it was all my fault.

But -- and the proof of claim form was mentioned to me on or about December 16th by -- during a phone conversation with Ms. Benfield which I have documented in my cell phone. When she mentioned the proof of claim form, she mentioned that the deadline for me to file that was November 29th. And she had had conversation with me prior to November 29th, some time in October -- I'd have to check my records -- and never mentioned the proof of claim form. So if that were still available, I would have done that.

And the other thing I wanted to ask the Court -- if it's improper, I apologize -- but I wanted to know if the bankruptcy laws prohibited action against the Old or New GM regarding laws pertaining to negligence or fraud or any accusation in those departments. Do the same bankruptcy laws apply to tort actions in those areas, so that I can avoid having to come back if I were to consider filing an action.

THE COURT: Well, forgive me, Dr. Sizemore. I can't give you legal advice. I can rule on issues that are before me. And that's what I'm going to do.

DR. SIZEMORE: Okay.

THE COURT: Thank you. Okay, Mr. Rutledge, did you have any final surreply? Again, limited to anything that Mr. Karotkin said the second time around.

MR. RUTLEDGE: Your Honor, with respect to the argument put forth by GM's counsel, I first want to take exception to the statement that Dr. Sizemore or Mr. Robley cloud the issue with respect to filing a proof of claim or any conclusions -- excuse me -- that might be drawn in reference to what we're discussing today regarding the timing of filing a proof of claim, but only to say that if that were a route that were available, it would -- it would appear, Your Honor, that it would be working counter to the arguments that we're putting forth with the Court today, but certainly we leave open --

THE COURT: Well, lawyers do that to each other all

the time, I think, don't they, Mr. Rutledge?

MR. RUTLEDGE: Pretty much, Your Honor, I would agree. But secondly, more importantly, the contention that the Robley issues were decided by Judge Buchwald in the matter that was taken to the district court on appeal, I did read the decision of Judge Buchwald and find that, as a matter of fact, she deliberately did not rule on the substantive issues of that appeal. She deliberately found that Section 363(m) of the Bankruptcy Code controlled and that the fact that the appellants had not come before this Court and asked for -- or, obtained a stay foreclosed that appeal. Whether that -- I believe the decision on that was April 13th of this year. And whether that, in turn, will be appealed, I think is still an open issues. But I would simply say that on the record of the decisions rendered either in this court or by Judge Buchwald in the district court, there is no specific finding or ruling on the issue of the exceptions to the general rule when the assets can pass free and clear of liens and encumbrances. And there is no ruling with respect to our contentions specifically related to the product liability character of our cause of action. So I think it would be a misunderstanding to say that that was the case.

And finally, with respect to comments of counsel pertaining to notice, certainly there was a certificate of notice filed by counsel for GM. Certainly, there was notice by

publication. But the facts here are really identical to the facts that were in the Savage Arms case. It doesn't really matter why the person in Robley's situation didn't get notice. What is of most importance was that there was a failure to meet the requirements of procedural due process set forth in Mullane v. Central Hanover Bank and Trust. And procedural due process or finding that it fails to meet that standard does not require that we prove that GM intentionally left Mr. Robley out in the cold. It simply calls for an analysis whether the notice that was given was reasonably calculated to reach him and give him an opportunity to appear and respond. And we simply say that, in his case, it does not meet the procedural due process requirement.

The other issues that Mr. Karotkin raised on his rebuttal, Your Honor, we submit are -- to say that we're trying to go back and rewrite the agreement or trying to ask the Court to modify its order would be a misstatement. What we're asking, Your Honor, is Section 7.1 of the agreement says that the liabilities of persons like Robley would be barred to the extent permitted by law. So the agreement is all we need from the point of view of stating his position. And if you read the provisions of the order, the order itself says, "except as expressly permitted or otherwise provided by the MSPA or this order", and then it goes on to state the general proposition that claims are barred. So that exception, Your Honor, is

relevant in Mr. Robley's case. The fact that there is a failure to meet the minimum requirements of procedural due process, I think it's difficult for counsel to accept that, but that fact exempts Mr. Robley from the constraints that GM -- New GM tried to build into the sale agreement. And the consequences of a failure to meet substantive -- or, procedural due process in a bankruptcy case are well stated in the Savage Arms case and the same results that pertain there should pertain in the case of Mr. Robley.

THE COURT: All right, thank you.

All right, folks, I want you to take an early lunch, a long lunch, and to be back here at 1 o'clock p.m. at which time I will issue a ruling, or as soon as practical thereafter.

We're in recess.

(Recess from 11:13 a.m. until 1:32 p.m.)

THE COURT: I apologize for keeping you all waiting.

In these jointly administered cases under Chapter 11 of the Bankruptcy Code, General Motors, LLC, or New GM as we commonly call it, moves for an order of this Court, A, enforcing a previous order of this Court, B, enjoining certain plaintiffs from prosecuting or otherwise pursuing certain claims asserted against New GM, and C, directing those plaintiffs to promptly dismiss New GM from pending litigation with prejudice.

The motion is granted in substance, subject to the

refinement discussed below, to the extent it would affect those who did not object, Dr. Terrie Sizemore, Shane J. Robley, and Sanford Deutsch, to the extent Mr. Deutsch asserts claims other than his wrongful death claim. The motion is continued for a subsequent clarification of the record, and if necessary, an evidentiary hearing, concerning the claims asserted by Mr. Deutsch for his wife's wrongful death after the closing, and in particular, to ascertain the exact language in the final form of the ARMSPA and the reasons for any changes. The following are the bases for this determination.

After sufficient notice -- and I'll come back to the matter of notice -- and upon an evidentiary record, an extensive one, on July 5th, 2009, I entered an order authorizing the sale of substantially all of the debtors' assets to the predecessor of New GM pursuant to an amended and restated master sale and purchase agreement. We commonly call that document the ARMSPA. Pursuant to the ARMSPA and the related sale order, New GM agreed to assume certain liabilities of the debtors. The ARMSPA enumerated with substantial but not total clarity which liabilities would be assumed by New GM, and it made clear that all other liabilities would be retained by the debtors. With respect to product liability claims, the form of the ARMSPA dated "as of June 26th, 2009" provided in Section 2.3(a)(ix), "The assumed liabilities shall consist only of the following liabilities of sellers." And I'm omitting.

"(ix) All liabilities to third parties for death, personal injury, other injury to Persons or damage to property caused by motor vehicles designed for operation on public roadways or by the component parts of such vehicles and in each case manufactured, sold, or delivered by sellers (collectively "Product Liabilities"), which arise directly out of" and I'm emphasizing, "accidents, incidents, or other distinct or discrete occurrences that happened on or after the closing date and arise from such motor vehicle's operation or performance." It's the end of the lengthy quote. By contrast, a first amendment to amended and restated master sale and purchase agreement had a different language for Section 2.3(a)(ix) stating, with respect to the language I just emphasized, "accidents or incidents" that happen on or after the closing date.

Now, in oral argument on this motion, I asked whether the language that had been used in the briefs by each of the parties, which was the latter language, was the wrong language, in terms of describing what the parties, Old GM and New GM, had agreed to, and either out of good manners or confusion, nobody corrected me, or perhaps I was corrected, but in a way so subtle that I missed it. But when I looked back at that language over the lunch hour, I now wonder whether you all got it right and that the second language I just read trumps the first. But I have no evidence in the record of the exact order

of these seemingly different contractual provisions or especially the reasons for the difference. And I think that the difference could possible change the result.

However, for litigants other than the Deutsch family where Ms. Deutsch's injury was before the sale and her death came after, and in all other respects, the facts are much clearer and require neither supplementation nor discovery. The sale order makes clear that New GM was purchasing the assets free and clear of all liens, claims, encumbrances, and other interests including any rights or claims based on any theory of successor transferee, derivative or vicarious liability, or de facto merger or continuity of any kind or character. These provisions in the sale order were not slipped into the order with stealth but were hotly contested before me. One lawyer, in particular, Steve Jakubowski, litigated them vigorously and at length both before me and on appeal. I dealt with the successor liability issue extensively in my written decision, and the appeal by Mr. Jakubowski from that decision was dismissed by the district court where my decision was also affirmed.

Moreover, the sale order contained broad provisions prohibiting and enjoining any action or proceeding by any individual or entity to enforce or collect any claim against New GM on account of any claim against the debtors other than with respect to the assumed liabilities.

Since the debtors and New GM closed, pursuant to the ARMSPA on July 10, 2009, a date that I'll refer to as the closing date, six lawsuits have been filed against New GM asserting product liability claims based on accidents or incidents that occurred prior to the closing date. New GM has informed these plaintiffs of its position that the provisions in the ARMSPA and the sale order preclude them from pursuing their claims, but those plaintiffs have failed to dismiss their lawsuits against New GM. As a result of the plaintiffs' refusal or failure, New GM brought this motion before me seeking to enforce the sale order.

Of the six plaintiffs named in New GM's motion, three have filed formal objections, those objectors being Shane Robley, Terrie Sizemore, and Sanford Deutsch. Each objection presents somewhat different arguments, and I'll address them in order of increasing difficulty.

Turning first to dr. Sizemore's objection, she argues that New GM must remain a defendant in litigation that she commenced on a wholly prepetition accident until she is able to complete discovery on certain matters that have been fleshed out only in part. But her argument is, of course, contrary to the broad language in the sale order that enjoins any action or other proceeding in any judicial proceeding taken against New GM on account of any claim against the debtors other than that -- than assumed liabilities as that term is defined in the

sale order. So we must look to the ARMSPA, rather than the issues relating to the underlying claims, to ascertain the extent, if any, to which the ARMSPA covers her claims as an assumed liability.

That's a matter as to which she made no substantive arguments. I find no fault with her having acted as she did, especially in light of the fact that she's a pro se litigant, and certainly I wouldn't think of imposing sanctions on her, and I do not do so now. But the issue before me is, nevertheless, whether her lawsuit must be brought to a halt, or putting it differently, whether she can't bring it -- continue it anymore, and the answer is that she can't continue it anymore. That's especially so since the discovery she seeks relates to the merits of her claims as contrasted to the content or intent of the ARMSPA whose terms defined the extent to which she could or could not properly proceed.

Without dispute, Dr. Sizemore was injured in a prepetition accident. As relevant here, the ARMSPA unequivocally provides that for claims to have been assumed by New GM when they are based on an accident taking place at some point in time, those accidents to be allowed to be assumed by New GM must have taken place on or after the closing date. Dr. Sizemore simply doesn't qualify under that language.

Since Dr. Sizemore's claims result from an accident prior to the closing date, she might have a prepetition claim

against Old GM, an issue that I haven't been asked to decide today and which I'm not currently deciding. But her claim, if any, is certainly not an assumed liability. Therefore, Dr. Sizemore will be stayed from taking any action against New GM on account of or arising from her preclosing date accident, including for the avoidance of doubt, continuing litigation against New GM for the purpose of conducting discovery on any issue.

Turning next to the objection filed by Shane Robley, Mr. Robley argues that New GM's motion should be denied because, one, Mr. Robley was deprived of procedural due process because he didn't receive actual notice of the sale motion that led to the sale order; two, the sale to New GM did not convey those assets free and clear of his product liability claim; and three, that selecting July 10, 2009 as the closing date was arbitrary, capricious, and unjust, or, putting it somewhat differently, that I should force New GM to assume his and perhaps other liabilities by reason of my notions of equity.

New GM disputes each of those contentions, and on the facts and law here, I must agree with New GM. It's agreed by all concerned that Mr. Robley didn't get mailed a personal notice of the 363 hearing that resulted in the sale order, very possibly because as of that time, Mr. Robley had not sued either Old GM or New GM yet. It's also agreed that Old GM and New GM did not give personal notice of the 363 hearing to all

of the individuals who had ever purchased a GM vehicle, and instead, supplemented its personal notice to a much smaller universe of people by notice by publication. It's also undisputed that I expressly approved the notice that had been given in advance of the 363 hearing including the notice by publication, which I found to be reasonable under the circumstances.

Mr. Robley relies on the First Circuit's decision in Western Auto Supply Company v. Savage Arms, Inc., 43 F.3d 714 (1st Cir, 1994), in which the First Circuit Court of Appeals, speaking through Judge Conrad Cyr, a highly respected former bankruptcy judge, agreed with the district judge that the bankruptcy court had erred when the bankruptcy court enjoined prosecution of product line liability actions brought against the purchaser of the debtor's business for lack of notice. But the critically important distinction between this case and the Savage Arms case is that here, and not there, notice was also given by publication. We all agree that due process requires the best notice practical, but we look to the best notice that's available under the circumstances. Here, under the facts presented in June of 2009, GM didn't have the luxury of waiting to send out notice by mail to hundreds of thousands of GM car owners, and instead gave notice by publication, which I approved. In Savage Arms, the debtor "conceitedly made no attempt to provide notice by publication" (43 F.3d at 721) and

the notice that was given was never determined, "appropriate in the particular circumstances" (Id. at 722). In other words, the First Circuit found it significant that the debtors in Savage Arms didn't do the very thing that was done here.

As I've indicated, I've already determined that notice was appropriate in the particular circumstances, and provided for that in an order that entered on July 5th, 2009 that remains valid today. Moreover, it's obvious that the notice was, indeed, appropriate and did what it was supposed to do because it permitted Mr. Jakubowski, in particular, to make effectively and well the very arguments that Mr. Robley's counsel would, himself, have to make either now or back then and which I then considered and rejected.

I've already ruled on the arguments dealing with the underlying propriety of a free and clear order cutting off product liabilities claims as set forth in my opinion published at 407 B.R. 463. Until or unless some higher court reverses my determination -- and neither of the district courts who've ruled on that determination have yet done so (see 2010 W.L. 1524763 and 2010 W.L. 1730802) -- they're res judicata, or at least res judicata subject to any limitations on the res judicata doctrine requiring a final order. And of course, they're stare decisis. I found these arguments to be unpersuasive last summer, and considering the great deal with which my previous opinion dealt with those exact issues, I am

not of a mind, nor do I think I could or should, come to a different view on those identical issues today.

Lastly, of course, I sympathize with Mr. Robley's circumstances, just as I've sympathized with each of the tort victims who have been limited to the assertion of prepetition claims against Old GM. But I'm constrained to act in accordance with the law, and can't substitute my own notions of fairness, equity, or sympathy for what the law requires me to do. That's especially so since choosing a closing date required some date to be chosen and there's no evidence in the record to lead me to believe that the closing date was done in any way to particularly target Mr. Robley.

Finally, turning to Mr. Deutsch, Mr. Deutsch, understandably, doesn't argue that the personal injury claims he might otherwise be able to assert are prepetition claims. But he argues that because Ms. Deutsch died after the closing, her resulting wrongful death claim didn't come into being until that time. And he further argues that the death of Ms. Deutsch constituted an incident separate and apart from an event upon which the cause of action accrued. Thus, he argues, that while the wrongful death claim wasn't assumed because of an "accident" taking place after the closing, it was an "incident" or especially a "distinct and discrete occurrence" as appearing in some of the versions of the ARMSPA. However, the problem I have is that the record is now confused as to which version of

the ARMSPA I should be looking at, and especially, where there are differences, what are the reasons for those differences?

If the language with "other distinct and discrete occurrences" was added, it would broaden the universe of claims that were assumed. Conversely, if it were deleted, it would narrow them. I thought, during the course of oral argument, that the language was added, but now I'm not so sure, and I especially don't know the reasons for the changes. And, so far as I can tell, I received no evidence with respect to the changes, or especially the reasons for them.

In any event, "incidents" remains undefined, and it obviously must mean something different from "accidents", which is what we almost always think of as causing product liability claims. Also, a death is at least seemingly an incident by many common uses of that term. It's obviously quite different than an accident, and I have to assume that "incidents" was included to say something more than use of the word "accidents" would say. There's a principle of law under the State of New York whose laws apply to the ARMSPA that contracts are construed, when possible, as to give effect and meaning to every word and expression contained in an agreement. See, for example, Atwater & Company v. Panama Railroad Company, 246 NY 519, Benvenuto v. Rodriguez, 279 A.D. 162. So I think I or any other Court would be reluctant to disregard whatever was in the agreement besides the word "accident", and we'd all have to

focus on whatever supplementary words there were in any analysis going forward.

We all agree, or should agree, that when the cause of action came into being under California law is irrelevant. What does matter is what the ARMSPA says it covers, but at this point, I don't have that answer with sufficient certainty to decide an issue that's obviously of very great importance to the Deutsch family, and I can't decide this aspect of the motion on the existing record. Accordingly, the portion of the motion that deals with Mr. Deutsch's wrongful death claim will be severed for supplementation of the record. The remainder of the motion will be granted. However, though I, of course, think I got it right when I issued the successor liability portion of my early rulings, I'm going to stay, rather than require dismissal of, the litigation brought by the three objectors insofar as I've ruled on their actions so that the objectors won't be prejudiced if my earlier rulings, which now are good law, are modified in any respect material to their claims. If, after a final order emanating out of the appellate courts, my earlier rulings remain good law, and prepetition claims then still can't be brought against New GM, New GM will be free, if it wishes, to come back to me with a request that they be dismissed, which, as I understand is the third prong of GM's motion before me today.

With all of that said, I think it would be helpful if

Old GM reconsider whether it will consent to any of the objectors filing a late proof of claim, and that it likewise consider doing the same for any others who were the subject of this motion and who may also have been told that they shouldn't be proceeding with their lawsuits without also being told of the need to file proofs of claim. If Old GM is unwilling to consent to that, persons who had those conversations may, of course, file their own motions for leave to file late claims, or they may file them and then defend any motions to dismiss or expunge those claims if based on tardiness grounds.

Mr. Karotkin and Mr. Novack, you're to agree with each other on a timetable for supplementing the record and for teeing up the remaining issue. Mr. Karotkin, I would like you, if you would, to settle an order in accordance with this ruling for the elements of the motion that were granted.

MR. KAROTKIN: Can I ask a question, sir?

THE COURT: Yes, sir.

MR. KAROTKIN: Just so I'm clear about your staying of dismissal, does that mean, Your Honor, that the plaintiffs can actually proceed with the litigation, or is the status quo to be maintained? I'm not exactly sure what you had in mind. Or perhaps --

THE COURT: When I say stay -- forgive me for interrupting you, Mr. Karotkin.

MR. KAROTKIN: Sorry.

THE COURT: When I say stay, I mean that each litigation against New GM that was a subject of your motion must come to a full stop. They don't have to file a notice of dismissal, but those litigations can't go anywhere, just as if they were in automatic stay.

MR. KAROTKIN: Okay.

THE COURT: If my earlier decision ultimately is affirmed -- or, actually, the converse is a better way of saying it. If it isn't altered on appeal after all appeals have been exhausted, if New GM wants to come back to me for a supplemental order that those actions that are then stayed be dismissed, my ruling's without prejudice to New GM making any such motion. But those motions are to go nowhere until or unless my earlier ruling is modified in some way as it affects the successor liability issue.

MR. KAROTKIN: You mean those actions, not the motions.

THE COURT: I'm wondering if I misspoke.

MR. KAROTKIN: I think you said, if I may, Your Honor, "those motions should not go forward". I think you meant those actions --

THE COURT: Yes.

MR. KAROTKIN: -- or those lawsuits.

THE COURT: Correct. That's what I meant.

MR. KAROTKIN: All right, thank you, sir.

THE COURT: Okay, anything else anybody? Yes, Doctor.

DR. SIZEMORE: I apologize. I understand that you want me to stop the product liability action. Does that -- there are two actions in Medina County. One is the product liability --

THE COURT: Everything must come to a stop.

DR. SIZEMORE: Even the action for discovery?

THE COURT: Yes.

DR. SIZEMORE: Okay.

THE COURT: There are no sanctions for anything that's happened before, but everything must come to a full stop.

DR. SIZEMORE: By when?

THE COURT: I can give you a reasonable time to comply. How much time do you need to bring them to a stop?

DR. SIZEMORE: Eight days.

THE COURT: I don't think eight days will be a problem. Mr. Karotkin?

MR. KAROTKIN: No, sir, that's fine.

THE COURT: That's fine.

Yes, sir?

MR. NOVACK: If I heard Your Honor correctly, you said was granted as to Sanford Deutsch as an individual. Sanford Deutsch as an individual in the third cause of action -- excuse me, in the third amended complaint has not brought claims against the New GM. His individual claim was for loss of

consortium which was asserted against all defendants except the New GM, so I do not believe in that regard there is any need for dismissal with respect to Mr. Deutsch as an individual. His sole capacity vis-a-vis the New General Motors is as the personal representative of the estate on behalf of the wrongful death claims.

THE COURT: Fair enough, and I think what it might be helpful for you to do is to put your noodle together with Mr. Karotkin so that the facts as you've described them and the spirit of my order are reconciled. The underlying concept was, first, although I didn't speak to it, I had assumed that you can go against anybody other than Old GM and New GM, and that the issue that you had raised that I thought was one of difficulty was for the wrongful death claim that arose when Ms. Deutsch died, but that any other claims you had that you could have asserted earlier would have to be stayed at least until the appellate courts act differently -- that you had asserted against New GM would have to be stayed. And you're nodding. Are we -- I gather we're on the same page?

MR. NOVACK: Yes, we have not asserted any claims against New GM except wrongful death claims.

THE COURT: Oh, okay. And that one is what I need further help from you folks on. I would like -- I won't order it without an opportunity for each side to be heard, but I would like you to put that on hold until we can get this sorted

out before me.

MR. NOVACK: I'm sorry? To put --

THE COURT: I would like the issue that I couldn't decide today to be put on a temporary hold until I can rule on the remaining issue. But I will hear argument from you and Mr. Karotkin on that if you think that would prejudice you in some material way. In other words, on the one issue that I haven't ruled on yet.

MR. NOVACK: I apologize for not following the Court. I thought that the only issue that relates to Mr. Deutsch is whether or not he is able, on behalf of the estate, to bring a wrongful death claim for the death that arose after the creation of the New GM, which would depend upon the interpretation of whatever would be the relevant language, which is still subject to some uncertainty that we are going to clarify. I thought that was the --

THE COURT: Exactly.

MR. NOVACK: Okay.

THE COURT: And what I'm saying is until I can rule on that remaining issue, my tentative, California-style, is that I would like your action in California on that issue to remain in a holding pattern until the open issues can be determined.

MR. NOVACK: Okay, so that would mean, as far as California is concerned, that there would be no discovery either to or from the New GM in that wrongful death action

until this matter is resolved.

THE COURT: Yes.

MR. NOVACK: Yes.

THE COURT: If you want to be heard on that -- if there's some material prejudice to you, I'll hear that, but that's what I would prefer to do.

MR. NOVACK: Let me just briefly address the issue. There is outstanding discovery as to GM on that issue with respect to certain protocols and testing. Some of that discovery can be had from codefendants such as Autoliv and Takata, and I have agreed to a protective order as to them which may reveal the same documentation that GM would have given us. There may be some documentation that those two defendants do not have that only GM has, and I would have no way of getting that except against GM. If GM is no longer going to be a party, New GM, I would have to do third-party discovery as against the New GM for that material. If they are a party, then obviously, the manner by which I can obtain that information is relieved.

I would anticipate, or hope at least, that the remaining issue for Your Honor to consider would be resolved before the need or the dire need for any discovery against GM -- the New GM that I could not get against the other defendants, so I have no problem, currently, with staying -- having a mutual stay agreement or an order for mutual stay as

to discovery between plaintiff and the New GM until Your Honor issues a definitive ruling concerning the remaining issue on the contract.

THE COURT: Um-hum. Mr. Karotkin, do you want to weigh in on this?

MR. KAROTKIN: Do you want me to approach?

THE COURT: It's always as helpful for a guy as tall as you.

MR. KAROTKIN: I think what counsel said is that he's okay with a mutual stay remaining in effect pending your determination. Hopefully that will be done rather expeditiously, and I guess if it becomes an issue in terms of the discovery he needs, if this takes longer than we expect, then either we can work it out with counsel or we can come back to Your Honor.

THE COURT: You know what I think I'd like to have you guys do on this, see if you can come up with a stip or consent order papering any deal that you guys have.

MR. KAROTKIN: Okay.

THE COURT: If, and I suspect that it's unlikely, you agree to disagree, then you can set it up via conference call that I can deal with it on, but somehow, I have a sense that the two of you folks are going to resolve it satisfactorily without me needing to get involved.

MR. KAROTKIN: I certainly expect we will be able to

do that.

THE COURT: Okay.

MR. KAROTKIN: Thank you, sir.

THE COURT: Fair enough. And Mr. Novack, except for evidentiary hearings, I will give you permission, if you want to avail yourself of it, to appear by telephone -- actually, that's for everybody who is not here in New York City. I'll give you permission to appear by telephone and without having to bring local counsel into the courtroom with you unless you want to.

MR. NOVACK: Thank you. I appreciate that, Your Honor. And just one point of clarification, if I may.

THE COURT: Yes.

MR. NOVACK: What time frame would Your Honor -- in terms of Your Honor's schedule, what time frame would Your Honor like for us to work out a briefing schedule with respect to the remaining issue on the Deutsch case.

THE COURT: I'd like you to agree with Mr. Karotkin on that, and again, paper it by a stip or consent order. If it's reasonable, I'm going to approve it. Whatever you guys agree upon, as long as it's not pushing this issue way back, will be fine with me.

MR. NOVACK: Thank you, Your Honor.

THE COURT: Very well. Okay.

Yes, sir, Mr. Rutledge.

MR. RUTLEDGE: Yes, Your Honor, I just want to make sure that I understand my part of this. We will take no further action in the case in the Western District of Tennessee but the Court is holding the requested relief in the motion in abeyance pending the opportunity to appeal the matters that we have brought before the Court today. Do I have that correct?

THE COURT: I think you did, but I'd rather say it my way. If it weren't for the fact that the appeal that Mr. Jakubowski brought is, to my understanding, not yet to a final end, and that he may have the right to go to the circuit, or maybe he's already at the circuit -- and one of my problems is that I don't always know what happens to stuff that I issue after it has gone up -- your action is stayed but not dismissed until Mr. Jakubowski's action comes to an end.

There is a separate right of appeal which could be of relevance, which is you have the right to appeal my decision which, unfortunately, is against you. Your time to appeal that order is, of course, a different time to appeal, and that will run from the time of entry of the order that I told Mr. Karotkin to prepare, and not from the time of this dictated decision. Not from today.

MR. RUTLEDGE: That's my question, Your Honor. So we will take no further in the case against New GM, but we do have the opportunity to pursue an appeal from the decision today, and also to await the course of appeal that is ahead of us and

that Mr. Jakubowski possibly is pursuing -- I think that's in the Campbell claim, as I recall.

THE COURT: I think you're right. You have the right to appeal -- and I think it's an appeal; it may be a motion for leave to appeal; I'm not focusing on that; that's a district court issue, not my issue -- from my order to the District Court of the Southern District of New York, and I can't give you legal advice, but I think you have fourteen days to do that from the time of entry of the order that Mr. Karotkin's going to prepare and which you have the right to comment on, if you choose to. Assuming that my order is entered and remains in place, I'm going to expect the -- is it in the Western District of Tennessee?

MR. RUTLEDGE: That is correct, Your Honor.

THE COURT: In Memphis, or --

MR. RUTLEDGE: In Memphis, yeah.

THE COURT: I expect that until and unless my order is reversed, my order will be complied with, and if the Campbell action appeal turns out to be successful, if you can't get agreement from Mr. Karotkin as to what to do, you can come back to me from relief in that regard. I would expect you, though, Mr. Rutledge, that even before Mr. Karotkin's order is entered, that you not do anything that if that order had been entered, would prohibit.

MR. RUTLEDGE: Your Honor, we have not taken any

action. There's only been a scheduling order that was issued by the Court, and I will take no further action. But I did want to be clear about what appeals the Court was talking about with regard to the holding a dismissal in abeyance pending appeal. And I think I understand it, now, Your Honor.

THE COURT: Yeah, because it's been subject to a double entendre, I certainly understand the questions.

MR. RUTLEDGE: Thank you, Your Honor.

THE COURT: Okay. Anything else? Anybody? Okay, thank you very much, folks. Have a good day.

MR. KAROTKIN: Thank you, Your Honor.

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
GENERAL MOTORS CORP., *et al.*,	:	**09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

LIMITED OBJECTION OF CALLAN CAMPBELL, KEVIN JUNSO, *ET AL.*, EDWIN AGOSTO, KEVIN CHADWICK, *ET. AL.*, JOSEPH BERLINGIERI, AND THE CENTER FOR AUTO SAFETY, *ET AL.*, TO THE DEBTORS' 363 MOTION FOR THE SALE OF THE "PURCHASED ASSETS" FREE AND CLEAR OF POTENTIAL SUCCESSOR LIABILITY CLAIMS

Dated: June 19, 2009
(as amended technically on June 22, 2009)

Callan Campbell ("Campbell"), Kevin Junso, *et al.* ("Junso"), Edwin Agosto ("Agosto"), Kevin Chadwick, *et al.* ("Chadwick"), and Joseph Berlingieri ("Berlingieri," together with Campbell, Junso, Agosto, and Chadwick, the "Products Liability Claimants"), and the Center for Auto Safety, Consumer Action, Consumers for Auto Reliability and Safety, National Association of Consumer Advocates, and Public Citizen (collectively, the "Consumer Organizations," and together with the Product Liability Claimants, the "Products Liability Claimant Advocates"), by and through their respective attorneys, submit this limited objection to the motion (the "363 Motion") of General Motors and certain of its subsidiaries (collectively, "GM" or "Debtors") for an order authorizing the sale of certain assets, including its Continuing Brands, to Vehicle Acquisition Holdings LLC, a U.S. Treasury-sponsored purchaser (the "Purchaser").[1]

Introduction

1. GM states in the 363 Motion that the sale "must be free and clear" of "rights or claims based on any successor or transferee liability." 363 Motion at 32-33. No business justification has been articulated, however, as to why the Purchaser is entitled to such relief, particularly when the "New GM" will look and operate much like the "Old GM" in the Continuing Brand businesses, and thus potentially satisfy the "mere continuation," "continuity of enterprise," or "product line exception" tests for successor liability under the laws of various states.

2. While shedding potential successor liability claims provides expediency, it is not permitted under Bankruptcy Code section 363(f), which authorizes the sale of property free and clear only of "interests in" property to be sold, not *in personam* choses in action against the Purchaser under theories of successor liability. And while the *Chrysler* court authorized such

[1] Capitalized terms used herein and not otherwise defined shall have the meaning set forth in the Product Liability Claimant Advocates' limited objection, the Debtors' 363 Motion, or the Master Purchase Agreement ("MPA") attached to the 363 Motion.

relief in the sale of Chrysler's assets in the transaction with Fiat, for the reasons set forth below and in the supporting Memorandum of Law submitted herewith, if the Court undertakes its own independent analysis of *Chrysler's* reasoning, it should conclude, as we do, that *Chrysler* was wrongly decided.

The Sale Motion and Proposed Order

3. On June 1, 2009, General Motors and certain of its subsidiaries (collectively, "GM") filed petitions for bankruptcy under Chapter 11 of the Bankruptcy Code. That same day, GM filed a motion for an order authorizing the sale under 11 U.S.C. § 363(f) of substantially all of its assets to Vehicle Acquisition Holdings LLC, a U.S. Treasury-sponsored purchaser ("Purchaser").

4. The Sale Motion seeks approval of the sale "free and clear of liens, claims, encumbrances, and other interests, including rights or claims based on any successor or transferee liability," and requests findings that the Purchaser is not a successor or transferee and that no liabilities may be placed on it based on such a status. Sale Motion at 20-21. The Proposed Sale Order accompanying the Sale Motion indicates that GM contemplates selling its assets free and clear of both existing and future successor liability claims, stating that "the Purchaser shall not have any successor, transferee, derivative, or vicarious liabilities of any kind or character for any Claims, including, but not limited to, under any theory of successor or transferee liability, . . . whether known or unknown as of the Closing, now existing, or hereafter arising . . . ." Proposed Sale Order at 23-24; *see also id.* at 11 (requesting a finding that the Purchaser "would not consummate the 363 Transaction if the sale of the Purchased Assets was not free and clear of all liens, claims, encumbrances, and other interests, including rights or claims based on any successor or transferee liability other than Assumed Liabilities, or if the

Purchaser would, or in the future could, be liable for any such liens, claims, encumbrances, and other interests, including rights or claims based on any successor or transferee liability . . . .").

Parties to the Objection

5. The Center for Auto Safety, Consumer Action, Consumers for Auto Reliability and Safety, National Association of Consumer Advocates, and Public Citizen are non-profit organizations that work to protect consumers, including consumers who will be affected by this bankruptcy proceeding. The organizations are particularly interested in ensuring that the rights of consumers who will suffer injury or loss in the future due to defects in GM vehicles delivered prior to the Closing are protected in this proceeding, because those consumers, who do not know that they will be injured, have no meaningful opportunity to enter this proceeding to seek to preserve their own rights. The objectives of each of these organizations are as follows:

a. **The Center for Auto Safety** is a non-profit consumer advocacy organization that, among other things, works for strong federal safety standards to protect drivers and passengers. The Center was founded in 1970 to provide consumers a voice for auto safety and quality in Washington, DC, and to help "lemon" owners fight back across the country. The Center advocates for auto safety before the Department of Transportation and in the courts.

b. **Consumer Action** is a national non-profit education and advocacy organization serving more than 9,000 community based organizations with training, educational modules, and multi-lingual consumer publications since 1971. Consumer Action serves consumers nationwide by advancing consumer rights in the fields of credit, banking, housing, privacy, insurance, and utilities.

c. **Consumers for Auto Reliability and Safety ("CARS")** is a national, award-winning non-profit auto safety and consumer advocacy organization dedicated to preventing motor vehicle-related fatalities, injuries, and economic losses. CARS has worked to enact legislation to protect the public and successfully petitioned the National Highway Traffic Safety Administration for promulgation of regulations to improve protections for consumers.

d. **National Association of Consumer Advocates ("NACA")** is a non-profit association of attorneys and advocates whose primary focus is the protection and representation of consumers. NACA's mission is to promote justice for all consumers by maintaining a forum for communication, networking, and information sharing among consumer advocates across the country, particularly

regarding legal issues, and by serving as a voice for its members and consumers in the ongoing struggle to curb unfair or abusive business practices that affect consumers.

e. **Public Citizen**, a consumer advocacy organization, is a nonpartisan, non-profit group founded in 1971 with members nationwide. Public Citizen advocates before Congress, administrative agencies, and the courts for strong and effective health and safety regulation, and has a long history of advocacy on matters related to auto safety. In addition, through litigation and lobbying, Public Citizen works to preserve consumers' access to state-law remedies for injuries caused by consumer products, such as state product liability laws.

6. Callan Campbell is a GM tort victim. On August 17, 2004—a week before she was to start college—18 year old Callan was a front-seat passenger in a 1996 GMC Jimmy when the driver of the vehicle lost control while attempting to make a left turn. The vehicle entered a driver-side leading roll and rolled 1.5 times before ending on its roof. The roof collapsed over Callan's seat, partially paralyzing her. The strength to weight ratio of the GMC Jimmy roof is about 1.9, which is among the lowest of all GM vehicles. GM's own tests revealed that roof strengths in rollovers should be 3W to 4W. Callan's paralysis could have been avoided at a mere fifty dollar cost to GM.

7. Callan's medical bills total $200,000 for the life-saving treatment she received immediately after the crash. Additionally, Callan's parents have spent $160,000 renovating their home to accommodate Callan's physical and medical needs as a C6 incomplete quadriplegic. A life care planner has estimated Callan's current and future needs for extra doctor visits, medicine, durable equipment and home modifications at $4,518,831.00. An economist has predicted her work loss based on total disability at $4,120,538. Callan is also entitled to significant compensation for pain and suffering including loss of life's pleasures, loss of dignity and independence, loss of the use of her limbs, and disfigurement.

8. Kevin and Nikki Junso are the parents of Tyler, Matt, and Cole Junso. On April 25, 2006, Tyler and Kevin Junso were involved a single car rollover accident while driving a

2003 GMC Envoy. During the rollover, the windshield and side windows were knocked out, reducing the strength of the roof structure. The Envoy sustained catastrophic damage to the roof structure, which buckled violently inwardly toward Tyler and Kevin. Despite being belted, both occupants were partially ejected from the vehicle during the roll over. Seventeen year old Tyler, the driver, sustained massive skull and neck injuries and died at the scene of the accident. The evidence showed that Tyler's head was partially outside the vehicle during the roll over sequence, due to the broken window and lateral displacement of the roof structure, and made contact with both the ground and the roof during the accident. The paramedics found Kevin, the passenger, with his left leg out the windshield and his right leg out the passenger side window. Kevin sustained serious injuries to his arms and legs, which eventually led to the amputation of his right leg below the knee.

9. GM has been aware of the significant risks of "occupant excursion" if the safety mechanisms in its vehicles fail. Despite this knowledge, GM failed to introduce cost effective safety measures into its designs, which could have included side window plastics or laminates or seat belts resistant to excessive spool out. Not only has the Junso family lost a son as a result of GM's failure to correct the strength instabilities in its SUVs, but Kevin has also lost his right leg. To date, Kevin has incurred medical bills totaling $555,204.19, and his future medical expenses are predicted to exceed $800,000.

10. Joseph Berlingieri was parked in a driveway on September 21, 2006 when the driver side impact airbag in his 1998 Cadillac DeVille malfunctioned and deployed. The air bag struck Joseph in his left ear, arm, and shoulder causing trauma injuries including hearing loss, tinnitus, and other serious injuries. The vehicle had previously been recalled for faulty side airbags, and after its repair was warranted to Joseph as being free from defect and suitable for

purchase. However, the vehicle was not suitable for use, and was sold to Joseph despite the defective airbag mechanism.

11. Edwin Agosto was driving his 2000 Chevrolet Blazer on September 22, 2008, when he lost control of his vehicle causing him to cross the center line and strike a tree. After striking the tree, the car once again crossed the center line and collided with a guardrail where it finally came to rest. Edwin's airbags failed to deploy throughout the course of the entire accident. Because of that failure, Edwin suffered injuries including multiple spinous process fractures, a heavily comminuted fracture of the left scapula extending into his scapular spine and glenoid, multiple rib fractures, a humerus fracture, a subclavian vein injury, and a post traumatic subdural hygroma upon striking his head on the windshield. Due to these injuries, Edwin spent the next two and a half months of his life in a coma.

12. On July 4, 1994, Kevin Chadwick was driving his 1988 Chevrolet Beretta when a pick up truck ran a stop sign, and the vehicles crashed. The truck driver was killed and Kevin was paralyzed from the neck down. The injury was caused by a defective seat belt and a defectively designed hood latch and hood hinge system which allowed the hood to invade the passenger compartment and strike Kevin in the head causing the brain injury.

13. Callan Campbell, the Junso family, Joseph Berlingieri, Edwin Agosto and Chadwick Family all share one common bond—they have all been injured by a product defect in a GM vehicle. As a result of such injuries, each claimant has sustained damages and as such each claimant deserves their day in court to seek retribution for those damages. A sale of GM's assets free and clear of all claims of successor liability would deprive these individuals and tens of thousands more like them of the chance to seek justice for the wrongs that have been committed against them.

14. The foregoing parties are just a few of the many people who would be adversely affected by a sale free and clear of successor liability claims against the Purchaser. More than 69 million GM passenger vehicles are on American roads today. In 2007, according to the National Highway Traffic Safety Administration's Fatal Analysis Reporting System, 9,985 occupants of GM vehicles were killed in fatal accidents; and a total of 14,828 people were killed that year as a result of motor vehicle crashes involving GM vehicles. Many thousands more are injured each year in GM vehicles. Many of these vehicles contain certain defects that have and will continue to be the subject of product liability lawsuits, including due to injuries and deaths from crushed roofs, exploding "side saddle" gas tanks, and collapsing seat backs.[2]

Relief Requested

15. Through this objection, the Objectors ask the Court to respect the jurisdictional boundaries of the Court and the statutory directives of Congress and deny the Debtors' request to bar present and future product liability claimants from pursing claims against the Purchaser post-closing under applicable state law theories of successor liability.

16. GM claims in its Sale Motion that the "363 Transaction is the only realistic alternative for the Company to avoid liquidation of its assets," the "Purchaser is the only entity capable of purchasing the Purchased Assets and closing the 363 Transaction," and that, "in the exercise of sound business judgment . . . the 363 Transaction is the only means of preserving value and continuing the transformed business for the benefit of all economic stakeholders and in the national interest." Sale Motion at pp 6-7, 14. The Objectors do not deny that the 363 sale itself is necessary or proper; their objection is limited to the requested findings and orders

[2] Extensive background information on the nature of, and litigation associated with, design defects on these particular design defects can be found at http://www.autosafety.org/general-motors-roof-crush-lawsuits (crushed roof cases), http://www.autosafety.org/general-motors-ck-fuel-fed-fire-litigation ("side saddle" gas tank cases), and http://www.autosafety.org/general-motors-seat-back-collapse-litigation-0 (seat back collapse cases).

intended to bar present and future product liability claims against the successor Purchaser under state law theories of successor liability.

17. For the reasons set forth below, and in our supporting Memorandum of Law, the Objectors request that the Court strike or modify as appropriate the following provisions affecting the product liability claimants' rights to pursue successor liability claims against the Purchaser under state law:

a. Provisions providing that the sale is "free and clear" of successor liability claims or that the Purchaser shall not be liable for successor liability claims. Sale Order ¶¶ T, 7-9, and 29; MPA Section 9.19 ("neither Purchaser nor any of its Affiliates or stockholders shall be liable for any Claims against Sellers or any of their predecessors or Affiliates, and neither Purchaser nor any of its Affiliates or stockholders shall have any successor, transferee or vicarious Liability of any kind or character whether known or unknown as of the Closing, whether now existing or hereafter arising, or whether fixed or contingent, with respect to Sellers' business or any obligations of Sellers arising prior to the Closing.");

b. Provisions enjoining successor liability actions against the Purchaser. Sale Order ¶¶ 13 and 28;

c. Provisions containing factual findings related to successor liability. Sale Order ¶¶ V, 27 and 38; MPA Section 9.19 ("neither Purchaser nor any of its Affiliates or stockholders shall be deemed to (a) be the successor of Sellers; (b) have, de facto, or otherwise, merged with or into Sellers; (c) be a mere continuation or substantial continuation of Sellers or the enterprise(s) of Sellers; or (d) other than as set forth in this Agreement, be liable for any acts or omissions of Sellers in the conduct of Sellers' business or arising under or related to the Purchased Assets."); and

d. Any other provision attempting to extinguish the Purchaser's successor liability, enjoin successor liability actions, or make binding findings of fact with regard to elements of state law successor liability claims.

18. GM's attempt to enjoin successor liability claims against the Purchaser must be denied because it violates applicable law, notice, and due process requirements. The legal basis for such a denial is summarized briefly below and set forth in detail in the supporting Memorandum of Law, filed contemporaneously herewith.

a. § 363 does not extend to successor liability choses in action. The plain language of § 363(f), which describes what is released as part of a "free and clear" sale under that section, only applies to "interests in property." This phrase is used throughout the Code, and thus should have the same meaning throughout;

b. The Court should decline to follow the *Chrysler* court's opinion authorizing a sale "free and clear" of successor liability choses in action because the court in *Chrysler* misapplied the case law and adopted inconsistent policies.

c. The Court lacks subject matter jurisdiction under 28 U.S.C. § 1334 to enjoin post-closing disputes between personal injury claimants and the Purchaser. The Court cannot exercise "related to" jurisdiction because such an exercise of jurisdiction is inappropriate where the action the court seeks to enjoin is unrelated to the *res* of the bankruptcy estate. Here, the outcomes of any actions brought by the personal injury claimants against the Purchaser would leave the *res* of the Debtors' estates wholly untouched;

d. The Court does not have authority to make non-core factual findings regarding elements of state law successor liability claims. GM's sale motion seeks factual findings regarding the status of the Purchaser post-sale without providing any factual basis for the findings. In any case, the Court does not have authority to make non-core, advisory rulings on facts that are not yet in existence;

e. The Purchased Assets cannot be sold "free and clear" of successor liability for future tort and product liability claims because—even if this Court were to conclude that *current* claims could be categorized as "interests in property" under § 363—the Court cannot draw the same conclusion regarding *future* interests in property. People who have not yet suffered an injury or a loss cannot have an interest in GM's property because the injuries that would lead them to have such an interest have not yet occurred; and

f. A sale of GM's assets "free and clear" of future tort and product liability claims violates due process because people who have not yet suffered injury from defects in GM vehicles do not know that they will be injured in the future cannot be given meaningful notice that their rights are being adjudicated or a meaningful opportunity to be heard.

WHEREFORE, for the foregoing reasons, and for those stated in the Objectors' accompanying Memorandum of Law in Support, the Objectors respectfully request that this Court deny the Debtors' motion to sell its assets free and clear of all successor liability claims and enter such other and further relief as this Court deems just and proper.

Dated: June 19, 2009

Callan Campbell ("Campbell"), Kevin Junso, *et al.* ("Junso"), Edwin Agosto ("Agosto"), Kevin Chadwick, *et al.* ("Chadwick"), and Joseph Berlingieri ("Berlingieri," together with Campbell, Junso, Agosto, and Chadwick, the "Products Liability Claimants"), and the Center for Auto Safety, Consumer Action, Consumers for Auto Reliability and Safety, National Association of Consumer Advocates, and Public Citizen (collectively, the "Consumer Organizations," and together with the Product Liability Claimants, the "Products Liability Claimant Advocates"), by and through their respective attorneys, submit this Memorandum of Law in support of their limited objection to the motion (the "363 Motion") of General Motors and certain of its subsidiaries (collectively, "GM" or "Debtors") for an order authorizing the sale of certain assets, including its Continuing Brands, to Vehicle Acquisition Holdings LLC, a U.S. Treasury-sponsored purchaser (the "Purchaser").[1]

PRELIMINARY STATEMENT

More than 69 million GM passenger vehicles are on American roads today. In 2007, according to the National Highway Traffic Safety Administration's Fatal Analysis Reporting System, 9,985 occupants of GM vehicles were killed in fatal accidents; and a total of 14,828 people were killed that year as a result of motor vehicle crashes involving GM vehicles. Many thousands more are injured each year in GM vehicles. Many of these vehicles contain certain defects that have and will continue to be the subject of product liability lawsuits, including due to injuries and deaths from crushed roofs, exploding "side saddle" gas tanks, and collapsing seat backs.[2]

---

[1] Capitalized terms used herein and not otherwise defined shall have the meaning set forth in the Product Liability Claimant Advocates' limited objection, the Debtors' 363 Motion, or the Master Purchase Agreement ("MPA") attached to the 363 Motion.

[2] Extensive background information on the nature of, and litigation associated with, design defects on these particular design defects can be found at http://www.autosafety.org/general-motors-roof-crush-

GM states in the 363 Motion that the sale "must be free and clear" of "rights or claims based on any successor or transferee liability." (363 Motion at 32-33). No business justification has been articulated, however, as to why the Purchaser is entitled to such relief, particularly when the "New GM" will look and operate much like the "Old GM" in the Continuing Brand businesses, and thus potentially satisfy the "mere continuation," "continuity of enterprise," or "product line exception" tests for successor liability under the laws of various states.

Although shedding potential successor liability claims provides expediency, it's not permitted under Bankruptcy Code section 363(f), which authorizes the sale of property free and clear only of "interests in" property to be sold, not *in personam* claims against the Purchaser under theories of successor liability. And while the *Chrysler* court authorized such relief in the sale of Chrysler's assets in the transaction with Fiat, if the Court undertakes its own independent analysis of *Chrysler's* reasoning, it will conclude that *Chrysler* was wrongly decided on this point of law and that the cases it relied upon were flawed.

The Court should not approve the sale free and clear of successor liability claims for two additional reasons. First, this Court lacks jurisdiction to enjoin actions between non-debtor product liability claimants and the Purchaser post-closing since resolution of these claims will not affect the Debtors' estates. Second, due process does not permit debtors and purchasers to use a Section 363 sale to extinguish future claims that have not yet accrued because the injuries on which they will be based have not yet occurred. People who will one day have such claims cannot have received meaningful notice that the bankruptcy proceeding was resolving their rights or a meaningful opportunity to protect those rights, which otherwise might allow a state law cause of action for their injuries.

---

lawsuits (crushed roof cases), http://www.autosafety.org/general-motors-ck-fuel-fed-fire-litigation ("side saddle" gas tank cases), and http://www.autosafety.org/general-motors-seat-back-collapse-litigation-0 (seat back collapse cases).

Foreclosing the ability to hold the successor Purchaser liable under state successor liability laws will harm thousands of people who have been or will be injured in vehicles represented by the Continuing Brands. Victims of vehicle accidents attributable to defects are injured in often life-changing ways. They may have incurred staggering medical bills because of the physical injuries they have suffered, lost income because of the time they could not work, and/or suffered the loss of family members in devastating accidents. They should not be deprived of the opportunity, because of expediency, to have their day in court as to whether the Purchaser, under the laws of the several states, remains liable for the injuries, pain, and suffering they endure.

STATEMENT OF FACTS

The Product Liability Claimant Advocates refer the Court to, and incorporate herein, the background facts set forth in their limited objection to the 363 Motion, filed contemporaneously herewith.

ARGUMENT

I. Neither the language of § 363(f) nor the policy underlying it authorize a sale "free and clear" of a product liability claimant's potential successor liability claims.

A. § 363(f)'s plain meaning does not extend to successor liability choses in action.

Code section 363(f) provides, in relevant part, that "the trustee may sell property ... free and clear of any interests in such property." Analyzing whether § 363(f) authorizes a sale "free and clear" of a products liability claimant's state law successor liability claims "begins where all such inquiries must begin: with the language of the statute itself." *United States v. Ron Pair Enters., Inc.,* 489 U.S. 235, 241 (1989).

The issue here turns on the phrase "*interests in such property*," the statutory language that describes what is released as part of a "free and clear" sale under § 363(f). In considering

the meaning of this phrase, the Court should presume that "equivalent words have equivalent meaning when repeated in the same statute." *Cohen v. de la Cruz*, 523 U.S. 213, 220 (1998) (*citing Ratzlaff v. United States*, 510 U.S. 135, 143 (1994) ("A term appearing in several places in a statutory text is generally read the same way each time it appears.")). As set forth in the attached **Exhibit A**, the phrase "interest(s) in property" appears 40 times in the Code. Notably, not once can the phrase "interest in property" be substituted with the word "claim" and make any sense. In this regard, the Seventh Circuit's opinion in *Precision Indus., Inc. v. Qualitech Steel SBQ, LLC (In re Qualitech Steel Corp.)*, 327 F.3d 537 (7th Cir. 2003), is instructive. There, after citing to other times the phrase "interest in property" is used in the Code, the Court held that a leasehold was an "interest in property" because it was "not simply a right that is connected to or arising from the property, … but a (limited) right to the property itself." *Id.* at 545-46 (7th Cir. 2003) (disagreeing with the 3rd Circuit's holding in *In re TWA*, 322 F.3d 283 (3d Cir. 2003)).

Notably, § 363(f) does not mention the word "claim." In contrast, § 1141(c) of the Bankruptcy Code provides that "property dealt with by the plan is free and clear of all *claims and interests* ... *in* the debtor." (Emphasis added). Section 363 and 1141(c) are two mechanisms for transfer of estate property (one through a sale, the other through a plan). The difference between the words chosen by Congress in these two closely related sections shows that Congress did not intend a sale under § 363(f) to be free and clear of "*claims*," but only of "*interests in* such property" because "'it is generally presumed that Congress acts intentionally and purposely' when it 'includes particular language in one section of a statute but omits it in another.'" *City of Chicago v. Environmental Defense Fund,* 511 U.S. 328, 338 (1994) (*quoting Keene Corp. v. United States,* 508 U.S. 200, 208 (1993)); *see also N.L.R.B. v. Bildisco & Bildisco,* 465 U.S. 513, 523 (1984) (where language in one provision shows that Congress knows how to draft to effect a

particular outcome, its failure to use that language elsewhere indicates that Congress intended not to effect that outcome); *Greene v. United States*, 79 F.3d 1348, 1355 (2d Cir. 1996) ("The ancient maxim *expression unius est exclusio alterius* (mention of one impliedly excludes others) cautions us against engrafting an additional exception to what is an already complex [statutory scheme]."). Moreover, interpreting the term "interest" to include "claim" would render the term "claim" in § 1141(c) superfluous. "'It is a cardinal principle of statutory construction,' that 'a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void or insignificant.'" *TRW, Inc. v. Andrews*, 534 U.S. 19, 31 (2001) (quoting *Duncan v. Walker*, 533 U.S. 167, 174 (2001)).

In addition, Congress had the opportunity to change the Code in considering the National Bankruptcy Review Commission's 1997 recommendation that the differences between § 363(f) and § 1141(c) be reconciled by expanding the "free and clear" language of § 363(f) to mirror the language of § 1141(c).[3] Yet, Congress chose not to do so. Notably, in making this recommendation, the Commission explained that "the difference in language between [the] two sections raises a concern that the scope of protection regarding transfers pursuant to asset sales is narrower than the protection afforded to transfers pursuant to a plan of reorganization."[4] Yet in 2005, when Congress enacted massive revisions to the Code, both technical and substantive, it did not amend § 363 to expand the "free and clear" language to encompass "claims" generally

---

[4] *Id.* (*see* ID NRBC-0189, recommendation of Marcia L. Goldstein on behalf of the NYC Bar Ass'n, Comm. on Bankr. and Corp. Reorg., *identifying* the "PROBLEM REFERENCED" ("Sections 1141(c) and 363(f) contain incompatible language with regard to asset sales.... The difference in language between [363(f) and 1141(c)] raises a concern that the scope of protection regarding transfers pursuant to asset sales is narrower than the protection afforded to transfers pursuant to a plan of reorganization.") *and* the "PROPOSED SOLUTION" ("Section 363(f) should be amended to provide that property can be sold under this section 'free and clear of all claims and interests of creditors, equity security holders, and of general partners in the debtor.'").

that might have some connection with the property sold. *See Conn. Nat'l Bank v. Germain,* 503 U.S. 249, 253-54 (1992) ("We have stated time and again that courts must presume that a legislature says in a statute what it means and means in a statute what it says there.").

The Court also should look to pre-Code practice for guidance in interpreting § 363(f)'s reference only to "interests in property" and not to "claims" generally. *Dewsnup v. Timm,* 502 U.S. 410, 419 (1992) ("When Congress amends the bankruptcy laws, it does not write 'on a clean slate.'"). As noted by the late Chief Judge Brozman in *Shearson Lehman Hutton, Inc. v. Schulman (In re Schulman),* 196 B.R. 688 (Bankr. S.D.N.Y. 1996):

> The normal rule of statutory construction is that if Congress intends for legislation to change the interpretation of a judicially created concept, it makes that intent specific. *Midlantic Nat'l Bank v. New Jersey Dep't of Environ. Protection,* 474 U.S. 494, 501 (1986). This rule is followed with particular care in construing the Bankruptcy Code [which] should not be read to abandon past bankruptcy practice absent a clear indication that Congress intended to do so. *Pennsylvania Public Welfare Dep't v. Davenport,* 495 U.S. 552, 563 (1990). Thus, where the text of the Code does not unambiguously abrogate the pre-Code practice, court should presume Congress intended it to continue unless the legislative history dictates a contrary result. *Dewsnup v. Timm,* 502 U.S. 410, 418-20.

Schulman, 196 B.R at 697 n.10.

In *MacArthur Co. v. Johns-Manville Corp. (In re Johns-Manville)*, 837 F.2d 89 (2d Cir. 1988), the Second Circuit expounded on the pre-Code authority of a bankruptcy court "to approve settlements and to channel claims arising under the [insurance] policies to the proceeds of the settlement." *Id.* at 93. Notably, in each of the four examples given, the property was transferred free of true interests or encumbrances, but not of *in personam* claims. *Id.* Moreover, in the only case cited in which assets were sold free and clear of simple claims (civil rights claims, in particular), the Second Circuit affirmed the lower court's ruling *not* on the basis that a bankruptcy trustee has authority to sell assets free and clear of claims, but rather because there

was in fact "no basis for plaintiff's claim" to hold the successor employer liable under the "substantial continuity of identity" test for successor liability. *Forde v. Kee-Lox Mfg. Co., Inc.*, 584 F.2d 4, 5-6 (2d Cir. 1978). In sum, therefore, nothing in pre-Code practice establishes the notion that bankruptcy sales can be effectuated free and clear of claims against the purchaser based on theories of successor liability.

The legislative history to § 363(f) is also instructive in two ways. First, it establishes, consistent with the judicial presumptions and pre-Code practice described above, that the new proposed Code section on "sales free of interests of third persons" "codifies case law insofar as it recognizes the right of the trustee to sell property of the estate free and clear of liens and other interests that can be reduced to dollars." H.R. Doc. No. 93-137, 93rd Cong., 1st Sess., § 5-203 (Sale of Property of the Estate), note 2 (*available at* Appx. Vol. B, COLLIER ON BANKRUPTCY, at App. Pt. 4-764 (15th ed. rev. 2008)). The legislative history makes no reference to such sales being washed free of *in personam* claims for successor liability. Second, the legislative history cannot sensibly be read to include the notion that a bankruptcy sale can be ordered free and clear of *in personam* claims. Both the final House and Senate Reports on Section 363 provide:

> At a sale free and clear of other interests, any holder of any interest in the property being sold will be permitted to bid. If that holder is the high bidder, he will be permitted to offset the value of his interest against the purchase price of the property.

H.R. 8200, 9th Cong., 1st Sess., § 363 (1977) (*available at* Appx. Vol. C, COLLIER ON BANKRUPTCY, at App. Pt. 4-1478 (15th ed. rev. 2008)); S. 2266, 95th Cong., 1st Sess., § 363 (1977) (*available at* Appx. Vol. D, COLLIER ON BANKRUPTCY, at App. Pt. 4-1996 (15th ed. rev. 2008)). One cannot substitute "claims against" for "interest in" and make any sense of the rights of such holder; it would be absurd to argue that a holder of a general unsecured claim has a right

to credit bid its claims in an auction and "offset the value of his [claims] against the purchase price of the property."

Further support that § 363(f)'s use of the term "interests in property" does not include *in personam* claims for successor liability is found in *Butner v. United* States, 440 U.S. 48 (1979), which is best known for the proposition that—except where Congress has specifically chosen to exercise its power to fashion applicable rules of bankruptcy law—"Congress has generally left the determination of property rights in the assets of a bankrupt's estate to state law." *Butner* states:

> Property interests are created and defined by state law. Unless some federal interest requires a different result, there is no reason why such interests should be analyzed differently simply because an interested party is involved in a bankruptcy proceeding. Uniform treatment of property interests by both state and federal courts within a State serves to reduce uncertainty, to discourage forum shopping, and to prevent a party from receiving "a windfall merely by reason of the happenstance of bankruptcy."

Id. at 55 (citation omitted).

Barnhill v. Johnson, 503 U.S. 393 (1992), took *Butner* one step further. In holding that the "transfer" of an "interest in property" had occurred at the time the debtor's check was honored, not at the time the check was delivered, *Barnhill* establishes that a "nebulous right to bring suit" is not an "interest in property":

> There is thus some force in petitioner's claim that he did, in fact, gain something when he received the check. But at most, what petitioner gained was a chose in action against the debtor. Such a right, however, cannot fairly be characterized as a conditional right to "property ... or an interest in property," where the property in this case is the account maintained with the drawee bank. For as noted above, until the moment of honor the debtor retains full control over disposition of the account and the account remains subject to a variety of actions by third parties. **To treat petitioner's nebulous right to bring suit as a "conditional transfer" of the property would accomplish a near-limitless expansion of the term "conditional." In the absence of any right against the bank or the account, we think the fairer description is that petitioner had received no interest in debtor's property, not that his interest was "conditional."**

Id. at 400-401 (emphasis added). Also instructive is *United Savings Assn. of Texas v. Timbers of Inwood Forest Assocs., Ltd.*, 484 U.S. 365 (1988), which held that "the 'interest in property' protected by § 362(d)(1) does not include a secured party's right to immediate foreclosure." *Id.* at 371.

Reading "interest in property" as broadly as the Debtors request in their Motion, however, would contravene the holdings of *Barnhill* and *Timbers* each of those cases involved the same kind of "nebulous right" or "chose in action" that the Debtors here are seeking to enjoin through its proposed "free and clear" sale, yet in neither of those cases were those rights considered "interests in property."

B. The Court should decline to follow the *Chrysler* court's opinion authorizing a sale "free and clear" of successor liability choses in action.

In the recent decision in *In re Chrysler,* 405 B.R. 84 (Bankr. S.D.N.Y. May 31, 2009), the court held that tort claims are "interests in such property" under § 363(f). As explained below, that decision was incorrect for several reasons. First, a narrower reading that would exclude *in personam* choses in action from the coverage of "interests in property" under § 363(f) is amply supported by a long line of cases, including *In re White Motor Credit Corp.,* 75 B.R. 944 (Bankr. N.D. Ohio 1987), and *Rubinstein v. Alaska Pacific Consortium (In re New England Fish Co.),* 19 B.R. 323 (Bankr. W.D. Wash. 1982). The *Chrysler* decision cited these cases as authority for extending § 363(f)'s coverage to *in personam* choses in action, but in fact, these cases support the *opposite* conclusion. *See White Motor,* 75 B.R. 948 ("General unsecured claimants, including tort claimants, have no specific interest in a debtor's property. Therefore, section 363 is inapplicable for sales free and clear of such claims."); *Rubinstein*, 19 B.R. at 326 (Title VII claimants are general unsecured creditors who lack "an interest in the specific property of the estate being sold" under § 363(f)).

American Living Sys. v. Bonapfel (In re All Am. Of Ashburn, Inc.), 56 B.R. 186 (Bankr. N.D. Ga. 1986), upon which the *Chrysler* court also relied, did not conclude that *in personam* claims are "interests in property" for purposes of § 363(f). Rather, like *White Motor* and *Rubinstein*, that case was decided without a single reference to the section's "interest in property" language. *Id.* at 190.

In fact, almost every case that has closely examined the language, history, and policies of § 363(f) has concluded that the section does not authorize sales "free and clear" of *in personam* choses in action for successor liability.[5] *In re TWA*, 322 F.3d 283 (3d Cir. 2003), on which the *Chrysler* court relied, is one of the few exceptions. *See also United Mine Workers of Am. 1992 Benefit Plan v. Leckie Smokeless Coal Co. (In re Leckie Smokeless Coal)*, 99 F.3d 573 (4th Cir. 1996) (upon which *TWA* relies).

For example, in the Seventh Circuit case of *Precision Indus., Inc. v. Qualitech Steel SBQ, LLC (In re Qualitech Steel Corp.)*, 327 F.3d 537 (7th Cir. 2003), Judge Posner, writing for a unanimous panel, held that § 363(f)'s reference to "any interest" was "sufficiently broad to

---

[5] Federal cases include *Michigan Empl. Sec. Comm. v. Wolverine Radio Co., Inc. (In re Wolverine Radio Co.)*, 930 F.2d 1132, 1147 n. 23 (6th Cir. 1991) (relying upon *White Motor* to "reject Wolverine's argument that general unsecured interests fall within the scope of those interests that can be discharged pursuant to section 363(f)"); *Kattula v. Republic Bank (In re LWD, Inc.)*, No. 5:08-CV-121-R, 2009 WL 367738 at *4 (W.D. Ky. Feb. 12, 2009) (free and clear language of § 363 sale order enjoining successor liability claims "applies only to estate property … and does not contemplate protection against personal liability claims"); *Miller v. Level 3 Comms., LLC,* No. 03-4451, 2005 WL 1529419 at *9 (D.N.J. June 29, 2005) ("the Bankruptcy Court [free and clear sale] Order may not defeat application of the eight factors set forth by the Secretary of Labor [for evaluating whether an employer qualifies as a successor in interest for purposes of the Act"); In *re Eveleth Mines, LLC*, 312 B.R. 634 , 654 (Bankr. D. Minn. 2004) ("In the last instance, the reasoning of the [*TWA* and *Leckie*] opinions fails on an alternate basis: they do not take the inquiry back to where it belongs, the governance of state law in the defining of "interest."); *Fairchild Aircraft Corp. v. Cambell (In re Fairchild Aircraft Corp.)*, 184 B.R. 910, 918 (Bankr. W.D. Tex. 1995), *vacated as moot on equitable grounds,* 220 B.R. 909 (W.D. Tex. 1998) ("Were we to allow 'any interests' to sweep up *in personam* claims … we would render the words 'in such property' a nullity. No one can seriously argue that *in personam* claims have, of themselves, an *interest in property.*").

State cases include: *Kattula v. Republic Bank*, 2008 WL 4606076 (Mich. App. Oct. 7, 2008) ("Section 363(f) is not intended to extinguish *in personam* liabilities."); *Lefever v. K.P. Hovnanian Enters., Inc.* 160 N.J. 307, 320 (N.J. 1999) (products liability claimant had no "interest" in the sense of a lien or encumbrance on the property); *Gross v. Trustees of Columbia Univ.,* 816 N.Y.S. 2d 695 (N.Y. Sup. Ct. 2006) (follows *Lefever* in case applying NJ law).

include Precision's possessory interest as lessee." In rejecting *TWA*'s more expansive definition of "any interest" as meaning "a right that is connected to or arising from the property," he stated:

> The Bankruptcy Code does not define "any interest," and in the course of applying section 363(f) to a wide variety of rights and obligations related to estate property, courts have been unable to formulate a precise definition. *Folger Adam Security, Inc. v. DeMatteis/MacGregor, JV,* 209 F.3d 252, 258 (3d Cir. 2000).... [We] conclude that the term "any interest" as used in section 363(f) is sufficiently broad to include Precision's possessory interest as a lessee. BLACK'S defines "interest" to mean "[a] legal share in something; all or part of a legal or equitable claim to or right in property." BLACK'S LAW DICTIONARY, 816 (7th ed. 1999). The right that a leasehold confers upon the lessee is one to possess property for the term of the lease. **It is, therefore, not simply a right that is connected to or arising from the property**, *see In re Trans World Airlines, Inc.,* 322 F.3d 283, 289-90 (3d Cir.2003), **but a (limited) right to the property itself**. That right readily may be understood as an "interest" in the property. This inclusive interpretation of the phrase "any interest" is consistent with the expansive use of that same phrase in other provisions of the Code. *See, e.g.,* 11. U.S.C. § 541(a)(3), (4), (5), and (7) (identifying various interests comprising property of the estate).

Qualitech Steel., 327 F.3d at 545-46 (emphasis added); *see also Zerand-Bernal Group, Inc. v. Cox*, 23 F.3d 159, 163 (7th Cir. 1994) (in holding that bankruptcy court had no jurisdiction over post-confirmation products liability claim, stating: "It is true that [the debtor's] assets were sold to [the purchaser] free from all liens and other encumbrances. And such a cleansing of the assets in the bankruptcy sale is a valid power of a bankruptcy court, 11 U.S.C. §§ 363(f), 1141(c). But the [claimants] are not attempting to enforce a lien.").

Thus, the *Chrysler* court erred in following *TWA* and authorizing the sale of Chrysler's assets free and clear of potential *in personam* or successor liability claims against New Chrysler. In *TWA*, the Third Circuit affirmed a bankruptcy court's order that a 363 sale to American Airlines of TWA's operating assets would be "free and clear" of both pending employment discrimination claims and rights under a travel voucher program established in settlement of a sex discrimination action initiated by TWA's flight attendants. However, not only did *TWA*

misinterpret the phrase "interests in property" in § 363, but it —and *Leckie Smokeless Coal*,[6] the case upon which it primarily relies—failed to articulate coherent policy grounds authorizing such sales "free and clear" of all such claims.

As explained in *In Eveleth Mines, LLC*, 312 B.R. 634 (Bankr. D. Minn. 2004), the problem with both *TWA* and *Leckie* is that they "are built on an amorphously inclusive rationalization [that] posits a loose sort of 'but-for' causality that is thrown up to identify the straw-built 'interest' that then is vanquished." *Id.* at 654.

TWA and *Leckie* adopt tortured reasoning to shoehorn the claim at issue into an "interest in property" that can be wiped out in a "free and clear" sale under § 363(f). They both reason that the successor liability claims at issue were an "interest in" the property transferred because had the debtor not deployed the assets sold in the particular manner that subjected it to the particular claim at issue, then the claimants would have had no claim upon which the successor could be liable. *See TWA,* 322 F.3d at 290 ("Had TWA not invested in airline assets, which required the employment of the EEOC claimants, those successor liability claims would not have arisen. Further, TWA's investment in commercial aviation is inextricably linked to its employment of the … claimants … and its ability to distribute travel vouchers as part of the settlement agreement."); *Leckie Smokeless Coal*, 99 F.3d 573, 582 ("[I]f Appellees had never elected to put their assets to use in the coal-mining industry, and had taken up business in an altogether different area, the Plan and Fund would have no right to seek premium payments from them.").

---

[6] *United Mine Workers of Am. 1992 Benefit Plan v. Leckie Smokeless Coal Co. (In re Leckie Smokeless Coal)*, 99 F.3d 573 (4th Cir. 1996) (debtor's assets could be sold "free and clear" of obligations under the Coal Industry Retiree Health Benefit Act of 1992, which imposed joint and several liability on any "successor in interest" to a covered coal producer).

This interpretation of "interest in such property," however, would render the phrase meaningless as it would be all-encompassing. After all, hardly any claim arises other than as a result of the debtor's particular use of the assets. And as Justice Scalia warned in writing for the majority in *BFP v. Resolution Trust Corp.*, 511 U.S. 531 (1994), a court should not "torture [the text] into meaning" for "such word-gaming would deprive the criterion of all meaning." *Id.* at 538 n.4.

Moreover, the *Eveleth Mines* court rightly stated, the reasoning of *TWA* and *Leckie Smokeless Coal* fails because "they do not take the inquiry back to where it belongs, the governance of state law in the defining of 'interest'." *Eveleth Mines*, 312 B.R. at 654. "As recognized in *Butner*," the *Eveleth Mines* court concluded, "this is a matter of federalism." *Id.* (*citing Butner*, 440 U.S. at 52-56).

Equally flawed are the policy considerations relied upon by *TWA* and *Chrysler* in permitting sales free and clear of successor liability claims against the purchaser. According to *TWA*, "allowing the claimants to seek a recovery from the successor entity while creditors which were accorded higher priority by the Bankruptcy Code obtained their recovery from the limited assets of the bankruptcy estate would 'subvert the specific priorities which define Congressional policy for bankruptcy distribution to creditors.'" *TWA*, 322 F.3d at 292 (*quoting New England Fish Co.*, 19 B.R. at 329). Such a *per se* rule, however, was rejected by the Seventh Circuit in *Chicago Truck Drivers, Helpers and Warehouse Workers Union Pension Fund v. Tasemkim,* 59 F.3d 48 (7th Cir. 1995), which stated:

> What imposition of successor liability would accomplish, and what the district court objected to, would be a second opportunity for a creditor to recover on liabilities after coming away from the bankruptcy proceeding empty-handed. But a second chance is precisely the point of successor liability, and it is not clear why an intervening bankruptcy proceeding, in particular, should have a *per se* preclusive effect on the creditor's chances.... Instead of being dispositive, however, the availability of relief

> from the predecessor is a factor to be considered along with other facts in a particular case. Here, those facts include the apparent nature of the acquisition of Old Tasemkin by New Tasemkin-which clearly had the effect, intended or not, of frustrating unsecured creditors while resurrecting virtually the identical enterprise.

Id. at 51. *Cf. Anderson v. J.A. Interior Applications, Inc.*, No. 97-4552, 1998 WL 708851 (N.D. Ill. 1998) (rejecting concerns that successor claimants will elevate their priority rights by noting that "[c]reditors ahead of plaintiffs in the bankruptcy proceedings are thus entitled to the same distribution of assets regardless of whether plaintiffs recover anything from [the debtor's] successor").

TWA and *Chrysler* also rely on the notion that "the policy underlying section 363(f) is to allow a purchaser to assume only the liabilities that promote its commercial interests." *Chrysler,* 405 B.R. at 111 (citing *New England Fish Co.* and *White Motor Credit*); *TWA,* 322 F.3d at 292-93 ("Absent entry of the Bankruptcy Court's order providing for a sale of TWA's assets free and clear of the successor liability claims at issue, American may have offered a discounted bid."). But here, the proposed sale is being effected primarily through a credit bid by GM's senior secured lender of its debt, and no less consideration would flow to the estate if product liability claims were allowed to go forward in states that allow such actions to be pursued against successor purchasers of the assets. Regardless, it is inappropriate to release claims against a non-debtor just because of its contributions to the debtor's estate. *See Johns-Manville Corp. v. Chubb Indem. Ins. Co. (In re Johns-Manville Corp.)*, 517 F.3d 52, 65 (2d Cir. 2008) (*citing In re Karta Corp.,* 342 B.R. 45, 55 (S.D.N.Y. 2006) ("[C]onditioning of financial participation by non-debtors on releases ... is subject to ... abuse.")), *rev'd on other grounds, Travelers Indemnity Co. v. Bailey*, No. 08–295, 2009 WL 1685625 (June 18, 2009).[7] *cf., Tasemkim,* 59

[7] On June 18, 2009, the Supreme Court reversed the Second Circuit's 2008 decision in *Johns-Manville*, but only based on the "narrow" grounds that once the bankruptcy court's orders of 1986 became final on direct review, they became *res judicata* as to the parties. *Bailey*, 2009 WL 1685675, at *11. The narrowness of the holding, coupled

F.3d at 50-51 ("[T]he potential for chilling does not vary as a function of a company's precise degree of distress, and there is no reason to accord the purchasers of formally bankrupt entities some special measure of insulation from liability that is unavailable to ailing but not yet defunct entities."); *Zerand-Bernal Group, Inc. v. Cox*, 23 F.3d 159, 163 (7th Cir. 1992) (extinguishing state law rights in order to increase the value of the debtors' property "would not only [] harm [] third parties..., but [would provide an] incentive to enter bankruptcy for reasons that have nothing to do with bankruptcy").

In sum, the Code's plain meaning does not support the result sought by GM here. Although the proposed sale is presented as a needed step to preserve a company important to the U.S. economy, "it was and is for the legislature to pass on [these] policy choice[s] ... [for] the job of the courts is limited to ascertaining what policy choice Congress *did* make, not what policy choice Congress *should have* made."[8] *Fairchild Aircraft*, 184 B.R. at 919 (emphasis in original); *see also Raleigh v. Illinois Dep't of Revenue*, 530 U.S. 15, 24-25 (2000) ("Bankruptcy courts are not authorized in the name of equity to make wholesale substitution of underlying law controlling the validity of creditors' entitlements, but are limited to what the Bankruptcy Code itself provides.").

---

with the absence of any disagreement by the majority with the categorical statement in Justice Stevens' dissent that "the bankruptcy court has no authority ... to adjudicate, settle, or enjoin claims against nondebtors that do not affect the debtor's estate," strongly suggests that were the issue on the bankruptcy court's authority to enjoin actions between—and release claims against—non-debtors again presented to the Second Circuit, its holding and rationale on this issue would not change. *See Bailey,* 2009 WL 1685675, at *14 (Stevens, J., *dissenting*).

[8] As noted by the *Ad Hoc* Committee of Tort Claimants, however, "New GM's viability is not dependent on New GM avoiding its liability for tort claims. If it was, GM and the U.S. Treasury would not have consented to an out-of-court reorganization under which tort claims would have survived." (Docket No. 1997, ¶ 35). The Debtors agree, noting that these cases are not "asbestos-driven" (or, presumably, "tort claim-driven") cases. (Docket No. 1915, ¶ 27).

II. The Court lacks subject matter jurisdiction over post-closing disputes between products liability claimants and the successor Purchaser.

Bankruptcy courts are courts of limited jurisdiction. Under § 1334(b), district courts have original jurisdiction over civil proceedings "arising under" title 11 or "arising in" or "related to" a case under title 11. The district courts may in turn refer such cases to the bankruptcy judges for that district. 28 U.S.C. § 157(a).

GM is asking the Court to exercise jurisdiction to enjoin product liability claimants from bringing successor liability claims against the Purchaser after the § 363 sale closes. This Court, however, does not have the subject-matter jurisdiction under 28 U.S.C. § 1334 to enjoin such suits because the outcomes of such actions are unrelated to this bankruptcy proceeding. "Related to" jurisdiction exists when:

> [T]he *outcome of that proceeding could conceivably have any effect on the estate being administered in bankruptcy* . . . . An action is related to the bankruptcy if the outcome could alter the debtor's rights, liabilities, options, or freedom of action (either positively or negatively) and which in any way impacts the handling and administration of the bankrupt estate.

Celotex Corp. v. Edwards, 514 U.S. 300, 308 n.6 (1995) (emphasis in original) (*quoting Pacor v. Higgins*, 743 F.2d 984, 994 (3d Cir. 1984)). Although "any effect" may appear to sanction a broad grant of authority, the *Celotex* Court warned that "a bankruptcy court's 'related to' jurisdiction cannot be limitless." *Id.* at 308.

Generally, courts find "related to" jurisdiction exists over a third-party action when "the subject of the third-party dispute is property of the estate" or "the dispute over the asset would have an effect on the estate." *Johns-Manville,* 517 F.3d at 65 (*quoting Feld v. Zale Corp.* (*In re Zale Corp.*), 62 F.3d 746, 753-54 (5th Cir. 1995)), *rev'd on other grounds, Bailey*, *supra,* note 7. Conversely, courts will not find "related to" jurisdiction exists over third-party actions "when the asset in question is not property of the estate and the dispute has no effect on the estate." *Johns-*

Manville Corp., 517 F.3d at 65. Additionally, that an action between non-debtor third-parties shares facts or other similarities with the debtor-creditor relationship is insufficient to establish "related to" jurisdiction over the third-party action. *Id.*

Here, the product liability claimants' successor liability claims—to the extent they exist under applicable state law—will be asserted solely against the non-debtor Purchaser and thus will not diminish the Debtors' estates. *See Zerand-Bernal Group*, 23 F.3d at 162 (in holding that product liability claim brought under state law theory of successor was not "related to" and did not "arise under" the Bankruptcy Code, explaining that the claimants' action was "neither by nor against the Debtor"). Further, such suits will not affect the Purchaser's offered acquisition price because the Purchaser is obtaining the assets largely through a credit bid. Therefore, the Court does not have "related to" jurisdiction over such claims, and cannot enjoin them.

Moreover, "[s]ubject matter jurisdiction cannot be 'conferred by consent' of the parties." *Binder v. Price Waterhouse & Co., LLP* (*In re Resorts Int'l, Inc.*), 372 F.3d 154, 161 (3d Cir. 2004) (*quoting Coffin v. Malvern Fed. Sav. Bank*, 90 F.3d 851, 854 (3d Cir. 1996)); *Cable Television Ass'n of New York v. Finneran*, 954 F.2d 91, 94 (2d Cir. 1992) ("[T]he parties may not confer subject matter jurisdiction on the court by consent.") (*citing Insurance Corp. of Ireland, Ltd. v. Compagnie des Bauxites de Guinee*, 456 U.S. 694, 702 (1982)). As such, the fact that the 363 sale is contingent upon entry of an order that enjoins successor liability claims is insufficient to establish "related to" jurisdiction, for "a debtor [cannot] create subject matter jurisdiction over any non-debtor third party by structuring a plan in such a way that it depend[s] upon thirty-party contributions." *In re Combustion Engineering, Inc.*, 391 F.3d 190, 228-29 (3d Cir. 2004); *cf., Johns-Manville*, 517 F.3d at 66 (it is "inappropriate for the bankruptcy court to enjoin claims brought against a third-party non-debtor solely on the basis of that third-party's financial

contribution to a debtor's estate."), *rev'd on other grounds, Bailey, supra*, note 7. The Debtors' desire to facilitate a 363 sale "may not be used as a jurisdictional bootstrap when no jurisdiction otherwise exists." *Id.* at 68.

Even the outside chance that allowing these claims to proceed after the sale might, if successful, give rise to a claim by the Purchaser against the Debtors for breach of the MPA is not in itself sufficient to establish "related to" jurisdiction. *Cf.*, *Pacor*, 743 F.2d at 995 (holding that a potential indemnity claim against the debtor did not give rise to "related to" jurisdiction over a third-party action because "[t]he fact remains that any judgment received by the [non-debtor plaintiff] could not itself result in even a contingent claim against [the debtor], since [the third-party defendant] would still be obligated to bring an entirely separate proceeding to receive indemnification.").

Finally, the Court lacks jurisdiction to enter the proposed Sale Order because a bankruptcy court does not have stand-alone powers to make determinations on common or state law questions. *Northern Pipeline Const. Co. v. Marathon Pipe Line Co.*, 458 U.S. 50, 84 (1982). After *Marathon*, Congress amended the law in 28 U.S.C. § 157(c)(1) to provide that bankruptcy judges may hear a non-core proceeding grounded in state law that is "*related to*" the bankruptcy case. The determination of whether the Purchaser is a successor (*e.g.*, under theories of "mere continuation," "continuity of enterprise," or "product line exception") is a question of state law. *See generally* Michael H. Reed, *Successor Liability and Bankruptcy Sales Revisited—A New Paradigm*, 61 BUS. LAW. 179, 184 (2005) ("The rights of common law successor liability claimants … usually are 'created and defined' by state law and clearly appear to be substantive rights"). Such traditional state law questions qualify under any measure as "non-core" matters as to which this Court may only submit proposed findings of fact and conclusions of law to the

district court (*see* 28 U.S.C. § 157(c)(1)), assuming it can even hear the matter at all (*see* 28 U.S.C. § 157(b)(5) ("personal injury tort and wrongful death claims shall be tried in the district court in which the bankruptcy case is pending, or in the district court in the district in which the claims arose"). *See Marshall v. Marshall*, 547 U.S. 293, 303 (2006) ("A bankruptcy court may exercise plenary power only over core proceedings. In noncore matters, a bankruptcy court may not enter final judgment; it has authority to issue only proposed findings of fact and conclusions of law, which are reviewed *de novo* by the district court").

Regardless, consideration of such issues is premature and not ripe for adjudication since the facts needed to establish the purchaser's post-sale order conduct cannot possibly be considered before the sale has even been consummated.. *See e.g., Bes Enterprises, Inc. v. Natanzon*, No. 06-870, 2006 WL 3498419, at *5 (D. Md. Dec. 4. 2006) (motion to dismiss denied because more facts were needed to establish the purchaser's post-sale order conduct).

III. The Purchased Assets cannot be sold "free and clear" of successor liability for future tort and product liability claims.

The Master Purchase Agreement and Proposed Sale Order contain language that purports to release the purchaser from successor liability for future product liability and tort claims. *See, e.g.*, MPA at 94 (stating that Purchaser will not have any successor liability "whether now existing or hereafter arising"). For two reasons, GM cannot be sold free and clear of claims that have not yet arisen. First, such future claims are not within the statutory language of § 363(f). Second, due process principles do not allow GM to eliminate rights of future claimants, who have not and could not have received meaningful notice that their rights in a future suit are being lost, and thus have had no opportunity to seek to preserve those rights.

To begin with, as discussed above, product liability claims in general are not "*interests in such property*" within the meaning of § 363(f). But even if such claims could be considered

"interests in such property" under that section, future claims cannot. People who have not yet suffered injury or loss because of GM's behavior cannot have an "interest in" GM's property because the injuries that would lead them to have such an interest have not yet even occurred.

Moreover, even if § 363(f) applied to "claims" (as opposed to just "interests in such property"), the future causes of actions of people who have not yet suffered a loss or injury due to the defect in their vehicles would not be covered. "The term 'claim' means . . . right to payment, whether or not such right is reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed, undisputed, legal, equitable, secured, or unsecured." 11 U.S.C. § 101(5)(A). A person who has not yet suffered a loss or injury has no right to payment of any kind from the debtor. As the Seventh Circuit stated in *Fogel v. Zell*, 221 F.3d 955 (7th Cir. 2000), addressing a hypothetical remarkably similar to the case at hand:

> Suppose a manufacturer goes bankrupt . . . . And suppose that ten million people own automobiles manufactured by it that may have the same defect that gave rise to [product liability] suits but, so far, only a thousand have had an accident caused by the defect. Would it make any sense to hold that all ten million are tort creditors of the manufacturer and are therefore required, on pain of having their claims subordinated to early filer, to file a claim in the bankruptcy proceeding? Does a pedestrian have a contingent claim against the driver of every automobile that might hit him? We are not alone in thinking that the answer to these questions is "no."

Id. at 960. *See also Epstein v. Official Comm. Of Unsecured Creditors of Estate of Piper Aircraft Corp. (In re Piper Aircraft Corp.)*, 58 F.3d 1573 (11th Cir. 1995) (holding that prepetition manufacture, design, sale, and distribution of airplanes was insufficient to establish a "claim" for future victims in the bankruptcy proceeding because "there [was] no preconfirmation exposure to a specific identifiable defective product or any other preconfirmation relationship between [the manufacturer] and the broadly defined class of Future Claimants"); *Lemelle v. Universal Mfg. Corp.*, 18 F.3d 1268, 1274 (5th Cir. 1994) (refusing to extend term "claimants" to

include people "whom the record indicates were completely unknown and unidentified at the time [the company] filed its petition and whose rights depended entirely on the fortuity of future occurrences"); *In re Chateaugay Corp.*, 944 F.2d at 1003-04 ("Accepting as claimants those future tort victims whose injuries are caused by pre-petition conduct but do not become manifest until after confirmation, arguably puts considerable strain not only on the Code's definition of 'claim,' but also on the definition of 'creditor.'"); *cf., Schweitzer v. Consolidated Rail Corp.*, 758 F.2d 936, 944 (3d Cir. 1985) (claims for personal injuries that developed after a bankruptcy not dischargeable "claims" or "interests" under prior version of Bankruptcy Act).

Furthermore, even if future claims were "interests in property" under § 363(f), GM's assets cannot be sold free and clear of them unless one of the five conditions set forth in § 363(f) is met. Here, GM is relying on § 363(f)(5), which allows sale free and clear of claims that can be "compelled, in a legal or equitable proceeding, to accept a money satisfaction of such interest." Future claims—causes of action that have not yet even accrued—do not and cannot be made to fit within this section. People with no current claim do not have an interest that can be reduced to a monetary value; they have not yet been injured, so they cannot know the nature or extent of an injury yet to occur. It would be impossible for GM to bring a proceeding against any future claimant to compel him or her to accept money in exchange for a claim that has not yet arisen. The plain meaning of the statute thus forecloses GM's effort to make the sale free and clear of these future claims.

The sale of GM "free and clear" of tort and product liability claims that have yet to arise also violates due process. Because people who will, but have not yet, suffered injury from defects in GM vehicles do not know that they will be injured in the future, they cannot be given either meaningful notice that their rights are being adjudicated or a meaningful opportunity to be

heard. As the Third Circuit stated in *Schweitzer*, it would be "absurd" to expect a "person who had no inkling" that he would be injured by the debtor's product years in the future to file a claim in the debtor's bankruptcy proceedings to preserve his rights. *Schweitzer,* 758 F.2d at 943; *see also In re Pettibone Corp.*, 151 B.R. 166, 172 (Bankr. N.D. Ill. 1993) ("[T]he argument implies that *uninjured* persons who wish to protect themselves in event of future injuries have the burden of monitoring national financial papers . . . to read notices about businesses they have no claims against because they are on notice of claim bar dates affecting any future injuries caused by such companies. Franz Kafka would have been able to accept such a legal principle in one of his stories; the Bankruptcy Code and the Fifth Amendment to the United States Constitution cannot.") (emphasis in original).

In its motion to approve the sale, GM requests that publication notice be deemed sufficient notice to those whose identities are unknown to the debtor. But the problem here is not just that GM has been unable to provide individualized notice to people with future claims; the problem is that people with future claims do not *themselves* know that they will be injured by defects in GM's products. Even if they saw a notice in a newspaper, people who have not yet been injured—some of whom may not even own a GM vehicle—would not know that the sale would affect them. These individuals have neither claims against nor knowledge that they will ever have a cause of action against GM. *See Schwinn Cycling & Fitness, Inc. v. Benonis (In re Schwinn Bicycle Co.)*, 210 B.R. 747, 760 (Bankr. N.D. Ill. 1997), *aff'd,* 217 B.R. 790 (N.D. Ill. 1997) (holding that it would violate due process to bind future victims to terms of sale order because "without knowing today who will be injured tomorrow, notice to particular individuals who may be injured in the future cannot be given" and "it is "doubtful that any general warning would have motivated future victims to participate actively in the bankruptcy proceeding");

Kewanee Boiler Corp. v. Smith (In re Kewanee Boiler Corp.), 198 B.R. 519, 538 ("Identifying persons who might come in close proximity to any of Kewanee's boilers that were manufactured imperfectly would have been impossible … [and] [w]hile a list could have been compiled of those who had purchased all the boilers, it is doubtful that notice to such parties and their employees could have reached all future victims of malfunctioning boilers or that anyone would have known what to do with notice of a bankruptcy as to which they then had no claim of injury.). And although some courts have sought to address the inability of people with future claims to be heard in court on those claims by providing for those people in the bankruptcy proceeding, GM has not done so here. *Cf., Stephenson v. Dow Chem. Co.*, 273 F.3d 249 (2d Cir. 2001) (holding that post-1994 asbestos claimants were not bound by settlement that purported to settle future claims but did not provide for recovery for injuries discovered after 1994).

Many courts have recognized the constitutional problem caused by attempting to discharge or foreclose future claims in a bankruptcy proceeding. *See In re Chateaugay*, 944 F.2d 997, 1003 (2d Cir. 1991) (recognizing the "enormous practical and perhaps constitutional problems" that would arise from considering future claims to be "claims" under the Bankruptcy Code); *Schweitzer*, 758 F.2d at 944 ("[A]n interpretation of 'interests' that included plaintiffs' future tort actions would raise constitutional questions."); *Mooney Aircraft Corp. v. Foster (In re Mooney Aircraft, Inc.)*, 730 F.2d 367, 375 (5th Cir. 1984) ("[L]ack of notice might well require us to find that the bankruptcy court's prior judgment was ineffective as to the [future claimants'] claims."); *In re UNR Indus., Inc.*, 725 F.2d 1111, 1119 (7th Cir. 1984) (stating that the difficulties of giving constitutionally adequate notice to the thousands of people exposed to asbestos sold by UNR but who had not yet developed asbestosis were "possibly insurmountable"). This Court should avoid the difficult constitutional questions that would arise from clearing the Purchaser of

liability for claims that do not yet exist, and make clear that the sale does not release the claims of consumers who will be injured or suffer losses in the future as a result of defects in GM vehicles.

CONCLUSION

The limits of the Bankruptcy Court's power will be on display in this case as never before. Through this objection, the Product Liability Claimant Advocates ask the Court to respect the jurisdictional boundaries of the Court, the statutory directives of Congress, and the due process requirements of the Constitution and deny the Debtors' request to bar present and future product liability claimants from pursing claims against the Purchaser post-closing under applicable state law theories of successor liability.

EXHIBIT A

"Interests in Property" as it Appears in the Bankruptcy Code

Section 101

(37) The term "lien" means charge against or **interest in property** to secure payment of a debt or performance of an obligation.

(54) The term "transfer" means--
(A) the creation of a lien;
(B) the retention of title as a security interest;
(C) the foreclosure of a debtor's equity of redemption; or
(D) each mode, direct or indirect, absolute or conditional, voluntary or involuntary, of disposing of or parting with--
(i) property; or
(ii) **an interest in property.**

Section 110

2)(A) A bankruptcy petition preparer may not offer a potential bankruptcy debtor any legal advice, including any legal advice described in subparagraph (B).

(B) The legal advice referred to in subparagraph (A) includes advising the debtor--

(vi) concerning how to characterize the nature of the debtor's **interests in property** or the debtor's debts; or

Section 362

When adequate protection is required under section 362, 363, or 364 of this title of **an interest of an entity in property**, such adequate protection may be provided by--

(1) requiring the trustee to make a cash payment or periodic cash payments to such entity, to the extent that the stay under section 362 of this title, use, sale, or lease under section 363 of this title, or any grant of a lien under section 364 of this title results in a decrease in the value of such entity's **interest in such property**;
(2) providing to such entity an additional or replacement lien to the extent that such stay, use, sale, lease, or grant results in a decrease in the value of such entity's **interest in such property**; or
(3) granting such other relief, other than entitling such entity to compensation allowable under section 503(b)(1) of this title as an administrative expense, as will result in the realization by such entity of the indubitable equivalent of such entity's **interest in such property**.

Section 362

(3) under subsection (a) of this section, of any act to perfect, or to maintain or continue the perfection of, an **interest in property** to the extent that the trustee's rights and powers are subject to such perfection under section 546(b) of this title or to the extent that such act is accomplished within the period provided under section 547(e)(2)(A) of this title;

(d) On request of a party in interest and after notice and a hearing, the court shall grant relief from the stay provided under subsection (a) of this section, such as by terminating, annulling, modifying, or conditioning such stay--

(1) for cause, including the lack of adequate protection of an **interest in property** of such party in interest;

Section 363

(e) Notwithstanding any other provision of this section, at any time, on request of an entity that has an **interest in property** used, sold, or leased, or proposed to be used, sold, or leased, by the trustee, the court, with or without a hearing, shall prohibit or condition such use, sale, or lease as is necessary to provide adequate protection of such interest. This subsection also applies to property that is subject to any unexpired lease of personal property (to the exclusion of such property being subject to an order to grant relief from the stay under section 362).

(f) The trustee may sell property under subsection (b) or (c) of this section free and clear of any **interest in such property** of an entity other than the estate, only if--

(1) applicable nonbankruptcy law permits sale of such property free and clear of such interest;
(2) such entity consents;
(3) such interest is a lien and the price at which such property is to be sold is greater than the aggregate value of all liens on such property;
(4) such interest is in bona fide dispute; or
(5) such entity could be compelled, in a legal or equitable proceeding, to accept a money satisfaction of such interest.

(h) Notwithstanding subsection (f) of this section, the trustee may sell both the estate's interest, under subsection (b) or (c) of this section, and the **interest of any co-owner in property** in which the debtor had, at the time of the commencement of the case, an undivided interest as a tenant in common, joint tenant, or tenant by the entirety, only if--

(1) partition in kind of such property among the estate and such co-owners is impracticable;
(2) sale of the estate's undivided **interest in such property** would realize significantly less for the estate than sale of such property free of the interests of such co-owners;
(3) the benefit to the estate of a sale of such property free of the interests of co-owners outweighs the detriment, if any, to such co-owners; and
(4) such property is not used in the production, transmission, or distribution, for sale, of electric energy or of natural or synthetic gas for heat, light, or power.

(*l*) Subject to the provisions of section 365, the trustee may use, sell, or lease property under subsection (b) or (c) of this section, or a plan under chapter 11, 12, or 13 of this title may provide for the use, sale, or lease of property, notwithstanding any provision in a contract, a lease, or applicable law that is conditioned on the insolvency or financial condition of the debtor, on the commencement of a case under this title concerning the debtor, or on the appointment of or the taking possession by a trustee in a case under this title or a custodian, and that effects, or gives an option to effect, a forfeiture, modification, or termination of the debtor's **interest in such property**.

(p) In any hearing under this section--

(1) the trustee has the burden of proof on the issue of adequate protection; and
(2) the entity asserting an **interest in property** has the burden of proof on the issue of the validity, priority, or extent of such interest.

Section 506

(a)(1) An allowed claim of a creditor secured by a lien on property in which the estate has an interest, or that is subject to setoff under section 553 of this title, is a secured claim to the extent of the value of such creditor's interest in the estate's **interest in such property**, or to the extent of the amount subject to setoff, as the case may be, and is an unsecured claim to the extent that the value of such creditor's interest or the amount so subject to setoff is less than the amount of such allowed claim. Such value shall be determined in light of the purpose of the valuation and of the proposed disposition or use of such property, and in conjunction with any hearing on such disposition or use or on a plan affecting such creditor's interest.

Section 522

(B) any **interest in property** in which the debtor had, immediately before the commencement of the case, an interest as a tenant by the entirety or joint tenant to the extent that such interest as a tenant by the entirety or joint tenant is exempt from process under applicable nonbankruptcy law; and

(d) The following property may be exempted under subsection (b)(2) of this section:
(5) The debtor's aggregate **interest in any property**, not to exceed in value $1,075 plus up to $10,125 of any unused amount of the exemption provided under paragraph (1) of this subsection.

(2)(A) For the purposes of this subsection, a lien shall be considered to impair an exemption to the extent that the sum of--

(i) the lien;
(ii) all other liens on the property; and
(iii) the amount of the exemption that the debtor could claim if there were no liens on the property;

exceeds the value that the debtor's **interest in the property** would have in the absence of any

liens.

(q)(1) As a result of electing under subsection (b)(3)(A) to exempt property under State or local law, a debtor may not exempt any amount of an **interest in property** described in subparagraphs (A), (B), (C), and (D) of subsection (p)(1) which exceeds in the aggregate $136,875 if--

(2) Paragraph (1) shall not apply to the extent the amount of an **interest in property** described in subparagraphs (A), (B), (C), and (D) of subsection (p)(1) is reasonably necessary for the support of the debtor and any dependent of the debtor.

Section 541

(a) The commencement of a case under section 301, 302, or 303 of this title creates an estate. Such estate is comprised of all the following property, wherever located and by whomever held:

(3) Any **interest in property** that the trustee recovers under section 329(b), 363(n), 543, 550, 553, or 723 of this title.
(4) Any **interest in property** preserved for the benefit of or ordered transferred to the estate under section 510(c) or 551 of this title.
(5) Any **interest in property** that would have been property of the estate if such interest had been an interest of the debtor on the date of the filing of the petition, and that the debtor acquires or becomes entitled to acquire within 180 days after such date--
(A) by bequest, devise, or inheritance;
(B) as a result of a property settlement agreement with the debtor's spouse, or of an interlocutory or final divorce decree; or
(C) as a beneficiary of a life insurance policy or of a death benefit plan.
(7) Any **interest in property** that the estate acquires after the commencement of the case.

(B) that is conditioned on the insolvency or financial condition of the debtor, on the commencement of a case under this title, or on the appointment of or taking possession by a trustee in a case under this title or a custodian before such commencement, and that effects or gives an option to effect a forfeiture, modification, or termination of the debtor's **interest in property**.

(d) Property in which the debtor holds, as of the commencement of the case, only legal title and not an equitable interest, such as a mortgage secured by real property, or an interest in such a mortgage, sold by the debtor but as to which the debtor retains legal title to service or supervise the servicing of such mortgage or interest, becomes property of the estate under subsection (a)(1) or (2) of this section only to the extent of the debtor's legal title to such property, but not to the extent of any equitable **interest in such property** that the debtor does not hold.

Section 546

(b)(1) The rights and powers of a trustee under sections 544, 545, and 549 of this title are subject to any generally applicable law that--

(A) permits perfection of an **interest in property** to be effective against an entity that acquires rights in such property before the date of perfection; or
(B) provides for the maintenance or continuation of perfection of an **interest in property** to be effective against an entity that acquires rights in such property before the date on which action is taken to effect such maintenance or continuation.

(2) If--

(A) a law described in paragraph (1) requires seizure of such property or commencement of an action to accomplish such perfection, or maintenance or continuation of perfection of an **interest in property**; and
(B) such property has not been seized or such an action has not been commenced before the date of the filing of the petition;

such **interest in such property** shall be perfected, or perfection of such interest shall be maintained or continued, by giving notice within the time fixed by such law for such seizure or such commencement.

Section 547

(d) The trustee may avoid a transfer of an **interest in property** of the debtor transferred to or for the benefit of a surety to secure reimbursement of such a surety that furnished a bond or other obligation to dissolve a judicial lien that would have been avoidable by the trustee under subsection (b) of this section. The liability of such surety under such bond or obligation shall be discharged to the extent of the value of such property recovered by the trustee or the amount paid to the trustee.

Section 548

(d)(1) For the purposes of this section, a transfer is made when such transfer is so perfected that a bona fide purchaser from the debtor against whom applicable law permits such transfer to be perfected cannot acquire an **interest in the property** transferred that is superior to the **interest in such property** of the transferee, but if such transfer is not so perfected before the commencement of the case, such transfer is made immediately before the date of the filing of the petition.

Section 1123

(a) Notwithstanding any otherwise applicable nonbankruptcy law, a plan shall--
(5) provide adequate means for the plan's implementation, such as--
(A) retention by the debtor of all or any part of the property of the estate;
(B) transfer of all or any part of the property of the estate to one or more entities, whether organized before or after the confirmation of such plan;
(C) merger or consolidation of the debtor with one or more persons;
(D) sale of all or any part of the property of the estate, either subject to or free of any lien, or the distribution of all or any part of the property of the estate among those having an **interest in such property** of the estate;

Section 1205

b) In a case under this chapter, when adequate protection is required under section 362, 363, or 364 of this title of an **interest of an entity in property**, such adequate protection may be provided by--

(1) requiring the trustee to make a cash payment or periodic cash payments to such entity, to the extent that the stay under section 362 of this title, use, sale, or lease under section 363 of this title, or any grant of a lien under section 364 of this title results in a decrease in the value of property securing a claim or of an entity's ownership **interest in property**;
(2) providing to such entity an additional or replacement lien to the extent that such stay, use, sale, lease, or grant results in a decrease in the value of property securing a claim or of an entity's ownership **interest in property**;
(3) paying to such entity for the use of farmland the reasonable rent customary in the community where the property is located, based upon the rental value, net income, and earning capacity of the property; or
(4) granting such other relief, other than entitling such entity to compensation allowable under section 503(b)(1) of this title as an administrative expense, as will adequately protect the value of property securing a claim or of such entity's ownership **interest in property**.

Section 1222

(b) Subject to subsections (a) and (c) of this section, the plan may--
(8) provide for the sale of all or any part of the property of the estate or the distribution of all or any part of the property of the estate among those having an **interest in such property**;

Attorneys for the Ad Hoc
Committee of Consumer Victims of General Motors

IN THE UNITED STATES BANKRUPTCY COURT
FOR THE SOUTHERN DISTRICT OF NEW YORK

In re:	:	Chapter 11
GENERAL MOTORS CORP., *et al.*,	:	Case No. 09-50026 (REG)
Debtors.	:	(Jointly Administered)

OBJECTION OF AD HOC COMMITTEE OF CONSUMER VICTIMS OF GENERAL MOTORS TO THE DEBTORS' MOTION PURSUANT TO 11 U.S.C. §§105, 363(b), (f), (k), and (m), AND 365 AND FED R. BANKR. P. 2002, 6004, AND 6006, TO (I) APPROVE (A) THE SALE PURSUANT TO THE MASTER SALE AND PURCHASE AGREEMENT WITH VEHICLE ACQUISITION HOLDINGS LLC, A U.S. TREASURY-SPONSORED PURCHASER, FREE AND CLEAR OF LIENS, CLAIMS, ENCUMBRANCES, AND OTHER INTERESTS; (B) THE ASSUMPTION AND ASSIGNMENT OF CERTAIN EXECUTORY CONTRACTS AND UNEXPIRED LEASES; AND (C) OTHER RELIEF; AND (II) SCHEDULE SALE APPROVAL HEARING

The Ad Hoc Committee of Consumer Victims of General Motors (the "Ad Hoc Consumer Committee"), by and through its undersigned counsel, hereby objects to the Debtors' Motion Pursuant to 11 U.S.C. §§105, 363(b), (f), (k), and (m), and 365 and Fed R. Bankr. P. 2002, 6004, and 6006, to (I) Approve (A) the Sale Pursuant to the Master Sale and Purchase

Agreement With Vehicle Acquisition Holdings LLC, a U.S. Treasury-Sponsored Purchaser, Free and Clear Of Liens, Claims, Encumbrances, and Other Interests; (B) the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases; and (C) Other Relief; and (II) Schedule Sale Approval Hearing (the "Sale Motion"). In support thereof, the Ad Hoc Consumer Committee respectfully represents as follows:

BACKGROUND

1. On June 1, 2009 (the "Petition Date"), General Motors Corp. and certain of its affiliates ("GM" or the "Debtors") filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code.

2. GM is one of the "Big Three" U.S. automakers. Each year it sells millions of vehicles to American consumers, some of whom unfortunately suffer injuries, sometimes catastrophic, as a result of manufacturing defects and other legally culpable conduct on the part of the Debtors.

3. The Ad Hoc Consumer Committee was formed to advance the mutual interests of its members and others similarly situated with regard to the financial reorganization of GM.

4. The Ad Hoc Consumer Committee has more than 300 members who each have product liability tort claims involving personal injuries (including derivative claims and wrongful death actions) against GM. The members of the Ad Hoc Consumer Committee are individuals who reside throughout the country, many of whom who have suffered devastating injuries as a result of flaws in GM vehicles.

5. Upon information and belief, GM is self-insured against personal injury claims based upon products liability up to $35 million per occurrence. As a result, it is unlikely that insurance proceeds will be available to satisfy almost any of the tort claims.

6. The Debtors are seeking approval of a Master Sale and Purchase Agreement (the "Purchase Agreement") between GM and certain of its affiliates and a U.S. Treasury-sponsored entity, Vehicle Acquisition Holdings LLC ("New GM"). The Purchase Agreement contemplates the sale of substantially all of GM's core operating assets to New GM.

7. The majority owner of New GM will be the U.S. Treasury.

8. Under the Purchase Agreement, New GM has agreed to assume certain liabilities, including liabilities for warranties provided for vehicles sold before the closing. (Purchase Agreement § 2.3(a)(vii)).

9. However, New GM has not agreed to assume the obligation for "Products Liabilities arising out of products delivered to a consumer, lessee or other purchaser of products prior to the Closing." (Purchase Agreement § 2.3(b)(ix)).

10. The proposed sale order provides that "the Purchased Assets shall be transferred to the Purchaser…free and clear of all liens, claims, encumbrances, and other interests of any kind or nature whatsoever, including rights or claims based on any successor or transferee liability." (Proposed Sale Order ¶ 7).

11. The proposed order further provides that all persons and entities "are forever barred, estopped, and permanently enjoined from asserting against the Purchaser, its successors or assigns, its property, or the Purchased Assets, such persons' or entities liens, claims, encumbrances, and other interests, including rights or claims based upon successor or transferee liability." (Proposed Sale Order ¶ 8).

12. Thus, if the sale is approved and the proposed sale order is entered, all successor liability claims against New GM, which will continue to sell the same vehicles that have been sold by the Debtors, are intended to be wiped out.

13. On April 27, 2009, in an effort to avoid bankruptcy, GM launched a public exchange offer for approximately $27 Billion of its unsecured bonds (the "Exchange Offer"). (Frederick A. Henderson Declaration (Doc. 21) ("Henderson Decl.") ¶ 71). The U.S. Treasury's consent to the Exchange Offer was conditioned upon, among other things, the conversion to equity of at least 50% of GM's obligations to the U.S. Treasury. (Henderson Decl. ¶ 72). The Exchange Offer expired on May 26, 2009 without achieving the threshold of acceptances required by the U.S. Treasury. (Henderson Decl. ¶ 73). If the Exchange Offer acceptable to the U.S. Treasury had been successful and GM had not filed bankruptcy, the tort claims would not have been extinguished.

OBJECTION

A. The "Sale" is an Illegal *Sub Rosa* Plan.

14. "It is well established that section 363(b) is not to be utilized as a means of avoiding Chapter 11's plan confirmation procedures." *In re Westport Stevens, Inc.*, 333 B.R. 30, 59 (Bankr. S.D. N.Y. 2005).

15. Section 363 "does not authorize a debtor and the bankruptcy court to 'short circuit the requirements of a reorganization plan by establishing the terms of the plan *sub rosa* in connection' with a proposed transaction." *In re Continental Air Lines, Inc.*, 780 F.2d 1223, 1226 (5th Cir. 1986), *quoting In re Braniff Airways, Inc.*, 700 F.2d 935, 940 (5th Cir. 1983).

16. The provisions of § 363 "do not allow a debtor to gut the bankruptcy estate before reorganization or to change the fundamental nature of the estate's assets in such a way that limits a future reorganization plan." *In re Babcock & Wilcox Co.*, 250 F.3d 955, 960 (5th Cir. 2001). A transaction should not be approved under § 363 if it "improperly and indirectly lock[s] the estate into any particular plan mode prematurely, and without the protection afforded by the procedures

surrounding a disclosure statement and confirmation hearing, in a plan of reorganization." *In re Public Service Co.*, 90 B.R. 575, 581 (Bankr. D. N.H. 1988).

17. The proposed transaction is not really a sale of assets. It is the reorganization of GM through a debt-for-equity exchange. There is no independent "buyer." The U.S. Treasury is obtaining its controlling equity interest in New GM by way of a credit bid.

18. There will be little difference between GM and New GM, except that the company will now be owned by its creditors. The New GM will be led by GM's current management and will continue to manufacture and sell Chevrolet, Cadillac, Buick and GMC brand vehicles. New GM will use the same offices, manufacturing facilities, suppliers and many of the same dealers to build and sell its products as GM has used and the workforce will remain unchanged.

19. GM's and the U.S. Treasury's decision to circumvent seeking approval of GM's reorganization through a confirmed plan will deprive tort claimants of critical procedural and substantive safeguards that are not available to them under § 363(f). *See In re Golf, L.L.C.*, 322 B.R. 874, 877 (Bankr. D. Neb. 2004) (noting that "§ 363(b) and (f) control asset sales prior to plan approval and require less notice and opportunity for hearing than § 1123(a)(5)(D) and § 1141(c), which govern sales made pursuant to a plan").

20. Among the rights being denied tort claimants by GM's and the U.S. Treasury's attempted evasion of the plan process mandated by Congress are those afforded under § 1122 (classification of claims), § 1125 (disclosure and solicitation), §§ 1126 and 1129(a)(7) (voting and acceptance) and § 1129(b)(2) (a plan may not be confirmed over objection of dissenting class unless the proponent establishes that it is "fair and equitable" and "does not discriminate unfairly").

21. In the recent case of *In re Gulf Coast Oil Corp.*, 2009 Bankr. LEXIS 313 (Bankr. S.D. Tex. 2009), the debtors sought approval of a sale of substantially all of their assets to their sole secured lender free and clear of successor liability claims by way of a credit bid. The court denied the debtors' motion for reasons that are equally applicable here:

> In this case, the essence of the proposed transaction is a foreclosure supplemented materially by a release, by assignment of executory contracts (but only contracts chosen by the secured lender), by a federal court order eliminating any successor liability, and by preservation of the going concern. Congress provided a process by which these benefits could be obtained. That scheme requires bargaining, voting, and a determination by the Court that Bankruptcy Code § 1129 requirements are met. The Court sees no authority to provide the benefits of the Congressional scheme in this case without compliance with Congressional requirements.

Id. at * 51.

22. The U.S. Treasury is misusing the § 363 sale process to, among other things, attempt to effectuate a cram down of unsecured creditors for which it could not obtain approval in a plan of reorganization under § 1129.

23. The United Auto Workers Union ("UAW") is identified by the Debtors on their Consolidated List of 50 Largest Unsecured Claims as an unsecured creditor, with a claim of $20.56 Billion. The claim represents the estimated net present value of GM's obligation to make contributions to the UAW Voluntary Employee Beneficiary Association ("VEBA") Trust. (Henderson Decl. ¶31 and n.3).

24. Under the proposed "sale" transaction, the UAW VEBA Trust will exchange its unsecured claim for 17% of the common equity in new GM, a note from New GM in the amount of $2.5 Billion, cumulative preferred stock of New GM in the amount of $6.5 Billion and warrants to purchase 2.5% of GM's equity. (Sale Motion ¶26). This is disparate and far better treatment than is being afforded to GM's other unsecured creditors.

25. In order to confirm a plan of reorganization over a class of unsecured creditors that has rejected the plan, the proponent must establish that the plan does not discriminate unfairly. 11 U.S.C. § 1129(b)(1).

26. "In general, the Bankruptcy Code is premised on the rule of equality of treatment. Creditors with claims of equal rank are entitled to equal distribution." *In re Sentry Operating Co. of Texas, Inc.*, 264 B.R. 850, 863 (Bankr. S.D. Tex 2001); *See also In re Granada Wines, Inc.*, 748 F.2d 42, 47 (1st Cir. 1984) (finding insufficient basis for distinguishing a pension fund claim from other general unsecured claims); *In re Arn Ltd. Ltd. Partnership*, 140 B.R. 5, 14 (Bankr. D.C. 1992) ("both trade claims and tort claims enjoy equal standing against the debtor's assets").

27. The preferential treatment of the UAW VEBA Trust violates the basic principle of equality that underlies the Bankruptcy Code and would not be allowed under a plan of reorganization.

28. The U.S. Treasury should not be permitted to manipulate the Bankruptcy Code to use § 363 to deprive tort claimants of their rights by making an end run around the plan of reorganization process protections.

B. New GM's Refusal to Assume Responsibility for Tort Claims is Not in Good Faith.

29. "When a bankruptcy court authorizes a sale of assets pursuant to §363(b)(1), it is required to make a finding with respect to the 'good faith' of the purchaser." *In re Abbotts Dairies of Pennsylvania, Inc.*, 788 F.2d 143, 149-50 (3d Cir. 1986). Indeed, a finding of good faith is a "crucial element" of a sale motion. *In re Summit Global Logistics, Inc.*, 2008 Bankr. LEXIS 896 at * 34 (Bankr. D. N.J. 2008).

30. The requirement of a finding of good faith "ensures that section 363(b)(1) will not be employed to circumvent the creditor protections of Chapter 11, and, as such, it mirrors the requirement of section 1129 that the bankruptcy court independently scrutinize the debtor's reorganization plan and make a finding that it 'has been proposed in good faith and not by means forbidden by law.''' *In re Abbotts Dairies of Pennsylvania, Inc.*, 788 F.2d at 150.

31. Courts apply "traditional equitable principles to define the term 'good faith." *In re Condere Corp.*, 228 B.R. 615, 631 (Bankr. S.D. Miss. 1998); *See also In re Exaeris, Inc.*, 380 B.R. 741 (Bankr. D. Del. 2008) (denying motion to approve sale where purchaser was an insider of the debtor, provided the debtor with post-petition financing, sought a release and insisted upon an expedited sale process).

32. "When a pre-confirmation §363(b) sale is of all, or substantially all, of the Debtor's property, and is proposed during the beginning stages of the case, the sale transaction should be 'closely scrutinized, and the proponent bears a heightened burden of proving the elements necessary for authorization.'" *In re Medical Software Solutions*, 286 B.R. 431, 444 (Bankr. D. Utah 2002), *quoting In re Channel One Communications, Inc.*, 117 B.R. 493, 496 (Bankr. E.D. Mo. 1990).

33. Under the circumstances of this case, New GM's refusal to assume successor liability for pre-closing products liability claims, or to otherwise provide for them by, e.g. purchasing post-occurrence insurance covering such claims, is not in good faith.

34. Until at least May 27, the U.S. Treasury was prepared to proceed with the restructuring of GM outside of bankruptcy. Under the out-of-court restructuring, at least 50% of GM's indebtedness to the U.S. Treasury and the UAW VEBA Trust would have been converted to equity. However, there would have been no Bankruptcy Court order approving a § 363 sale

transaction free and clear of products liability claims. Consumers grievously injured by defects in GM vehicles would have been permitted to maintain claims against the restructured GM entity owned by the U.S. Treasury and the UAW VEBA Trust.

35. New GM's viability is not dependent on New GM avoiding its liability for tort claims. If it was, GM and the U.S. Treasury would not have consented to an out-of-court reorganization under which tort claims would have survived.

36. It is clear that having determined that a bankruptcy was necessary to deal with bondholders who did not consent to the Exchange Offer, the U.S. Treasury seized on the opportunity to try to sweeten the deal for itself and the New GM by attempting to extinguish tort claims of taxpayers through a § 363 sale transaction.

37. New GM has agreed to assume the warranty obligations for vehicles sold pre-closing, but has refused to assume products liability claims arising from vehicles delivered to consumers before the closing. Thus, a consumer purchasing a GM vehicle before the closing will be able to have a defect in his vehicle repaired, but if the same flaw causes the consumer grievous personal injury, he will not be permitted to look to New GM for his medical expenses and other compensation. This is incongruous and unfair to tort claimants.

38. To make matters worse, knowing that it is seeking an order which would eliminate tort claims, GM has continued to advertise and sell GM vehicles without advising unwitting consumers that it is seeking to bar future claims for injuries arising from defects in vehicles sold before the closing. Such conduct is unconscionable, if not illegal.

39. New GM's failure to take on responsibility for tort claims will also harm others who are also already suffering from GM's financial collapse. If the sale is approved, GM's

dealers and component part suppliers will likely be exposed to such products liability and personal injury claims in greater numbers.

40. Further, as soon as consumers comprehend that New GM has avoided responsibility for tort claims, their confidence will be shaken and the value of used GM vehicles will drop perhaps dramatically, damaging millions of consumers.

41. The proposed sale would leave consumers injured by GM products – including quadriplegics, paraplegics, burn victims, the families of those killed and others, including those who have not yet suffered injuries – with little recompense. This condition of the sale has been dictated by the U.S. Treasury using the clout of its taxpayer dollars – the same dollars that the victims themselves have paid in taxes to a government that is supposed to protect them. Moreover, as demonstrated above, stripping of tort claim liabilities is unnecessary and would have no effect on the future viability of the New GM. As such, there is no legitimate reason to deprive thousands of injured consumers of their ability to obtain redress. The contemplated transaction on these terms is nothing less than shameful.

42. Since the purchaser has not acted in good faith, the "sale" should not be approved.

C. The Debtors Are Not Permitted to Transfer Their Assets to New GM Free and Clear of Tort Claims.

43. Section 363(f) of the Bankruptcy Code authorizes the debtor-in-possession, under certain specific circumstances, to sell property "free and clear of any interest in such property."

44. The term "any interest in such property" in Section 363(f) does not include *in personam* claims:

> Section 363(f) does not authorize sales free and clear of *any interest*, but rather of *any interest in such property*. These three additional words define the real breadth of *any interests*. The sorts of interests impacted by a sale "free and clear" are *in rem* interests which have attached to the property. Section 363(f) is not intended

> to extinguish *in personam* liabilities. Were we to allow "any interests" to sweep up *in personam* claims as well, we would render the words "in such property" a nullity. No one can seriously argue that that *in personam* claims have, of themselves, an *interest in such property*.

In re Fairchild Aircraft Corp., 184 B.R. 910, 917-18 (Bankr. W.D. Tex. 1995), *vacated on other grounds*, 220 B.R. 909 (Bankr. W.D. Tex. 1998).

45. As the court in *Fairchild Aircraft* explained, unsecured creditors do not have an interest in any specific property of the debtor:

> The closest analogy outside bankruptcy to the position of unsecured creditors in bankruptcy is that of the judgment creditor who has yet to abstract or execute its judgment. Such a creditor has an enforceable judgment that will support remedies such as levies, garnishment, or attachment, but until such steps are actually taken, the judgment creditor has no actual interest in any particular property of its debtor. If the judgment creditor never takes the additional steps necessary to convert its claims from one against the debtor personally, *in personam,* to one against the debtor's property, *in rem*, the creditor cannot be said to have any interest in the debtor's property. Bankruptcy gives an unsecured creditor, via the proof of claim process, the functional equivalent of a judgment against the debtor's estate - - but does not give the creditor an interest in any particular property of the debtor.

Id. at 919, n.6.

46. Section 363(f) does not permit sales free and clear of including tort claims because such claimants have no specific interest in any particular property of the debtor. *See In re Wolverine Radio Co.*, 930 F.2d 1132, 1147, n.23 (6th Cir. 1991); *Kattula v. Republic Bank (In re LWD, Inc.)*, 2009 U.S.Dist. LEXIS 17852 (W.D. Ky. 2009)

47. As a result, Section 363(f) "in no way protects the buyer from current or future product liability; it only protects the purchased assets from lien claims against those assets." *In re Schwinn Bicycle Co.,* 210 B.R. 747, 761 (Bankr. N.D. Ill. 1997), *aff'd* 217 B.R. 790 (N.D. Ill. 1997).

48. In *In re Trans World Airlines, Inc.*, 322 F.3d 283 (3d. Cir. 2003) (*"TWA"*), the Third Circuit determined that assets of a bankrupt airline could be transferred free and clear of employment discrimination claims under Section 363(f). The bankruptcy court followed *TWA* in entering an order allowing a sale to Fiat free and clear of tort claims in *In re Chrysler LLC*, 2009 Bankr. LEXIS 1323 at *73-74 (Bankr. S.D. N.Y. 2009), which order was affirmed by the Second Circuit.

49. This Court should decline to follow *TWA* because its holding expands the term "interest" as used in Section 363(f) far beyond its plain meaning.

50. While the Code does not define the term "interest," § 101(5) of the Code defines "claim" as "right to payment, whether or not such right is reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed, undisputed, legal, equitable, secured, or unsecured." Tort claims fall squarely and indisputably within this definition of "claim."

51. Section 1141(c) permits property "dealt with" by a plan of reorganization to vest "free and clear of all claims and interests."

52. The term "claim" is *excluded* from § 363(f) and *included* in § 1141(c).

53. "Where Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion." *Russello v. United States*, 464 U.S. 16, 24 (1983) (internal quotation marks and alteration omitted). In accordance with this rule, the Second Circuit has held that the use of the word "practicable" in one section of a statute and its omission in another part is "significant." *Riverkeeper, Inc. v. U.S. Envtl. Prot. Agency*, 475 F.3d 83, 102 (2d Cir. 2007); *see also Sompo Japan Ins. Co. of Am. v. Union Pac. R.R. Co.*,

456 F.3d 54, 71 (2d Cir. 2006) ("Therefore, that Congress, in enacting § 1307, omitted language similar to the language in § 1312 is persuasive evidence that Congress did not wish for period of responsibility clauses to have the force of statute with the capability to supersede federal law."); *cf. In re Beker Indus. Corp.*, 63 B.R. 474, 475 (Bankr. S.D. N.Y. 1986) (interpreting "value" as set forth in § 363(f)(3) of the Code *in pari materia* with "value" as used in § 506(a) of the Code).

54. This well-established canon of statutory construction shows that Congress's omission of "claim" in § 363(f) was intentional and that § 363(f) therefore applies only to "interests" -- not claims.

55. Moreover, this interpretation of the relevant statutory provisions makes perfect sense. Congress drafted § 1141(c) to be more expansive than § 363(f) because the former provides unsecured creditors with procedural and substantive safeguards that are not available to them under § 363(f).

56. The reasoning of the *TWA* court is flawed because it ignores the distinction between § 363(f) and § 1141(c). The court provided no grounds for ignoring this basic tenet of statutory construction, nor did it provide a compelling policy rationale for its interpretation of § 363(f).

57. Other courts that have reached decisions similar to that of *TWA* rely on two policy reasons to explain why claims should be extinguished by bankruptcy. These reasons are summarized by *Forde v. Kee-Lox Manufacturing Co., Inc.*, 437 F. Supp. 631, 633-34 (W.D. N.Y. 1977): (1) it is necessary to transfer title free and clear of claims to ensure that purchasers will "pay a fair price for the property"; and (2) it would frustrate the scheme of the Bankruptcy Code to permit claimants to "assert their claims against purchasers of the bankrupt's assets, while relegating lienholders to the proceeds of the sale."

58. However, those policy rationales -- which, in any event, should not be permitted to supersede the plain language of the statute -- have been discredited. The first argument pertains equally to all financially troubled companies, and "there is no reason to accord the purchasers of formally bankrupt entities some special measure of insulation that is unavailable to ailing but not yet defunct entities." *Chicago Truck Drivers v. Tasemkin, Inc.*, 59 F.3d 48, 50 (7th Cir. 1995). Further, as the Seventh Circuit explained, this issue should be of no concern to courts: "purchasers can demand a lower price to account for pending liabilities of which they are aware, and under federal successorship principles they will not be held responsible for liabilities of which they had no notice." *Id.* at 50-51; *see also R.C.M. Executive Gallery Corp.*, 901 F. Supp. 630, 637-38 (S.D. N.Y. 1995) (adopting reasoning from *Chicago Truck Drivers*).

59. The second rationale is no more compelling. A lawsuit that proceeds after a bankruptcy is completed "'cannot possibly affect the amount of property available for distribution to [the] creditors; all of [the debtor's] property has already been distributed." *Chicago Truck Drivers*, 59 F.3d at 51 (quoting *Zerand-Bernal Group, Inc. v. Cox*, 23 F.3d 159, 162 (7th Cir. 1994)). Thus, permitting a tort claimant to proceed against a successor will not disrupt the scheme provided by the Bankruptcy Code.

60. Accordingly, the Court should decline to follow *TWA* and should instead adhere to the plain language of § 363(f), which applies only to "interests" and does not extinguish "claims" such as the ones that the members of the Ad Hoc Consumer Committee possess here.[1]

---

[1] Even if Section 363(f) authorized a sale of assets free and clear of existing unsecured tort claims, a sale free and clear may not include future claims. *See Ninth Ave. Remedial Group v. Allis-Chalmers*, 195 B.R. 716, 732-33 (N.D. Ind. 1996). Thus, to the extent that the Court considers granting the Debtors' request that the sale be approved free and clear

...*Continued*

61. The Ad Hoc Consumer Committee reserves the right to join in any other objection filed to the Sale Motion and to supplement this objection at the hearing on the Sale Motion.

RESERVATION OF RIGHTS

62. By filing this limited objection, the members of the Ad Hoc Consumer Committee do not waive, and specifically reserve, their rights to proceed against New GM under applicable state law. *See e.g. Lefever v. K.P. Hovnanian Enterprises, Inc.,* 160 N.J. 307 (1999) (bankruptcy sale order did not preclude application of product-line successor liability); *Gross v. Trustees of Columbia Univ.*, 816 N.Y.S. 2d 695 (2006) (successor liability imposed against purchaser of assets free and clear of claims in bankruptcy proceeding); *Simmons v. Mark Lift Industries, Inc.*, 366 S.C. 308, 313 (2005) ("a plaintiff may maintain a state-based product liability claim under a successor liability theory against a successor corporation which purchased the predecessor's assets in a voluntary sale approved by the federal bankruptcy court").

CONCLUSION

WHEREFORE, the Ad Hoc Consumer Committee respectfully requests that the Court enter an Order denying the Sale Motion to the extent that the proposed sale order authorizes the transfer of assets to New GM free and clear of tort claims and granting such further relief as the Court deems just and equitable.

Continued from previous page

of tort claims (which it should not), the sale order should be modified to clarify that future claims are not precluded.

MEMORANDUM OF LAW

The Ad Hoc Consumer Committee submits that the points and authorities set forth above satisfy the requirements of Local Bankruptcy Rule for the Southern District of New York 9013-1(b).

GENERAL MOTORS CORP., *et al.*,	:	**Case No. 09-50026 (REG)**
	:	
	:	**(Jointly Administered)**
Debtors.	:	

JOINDER AND LIMITED OBJECTION OF THE STATES OF CONNECTICUT, KENTUCKY, MARYLAND, MINNESOTA, MISSOURI, NEBRASKA, NORTH DAKOTA AND VERMONT

TO THE HONORABLE ROBERT E. GERBER,
UNITED STATES BANKRUPTCY JUDGE:

THE STATES OF CONNECTICUT, KENTUCKY, MARYLAND, MINNESOTA, MISSOURI, NEBRASKA, NORTH DAKOTA, AND VERMONT (hereinafter the "States"), file this Joinder and Limited Objection (the "Limited Objection") to Debtors' Motion Pursuant to 11 U.S.C. §§ 105, 363(b), (f), (k), and (m), and 365 and Fed. R. Bankr. P. 2002, 6004, and 6006, to (I) Approve (a) the Sale Pursuant to the Master Sale and Purchase Agreement with Vehicle Acquisition Holdings

LLC, a. U.S. Treasury-Sponsored Purchaser, Free and Clear of Liens, Claims, Encumbrances, and Other Interests; (b) the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases; and (c) Other Relief; and (II) Schedule Sale Approval Hearing (the "Motion") [doc. no. 92] and in support hereof show:

I. INTRODUCTION[1]

The States file this limited objection in addition to, and not in lieu of, any other objection in which the States join or have joined. The States respectfully submit that certain provisions of the Motion seek relief that is beyond the authority of this Court to order. Specifically, the Motion seeks to have the proposed Order enter and thus conclusively determine that a purchaser, Vehicle Acquisition Holdings LLC, a new entity created solely for the purpose of acquiring Debtors' assets (referred to herein as "Newco") pursuant to the Motion is not a successor or transferee and that no liabilities may be placed on it based on such a status. To this end, the Master Purchase Agreement ("MPA") expressly provides:

> *No Successor or Transferee Liability.* Except where expressly prohibited under applicable Law or otherwise expressly ordered by the Bankruptcy Court, upon the Closing, neither Purchaser nor any of its Affiliates or stockholders shall be deemed to ***(a) be the successor of Sellers; (b) have, de facto, or otherwise, merged with or into Sellers; (c) be a mere continuation or substantial continuation of Sellers or the enterprise(s) of Sellers;*** or (d) other than as set forth in this Agreement, be liable for any

[1] In the interest of brevity, the States assume the Court's familiarity with the facts of this matter and do not restate them herein.

> acts or omissions of Sellers in the conduct of Sellers' business or arising under or related to the Purchased Assets. Without limiting the generality of the foregoing, and except as otherwise provided in this Agreement, ***neither Purchaser nor any of its Affiliates or stockholders shall be liable for any Claims against Sellers or any of their predecessors or Affiliates, and neither Purchaser nor any of its Affiliates or stockholders shall have any successor, transferee or vicarious Liability of any kind or character whether known or unknown as of the Closing, whether now existing or hereafter arising, or whether fixed or contingent,*** with respect to Sellers' business or any obligations of Sellers arising prior to the Closing, except as provided in this Agreement, including Liabilities on account of any Taxes arising, accruing, or payable under, out of, in connection with, or in any way relating to the operation of Sellers' business prior to the Closing.

(Emphasis added.) MPA, Section 9.19. The Debtors thus seek a judicial determination, before any such claim is ever made, that it is not, among other things, a successor or transferee, or even the "mere continuation," of the Debtors.

In addition to this broad and unfounded declaration that the purchaser will never be a successor or transferee, and will purchase the assets with a judicial order stating just that, the MPA explicitly excludes from assumed liabilities, and defines as a "Retained Liability," several classes of liabilities including, but not limited to, the following:

a) "all Product Liabilities arising out of products delivered to a consumer, lessee or other purchaser of products prior to the Closing." MPA, Section 2.3(b)(ix);

b) "all Liabilities to third parties for Claims based upon Contract, tort or any other basis." MPA, Section 2.3(b)(xi); and

c) "all Liabilities arising out of, related to or in connection with any (A) implied warranty or other implied obligation arising under statutory or common law without the necessity of an express warranty or (B) allegation, statement or writing by or attributable to Sellers." MPA, Section 2.3(b)(xvi).

All of these offensive provisions, taken as a whole, divest consumers of substantial legal rights, without any regard for state laws that may, when a claim is eventually made, be read to hold otherwise.

The States submit that this Court should not enter any order depriving purchasers of GM vehicles of legal rights to be compensated for death or serious injuries caused by defects in GM products. Any such order would be unfair, in violation of due process, and inconsistent with the public assertions by the President of the United States and the Debtor that consumers who buy General Motors products have no cause for concern. Specifically, President Obama stated:

> But just in case there's still nagging doubts, let me say it as plainly as I can: If you buy a car from Chrysler or General Motors, you will be able to get your car serviced and repaired, just like always. Your warranty will be safe. In fact, it will be safer than it's ever been, because starting today, the United States government will stand behind your warranty.

Remarks by the President on the American Automotive Industry, March 30, 2009.[2]

While the States recognize that the sale, in general, may be a worthwhile endeavor, the

States cannot countenance the Debtors' attempts to establish an unconscionable burden for injured consumers -- litigating whether this Court has the authority to approve the sale free and clear of product liability claims. Moreover, the States object to any provision of the MPA or the proposed Order that would simply dictate that result without completing a specific analysis of the facts and law applicable to successor status.

Thus, the States submit this limited objection and request that this Court order that any sale cannot be approved without the deletion or significant alteration of these specific "Retained Liabilities."

II. LEGAL ARGUMENT

A. Joinder

The States join in the arguments raised by the Ad Hoc Committee of Consumer Victims of General Motors in its Objection to the Motion and incorporate those arguments as if fully set forth herein.

---

[2] Available at: http://www.whitehouse.gov/the_press_office/Remarks-by-the-President-on-the-American-Automotive-Industry-3/30/09/.

B. State Successor Liability Law May Not be Extinguished by this Court in Approving the § 363 Sale.

The Motion seeks to have this Court permanently deprive presently unknown and unknowable future claimants of their rights to bring a future products liability claim against New GM premised on a theory of successor liability. This deprivation of rights is contrary to state laws concerning successor liability, and the bankruptcy court was not authorized to eviscerate such rights.

As the Second Circuit has recognized:

> [t]he traditional common law rule states that a corporation acquiring the assets of another corporation only takes on its liabilities if any of the following apply: the successor expressly or impliedly agrees to assume them; the transaction may be viewed as a de facto merger or consolidation; the successor is a "mere continuation" of the predecessor; or the transaction is fraudulent.

B.F. Goodrich v. Betkoski, 99 F.3d 505, 519 (2d Cir. 1996). Some states recognize a fifth exception known as the product-line exception. *See, e.g., Ray v. Alad Corp.*, 19 Cal.3d 22, 560 P.2d 3, 136 Cal.Rptr. 574 (1977); *Lefever v. K.P. Hovnanian Enters.*, 160 N.J. 307, 734 A.2d 290 (1999); *Martin v. Abbott Labs.*, 102 Wn.2d 581, 615, 689 P.2d 368 (Wash. 1984).

The product line exception holds that:

> where one corporation acquires all or substantially all the manufacturing assets of another corporation, even if exclusively for cash, and undertakes essentially the same manufacturing operation as the selling corporation, . . . the purchasing corporation [may] be held strictly liable for injuries

> caused by defects in units of the same product line, even if previously manufactured and distributed by the selling corporation.

In re Mooney Aircraft, Inc., 730 F.2d 367, 371 (5th Cir. 1984); *see also Ramirez v. Amsted Industries, Inc.*, 86 N.J. 332, 353 (N.J. 1981).

Some federal cases have, rightly, questioned the bankruptcy courts' authority to override the application of the successor liability doctrines developed by state courts. *See* 3-363 Collier on Bankruptcy-15th Edition Rev. P 363.06 (and the cases cited therein). For example, the First Circuit held that when claimants did not receive adequate notice about the pendency of a bankruptcy proceeding, the bankruptcy court could be prohibited from granting injunctive relief barring future claims. *See In re Savage Industries, Inc.*, 43 F.3d 714 (1st Cir. 1994).

More germane to the issue in the instant matter is the Seventh Circuit's holding in *Zerand-Bernal Group v. Cox*, 23 F.3d 159, 162 (7th Cir. 1994). There, the Seventh Circuit addressed the standard argument raised by parties attempting to sell or buy assets "free and clear" of future claims premised on the theory of successor liability. In essence, this argument posits that the price for which a purchaser is willing to purchase the debtor's assets will be depressed if the purchaser remains open to successor liability claims.

In rejecting this argument, Judge Posner explained:

> [a]ll this is true, but proves too much. It implies, what no one believes, that by virtue of the arising-under jurisdiction a bankruptcy court enjoys a blanket power to enjoin all future lawsuits against a buyer at a bankruptcy sale in order

> to maximize the sale price: more, that the court could in effect immunize such buyers from all state and federal laws that might reduce the value of the assets bought from the bankrupt; in effect, that it could discharge the debts of nondebtors . . . as well as of debtors even if the creditors did not consent; that it could allow the parties to bankruptcy sales to extinguish the rights of third parties . . . without notice to them or (as notice might well be infeasible) any consideration of their interests. If the [bankruptcy] court could do all these nice things the result would indeed be to make the property of bankrupts more valuable than other property--more valuable to the creditors, of course, but also to the debtor's shareholders and managers to the extent that the strategic position of the debtor in possession in a reorganization enables the debtor's owners and managers to benefit from bankruptcy. ***But the result would not only be harm to third parties . . . but also a further incentive to enter bankruptcy for reasons that have nothing to do with the purposes of bankruptcy law.***

(Emphasis added; internal citation omitted.) *Zerand-Bernal Group* 23 F.3d at 162.

In Connecticut, as is surely the case elsewhere, the "issue of whether a purchaser is a mere continuation of the selling corporation is a question of fact." *Chamlink Corp. v. Merritt Extruder Corp.*, 96 Conn.App. 183, 187, 899 A.2d 90 (2006). Here, the MPA specifically provides that Newco shall not be deemed to "be a mere continuation or substantial continuation of Sellers or the enterprise(s) of Sellers." MPA, Section 9.19. Thus, the Debtors are asking this Court to decide a question of fact that may be raised in the future by a consumer injured by a defective GM vehicle. This is emphatically the province of the state court hearing that future claim, and this Court should not prospectively rule on that question, and foreclose the future claimants' ability to seek redress under state law.

Recently, the Supreme Court has recognized that bankruptcy courts do not enjoy an all encompassing power to supplant state laws. *See, e.g., Travelers v. PG & E*, 549 U.S. 443, 450-51 (2007) (the "'basic federal rule' in bankruptcy is that state law governs the substance of claims, Congress having 'generally left the determination of property rights in the assets of a bankrupt's estate to state law."); *Raleigh v. Illinois Dep't of Revenue*, 530 US 15, 25 (2000) ("Bankruptcy courts are not authorized in the name of equity to make wholesale substitution of underlying law controlling the validity of creditors' entitlements, but are limited to what the Bankruptcy Code itself provides.") In accordance with the reasoning of the foregoing cases, this Court lacks the authority to discharge future claims premised on the state law theory of successor liability.

To allow Newco to purchase substantially all of the Debtors' assets, continue in the manufacture and sale of GM vehicles, enjoy the good will that comes along with the purchase of the GM name and brand, and still avoid any claims brought against it on the theory of successor liability contrary to state law is an unconscionable and wholly insupportable result that will harm innocent consumers. Victims of future accidents who would otherwise be able to bring claims against Newco under the product-line successor liability theory would be, if this Court enters the proposed order, forever barred from seeking redress.

A victim of a future accident who purchases a vehicle a week after the sale closing, and suffers the same injury, from the same product defect, on the same date, as a future victim who bought pre-closing, will retain the right to seek redress from Newco, but the person who bought the vehicle the day before the sale closing will not. This result is indefensible when a successor company, as is the case here, is maintaining the same product line.

This Court should not countenance such an attempt to supplant state successor liability law in favor of irrational and unjust results.

C. Public Policy Requires Allowing Future Claimants to Bring Product Liability Claims Premised on Nonbankruptcy Successor Liability Law.

As a matter of public policy and consumer safety, future product liability claims should not be treated as claims subject to discharge in bankruptcy. Under the Bankruptcy Act, "the term 'claim' means . . . right to payment, whether or not such right is reduced to judgment, liquidated, unliquidated, fixed, contingent, matured, unmatured, disputed, undisputed, legal, equitable, secured, or unsecured." 11 U.S.C. § 101. A person who has not yet suffered a loss or injury, however, has no right to payment from the Debtors, and cannot fall within the definition of a holder of a claim.

In *Lemelle v. Universal Mfg. Corp.*, 18 F.3d 1268 (5th Cir. 1994), the plaintiff was injured in a fire caused by a defective mobile home manufactured by a company which had been

discharged in bankruptcy two years prior and sued the defendant, which had by then acquired the debtor-manufacturer. The court there held that "the absence of evidence [that would have permitted the debtor to identify, during the course of the bankruptcy proceedings, potential victims and thereby permit notice to those victims] precludes a finding that the claims now asserted by victim-plaintiff were discharged in the bankruptcy proceedings." *Id.* at 1277.

The *Lemelle* court also stated that the definition of a "claim" cannot be construed to include those of victims "whom the record indicates were completely unknown and unidentified" at the time the debtor/manufacturer filed the bankruptcy petition "and whose rights depended entirely on the fortuity of future occurrences." *Id.*; *see also, Fairchild Aircraft Inc. v. Campbell*, 184 B.R. 910 (Bankr. W.D. Tex. 1995) (holding that executors of persons killed in an airplane crash held future claims, not bankruptcy claims, and therefore were not precluded from seeking successor liability against the purchaser of the aircraft's debtor/manufacturer.); *Gross v. Trustees of Columbia Univ. in City of N.Y.*, 2006 NY Slip Op 50516U, 6 (N.Y. Sup. Ct. 2006) (where state trial found that the "product liability claim stemming from Plaintiffs' injury was not a bankruptcy "claim" within the meaning of Bankruptcy Code § 101(5), but rather a 'future claim,' because the claim came into existence on the day the product liability claim was actually filed.")

Thus, courts have recognized situations where successor liability claims against purchasers are permitted, and the rights of future GM accident victims are exactly the type of

claims in which *Zerand* and *Lemelle* held that a bankruptcy court cannot extinguish future successor liability.

Moreover, some courts and commentators have properly recognized that public policy requires that successor liability be available as redress for future claimants, notwithstanding a § 363 sale order purporting to hold otherwise. As stated in Collier, "[s]uccessor liability is a nonbankruptcy state law issue, and bankruptcy should not change the result that would otherwise obtain under nonbankruptcy law." 3-363 COLLIER ON BANKRUPTCY-15TH EDITION REV. § 363.06.

As the Supreme Court of New Jersey has held regarding the product line exception, "[p]ublic policy requires that having received the substantial benefits of the continuing manufacturing enterprise, the successor corporation should also be made to bear the burden of the operating costs that other established business operations must ordinarily bear." *Ramirez v. Amsted Industries, Inc.*, 86 N.J. 332, 353 (N.J. 1981). Thus, by "acquiring all of the Johnson assets and continuing the established business of manufacturing and selling Johnson presses, Amsted became an integral part of the overall producing and marketing enterprise that should bear the cost of injuries resulting from defective products." *Id*.

Here, Newco, just like the purchaser in *Ramirez,* is acquiring substantially all of the operating assets of the Debtors and will continue the "established business of manufacturing and

selling" GM vehicles. Newco no doubt expects to profit from the continuation of the GM enterprise and the goodwill that enterprise has accumulated. To allow Newco to enjoy all the good that comes with operating the GM enterprise, and to shift the burden of accident costs to consumers, and ultimately the States, would be an unconscionable act.

In sum, as the *Ramirez* court stated, "because the manufacturer transfers to its successor corporation 'the resources that had previously been available to [the manufacturer] for meeting its responsibilities to persons injured by defects in [products] it had produced,' the successor rather than the user of the product is in the better position to bear accident-avoidance costs." *Ramirez v. Amsted Industries, Inc.*, 86 N.J. at 352 (*quoting Ray v. Alad Corp.*, 19 Cal.3d 22, 33, 560 P.2d 3, 136 Cal.Rptr. 574 (1977)).

Moreover, in the bankruptcy context generally, these important public policy protections require that future tort product liabilities should not be treated as claims subject to discharge. Because their claims have not yet arisen, and thus, they cannot know of them, future accident victims have not received and cannot receive meaningful notice that their rights in a future suit are being lost, and thus they have no opportunity to seek to preserve those rights, in violation of both sound policy and due process of law. *See*, e.g., *In re Mooney Aircraft, Inc.*, 730 F.2d 367-375 (5th Cir.1984) ("[L]ack of notice might well require us to find that the bankruptcy court's prior judgment was ineffective as to the [future claimants'] claims.")

Furthermore, public safety is significantly impacted by the discharge of product liability claims. The public safety risk is that unknowing citizens, perhaps not even owners of GM vehicles, could find themselves gravely injured by a defective GM vehicle. In this situation, the injured consumer could bear the entire, potentially overwhelming costs of medical care and associated expenses—an entirely unfair burden.

Newco's purchase of substantially all of the operating assets of the Debtors should not include an impenetrable shield which insulates Newco from all future product liability claims. To the contrary, public policy dictates that innocent and not yet injured consumers cannot and should not be compelled to bear the cost of future injuries caused by defective GM vehicles.

III. CONCLUSION

Wherefore, for the reasons stated above, the States respectfully object to the approval of the Motion or entry of the proposed Order in their current form and request that the Court grant relief only to the extent consistent with the positions taken herein.

Respectfully submitted,

ATTORNEYS FOR THE STATES OF ARKANSAS, ARIZONA, CALIFORNIA, CONNECTICUT, COLORADO, DELAWARE, GEORGIA, IDAHO, IOWA, ILLINOIS, INDIANA, KANSAS, KENTUCKY, LOUISIANA, MASSACHUSETTS, MARYLAND, MAINE, MICHIGAN, MINNESOTA, MISSOURI, MISSISSIPPI, MONTANA, NEBRASKA, NORTH CAROLINA, NORTH DAKOTA, NEW JERSEY, NEW MEXICO, NEVADA, OHIO, OKLAHOMA, PENNSYLVANIA, RHODE ISLAND, UTAH, VIRGINIA, VERMONT, WASHINGTON, and WEST VIRGINIA

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re:	:	**CHAPTER 11**
GENERAL MOTORS CORP., *et al.*,	:	**Case No. 09-50026 (REG)**
	:	**(Jointly Administered)**
Debtors.	:	

LIMITED OBJECTION OF THE STATES OF ARKANSAS, ARIZONA, CALIFORNIA, CONNECTICUT, COLORADO, DELAWARE, GEORGIA, IDAHO, IOWA, ILLINOIS, INDIANA, KANSAS, KENTUCKY, LOUISIANA, MASSACHUSETTS, MARYLAND, MAINE, MICHIGAN, MINNESOTA, MISSOURI, MISSISSIPPI, MONTANA, NEBRASKA, NORTH CAROLINA, NORTH DAKOTA, NEW JERSEY, NEW MEXICO, NEVADA, OHIO, OKLAHOMA, PENNSYLVANIA, RHODE ISLAND, UTAH, VIRGINIA, VERMONT, WASHINGTON, and WEST VIRGINIA

TO THE HONORABLE ROBERT E. GERBER,
UNITED STATES BANKRUPTCY JUDGE:

THE STATES OF Arkansas, Arizona, California, Connecticut, Colorado, Delaware, Georgia, Idaho,

Iowa, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Maryland, Maine, Michigan, Minnesota, Missouri, Mississippi, Montana, Nebraska, North Carolina, North Dakota, New Jersey, New Mexico, Nevada, Ohio, Oklahoma, Pennsylvania, Rhode Island, Utah, Virginia, Vermont, Washington, and West Virginia (collectively the "States"), file this Omnibus Objection to Debtors' Motion Pursuant to 11 U.S.C. §§ 105, 363(b), (f), (k), and (m), and 365 and Fed. R. Bankr. P. 2002, 6004, and 6006, to (I) Approve (a) the Sale Pursuant to the Master Sale and Purchase Agreement with Vehicle Acquisition Holdings LLC, a U.S. Treasury-Sponsored Purchaser, Free and Clear of Liens, Claims, Encumbrances, and Other Interests; (b) the Assumption and Assignment of Certain Executory Contracts and Unexpired Leases; and (c) Other Relief; and (II) Schedule Sale Approval Hearing (the "Motion") (Dkt. No. 92) and in support thereof show:

I. Preliminary Statement

The States do not oppose this sale, in general, or many of the provisions of the Motion, in particular. They do have numerous questions regarding the import of provisions of the Master Purchase Agreement ("MPA") as to which they have either not yet been able to obtain clarification from the Debtors or had those clarifications incorporated into a revised document. As such, the first portion of this Objection is included for protective purposes, to ensure that the States can continue to monitor these issues until a modified MPA is filed.

The other aspects of the Objection, though, are more substantive. Initially, the States object to the provisions of the Section 363 [1] sales order. In the guise of setting the terms for the purchase of assets, the MPA and the proposed Order greatly overreach, not only in violation of

[1] Unless otherwise stated, all statutory references herein are to section of the Bankruptcy Code, 11 U.S.C. ¶ 101 *et. seq.*

the Code but of state law, in disregard of the provisions of 28 U.S.C. § 959(b). The Order proposes to eliminate the effect of *all* laws that might be applicable to this transaction, a concept breathtakingly overbroad, not supported by anything in the Code and, ultimately, nonsensical.[2] The proposed Order would further have the Court "find" *ipse dixit*, that a purchaser thereunder is not a successor or transferee and that it cannot incur any unwanted liabilities *because* it is not a successor. The proposed Order contains at least 4 "findings" that a purchaser is not a successor or transferee, and 10 "so ordered" paragraphs denying such status to the purchaser and reciting the consequences of a lack of successor liability. What does not exist, though, anywhere in the Motion nor the accompanying Memorandum, is any indication by the Debtors as to what law (federal common law, or state law, and if so, the law of which state(s)) should be analyzed to decide whether, in fact, the new entity actually *is* a successor to GM. Nor do they describe the factual nature of the transaction and apply it against those criteria.

Rather, by virtue of their silence on the issues, they apparently are simply asserting that, as a matter of law, for *all* types of liability and for *any* jurisdiction, the purchaser automatically has no successor or transferee liability, simply because the purchaser does not *want* such liability. However, if successor liability only attaches to those who voluntarily assume it, instances of such liability would be few and far between. The law of successorship liability, though, does not turn solely on the parties' intent, but rather on the actual facts of the nature of the transfer between the parties. That is not to say that such liability automatically attaches here

---

[2] *See* Order, Par. 39 – "No law of any State or other jurisdiction . . . shall apply in any way to the transactions contemplated by the Section 363 Transaction, the MPA, the Motion, and this Order." Read literally, if no laws "of any jurisdiction" apply, then laws of the *United States* such as the Bankruptcy Code, equally do not apply to these issues. Thus, if the Court actually entered the order with that language, it would destroy its own jurisdictional basis to act!

– there are clearly certain limits applied through Section 363(f) and applicable nonbankruptcy law may or may not impose successor liability under the facts here[3] – but that determination, and the resultant order, must be far more refined than the shotgun approach taken here.

Here, for instance, although Newco has voluntarily accepted the employees' collective bargaining representatives, it undoubtedly would, under *Fall River,* have been treated as a successor for purposes of recognizing and bargaining with the Union, even if it had refused to do so. In short, there is much existing law on successorship obligations and, as the Seventh Circuit noted in *Chicago Truck Drivers, Helpers and Warehouse Workers Union (Independent) Pension Fund, et al., v. Tasemkin, Inc.*, 59 F.3d 48, 50-51 (7th Cir. 1995), that law does not lose all force simply because a bankruptcy is involved. That is particularly true where nonbankruptcy law provides rights to those doing business with the debtor and its successor (i.e. the dealers here), and the bankruptcy law does not preempt those State laws.

The States will discuss the issues in more detail below in order to indicate the limits that must be imposed on the attempts by the Debtor and the purchaser to write themselves

[3] Indeed, it may be that successor liability applies in some circumstances, and not in others. The courts have typically used a broad approach in considering claims relating to employees and collective bargaining rights, while using a more stringent standard for purely contractual issues. *See, e.g., Fall River Dyeing & Finishing Corp. v. NLRB* 482 U.S. 27, 41, 43 (1987) ("substantial continuity" test applied, without regard for changed ownership) *Shares, Inc. v. NLRB,* 433 F.3d 939 (7th Cir. 2006) *(*same); *Erica, Inc. v. NLRB,* 200 Fed.Appx. 344 (5th Cir. (2006) (bankruptcy sales order did not insulate successor from bargaining obligations. On the other hand, successor liability may not attach for purposes of ordinary claims if there is not a continuity of ownership in addition to continuity of operations. *See, e.g*., *Mickowski v. Visi-Trak Worldwide, LLC*, 415 F.3d 501, 510-13 (6th Cir. 2005) (holding that, for purposes of patent litigation, Ohio law applied to issue of whether purchaser of assets out of bankruptcy case was a successor to debtor; under that law, more was required than "substantial continuity," "mere continuation" must be shown). Issues such as environmental law and personal injury claims may fall along a spectrum where relevant nonbankruptcy law may impose specific duties on purchasers of contaminated property.

exemptions from applicable law. In doing so, as noted above, they do not seek to derail this sale – nor do they believe the changes they argue for would do so. In particular, the Master Purchase Agreement ("MPA") itself provides substantial leeway for the sale to proceed without any adjustment to the price even if there may be limits on which assets can be purchased and which contracts assumed or rejected based on nonbankruptcy law considerations.[4] Moreover, while the MPA provides in Section 9.19 that the purchaser shall not be deemed to be the successor of GM, nowhere does it state that such a status is a condition of the sale or that the purchaser will withdraw from the sale if that status is denied. Thus, the language of the proposed Order is far more apocalyptic than the MPA itself. In any event, no matter how worthy this transaction, it cannot justify wholesale disregard of all limits imposed by the Code and nonbankruptcy law.

II. Factual Background

In this case, the Debtors plan to sell several of their product lines to a new entity created solely for the purpose of acquiring those assets (referred to herein as "Newco").[5] Although a few

[4] *See*, e.g., Section 6.6(f) which, following language that allows the Purchaser to add or remove executory contracts for assumption or rejection provides that "No designation of any Executory Contract for assumption and assignment or rejection in accordance with this **Section 6.6** shall give rise to any right to any adjustment to the Purchase Price." Similarly, Section 2.4 recognizes that some assets that the purchaser seeks to acquire may not be transferable due to licensing issues. The paragraph merely requires the Debtors to use their best efforts to complete the transfer and Section 2.4(d) states "For the avoidance of doubt, the inability of any Contract, Transferred Equity Interest (or any other interest therein), Permit or other asset, which by the terms of this Agreement is intended to be included in the Purchased Assets to be assigned or transferred to Purchaser at the Closing shall not (i) give rise to a basis for termination of this Agreement pursuant to **ARTICLE VIII** or (ii) give rise to any right to any adjustment to the Purchase Price." In short, rather than a fragile document whose terms cannot be altered in any way without a collapse of the deal, the MPA has considerable flexibility in its final results.

[5] The Debtors are planning to separately sell their other brand lines to separate, preexisting, independent entities. Those sales are not at issue here. However, the fact that they still exist and remain part of the Debtors' operations after this sale closes may have some factual effect on the resolution of the successorship issues.

facilities will be closed, the vast bulk of their operations for those product lines will be transferred as a whole, with the employees, their supervisors, their managers, and the physical facilities continued intact. Some changes were negotiated with the employees' collective bargaining representatives; otherwise, their working conditions remain unaltered. Indeed, the Motion (Par. 65) states that the "transition services structure is designed to ensure a seamless continuity of operations for the benefit of employees, customers, suppliers, and employees of suppliers."[6] Prior to filing bankruptcy, the Debtors had reached agreement with many of their lenders on amounts that they would accept from the sale, had promised to continue warranty coverage for consumers, and, as noted, agreed with the collective bargaining representative of their employees on working conditions for the active employees and treatment of benefits for the retirees. Moreover, according to paragraph 22 of the Motion, "Substantially all the executory contracts associated with direct suppliers are likely to be assumed by the Sellers and assigned to the Purchaser at or following the Closing." In short, while, to be sure, Newco will have a new board and will attempt to execute a new business model (presumably one that will result in greater success as is the goal of all Chapter 11 debtors), the overall aspect presented by Newco when it commences operations (at least as to the facilities acquired) will be virtually indistinguishable from the old GM it replaces.

Thus, of all the constituencies that might be affected by this bankruptcy, there are only three that have largely been left out of the consensual process resulting in Newco and the assumption of their liabilities – governmental claims and obligations for matters such as tax and environmental liabilities; personal injury and related claims of consumers (including claims

[6] Note, though, that that agreement (Appendix T) has not yet been filed so it is not possible to determine exactly how that transition process will work.

under implied warranties of merchantability which Newco refuses to assume); and the rights that the Debtors' dealers seek to assert under their contracts and state laws governing the treatment of those contracts. Some of these liabilities, determined unilaterally by GM and Newco, are proposed to be assumed by Newco; others, those parties insist, need not be assumed, based on the mere assertion that Newco is not a successor. The States will deal with the legal arguments relating to these various issues below, including whether they are claims at all. Before turning to those arguments, though, added factual background on the States' laws dealing with the relationships between dealers and manufacturers (the "Dealer Laws") and the Debtor's actions in regard to those contracts will help set the context for the States' objections herein.

A. Statutory Treatment of Dealer Contracts

Issues regarding the disparity in treatment between auto manufacturers and dealers have been common for more than 80 years. As early as the 1920s, Ford was using its superior power to force dealers to take cars that they did not want and could not sell, particularly when the Great Depression hit. *See* Stewart Macaulay, *Law And The Balance Of Power: The Automobile Manufacturers And Their Dealers*, 13 (Russell Sage Foundation 1966) ("Macauley"). Contracts of adhesion that gave the manufacturers vast rights but imposed virtually no obligations on them were the norm – contracts that did not even require the manufacturer to supply cars to the dealers, for instance, were not uncommon. Indeed, ironically, the very lack of mutual obligations were treated as a reason to find that these really were not enforceable "contracts" at all and that, accordingly, no duty of "good faith" to the dealers existed. Macauley, *supra*, at 24. As a result of these long-standing issues, Congress passed the Automobile Dealer's Day In Court Act ("ADDICA").in 1956 (codified at 15 U.S.C. 1221-1225). In doing so, it noted that the "vast disparity in economic power and bargaining strength" between car dealers and car manufacturers

"has enabled the factory to determine arbitrarily the rules by which the two parties conduct their business affairs" and makes "the dealer an easy prey for domination by the factory." S.Rep. No. 2073, 84th Cong., 2d Sess., 2 (1956). The statute did not prove overly useful, though, in that, while it imposed general duties of good faith in operating under or terminating the agreement, it had no specific examples of what that required, and court decisions tended to take very narrow views of that duty, providing little relief to affected dealers.[7] Macauley, *supra*, 106-112.

Accordingly, states also took steps, before and after the passage of the ADDICA, to provide their own, more defined protections for dealers, and every state now governs that relationship to a greater or lesser degree. These Dealer Laws, while not identical, typically include requirements such as the need for both manufacturers and dealers to obtain operating licenses, limits on dealers being coerced to take unwanted vehicles, regulation of the right of a manufacturer to terminate its relationship with a dealer and the transition process and remedies for the dealer if the termination was allowed. That transition process might require a minimum shutdown period (typically in the range of 60-90 days); some assistance from the manufacturer to ensure disposition of vehicles, parts, and/or tools, including buy-back assistance; and, in some cases, assistance with lease payments on dealer premises. Many laws also provide protection against encroachment into the dealer's vicinity by other dealers, a regulation that has been

[7] The operative provision at 15 U.S.C. 1522 states: "An automobile dealer may bring suit against any automobile manufacturer engaged in commerce, in any district court . . . without respect to the amount in controversy, and shall recover the damages by him sustained and the cost of suit by reason of the failure of said automobile manufacturer from and after August 8, 1956, to act in good faith in performing or complying with any of the terms or provisions of the franchise, or in terminating, canceling, or not renewing the franchise with said dealer: Provided, that in any such suit the manufacturer shall not be barred from asserting in defense of any such action the failure of the dealer to act in good faith.

upheld by the Supreme Court, *New Motor Vehicle Board v. Orrin W. Fox Co.*, 439 U.S. 96 (1978).

Most critically, virtually all such laws bar manufacturers from coercing dealers to sign agreements that waive the provisions of the state law and make any contract that includes such waivers unenforceable. The states recognized that, absent such protections, the manufacturers would simply demand that dealers sign such waivers as a condition to retaining their dealership agreements and their laws' requirements would quickly become a dead letter. At no time, in the 53 years since the ADDICA was passed, has Congress limited or preempted the added protections provided by the state laws to those provided in the federal law. To the contrary, 15 U.S.C. § 1525 explicitly states that "This chapter shall not invalidate any provision of the laws of any State except insofar as there is a direct conflict between an express provision of this chapter and an express provision of State law which cannot be reconciled." Nor, has Congress sought to amend or revoke ADDICA, or indicated that it views the concerns that led to its passage as any less relevant now. Indeed, the repeated hearings by various Congressional committees to review the actions of Chrysler and GM with respect to their dealers underscore that this is a continuing matter of concern for the federal government as well as the States.

B. Treatment of Dealer Contracts in the Motion

Concurrent with its filing of the Motion (which, in addition to the sales language, contains additional provisions for assumption of contracts), the Debtors sent one of two letters to each of their dealers. Each letter informed the dealer that it had been tentatively chosen to either be a retained dealer or a terminated dealer. Each such letter informed the dealer that it had until June 12 to sign the letter without any changes and that the signed letters would amend the existing dealership agreements. If they signed the respective letters, the Debtors indicated, they

would move to assume the now-amended dealership agreements. If they did not, the tentatively retained dealers who received a "Participation Letter," ("PL") (Appendix A) were informed that they would be transferred to the ranks of the terminated dealers and treated accordingly. The terminated dealers were offered a "Wind-up Letter" ("WL") (Appendix B) that offered some limited financial assistance, but that required them to forfeit all other rights they had under state law. If those dealers did not sign the WL, the Debtors stated that it would reject their contracts and offer no assistance or otherwise comply with state laws regarding the rights of terminated dealers. The Debtors, after discussions with the National Auto Dealers Association, provided a second letter that modified the terms of the PL (also included in Appendix A). While that letter somewhat ameliorated the harsh – and unlawful – demands of the original letter, many problematic areas remain.[8] Both the PL and the WL initially required the signatories to waive their rights under State law (PL, pars. 6 and 8, WL, pars. 5 and 7). While the amended PL letter retreated from that provision somewhat, the WLs remain unaltered and provide that, upon signing the agreement, the dealer agrees that it can be enjoined from any assertions about the illegality of the agreement under state law (WL, par. 5(c)). Both agreements require the dealers to agree that the signing was purely voluntary and without any coercion – despite the fact that they were presented as non-negotiable, take it or leave it deals that required dealers to waive all violations of state law – including the provisions that made requests for such waivers unlawful. (See PL, par. 9(f), WL, par. 10).

[8] These are discussed in more detail below and in Appendices A and B, following copies of the relevant agreements, with citations to relevant statutes of various States. In order to not unduly increase the length of this objection, only a limited number of citations are used, but similar information can be supplied for all States if desired.
